There is a large settlement of the Ḥuwaṭṭāt on the Wādi Maḥnī, where they have many huts and thick palm groves; they only stay here during the rainy season between Marḥ and Muḥāsī-UNNA and al-Muḥāsībī (Moila), a station for pilgrims on the Red Sea, they have good pastures where they encamp during the rainy season with their numerous flocks of sheep and goats. In autumn they live in the oasis Dḥāt al-Ḥadīdī in the neighbourhood of Djiibel Ṭubālī, north of Tabūk. In the hot season they go back to Ghaza; here as well as in the little villages in al-Ḥiṣmā near al-ʿAqaba they tend their extensive date orchards and cultivate their fields of dhuara. In Yārib and other parts they sell butter, milk, goats and sheep to the pilgrims and travellers along the coast; in Nadīj they exchange dhuara for cattle. Many of the Ḥuwaṭṭāt are camel-drivers and camel dealers; those in Palestine are traders (particularly among the Beduins), in Burckhardt's time they carried on a busy trade with Cairo; every year a caravan of over 4000 camels went from the Ḥuwaṭṭāt to the Egyptian capital, where they brought wheat, barley and clothing. The Ḥuwaṭṭāt are considered descendants of the ancient Nabataeans; according to a common belief among them, they are descended from two brothers of the Harb [q. v.]. The founder of the tribe is said to have been Ḥwēt (Ḥuwaṭ), a native to Egypt, who came to al-ʿAqaba on a pilgrimage and is buried in al-Ḥiṣmā. Of the ten or twelve subdivisions of the Ḥuwaṭṭāt, which were given to him, Burckhardt mentions the following as the most powerful: the Omrān (perhaps identical with the 'Imrān) and northern neighbours of the Ḥuwaṭṭāt al-Ṭāhāma and the eastern desert and number nearly 800 families), al-Mesk and al-
litania and the country of Barak. Some even settled in the Sahara desert near the Lamba and took the name Hoggare (a contraction of Howar, Huwar); they would thus be the ancestors of the modern Tuareg. Others founded the town of Aghmat in Southern Morocco. They became converts to Islam but afterwards apostatized; they later zealously adopted the doctrines of the Khårîjids and shared in all their rebellions, in that of Abyd Yazid also, particularly those who had settled in Hriyliya, a region of Berber. They became so weakened by oppression by the Fàtîmid caliph Ismâ'îl al-Mansûr and later by the 'Abîdîn al-Qaisarî that they played no part in political affairs afterwards. In the sixteenth century we find them spread all over North Africa, between Baraka and Alexandria, from Tebessa to Béja and to the sea, in the valley of the Sîrân where they had founded the town of al-Basrî, which has now utterly vanished and between Mascara and Rlezane where they had built the Ka'âl of the B. Huwar, the modern Ka'âl of the B. Râshîd. One of their families the B. Khâş'-bî had founded a kingdom in Zirila; on its downfall they founded another in Fezzûn, which was destroyed by the Kurî 'Ara'în, who put the last ruler of this family, Muhammed b. Khâş'-bî, to death by torture, in order to gain possession of his wealth. Of those who occupied the central Maghrib Ibn Khaldûn says: (the tribes) graze herds of sheep, but as they are oppressed with taxes they no longer show the pride and independence, which once distinguished them when their armies won bloody victories. Scattered and weakened they are now despised”.

**Huwwärîn** a place on the road from Damascus to Palmyra and Homs, about midway between them. It is celebrated as a resort of Yazid I. The district was inhabited in 'Abîd al-Malik's time by Nabi, i.e. natives who were Christians and spoke Aramaic. This remained the case down to the time of the Mamlûks of Egypt. Yazid died at Huwwärîn and was buried there; this is confirmed by contemporary poetry. The inhabitants still point out a road called ✪Kûrî Yazid, 'Yazid's castle'. This name is probably only an echo of the literary tradition, according to which there were lasting links between Yazid and Huwwärîn.

---

**AL-IBÂDIYYA**, usually called ABDIYYA in North Africa, are the followers of 'Abîd Allah b. 'Abî [q.v.]. A few additions may here be made to what has been written in i. p. 3, chiefly with reference to the North African Abâ'dîyâ. The first rising of the Abâ'dîs took place in the last years of the reign of Marwan II, under 'Abîd Allah b. Yahyâ 'Allâb al-'Aqîq and Abû Hamza (129 = 747). 'Abîd Allah had homage paid him in 'Ahrâmûn, then conquered 'Asmûn and sent Abû Hamza to Mosâqa; the latter defeated the Omeyyad governor at Khûdâd and brought Medina also under his sway. In the following year 130 (748) however, Marwan sent 'Abîd al-Malik Ibn 'Abîyâ against him; Abû Hamza was put to flight in the Wâdî 'l-Ku'ra, took refuge in Mecca, whither 'Abîd al-Malik followed him, and was taken and executed there after a vigorous resistance. A short time afterwards the Abîdî caliph 'Abîd Allah b. Yahyâ met the same fate. According to Shahrastânî, ed. Coreton, p. 100, Abîd Allah b. Abîd also took part in this rising but this statement seems to be inaccurate, as Ibn Ibbâd, according to more reliable statements, died in the reign of 'Abîd al-Malik nearly half a century previously. A second rising under al-Djulandî in 'Oman in 134 (751-2) was put down by the 'Abâbdîs general Khâzîm b. Khuzaîma.

In the meanwhile the Abîdî movement spread to North Africa; on its vicesitudes there cf. the article AWâDÎTTES. In Arabia itself it found a hospitable soil in distant 'Oman and in time became the predominant sect there cf. the article OMÂN. From there it was later brought to Zanzibar.

The ABDIYYA form a separate community in Islam alongside of the Sunnis and 'Âshî'îs and have their own rules of faith and religious laws, which, however, on the whole agree with those of the Sunnis and only deviate on certain questions. They also recognise the Qu'ran and Hadîth as the source of religious knowledge, but instead of Idjmî and Kiyâs they have Ra'î [q.v.]. They show their Khårîjîs origin not only on these points but also on the question of the Imâmî, although in a different fashion from the Ahrârîs. We cannot here enter into details of their conception of Wilâyât, kara'a and walâfîf, especially as they are not agreed among themselves on this. Al-Shahrastânî, al-Baghâdhî, etc., mention a schism of the older Abâ'dîyya into 3 or 4 sects; the Hâfîyya, the Hârîhiyya, the Yezdiyya and those who admit of an obedience which has not God as its object. In the latter history of the community, notably in North Africa, further differences of opinion revealed themselves. Several theological works of their leaders are mentioned in Fihrist, p. 182 sqq., more about which is given in Bibliography to the art. ABDÎTTES. The chief source is the work made known by Sachau, *Mitteil. d. Semin. f. orient. Sprachen*, 21. Abteilung i. i. 99 sqq., and ii. 47 sqq., entitled ✪Kashf al-Ghâmma al-Qâmî 'l-Abhîr al-Ummâ.
Ibīlīs, the personal name of the devil. This name is probably a corruption of *dāhīs*, the native tribesmen derived from the root of *dāḥ*, "because Ibīlīs has nothing to expect (*ubīna* from the mercy of God). He is also called al-Shaṭīfān (Satan), 'Ādīnaw Allāh (enemy of God) or 'Ādīnaw Allāh-Shaṭīfān however is not a proper name. In the Kurʾān he appears mainly in the early history of the world (ii. 32; vii. 10; xv. 31 sq.; xvi. 63; xviii. 48; xx. 115; xxxviii. 74 sq.) as rebellious at the creation of Adam and as the tempter of Eve in Paradise. After Allāh had formed Adam [q.v.] out of earth and breathed the breath of life into him, he issued an order to the angels to bow down before him. The only one who refused to do so was Ibīlīs, because he, being created of fire, thought it beneath his dignity to pay homage to a being made of earth. He was therefore banished and cursed; but he begged postponement of his punishment till the Day of Judgment; he was granted this as well as power to lead astray all those who are not true followers of God. When Adam and Eve were in Paradise, he tempted them to eat of the fruit of the tree. Muḥammad has here combined two independent myths, the creation of Adam and the temptation of Eve in Paradise. It is to be noted that in the story of the creation, the devil is always called Ibīlīs; in the story of Paradise, however, al-Shaṭīfān, at least when not denoted by a pronoun. The story of Ibīlīs is based on Christian tradition. In the Life of Adam and Eve, § 15 (Kautzsch, Apokryphon) it is related that Michael had commanded the angels to worship Adam. The Devil objected that Adam was less important and younger than they; he and his hosts refused and were cast down upon the earth. According to the Schatzkohte (ed. Bezold, p. 15 sq. of the Syriac-Arabic text), God gave Adam power over all creatures. The angels thereupon reverence him except the Devil, who had become jealous and said: He ought to worship me, who am light and air, while he is only earth. He was therefore cast out of heaven with his hosts; then he was called Satan, Daemon, etc.

Muslim tradition has adorned the Kurʾānic account with various features, some well known. The difficulty had first to be overcome that in the Kurʾān Ibīlīs is numbered among the Djinn [q.v.] as well as among the angels, and these are usually considered two different classes of beings. Zamakhshari says that Ibīlīs is only a Djinn and that the name angel in the Kurʾān applies to both classes (Kashshāb on Sūra xx. 115). But it is also said that Ibīlīs was an archangel. Others say that the Djinn were a division of the angels, who had to guard Paradise (al-Djinnah); hence their name (Tabari, Annates, i. 80). These Djinn were created of the fire of Samīm (Sūra, xv. 27) while the angels are created of light (Tabari, ib., p. 81.) In the beginning the Djinn inhabited the earth. But they quarrelled with one another and finally blood was shed. Allāh then sent Ibīlīs who, at that time, bore the name of ʿAzīzīl or al-Jaḥīlīl, with a troop of angels against the brawlers who were driven back into the mountains. According to other accounts however, Ibīlīs was one of the earthly Djinn and was brought back to prison to heaven by the angels sent by Allāh to punish the unruly Djinn; he was still quite young at this time (ib., p. 84). The name al-Hakam is also given to Ibīlīs before his fall, as Allāh had appointed him judge over the Djinn, he filled this office for 1000 years. He then became vain of the name and created unrest among the Djinn, which lasted another 1000 years. Allāh then sent fire which consumed them; but Ibīlīs took refuge in heaven and remained a faithful servant of Allāh till the creation of Adam (ib., p. 85; Masʿūdī, Mawrid, i. 50 sqq.)

But there are other traditions about the pride of Ibīlīs. Tabari (ib., p. 85) relates that he felt himself superior to the other angels, whereupon Allāh said: "I will create a šīta on earth" (Sūra ii. 28); Tabari (ib., p. 79 sq.) further says that Ibīlīs was one of the archangels and ruler over the Djinn on earth and in the lowest heaven. He then became rebellious and was called Shaṭīfān radīm by Allāh.

In the discussion of the story of Paradise in Tradition it is related how Ibīlīs obtained access to Paradise. The view, also found in Christian authors, is generally prevalent that he made use of a serpent for this purpose. According to some authorities, he tried all the animals in vain; according to others, he began with the peacock, which he once saw at the gate of Paradise. He promised to tell him three words which would protect him from death on condition that he let him enter. But the peacock would not and told his experience to the serpent. The latter allowed Satan to sit between its teeth (according to others in its belly) and carried him in. The serpent was on intimate terms with Eve; and Satan now talked out of its mouth. He told the woman of the fruit of the tree which gave immortality, as an angel had told him. When Eve had gone to the tree, Ibīlīs appeared in the form of an angel. According to others he brought her the fruit of the tree himself, with the well-known result. Ibīlīs, Adam, and Eve were banished from Paradise and cursed. (The Kurʾān places the banishment of Ibīlīs after the story of the creation). The serpent, previously a beautiful quadruped was condemned to crawl upon its belly. Ibīlīs was granted postponement of his punishment. Henceforth he had to live in ruins, tombs and filthy places. His food is flesh offered to idols, his drink wine, his pastimes music, dancing, and poetry. His descendants are seven times more numerous than those of men.

In the end Ibīlīs shall be thrown into hell-fire with his hosts and the damned among men. "Then shall they (the idols) be thrown into it (i.e. into hell) as well as those who have been seduced and the hosts of Ibīlīs". (Sūra, xxvi. 94 sq.). The phraseology of this verse recalls Matthew, xxv. 41: 41: "Then shall they say also unto them on the left hand: Depart from me, ye cursed, into everlasting fire prepared for the devil and his angels".

But in the meanwhile he plays many a trick on men, and leads them astray except the believers
(czyć, xxiv. 19). The hájit [q. v.] so frequently mentioned in Arabic literature is often simply the voice of Iblis. For example, he is said to have warned 'Ali in this way not to wash the Prophet's corpse; another hájit then brought the Prophet's son-in-law into the right course again (Tha'labi, Kitaq, p. 44).

Allah once granted John the Baptist an interview with Iblis. He asked the Evil One, when he had the greatest influence on men and the answer was: "when they have eaten and drunk their fill". John thereupon resolved never to reach this stage.

On his propagation it is said that he lays two eggs as often as he rejoices over the rebelliousness of the children of Adam and young are born from these eggs. It is also said that he has both male and female organs and impregnates himself.

IBN (A.), Son.

IBN 'ABBĀD, Abu 'l-Kāsim Ismā'il b. 'Abd b. 'Abd b. al-'Abbās b. Ḍāhir b. Ahmad b. Ḍīrīs b. al-Tālibānī, vizier of the two Byzids Mu'aiyid al-Dawla and Fakhīr al-Dawla, born in Dhu al-Ka'ād 320 (September 938). His father was Rukn al-Dawla's vizier; he himself received the name 'al-Sāhibī (the companion) on account of his relations with Abu ʾl-Faqīl b. ʾAmīd b. b. Ṣināʾ al-Ahmād) or Mu'aiyid al-Dawla, who appointed him his secretary. After the fall of Abu ʾl-Fāth b. ʾAmīd (B. b. Ṣināʾ al-Ahmād) he was raised to the rank of vizier and when Mu'aiyid al-Dawla died in 373 (984) and the power passed to Fakhīr al-Dawla, the latter confirmed him in his office. He held the grand viziership till his death and during his long tenure of office exercised a very great influence over Fakhīr al-Dawla. In 377 (987-8) he undertook an expedition to Ṭabaristān, arranged affairs there and captured several fortresses. Ibn ʾAbbād died in late 385 (March 995) and was buried in Isfahān.

IBN 'ABBĀD, Abu ʾabd Allāh Muḥammad b. Abī Isrāʾīl Ḍīrīsī b. Abī Bakkār ʾAbd Allāh b. Mīlāk b. Ḍīrīsī b. Muḥammad b. Mīlāk b. Ḍīrīsī b. Yaḥyā b. ʾAbd al-Nāṣir al-Ḥimyarī al-Rundi, generally known as Ibn ʾAbbād, a lawyer, mystic poet, and preacher, was born in 732 (1332-3) in Spain at Ronda, where he spent his youth, learned the Qur'an by heart at the age of seven and began to study language and law. He then went to Fās and Tlemcen to complete his studies. He returned to Morocco, settled at Sala where he studied under Ahmad b. ʾAshīr; on the latter's death, after spending some time at Tangier under the Šūfi Abū Marwān ʾAbd al-Mālik, he was brought to Fās and entrusted with the post of kāhitīb at the mosque of al-Karawīyīn, which he held for fifteen years, i.e. till his death on Friday 3rd Rādjab 792 (= 17 June 1390). He was buried inside the Būb al-Futūh.

(M. H. Ben Chennel.)

IBN AL-ʿABBĀR, Abu ʾAbduʾllāh ʿAlmāṭī al-Muḥammād al-Ḥabūbī, Arab poet, lived at Seville and died in 433 (1041–42). Besides a Ḍīrāt, there should be attributed to ʿHādhīŷ al-Khaṭānī, who ascribed to him four works usually attributed to the author of the Tāμhīd and of the Ḍīrāt al-Šīrāzī [see next art.]

For over twenty years he was on the closest terms of intercourse with the principal traditionist of Spain, Abu ʾl-Raḥīm b. Sālim, who induced him to compile the Sūra of Ibn Baṣḥīwālī. He was also secretary to the governor of Valencia, Abī ʾAbd Allāh Muḥammad b. Abu Ḥāfṣ b. Abī Muʿmīn b. ʾAlī, and afterwards to his son Abī Zaid, and lastly to Zayyān b. Mardanīsh. When Don Jaime, king of Aragon, besieged Valencia in Ramadan 635 (April–May 1238), Ibn al-ʾAbbār travelled with an embassy to the Šūlān of Tunis, Abū Zakariyyā Yāḥyā b. ʾAbd al-Wāḥīd b. Abī Ḥāfṣ, to give him a document, by which the governor and people of Valencia recognized the suzerainty of the Šūlān kingdom. He met Abī Zakariyyā on the 4th Muharram 635 (17th August 1238) and recited to him a poem rhyming in ṣīn, in which he appealed for help for the Muslims. Soon after his return to Valencia, only a few days before or after the capture of the town by the Christians in Šafār 636 (Sept.–Oct. 1238) he sailed with his whole family to Tunis. According to Ibn Khallīkān, he went straight to Tunis, while
IBN AL-ABBĀR — IBN 'ABBĀD RABBĪHĪ

al-Ghubrānī assures us that he went first to Bougie and taught there for a time. The Sulṭān of Tunis received him graciously and appointed him his secretary, with the duty of writing the king's style and titles immediately under the basmāla in his edicts. But soon afterwards this office was taken from him and given to Abu l-‘Abbās al-Ghasanī, who was a matchless expert in Eastern calligraphy, which the Sulṭān preferred to the Maghribi hand. Ibn al-Abbār felt this insult deeply but continued in spite of all warnings to place the king's title upon the documents, which had been drawn up by him. Confined to his own house, he composed an Iṭāb al-Kutāba which he dedicated to the Sulṭān. The latter pardoned him and restored Ibn al-Abbār to office, mainly through the intervention of his son al-Mustanṣīr. After Abū Zakariyyā's death his successor al-Mustanṣīr made Ibn al-Abbār his trusted adviser, but the latter so offended the king and his courtiers by his behaviour that he was finally put to torture. Among his confiscated writings was found a satire against the Sulṭān, which so enraged the latter that he ordered its author to be slain by spear-thrusts. Ibn al-Abbār died on Tuesday morning, 20th Muḥarram 658 (6th January 1260) and on the following day, his body was burned along with his books, poems, and other products of his studies on one funeral-pyre. Ibn al-Abbār, who was called al-Fā'yar (the mouse) for some unknown reason, composed a number of works on history, tradition, literature, and poetry, of which only the following have survived: 1. Kitāb al-Tamāla li-Kitiḥāb al-Silah (ed. Codera, Madrid 1886); 2. al-Muḍjam fi Aṣḥāb al-Kāfī al-Māīn Abī 'Ali al-Sadafi (ed. Codera, Madrid 1886); 3. Kitāb al-Hilāla al-Siyār (one part pub. by Dozy, Leiden 1847—1851, another by Müller in Beitr. zur Gesch. der westl. Araber, München 1866—1878); 4. Tūḥfat al-Kādīm (Caisri, Bibli. Arab.-Asiip., I, N. 354, 3; Derenburg, Let. man. Arab. de l'Extrav., N. 356, 2); 5. Iṭāb al-Kutāba (Caisri, c. c., N. 1726). 

IBN ‘ABBAD AL-HAKAM, ABU AL-RAHMĀN B. 'ABBAD AL-HAKAM B. 'AYYĀN, ABU ‘L-KĀSIM, the earliest Arab historian of Egypt whose work has survived, was a member of a notable Egyptian family. His father, Abu ‘AbdAllah, died 214 = 830, was well-learned in tradition and jurisprudence, and the author of books in these fields; he was the head of the Mālikite school in Egypt, and was also associated with the Kāfī as censor of witnesses. His four sons were all men of importance: Muhammad, widely celebrated as a jurist and author, and his father's successor as leader of the Mālikites of Egypt; Abu al-Ḥakam, and Sa'd, also renowned (especially the former) for their learning; and Abu al-Rāmān. The family suffered in the persecution under al-Walīqī, refusing to subscribe to the doctrine of the created Korān; later, in the year 237, they became permanently disgraced in the community because of an emblems which was proved against them (al-Kindī, ed. Guest, p. 462 sqq., 472, 1 sqq.).

Abū al-Rāmān (generally known as Ibn ‘Abbād al-Hakam) died at al-Fustāt in 257 (871). He was mainly interested in tradition and made extensive collections based on the principal Egyptian authorities, of whom his father was one. His chief work was al-Fustātī, in seven Divisions, as follows: 1. Egypt, and its ancient history; 2. The Muslim conquest; 3. The Khiṭāba of al-Fustātī and al-Dījā, and the Isbādiya of Alexandria; 4. Organization and administration of Egypt under 'Amr b. al-'Āṣ, and the extension of the conquest beyond Egypt to the south and west; 5. The conquest of North Africa after the death of 'Amr, and the conquest of Spain; 6. The Kādis of Egypt, down to the year 246; 7. Egyptian traditions derived from the Companions of the Prophet who came to Egypt. The manner of the whole compilation shows its author to have been an expert collector of traditions and not very critical of his material. His chief interest was in the period of the Companions and their immediate successors; hence in his treatment of the Kādis he gives much space to the earliest, but less and less to the later ones down to his own day; hence also in his important chapter on the Khiṭāba the formal tradition holds a subordinate place, and he simply collects whatever information he can find.

The work of Ibn ‘Abbād al-Hakam was extensively used by the early historians of Egypt. Among the later works, Suyūṭī's Ḥum al-Muḥāḍara is in large part a transcript of it, and it furnishes Maḵzūmī with many chapters; in both cases the text quoted is much inferior to the original. Yākūt cites it in extenso for a considerable part of his Egyptian material. See further the Introduction to the edition of the Fustātī Mīr now (1914) being published in the Gibb Memorial Series, London.

There are ms. of the work in the British Museum, Paris (2), and Leiden (an abridgment). Partial translations have been made by Ewald (Zeitschr. f. Kunde d. Morgenl., iii, 3, 1840, p. 332—352), de Slane, Karle, Jones, La Fuente, and Torrey (in Bibl. und Semit. Studien, New York, 1901, p. 279—330); see Brockelmann, Gesch. d. arab. Litt., with the Nachträge.

IBN ‘ABBAD RABBĪHĪ, AHMAD B. MUḤAMMAD ABU ʿOMAR, a Spanish Arab author, born 10th Ramadān 246 = 29th Nov. 860 in Cordova, a freedman of the Umayyads ruling there, died 18th Djuḥadād 1 328 = 3rd March 940. His principal work is the anthology al-ʿIṣdī (the addition al-
farid was made by later copyists); it is divided into 25 books, which are called after jewels; the 13th book is called al-Wasif and the corresponding pairs on either side of it are called after the same jewels, in the second part with the addition of al-Yahya. The matter is taken from the usual adab books, the Ćuyan al-Abdār of Ibn Kutaiba being particularly made use of; the šāhī Ibn ʿAbdād [q.v.] is said to have rejected the book as it disappointed his expectation of finding Spanish history in it. It was printed at Būlāq 1293, Cairo 1303, 1305, 1317, 1321. Among his poems, of which all ʿAbdād was acquainted with more than 20 volumes, there was a Muṣḥaf Ḥaṭīq & Muṣḥaf Ḥaṭīq, which he called Muṣḥaf Ḥaṭīq; they were the love poems of his youth, to which he added in his old age concluding verses of ascetic tenor in the same metre and rhyme.

**IBN ʿABD AL-WAHḤĀB.** [See Muhammad.]

**IBN ʿABD AL-ŽĀHIR, MUIḤIYY ʿI-L-DĪN ABU ʿABD ALLAH b. RASHĪD AL-DĪN ABU MUḤAMMAD ʿABD AL-ZĀHIR B. NISHWAN AL-SAʿDĪ AL-RAWHĪ, born in Cairo on the 9th Muḥarram 620 = 1223, and died there in 622 = 1225 (Durrat al-Aslāk fī Durrat al-Ārāb, Orientalia, i. 148, p. 285; Wustenfeld, Geschichtsschreiber, No. 366). Not much is known about his life but he played an important part under the three Bahri Mamlikūs al-Malik al-Ẓāhir Baibars, al-Manṣūr Kalaun and al-Asfar Khalil as private secretary, Kātib al-Sār or Ṣāḥib Dīwān al-Inṣāq (on this office see Maʿṣūrī, Ḥaṭīṣ, i. 402; ii. 225 sq.; Quatremère, Histoire des Sultanat Mammouks par Maṣṣūrī, ii. 2, p. 222, Note 40, and 317 sqq.). According to some he was the first holder of this office, though others say his son; in other sources the office is said to be much older (see Maḥmūd’s work quoted below p. xiii, sq.) and he is said to have succeeded Ibn Lōqūn in 678 in the reign of Kalaun (Quatremère, i. 1, p. 7, 27). In this office he had to read all letters coming in and to compose all important letters and documents; he seems to have performed these tasks even in the reign of Baibars, for in 661, when Baibars took the oath of fealty to the Caliph, Ibn ʿAbd al-Ẓāhir was present and composed the caliph’s Khīfa (Quatremère, i. 1, p. 150, 183; Casanova, p. 495) in 662 he drew up the taḥṣil by which al-Malik al-Sādī was installed as heir-apparent (Quatremère, i. 1, p. 241), and later he drew up the marriage contract between him and Kalaun’s daughter (op. cit., i. 2, p. 132) he also wrote the tāḥṣil which declared Kalaun’s son as heir-apparent (op. cit., ii. 1, p. 26). In 666 he was with an Emir in ʿAkkā to receive the commandant’s oath of fealty, but without success (op. cit., i. 2, p. 57) and he looked after the affairs of state when Kalaun’s son was governor during his father’s journey (Casanova, p. 495). He spent some time in Damascus (Maṣṣūrī, Ḥaṭīṣ, ii. 324).

The Amāls which he compiled on the reigns of the three Sultanāhs above mentioned are of great importance. The biography of Baibars (Part i. to p. 663, Brit. Mus., No. 1229) was used by Maḥmūd and al-ʿAṣkalānī, Kitāb histān al-Maṣṣūmī (Noberg, p. xv–xg) and al-Naṣrī Shāhi made an excerpt from it (Casanova, p. 499 sqq.). The history of Kalaun is traced from 681 till his death and official documents are given (Casanova, p. 502). We only possess a third of the biography of al-Asfār (years 690–691), published by Noberg except some waṣṭ documents (see Bibli.). Of importance also is his Kitāb al-Manṣūrī b. ʿAbd al-Muṭawakki il aṣ-Ṣāfīr (J. H. K., ii. 147: iii. 161, 499), which Maḥmūd made great use of in his Khīṣāt chiefly for archaeology (Becker, Beiträge zur Gesch. Aegypten unter dem Islam, p. 23, 30; Guest in Journ. Roy. As. Soc., 1902, p. 120, 125). His Tamāmīn al-Ḥālāt in treatises of carrier-pigeons (Maṣṣūrī, Khīṣāt, ii. 231 Quatremère, ii. 2, p. 118, Note 49; Casanova, p. 505). For his other works see Brockelmann.

His son Fath al-Dīn ʿAbd al-Ẓāhir is also mentioned as Kātib al-Sār and seems to have attained an even higher position than his father in this capacity (Maṣṣūrī, Khīṣāt, ii. 226; Casanova, p. 497). He died before his father in Cairo.

**IBN ʿABDŪN, ABU MUḤAMMAD ʿABD AL-MAḤDĪ IBN ʿABDŪN AL-FIHĪR, a Spanish Arab poet, born in Evora, whose poetical talent early attracted the attention of the governor of the province of Faro, Omar al-Mutawakkil Ibn al-Āfafs, and when the latter became ruler of Idaqaz (see i. 178 sqq.) he became his secretary in 473 (1080). The fall of the Aqṣāṣ kingdom in 485 (1092) forced him to enter the service of Sir b. Abk Bakl, leader of the Arab troops. We afterwards find him again as secretary at the court of the Almoravid Ali b. Yusuf in 500 (1106). He died in his native town Evora in 529 (1134). Ibn ʿAbdūn owes his fame chiefly to a poem, much admired by the Arabs, entitled al-Baghāshīna and dealing with the fall of the Aqṣāṣ, ʿAbd al-Malik b. ʿAbd Allah al-Hadrāni wrote a historical commentary on it. The latter is known as Ibn Badrūn and was born in Silves and was still alive in 608 (1211) but nothing further is known of him. This commentary with Ibn ʿAbdūn’s poem was published by Dozy in 1846 under the title Commentaire historique sur le poême d’Ibn Abdoun par Ibn Badroun; Hoogvelt had previously published Prolegomena ad editionem celebrissimis Abn Abnūn poetaeis in luctuoso Aphäsladurum interium, Leiden 1839. The text of the poem itself is also given in al-Marrāṭkūsh’s history. Dozy, p. 53 sqq.; there is a French transl. by Faguer and a Spanish by Pons Boigues (see Bibli.). Imād al-Dīn Ibn al-ʿAlhir [q.v.] also wrote a commentary on it.

**Bibliography:** The Arabic sources are detailed in Dozy’s preface to his edition already
IBN 'ABDÚN — IBN ABI RANDAKA.

355

IBN ABI 'AMIR. [See AL-MANṢŪR.]

IBN ABI 'L-AWḌIJA, 'Abd al-Karim, uncle on his mother’s side of the celebrated Ma‘n b. Šītāda, a crypto-Manichaean, who was taken prisoner by Muhammad b. Sulaimān governor of Khūfa, and afterwards put to death in 155 (772) by him without the Caliph’s authority, for which some sources say the governor was dismissed. When he was being led to death he is said to have boasted that he had invented 4000 traditions which were contradictory to the prescriptions and prohibitions of Muslim law. He is said, for example, to have invented in the name of Dā‘ar al-Shālīk [q. v.] a calculation of the commencement of the fast in the month of Ramḍān, although the law is well known to lay it down that the exact moment for its commencement is not until the new moon has been seen. Among the Shi‘īs however the period of the new moon is fixed by calculation. Cf. Zeitschr. der Deutsch. Morgenl. Gesellschaft, lviii. 406.

IBN ABI DINĀR, Abu ‘Abd Allāh Muḥammad b. Abu ‘l-Kasīm al-Ru‘ainī al-Ka‘rawīnī, an Arab historian, wrote a history called al-Ma‘ṣī fi Alkhabūr ʿIrīṣīyya wa Tūnīs in 1110 (1698) or according to a statement in a manuscript in 1092 (1681). As he mentions in the preface the work falls into two divisions, the first contains the description of Tunis, the second of the conquests of the Franks by the Muslims, the fourth the history of the ‘Ubaydis, the fifth that of the Shīḥādīs, the sixth that of the Banū Ġāfīr, the seventh and eighth the history of Turkish rule. The final chapter discusses the latest events in Tunisia. The book was printed in Tunis in 1258 A. H. and translated into French by Pellisier and Rémusat, Paris 1845.

Bibliography: Roy, Extr. du Coll., des Manuscrits de la Bibl. de la Grande Mosquée de Tunis (Tunis 1900), no. 4960, p. 50; Brockelmann, Gesch. des arab. Litt., ii. 457. (KEANE BASKET.)

IBN ABI ‘L-DUNYĀ, Abu Bakkar Abū ‘Alā‘ al-Ba‘dūnī (‘Ala‘ al-Allāh) b. Muḥammad al-Ḥorashī, Arab author, born 208 = 828, a pupil of the ‘Abbasids Caliph al-Ma‘ṣūfī, died 14th Djamāda II 281 = 21st Aug. 894. Of his numerous works which were all devoted to Adab the following have survived: 1) al-Farādār bā‘d al-Šīhāda, modelled on al-Maḍīnī’s work of the same title, in Berlin (see Ahlwardt, Verzeichnis der ar. Hīṣāt der Kgl. Bibl., No. 8731), Damascus Žarīra b. Ḥabīb al-Ẓārīyāt, Khāṣṣat al-Kutub fi Dinawār al-Dawārīkhā (Cairo 1902), p. 30, No. 20, 2, printed in Ind. 1333, reprinted Cairo n. d.; al-Suyūṭī’s epitome, al-Arāfāt niṣīfār al-Farādār, in which other sources however were also used has been printed along with Ibn Ḥadīb al-Bā‘īn’s Hāj al-Talí under the title, Thubāt al-Maḥājir bi-Talalīh al-Farādār, Cairo 1317. 2) Kitāb al-Ifrāf, Vol. 2, Damascus, op. cit., p. 40, No. 132, 2. 3) Maḥārīm al-

IBN ABI ḤADJALAH, Ahmad b. Yahyā Abu l-ʿAbbas Shihāb al-Din al-Timīrī, Arab poet, known under the name of Omar b. al-Farāḥ, born in 725 = 1325 in Tlemcen, settled in Cairo after making the pilgrimage and died of the plague as superior of the Safi monastery founded by Manṣūr, on the 20th Dhū l-Ḥaḍād 776 = 5th May 1375. Of his works that have survived (detailed in Brockelmann, Gesch. des arab. Litt., ii. 13), the following are printed: 1) Diwān al-Sabāhā, a history of celebrated lovers with a selection of erotic poems, Cairo 1279, 1291, 1305 and on the margin of the Tāzīyin al-ʿArādāy of Dā‘ūd al-Anājīqī, Bukhār 1291, Cairo 1308. 2) Sāḥīd al-Sulṭān al-Malik al-Ḥaṣīfī, an anthology on the significance of the number 7 for Egypt, composed in 755 = 1355, Bukhār 1288. Bibliography: al-Suyūṭī, Ḥasan al-Muhājira, i. 529; Ibn Ḥabīb in Orientalia, ii. 440; Wüst Consulting, Geschichte der Araber, No. 437. (C. BROCKELMANN.)

that he spent a portion of his life at the court of the Zirid Mu'izz b. Badh, b. al-Mansūr (406–454 = 1016–1062) in Tunisia. It is also probable that he is identical with the Abu 'l-Hasan al-Maghrībi, who attended the astronomical observations made in 1378 (o88) in Baghdad by order of the Bayyid Sharaf al-Dawla under the supervision of the astronomer Abu Sahl Wa'īl b. Rustam al-Kūhī. From a prophecy in his principal astrological work we may conclude that he cannot have died before c. 1040. This book is entitled al-Kāfūr fi Aṭākh al-Naḏīm (the distinguished [book] on horoscopes from the constellations); it still exists in Arabic in various libraries (Brit. Mus., Ind. Off., Paris, Berlin, Escorial, etc.). It was translated by Jehuda b. Moses (1256) from Arabic to Spanish, and soon afterwards from the latter language into Latin by Aegidius de Telaldis and Petrus de Regio. The Latin translation was several times printed first of all in 1485 in Venice under the title: Praccolerisius liber totius in judiciis asterorum, quem editit Abbaohasa Halcy filius Abenragel, etc. He also wrote an Orastra on astrology on which Aḥmad b. al-Ḥasan b. al-Kūnīḏ al-Kusṭāntjīnī wrote a commentary in 1573 (Escorial, Brit. Museum, Oxford, Cairo).

IBN ABI 'L-RIDJAL, Aḥmad b. Sāliḥ, Arab historian, jurist and poet, belonging to the Shi‘ī sect of the Zaidis in Yemen, born in Shabān 1029 (July 1620) at al-Shabāṭ, a place in the Bilad Dhūrā in the district of al-Āhmēdīn, died in the night of Wednesday the 6th Rabī‘ I 1092 (25th–26th March 1681) aged 62 years, and was buried at al-Rāja (an hour’s journey N. of Shāfī‘) near a house which belonged to him. He spent his whole life in Yemen. He studied the Kurān, tradition, and law at Shefi‘a, Sa‘ān, Ta‘īz, Ibb, al-Hardja and Shāfī‘ and studied under all the Zaidi, as well as the Shāfī‘, Hanafi or Malikī scholars, who lived in Yemen or travelled through it, notably the Malikī Aḥmad b. Aḥmad al-Shabīb al-Kairawānī (died at Shāfī‘, where he was excommunicated by the Ta‘wīm of Euclid, on the 22nd Shu‘āb 1 1064 = 10th April 1654). He finally settled in Shāfī‘ where the Imām al-Mutawakkil ‘alā ‘īlah ‘isā b. al-Mansūr b. Khāmīnī (died 1087 = 1672) granted him the period of his reign (1055–1087 = 1645–1677) the offices of preacher in the mosque (Khiṭīb Shāfī‘) and secretary whose duty was to compose official documents as well as the answers to the theological and legal questions laid before the Imām.

1. His chief work is a biographical dictionary, arranged in alphabetical order, entitled Maṭla‘ al-Buljūr wa-Ḥājma‘ al-Buljūr, which contains about 1300 biographies of prominent members of the Zaidi sects of Iraq and Yemen, ranging from the sons and descendants of Zaid b. ‘Ali (died 121 = 739) down to the author’s own contemporaries. It was long thought to be lost and only

(MOH. BEN CHENEH.)
known from the extracts given by al-Muhbib (Kinsayt al-Athar, i. 220; Wustenfeld, Geschichte der, v. 583). It has only recently been discovered in its entirety in Milan (see Griffin, Lista dei manoscritti arabi nuovo fondo della Biblioteca Ambrosiana, in Riv. degli Studi Orientali, iv. 1046–1048, N.° 254–256 of the Lista; 18 of these biographies have been published by Griffin in his notes in an earlier essay, I Manoscritti Slavonica di Milano in Riv. di Stud. Or., ii. 28–38, 135–156; 1909). 

Alaça' al-Bu'dīrī, the author used various biographical collections which only survive in fragments in Milan, Berlin, and London manuscripts, particularly the works of Abīd Allah Ibn al-Wazīr (entitled Tārīkh Abī al-Wazīr), al-Ḥadīl (al-Tuhfa fi 'Ilmāni al-Zaidiya), Ibn Fand (al-Lawḥaṭī al-nadiya), al-Ḥakīm (al-'Uyūn fi Nāṣīr al-Zaidiya), Yalāyī b. al-Maḥdī al-Ḥasan, (Slitat al-Farāwān), the author of the Taḥākhat al-Zaidiya, and others. But he was always careful to call attention to the facts in the authorities utilised did not agree among themselves or with the historical traditions surviving down to his time in Yemen. He had also a good knowledge of the geography and archaeology of those districts of South Arabia in which he had travelled and his dictionary therefore gives information concerning them, which is of importance even for the numismatics and Arabic epigraphy of Yemen.

IBN ABI TĀHIR TAṬĪFIR, Abu l-Fāṣīl AHMAD, Arab man of letters and historian, born 206/821 at 'Abbāsids, died there in 280/903, a descendant of an Iranian family from Khurāsān (Marw al-Rūḥ), which was among the devoted adherents (Abīnā al-Dawāb) of the 'Abāṣīds, was first of all a teacher, then a private tutor in wealthy families and finally followed the trade of a copyist of manuscripts, for which he opened a shop in the Sīr al-Warrāqīn, 'Ahrām, at Qoṣr. A work by him on plagiarism (Kitāb Sārišāt al-Shāhara), now lost, made him several enemies who charged him with superficiality and the lack of a thorough knowledge of Arabic grammar. Al-Maṣāḥīb (Murūqī, vii. 333) thought highly of his poems, some of which he quotes, and al-Kaḥfī al-Baghdādi praised his learning. His father's nickname Taṭīfīr, means a 'hopping little bird', if it is not to be derived from the Old Persian takāpāt, 'son of the crown'. Of his Tārīkh Baghdadī only the sixth volume has survived in a unique manuscript in the British Museum, lithographed and translated into German by Dr. H. Keller (Leipzig 1908); it is the history of the city and the 'Abbāṣīde state from 204 (819) to the death of the caliph al-Ma'Mūn in 218 (833), and is one of the sources of the Annals of Tabari. His Kitāb al-Mamānī wa-l-Maṣāḥīb is an anthology of poetry and rhetoric, of which the eleventh (Bilāghat al-Nisā' wa-Tārīkh Kalamihna etc., Cairo 1326) and twentieth parts (out of 13) are preserved in the Brit. Mus. His 45 other works are lost.

Bibliography: Fikrist, p. 146; F. Wustenfeld, Geschichte der Araber, n. f. 78; Brockelmann, Gesch. d. arab. Litt., i. 138; Cl. Huart, Journ. Asiat., xth Ser., Vol. xliii. 1909, p. 533; (Cl. Huart.)

IBN ABI USĀIBĪA, MUWĀFAK AL-DĪN ABU l-A'BĀSS AHMAD b. AL-KAṢIM AL-SĀ'DI AL-KHAṬĪB, physician and biographer, born in Damascus in 600 (1203), studied medicine there and afterwards in Cairo at the al-Nasir hospital. Among his teachers special mention may be made of the famous Ibn al-Baṣīr (q. v.). In 634 (1236) he received a position in a hospital in Cairo, which he exchanged in the following year for the office of physician to the Emir 'Izz al-Def Amedir in Šāfḫād. There he died in 668 (1270). Ibn Abī Usāibīa's chief work are his biographies of celebrated physicians and doctors, which he composed under the title 'Iyān al-Aṣrī' fi Taḥākhat al-Abībī for the vizier Abu l-'Hāsan b. Ghazzāl al-Sāmīrī, ed. A. Muller, Cairo 1299 (1882), Preface, Königsberg 1884.

Bibliography: Leclerc, Histoire de la médecine arabe, ii. 187 f.; A. Muller, Über Ibn Abī Usāibīa und seine Geschichte der Arzte in Travaux du VI. Congr. intern. des Orientalistes à Leida, ii. 259 sq., and other articles, see the references in Brockelmann, Geschichte etc., i. 326.

IBN ABĪ ZAIT RAIKAWNY, ABU MUHAMMAD 'ABD AL-LĀH, ABU ZAIT, ABU AL-RAJIH, a Malikī jurist, belonged to a family which
came from Naṣrā whence the ethnic al-Naṣri, but he was born in 310 (922-3) at Kairuān, where he died on Monday 30th Shabbān 386 = 14 September 996 and was buried in his house.

He vigorously defended his school both in prose and verse and was perhaps the first who clearly expounded the principles of law. He was called Malikī for the younger and was and still is regarded as an authority. His teachers were numerous not only in Africa but also in the east on the occasion of his journey to perform the pilgrimage to Mecca. We may mention here his debt to Abū Bakr Muḥammad b. Muḥammad b. al-Labbād who is his best authority, Abū l-Ḥasan Ḥasan b. Muḥammad al-Khwālī, Abū l-ʿArab Muḥammad b. Ṭāwūs b. Tamīm Muḥammad b. Ṭāwūs al-Khwālī, Ibn al-ʿArabī, and others; he received ijāza from the most notable teachers of his time. Among his pupils are mentioned Abū l-Kāsim al-Barāḍī, Ibn al-Fāraḥ, etc. of the thirty works mentioned by his biographers only the following survive: 1. al-Risāla, a compendium of Maḥākī law finished in 327 = 939, publ. several times in Cairo; ed. by A. D. Russell and Abdullah al-Maʿṣūm Suḥrawardī, First Steps in Muslim Jurisprudence consisting of excerpts from Bihār al-ʿAṣwad of Abū ʿAbd Allāh Suḥrawardī, Arabic text, English trans., notes, and short hcter. and biogr. introd., London 1906; Fagnan, La Risala de Kayrawani, French transl., Paris 1914; 2. A collection of traditions. Brit. Mus., Cat. Cod. MSS. Or., n. 888, viii.; 3. A poem in honour of the Prophet, Brit. Mus., Cat. n. 1617, x.

Ibn Abī Zār: Abū ʿl-Ḥasan (var. Abū ʿl-Ḥusayn) al-Fāsī, historian of Maqārib, author of two works, one entitled Zhakaat al-Murūsīhī fī Abūbār al-Zamān, which seems lost, the other Al-Insān al-murūbi bi-Rawd al-Kītāb fī Abūbār Maqāribī wa l-Tirīkīt al-Muqattat fī al-Insānī ilā l-Murūbi, nothing is known of the name of the author, who is also called Abū Muḥammad Ṣaḥīḥ b. Abū al-Ḥasan al-Qarsī. His work, which begins with the Idrisid dynasty, is very important for the history of Morocco to 724 (1324), a date which cannot be much before the year of his death. He is some times quoted by Ibn Khaldūn. He made use, often without naming them, of a certain number of authorities and it seems, at least under the Marīnids, of official documents also. His book forms the basis of a work (or was rewritten) by Muḥammad b. Kāsim b. Zākūr (died 20 Muharram 1120 = 11 April 1078), entitled Muʿaṣīr al-muḥājirīn 'ammā taḥṣamāna' l-Anṣār al-murūbi wa Rawd al-Muqattat fī al-Ālami, al-Anṣār al-murūbī fī al-Murūbī, Fās 1313, p. 258. It was translated for the first time by Tornberg, Annales regum Mauritaniae, with Latin translation and notes, Upsala, 2 v., 1843–1846, and lithographed at Fās 1303 A. H. It was translated in a very unsatisfactory fashion into German by Dombay, Geschichte der mauritaniaischen Könige, Agram, 1794–7; into Portugese by Moura, Historia dos soberanos moza-

IBN ʿADHĀRĪ. [See Ibn al-Dhīlājī.]

IBN AL-ʿADI. [See Kamāl al-ʿAdnī.]

IBN ʿADJARRĀD, Abū ʿAli al-Karīm, a Khārijī sectarian, after whom his adherents are called ʿAdjarīda. We possess no data for his biography; from al-Shahrastānī's account it can only be deduced that he was one of the followers of ʿAtiyāya b. al-ʿAswād al-Hanafī. This ʿAtiyāya however was at first a follower of Nabdīja b. ʿAmīr [9 v.] but afterwards separated from him and became chief of the Khārijīs of Sidjīsīn, Khorsān, Kirman and Kāhānī. His date is thus the first half of the viii. century and although he, like ʿAtiyāya, had separated himself politically from Nabdīja, both belonged, from the point of view of the historian of religions, to that section of the Khārijīs who are called Nabdījīn after Nabdīja or Nabdīja, after the district in which he appeared, i.e. to those who occupy a position midway between the rigid Azațūn and the milder Ibāštīya. According to al-Baghdādī, the ʿAdjarīda were divided into 10 minor divisions; the ʿAmīzīna, the ʿShūʿāʿība, the Maimūnīna, the Khalafīna, the Maʿṣūrīna, the Madhjīna, the ʿShīla, the Ḥaṭāba, and the ʿAmīzīna who are again divided into 6 sections. The tenth not mentioned by him is probably the ʿAtīja, mentioned by al-Shahrastānī. Among these the Ḥaṭāba may be particularly mentioned on account of the part which their chief, ʿImāma b. Ṭaṭa, played in politics for many years, till he finally died of wounds in the reign of al-Maʿṣūm. Ṭabar only briefly mentions him but al-Baghdādī gives many details of him.

IBN ʿADJURRĀM, Abū ʿAbd Allāh Muḥammad b. Muḥammad b. Dāwūd al-Sanṣādī, known as Ibn ʿAdjurram, a Berber word which means, according to the commentators, religious-minded and stiff (ascetic, Shīla: agnūram). His grandfather Dāwūd is said to have been the first to bear this name. His relatives belonged to the neighbourhood of the little town of Šafūr but he was born at Fās in 672 (1273-4) and died there on Sunday 20th Safar 723 (1st March 1324). He was buried the next day within the town in the Andalusian quarter near the Bāb al-Djiyāq (wrongly Bāb al-ʿ Ḥadīd) which now bears the name Bāb al-Ḥamrāʾ (it is now closed) to the right of the Bāb al-Futūh.

After studying in Fās he performed the pilgrimage to Mecca and, while passing through Cairo, studied under the celebrated Andalusian grammarian Abū Ḥayān Muḥammad b. ʿUsuf of Gra-
Among the numerous commentaries, it is only necessary to mention only those that are printed. As to those which are in libraries the reader may be referred to the printed catalogues and the monographs mentioned in the Bibliography.

11. Shāhī al-Dīn Muhammad b. Muhammad al-Rū‘aynī, better known as al-Hāṣāb al-Makki al-Mashkīl, Mutanāmimat al-Durrārīyā, with glosses of:

(Moh. Ben Chener)
IBN AL-AHMAR. [See MUHAMMAD b. YUSUF.] finally succeeded in driving out the undisciplined
(the modern citadel of the town) for his operations against Tripolis. Ibn ʻAmmār succeeded in defending himself for some years. Raymond died in 498, but his successor drew an even stronger ring round the town. In 501 ʻAmmār decided to seek the help of the Ṣaljūqs Sulṭān Muḥammad in Baghdād and left Tripolis. His absence had disastrous results [see Tripolis]. The inhabitants handed over the town to the Fāṭimid caliph. The latter seized ʻAmmār’s treasures, his followers and his family. Tripolis was thus deprived of him by his resources and his best defenders. ʻAmmār, who had not been able to persuade the Sulṭān to send an expedition to his help, did not return to Tripolis. He occupied Djiyala for a time with the help of the troops of the Āţābeg Toğhtegin of Damascus. In 502 Tripolis and Djiyala fell into the hands of the Franks. ʻAmmār remained for a time at Toğhtegin’s court and was granted al-Zabādānī (in the valley of the Barāda) in fief by the latter. He then went to the court of Maṣ’ūd, prince of Mōsul, and remained his vizier till 512.

In 512 ʻAmmār was later in the service of the ʻAbbāsid caliph (Ibn al-Mtir, ed. Ternerg, xii. 365, 399). The family of ʻAmmār seems to have come to Egypt from the Maghrib with the Fāṭimid caliphs; al-Ḥasan b. ʻAmmār, the chief of the Kiṭāma, is mentioned towards the close of the ivth century A. H. as a high official in Egypt. A member of the family, ʻuṣuf of Alexandria, was executed as a traitor in 487. The name of the Banī ʻAmmār is associated with the zenith of Tripolis’ prosperity. As Aleppo under the Ḥamdīṣūd Saʿīd al-Dawla was a centre of the ʿAbābīd, and Tripolis under his ʻAmmār b. ʻAmmār was a celebrated seat of learning. To the ʻuṣuf al-Mulk ʻAmmār fell the difficult task of defending Tripolis against the attacks of the Crusaders, but he could not hold out permanently on account of the discord among the Muslim chiefs.

M. Sobernheim.

IBN ʻA-MMĀR, ABU BAKR MUhammad b. ʻAli, MUHJJ b.-DTN, AL-ʻUXTIMI AL-ŢAIL (as a descendant of Ḥūmāin al-Ţail [q. v.]) AL-ANDALUSI, A CELEBRATED MYSTIC OF PANTHEISTIC DOCTRINE, STYLED BY HIS FOLLOWERS AL-Shaikh AL-AKABAR; IN Spain he was also called Ibn Surāba but in the East generally Ibn ʻArabī, without the article, to distinguish him from the ʻAṭābeg Abī Bāk Ibn al-ʻArabī, the great philologist, 1560 (25th July 1165) at Murcia. In 558 (1172-3) he removed to Seville which he made his home for nearly thirty years. There and also at Ceuta he studied Ḥadīth and Fīkh. He had translated bustān and 591 (1201-2) he set out for the East, from which he did not return. In the same year (598) he reached Mecca: in 601 he spent twelve days in Baghdad, to which he returned in 608 (1212-3), and he was back in Mecca in 611 (1214-5). Here he stayed for some months and at the beginning of the following year finds him in Aleppo. He visited also Mōsul and Asia Minor. His fame went with him everywhere and he was the recipient of pensions from persons of means, which he bestowed in charity. When in Asia Minor he received from the Christian governor the gift of a house, but he presented it to a beggar. Finally he settled in Damascus and died there in Rabī’ 1163 (Oct. 1240): he was buried at the foot of Djiyala, his sons were later buried in his tomb.

As to ritual, Ibn ʻArabī belonged nominally to the Zāhirī school of his compatriot Ibn Ḥadīm (q. v., cf. Goldziher, Die Zāhiriten, p. 185 sq.), but he rejected taḥlīl (recognition of authority in doctrinal matters) and in matters of belief he passed for a ḫāt민 (esoteric). Although conforming to the practice of the Muslim faith and professing its beliefs, Ibn ʻArabī’s sole guide was the inner light with which he believed himself illuminated in a special way, but the belief that all being is essentially one, as it all is a manifestation of the divine substance. The different religions were thus to his opinion equivalent. He believed that he had seen the beatific Muhammad, that he knew the Greatest Name of Allāh, and that he had acquired a knowledge of alchemy, not by his own labour, but by revelation. He was denounced as a Zinidī,
and in Egypt there was a movement to assassinate him.

His principal work, *al-Futiğat al-Mallikia*, which was later epitomised by al-Sha‘rānī (d. 975), gives a complete system of mystic knowledge, in 560 chapters, of which chapter 559 contains a summary of the whole. His contemporary Ibn al-Fārid (d. 632), being asked by Ibn ʿArabī for a commentary on his *Tawīla*, replied that the best commentary was his own *Futūḥāt*. This work was written in Būlāq in 1274, Cairo 1292. Next to the *Futūḥāt* comes the *Fusq al-Ḥikam*, begun in Damascus in the beginning of 627 (May 1229), printed with Turkish commentary, Būlāq 1525, and lithographed with the commentary of ʿAbd al-Razzāk al-Ḵāshḵānī, Cairo, 1509, 1521.

In 598 (1201-2), on his arrival at Mecca, Ibn ʿArabī had made the acquaintance of a learned lady of that town, and, on his return thither in 611 (1214-5), he wrote a small collection of love-poems celebrating her learning and loveliness and their mutual friendship, but in the following year he found it advisable to write a commentary on those, explaining them in a mystical sense. These poems with an English translation of both poems and commentary have been published by R. A. Nicholson (*The Tarjumān al-ʿAshqāq, a Collection of Mystical Odes*, Transl. Fund, New Ser., vol. xx. (London 1911). This is the only one of Ibn ʿArabī's numerous works which has appeared in a European edition with the exception of a small glossary of the terms appended to the *Tarjumān al-ʿAshqāq* edited by Flugel in 1845, and a short treatise, ascribed to him in a Glossary of Authors MS., called the *Kitāb al-ʿAshqāq*, of which an English translation appeared in the *Journal Roy. As. Soc.* for 1901.

Other of his works which have been printed are: *Muḥākara al-ʿArūr*, on literary and critical topics (Cairo 1282, 1305), a *Divān* of religious poetry (Būlāq 1271, Bombay 1890); a commentary on the *Kūrān*, Būlāq 1283, Cairo 1317; *Kitāb al-ʿArūr* Cairo s.a. (= Muhākara). *Arūr*; Turkish transl. of Aḥm. Muhākara, Stratford 1314; *Amr Muhākara*, with Turk. transl., Stratford 1315; *Tuhfet al-Safara* huṣn al-ʿArūr al-cīrara, Constantinople 1300, Turk. transl., Stratford 1305; *Muḥākara al-Raḥiḥ*, Cairo 1325; *Mawāḥib al-ʿAshqāq wa-Muḥākara al-ʿArūr* wa-l-ʿUlmā', Cairo 1325.

Altogether some 150 of his works are known to exist, and this is said to be half only of what he actually composed.

Various theologians took exception to the contents of his writings and charged him with heterodox doctrines such as ḫuṭūt [q. v.] and isthāhād [q. v.]. Still he has found many followers and zealous defenders. Whilst Ibn Tamiyya, al-Taftazānī and Ibrāhīm b. ʿUmar al-Bīkārī denounced him as a heretic, amongst his defenders were ʿAbd al-Razzāk al-Ḵāshḵānī [q. v.], al-Firuzabādī (cf. H. al-Zayyāt *Khawāṣī‘ al-Kutub fi Dimaghīk*, etc., p. 50, nº 20, 2) and al-Suyūṭī.

IBN 'ARABSHAH — IBN 'ASKAR.

(ed. Manger, iii. 181 sqq.) his great qualities are appreciated. The book contains valuable descriptions of Samarqand and its learned world (iii. 355 sqq.). His Fābihat al-Khulafa' wa-Mujahidat al-Zawā'id in ten chapters, written in the month of Safar 852 (Ḥādīdji Khālaṣa, iv. 345) contains a mirror for princes and beast-fables, according to Ḥādīdji Khālaṣa "like Kalīla and Dimnā and Sulaimān al-Mutifū" (see Chauvin, Bibliographie, ii. no. 140—144), but, as Chauvin has shown (sp. cit. ii. 145—149), is actually a version of the Persian Marbnām-e Ṣamāzin in the recension of Šaṭā al-Wāzin (cf. Houtsma in Zeitschr. d. Deutsch. Altertums.

Gen. Cult. ii. 350 sqq.; a selection in Freytag, Lomand Fabulas, p. 72 sqq.; complete edition see below). The introductory portion of an edition of his al-Ta'āfif al-Ḡāhir fi Shīyām ..... Abī Safīr Dājbān was published as a posthumous work of A. Strong in the Journ. Roy. As. Soc., 1907, p. 395 sqq. 10 works are mentioned under his name, among them a work on Arabic, Persian, and Turkish, Tarjaman al-Murtadhim (Ḥādīdji Khālaṣa, ii. 278). See also Ḥādīdji Khālaṣa, ii. 158; iv. 190, 232, 276, 311; v. 479, and Freytag's work mentioned above.

Of his sons the following were authors: 1. Abū al-

20. Tāḥī al-Dīn Abū al-Wāhāb, born 853 = 1411 in Ḥādīdji Tarkhān, died 901 = 1495, wrote a commentary on Abū Lāḥiṯ Mūḥammad, and various other works of little importance. See Brockelmann, Gesch. d. arab. Litt., ii. 19 sq.

Bibliography: Freytag, Fructus Imperatorum et fsecatio Ingeniorum, i.—ii., Bonn 1852 (edition of the Fābihat, p. xxv.—xxxiii; sketch of his life based on al-Sakhawī and Taḫrīribīḍī); Ferticho, Verzeichnis der arab. Hadschr. zu Göthe, ii. 94, 139, 1840, 1841, 2696; Wüstenfeld, Geschichtschrifter der Araber, No. 488; Brockelmann, Gesch. d. arab. Litt., i. 196; ii. 28—30.

J. Prædelsen.)

IBN ASAKIR, the name of several Arab authors, of whom the following are the best known.

1. The history of Damascus, Abī al-

Ḥasan b. Ḥabīb Allāh Abu l-Kāsim Thīqat al-Dīn al-Sharīf, born in Maharrum 490 = Sept. 1105 in Damascus, studied in Bagdad and the principal cities of Persia, became professor at the Madrasa al-Nīriya in his native city and died on the 11th Radjab = 25th January 1176. In his principal work, the Tarīkh Madīnat Dimashq, he collected, under the fashion of the Tarīkh Bagdad of al-Khāṭib al-Bagdādī, the biographies of all the men who had ever been connected with Damascus. Of the 80 volumes of the original, of which Vols. 1 and 2 were printed in Damascus 1292—1330, only odd ones have survived; in addition to those given in Brockelmann, Gesch. d. arab. Litt., i. 331, there are others in Strassburg (s. Zeitschr. d. Deutsch. Morgenl. Ges., xl. 310), Stambul (Dāmīd Ibrāhīm Pāša, No. 87—882, 1846, 1861, 1881, 1889, 1891), Cairo (s. Fikhr ad-Dīn al-Ḳatib al-Maḥṣūğa, bi-Ḳutub al-Ṭuṣūf, v. 25), Damascus (s. Ḥabīb al-Zayyāt, Khāsun al-Ḳutub fi Dimashq, p. 76 sqq., cf. Horovitz in Mitt. d. As. Soc. f. d. Spr., v. 50 sqq.), in Tunis, Zaītuna (Houdas-Basset, No. 65); cf. also the ext

tract by Ismā'il b. Muḥammad Djarrāḥ al-Adabī (1165 = 1754) in Tūbāgīn (s. Seyb, Verzeichnisse, N°. 61; cf. Sauvère, Histoire de Dama

s in the Journ. As., 1894—1896). In addition to his other works mentioned by Brockelmann, loc. cit., we may now mention al-Maḏīqūn, notices of celebrated men, particularly Ḥāṣith, with an appendix, Kīyāb al-Wāḥim, by Muḥammad b. Abī al-Wāḥid al-Muḥaddasī, died 643 (1245) in the Brit. Mus., Or. 3735 (s. Descriptive List of the Arab. Ms. acquired by the Trustees since 1844, London 1912, p. 35), as well as a fragments of his Amāl in Damascus, 20, No. 5.

2. His son al-Kāsim, born 527 = 1132, died 600 = 1203, wrote in addition to other works al-Dāḥim Fī al-Mustahāb fi Ḥādī al-Muṣāfi al-

Khāṣṣ, one of the two main sources of the Burdāt al-Naṣūs of Ibn al-Firdawsī; cf. al-Snḳbī, Taḥābīl al-Shāfiya, v. 148. (C. Brockelmann.)

During his studies he continued to follow the style of a bookbinder and later filled the delicate duties of chief kātib of Granada. His teachers were Abī Sa'id Farādī b. Kāsim b. Ahmad b. Lubāb al-Thālabī, chief mūsī of Granada, the author Abū Abū al-Allāh Muḥammad b. Muḥammad b. Al-Kaitaṭū, the celebrated champion of the Sunna Abū Isḥāk Ibrāḥīm b. Māṣṣa b. Muḥammad al-Saḥībī, Abū Abū al-Imām al-Shāfīfī of Tlemcen, etc. Of the works ascribed to him by his biographers we know only two: 1. Taḥāfūt al-Ḫūṣūṣ wa 'l-Nabūsī ni Nukhbat al-Uṣūl wa l-Aḥkām bi-l-Ǧimma wa l-Mūṣāfī, a sketch of Mālikī law in 1698 Radjaz-verses (printed Algiers 1322, 1327 and Fāṣ; published in Cairo publ. in the Maḥṣūğa al-Muṭāfīn; with French transl. by Houdas and Martel, Traité de droit musulman, La Taḥāfūt d'Ibn Aṣim, texte arabe avec trad. fr., comment., jurid., et notes philolog., Algiers 1882—3); 2. Ḥādīx al-Ḳatib fi Mustāhaṣīn, al-Ḍawūja wa l-Muṣāfī, a collection of more or less interesting anecdotes, popular proverbs, answers to which there is no reply, etc., divided into 6 Ḥaddīṣa (garden) of which each includes one, two or three chapters (printed in Fāṣ. n. d.); this edition should be compared with the Paris MS. Bibli. Nat., Catal., No. 3528 and the Brit. Mus. MS., Rieu, Suppl., No. 1145, i.)

Bibliography: Ahmed Bābi, Nājil al-

(MOH. BEN CHABER.)

IBN 'ASKAR, Muḥammad b. Abū Bākra Muḥammad b. 'Ali b. 'Umar b. Ḥusain b. Miṣrāb, was born at al-Hilāb in the district of Kaṣr al-Ṣaghīr in north Morocco. He is known to fame as the author of the Danawat al-

Naṣīrī li-ʾAl-Hāsān min ʾAl-Maṣāfīb
IBN ‘ASKAR — IBN A’TTHAM AL-KULF

min Ahl al-‘Ayn al-‘Asghir, a collection of biographies of learned men and saints which he had known personally or at second hand, composed about the year 1575. The Ijāsān Sharīf ‘Abd Allāh al-Ghālibī was, contrary to custom, succeeded by his son Muhammad in 1573. War broke out between Muhammad and his uncle ‘Abd al-Malik. Ibn ‘Askar threw in his lot with the former and was slain at the battle of Wādī ‘l-Makhzān close to Ka‘rīf al-Kabīr, in which Muḥammad along with Dom Sebastian of Portugal perished, ‘Abd al-Malik dying at the commencement of the battle (August 1578): Wāfrānī, Nuzhat al-Hikāt, ed. Hondas, p. 73 sqq. The Dāwūd is continued by Wāfrānī, Ṣawāfī wa intāqāl min Aḥkām al-Muḥāfazāt al-Kārīf al-Kabīr wa-rā‘īf. Fās n.d. Cf. also Naṣr al-Muḥāfizāt b. al-Tayyib. The Dāwūd has been lithographed at Fās, in 1891, Naṣr al-Muḥāfizāt in 1892. Bibliography: La “Dawūd an-Nakhī.” ... trad. par A. Graulle, Archiv für Marokko, ix. (1913). (T. H. Weir.)

IBN AL-‘ASSAL. During the first half of the xiii century A. D. there took place among the Copts a pronounced religious and intellectual renaissance, arising, by the necessity of the case, from an Arabic form. In it three brothers, known as the A‘wālād al-‘Assāl, were prominent. Al-‘Assāl, the father, to judge from the titles given to him in the MSS., was of high rank and good family, and there is mention also of a dī‘ar, or great house, in Cairo as belonging to an Ibn al-‘Assāl. Unfortunately this name is given in the MSS. to all the three brothers, and the resultant confusion was first fairly disséntangled by Rieu (Suppl. to Cat. of Arab. Manuscripts containing Laws, p. 122 sqq.). Yet much remains uncertain. Of them al-A‘sād Abū ‘l-Faraḍī Hībat-Allāh was the philologist and exegete. He wrote in Arabic a Coptic grammar (Mallon, Une École de Savants égyptiens au Moyen Age en le Beyrouth Milangis, i, 122 sqq.): edited an eclectic Arabic version of the Gospels, in which he calls himself ‘Abū ‘l-Faraḍī Miṣrī (Guidi, Le tradizioni degli Evangelii in arabo e in etiopico, Bologna, 1905). In an anonymous Malay commentary printed in Mecca (1302), is mentioned by Snouck Hurgronje, Mekki, ii, 387, 7. 2) ‘Ārūs wa Karm’ al-Nafīs (or al-Ḥusnī li Tadbīr al-Nafīs), Cairo 1275, 1282, 1305, 1327, 3) Lajīf al-Minān fi Manākiḥ al-Shāhīd Abī ‘l-Abbas wa-Shajīhī Abī ‘l-Husayn, biographies of the Ṣūs Shīhāb al-Dīn ‘Abd al-Mursī (died 686 = 1287) and his teacher ‘Abī al-Dīn ‘Abd Allāh al-Shāhīdī (died 696 = 1297), Tunis, 1327, Cairo 1275, a work, along with ‘Ārūs wa Karm’ al-Nafīs, among the margin of the Lajīf al-Minān of al-Shurānī, Cairo 1321. Bibliography: Subki, Ṣubkī al-Ṣafīya al-kubra, v. 176; Sayyūq, Ḥusn al-Muṣādara, l. 301; ‘Alī Būhārī Mubārak, al-Khitāq al-daghtā, vii. 70; Wüstenfeld, Die Geschichtschreiber der Araber, No. 582. (C. Brockelmann.)

IBN A’TTHAM AL-KULF, MUHAMMAD B. ‘ALI, Arab historian, of whom we only know that he died about 514 = 926 (s. F. Maurice, Indications bibliographiques, p. 16), whom Wüstenfeld (Geschichtschreber, No. 541) erroneously places in the year 1003 A. H. He wrote from the Sūfī point of view a realistic history of the early caliphs and their conquests, Persis, Vorzeichnis der arabischen Historiker, der Persis, der arabischen Historiker, der Persis, der Eunuch der British Museum, v. 150 (where other MSS. are detailed), from which is taken The History of the Conquest of Zarar and The Flight and Murder of Yezidther-transl. from the Persian of Ahmad ibn Azer of Cæsarea, by B. Gerns, in Ouseley’s Oriental Collections, i
IBN AT-TIBI — IBN BAHUYA.

(C. Brockelmann.)

IBN AL-ATHIR. This name was born by three brothers, natives of Dajirat Ibn 'Omar [q.v.] who are among the most celebrated and important Arab scholars and authors.

1. The oldest brother was 1. MADID AL-DIN ABI 'L-ŞA'AĐAT AL-MUBŠRÁK B. MUHMMADMAD, born in 544 (1149), died at Mosul in 606 (1210) cf. Ibn al-Athir, Kamil, xii. 190. He devoted himself mainly to the study of the Karâan, tradition and Arabic grammar. The titles of the works composed by him are given by Ibn Khallikân, Waʃyaʃ, ed. Wüstenfeld, No. 524, Yâkût, Isagãd, ed. Margoliouth, vi. 235 sqq., and by Brockelmann, Gesch. 1. 357. As to the events of his life, he studiously guarded himself from Ibn al-Dahhán at Mosul, and Haʃar, an Arab of Baghdad, who was in the service of the Emir Kaimãz, who acted as regent for a considerable period in the reign of Saif al-Din Ghãzî, and was chief of the chancellery under Ghãzî's successors Mas'ud b. Mawdidi [q.v.] and Nûr al-Din Arslãn Shâh [q.v.], although, as his brother tells us, he was reluctant to assume this high office, and only did so at the wish of Nûr al-Din. He became lame as the result of an illness and is said to have composed most, if not all as Ibn Khallikân tells of, of his works after this misfortune. He made his house a riχât for Sufis.

2. The second brother, 2. AL-HANAN 'ALI B. MUHMMADMAD, born 555 (1160) at Dajirat, died at Mosul in 630 (1234) is the author of the famous history, al-Kamil fi l-Tarîkh, often quoted here. He also wrote the history of the Abãbic of Mosul (ed. in the Recueil des Historiens arabes des Croisades, vol. ii.), an alphabetical dictionary of the contemporaries of Muḥammad entitled Bad al-Ṣâbah fi Ma'rifat al-Ṣāḥibâ, ed. Cairo, 1280, and a synopsis of the Kitâb al-Anṣâb of al-Sanâni [q.v.] entitled al-Lubâb, which was still further epitomised by al-Suyûtî under the title Lubâb al-Lubâb (ed. Veth, Lut, Bat. 1840).

The most important of these works, the chronicle, ends with the year 628 and is a compilation of the greatest value. On the first part of it cf. Brockelmann, Das Verhältnis von Ibn-al-Atissors Kâmil fit-tarîkh zu Tabarí's Abû Ḥârrât erinnert wundervoll. Izz al-Din studied in Mosul and Baghdaad and also travelled in Syria, for the rest he lived only for knowledge as a private scholar. Cf. Ibn Khallikan, Waʃyaʃ, ed. Wüstenfeld, No. 433; Brockelmann, Gesch, i. 345 (where other literature is given).

3. The third brother, DÎYÂ' AL-DIN ABI 'L-FATH NASR ALLAH, born 558 (1163) in Dajirat, died 637 (1239) in Baghdad, was particularly distinguished as a stylist. His work on rhetoric, al-Muhaft al-sawâr fi Adab al-Kâtib wa l-Sawâr (printed Bâlîk 1282), enjoys a great authority in the Muslim world. Other writings of his are given by Ibn Khallikan and Brockelmann, Gesch. i. 397. Unlike his brother the historian, Dîyâ' al-Din led a very active life. Introduced to Salâh al-Din by the Kâdi al-Fâshi [q.v.] he entered his service 587 and soon afterwards became vizier of al-Malik al-Azâfîl, son of Salâh al-Din. When Damascus was taken from him, Dîyâ' al-Din escaped with great difficulty to Egypt in a bolted box, and did not appear again till al-Afdal had become lord of Sumâsînî in compensation for his previous territory. But he only remained a short time here, entered the service of the ruler of Halab in 607 (1210) only to leave it soon after to seek his fortune first in Mosul, then in Irbil and Sinjar. In 619 (1221) he obtained a position as chief of the Dwân al-Injâla at the court of Nâšir al-Din Mahâmid, prince of Mosul. He died there an one of his journeys to Baghdad. His son Shâhîf al-Din Muḥammâm, who was also an author, died in his youth in 622 (1225).

Bibliography: Ibn Khallikân, Waʃyaʃ, ed. Wüstenfeld, N°. 734; Brockelmann, op. cit.; Goldziher and Margoliouth in the references given by Brockelmann.

Still other authors are known under the name Ibn al-Athir e.g. 'Imâd al-Din Abu 'l-Fidâ' Isâmî, died 663, on whom cf. Brockelmann, op. cit, i. 341; Goldziher, Abhandlungen zur arabischen Philologie, i. 280 and the Catalogue of the Escurial. Ibn Khaldûn mentions him although not being acquainted with his work which he considers a recension of al-Falîka al-Nashîfîya [see Ibn al-Wâṣiqa] and neither Hâdidî al-Kâmil nor Ibn Khallikân quote him.

Casiri in his Catalogue was the first to call attention to the complete manuscript preserved in the Escorial. It was then edited with a Spanish translation in 1802 by his pupil J. A. Banqueri. The book is divided into 34 chapters of which the first 30 deal with agriculture and the last 4 with cattle-rearing. E Meyer gives a summary of it in his Geschichte der Botanik, Clément-Millet published a French translation in 1864. Doss (Sulpit, Introd., p. xivii) and from the time of C. C. Moncada severely criticise both editor and translator.

'IBN BAHUYA', ABU DÂJÂ'AR MUHMMADB b. 'ÂLI b. HUSAjin b. MUSA AL-KÂMãI AL-SÂDÜK, was one of the four greatest of the collectors of the Shi'a Traditions. In the prime of life, 355 (966), he went from Khurâsan to Baghdad and many learned men of the place became his pupils. He died in Rai 381 (991) and is also known as al-Sâdûk. Of his writings the following may be mentioned: 1. Kitâb man fâ ṭarîqat 'l-Fâshî, a work on the Shi'a Traditions. It is one of the four books of Shi'a Traditions, called al-Kutub al-Arbaaš. [The other three are a. al-Kâfi by Abu Dâjâ'ar Muhammad b. Ya'qûb al-Kullâni, d. 328 (939) or 329 (940); b. Thâbâb al-Ahkâm; c. al-Isâbhî both by Abu Dâjâ'ar Muhammad b. al-Hasan b. 'Ali al-Tasî, d. 400 (1067)]. 2. Ma'sání al-Ahkâb, a collection of Shi'a Traditions. 3. 'Uyun Aḥkâm al-Κâna, an ac-
count of the life and sayings and doctrines of ʿAli al-Ridā, the eighth Imam of the Shiʿa. ʿAlī b. Rida b. Musṭafā al-Din wa ʿImām al-Vināa, a work on the Shiʿa doctrine of the hidden Imam, partly edited by E. Möller, Beiträge zur Mahdilehre des Islams, i., Heidelberg 1901.

It is said that he was the author of three hundred works; al-Naḍājī in his work Kitāb al-Ridā, p. 276 (Bombay ed. 1317), enumerates 193 of his works.

(M. Hidayet Hosain.)

IBN BAṬDĪJĀ, i.e. AVEENPACK (according to Ibn Khaldūn bāṭdīja is a Frankish word, meaning silver) or to give him his proper name ʿAbū BAKR MUḤAMMAD b. YĀḤYĀ, also known by the name of IBN AL-SAṬGH, i.e. filius Auricius, a celebrated Arab philosopher. Ibn Bāṭdīja was born in Saragossa towards the end of the 9th (xiith) century and was for about 20 years vizier to ʿAbū Bakr b. ʿIrīḥām, a brother-in-law of the Almoravīd ʿAlī b. ʿUṯām, who acted as the latter's governor in Granada and afterwards in Saragossa. He afterwards went to Fās and there fell a victim to the intrigues of his enemies. In 533 (1138) he is believed to have been poisoned, at the instigation of the physician Ibn Zuhr. His enemies, among whom was ʿAlī b. Ḵᵛāḥān [q. v.], stirred up the populace and the authorities against him by decrying him as an atheist, who had rejected the Kūrahn and the dogmas of Islām.

Ibn ʿAbdīja, who died young, was not only a philosopher but was also well acquainted with natural science, astronomy, mathematics and medicine; he had also a great reputation as a musician. He wrote commentaries on several works of Aristotle and published other treatises also, which are detailed by Leclerc from Ibn Abī Uṣāibā but are for the most part now lost or have only survived in Hebrew or Latin translation. Cf. Die Abhandlung des Abū Bekr Ibn al-Sātgh l. Vom Verhalten des Einzelnen (Kit. Tadbir al-Mutawakkīl), according to Moses Nebraisons synopsis ... ed. by Dr. D. Herzog, Berlin 1896 (Beitr. zur Philos. des Mittelalters, Heft 1). For an appreciation of his philosophical views the reader may be referred to the works of Munk and de Boer given below.

IBN BADRUN. [See Ibn ABDUʿN.]
he had Ibn Rakiya seized and blinded as the latter had shown himself too independent. Soon afterwards the vizier was handed over to his enemy "A'udud al-Dawla, who had him trampled to death by elephants in Shawwāl 367 (May 978). Ibn Rakiya was 50 years of age at the time of his death.

(K. V. Zettersten)  
IBN AL-BALĀDI, SHARAF AL-DIN ABD QIYAM B. MUHAMMAD B. SADID, A-MUSTADJID VIZIER. In 567 (1166-8) Ibn-al-Baladi, who at that time was Nāṣir in Wāsit, was appointed vizier. There was an old feud between him and the Ustād-dār "A'udud al-Din Muḥammad b. 'Abd Allāh. After the murder of the caliph in Kābi II 566 (December 1170) by "A'udud al-Din and the Emir Kūtān al-Dīn, they forced his successor A-Mustadīd to appoint "A'udud al-Din vizier, whereupon Ibn al-Baladi was executed.

(K. V. Zettersten)  
IBN AL-BANNA ("son of the architect"); whose full name was ABDUL-‘ABD AS-SAMAD B. MUHAMMAD B. ‘UThMANN AL-AZZĀBI, a versatile Moroc-  
co-b cian scholar, especially distinguished in mathematics, astronomy, astrology, and the natural sciences, and also in medicine. He was born in Marrākush on the 4th Dhu ‘l-Hijjah 645 = 38th Dec. 1246 (according to others 639, 649 or even 656). After studying grammar, Ḥadīth, Fikh, and mathematics in his native town, he went to Fāṣ where he studied under the physician al-Mirrīkh, the mathematician Ibn Ḥaddāq, and the astronomer Ibn Makhfīlī al-Sidjīmlī. He was for a considerable time a follower of the Sufī ‘Abd al-Rahmān al-Ḥazīmī, who admitted him to his order. He often fasted in complex retirement; his biographers praise his noble character and pure life. Ibn al-Banna died on Saturday the 6th Rajab 721 (Aug. 1321) in Marrākush, where he was buried outside the Bāb Aghmāt; 723 or 1724 is also given as the year of his death. Of the 74 writings which are ascribed to him, a whole series of mathematical and astronomical works are still extant in libraries (cf. the references in Brockelmann, op. cit.). Here we will only mention Tārkīs Amāl al-Ḥiṣāb (Synopsis of the operations of Cac-  
culation), publ. in a French transl. by A. Marre in the Atti dell’ Academy, pontif. de Nuovi Lincei, Vol. xvii. 1864, repr. Rome 1865. Several Arab scholars have written commentaries on this Tārkīs which is said to be a synopsis of the arithmetic of a certain Abū Zakariya al-Ḥasār (cf. Biblioth. mathem. 3rd Ser., Vol. ii., p. 12—40); among these we may mention Abīy al-Madīdī and ‘Ali b. Muhammad al-Kalāṣīdī (cf. Abulhkail, s. Geuch. d. math. Wissenschaft., x. 180—182). F. Woepcke has made an excerpt on the summation of series from the first commentary, entitled Passages relatifs à des sommations de série de cube, Rome, 1864; the same scholar has given several passages in translation from the second in the above mentioned treatise and in the Journal Asiatique, Ser. vi., Vol. i. (1863), p. 58—62. — Ibn al-Banna shows some advance on the older Arab mathematicians of the East in Arithmetic, particularly in counting with fractions; he is also to be considered one of the chief users of Indian numerals in the form used by the Western Arabs (al-Farābī figures). [cf. the article Ησανάκη]  

(H. Suter—Moh. Ben Cenene)  
IBN BARRI, ABU MUHAMMAD ‘ABD ALLAH B. BAKRI B. ‘ABD AL-DJABBAR B. BAKRI AL-MAKDISI AL-MISKI, ARAB GRAMMARIAN AND PHILOLOGIST, born at Damascus 5th Rajab 649 (15th March 1250). He was at Cairo the day of Mawlid at Friday, Saturday 27th Shawwāl 582 (9th—10th Jan. 1187), a scholar of extraordinary repute, who is considered a philological authority and is called by many "king of the grammarians". The author of the Liṣan al-‘Arab has borrowed a great deal from him. His teachers were the grammarians Abī Bakr Muḥammad b. Abī al-Malik al-Ṣaḥābi, Abī Tālib Abī al-Djabbar Muḥammad b. Abī al-Maʾṭar al-Kūṭabi, Abī Shakīb al-Madāni, Abī ‘Abd Allāh al-Kaṭālaṣādī, Abī Mustāʾīb b. Abī al-Azd al-Džazzīlī. He is the author of the following works. i. Kitāb al-Taḥābih wa l-‘Ithā’i anna (var. ala muʾ waʃaʃ min al-Waḥm fi Kitāb al-Ṣaḥāba, corrections and additions to Djawhari’s Dictionary); he is said to have died when engaged on the root wdsn and ‘Abd Allāh b. Muḥammad b. ‘Abd al-Raḥmān al-BAṣṭ completed his work (Derenbourg, Mus. ar. de l’Écroulet, N°. 585); 2. Hawawsh ila l-‘Ithāʾi (Arabic critical notes and additions to Djabbar’s dictionary of foreign words (Derenbourg, op. cit., N°. 776, 51); 3. Kitāb al-‘Ithāʾi al-Džaʃāf min al-Fusahaha, a collection of neologisms or errors of speech in the jurists (ed. by Ch. C. Torrey in Oriental. Stud. Ts. Nukdec gewidmet, Giesen 1906). 4. al-Djabbar on al-Haṭṭīr, a small pamphlet in defence of the Makmās of al-Ḥaṭṭīr against the sharp criticism of Ibn al-Khaṣāshib (pr. Constantinople 1320).  

The thirteen verses on the different meanings of the word dawāʾ, which Brockelmann ascribes to him and which are in the Liṣan, are by Thālāb (cf. Abu Hilal ibn Askari, Kitāb al-Samāʿāt, Constantinople 1320, p. 335).  

**Bibliography:** Ibn Khallikān, Wawfāyat (Cairo 1310), I 268; al-Suyūṭī, Ḥum al-Muḥā- 

gara (Cairo 1321), i. 255; do., Ḥuqūyat al- 
Wuṣāt (Cairo 1326), p. 278; Abū l-Fida, Tāriḥ (Constantinople 1286), iii. 75; al-Sukkī, Taḥābih al-Ṣaḥīfiyya (Cairo 1324), iv. 233 sqq.; Brockelmann, Gesch. d. arab. Lit., i. 301 sq.; Thālī al-ʿAra’i s. br (Moh. Ben Cenene).  

IBN BARRI, ABU l-‘IṣAN ‘ALI B. MUḤAM-
MAD B. 'Ali b. Muhammad b. al-Husain al-Rībatī, an Arab philologist, born about 660 (1061-2) at Tāzā, where he died in 730 or 731 and was buried, although some say he was buried in Fās, wrongly. Widely acquainted with Islamic sciences he was particularly esteemed as an authoritative critic of the different recensions of the Qurān and his al-Durar al-Lawāmiṣ is as popular in North Africa as the Aǧurrūmīya.

After being 'adil (professional witness) for a period he was appointed to conduct the official correspondence of the government at Tāzā, an office which he held till his death, on the recommendation of a pupil of his, a kāliji, who did not care to see his former teacher in this subordinate position.

Of his works only two have survived to us: 1. 390 rajjaz verses fī Maḥārīṣid al-Dirāf, in which the author marks the place of articulation of the Arabic letters (Ms. Berlin, Versetische, No. 548); 2. al-Durar al-Lawāmiṣ fī Aṣīr Majrā' al-Imām Nāṣir, a poem of 214 Rajjaz verses, which was completed in 697 (1298) and deals with the recension of the Qurān according to Nāṣir b. 'Abd al-Rahmān b. Abū Nu'aim al-Madani (d. 159 = 775-6 or 169 = 785), often published in Cairo and Tunis in the collections of treatises on recensions of the Qurān and its orthography.

IBN BASHKUWAL, Abū l-Kāsim Khalaf b. 'Abd al-Malik b. Mas'ud b. Mūsib b. Bashkūwal b. Yusuf b. Dāha b. Dāka b. Naṣr b. 'Abd al-Kārim b. Wāsid al-Aṣṣārī, an Arabic biographer, a descendant of a family belonging to Sharroyon (Xoroyon, Sorrión) born on the 3rd Dhu l-Hijja 494 = 29th Sept. 1101 at Cordova, acquired here and in Seville a great knowledge of Tradition and the history of his native land and was for a period representative of the Kādi Abū Bakr Ibn al-Arabī in a quarter of Seville. He died at Cordova on the night of Tuesday/Wednesday the 8th Ramaḍān 578 = 4th/5th Jan. 1183. His most important teachers were Abū Muḥammad Ibn 'Attāb, Abū l-Walid Ibn Rāshid, Abū Bakr Ibn al-Abārī, etc.; among his pupils all of whom predeceased him, we may mention Abū Bakr b. Kāhir and Abū l-Kāsim al-Kātari.

Ibn Bashkuwal enjoyed a special reputation among all compilers of Arabic biographical dictionaries and, according to Ibn al-Abārī, he was the last authority on Tradition in Cordova and the soundest authority on the history of Spain.

Of the 50 works which he is said to have composed only two are known to us: 1. Kitāb al-Sīla fī Tārikh Aḥmad b. Abdallāh, a biographical dictionary of the Arab scholars of Spain, completed on the 3rd Djamād I 534 = 27th Dec. 1139, a supplement to the biographical dictionary of Ibn al-Faraḍī (ed. F. Codera in Bibl. Arab. Hist., Vol. i. and ii., Madrid 1853); 2. Kitāb al-Ghawāmiṣ al-wal-Muḥammad min al-Asmā', a dictionary of authorities on Tradition, whose names are difficult to spell or are easily confused with others (Berlin, Verö., No. 1673).

IBN BATṬIṢA (Batetī), Muhammad b. 'Abd Allāh b. Muhammad b. 'Irāhīm, Abū 'Abd Allāh, al-Lawāṣī al-Tanīj, an Arab traveller and author, born on the 14th Rajab 703 = 24th Feb. 1304 at Tangier, began the pilgrimage to Mecca 725 = 1325. He went via North Africa through Upper Egypt to the Red Sea. As he could not find a safe crossing here he turned back and reached his destination via Syria and Palestine. From Mecca he went through the Ṣafār and thence visited Persia as well as Mūsul and Dīyar Bakr. He next paid a second visit to Mecca where he spent the years 729 and 730. A third journey led him over South Arabia to East Africa and back to the Persian Gulf. From Hormuz he returned to Mecca and thence went via Egypt and Syria to Asia Minor and the Crimea. He visited Constantinople in the retinue of a Greek princess, wife of Sultan Muḥammad Uzbek. From the Volga he went through the Khārism, Bukhārā, and Afgānīstān to India. In Dihlī he undertook the office of kāliji. Two years later he joined an embassy setting out for China but only reached the offices where he filled a judicial office for 13 years. From there he went to Ceylon, Bengal and Further India. Whether he went beyond Zaitun and Canton is uncertain. Via Sumatra (cf. Snouck Hurgronje, Arabie en Oost-Indie, Leiden 1907, p. 14 sqq.; French transl. Rev. de lʼHist. des Rel., iivi. 1908, 62 sqq.) he returned to Arabia where he landed in Muḥarram 748 at Ẓafār. After a journey through Persia, Syria and Mesopotamia he made the pilgrimage for the fourth time, from Egypt. He then went back through North Africa and entered Fās in Shahrīb 750. After a very brief stay here he went to Granada. His last long journey took him in 753/4 to the Negro lands, to Timbuktu and Melli. He returned to Foro for via the countries of Agadez and Tāwāt. Here he dictated the account of his travels to the scholar Muḥammad b. Muḥammad b. Djuza'īy (cf. de Slane, Tourn. Ar., 1843, i. 244 sqq.), who wrote the narrative in a literary style frequently modelled on Ibn Diba’ī’s work. The latter died in 757 = 1356 soon after the completion of his task; his holo- graph is partly preserved in the Paris Ms. Suppl. 907. Ibn Battūta died in 779 = 1377 in Morocco. His work Tārikh al-Nuṣayrī fī Ḡarbā’i al-Asmā’ al-Asfārī, was edited by Debrèmy and Sanguinetti, 4 vols., Paris 1853-1859; 3rd ed. 1893; repr. Cairo 1287-1288, 1322. Further literature given is by H. von Mähl, Die Rel. der Araber Ibn Battūta durch Indien und China (XIV. Jahrh.), in Bibl. denkwürdiger Reisen, Vol. v., Hamburg 1911. (C. Brockelmann.)

IBN AL-BAWWĀB, "the porter's son" a name of Abu l-Ḥasan 'Alī al-Din 'Ali b. Hālib, a celebrated Arab calligrapher, son of a porter of the audience hall of Baghdad. He was also called Ibn al-Sitri. He died in 413 = 1022 or 423 = 1032 and was buried beside the tomb of Ahmad b. Ḥanbal. He had a wide knowledge of law, knew the Qurān by heart, and wrote
out 64 copies of it. One of these written in Riḥāni-script is in the Lālēli mosque in Constantinople, in the place where it is given of Sābūn Selmī I. The Dīwān of the pre-Islamic poet Sālama b. Djaland, copied by him, is in the library of the Aya Sofya. He invented the Riḥāni and Muḥā-validate scripts and founded a school of calligraphy which survived to the time of Yūsuf al-Mustāṣim.

Bibliography: Cl. Huart, Calligraphes, p. 80; Ibn Khallikān, Wafayāt, no. 468, transl. de Slane, II, 282; Ḥalab-Efendi, Khiṣṭ u Khafṣūṭ, p. 44. (CL. Huart.)

**IBN BĪBI, NĀṢIR AL-DIN YĀḤYA B. MAJDI AL-DIN MUḤAMMAD TĀRĀMĪ (not to be confused with his son) was a Persian historian. His father was muʿāṣir and interpreter at the court of the Sālijān of Asia Minor and more than once a member of diplomatic missions to foreign princes. He died in 670 = 1272. He received the name Ibn Bībi from his mother, who had a great reputation as a fortune-teller and was therefore held in great esteem by Sultān Kājībūd I (616–634 = 1220–1237); we know nothing of the life of Ibn Bībi himself, but he appears to have been well acquainted with the famous Mongol vizier Ṭāhir al-Makki Djawānīnī ([9. – 15.]). He dedicated his chief work, a history of the Sālijān of Asia Minor in the viii–(xii) century, which is composed in unusually florid Persian, is entitled al-Awāmir al-alānīya fi l-Umūr al-alāniyya, because it deals mainly with the history of 'Ala al-Din (Kājībūd), and survives in a unique ms. (Aya Sofya, no. 2955). An unknown epitomiser composed a synopsis of it, which was published in 1902 by Houtsma in his Recueil de textes relatifs à l'histoire des Seljoucides, Vol. iv. The latter also published a Turkish version of the same work in the 3rd volume of this collection (incomplete). At the time of the publication of his work, the existence of a manuscript of the original work was known to Houtsma.

**IBN BUTLĀN, JOANNES or ABU ‘L-HĀSAN AL-MUḤTĀR B. ḤĀSAN, a Christian physician in Baghdad. From there he set out in 440 (1049) via al-Raḥāb and al-Rusāfa to Ḥalab and thence to Anṭākiya and Laḏkhiyā, finally reaching al-Fuṣṭṭī in Egypt, where he met his colleague ‘Alī b Riqdūn. Their intercourse led to sharp polemics and produced several controversial pamphlets and theological tracts in Ibn Butlān’s epistle are given in Ibn al-Kīfī Tāʾrīkh al-Ḥukamāʾ, ed. Lippert, p. 298 sqq. Relations finally became so strained that Ibn Butlān left Egypt and went to Constantinople, where the plague was then raging (446 = 1054). It is evident from this that the statement in Ibn al-Kīfī, op. cit., that he died at Anṭākiya in 444 (1052) is wrong, although Ibn Abī Časībīa also tells us that he returned to Anṭākiya. He was still alive in 455 (1063). His principal work is called Tāʾrīkh al-Ālā, of which a Latin translation was published in 1531 at Strassburg under the title: Tacumini sanitatis Elachasem Epitomar medicis de Baldacch. In the following year there appeared at the same place a German transl. by M. Herum, Schachteln von der Gesundheit. Other works are given by Leclerc and Brockelmann, m. the Bibli. Die Darwāt al-Aḥāba’ al-Muhāb Kaitā wa-Dirma mentioned there was published in 1901 by Dr. Bashāha Zalāl in Alexandria.

**IBN BAṬĀBA** was called after his ancestor ‘All b. Yūsuf (Daʿī) is said to mean “white” in Nubian, according to al-Mujibī, Khudāyat al-Aṣr, iii, 192, and Taʿlīk al-ʿArab, v, 325, the South Arabian Historian and Traditi onist Abu ʿAbd Allāh ʿAbd al-Rahmān b. ʿAlī b. Muḥammad b. ʿUmar . . . ʿAbd b. Yūsuf, Wajīḥ al-Dīn al-Shaikīnī al-Zābirī, who was born on the 4th Muḥarram 806 (9th Oct. 1461) at Zābid. From his genealogy he has benefited of the tuition of his uncle, Dījāl al-Dīn Muḥammad b. Ismāʿīl, Muftī of Zābid, under whose guidance, after learning the Kūrān, he proceeded to study various sciences, notably mathematics and fiqūh. After studying under other teachers and making the pilgrimage in 884 and 885, he became a pupil of Zain al-Dīn Ahmad b. ʿAbd al-Latīf al-Sharījī (died 893), devoting particular attention to history. He afterwards went to Bait al-Faqīh where he stayed and studied Hadīth under two members of his early family of Ibn Dījām. After a third pilgrimage (896), with which he combined a stay in Mecca in order to study Ḥadīth under al-Sakhāwī (d. 902 = 1497), he began to devote himself to literature. Through his work as a historian he won a high favour with the Tāhirīd al-Malik al-Zāhir b. Sālīḥ al-Dīn Amīr (894–923 = 1489–1517), who presented him with robes of honour, allotted him lands and gave him a professorship at the Dār al-Zamān ibn al-Dījābī died in Rāyāt (1444, Dec. 17). His works are: 1. Būḥayat al-Mustāfā tīl ʿAbdār al-Maṣūm, a history of Zābid and its rulers to the year 901 (begins 21 Sept. 1495), the most important part of which is the section on the 16th (xvib) century; it finishes with his autobiography al-Dhālima. This work has been rendered into Latin by C. Th. Johannsen, with introduction and notes, from the defective Coptic manuscripts (Historia Jumanae, Bene 1828, Ms. in Brockelmann, i, 298; Aya Sofya, no. 2988, Bresl., Cat. de Coll., i, Schefer, no. 5897, 6069). Continuing this work down to 923 (1517) he wrote al-Fadil al-maṣīh. A second appendix brings it to 924 (Ms. in Brockelmann, o. c., and Aya Sofya, no. 2988). 2. Kūrāt al-Uṣūl fi Akhāb al-Yaman al-Muṣāmīm, which is in part compiled from al-Khazrāji’s Kitāb al-Kifāya, and in part contains the same material as the preceding work. (Ms. in Brockelmann and Blochet, o. c., no. 5821, 6058); 3. Aḥsan al-Uṣūl fi man (fi naṣṣ man) waṣayla Zabīd min al-Maṣūm, a historical Radjād poem on the princes of Zābid, Berlin, Verz., no. 9763; Brit. Mus., Cat., no. 15935, i; Khed. Bibli., Fīhr., v, 138; Blochet, o. c., no. 5382, ii; Houtsma, Catal. d’une Coll., i, no. 490, iii.; 4. Taṣāʾa al-Waqīf tīl Dījām al-Uṣūl min Hādīth al-Rasūl (cf. Brockelmann, i, 357), printed Cairo 1331; 5. Ṭamāzī al-Taṣāʾa min al-Khāṭīb min ma’dh al-ʿĀlā mi ʿĀlā min al-ʿĀlā (Ms. in Brockelmann, i, c. and Princeton, List, no. 521, p. Cairo 1324); 6. Kit. Fadilat ʿAbd al-Yamen (Cf. F. al-Y. wa-Āḥikī), cf. Grifinī, Zeitzeich., d. Deutsch. Morgenl. Gesellschaft, lxiv, 75. Ibn al-Dījābī further mentions in his autobiography Ghiyāyat al-Maṣūm wa-al-Ḥamal lamma yashfuʿr lī Ḥalabī wa-Kūrāt al-Kirba fi Sharḥ Dījāb Abī Hīrū, Ḥadīthī al-Khalifa (iv, N. 24
8176) further mentions al-Ḥārīrī al-bāḥir fi Taʾrikh Daulat Banū Tabarī, which is said to be taken from the Bugyaght al-Mustafid. Bibliography: Johannesen, op. cit., p. 8 sqq., cf. 197 infra sq., 239, 249; Rieu, Suppl., No. 586, i.; Brockelmann, Gesch. d. arab. Lit., ii. 400 sq., cf. 185 and 712; (biographical material in ms., which could not be used here, is mentioned in Cat. Col. Misc. Orient. Mus. Brit., ii. p. 672 note a). (C. Van Arendonk.)

IBN DĀṢĀN, a Syrian philosopher of Persian origin, known by his scarcely Syriac name Bardeisan. His father was called Nuḥama, his mother Nahshiram; both migrated from Persia to Edessa after 139 A.D. Their son was born in 154 and received his name from the river Dāṣān which waters Edessa. Brought up at the court of king Maʿnū along with the latter's son Abgar he learned astronomy and astrology; in 179 he was converted to Christianity by Bishop Hūṣūk. Although an opponent of Valentine, Māriq, and the other gnostics, he created a cosmological system closely allied to the gnostic. He died in 232. The Muslims are only acquainted with his speculations on good and evil and light and darkness, from which it appears that his system was dualistic. The school founded by him lasted till late in the middle ages. His followers were divided into two sects, of which one represented the view that light mixed with darkness of its own accord, in order to improve it, but could not free itself again; the others hold that light after it has filled the density and the evil smell of darkness, which involuntarily overwhelms the light, attempts to free itself from it. One section of his followers inhabited the swampy lands (bāṭīq) of the lower Euphrates, others were found scattered as far as Khūraṣān and China. He was regarded as a precursor of Mānī. He actually seems to have been particularly an astrologer (Eusebius, Pædag. evang., vi. 9). As such, he teaches that individual beings are subject to the power of controllers or rulers above them, namely the planets. What is called fate is the mode of activity which God has allotted the planets and elements; this activity modifies the intelligence in its descent to its soul and the soul in its descent to the body. Human life is limited by natural laws and further by fate; human freedom consists in taking up the battle with fate and limiting its power as far as possible.

Gesch. d. altchristl. Lit., xxxiv), Leipzig 1910, and the literature there given. (CL. Huart.)

IBN DĀḤIR, the name of four viziers:

1. FAIKEH AL-Daula ABD AL-NAṢĪR MUḤAMMAD E. MUḤAMMAD B. DĀḤIR, born in Mūṣil in 398 (1007-8). He first entered the service of the Banū ʿUkayl, who had been ruling in his native city since 396 (961); but when the ʿUkaylī Khāṇīqāḥ b. Badrān wished to throw him into prison he fled to Aleppo where the Mirdādī Muʿīn al-Daula b. Śāliḥ appointed him vizier. He next left Aleppo and was appointed vizier to Naṣr al-Daula Aḥmad b. Marwān, lord of Dīyar Bahr. After the latter's death in 453 (1061-2) he was confirmed in this office by his son and successor Niẓām al-Dīn; but he refused to stay and went to Baghdaad. Here the Caliph al-Kāṣīm appointed him vizier the following year. In 460 (1067-8) Fakhēr al-Daula appointed him again vizier to Naṣr al-Daula Aḥmad b. Marwān, lord of Dīyar Bahr. He was restored to office in Ṣafar 461 (December 1068). The Caliph died in 467 (1075) and his successor al-Muqtadī confirmed the vizier in his office but dismissed him in 471 (1078-9). Fakhēr al-Daula was sent in 476 (1083-4) by the Sālждūk sūltān against Dīyar Bahr, to take it from the Marwānis. Muḥāṣir b. Naṣr, the ruler of Dīyar Bahr, thereupon allied himself with the ʿUkaylī Muslim b. Ḥuʾūsain; the latter had however to flee to ʿĀmid where he and Muḥāṣir were besieged by Fakhēr al-Daula. Muslim succeeded in escaping; but as his army was captured about the same time by ʿĀmid al-Daula, Fakhēr al-Daula's attempt at peace and soon afterwards the governorship of Mūṣil was restored to him. After Zaʾīm al-Ruʿāsāʾ, another of Fakhēr al-Daula's sons, had seized the town of ʿĀmid, Fakhēr al-Daula took Ṣanāyāfārīn and was appointed governor of Dīyar Bahr. According to the usual account, this happened in 478 (1085). He was soon afterwards dismissed however, but in 482 (1089-90) Malikšāh sent him to Mūṣil of which he took possession. He died there in 483 (1090).

2. ʿĀMĪD AL-Daula ABD AL-MUNŠĪR MUḤAMMAD B. FAIKEH AL-Daula B. DĀḤIR, son of the preceding, born in 435 (1043-4). By his marriage with a daughter of the vizier Niẓām al-Mulk in 462 (1067-8) he entered into closer relations with the ruling Sālждūk family. After her death in 477 (1083-4) he married her niece and in Ṣafar 472 (August 1079) the Caliph al-Muqtadī appointed him his vizier at the request of Niẓām al-Mulk. In 476 (1083-4) he was dismissed but restored to office in Dīn Ḥūdhdū (January 1062) and held this office for nine years. In Ramaḍān 493 (July-August 1100) he was dismissed through the efforts of Barkiyyūrūk. The latter accused him of embezzling the revenues of Dīyar Bahr and Mūṣil, which his father and he had governed during the time of Malikšāh, and had him arrested with his brothers. ʿĀmid al-Daula had to give up a huge fine and died in prison on the 10th Shawwaal 493 (24th Aug. 1100).

3. ZaʾīM AL-RuʿASĀʾ KĀWĀM AL-DIN ABU L-ḴĀṢIM ʿĀLĪ B. FAIKEH AL-Daula B. DĀḤIR, brother of the preceding. In 478 (1085) Zaʾīm al-Ruʿasāʾ conquered ʿĀmid (see under No. 1, a) and after
Majīṣīrīn had also fallen into the hands of his father, the latter sent him with the booty, found from the Marwānids, to Isfahān to the Sultan Malikshāh. In Shābaḥ 496 (May—June 1103) the Caliph al-Muṭaṣṣīḥ appointed him vizier but dismissed him in 500 (October 1106). Zā'im al-Ruṣāsī, al-Ḥaṣib al-Ma'mūdī, Mayyidī Saif al-Dawla Șādaqa; in 503 (1109-1110) he was again appointed vizier by the Caliph.

4. Nīẓām al-Dīn Abū Naṣr al-Muḥammad b. 'Alī b. Muḥammad b. Dījārī al-Baghdādī (or 'Abū Naṣr Muḥammad b. Muḥammad b. Dījārī). Nīẓām al-Dīn was first of all Īṣād-dār (master of ceremonies); after the death of the vizier Sa'dīd al-Dawla Ibn al-Anbārī in 555 (1140-1) the Caliph al-Muṣṭakīfī appointed him his successor.

**Bibliography:** Ibn al-Tiḳṭāka, al-Fakhrī (ed. Derenburg), 418 sq.; Ibn al-Atḥir (ed. Tornberg), xi. 52; Houtsma, Recueil de textes relatifs à l’histoire des Seljouqides, ii. 194.

(K. V. Zettersten)

**IBN DJAMĀʾA;** the name of family of schol- ars belonging to Ḥamāt, whose members are therefore quoted by this name only and not in- frequently confused with one another. Here may be mentioned:

He studied at Damascus and was afterwards mu- darrīs there; in 687 (1288) he became kādī of Jerusalem, in 690 (1291) chief kādī of Cairo, in 693 (1294) chief kādī of Damascus. From 702 he again held the office of chief kādī of Cairo, with one brief interruption till 727 (1327). His official duties did not prevent him teaching in several madrasas and also engaging in literary work. His most important work is his book on constitutional law, Tahār al-Aṣkām fi Tadbīr Allah al-Islām, on which cf. von Kremer, Culturgesch. der Orient, i. 403 sq. Through an error in Ḥalâlī Khalīfa, ii. 502, in Flügel, Cat. Wiss. des Hebräerh., N°. 1380, Brockelmann, Gesch. der Arab., ii. 94, he is ascribed this work to N°. 4 below, although he attributes it correctly on ii. 75 (only with a slightly different title which he gives from Cod. Berol. Ahlwardt, N°. 5613). For other writings of Ibn Djama' see Brockelmann.

2. Abu 'Omar Abū ʿAbd al-Azīz, al-Dīn, cer- tainly the son of the preceding, born in 694 (1294) at Damascus, afterwards chief kādī of Egypt and Syria. But when his representative at Damascus died in 765 (1364), he resigned the office and be- came mudarrīs in Cairo. He died in 767 (1366) on a pilgrimage to Mecca. On his writings cf. Brockelmann, ii. 72, and references given there.

3. Ibrahim b. Abū al-Rahmān, Bukhān al- Dīn, grandson of N°. 1, born 725 (1325) in Cairo. He studied in his native city and in Da- mascus, became kātib in Jerusalem in 773 (1371), chief kādī of Egypt and mudarrīs at the Sahāliya, but returned to Jerusalem in the following year. In 781 (1379) he again became chief kādī of Cairo and finally in 785 (1383) kādī of Damascus, where he died in 790 (1388). See Brockelmann, ii. 72.

4. ABU ʿABD ALLĀH MUḤAMMAD b. Aḥī BAKR, grandson of N°. 2, born in 759, became a physi- cian and teacher of philosophy in Cairo. He died in 819 (1416) of the plague. See Brockelmann, op. cit., ii. 94. He wrote a commentary on the dogmatic poem, Bad' al-Ālim, see Brockelmann, op. cit., i. 429.

**Bibliography:** given in the article.

**IBN AL-DIJARRĀH,** the name of two viziers:

1. Abū ʿAṣīr al-Muṭaṣṣīḥ b. Mūsā al-Dāʾī. After the dismissal of Ibn Maṣḥa in 724 (936) the Caliph al-Kādī offered the vacant office to the former vizier 'Ali b. Tās; but as he declined the offer, on the grounds of old age and feeble health, the office was given to his brother Abū al-Rahmān. But the latter was not fit for the onerous duties and only held office for three months; he was then thrown into prison with his brother and condemned to pay a heavy fine. In 739 (941) he again appears in history; after the appointment of Kūrtgi as Ṭumār al-Umar he performed the duties of a vizier for a period at the court of the Caliph al-Muṭaṣṣīḥ but without receiving the corresponding title.

2. Abū ʿAṭī b. Tās b. Dāʾūd, brother of the preceding, born in 245 (859). As a supporter of the pretender 'Abd Allah b. al-Muṭaẓ, 'Ali was banished to Wasiṭ in 736 (940) after the murder of 'Abd Allah, but received permission to go to Mecca from al-Muṭakerī's vizier Ibn al-Furat. In 739 (941-2) the Caliph appointed him vizier and he reached the capital in the beginning of the following year. He materially improved the finances of the state by his rigid economy; the troops were discontented however because he decreased their pay and his measures also brought him into disfavour in other quarters. He therefore asked the Caliph to accept his resignation; but the latter declined. Towards the end of 740 (947) however he was dismissed and imprisoned. Ibn al-Furat was appointed his successor. The latter clung to office for a year or two, until he was replaced in Djumādā I 306 (November 938) by Ḥamīd al-Abūs, who was old and feeble and at first al- lowed himself to be guided by 'Ali b. Tās. 'Ali however soon quarrelled with Ḥamīd and, after a rising in Bagdād in 308 (920-1) on account of the increased cost of living, 'Ali was offered the vizierate but declined it. As Ḥamīd lost the Caliph's favour and 'Ali's economy aroused discontent, the vizierate was again given to Ibn al-Furat in Rabiʾ II 311 (August 923). 'Ali was thrown into prison and after Ibn al-Furat had extorted a con- siderable sum from him, he banished him to Mecca and gave the government three instructions to send him on to Șan'āʾ. On the interpolation of Mu'nis, the prefect of police, 'Ali was pardoned on the fall of Ibn al-Furat and returned from exile in 312 (925). In Dhu 'l-Ka'da 314 (Jan.—Feb. 927) he was summoned to Bagdād from Damascus, where he was then living, through the influence of Mu'nis and given the vizierate. He did not take up office till the beginning of the fol- lowing year; but when it was found that the finances were again in a chaotic condition and the Caliph declined to follow his advice, he asked leave to resign on the ground that he was too old for the duties of the office. The Caliph at first declined but was finally persuaded and in
Rabi' 1 316 (May 978) 'Ali was dismissed and replaced by Ibn Mūkha [q. v.]. The Caliph al-Rādi afterwards twice offered him the vizierate, first immediately after his accession and again in 324 (936). As he refused on both occasions, Ibn Mūkha and the brother of 'Ali, Abd al-Rahmān, respectively were given it. 'Ali b. 'Isā died in Dhu l-Hijja 334 (July–August 946).

(K. V. Zettersten.)

IBN AL-DJAWZĪ, 'Abd al-Raḥmān b. 'Alī b. Muḥammad Abū 'l-Faḍā'ī (Abū 'l-Faḍā'ī) Djawzī. Abū al-Dīn, an Aryan author, Ḥanbali fāṣih, preacher and universal historian, born in 510 = 1116 at Bagdad, settled there after the usual journey of study, and died in 597 = 1200. His ardent devotion to his master, Ṣa'īd ibn Ḥaḍīth, led to the strictest criticism of Tradition; he even prepared an edition of al-Ghazālī's Ḥayāq purified of all weak traditions. His literary activity covered almost all the knowledge of his time. He exercised the greatest influence as a preacher (cf. Ibn Dzhauhar, 2nd ed., p. 220 sqq.); his numerous edifying works are recommended for public reading even by al-Ṣubki, Muḥammad al-Ḥallī, p. 163; Brockelmann, Gesch. d. i, 502 sqq. gives a list of his writings. Of his history of the world, al-Muntaq̣am wa-Multaq̣at al-Multaq̣am, the most important of his works to us, there have since become known the ms. in Paris, Bibl. Nat. (Blouchet, Catal. de la Coll., Schérer), No. 5909, in the British Museum (Add. 7320; s. Amelrood, Journ. Roy. As., 1906, p. 851 sqq., 1907, p. 19 sqq.; cf. ibid., 1904, S. 273 sqq.), Damascus, Ḥabīb al-Zayyāt, Khosain al-Kutub fi Dimaqāţ etc., p. 78, No. 62; on the Stambul Ms. s. Horovitz, Mitt. Sem. Or. Spr., x, 6. The following works from his pen are now also known: 1) Kaşf al-Nībāh 'an al-Asma wa-Allāh, cod. Leid. 1457 (not yet catalogued), s. Barbier de Meynard, Journ. As., 1907, 173 sqq. 2) Amār al-Āyān, Damascus, al-Ẓayyāt, p. 31, No. 28, 4, vgl. Horovitz, op. cit., x, 43. 3) Mukhabarat 'Udāli, al-Muntaq̣am, Shahr Ḥāl al-Khadîr, Damascus, al-Zayyāt, p. 33, No. 63, 1, 4) Dar al-Ẓanā'īf wa Su'm Yana'm al-Qain, ibid., p. 45, No. 37, 3, 5) al-Muṣṭafān min al-Muṣṭafā (from No. 32 in Brockelmann?); ibid., p. 37, No. 124, 2. 6) Muḥār al-Ṣaḥābah al-Sākīn fī Faqā'īl al-Ṣaḥābah wa al-Āmākin, ibid., p. 82, No. 46. 7) Darāyī al-Dhawāḥib (so to be read) wa-Kaşf al-Rū (so to be read) 'an al-Khālidī, s. C. Crisp Moncada, I Cod. ar. nuovo fondo della Bibl. Vatic., No. 1309. 8) al-Muṣāfājī, s. Völlers, Katal. der islam., 152. H. zu Leipz., No. 166, 9) Nukat al-Muṣāfājī fī 'l-Waṣf, ibid., No. 107, 10) Tadhkira al-Āyān, anon. extract from his Tadhkirat al-Āyān, Damascus, al-Zajīyāt, p. 82, No. 63.

(C. Brockelmann.)

IBN AL-DJAWZĪ, Shih, Shams al-Dīn Abū 'l-Muẓaffar Yūsuf b. Ẓiżghīṭ, grandson of the preceding on his mother's side. His father Ẓiżghīṭ was a Turkish slave of the vizier Ibn Huṣayn [q. v.] and afterwards mansamitted by him. Yūsuf was born in 582 (1186) in Bagdad and brought up by his grandfather; he studied in his native city, set out to travel in 600 and finally became professor and preacher in Damascus, where he died in 684 (1287). He is the author of a universal history (not yet printed) in several volumes, entitled Miqrāt al-Zamān fī 'Irāq al-Aṣfān. The latter part of it covering the years 495–654 has been reproduced in facsimile by J. R. Jewett (Chicago 1907), while some extracts from the years 450–532 were given in the Recueil des Historiens des Croisades, Historiens Orientaux, Vol. iii, p. 65 sqq.

IBN AL-DJAWZĪ, Shams al-Dīn Abū 'l-Khaṣr Yaḥyā Muḥammad b. Muḥammad b. Muḥammad b. Muḥammad b. 'Ali b. Yūsuf al-Djawzī, an Arabologist and authority on the readings (kīrāt) of the Kurān, born at Damascus in the night of Friday/Saturday 25th Ramadān 751 (30th Nov.—1st Dec. 1350), know the Kurān by heart by the year 763 (1363) and a year later was able to recite pieces from it in prayer. After devoted some attention to Ḥadīth, he studied the various ways of reading the Kurān, of which he mastered seven in 768 (1367). In the same year he made the pilgrimage to Mecca and thereafter went to Cairo where by the year 769 (1368) he had mastered thirteen ways of reading the Kurān. Returning to Damascus he devoted himself to Ḥadīth and law and studied under the two pupils of al-Jawzī, al-Abārkhārī and al-Asnawi. He then went back to Cairo to study rhetoric and the sources of law, and then went to Alexandria to hear the pupils of Ibn 'Abd al-Salām. In 744 (1343) he received permission to deliver fatwās from Abu 'l-Ṣa'īd Ismā'īl b. Katīrī, in 778 (1376) from Diyya al-Dīn, and in 785 (1383) from the Shaikh al-Islām al-Būkhārī.

After teaching Ḫirāḍ for a period he was appointed qādī of Damascus in 793 (1391). But when his property in Egypt was confiscated in 798 (1395), he went to Brusa to the court of Sultan Bayazid b. Ḫoṭmān. After the battle of Angora (end of 804 = 1402), he was sent by Timūr to Kūshāh in Transoxania, and later to Samarqand, where he lectured publicly and met the Sharīf al-Djūriet. After Timūr's death in Shāhān 807 (Febr. 1405) Ibn al-Djawzī went to Khorāsān, then to Herāt, Yazd, Isfahān and finally to Šīrāz, where, after teaching for some time, he was appointed qādī by Pir Muḥammad against his will. He then went to Baṣra and thence to Mecca and Medina (823 = 1420). After a stay of several years in these towns he returned to Šīrāz where he died on Friday the 9th Rabi' 1 833 (2nd Dec. 1429).

He is the author of the following works: 1. Khirāḍ al-Nābī fī 'l-Kirātāt al-Asīr (Berlin, No. 657); Escurial, Derensb, Les ms. arab., No. 1239; Constantinople, Nūr-ʾi Osmānī, 97; Khed. Libr., Fīhr, i, 117; Tunis, Maktabā Abādallya, i, 176; 2. Taḥdīr al-Taḥārī fī 'l-Kirātāt, commentary on the Taḥārī of al-Dānī on the readings of the Kurān (Khed. Libr., Fīhr, i, 92; Berlin,
Ibn al-Djazari — Ibn Djubair.

N. 590; Constantinople Nūr-i ʿOsmāniya, N. 60; 3. ʿīṣābiṭ al-ʾNāṣir fi l-ʿKīrāt al-ʾAhār, a poem of 1000 Radjaz verses on the ten ways of reading the Kurʾān, completed in Shāhān 796 = May 1396 (pr. Cairo 1283, 1307); 4. al-ʾDurr al-muṣawwa fī ʿKīrāt al-ʾAdlāt ilāl-lādālāt ilā-l-mardīb, a poem of 241 Tawīl verses, finished 823 = 1420; pr. Cairo 1285, 1308; 5. ʿĪḥāyāt (var. ʿĪḥāyat) al-Maḥṣura fī Ziyādīt al-ʾAgāra, a poem on the same subject (Aya ʿOṣūfa, N. 39); 6. Muḥammad al-Muṣarrabān wa-Muḥammad al-Tālūn, treatise in seven chapters on the same subject (Berlin, N. 656); 7. 41 Tawīl verses rhyming in ʿā on 40 difficult questions of Kurʾān readings (Berlin, N. 529); 8. al-Muḫāddimāt al-Djazariyya, a poem of 110 Radjaz verses on the recitation of the Kurʾān (pr. Cairo 1282, 1307); 9. al-ʾTāḥīḍ fi ʿĪlm al-Ṭaʿlīqīt, treatise on the recitation of the Kurʾān, finished 769 = 1367 (Paris Bibl. Nat., N. 592, ii.); 10. ʿĪḥāyāt al-Muḥallī fī Ayāt yā Ṭarīq al-bāʿ, on the different ways of reciting Sūra xi. 46 (Khed. Libr., Fihār. vii. 578); 11. Muḫṭaṣar ʿṬabarān al-Karrā al-mutamām bi-Ǧāyāt al-Nīkāya, the shorter of two works which the author devoted to the same subject (Constantinople, Nūr-i ʿOsmāniya, N. 85); 12. Muḫṭāṣar Ḥadīth, al-Ḥadīth, on the technology of Ḥadīth (Berlin, Vers., N. 1084); 13. al-Ḥaddīya ilā ʿAlāʾī al-ʾRūyā, a poem of 370 Radjaz verses on the tradition of Kurʾān recitation preserved by the Kurʾān readers (Essāri, Casirai, N. 1756, 1808); 14. ʿĪḥāṣ al-Muḥallī fī al-ʿĀḥidāt il-muṣawwa wa-al-ʾAwūlī, finished 808 = 1405 at Shīrāz (Paris Bibl. Nat., N. 4577, iii.; a similar work is contained in N. 4577, iv.); 15. al-ʾRāʾīs al-baṣayrīa fī Ṭashk al-ʾAbāzāt il-Nābi wa-la ʿAṣīra, a Radjaz poem on the version of the parents of the prophet to Islam (Berlin, N. 10943); 16. al-Mawlid al-baḥīr, a biography of the Prophet (Brit. Mus., Suppl., N. 515); 17. Ṭahr al-Šīrāzī fī Sirat al-Nābi wa la-Khulafāʾ, a Radjaz poem on the biography of the Prophet and the first four caliphs with a brief survey of the history of Islam to the reign of ʿAbd al-Malik and the siege of Constantinople by the Turks, composed at the request of ʿAbd al-Muḥammad, ruler of Shīrāz, and finished on the 25th Dhu l-Ḥijjah 758 = Sept. 1396 (Ms. in Brockelmann); 18. al-Ḥam al-baṣrīn min Kalām Sāḥib al-Murshid, a Ḥadīth collection for use in prayers (pr. Cairo 1309, 1315; Algier 1328); 19. Muḫṭṣāṣar al-Nāṣīḥa bi l-ʾAdlāt il-ʾAṣāfā, a treatise on ethics based on Ḥadīth texts (Khed. Libr., Fihār. vii. 564); 20. al-Zahr al-faḥīb, an exhortation to virtue (pr. Cairo 1305, 1310); 21. al-ʾIṣlaḥ fi Lawāsim al-Kitāb, a short treatise on calligraphy (Berlin, N. 6); 22. 52 Radjaz verses on astronomy (Berlin, N. 8159, iii.);

11th Djamādā II 466 (11th Febr. 1074). On account of his fine handwriting he was employed as copyist by the Ḥanafī šāfiʿī at Baghdaḏ. He learnt medicine from Saʿīd b. Ḥibat Allāh, physician to the Caliph al-Muṭṭakīd. He lived in the Karīb quarter of Baghdaḏ and not only gave his services both to the people of that quarter and to his own acquaintances without reward, but also applied himself to medicine as well. He died in Shāhān 493 (June 1100). His best known work is the Taṣawwur al-Aḥdān fī Taʿlīq al-ʾInsān, tables in which diseases are arranged as are the stars in astronomical tables, of which a Latin version was printed at Strassburg in 1532. He also drew up an alphabetical list of medicinal herbs and drugs called Muḥallī al-Bayān sināʿa yastaʿmilūn l-ʾInsān for the Caliph al-Muṭṭakīd. He composed, besides a treatise against Christianity, and wrote verses.

IBN Djinī, Abū ʿAlī Fathā ʿUthmān, was born in Mūs al before 300 a. H. (Pröster, p. x., ca. 320), the son of a Greek slave belonging to Sulaimān b. Fath b. Ṭalḥa b. Ṭalḥa. He was the Baṣrī Abī ʿAlī al-Farīsī al-Fasawī, with whom he was associated for forty years till the latter's death, partly at the court of Saʿīd al-Dawla in Ḥalab and partly at the court of ʿAḍīd al-Dawla in Persia; according to the Biographical Dictionary, Kitiṣ al-ʾInsān at the court of the latter and his successor. In both places he was on friendly terms with al-Mutanabbi, with whom he discussed grammatical questions and on whose Diwan he wrote a commentary. He also sought other teachers (Rescher, p. 5 sq.). He succeeded al-Farīsī in Baghdaḏ and died in 392 = 1002. He devoted himself especially to grammar and is celebrated as the most learned authority on tāṣīr; he occupied a position midway between the Kūfa and Baṣra schools. His most important works are Kitiṣ Sirr al-Šīrāzīwa-ʾArār al-Balāgha (on Arabic vowels and consonants) and Kitiṣ al-Khaṣṣāṣ fī ʿĪlam ʿUṣār al-ʾArabiyya; besides other philological works he also wrote poems.

Biography: Brockelmann, Geschichte der arabischen Litteratur, i. 125 sqq.; G. Flügel, Die grammatischen Schulen der Araber, p. 248—

IBN DJUBAIR, ABU ʿAL-HUSAIN MUḤAMMAD B. AHMAD AL-ḴIRĀN, Arab traveller, born at Valencia in 1040 (1145), studied ʿADDĪT and ʿADDĪT at Jātiva to which his family belonged. As secretary to the governor of Granada Abū Saʿīd b. ʿAbd al-Muʿmin, he is said to have been forced to drink wine on one occasion and to atone for this sin he undertook a pilgrimage. From Granada he set out in 1183 via Tarifa to Ceuta and thence by ship to Alexandria. As the
Christians barred the usual way to Mecca he had to travel by Cairo, Kus, 'Aidhab and Djudda. He afterwards visited Medina, Kufa, Baghdad, Meșul, Aleppo, and Damascus and then embarked at Acre for Sicily to return to Greenland via Constance in 1185. He travelled in the East on two further occasions, 578-587 (1189-1191) and 614 (1217), but on the latter journey he only reached Alexandria, where he died. His description of his travels is one of the most important works in Arabic literature, and also particularly important for the history of Sicily under William the Good. Cf. M. Amari, Voyage en Sicile sous le règne de Guillaume le Bon, texte arabe suivi d'une traduction et de notes, 1840, and his Bibliotheca Arabico-Sicula; edition of the Arabic text by W. Leiden 1852, new edition by de Geose, 1907 (Gibb Memorial, vol. v); Italian transl. by Schiaparelli: Viaggio in Isopia, Sicilia, Siria e Palestina, Mesopotamia, Arabia, Egitto etc., 1906.

Bibliography: Pons Boignies, Ensayo biobílograf., p. 267 sqq. (further references there); Brockelmann, Geschichte etc., i, 478.

IBN DUKMAK, ŞARIM AL-DIN İBRAHİM B. MUHAMMAD AL-MEŠR (the name is derived from the Turkish tuğmaq "hammer", cf. Hâdîddî Khâlifa, ii, 102) was a zealous Hanafi and wrote a work on the fasâ laid of the Hanafî, Nasîm al-Djumân, in 3 volumes, the first of which deals with Abu Hânîfa (Hâdîddî Khâlifa, iv, 136, vii, 317); on account of his depreciatory references to al-Shafi'i he was flagged and thrown into prison. His history of Egypt, Nushat al-Anîm, in about 12 vols. to the year 779, was of the greatest importance (Hâdîddî Khâlifa, ii, 102; iv, 328; G. Weil, Gesch. d. Chafis, viii, 79). By command of the Sultan Malik al-Żahir Barqûk he wrote a history of the rulers of Egypt to the year 805; he further wrote a separate history of this Sultan, Hâl al-Jâwâhir fi Sâvat al-Malik al-Zâhir Barqûk, abbreviated under the title Yánbî al-Muṣâhir (Hâdîddî Khâlifa, i, 102; iv, 230; vi, 514). According to Hâdîddî Khâlifa, his historical works were largely utilised by al-Amin and al-Ashâlînî (i, 442; ii, 118). A work now lost dealt with Cairo and Alexandria. He wrote a large work on 10 cities of Islam, Kitâb al-Injîr li-Wâsâfâr al-Hâl al-İmsûr, devoting one volume to each city; of these the volumes describing Cairo and Alexandria are preserved in Cairo and have been published by Völlers. According to Völlers (p. 4) he used better authorities than al-Maqrizi. The latter, for a time his pupil, did not use his work, according to Völlers. Ibn Dukmaq also wrote a work on Sûfi biographer, al-Kunûz al-makhtûba fî Ta'rikh al-Sûfiyâ, also a book on the organization of the army, Târijmân al-Zamân (Hâdîddî Khâlifa, ii, 277), and a book on the interpretation of dreams, Farâ'îd al-Fawâ'id (i, c., iv, 392). According to al-Suyûtî, Husn al-Muhâjara fî Akhbar Miyâ된다 al-Kâhirî, 255, he died in 790 = 1388, aged over 80; so also Hâdîddî Khâlifa, i, 447; ii, 102; 277; but in any case he was still alive in 793 (S. Völlers, Introduction) and Hâdîddî Khâlifa elsewhere gives the date of his death as 809 = 1406 (ii, 149; iv, 230, 392; vi, 323, 357, 514).

J. PEDERSEN.

IBN L-DUMAINA, 'ABD ALLAH B. 'U'RÂD ALLAH B. AHMAD, ABD L-SARî, an Arab poet of the clan of 6'Amir b. Taim Allâh of Khâljîn. Very little is known of his life. In the Kitâb al-Ârâbîn it is related that he treacherously slew Muzâhîm b. 'Amr, a relative of his wife 'Immâma who had taken his sons with her and had reviled him in a poem, and then strangled 'Immâma and sent to death her little daughter. Ibn al-Dumaina was arrested on the accusation of Djudâh, the murdered man’s brother, but was released for want of evidence. A long time afterwards he was attacked in Tabâla, while reciting his poems, by Mu'âb, another brother of Muzâhîm, and mortally wounded. According to another tradition, a (second?) attempt by Mu'âb on his life in the market place of al-Abâlî was successful. If the Ahmad b. Ismâ’il, mentioned in al-Ârâbîn, xv, 153, 9 sqq., is identical with the governor of Mecca who appears in Tab., iii, 740, Ibn al-Dumaina was a contemporary of al-Râshid.

His poems where highly prized and several were set to music. The Miss. Beri, Verz-n, No. 7476, i., and No. 8255, i., are said to contain several of his kusâs with biographical details. Al-Zubair b. Bakrâr wrote a Kitâb Makhîr Ibn al-Dumaina, as did Ibn Abî 'Alîn Ta'far (Fîrîn, i, 111, 347, 348).

C. VAN ARENDONK.

IBN DURÂID, ABU BAKR MUHAMMAD B. AL-ḤASAN B. ‘ATÂ’IYÂH AL-ÂZDI (on the name Durâid, see 6Hamûsa, ed. Freytag, p. 377 i.), according to a work of Ibn al-Dumaina, v. 118, 134, 137, 140 (left out of his own account, a native of Khâção, was born in the year 430/1039 in 223 = 837 in Basra, (in the Sîkka 6Silîs), he was studying in Basra under such teachers as Abî Hâkim the Sijistâni, al-Riâyashî, al-Ishânndâmî and al-Âzîm’s nephew. In 527, when the Zanj were massacring in Basra, he escaped the danger and went with his uncle al-Ḥasan (others al-Ḥusain), who had undertaken his education, to 6Oman where he spent 12 years. He then went to Dzjirat Ibn Omar (read this for 6Umâra; Ibn Khallîkân has Basra) and thence to Fâs, where he stayed at the court of the Mâkîlîs as their favourite and was chiet of a Diwân. He compiled for them a Kitâb al-Djumân fî Ibn al-Luqâ, which is dedicated to Abu 6Abîbâs Ismâ’il b. 6’Allah b. Mâkîl, Hâdîddî Khâlifa, ii, No. 4202, and he wrote in honour of the Mâkîlîs his famous poem Mâkûra (on the difference between Ibn al-Hâjîm, al-Masûdî, and Ibn Khallîkân with regard to the names of the corresponding Mâkîlîs see Axel Moberg, c. v. 6Dicht von 6Oheisalîh 6Mâklîf al-Ma’sûdî, (München-Leipzig, 1908, p. 10). He had older models for this kind of poetry, in which each verse ends in an 6af mâkûra (see al-Masûdî, Marâjî, viii, 304) and was himself imitated by his successors; this poem has been several times annotated and published. When the Mâkîlîs were deposed in 920 = 992 and migrated to Khurâsân Ibn Durâid went to Baghîd; here he was recommended by al-Khujwârî to the Caliph al-Mukâdîrî and received from him a pension of 50 dinars a month. In spite of the fact that he was a noted spendthrift and winemaker, he reached a great age. When he was 90 he was seized with paralysis; he recovered
however and lived two more years in spite of a second shock. He died in 321 = 933 on the same day as al-Juhab’i and was buried in the ‘Abdul- 
Siyá cemetery in Baghdad. He is represented as the most learned philologist of his time and the best critic of poetry; he is also called d‘ama 
ego 'l-Shu‘ayrá wa-aqğár ‘u’l-Ulumá. Besides the great dictionary, al-Jundhara, he wrote on various special 
branches of lexicography, e.g. Kitab al-Sarjá 
wa ‘l-Lajjam (ed. Wright, in Operaes Arabica, 
Leiden 1859), two books on the horse, one on weapons, on clouds and rain, on amphibious expres-

ious usul of Arabic. One forced to swear six oath (v. Kar 
Malázín, ed. Thomecke, Heidelberg 1882) etc. His philology was to him a patriotic duty; against 
people like the Shu‘aybiya he wrote the Kitab 
al-Iṣṭiháð (ed. Wustenfeld, Göttingen 1854) to 
explain the etymological connections of Arabic names 
(see Goldziher, Muhammadische Studien, i. 209). Among his pupils were al-Shırafl, al-Marzubani,

IBN FAĐL ALLĀH. [See FAĐL ALLĀH.] 
IBN FAĐLĀN, properly Aḥmad b. Fađlān b. 
AL-ABRĪS b. RASĪD b. HAMMAD, Arab author, 
composer of an account (riṣāla) of the embassy 
by the Caliph al-Muktaḍir to the king of the 
Volga Bulgārs [cf. bulgār, i. 876 sqq.]. As he 
was a client (ma‘ād) of the Caliph and of the 
conqueror of Egypt Muḥammad b. Sulaimān [see 
Cairo, i. 818—] he was certainly not of Arab 
origin. He seems to have taken part in the embassy 
as a theologian and authority on religious matters. 
The real ambassador appointed by the government 
was Shu‘ayb al-Rasāl, a client of Nağḥār al-Ha-
rāmi mentioned by Arb (ed. de Goeje, p. 58). 
The embassy left Baghdad on the 11th Safar 359 (21st June 941), went first to Bukhārā, thence to 
Ka‘bārāzam, and only then to the land of the 
Bulgārs, the capital of which was reached on the 
12th Muḥarram 310 (12th May 952). Nothing 
is known of the route or time of the return to Bagh-
dād; as little is known of the life of the author of 
the Risāla. The latter seems to be used as early as the iVI (9th) century by al-Iṣṭakhrī and al-Mas‘ūdī; it is expressly quoted and extracts 
given by Yūkūt (s. v. Itil, Bāṣghird, Bulghār, 
Khurāsān and Rūs); the work is known to later writers from these quotations, al-
though Yūkūt (i. 113, 15) mentions specially that 
in his time the Risāla was extant in numerous 
copies. Cf. C. Brockelmann, Gesch. der arab. Litt.,
IBN AL-FARADI — IBN FARKUN.

IBN FARAH AL-ISHIBILI, whose full name was SHIHAB AL-DIN ABU 'L-ABBAAS AHMAD b. FARA R AHMAD b. MUHAMMAD AL-RAKMI AL-ISHIBILI AL-SHAFI'I, born in 625 (began 10th December 1227) at Sevilla (Ishibliya), was taken prisoner in 646 (began 26th April 1248) by the Franks (al-Franki) i.e. the Spaniards under Perdita 111 the Saint, of Castile (1217—1252) at the conquest of the Spanish capital of the Almoravids [q.v.], Sevilla, but escaped and afterwards went, in the sixth decade of the century (650 sq. = 1252 sq.), to Egypt; after hearing the most celebrated teachers of Cairo, he studied under those of Damascus, where he settled and gave lectures in the Umayyad mosque, as a great authority on Tradition, while he declined the professorship offered him in the school of Tradition, Dar al- Hadith al-Nabawi. Among those whose teachings he heard him were al-Dimyi (cf. al-Kutubi, Fa'izi al-Wafa'i, ii. 17), al-Yunini [q.v.], al-Mu'takil, al-Nasulbus, Abi Muhammad b. al-Walid, al-Birralli [q.v.], and notably the great authority on history and tradition al-Dhahabi [q.v.]. He died in the tahr of Umm al-Sulih of diarrhoea (fi 'l-islah) on the 9th Dhul-mi 640 = 15th February 1300. Nur al-Suyuti, Tabaqat al-Mufassirin (ed. Meursinge), ii. 38, (wrongly) makes our Ibn Farah the son of another, the well-known author of the eschatological Tuhkira bi Ahl al-Malikin wa Umar al-Asbil (a. a. d. 1842—1252) and of the great Kur'anic commentary, Dzammi' Al-Khawam al-Kur'an, Muhammad b. Ahmad b. Abi Bakr b. Farah (al-Makkar), i. 600, wrongly b. Faraj b. Anasari al-Maliki al-Sabti, died 681 = 29th April 1273.

Ibn Farah al-Ishibli’s most celebrated work is the scholastic didactic poem in 28 technical expressions of the science of Tradition in 20 (Hajjardbiy b. Khalifa, vi. 190, wrongly gives 30) 'A'amni verses with the rhyme letter al-'A (hence Lamiya) in the form of a love-poem, so that it was described correctly by al-Safadi in al-Makkar, i. 819, as a Kitab ghassaliya fi Al-Jab al-Hadith (a love-poem on technical expressions of Tradition) (Brockelmann’s quotation, i. 372, al-Makkar, i. 819, l. 819). It is usually called Mun'immat Ibn Farah or Gharani Sahib after the two opening words of the first verse: Gharani suhi sa 'l-Rujab fi hukm mu'adu — wa-Ghariani sa-Dami's murzai wamulsalatu. “My longing is real, but my desire which is set on thee is difficult to gratify; my misery unceasing, my tears uninterrupted.”

The text of the Kitab was first printed by Krehl in al-Makkar’s Analecte, i. 819 sq. (from al-Safadi) and again in Madjmin al-Musnin, Cairo 1313, p. 51 sq., and in al-Suhki’s Tabaqat al- Shafi’iya al-kunbi, v. 12 sq. (Cairo 1324 = 1906-7), where only 18 verses are given. The commentary of ‘Ilz al-Din Abi Abul Allah Muhammad b. Ahmad b. Djama al-Kishti, died 816 = 1413, Zawal al-Turahi fi Sharh Mun'immat Ibn Farah, is published by Fr. Risch, Leiden 1885 (there is another Ms. not yet used, in the British Museum, Cat. Cod. Orient., ii. No. 169, ii.); in the notes there is also published almost the entire commentary of Shams al-Din Abu ‘Abd Allah b. ‘Abd al-Hadi al-Mukhi, died 744 = 1343 (s. al-Dhahabi, Tuh al-Huffaz, ed. Wüstenfeld, xxi. No. 12) from the MSS. Leiden, Cat. Cod. Or., iv., No. 1749, and Gotta, No. 578 (s. Persch, v. 20). We may also mention that Berlin, Verz., No. 1055, Tush steadin Manzumat Ibn Farah, gloss on Ibn Farah’s poem of the year 894 = 1490, is not a gloss on ‘Ilz al-Din’s commentary, as Brockelmann says, but belongs to the poem itself: Cairo i. 250, contains the commentary of Muhammad b. Ibrahim b. Khayi al-Titi (Boinet, Dictionnaire, p. 154 and 899) al-Maliki, died 937 = 1530-1, al-Bahar bi al-saniya fi al-Hall al-Tabaqat al-Sunnya. The principal nica of the commentator Yahya b. ‘Abd al-Rahman al-Ishahini, i.e. al-Karafi, by which alone he is often quoted, is not given by Brockelmann (Paris 4267, l. 4257, i. (Cat. de Slane). Muhammad b. al-Amir al-Kathir in Brockelmann is rather Muhammad (b. Muhammad) al-Amir al-Kabir, according to Berlin, Verz., No. 1056. Besides Ibn Farah’s didactic poem there is also a commentary by him on al-Nawawi’s [q.v.] 40 Traditions, Sharh al-arbaiin hadithin al-Nawawiy, Berlin, No. 1488-9.

Bibliography: Given in text.

(C. F. Seybold)

IBN FARKUN, BURHAH AL-DIN IBRAHIM B. ‘ALI B. MUHAMMAD B. ABU ‘L-KASIM B. MUHAMMAD B. FARUN AL-YAMARI, a Malik jurist and historian, descendant of a family belonging to Uiyân, a village near Jaen in Spain, was born in Medina, where he died, heavily in debt, on the 10th Dhu l-Hijja 799 = 4th Sept. 1397, as the result of paralyzis of his left side.

In addition to his father, his teachers were his father’s brother, Abi Muhammad Sharaf al-Din al-Ashawi, Djamal al-Din al-Damankari Muhammad b. ‘Arafa, and the latter’s son, whose teaching Ibn Farhan received on his pilgrimage in 792 = 1390, and others. He often visited Cairo and in 792 (1390) Jerusalem and Damascus. In Rabia II, 793 = March 1391 he became kadi of Medina. As a devout Muslim he frequently recited the Kur’an and often repeated the Kur’anic prayers (wird); he also reintroduced the Malikite rite, into Medina. He is the author of the following works: 1. Tahrijat al-Hakikam fi Usul Manhadij al-Akhom, a treatise on legal practice according to the Malik school (pr. Cairo 1301, 1302; Bukh 1300); 2. al-Dhahabi al-mudhakkab fi Mur’ifat Ayin ‘Ulaman al-Mudhakkab, a collection of about 330 biographies of Malik jurists compiled from about 20 works detailed at the end and finished in Shaban 761 = June 1360 (according to Codera, in 857 = 1453 the text was revised cf. also Houtsma, Catal. d’ une Coll. de manusc. etc., Leiden 1889, No. 204; pr. Fas 1316, Cairo 1329). This work is often quoted as Tahrijat ‘Ulaman al-Arab oder Tuhkira al-Dhahabiya; 3. Durar (var. Nukhbat) al-Gharawi al-Mudhakarat al-Khawajat, a collection of riddles on various points of Malik law (Khed. Libr., Fikhr., ill. 187); 4. Tahsil al-mumimmût fi Sharh Dzammi’ al-Ummahat, a commentary on the legal handbook of Ibn al-Hajjib (Brit. Mus., Cat., No. 872, ix.).

Alfalah belonged to the district of al-Nahrawan and was first of all secretary of State in Baghdad. After the unsuccessful attempt to place Ibn al-Mu'tazz [q. v.] on the throne, 'Ali was appointed vizier in Rab'ii I 296 (December 908) by the Caliph al-Mu'tadid and became the real ruler. In Dhu l-Hijjah 299 (July 912) he was dismissed on the pretext that he had arranged a raid on the capital with the rapacious Bedouins. To make his former favourite harmless, the Caliph had him imprisoned and confiscated his vast wealth. He managed to 'regain' the caliph's confidence however and was set free in Dhu l-Hijjah 304 (June 917) and restored to office. The wars and extravagances of the vizier brought the finances of the State into disorder and this brought about his fall. In Djamadi I 306 (November 918) he was dismissed for a second time, imprisoned and had all his property confiscated. He succeeded in being pardoned again through the influence of his son al-Mu'azzin and in Rab'ii II 311 (August 923) the Caliph made him vizier for the third time. His avareous and revengeful nature made him so hated however that al-Muktadir had finally to get rid of him. In Rab'ii I 312 (June 924) 'Ali and al-Mu'azzin were beheaded on 13th Rab'ii II of the same year (July 924).

2. Abu 'Abd Allah (or Abu l-Khattab) al-Far, brother of the preceding. After 'Ali b. al-Furat had been appointed vizier in 296 (908), he entrusted his brother with the administration of the finances of the eastern and western provinces. According to the usual date Djaftar died as early as Shawwal 297 (June-July 910). His office was then divided between the vizier's two sons, al-Fadl and al-Muhammad, so that the former administered the eastern and the latter the western provinces.

3. Abu al-Farî al-Fadl b. Djaftar b. Muhammad, son of the preceding, born in Sha'ban 279 (November 892), also called Ibn Hinzaib after his mother Hinzaib, a Greek slave. In 320 (932) he was appointed vizier by al-Muktadir, but absolute anarchy was then reigning in the capital and, as the new vizier was not able to cope with the situation, he had to call in the aid of Mu'nis, the commander of the body guard. When the latter advanced in the town, the Caliph was persuaded to go out against him. Al-Muktadir's troops were defeated and he himself slain. Al-Fadl thus lost his office. He was appointed collector of taxes for Egypt and Syria under the caliphate of al-Fadl; the actual ruler however was not the Caliph but the Amir al-Umara Muhammad b. Râ'îk. In 324 (936) or 325 (937) the latter induced the Caliph to make al-Fadl vizier; but he was weak

IBN FÄHRÄT. — IBN AL-FURÄT. 377

IBN AL-FÄRÄT. [See 'OMAR b. al-FÄRÄT.]

IBN FÄRÄS, Abu l-'HSAIN AßMÄD b. FÄRÄS b. ZAKARIA b. MUHAMMÄD b. HÄBÄR, philologist and grammarian of the school of Kûfâ, died at al-Raiy in Safar 395 = Nov.-Dec. 1004. The date and place of his birth are unknown but it is supposed that he was born in a village named Kursûf in the district of al-Zahrâ. He studied at Kairawân, Hamadân, Bagdad, and on the occasion of his pilgrimage, in Mecca. Among his teachers he may specially mention his father, who was a philologist and Shâfîj jurist. Abû Bakr Aßmad b. al-Hasan al-Khätib, Abu l-Hasan 'Ali b. Ibrahim al-Kaṭânan, Abu 'Abd Allâh Aßmad b. Tâhir al-Munadjamî, etc.

After teaching for some time in Hamadân, where the celebrated Bâdi' al-Zâmân al-Hamadhâni was his pupil, the Bâyiûd Fâkhr al-Dawla summoned him to al-Raiy as tutor to his son Maqûd al-Dawla Abu Tâlib. Originally an adherent of the Shâfî's school, he afterwards went over to the Mâlikî. He was so generous that he frequently gave his students what was wearing to the poor and hungry.

The Shâhîj Ibn 'Abbâd, who out of modesty called himself his pupil, declared that the works of Ibn Fâris were free from error. Although he himself was of Persian origin, Ibn Fâris defended the Arab grammarians in their controversies with the Shû'ûbîs.

Arab. Litt., i. 130; Huart, Arab. Lit., London 1903, p. 159 sqq.

(Moh. Ben Cheneb.)

IBN AL-FÄRÄT, the name of several persons who filled high offices of state.

and not fitted for such a post and by the next year we find him begging permission from Ibn Ra'āk to retire to Syria to attend to the revenues of that province and of Egypt. Ibn Muṣṭa succeeded him as vizier. Al-Fāḍil died in 527 (939).

4. Abū l-Fāḍil Dja'far B. Al-Fāḍil B. Dja'far B. Muḥammad, son of the preceding, died in Dhu l-Ḥijjah 308 (April 921). Dja'far, who was also called Ibn Ḥiṣnāba, held the office of vizier to the Ikshidids in Egypt. The real ruler however was the Abyssinian Kāfār, under whose protection Dja'far held office and who was soon recognised in name also as king. On Kāfār's death in 507 (926) the minor Ṣaḥib b. 'Abd Allāh b. Ṭuḥdī, the commander of the Syrian troops. In 358 (969) the latter appeared in Egypt, arrested Dja'far and appointed the Ṣaḥib b. Ḍābir al-Naṣībī vizier. Dja'far was soon released and when Ḥasan returned to Syria, he restored the government of Egypt to his hands. In the same year however the Ikshidids were overthrown. Dja'far died in Ṣafar or in Rabi' I 391 (January 1001) or, according to another authority, in Ṣafar 392 (Jan. 1002).

(K. V. Zettersten).

**IBN AL-FURĀT, NṢIR AL-DĪN MUḤAMMAD B. ʿΑBB AD-ḤAṢIH ARAB HISTORIAN, b. 735 (1334), d. 807 (1405), author of a comprehensive chronicle, Taʾrīkh al-Dawla wa l-Mulūk. He began with the viiith century and worked backwards but only reached the fourth century A.D. He gave extracts from his predecessors verbatim which adds a high value to his work. The only manuscript (Vienna, cf. Flügel, Die arab. . . . Hist., N. 824) is still unedited, although it has been used by several scholars.

**Bibliography:** See Brockelmann, Gesch. d. arab. Litt., ii. 50 and Nachträge.

**IBN GHĀNIYA, ʿIZZ AL-DĪN ʿΑΒΒ AD-ṢALĀM B. MUḤAMMAD AL-MAKDIṢĪ, author of the well-known Kāfīf al-Aṭrār an Ḥikam al-Taʾyīr wa l-Azhār, which was published in 1821 by Garcin de Tassy under the title Les oiseaux et les fleurs (repr. in Allégories, récits politiques, etc., 1876); German transl. by Peiper, Stimmen aus dem Morgenlande, Hirschberg 1850. Other works are detailed by Brockelmann, Geschichte etc., i. 450 (cf. ii. 793). Biographical details are lacking. The year 678 (1279) is given as the year of his death.

The same name Ibn Ghanim al-Makdisi is also given to a Ḥanāfi jurist on whom cf. Brockelmann, op. cit., ii. 312.

**IBN GHĀNIYA, YAJĪV B. ʿΑLI B. YūsUF AL-MASūF, GOVERNOR OF SPAIN UNDER THE ALMORAVIDS, born in Cordova, according to Ibn al-Khaṭīb, and died in 548 (1153) at Granada. He is best known as Ibn Ghāniya, after his mother, a relative of the great Yūsuf b. ʿΑbād b. Ṭuḥdī, the real founder of the Almoravid empire.

Ibn Ghāniya, as well as his brother Muḥammad grew up at the Almoravid court of Marrakush, where their father seems to have held a high position. In 520 (1126) 'Ali b. Yūsuf appointed Ibn Ghāniya governor of Western Spain. From 520-538 (1126-1143) he successfully warded off the attacks of the Christians and completely defeated the army of Alfonso the Fighter, King of Aragon in 528 (1133-1134) at Fraga. Beginning about 538 (1143) however, the revolutionary movement of the Andalusian Muslims (Agarones) against the Almoravid empire, led by chiefs like Abū l-Kāsim Almad (Abencasí), the Kāfī Ibn Ḥamdīn of Cordova, Abū l-Ḥakem b. Ḥassan of Māgra, Al-Mustanṣir (Zafarola) of Saragossa and many others so shattered Almoravid dominion in Spain that it soon fell to pieces.

The governor Ibn Ghāniya, who lived in Seville, performed prodigies of valour and showed great qualities in organising the resistance. He recaptured Cordova in 539 (Jan. 1146) from Ibn Ḥamdīn, who then obtained the support of Alfonso VII of Castile. Ibn Ghāniya had to retire before the latter's army to the citadel of Cordova in 540 (1146). The arrival in Spain of the first Almohad armies forced Alfonso VII to abandon Cordova to Ibn Ghāniya, who however became his vassal. In face of Alfonso VII's increasing demands, Ibn Ghāniya allied himself with the Almohad general Barra, governor of Seville, with whom he exchanged Cordova and Carmona for Jaén in 543 = 1148.

The successes of the Almohads were rapid and soon Grenada alone remained to the Almoravids, while Ibn Mardanīsh [q. v.], an independent lord, was master of Murcia, Valencia and the whole of Eastern Spain.

One of Ibn Ghāniya's last acts of loyalty to the Almoravid empire was to send to Ceuta the governor al-Ṣabrāwī at the Kāfī Ṭuḥdī's request in 543 (1148). He died soon afterwards in Granada on the 10th Shabwān 543 (December 1148), when the ruin of the Almoravids had been completed in Spain.

Ibn Ghāniya seems to have left no children. If we may believe Ibn al-Khaṭīb in the Ḥiṣnāba, he early sent away his wife, lest her company might diminish his warlike ardour. His brother Muḥammad, appointed governor of the Balearic Islands [q. v., i. 617b] in 520 A.H., left sons, who with their descendants maintained Almoravid rule there till 580 (1188). It was the grandsons of Muḥammad who attempted an Almoravid restoration in Barbary, where they fought till 633 (1235-1236) against the Almohads.

**Bibliography:** See the references in F. Codera, Decadencia y desaparición de los Almoravides en España, Saragossa, 1899; A. Bel, Les Derniers Ghâniya, derniers représentants de l'empire almoravide, et leur lutte contre l'empire almohade, Paris, 1905. (Alfred Bel.)
IBN ḤADJAR AL-ḤĀṬIMI, whose full name was ḤĀDIM B. MUḤAMMAD B. MUḤAMMAD B. ṬĀLI ḤADJAR, ŚIḤĀB B. ABD B. ṬĀLI ḤADJAR, Abū l-ṬĀLI ḤADJAR, AL-ḤĀṬIMI AL-ṢĀDI (after the Fāṭimah b. Abī l-Ṭābil, where his family was originally settled), a famous Arab jurist of the Shāfi’ī school, was born at Maḥālāt Abī l-Ḥayāt in al-Gharābiyya [q. v.] towards the end of the year (some say Radjab) 909 (1504). While still a child, he lost his father, the latter’s šaiḫs Ṣhams al-Dīn Ibn Abī l-Ḥamādī (died 932), a noted mystic, and Ṣhams al-Dīn Muḥammad al-Ṣanāwī, a pupil of the latter, undertook his maintenance and education. Al-Ṣanāwī placed him in the Ṣaḵām of Sayyid Ahmad al-Badawī; on the completion of his elementary education he went up to the Kubbah al-Mahmūdiyya.

Ibn Ḥadjar, who was also esteemed as a writer both of prose and poetry, displayed a considerable literary activity; his works, several of which are very important for the study of Islam, were much sought after even in his lifetime, notably his commentary, Faḥī al-Bārī fi Sharḥ al-Bukhāri (Būlāk 1300-1), which was sold for 300 dinars. Of his writings, the number of which is estimated at over 500, we may here mention: al-Biḥārī fi Taʿmir al-Shābā (ed. Spranger etc., Caire 1856-73, and Cairo 1323-5); Taḥdīh al-Tahdīh (ed. Hādār al-Bāb 1325-27); Taḏbīr al-Mansūra bi-Zawājil al-Riyādi al-Amīriyya (Ibad 1824); al-Kawwāl al-musaddad fī l-Dābb an al-Muqaddam li l-Imām Ṣalmān (Ibad 1824); Būlāk al-Mārūm min Adillat al-Ahkām fī l-Imām al-Ḥadīṯ (Cairo 1330); Nuḥkhat al-Fikr fi Muṣnafā Abī l-Ṭābil al-Maṣūm fī l-Maṣūmāt al-Ṣawā'id (ed. Lees etc., Bihl. Ind., New Ser., No. 37, Calcutta 1862); al-Durūr al-kāminā fī Ayyūn al-Muṣtaqa; Ināb al-Qawām bi-Ahkām al-Umm; Ṣafī al-Aʿrār al-Kawākib (printed together Būlāk 1301); Ghiyāsh al-Nāṣirī fi Tādzhimat al-Šāfiʿī Abī l-Kadr, ed. E. D. Ross, Calcutta 1903. — Further information on these works is given in Brockelmann, op. cit., where other writings are mentioned; cf. also Landberg, Cat. de MSS., arāz, etc. No. 31, 32, 53, 67, 88, 98, 106, 228, 279, 319; Houtsma, Cat. d’ une Coll., No. 763, 764 (?), 783 II, 1026 (?); Vollers, Die islam. . . . Hes. (Leipzig), s. Ind., and the list in the Tarjuma of the Tahdīḥ.

Ibn Ḥadjar died towards the end of Dhu l-Ḥidād 582 (Feb. 1449). His pupil al-Sahhāwī wrote the full biography of him entitled al-Dīnawārī wa l-Durūr fi Tādzhimat al-Šāfix al-Islām Ibn Ḥadjar.
IBN AL-ḤADĪJIB, DIJAMI AL-DIN ABU 'AMR 'OTMÂN B. 'OMAR B. ĀBI BAKR B. 'UNUS, an ARAB GRAMMARIAN, son of a Kurdish chamberlain of the Emir 'Izz al-Din Mīsāk al-Ṣālīḥī, born in the village of Panā in Upper Egypt in the closing days of the year 572/1175, studied the Kur'ān and the sciences connected with it, Mālikī law and its sources, grammar, and belles lettres, in Cairo. His chief teachers were the Imām al-Ṣālīḥī, the jurist Ābi Mānsūr al-Ābyārī, etc., He made a journey to Damascus and after spending a long time there teaching publicly in the Mālikī zāwiya of the great Umayyad mosque he went to Cairo and afterwards moved to Alexandria, where he died on the 26th Shavwāl 646 = 11 Febr. 1249.

Although he also wrote works on law and prosody, it is as a grammarian that he is especially celebrated and in this field he differs in many points from his predecessors. As a jurist he was the first to expound the doctrines of the Mālikīs of Egypt with those of the Maghribī Mālikīs. We owe to him the following works, of which those in prose are so clear in their style that they require no commentary: 1. al-Ḳhāfiyya, a short manual of Arabic syntax (nahu); Rome 1591; Cawnpore 1888, 1891; Kazan 1889; Taghkent 1311, 1312; Constantine 1305; Cairo repeatedly; commentary Constantine 1319; 2. al-Ṣhāfiyya, short treatise on Arabic accent (garf); pr. 1805; Constantine 1850; Cawnpore 1885; extracts publ. with notes by F. Buhl, Sprogingt and historisches Bidrag til den arab. Gramm. med ude. Tekst-stykken af Ibn al-Ḳhāfiyya (Schröder); 3. al-Muṣannāf al-dajjali fi Ibn al-Ḳhāfiyy, a didactic poem in the Ṣafī metre on prosody (Leiden, Cat. 2, No. 273; Berlin, Verz., No. 7126; Bodl., Cat. I, MSS. Hebr., No. 36, ii., MSS. Arab., No. 1267, ii.; publ. with transl. by Freytag in his Dorstell, der arab. Verskunst, Bonn 1830, p. 334—371); 4. al-ʿAmāli, discourses on the Kurʾān, on al-Mutanabbi etc. (Berlin, No. 6613; Wien, Flügel, Die arab. . . . Hss., No. 386; Paris, Bibl. Nat., No. 4392, ii.—iii.; Khl. Libr., Führ., iv. 24); 5. al-Ḳāṣīda al-muṭawakkala bi ʾl-ʾAsmaʾ al-muʾammala, on the feminine nouns of masculine form, publ. by Hafner.

(transl. de Slane,* iii. 20 sq.; Bahū, op. cit., p. 27–29; Brockelmann, *Gesch. d. arab. Lit.*, i. 303–6, cf. 525, ii. 697; Huart, *Arab. Lit.*, p. 172; Moh. Ben Cheneka, *Étude sur les perso- nages du 'Arab al-Qādir al-Fāṣi* (Paris 1907), N° 191; Morand, *Le droit musulman algérien (rite mâlikite)*, Les origi- nes (Algier 1913), p. 9 sq. (MOIL BEN CHENECHE) **IBN AL-HATHIM**, whose full name was Abū ʿAlī al-Ḥasan b. al-Ḥasan (or al-Husain) b. al-Hathim, in mediaeval European sources usually called ALHazen, was one of the most important mathematicians and physicists of the Arabs, learned also in medicine and the other sciences of the ancients notably in the philosophy of Aristotle. He was born about the year 354 (965) in Basra, wherefore he is sometimes called Abū ʿAlī al-Basri, moved when fairly old to Egypt, where he was for some years in the service of the Fatimid al-Ḥākim, to whom he had offered to regulate the course of the Nile, but soon had to give up this undertaking; on al-Ḥākim’s death he earned his living by copying mathematical and other books. He died in Cairo towards the end of the year 430 = 1039 or soon after as the authorities note. — Ibn Abī Uṣūbī’s quotes about 200 mathematical, astronomical, physical, philosophical, and medical works and treatises by Ibn al-Hathim, for which we may refer the reader to the sources quoted below, particularly (besides Ibn Abī Uṣūbī) F. Woepcke and E. Wiedemann. His chief work on physics is his *Optics, Kitāb al-Manāṣir*, published in a Latin translation in 1572 in Basle by F. Ritsner, together with his treatise on twilight, entitled *Opticae theaurus* Alhazen Arabis libri septem nunc primum editi, Einodem liber de crepusculis et nubium ascensionibus, etc., a Fred. Ritsner. The latter treatise was translated into Latin by Gerhard of Cremona; this is probably true also of the *Optics* but not certain. The *Optics* of Ibn al-Hathim had a great influence in the middle ages on the study of optics in Europe from Roger Bacon to Kepler. There still survives also a large Arabic commentary on the *Optics* by Kamāl al-Dīn Abū al-Ḥasan al-Fārisi (died c. 1320); on this and Ibn al-Hathim’s *Optics* cf. the works of E. Wiedemann mentioned below.

**IBN HĀYĀN** b. KHALAF, ABU MARWAN HAYĀN AL-KURTURI, usually called after his grandfather Ibn Hāyān, one of the earliest and best historians of Muslim Spain. Almost nothing is known of his biography except the year of his birth 377 (987–988) and his death 469 (1076). He was a very prolific writer; the list of his works contains no less than 50 titles, which include poems and theological treatises. His history al-Matin is said to have comprised less than 60 volumes, but of all his writings only the historical work entitled al-Muḥādab fi Taʾrīkh Andalus has survived; there is one volume in Oxford (Cod. Bodl. in Nicol, ii. n° 137) and a second at Constantine; there are transcriptions of both in Madrid.

**Bibliography:** The bibliography on Ibn Hāyān is given in Pons Boigues, *Ensayo bibl.*, p. 152 sqq. Cf. also Brockelmann, *Geschichte etc.* i. 338.

**IBN ḤAMDĪS,** ABU MUḤAMMAD ʿABD AL-MUḤAMMAD AD-DABBĀR B. ABU BAKR, an Arab poet, born about 447 (1055) in Syracuse in Sicily and distinguished at an early age as a poet. When the Normans captured Sicily in 471 (1078) he retired to Spain and spent some time at the court of the ʿAbbdīd al-Muṭamīd [q. v.] in Seville. He followed the
latter in his imprisonment in 484 (1091) and lived at al-Mahdiya after his death (485–1095). He spent the last years of his life at Bougie where he died in 527 (1132); according to other accounts, he died on the island of Majorca. He left a Divān of which Amari has published specimens. Cf. C. C. Moncada, El Divan del poeta `Abi Muham- mad b. Abī Luft, in the siculo-sicilian publica- tions, Palermo 1883, and El Cancionero de Ibn Hamdūn, pub. by C. Schiaparelli, Roma 1897. According to Ḥadījī Khāla, ii. 196, he also wrote a history of Algæricas.

Bibliography: Amari, Biblioteca Aralo- Sicula, s. Index; Pons Boigues, Ensayo Bio-bibliográfico, p. 156 sqq.; Brockelmann, Geschichte etc., i. 269 sq.

IBN ḤAMDŪN, BAHĀʾ AL-DĪN ABU Ṭ-MAʿĀLĪ MUḤAMMAD B. AL-ḤASAN, an A RAB PHILOLOGIST, born in 495 (1010) at Baghdād. He held several offices at the court of the Caliph, so that he received the title Kāfī ′-Kufī. But his frankness aroused the enmity of the Caliph al-Mustanjidī who threw him into prison in 562 (1167). Soon afterwards he died in prison. He was the author of a large anthology of philological and historical matter entitled al-Tashkīrī. Cf. Améroz, Tales of official life from the Ṭashkīrī of Ibn Hamdūn, etc. in Journ. Roy. As. Soc., 1908, p. 409 sqq. Bibliography: Brockelmann, Geschichte etc., i. 280 sq. (with further references).

IBN ḤAMMĀD, ABU ʿABBĀS ʿALĪ MUḤAMMAD B. ʿALĪ, an Arab historian, author of a history of the Fāṭimidīs. Neither the date of his birth nor death is known; we only know that he flourished after the rise of the Almahad dynasty and before Ibn Khaldūn, who quotes a passage from him about the Banū Khāzrūn of Tripolis (Kīṭāb al-Dawr, vii. 43). The text is still unpublished in a manuscript of the Bibl. Nat. of Paris (n°. 1888) and in another of the Bibl. Nat. of Algiers (n°. 1958, imperfect). Two fragments, one on ʿUbayd Allāh and one on ʿAbī Yaḥyā al-Muṣliḥ that were translated by Cherbonneau (Journ. Asiat., 1862, ii. 470 sqq.; 1869, i. 199 sq.)

(Perne Basset.)

IBN HĀNĪ, ABU ʿL-ḴĀSIM (also ABU ʿL-ḤASAN) MUḤAMMAD B. HĀNĪ B. MUḤAMMAD B. ʿABBAS AL-ʿADĪ, usually called IBN HĀNĪ AL-ANDALUSI to distinguish him from Ibn Hānī al-Hakamī [see ABU NUWAYŚ], an Arab poet of Spain. His father Hānī was a native of a village near al-Mahdiya in Tunisia, who had moved to Elvira in Spain and, according to others, to Cordova. Ibn Hānī was born in one of these two towns. He studied in Cordova and then proceeded to Elvira and Seville. In the latter city his frivolous way of living and too free speech brought upon him the wrath of the people who accused him of agreeing with the Greek philosophers and of heresy, so that he was finally banished from Seville at the age of 27 by his patron, who was afraid of being accused of agreeing with him. He then went to Africa to Ḥaḍāwar, a Freeman and general of the Fāṭimid al-Mansūr. When he received only 200 dinārs from the latter for a kāṣida addressed to him, he went to al-Masla (Msla) in Algiers where his compatriots Ḥaḍār b. ʿAbbās al-Falāḥ b. Abī Marwān and Yaḥyā b. ʿAlī b. Ḥamdūn al-Andalusi were ruling. Treated with great respect by them he composed some notable poems in their honour. The Fāṭimid Caliph al-Munīz Abū Tanīm Maʿādd b. Ismāʿīl, son of al-Manṣūr, summoned the poet to him and attached him to his court, overwhelming him with tokens of esteem. When al-Munīz went to Egypt in 580 (972) to take up his residence in Cairo, Ibn Hānī left him and returned to the Maghrib to bring back his family, but was murdered in Barqa in Cyrenaica on his road on Wednesday 24 Ṣaḥāb 362 = 30th April 973 at the age of 56. Accounts of his mur- der differ. When al-Munīz in Egypt heard of the poet's death, he lamented: "He was a man whom we hoped to rival the poets of the East, but this was not granted to us."

In spite of the gross exaggerations in some of his panegyrics, which made him suspected of in- fidelity among the orthodox, Ibn Hānī enjoyed as great esteem among the Arabs of the West as his contemporary al-Mutanabbi did in the East. Abu ʿl-ʿAlī al-Muṣrī, who esteemed the latter highly used to say of Ibn Hānī: "he is like a mill, grinding corn, so little sense is there in his verse."

His Divān, arranged in alphabetical order, was published at Būlāk in 1274 and at Beyrouth in 1886, 1256. It contains panegyrics of al-Munīz, Ḥaḍār b. Ghaḻān, Abu ʿl-Ḥarārī Muḥammad b. ʿOmar al-Ṣaḥīḥī, Ḥaḍār b. ʿAlī b. Ghaḻān, Fāṭir and Ḥusain b. Muḥammad, Yaḥyā b. ʿAlī, Ibrahim b. Ḥaḍār b. Kātīb, satires against al-Munīz, two elegies, one on the mother of Ḥaḍār and Yaḥyā b. Yaḥyā b. ʿAlī, the other on the son of Ibrahim b. Ḥaḍār b. ʿAlī and several impromptu pieces.

(Moh. Ben Cheneb.)

IBN ḤAWKĀL, ABU ʿL-KĀSIM (MUḤAMMAD), an Important Arab Traveler and Geographer. Very little is known of his life. He tells of himself that he left Baghdād in Ramaḍān 331 (May 943) with the intention of becoming ac- quainted with other lands and peoples, and making money by commerce. He travelled through the whole Muslim world from east to west, at the same time studying eagerly the works of his predecessors—Abū Ḥaḍār al-Mahdī, Ibn Khordādhbih and Ku- dāmah. According to Dozy, he was a spy in the service of the Fāṭimidīs. On his travels he met al-Ṭaṣkhrī [q. v.] probably about 340. At the latter's request he made improvements in some of this geographer's maps and revised his work. He afterwards however decided upon rewriting it and completed the new version under his own name with the title al-Maṣāḥif wa l-Manāmākit not be-

**IBN ḤAZM,** whose full name was ABD MUḤAMMAD ʿALI B. AHMED B. SAʿID B. II., a versatile Spanish Arab scholar, a notable theologian, historian and distinguished poet, born on the last day of Ramadān 304 (7th Nov. 994) at Cordova. His family belonged to the village of Manta Lishām (var. M-t-liṣām, according to the Irāhīd al-Arib, v. 88 infra, 49); farrāsh from Huelva (at the mouth of the Odéi) in the district of Niebla; his great-grandfather had been a convert from Christianity to Islam. His father, who had risen to the rank of a vizier of the major-domo al-Manṣūr and his son al-Muṣaffar, assumed a genealogy which he led back to a Persian client of Yazid b. Abī Suffār. As the son of his high official Ibn Ḥazm naturally received a good education; the atmosphere of the court in which he spent his youth did not prevent his active mind striving to develop in all directions. As his teacher in various branches of knowledge he mentions (Ṭawābk, p. 110, 118, 13 sqq.) ʿAbd al-Raḥmān b. Abī Yaẓīd al-Azdī (left Spain during the civil war, see Ibn Bashkuwāl, n. 753). Before 400 he studied under Ahmad Ibn al-Djasur (died 401, Ibn Bashkuwāl, n. 37, cf. Ṭawābk, p. 136, 144, 9) and in the midst of the political turmoil we find him a student of Ḥadhīth in Cordova (Ṭawābk, p. 127, 16 sqq.).

The revolution which overthrew the ʿĀmirids (cf. Dozy, Hist. des Musulmans d'Espagne, i. 271 sqq.) considerably affected the position of father and son. Especially after Hishām II. was replaced on the throne (Dhu ʿl-Hijjāj 400 = July 1010), both had to suffer many mortifications. Ibn Ḥazm's father died towards the end of Dhu ʿl-Kaʿāda 402. In Muharram 404 he left Cordova, which had been sorely tried by the civil war; the beautiful palace of his family at Bālt Mughīth had been destroyed by the Berbers (Ṭawābk, p. 104, cf. 87 infra sqq.). He next chose Almeria for his home; there he seems to have been able to live in comparative quiet till ʿAll b. Ḥammūd in alliance with Khairān, ruler of Almeria, overthrew the Umayyad Sulaimān (Muḥarram 497). Khairān induced him to suspect him of intriguing in favour of the Umayyads, imprisoned him for some months with his friend Muḥammad b. Isḥāk and then banished them. The two friends went to Ḥīn al-Ḵṣāṣ, whose ruler treated them kindly. On learning that ʿAbd al-Raḥmān IV al-Murtadād had been appointed Caliph in Valencia, they left their host after a few months and travelled by sea to this town, where Ibn Ḥazm met other friends (Ṭawābk, p. 110 sqq.) in the army of al-Murtadād, whose vizier he was, he fought before Granada; he was captured by the enemy but was released after a while (Cat. Cod. Arab., i. 273).

After an absence of six years he returned in Shawwal 409 to Cordova, where al-Ḵāṣim b. Ḥammūd was now Caliph (Ṭawābk, p. 104, 22, cf. 112, 3). After the latter's expulsion, the intellec-

**tual ʿAbd al-Raḥmān V al-Mustāhir was chosen Caliph (Ramadān 414 = Dec. 1023); the latter chose his friend Ibn Ḥazm as vizier. They only enjoyed the new state of affairs for a brief period, for ʿAbd al-Raḥmān was murdered seven weeks later (Dhu ʿl-Kaʿāda 414 = Jan. 1024) and Ibn Ḥazm found himself once more within prison walls. How long he was confined cannot be definitely ascertained; it is certain however that he was living in Jātīva about 418 (1027). According to al-Djaṣayyīnī (in Yāḵtī), he filled the office of vizier again under Iḥṣān al-Muʿṭadd. Only scanty notices of his later life are available. But he kept clear of politics in order to devote himself entirely to sciences, authorship, and the propagation and defence of his doctrines.

One of his earliest works is that which was made known by Dozy (Ṭawābk al-Ḥamāma jī'ūl-Cifā wa 'l-Ullāf, ed. by D. K. Pétrot, Leiden 1914, cf. the review by Goldziher in Zeitschr. d. Deutsch. Morgenl. Gelehr., lxxx. 192 sqq.), which he wrote from Jātīva (p. 1, 3), about 418 (Ṭawābk, p. 79 sqq.), before the death of Khairān in 419; an attack of Abu ʿl-Djasir [so to be read] Madjāhid on Khai-

rān would suggest after their estrangement in Ramadān 412, or ʿAlī al-Aṭirī, ed. Tornberg, is. 195; a second terminus ad quod, p. 42, 7, Hakam b. Mundhir died about 420 according to Ibn Bashkuwāl no. 332). In this treatise on love and its different phases in which he illustrates his views on psychology by short stories from his own experiences and those of his contemporaries and by his own poems, Ibn Ḥazm shows himself a keen observer, a brilliant stylist and charming poet. He affords us not only a glimpse into his own character, but also throws an interesting light on a little known side of the life of his time. — Probably about the same time he wrote the treatise called Risāla fī Faḍl al-Andalus, dedicated to his friend Abū Bakr Muḥammad b. Isḥāk (according to al-Djasur, n. 59), which is given in al-Maḵkārī, ed. Dozy etc., ii. 109, 11–112 (ed. Būkā, ii. 767, 8 sqq.). This Ri-

sāla, composed at the instigation of the lord of Kāfāt al-Bint (al-Maḵkārī, ii. 110, cf. Ibn al-Abbār, al-Tamīn, n. 432), gives an interesting survey of the most important early literature of the Spanish Muslims. — Of his historical works there still survive Nukat al-ʿArūs fī Tawāriḵ al-Khulāṣ (ed. with Spanish translation by C. F. Seybold in Revista del Centro de Estudios históricos de Granada y su Reino, i. 160 sqq., 233 sqq., Gran-

ada 1911) and the Djamhurat al-Anāb (Anāb al-ʿArab) written about 450 (cf. Codera, Misión histórica en la Argelia y Tierra, Madrid 1892, p. 24 sqq., 83) (Miss. Tunis, Masjīd al-Zailūnā, n. 5014, and copy of this Ms. in Madrid, Real Acad. de la Histor., Codera, o. c., p. 165; Paris, Bibli. Nat., Blochet, Cal. de la Col., . . , Schefer, n. 5829, containing the biography of Muḥammad, Berlin, Verz., n. 9510), a work highly esteemed and often quoted by Ibn Khaldūn (Iḫbar, ed. 1284, vi, 8, 89 sqq., 97, etc.), on the genealogy of the Arab and Berber families in Maghrib and Spain, which Codera used as a source for his articles on the Hamīmids, Taṣilibs (three articles also in his Estudios críticos de Historia árabe española, Zaragoza 1903, p. 301 sqq.), Umayyads in op. cit., p. 29 sqq., 41 sqq., cf. 147 sqq., 75 sqq., et passim. But it was particularly as a traditionist and
tractate Kitāb al-Mudāwāt al-Nafis (pp. Cairo n. d.), an exhortation to pious life, which holds up Muhammad's example as the moral ideal (cf. Goldschmied, Vorlesungen, p. 30). This tractate has been discussed and translated into Spanish by Miguel Asín (Les Caractères y la conducta. Tratado de moral práctica por Ibn Hazm de Córdoba, Madrid 1916).

A controversialist by nature, as he was (cf. Tawfik, p. 43, 8), Ibn Hazm challenged Jews, Christians, and Muslims of different schools. He was a doughty opponent: "whoever resisted him bounced off him as from a stone" (Ibn Haiyān). He overwhelmed with scorn and contempt men whom the majority of Muslims held in the highest reverence such as Al-Shafi'i, Abū Hānīfa, Mālik. According to a proverbial saying, Ibn Hazm's pen was like al-Haḍdadhājī's sword in sharpness. Yet he always endeavoured to do his opponents justice; it was against his nature to make intentionally baseless charges against them. In his ethical treatise he ascribes his vehemence to the influence of an illness. He only succeeded to a modest extent in gaining a hearing for his views. For a time he found a supporter in Ahmad b. Rashīd (al-Dabbī, Nūr, 400), Muḥammad b. Wāṣil's wali in Majorca, who was interested alike in theology and literature: Ibn Hazm found protection with him when Cordovan and other theologians deserted him as an opponent of the Mālikī school (Dozy, Notes, p. 190 sq.). Under this patronage he succeeded in winning adherents on the island in the 430's A.H. (cf. Ibn al-Abīr, al-Takmīla, N. 1467, N. 2027; Ibn Dāšiqūwāl, N. 903). He disputed before Ibn Rashīd (died soon after 440) with the celebrated theologian of the school of al-Wālid b. Sulaimān al-Najjī (died 438), who had returned from the East about 440. This same opponent summoned by a Majorcan fāqiḥ afterwards forced Ibn Hazm to leave the island (Ibn al-Abīr, o. c. N. 443; Codera, Estudios críticos etc., p. 264—9).

Ibn Hazm's charge of heresy against the great orthodox authorities brought upon him the wrath of the theologians, some of whom probably also envied him his learning. They warned his hearers against the errors of his doctrine and made him suspect by the princes, who soon no longer tolerated him in their lands. His strong sympathy (tāḥāyyūn, Ibn Haiyān) for the Cairenes was a further reason why he appeared dangerous. This constant baiting forced him to retire to his family estate in Mānta Līḥām. His writings were publicly burned in Seville; their author pilloried the foolishness of this proceeding in sarcastic epigrams. In his retirement he continued to study and write. According to a statement by his son Abū Rāfī' al-Fadl (died 479) as a learned author (Ibn Bashkuwāl, N. 994), Abū Usamah Yaḥyā ibn N. 1407) and Abū Sulaimān al-Muṣṭaf (Ibn al-Abīr, al-Takmīla, N. 1097) as transmitters of their father's learning.

Ibn Hazm's teachings were particularly attacked in writings after his death. When the Lāhūn b. al-Arābī (q. v.) returned from the east towards the turn of the fifth century (al-Dhahabī, Tadhkīrā, u. 99 sqq.), he found the heterogeneous wide-spread in the Maghrib. To confute it he wrote Kitāb al-Kasīsīn wa-l-'Awwāṣin, which al-Dhahabī, Tadhkīrā, iii. 325 sqq., quotes, and other treatises. About the same time Muḥammad b. Hādara (al-Dhahabī, o. c. iv. 52) and 'Abd Allāh b. Ṭāḥa (Ibn al-Abīr, o. c., N. 1330, al-Maṣkārī, i. 955, 3) came to his assistance. About a century later, the Mālikī theologians 'Abd al-Ḥaqq b. 'Abd Allāh (Ibn al-Abīr, o. c., N. 1817) and Ibn Zakān (ib., N. 967) came forward to refute him, the latter with a Kitāb al-Musallā directed against the Kitāb al-Muṣallā. On the other hand, a pupil of Ibn Zakān, Ibn al-Rumīya, the botanist, came forward as a fanatical adherent of Ibn Ḥām and the celebrated mystic Ibn 'Arabī (q. v.) transmitted his works and wrote a synopsis of the Kitāb al-Muṣallā, likewise entitled al-Musallā.

IBN ḤĪBBĀN, MUHAMMAD B. AHMAD AL-BUSTĪ, Arab author and authority on Tradition, born at Bust in Sidjistān, after extended travels in pursuit of knowledge, filled a judicial office in Samarqand, but was driven from it as a heretic, because he had defined the prophethood as a combination of 'Ilūn and Ahamal (cf. Goldschmied on Mūṣālik al-Nāsir, p. 57). After staying in Nāsīr and in 334 = 655 in Nīṣābūr, he settled in Samarqand as a teacher of Tradition and died there at the age of 80 on the 22nd Shawwal 354 = 21st October 965. His chief work is the collection on Tradition famous for its artificial arrangement entitled Kitāb al-Taqāsir wa-l-'Amalūl, see Fīhirāt al-Kutub al-maṣūfugā fi l-ʾAḥmadīyān al-Khadīr
IBN HİBBAN — IBN HİSHAM

IBN HİBBAN, ʿABD AL-MALİK B. HİSHAM B. AYBUH AL-HİMYAK B. AL-BASSİ, an Arab grammarian, born in Basra, died in Fustat in Egypt on the 13th Rabi’ II 218 = 8th May 834, according to other sources in 213 A. H., wrote, besides his version of Ibn Ishāq’s [q. v.] biography of the Prophet, a collection of biblical and South Arabian legends, entitled, Kitab al-Tifāṣ, s. Ahlwardt, Verzeichnis der arab. Handschr. zu Berlin, No. 9735; Rieu, Supplement to the Catalogue of Arab. Ms. in the Brit. Mus., No. 575-579; Tunis, No. 49534; Stambalxi, No. 661; al-Zayyiā, Khaḍ al-ʿAṣāb fi Dinarā, pp. 72, No. 12: Manuscript de la collection Landberg, No. 717.

(C. Brockelmann.)

IBN HİSHAM, DIAMAL AL-DIN ABU MUHAMMAD ʿABD ALLAH B. YUSUФ B. AHMAD B. ʿABD ALLAH B. HİSHAM B. ANAṢIRI AL-MIŞRİ, was born in Dhu l-ʿAqāda 708 = April-May 1309 in Cairo, where he died in the night of Thursday-Friday, Dhu Ḥijjah 1194 = 18-September 1360. A pupil of the Spanish grammarian Abū Hāiṣam for the study of the Dīwān of Zuhair b. Abī Salīma, he also studied with Shihāb al-Dīn ʿAbd al-Lājīfī b. al-Murāshīlī, al-Fākhrī, etc.

As a Shāfiʿī doctor, he became professor of Koranic exegesis at the Kubbat al-Mansūriyya in Cairo; but five years before his death he went over to the Ḥanbali school to obtain the post of professor at the Ḥanbali madrasa in Cairo and for this purpose learned by heart the Maḥṣūṣ of al-Khirākī in less than four months.

Ibn Khallūd sums up his history as: "Ibn Hīshām was profoundly learned in grammar and possessed perfect knowledge of it. He followed in the path of those of the grammarians of Māṣūl who accepted Ibn Djinni’s views and followed this scholar’s method of teaching. The knowledge displayed by Ibn Hīshām is truly remarkable and shows that he had a perfect mastery of his subject and that he was very clever."

Ibn Hīshām has left the following works:

1. Kitab al-Nāda wa-Ball al-Sada, a short treatise on syntax, several times published; 20. Commentary on the preceding, publ. at Tunis in 1281, Būlāk 1253, 1282, Cairo 1274, transl. into French by Goguier, La plume de rois, énumération de la soif, Leyden 1887; 3. Shihāb al-Dīhābī fi Māraṣīs Kālām al-Arab, a short treatise on grammar, less extensive than the preceding; 4. Commentary on the preceding, publ. at Būlāk in 1282, Cairo 1253, 1305; 5. al-Fīrād an Ḥuwādī, a critical edition of the Metamorphoses, published with a detailed exposition of the particles and the rules for the construction of sentences publ. at Constantinople in 1298, publ. and transl. into French by de Sacy in his Anthologie grammaticale, Paris 1829, pp. 79-92 et 155-223 of the transl.; 6. Muḥāfiz al-Kātib al-ʿAṣārīb (the author had written another at Mecca in 749 = 1348) which was lost on his return to Egypt and on his second sojourn in Mecca in 756 = 1353 he wrote this one), a complete treatise on syntax divided into two parts or eight chapters containing a detailed exposition of the particles and the rules for the construction of sentences publ. at Cairo 1305, 1307; 7. Muḥāfiz al-Dīkhān wa-Mūṣīf al-Wāṣanī, the solution of several difficult points in grammar, Paris Bibl. Nat., No. 4115, ii. 4162, 1; Berlin, Ver.,
expedition against the Byzantines in Armenia in 102 (720-721) he was appointed governor of al-Iraq and Khorasan by Yazid II. In the latter, the conflict between the northern and southern Arabs, on account of his lineage he always took the side of the former, while the latter were in consequence neglected. In Shawwal 105 (March 724), soon after the accession of the Caliph Hisham b. 'Abd al-Malik, Ibn Hubaiz was dismissed and Khâlid b. 'Abd Allah al-Kâsri appointed his successor. According to another statement, this did not happen till the following year. His son Yazid is also called Ibn Hubaiz.

IBN HUBAIRA, I. ABU 'L-MU'THYANX OMAR b. HUBAIRA AL-FAZARI, governor of the 'Irâk. Ibn Hubaiz was a native of Kinnarîn and is mentioned in the reign of Sulaimân b. 'Abd al-Malik as one of the leaders in the war against the Byzantines. In the summer 96-97 (715) the fleet was equipped and in the autumn he attacked Byzantine territory with it, while Maslama b. 'Abd al-Malik conducted the operations on land. Ibn Hubaiz spent the winter in Asia Minor and the following summer hostilities were resumed. At the end of 97 (August 716) the Arabs began to besiege Constantinople; after the siege had lasted for a year, they had to abandon it and return home. In 100 (718-719) 'Omar II granted him the governorship of Mesopotamia. After a successful

K. V. ZEITERTSEEN.

IBN HUBAIRA, the name of two viziers:
1. 'Awn al-Din Abu 'l-Mu'azzam Yahya b. Muhammad b. Hubaira al-Sa'idani, born in 490 (1096-1097) or, according to another statement, in 497 (1103-1104). He was a native of Dür Bani Amr, a place a few parangsh from Baghdad, and studied in the latter city. After filling several official positions he was installed in 542 (1147-1148) as chief of the Divan al-Zimmi and in Rabih II 544 (August 1149) the Caliph al-Mu'�rafati appointed him vizier. After the death of the Saljuk Sultan Mas'ud b. Muhammad in Radjab 547 (Oct. 1152) the governor of Baghdad, Mas'ud b. Bilall, seized the town of the Hill, but was soon defeated by Ibn Hubaira and had to flee to Takrit, whereupon not only al-Hill, but also Kufr and Wasiit fell into the vizier's hands. When Sultan Muhammad b. Majmud sent an army against Wasiit, the Caliph himself hurried to his vizier's assistance and the Sultan's troops had to retire. In 548 (1153-1154) al-Mu'�rafati besieged Takrit but had to abandon the enterprise. In the following year the Caliph and then the vizier made a renewed attempt to take the town but without success. Nevertheless, Mas'ud b. Bilall was twice defeated in the open field, by the Caliph near Barak'ah and by Ibn Hubaira near Wasiit. After this victory the latter received the honorary title of 'Sultan of the 'Irāq'. When al-Mu'�rafati in the year 555 (1160) died and al-Mustanjid succeeded him, Ibn Hubaira was confirmed in his office. He died on the 13th Djamada I 560 (28th March 1165). He was also celebrated as a scholar.

2. 'Izz al-Din Muhammad b. Yahya, son of the preceding. The latter filled the vizierate after his father's death but was soon thrown into prison and disappeared from history.

K. V. ZEITERTSEEN.

IBN HUBAL, MUHAMMAD AL-DIN ABU 'L-HASAN 'Ali b. Ahmad, a physician, born in Baghdad 515 (1122). Studied grammar and fiqh at the Nijamia but later turned to medicine. He became court physician to the Shahi Arman at Khiit but there amassed great riches; he next entered the service of Badr al-Din I'a'l at Mardin and finally went to Mawsil. When he was 75 years old, he unfortunately became blind but lived till 610 (1213). His chief work is entitled al-Mu'�rafat al-Tibb bi-d-Tibb, from which de Koning has published two chapters in Traité sur le calcul dans l'art, and dans la tessier, p. 186 sqg. Ibn Hubal, who was also a poet, left a son, Shams al-Din Abu 'l-Abbās Ahmad, who was likewise a physician and practiced in Asia Minor at the court at the Saljuk Kaikāwus [q. v.], where he died.

IBN 'IDHARI (IBN 'A'MARI), Abu 'Abbās MUHAMMAD AL-MARAKUSI, an Arab historian of the Maghrib and Spain, about whom we have no information further than that he flourished about the end of the viiiith (xiiith) century, with which his chronicle concludes. The latter is of special interest as it contains portions of lost works. It is called al-Rayún al-mu'�qawib fil Akhdar al-Maghrib and is not preserved in its entirety. Ibn 'Idhari also wrote a history of the East, which we only know by name. Dozy published the text of al-Rayún al-mu'�qawib: Histoire de l'Afrique et de l'Espagne (Leyden 1848-1851, 2 vols.); a fragment is given in the Cistomania arabo-espanola of Simonet and Lorchundi (Granada, 1887), No. ixi. The entire work is translated by Faguan, Algiers 1901-1914, 2 vols.; a fragment on the invasion of the Normans by Dozy, Recherches, 2nd ed., ii. 288-289. Cf. also Dozy, Corrections sur le texte du Bayana 'l-Mugrib, Leyden 1883, p. 1-91.

Bibliography: Dozy, Preface to his edition, i. 77-107; Wustenfeld, Die Geschichtsschreiber der Araber, No. 373, p. 151; Pons Boigues, Ensayo de bibliografia, p. 414 sq.

K. V. ZEITERTSEEN.

IBN ISFANDIYAR, MUHAMMAD B. AL-HASAN, a Persian historian, of whom we only know what little he tells us in the beginning of his chronic of his native land of Tabaristan, returned in 606 (1210) from Baghdad to 'Iraq 'Adami after hearing of the murder of his patron Rustam b. Ardashir, governor of Tabaristan. In deep grief he spent two months in Rayy collecting material for his work and studying in the libraries. He then spent five years in the town of Khwarizm, where he found by accident in a bookseller's shop certain new documents, including the letter of Tamsar, Ardashir Bahākans minister, to Djasma, king of Tabaristan (Journ. Asiat. 9th Ser., Vol. iii., 1804, p. 185 and 502). His chronicle begins with this letter, then follows after a brief description of his native land and its remarkable features, the history of Tabaristan under the dynasties of Washmgir and Buwaiith [B. Buyin], under the sway of the Ghaznavids and Saljuqids and under the second native Bawendi dynasty, with which the work closes. An abridged English translation by E. Browne appeared in 1905 in the Gibb Memorial Series, Vol. ii.

CL. HUAET.

IBN ISHĀK, 'Abbās MUHAMMAD b. Kais, an Arab author and authority on Tradition, was the grandson of Vardir, who was captured in the year 12 = 653 in the church at 'Ain al-Tamr in the 'Irak and brought to Medina, where he became a client of the tribe of 'Abbās Allah b. Kais. Muhammad also grew up there; he devoted his attention to the collection of stories and legends of the life of the Prophet and thus soon
came into conflict with the representatives of religious and legal tradition which dominated public opinion in the town, notably with Mālik b. Anas who decried him as being a Shi'i and as being the inventor of many legends and poems transmitted by him. He therefore left his native land and went first of all to Egypt and then to the ʿIrāq. The Caliph al-Muʿāsir instructed him to come to Baghdaḏ, where he died in 150 = 757, or 151 or even 152. He seems to have gathered the materials for the Prophet's biography in two volumes, the Kitāb al-Muḥbadah (Fiḥrist, p. 92) or Muḥaddaṯ al-ʿĀkab ( Ibn ʿAdi in Ibn Hisbaṯ (ed. Wustenfeld), II, p. VIII, l. 23) or Kitāb al-Muḥbadah wa-Kiṣṣa al-Aḥbār (al-Ḥalabi, al-Ṣirā, ii. 235), the History of the Prophet to the Hijra, and the Kitāb al-Maghāzī, His Kitāb al- Ḥanifa seems early to have been a second place before this, his chief work. Karabacek believed he had found a leaf of the original text of the biography of the Prophet in a papyrus of the Rainer collection (see Führer durch die Sammlung, no. 665); on the other hand, the alleged Kitāb al-Maghaḍī of Ibn Isḥāq in the library of the Koprul ī Madrasa in Šimbaṭ (Defer, No. 1140) has been shown to be a copy of Ibn Ḥiṣām's recension (see Horovitz, in Mitt. des Sen. für Oriental. Sprachen, x. Westas. Stud., p. 14). Al-Mawardi, however, seems still to have had access to the original. He quotes from the Ḥiṣāmī in his al-Āṣkāri al-Sultānīya (ed. Enger), p. 65; l. 445, 65, 67, 68, 68, stories which are given in an abridged form in Ibn Ḥiṣām, p. 77, 561, 445, 614. His work is preserved in comprehensive extracts in Tabari, but independently only in the version of Ibn Ḥiṣām [q. v.], who knew through a book of Ibn Isḥāq, the Kūfī al-ʿAdlā al- Ḫakātā. He combined the two independent parts with occasional considerable abridgments into the Kitāb al-Ṣirāt Risāla al-ʿĀlā. The book received its present form in the fourth century A. D. ii. from al-Wazir al-Maghribī [q. v.]. A commentary was written on it by al-Ṣuhailī (died 508 = 1114) and another, very superficial, by the Moroccans Abū Ḫarrār Muḥammad b. Muḥammad b. Masāʿid (died 604 = 1207 in Fāṣ).

IBN IYĀS (in the popular dialect pronounced “Yeṣa’,” Muhāmmad b. ʿAlīm, is the most important Arab chronicle of the period of the decline of the Mamluks. Born in 852 (1448) he seems to have been nearly 80 when he died, for his history comes down to the year 928. His family was of Turkish origin. His paternal grandfather, Isāb al-Fāḥiṣ, a Turkish slave, called min Ḫanīdī after his owner, was sold to Sultan Zahir Barquq [q. v.], enrolled among his Mamluks and reached the rank of second Dāwārā. His great grandfather (his father's maternal grandfather) had risen further in the official scale. Edeṃir al-Khaṣaṣṣa, son of Sultan Hasan and Sultan Asḥaf ʿAbd Allāh, served him as a slave, ultimately filled the very highest offices in Cairo under Sultan Hasan and Sultan Asḥaf ʿAbd Allāh and governed successively Tripolis, Aleppo and Damascus. Ibn ʿIyās’ father belonged in Cairo to the Awlād al-ʿĀs, a kind of military reserve, who were bound to give military service to the Sultan’s command. In return they received a fief or a sum of 1000 dinars or a yearly allowance (1000 dirhams under the Kāt Bey) [see Ibn ʿIyās, ed. Bulāk, i. 195 et passim]. Ahmad Ibn Isḥāq was a prominent man, related both by birth and marriage to many emirs and high officials. Of his 25 children only 4 boys and 3 girls survived him: one of them is our author; another was master of ordinance (ṣerdeḵāḵ).

Ibn ʿIyās’ chief work, the only one which can claim lasting importance is a detailed chronicle of Egypt entitled Badāʿ al-Zuhār fī Waqāʾ al-Dhakūr. He treats briefly of the early history of Egypt to the end of the Aiṭyebid period, and even the account of the Mamluk period down to Kāt Bey is rather cursory. It is only from the accession of this ruler that he relates events in detail, along with biographies of the high officials and monthly lists of obituaries. A closer study of this work reveals a problem. The chronicle seems to exist in two versions. The shorter is clearly the author’s diary; for the events of the year 921 for example were, according to the text, already completely noted on the 1st Muḥarram 922. Further evidence is that this shorter version is written in the vernacular, while the fuller text of the longer version in the London Ms. appears finished and polished (cf. Volland’s comprehensive article in the Revue d’Egypte, iii. 551). The description of the years 922–928 is moreover much fuller than the preceding parts and might, if Ibn ʿIyās is really the author, belong to the larger recension. It is remarkable that the reign of Sultan Ḥanūr, the years 906–912 (Paris Ms.) and 913–921 (Petrograd Ms.), is not found in other copies (hence not printed in the Cairo edition). This circumstance brought Volland in his article above mentioned to conclude that this portion of the chronicle is not by Ibn ʿIyās. But it is just this part that is certainly from his pen; this is proved by the fact that he writes as an eye-witness. For example, he mentions that he was present at
a procession himself, or that he was personally affected by events (e.g. robbery by Manlūk). Further evidence is the accurate account of his family affairs on his father’s death as well as the occasional mention of his brother. Ibn Iyās’s chronicle is an account of the doings of the rulers of the time, at the same time mentioning other events. He cannot be denied a certain critical ability, although his verdict is often too severe. Yet he was conscious that the utterly corrupt financial administration and the neglect, so often censured by him, of artillery brought about the decline of the empire, although he unjustly gives the whole blame for the wretched financial situation to Sulṭān Ghūrī. The great value of this chronicle consists also in the fact that in part it is the only Arabic source for the beginning of the xiiith century.

Of less importance are his other works: 1. Nieżāb al-Aṣbāb fi ʿAṣānīb al-Aṣbāb, a cosmography with special reference to Egypt much used and often quoted by European scholars of the xiiith century. 2. Mardūj al-Zahārī fī Wafāʾ al-Dihārī, a popular history, dealing with the patriarchs and prophets, of little value, and perhaps not by our author. 3. Nieżāb al-Muḥājir fī ʿAṣānīb wa ʿl-Miḥārī, also a work on history, little known, only extant in one Ms. in Constantinople.

Breivik: See Brockelmann, Geschichte d. arab. Lit., ii, 295, and Vullers’ articles. Ibn Iyās’s chronicle was printed in Cairo (1301–1306) and in the state press of Cairo-Rūbk. 1311–1312.

(M. S. OBEYEHIM.)

IBN AL-KĀDI, Abīʿ l-ʿAbrābī Abī Muḥammad b. ʿAbd al-ʿAzīzmān b. ʿAbī & ʿAbī al-ʿĀfiya al-Miṅnāsī, known as Abū al-ʿĀfiya, a descendant of Mūsā b. Abī ʿAbī al-ʿĀfiya al-Miṅnāsī, belonging to the great tribe of Zānātā of Morocco, born in 960 (1552–1553). Jurisconsult, man of letters, historian, poet and above all mathematician, he studied with his father, Abū ʿAbī-Abbās al-Mandājīr, al-Ḫaṣṣā, Abū Zakariya Yahiyyah al-Sarrāǧī, Abū Muʿāźjar al-Maṣṣār, Abū ʿAbī al-ʿĀfiya al-Miṅnāsī, Abū ʿAbī al-ʿĀfiya al-Miṅnāsī, and with Nāṣr b. Mūsā. He was intimate with various offices, as Muṣāfāt, chief Kādi, etc. and devoted particular attention to the Chronique of the Ḫābahāli [q.v.], which he continued and of which he prepared a synopsis. Another work of his is the Ṭabābīt al-Ṣiḥḥīyya.

His son Abū ʿAbī-Abbās, Muḥammad, died 874 (1469), wrote not only a biography of his father but also several other less important works which are detailed by Brockelmann, Gesch. d. arab. Litt., ii, 30.

Breivik: See Brockelmann, loc. cit., ii, 51.

IBN KĀDI SIMĀWNÁ, Badr al-Dīn Mahmed b. Iskāf, a Turkish jurist and mystic, born at Simaw, a town in the Sanjāk of Kutahya, where his father was Kādi. According to an uncorroborated statement, he was a descendant of the Sādīq IX. We have more authority for the statement that he studied in Cairo, was the teacher of Faraj afterwards Mamlūk Sulṭān, and later went to Armenia, where he entered a Sūfī order, whose shaikh was Ḥusайн Aḥkātī. He is said to have disputed about this time in Tīfīs before Timur, with other jurists, and came in Timūr’s train to his native land again. During the wars of succession after the death of Bāyāzīd he attached himself to Mūsā, who had proclaimed himself Sulṭān in European Turkey, and the war which made him Kādi of Nīḥār. Mūsā however lost his life in 816 (1413) in battle with his brother Muḥammad I; Ibn Kādi Simawna was pardoned but had to settle in Ṣīrāq. A short time afterwards, a religious movement began in Asia Minor, the leader of which was a certain Dārākhūdī Mustaṭaf, whom his followers used to call Dede Sulṭān. A detailed account of him is given by Dūkas, ed. Bonn, p. 111 sqq. The accounts of the movement are not quite sure but it seems that all the abrogation of Muslim law and the introduction of a limited communism, so that Jews and Christians also took part in it. One of the leaders is said to have been a Jew, although his name, transmitted in
different forms, Turlak Kamāl (Turlak Hitt or Hīt) does not sound at all Jewish. Boraklüşi Muṣṭafā was, according to some, Ibn Ḫūdī Simāwī’s kethkoda when he was Ḫūdī’s askar; in any case, he seems to have been one of his pupils. When the movement started, however, Ibn Ḫūdī Simāwī was no longer in Asia Minor, but in European Turkey, either because he had connections there and was seeking a career in it, or because he feared to be drawn into the movement on account of the relations between him and Muṣṭafā and therefore retired to Europe. The statement in Ǧūṭ al-Dīn Die Chroniken der Stadt Mekka, Wüstenfeld, iii, 255, that he had himself claimed the sultanate is improbable. In any case, Sultan Muṣṭafā sent troops against Muṣṭafā and Turlak, who were both taken prisoner and executed. Ibn Ḫūdī Simāwī was thereupon also arrested and executed under a fatwā of Ḥūdār Harawi at Seres in 818 (1415).

Ibn Kāṣim al-Ruṣayyāt, a notable poet of the Umayyad period, by descent he was a Ǧurāšī although he did not belong to one of the most distinguished families of this tribe. His life is bound up with the wars waged about the caliphate between Ibn al-Zubair in Mecca and the Umayyads in Damascus. The poet who had lost several relatives in the battle of the Ḥarra [q. v.] was a passionate champion of the Zubairids; but he seems to have had sufficient political insight to regret profoundly the struggle in which he found himself involved. That the Ǧurāšī were predestined to rule the Arabs with a firm hand was clear to him; and he made no secret of the fact that such political convulsions were bound to undermine the power of the Ǧurāšī. Our poet was particularly attached to Muṣʿab, the Zubairid governor of the Ḥayk. When the latter was defeated and fell at Maskin, the fate of his brother ʿAbd al-Malik, the Meccan antileph, was also decided. Ibn Kāṣim al-Ruṣayyāt now remained in concealment for a considerable time; the story of his disappearance and his reappearance among the Umayyads in Syria has been romantically adorned. Just as previously Ibn Kāṣim had been more attached to Muṣʿab than to his brother in Mecca, so now he seems to have found less favour and kindly welcome with ʿAbd al-Malik, the ruler in Damascus, than with ʿAbd al-ʿAzīz, the governor who ruled Egypt in his brother’s name. The Umayyad Caliph had, it is true, little reason to love the poet, in however moving a way the latter might now beg for grace.

Of his poems a selection made by al-Sukkari in the third century a. h. has come down to us. From this we receive a direct impression of the events which convulsed the world of Islam at this time as revealed in the descriptions and impressions of one concerned in them. The political poems of the Dinār can be considered as political pam-
IBN KATHIR AL-DJAWIZIYA — IBN KATHIR.

IBN AL-KALĪB. [See al-Kalīb.]

IBN KAMĀL. [See Kamarahzādē, Ibn K.]

IBN ḤAṢI, Ahmad, shākī of the Sūfīs, set up in Spain about 1140 as a Mahdī and took possession of Mertola and other places (1144). He was later followed up by his followers to the Almohads and pardoned by `Abd al-Mu`min. He lived for a time at the court of these rulers till one of his former followers murdered him. He was also an author and wrote a book called Ḥaṣī al-Nālīn fī l-Taqāwawī. Cf. Ḥiḍīṯ al-Kalīfī, iii. 171; C. W. F. Weigl, i. 401. See also: C. W. F. Weigl, iii. 247.

IBN KĀSIM, Abu `Abd Allāh `Abd al-Rahmān b. al-Kāsim b. al-Uṣūf, was the Imam in Malik's most prominent pupil. He studied under him for 20 years and after Malik's death was regarded as the greatest Malikī teacher. Through him Malikī teaching was disseminated in the Maghreb, where it is still predominant. He died in Cairo in 806 (1211).

One of the chief works of the Malikīs, the so-called Mudawwana, is usually ascribed to Ibn al-Kāsim. It was originally put together by Abu al-Furāt and contains a great many of the answers of Ibn al-Kāsim to Asad al-Sa`dīn al-Tanūkhī on Malik's doctrines on the question of Malik b. Ansār in Sa`dīn's recension. The work was printed in 20 vol. at Cairo in 1323 (1905). Various Malikī scholars have written commentaries on the Mudawwana.

(TH. W. JÜNNER.)

IBN AL-KĀSIM AL-GHAZZI, Shams al-Dīn Abu `Abd Allāh Muḥammad, a šāhīfī scholar, who wrote glosses on the celebrated Asābīd of al-Nasaff (Ḫādījī al-Kalīfī, iv. 226), which are not longer extant. His edition of the text is very incomplete in comparison to the ms. Paris Bibl. Nat., No. 1319.

Biography: Ibn Khalīlīkān, Wafayāt (ed. Wustenfeld), No. 772; Brockelmann, Gesch. d. arabischen, i. 261.

IBN AL-KALBI. [See al-Kalīb.]

IBN KAMĀL. [See Kamarahzādē, Ibn K.]
Sprachen, vol. xi., Westas. St., p. 267) and Houtsma, Cat. d'unc Coll. etc., N°. 50, 51, 2^ed. 1889, N°. 175: 2 vols., years 96—242, 278—406 (defective in Vienna). He also wrote a commentary on the Kurân and some works on Tradition.

**Bibliography:** Ibn WindowText. Al-Aṣṣālān, al-Durar al-kimāna (Cod. Vienna, N°. 1172), i. 127; al-Nu'mānī, al-Rawḍat al-Sā'iṣ (Cod. Berlin, N°. 687); f. 6o; al-Dhahabi (al-Suyūṭī), Liber clausum sivorum, etc., Ed. Wustenfeld, xxii. N°. 35; Weyer, Orientalia, ii. 433; Wustenfeld, Geschichtsrecher, p. 434.

(C. Brockelmann)

**IBN KHĀRĀN,** the name of three viziers:

1. **ABU ʾL-ḤASAN ʿUBĀDI ALLĀH B. YĀḤĪ Y B. KHĀRĀN.** Appointed secretary of state in 236 (850—851), ʿUbād Allāh was raised to the vizierate by al-Mutawakkil and held this office till the latter's assassination in 247 (861). Towards the end of the year 245 (860) he brought about the fall of Naḍāl b. Salama, the minister of finance; the latter was tortured to death and his property confiscated. Along with al-Fāhū b. Khārān [q. v.] ʿUbād Allāh was the declared favourite of al-Mutawakkil and they used their influence to favour his son ʿAbd-ul-Muṭāz at the expense of his brother al-Munṣūr b. al-Mutawakkil. After the accession of al-Muʿtamid in the year 256 (870) ʿUbād Allāh, in spite of vigorous protests was again appointed vizier and remained in this office till his death in Dhu ʾl-Qaʿa 253 (July 577).

2. **ABU ʾALI MUḤAMMAD B. ʿUBĀD ALLĀH B. YĀḤĪ Y.** Son of the preceding. After the fall of Ibn al-Furat in 299 (912) Muhammad, who had filled several offices since the death of his father, was appointed vizier through the influence of a harem lady but proved so incapable that the caliph al-Muṭāṣab wished to replace him in the following year by Ibn Abī ʾl-Baqī, governor of Fars. He succeeded in saving himself by harem intrigues and Ibn Abī ʾl-Baqī', who had already arrived in the capital to take over the office, returned to his governorship. Towards the end of the year, however, the Caliph had to look round for a more suitable vizier and summoned ʿAlī b. ʾIsā b. al-Djarrāh [q. v.] to Baghdaḍ. After the latter had entered into office in the beginning of 301 (913), Muhammad was arrested with his two sons, ʿAbd Allāh and ʿAbd al-Wahīd. In Djumland II 301 (Jan. 914) he received his freedom again. He died in 312 (924—925).

3. **ABU ʾUL-QĀSIM ʿUBĀDIM ʿUBĀD ALLĀH (ʿUBĀD ALLĀH) B. MUḤAMMAD B. ʿUBĀD ALLĀH B. YĀḤĪ Y, son of the preceding. In 312 (924) ʿAbd Allāh succeeded Ibn al-Furat when the latter was finally dismissed. When he was intriguing against the high chamberlain Naṣr al-Kuḥṣūrī, the latter got wind of it and soon brought about ʿAbd Allāh's fall. Besides he was an invalid and had to trust the business of his offices to others for a period. At the same time a famine broke out in the capital and as usual the discontent of the people found vent against the vizier. Naṣr finally succeeded in overthrowing him and after Abū Allāh had held the vizierate for about a year and a half, he was dismissed and imprisoned in Ramadān 313 (Nov. 925). His property was confiscated; after some time al-Muṣṭafir released him and he died in 314 (926—927).

(K. V. Zettersten)

**IBN KHĀLAWAHI (KHĀLAWAY), ABU ʾABD AL-LĀH AL-ḤUSAIN B. ĀḤMAD B. ḤAṬIMAN AL-ḤAMĀDIHAY, a notable Arab grammarians and lexicographer. The year of his birth is not mentioned; he was a native of Hamadhān and came in 314 to Baghdaḍ, where he studied the Kurān with Ibn Muṭāṣab, ʿAbd Allāh (d. 247) and ʿAbd Allāh al-Ṣārīr (d. 368), grammar and adab with Ibn Durādī [q. v.], Nīfawānī (d. 323), Ibn al-Anbarī [q. v.], Abū Ṭumar al-Zāhidī (d. 345), and ʾAḥmad al-Kātibī (d. 370) with Muhammad b. Maṣḥūth b. ʾĀṭār (d. 331) and others. He afterwards went to Syria and settled in Ḥalab; according to al-Dhahabi he also lived in Māyāfīrān and ʾIṣfahān. He took up an eclectic standpoint in relation to the grammatical schools of Kifla and Ṣaḍra. He won a high reputation as a teacher. He was in high favour with the Hamadhānī Saif al-Dawla, whose sons he taught; as a poet he was also appreciated; and he often disputed vigorously with al-Munnadī [q. v.]. The grammatical Ibn Durastawī (d. 347) argued against him in his Kitāb al-adab ilā Ibn ‛Uk̇hawa fi ‛l-Kull wa ‛l-Dawād (Fikrist p. 65, 12). Ibn Khālawayh died in 370 (980) in Ḥalab.

Of his works (detailed in Flugel, b. c.) there are preserved: a) Kitāb Loza, the first half of which was published by H. der Dernburg in Hibrāi̇c, x. 88—105, Amer. Journ. of Sem. Lang. and Lit., iv. (1898), 81—93, xv. (1898—9), 32—41, 215—223, xvii. (1901), 36—51; also, hardly completed, printed at Cairo in 1327 (ed. ʿAbd Allāh al-Aṯīn al-Shimīk); b) Kitāb Rūḥ al-Dhābīn Sūrat al-Muṣafād (Ms. in Brockelmann); c) Sharīʿa Muṣafār Ibn Durādī, Ms. Paris Bibli. Nat., N°. 4.331, iv. and in Brockelmann, p. c., i. 111; d) his recension of the Diwan of ʿAbū ʾĪṯār [q. v.], with an introduction; e) Refutation of some grammatical explanations of Ṣulṭān in Suṣūṭī, al-Ḥaṣāb wa Ṣuṣūṭī (Haidarābād 1317), iv. 137—140. — The Kitāb al-Ḥaṣāb ascribed to him is, as S. Nagelberg shows in the preface to his edition (Kitāb al-Safar, Diss. Zürich, Kirchhain 1909), the work of ʿAbū Zaid [q. v.] on which his lectures were based. This is probably also the case with the Kitāb al-ʾAḥqāfī mentioned among his works which is probably his edition of the work of his teacher Abū ʿOmar al-Zāhidī (Berlin, Verz., N°. 7014).

**Bibliography:** Fikrist, p. 83 and 35 sq.; Ibn Khallikān, ed. Wustenfeld, n°. 193, and n°. 49, p. 65 supra (ed. de Slane, l. 456 sqq. and 105); al-Dhahabi, (Cod. Warner 654, iii. (Cat. ii. 120 sq.)), p. 23 infra sq.; al-Suyūṭī, Bāṣgūṭat al-Wāʾīr (Cairo 1326) p. 231 sq.; Flugel, Die gramm. Schriften d. Araber, Aḥmad, d. Dētch.
IBN KHALAWAH — IBN KHALDUN.

Morg. Get., ii. 230 sqq.; Broekelmann, Gesch. d. arab. Litt., i. 125; and the literature given there.

(C. VAN ASELKONDE.)

IBN KHALDUN, 'Abd al-Ra'jamn and Yahya.

Two Arab historians, descendants of a Seville family, who migrated to Tunis about the middle of the viii[th] (xii[th]) century and belonged to the Arab tribe of Kinda. Their ancestor Khalid, known as Khalid (whence the name Ibn Khalid for all members of the family) migrated from the Yemen to Spain in the iii[rd] (xth) century.

There his descendants filled various important administrative offices, some in Carmona and some in Seville. The fall of the Spanish Almohad kingdom and continued conquests of the Christians caused the Khalid family to migrate to Ceuta and the great grandfather of the two brothers, 'Abd al-Ra'jamn and Yahya, of the Hasun family, finally settled in Bona on the invitation of the Hafsid Abu Zakariya. The Hafsid Emirs and Ra'is's showed favours on al-Hasan and his son Abu Bakr Muhammad. The latter, who bore the title 'Amid al-Haghardi 'chief accountant,' was strangled in prison. His son Muhammad attained various important offices at the Hafsid court. The latter's son, also called Muhammad, declined all offices of state, although he remained in Tunis, in order to devote himself entirely to study and piety, he died of the plague in 759 (1359) and left 3 sons of whom the eldest, Muhammad, played no part either in literature or politics, while the two younger brothers, 'Abd al-Ra'jamn and Yahya, obtained renown as politicians and historians.

1. 'Abd al-Ra'jamn (Ab'd Zain) surnamed Wali al-Din, born in Tunis on the 1st Ramadam 732 (27th May 1332), died at Cairo on the 25th Ramadam 808 (19th March 1406), after learning the Qur'an by heart, enjoyed the instruction of his father and the most prominent teachers of Tunis and devoted himself ardently to grammar, language, law and tradition and also to poetry. When the Marinid Abu l-Hasan took Tunis in 748 (1347) 'Abd al-Ra'jamn heard the lectures of the Maghribi scholars in the retinue of this prince and perfected his knowledge of logic, philosophy, dogmatic theology, canon law and other branches of Arab learning. The connections he made at this time with the scholars and high officials of the Marinid court, later helped him to high offices at the court of Fas. When barely 21 he was appointed writer of the al-'amara of the king of Tunis, but left the office soon afterwards, when trouble broke out in the city, and fled to Biskra to Ibn Munzi, lord of Zab. After the Maridin Abu 'Inan had seized Tiemcen, and the whole country east as far as Bougie, 'Abd al-Ra'jamn entered his service and took part in a campaign under a Marinid general. Invited by the sultan at the request of scholars to Fas (755-1354) he went there, became secretary to Abu 'Inan and continued his studies under the best teachers of his time. In 757 (1356) he fell into disgrace and was twice imprisoned, the second time till the death of Abu 'Inan in 759 (1358). The new sultan Abu Salim, appointed him secretary again (760 = 1359) and later chief kadi. After Abu Salim's violent death he was again disgraced under the notorious vizier Omar b. 'Abd Allah, but received permission to go to Granada (763-764 = 1361-1362), where he stayed at the court of the Banu l-Ahmar and formed a friendship with the famous vizier Ibn al-Khatib. Two years later, when this friendship had cooled down, he went to Bougie on the invitation of the ruler there, the Hafsid Abu 'Abd Allah, who appointed him chamberlain (qadijih); at the same time he held the office of khatib and a teaching post (760 = 1364). When in the following year Bougie fell to the ruler of Constantine 'Abd al-Ra'jamn retired to Biskra. Soon afterwards he entered into communication with Abu 'Ishak, king of Tunis, and his son and successor Khalid. He then went himself to Tiemcen, but soon afterwards left the unfortunate Abug Hammu II in the lurch, when he was driven from his capital by the Marinid sultan 'Abd al-Aziz and offered his services to the latter. From his safe refuge in Biskra he continued to support 'Abd al-Aziz against Abu 'Hammu while the Maghrib was tormented with wars and rebellions. He did not go to Fas till 774 (1372) and from there in 776 (1374) to Granada, but the sultan of Granada, at the instigation of the Marinids, soon had him taken to Huinain, the harbour of Tiemcen. In Tiemcen he again found a friendly reception from Abu 'Hammu. He now resolved to shun the friendship of princes and retired to the Kafr Ibn Salama (Taughzah) where he began his history and lived till 780 (1378). He then went to Tunis to consult several books which he required for his work. In 784 (1382) he set out on the pilgrimage to Mecca, but broke his journey in Alexandria and in Cairo where he lectured in the al-Imami al-Azhar, and later in the Samara and in 786 (1384) was appointed Maliki chief kadi by sultan al-Zahir Barakih. Soon afterwards he lost his whole family and all his property by shipwreck and then devoted himself to pious works and completed his pilgrimage in 789 (1387). From 801 (1399) he was again chief kadi in Cairo with a short interruption and in 805 (1401) he accompanied the sultan al-Nasir to Damascus with the other kadis on his campaign against Timur. Returning to Cairo he again filled his office of kadi and held it till his death with several interruptions.

From those biographical notes we see that 'Abd al-Ra'jamn perhaps showed a great and statesmanlike ability in the administration of important offices but that he never hesitated to leave one of his masters in the lurch and to enter the service of another, often the enemy of the former. We have further seen that he played a great part in the politics of North Africa and Spain and had very special opportunities of giving a considered judgment on what happened. His Kitaab al-Ibar (Cairo 1284, in 7 vols.), in spite of the unequal value of the separate parts, is an important work for the history of his time. Although certain parts of this comprehensive history leave much to be desired in the presentation of facts and documentary value, others contain, in spite of some stylistic defects, very important documents for the study of history. His History of the Berbers will always remain a valuable guide for everything that refers to the life of the Arab and Berber tribes of the Maghrib and the mediaeval history of this country; it is the fruit of 50 years' (2nd half of the xiv[th] century) direct observation and industrious study of books and chronicles as well as diplomatic and of-
ficial documents of his time. His Mukadidina which deals with all branch of Arab sciences and culture, remains, as regards the depth of thought, cleanness of exposition and correctness of judgment undoubtedly the most important work of the age, which seems to be surpassed by no other work of a Muslim author”.

Yahyā, Abū Zakariyyā, born in Tunis about 734 (1333), died at Tlemcen in Ramādān 780 (Nov.-Dec. 1378), like his brother and probably with him, devoted industriously to study in his native town and was intimate with all the important scholars of his time in the Ḥafṣīd capital. To judge from his book, on which see below, he seems to have had a special preference for poetry and belles lettres. We know very little of his personality; the references are scattered in various sources, e.g. ‘Abd al-Rahmān’s autobiography and that of the Kūdāb al-lgābī which deals with the history of the Berbers. This last book gives a detailed account of the murder of Yahyā in Tlemcen; Yahyā himself also gives a few details of his career in his Bughayat al-Kawwād.

Yahyā’s political life did not begin till 757 (1356), when he was with his brother (who was soon afterwards imprisoned) at the court of Abū Sālim, sūlān of Fās, and the latter sent two Ḥafṣīd emirs, his prisoners, from Tlemcen back to Bougie. He accompanied these two princes in place of his brother and acted as chamberlain to one of them, the emir Abū ‘Abd Allāh. As the latter, in spite of a long siege could not regain Bougie, he sent Yahyā to Abū Ḥammād II, king of Tlemcen, to ask for his assistance (764 = 1362). Yahyā found a kindly reception in Tlemcen and his request was granted. After the Mawlid festival, which he attended there and commemorated in a poem, he went back to his master to bring him to the ‘Abdalwalidī court on the 8th Djamādā II (26th March 1363). Both returned to Bougie with a column of troops sent by Abū Ḥammād.

In 767 (1365—1366) the Ḥafṣīd emir of Constantine, after taking Bougie, imprisoned Yahyā in Bona and confiscated his property; he escaped soon afterwards and went to Biskra to Ibn Maznī and his brother. It was probably at this time that he made the pilgrimage to the tomb of Ṭāhir which he describes in his Bughayat al-Kawwād. From Biskra he returned to Tlemcen at Abū Ḥammā’s request, arrived there in Radjab 769 (Feb. 1368) and was appointed Kūdāb al-lgābī. When he learned that Tlemcen was threatened by the Marinids, he forgot the kindnesses shown him by Abū Ḥammād and left him (772 = 1371) to enter the service of the Marinid sultan ‘Abd al-Azīz and afterwards of his successor Muhammad al-Sa’īd. It was only after the capture of Fās by Abū al-Dādīd by Sultan Abū ʿAbdAllāh in 775 (1373) that Yahyā returned to Tlemcen, where Abū Ḥammād again welcomed him and gave him his former secretarial office. He soon won the king’s confidence again but thereby aroused the jealousy of the other court officials, notably Abū Ḥammād’s eldest son and probable successor Abū Tadjīm II.

The latter with a few licel arabes fell upon Yahyā, as he was leaving the house one night in Ramādān 780 (1378), and murdered him. When Abū Ḥammād learned that his son had been the instigator of the crime, he had not the courage to take steps against the murderers.

Although Yahyā’s political career was shorter and less brilliant than that of his brother yet it gave him the opportunity to write a historical work of great learning, the Bughayat al-Kawwād (see Dīrās; al-Maktab min Banī ‘Abd al-Wād. It was much used by Brosselard and Bargès in their history of Tlemcen and I have published the Arabic text with translation under the title Histoire des Banī ‘Abd al-Wād, reis de Tlemcen (2 vols., Algier, 1904—1913). His history of the kingdom of Tlemcen is particularly important for a knowledge of the long and in a way brilliant reign of Abū Ḥammād II, whose secretary and trusted adviser the writer was. In this capacity he was no doubt able to consult political documents and even quotes some in full in his book. Although the book neither covers so wide a field as his brother ‘Abd al-Rahmān’s work nor shows such a lofty point of view or critical spirit, it is far superior in literary value. Yahyā reveals in it not only literary but also poetical skill, his elegant style is often lyrical and his narrative is adorned with quotations from the best old Arab writers. He has contributed to a sketch of the historical policy of the central Maghribi kingdom, he has also preserved for us in his work poems by contemporary court poets and gives information about scholars of his time and about the poetical meetings at the court of Tlemcen, all information hardly to be found elsewhere and affording a rather accurate glimpse into the intellectual life of the ‘Abdalwalidī capital in the xivth century.

(Alfred Bel)
two persons, 'Abd al-'Aziz and Abū Sa'id). He was condemned as a heretic in Granada and his extradition demanded, but 'Abd al-'Aziz and his son and successor Muhammad III al-Sa'id (1372-1374) declined to deliver him up, while the pretender Abu 'l-Albās al-Mustanṣir set about it. While the case was being conducted in Fās by his pupil and successor as vizier of Granada, Abū 'Abd Allāh (Brockmann, ii. 259, 'Ubayd Allāh) Muḥammad b. Ẓumrak (al-Maḳkari iv. 274-322), Ibn al-Khaṭīb was strangled in the night by assassins hired by Sulaymān b. Dā'ūd, the deputy of the vizier Muhammad IV. 'Umayr. He was to avenge for a private feud, who broke into his prison an outrage at which the people were very indignant in the morning.

Of the 60 or so writings of Ibn al-Khaṭīb, chiefly historical, geographical, poetical, belles-lettres, mystical, philosophical or medicinal in subject, about a third have survived on which see Pons Boigues, Ensayo-bio-bibliográfico, No. 294 p. 334-347; Brockmann, Gesch. der arab. Litt., ii. 260-263, and their sources. The most important work for us is the extensive *History of Granada*, al-Hudūl il-ṣaḥīḥ al-Madīqāt Gharbātā, which however consists mainly of biographies of scholars, a critical edition of which from the scattered manuscripts and extracts with a translation is a desideratum. The edition of an abbreviation, Cairo 1319, 2 vols. (the 3rd not yet published) is quite insufficient and very deficient as regards the Spanish names; on manuscripts cf. also Cat. Cod. Arab, Bibl. Acad. Ling., But., ii. 2 (1907), No. 1001 sq. (p. 103 sq.). The historical works al-Hudūl al-marākūmā and al-Limā' al-khāridiya fi l-Duwal al-Nasʿiyā, of which Casiri has given extracts in Bibliothèque, ii. 177-240 and 245-319, also deserve a critical edition and translation (the printed edition Tunis 1315, given by Brockmann, ii. 710, is unknown to the writer: there is perhaps some confusion with the following). Rehān al-Hudūl fi Naṣīr al-Duwal was printed at Tunis in 1316. Khāṭarat al-Tauḥīf fi Rīḥāl al-Shībā wa-l-Sa'īf was said by Derenbourg (and Casiri, i. 136*) and Brockmann, p. 262, to be a description of a journey to Africa, while the edition by M. J. Müller, Beiträge, i. 44-41, shows that it is a "journey by the prince Abu 'l-Hāḍījādi into the eastern provinces of Granada". (al-Maḳkālā Muḥammad b. Ẓumrak al-Maḳkālā wa-al-Maraq al-Khūli, on the plague (fāṣīn), the Black Death of 749 = 1348-49, has been edited and translated in 1863 in the Sitzungsber. der Bayr. Akad. d. Wissenschaften (in Casiri, Pons Boigues, and Brockmann, called Manṣūr al-Sa'il). The *Miljar al-ʿIṣṭirāf fi Dhikr al-Maṣḥid wa-l-Dīyār, already completely published by M. J. Müller in Beiträge, i. 45-100, was again published in Fes 1325. Of the great collection of diplomatic documents in the ornate style, Ruhānāt al-Kutṭāb wa-Nuṣūr al-Munābiṭ, Mariano Gaspar Remiro in his periodical Rev. del Centro de Estudios Hist. de Granada y su Rein has given numerous texts and translations since 1912. Muḥammad b. Mufaḳṣalāt Maḥṣūya wa-Sāli was edited by M. J. Müller, Beiträge, i. 1-13. Ḥabib al-Zayyāt's Catalogue of Damaskus mentions on p. 53 a Ṭuṣqūṣ al-Ṭawīf bi l-Ḥubb al-Sharīf li-Liān al-Din al-Khaṭīb. Munich, No. 421, contains a Kāfida by him. Munich, No. 991 sqq., contain several copies by M. J. Müller. The mediocre edition of al-Hudūl al-maṣāḥiṣsīya fi Dhikr al-ʿIṣṭirāf al-Maṣḥid wa-l-Dīyār.
râkhiya, printed at Tunis in 1329, is wrongly ascribed to our author, cf. my remarks Rev. del Centro, iv. 137 sq.; 14 very inaccurate pages on the biography of Ibn al-Khaft, according to al-Makrī and Ibn Khalidūn, are prefixed.

(C. F. Seybold.)

IBN KHORDĀDHBHEH, Abu 'l-Ḳasim 'Usāib Allah b. ʿAbdu Allah, an important geographer of Persian descent who was apparently born in the early years of the third century A. H. (c. 820). His grandfather had been a convert to Islam; his father had filled the high office of governor of Ta'baristān. Little too is known of his own career; he held the important office of controller of the post and intelligence service (Ṣāḥib al-Barid wa l-Khabār) in al-Djibal (Media); when and how he got this office cannot be ascertained. The Caliph al-Mu'tamid made an intimate friend of him; al-Maṣūdī gives a discourse pronounced by him at court on musical instruments, song, rhythm, and dance. He owed his musical knowledge to Istāḥr al-Mawṣili [i.e., a great friend of his father]. Of his works, some of which were of a learned character (e.g. on the genealogies of the Persians), some belonged to the domain of Adab (on game, music, wine, culinaria, boons companions), there has only survived the Kitāb al-Muṣūb wa 'l-Muṭābīk, composed at the request of an 'Abāsīd prince, for which he was able to collect materials in the archives. It forms an important source for historical topography and was often used by later geographical writers (Ibn al-Faṭḥ Ibn Ḥawkal, al-Mukaddasī, al-Djīhān). This work first edited and translated by Sir Archibald de Meynard (Journ. Asiat., 1865) and again by de Goeje (Bibl. Geogr. Arab., vi.) who used further material, is, as the latter shows, not extant in a complete version. The investigations of de Goeje led to the conclusion that Ibn Khordādhbeh wrote his book about 232 (846-7) and then gradually increased it by additions so that a second edition appeared, which was not however completed before 272 (885-6).

According to Ḥajīdī Khalīfa, Ibn Khordādhbeh died towards 300 (912-3).

(C. van Arendonk.)

IBN AL-KIṬṬĪ, Abu 'l-Ḥasan 'Ali b. Yūsuf al-Kīṭṭī, called Djamal al-Dīn, was born in 568 (1172) in Kīft [q. v.] in Upper Egypt, came early to Cairo where he was instructed in the most varied branches of Arab-Muslim learning; and continued his studies in Jerusalem, to which his father was summoned to an important office in 583 (1187). After spending about 15 years there he went to Aleppo, where he devoted himself entirely for ten years to his literary studies, until in 610 (1213) he was entrusted with the administration of finance, an office which he held till 628 (1230) except for a break in 613-616. After spending five years in private literary activity, he was appointed vizier by al-Maḳṣūr al-'Azīz in 633 (1236) and held this high office till his death in 646 (1248). His official position gave him an opportunity of helping other scholars, in addition to his own literary activity. For example, he gave great assistance to Yāḳūt [q. v.] when he fled before the Mongols, for which the latter repeatedly shows his gratitude.

Of his numerous works, among which historical writings predominate, (a history of Cairo; a history of Yemen; a history of the Maghrib; a history of the Sa'idūs etc.) only one has come down to us and that only in extracts. The original was probably called Kitāb 'Abd Allāh ba-Ṭāhir al-Ḥakamī, while al-Farazī's synopsis is called al-Manṭukhābīs al-Mantiqātīs wa l-Taqīfīs al-Ḥakamī, usually quoted briefly as the Ta'ībī al-Ḥakamī. The work which was edited by J. Lippert (see Bibliography; also printed at Cairo in 1326), contains 414 biographies of physicians, astronomers, and philosophers from the earliest times to the days of the author and is of great value because it forms an inexhaustible mine of information regarding the knowledge possessed by the Arabs of Greek literature and even gives information about Greek antiquity, which is no longer preserved in classical sources.

IBN KILLIS, Fāṭimīd vizier. Abu 'l-FA-RABĪYYA YĀḳŪB b. Yūsuf, called Ibn Killis, was a Baghdad Jew, an excellent business man, whose ability raised him to the highest offices in the Fāṭimīd empire. Born in 318 (930-1), he came early in life with his father to Syria and in 331 (942-3) to Egypt, where he began to play a part at Kūfīr's [q. v.] court and by his financial ability won an influential position in politics. He remained a Jew till 356 (967), when he adopted Islam, as he saw a chance of becoming vizier. Thanks to his intellectual ability and power of hard work, he soon became an authority on Muslim sciences. His increasing influence aroused the jealousy of the vizier Ibn al-Furāṭ, whose intrigues caused him to flee to the Maghrib. He returned to Egypt with Dījāhwar or Mi'yīz. The Fāṭimīd government could find no more capable and expert administrator of the country's economic policy and thus it happens that the great prosperity of the Nile valley under the Fāṭimīds is associated with his name. The results of his budgets show, according to the sources, figures quite unknown before. But at the same time the country showed a thank the gratitude shown him, notably by Āzīz, was well deserved. In Ramadān 368 (April 979) he was given the honorific title, al-Wazīr al-Adjam. Many pleasing features of Ibn Killis's character are described, although he is also said to have worked against his enemies with poison and other means. He was able to please the taste of the time in poetry and literature, in benevolence and in the splendour of his menage, in external piety and learning; he wrote amongst other works a 9544 book on the Fāṭimī rite (Khiṭat, ii. 6). In any case, he was a financial genius and organiser of the first order. The internal administration of the Fāṭimīd empire is said to have been created by him. In 373 (983-4) he fell for a time into disgrace, but was soon restored to his old office and died at the end of 380 (991), deeply regretted by the Caliph Āzīz and all Egypt.

Bibliography: Isolated data in all the sources for the history of Kūfīr and the early Egyptian Fāṭimīds [q. v.]. Longer notices, based on al-Musabbih and al-Sairafi, in al-Maḳṣūr.
the biographies of the poet in Ibn Bassam, Ibn al-Abbār and Ibn al-Khājib must also be edited from the scattered manuscripts.

**Bibliography:** See above; cf. also Bus- tānī’s *Encyklopaedie arabe* (Dā‘īrat al-Ma‘ārif), i. (1876), 648, which follows Ibn Khākjīn except for the closing remark: date of birth and death are not mentioned, cf. also Samy-Bey in *Kāmil al-Alām*, p. 657; Codina, *Decadencia y desaparición de los Almoravides en España*, p. 154.

**IBN KUṬAIBA, ABBU 'AHD AL-ḤĀM MUBARAK B. MUNIR** (often also called *al-Kuṭaihī or al-Kuṭaihī*). *Al-Kif* (from his birthplace) Al-Dinawarī, an A r ā b a u t h or, born in 215 = 828 at Kāfa, was for a time kāfī of Dinawar in the province of Ḫalab, then lived as a teacher in Baghdād and died there in Ḥadāb 276 = Nov. 889 (according to others 270 or 271). In literary tradition he is regarded as the representative of the so-called mixed or eclectic Baghdād grammatical school. As a matter of fact however his activities, like those of his contemporaries, A bū Ḥanīfā al-Dinawarī and al-Dājīrī, covered the whole learning of his period. He sought to make available the lexical and poetical material which had been collected especially by A l-Muḥājīrīn grammarians, as well as historical information, for the requirements of the man of the world, particularly the kuttāb, who were then beginning to gain influence in the administration. But he also took part in the theological disputes of his time, and defended the Kūrān and Traditions against the attacks of philosophic scepticism; but he himself fell under the suspicion of heresy and had to write a book against the Mūshabbāhīn to defend himself against the reproach of belonging to them. His two most important philological works are *Kitāb Adab al-Kūtbī*, ed. M. Grünert, Leiden 1900, Cairo 1909, and the *K. al-Mu‘āmā‘i‘ l-Sahrā‘ in* 12 books, probably the same as Abyā‘ al-Mu‘āmā‘, Aya Sofya, No. 4050. In Adab, p. 71, 5, he quotes his Gharib al-Hadīth, Vol. i. and iii., Damascus, Hābīb al-Zayyāt, Kha‘īn al-Kuttab, etc., p. 62, No. 34–55, the counterpart Gharib al-Kūrān, ed., p. 62, No. 33 (to the end of Sūrā 26). His chief work is the *Kitāb ‘Uyūn al-Abbār*, a model of the scholastic adab in 10 books, often imitated later, 1–4 ed. by C. Brockelmann, Berlin 1900, Strassburg 1903–1208. According to ‘Uyūn, p. 12, 3, the following are supplementary to it: 1. *Kitāb al-Sharā‘at*, ed. A. Guy in al-Muṣṭa‘bal, ii. (Damascus 1325 = 1907), p. 534–248, 387–392, 529– 535; 2. Kitāb al-Maṣā‘īl, *Handbuch der Geschicte*, ed. F. Wüstenfel, Göttingen 1850, Cairo 1909; Kitāb al-Sahrā‘, Liber Poetici et Pastoralem, ed. M. J. de Goeje, Lugd. Bat. 1904; 4. Kitāb Ta‘wīl al-Kūṭāb, lost. Of his smaller philological works the Kitāb al-Ra‘ī al-Muṣṭafī still exists, ed. by Cheikh in Dīn ancients Traités de l’histoire arabe, Beyrouth 1908, p. 121–140. His two chief theological works are the Kitāb Ta‘wīl Muḥājīfīl al- Ḥadīth, Cairo 1260 (cf. Goldzihier, Msb. Stud., ii. 136; Houtman, De Suyd etc., p. 13), and Kitāb Muṣḥīl al-Kūrān, Hs. in Leiden, s. Catalogus cod. Ms. Atr. No. 1650, in Stambul, Koprulu Defteri, No. 211. Theological also is his Kitāb al-Muṣā‘īl, Qāni‘al-Muṣā‘īl, Hs. in Gottha, s. Pertsch, Verz. der ar. Hs. der keri, Bībl., No. 636. The pseudohistorical Kitāb al-Imām wa‘l-Siyāsah, Cairo 1322 and 1327, is

(C. BROCKELMANN)

**IBN AL-KUTIYA.** ABū BAKR MUHAMMAD B. OMAR B. 'ABBĀD 'AL-AZIZ B. IBRĀHĪM B. ISA B. MUZHAHM, usually known as Ibn al-Kūṭiyah "the son of the Gothic woman" because his ancestor Isā, a freedman of 'Omar b. 'Abd al-'Azīz, had married a Spanish princess named Sāra, a daughter of the Gothic king Oppas (Olemundo, according to Ibn Kūṭiyah) and grand daughter of Witta. The latter had gone to Damascus to make a complaint to the Caliph Hishām b. 'Abd al-Malik against her uncle Ardakān. Isā was sent with his wife to Spain and his descendants lived in Seville. Ibn Kūṭiyah himself was born in Cordova and studied in Seville, the home of his family, under Muhammad b. 'Abd Allāh b. al-Kūtā, Hasan b. 'Abd Allāh al-Zubairī, Sa'd b. Dhiibīr etc. He then went to his native town and completed his studies under 'Abd Allāh b. 'Abd al-'Azīz, Muhammad b. 'Abd al-Wahhāb b. Mughīth, Muhammad b. 'Omar b. Lu-bābā, Kāsim b. Aṣbāgh, Muhammad b. 'Abd al-Malik b. Aīman etc. Among his pupils were the Kādi Abu 'l-'Azm Khalaf b. 'Isā al-Waghkī and the historian Ibn al-Farādi. He was introduced to the Caliph al-Hakam II by Abu 'Ali al-Kalī, the author of the *Amālī, as the greatest scholar of the land and put over the *Shura of Cordova after holding for a time the office of kādi. He was a philologist, a grammarian, a historian and even a poet, but was reputed not to know much about hadith and law. Nevertheless people came to him for his advice on passages in hadith and legal points which offered special philological difficulties. He died at a great age in Cordova on Wednesday 23rd Rabī' I 167 = Nov. 6th 927.

He is the author of the following works: 1. *Tārīkh Fath* (var. *Iṣṭifāh*) al-Andalus, a history of Spain from the Muslim conquest to the reign of the Caliph 'Abd al-Rahmān III, published by the Academy of Madrid in 1868; by Ioudas in *Recueil de textes* etc., t. i., Paris 1858, p. 190–280, from the Ms. in Paris, de Slane, Cat. no. 1, 1867 (from the same ms.: Cherbonneau, *Histoire du règne d'Elchaham fils de Hadīm*, Journal As., 1853, i. 458 sqq.); 2. *Kitāb al-'Aṣr*, a catalogue of verbs of three and four radicals, ed. by Guidi, Leiden 1894: *Il libro dei verbi*.

**IBN MAIMUN.** ABū 'IMRĀN MUṢA B. MAIMUN b. 'Abd Allāh al-Kūtari (al-Ammoni; al-Iṣkālī is the Arabic name of Maimonides famed alike in Jewish theology and philosophy. His Hebrew name was Rabbi Moseh ben Maimon and from the initial letters of his name he is shortly known as RaMbh. In Arabic he had the honorary title al-Ra'sī (al-Ummara or al-Milla, chief of the (Jewish) nation” the equivalent of the Hebrew Nāgūd. He is also called Moseh ha-Zamān, the “Moses of his time”.

He was born at Cordova on March 30, 1135, where his father was a dayārā judge in the ecclesiastical court. From him the boy received his first education in Rabbinical studies and he was also taught Arab sciences by Muslim scholars. When he was 13, Cordova fell into the hands of the Almohades [q. v.] and Christians and Jews were not tolerated in the town; they were given the choice of migrating or adopting Islam. Maimonides left the town with his father (on his alleged conversion to Islam see below); the family led a nomadic life for a long time, even in Fez where they settled, their stay was not permanent. They sailed for Palestine, reached Akkā, thence went to Jerusalem and finally settled down in Fustat. Soon afterwards the father of Maimonides died, and he met with many other misfortunes. As he was unwilling to make a livelihood by a Rabbinical career, he decided to practise medicine. He soon made such a name that he won the particular confidence of Sulaymān al-Din’s vizier, al-Kādi al-Fādil al-Baṣānī, who gave him his protection for the rest of his life. Sulaymān al-Din and later his son made him court physician. He was so much sought after everywhere as a doctor that it is difficult to see where he found the time for his manysided literary activity.

Ibn Maimon died on Dec. 13th 1204. In accordance with his desire, his body was taken to Tiberias in Palestine. His tomb is still shown and visited there. All his works except one were written in Arabic and in so far as they were concerned with philosophy and medicine they were read and studied not only by his co-religionists but also by Muslim scholars and through the medium of Latin translations exercised a profound influence on the scholasticism of the Christian west (Albertus Magnus, Duns Scotos). His chief work on philosophy is
the Dalālat al-Hāʾirin “Guidance for those who are confused” (Hebr. Mörch NĪḥāʾīkhim, Latin: Doctor Perplexorum), by which those who have been confused between Reason and Revelation are to be brought back to a comforting harmony. No contradiction between the revealed scriptures and the principles of metaphysics as laid down by Aristotle and following him al-Fārābī [q. v.] and Ibn Sīnā [q. v.] can or may exist. All the anthropomorphism of the Bible is interpreted in this light. We may here call attention to the concise synopsis of the teachings of Muslim theology and philosophy in this book.

The Dalāla soon found enthusiastic admirers but also bitter opponents, to whom it seemed too freethinking, and they used to call it Dalāla, temptation, by a slight variation in the name. It has been edited and translated by Salomon Munk as the Guide de l'Égaré (3 vol., Paris 1856—1866). Among his other philosophical works we shall only mention the Makāla fi Sīnāt al-Mañīṯ (Hebr. Milōṭ ha-Haggyyōn). His medical works in which he chiefly quotes Rāzi, Ibn Sīnā [q. v.], Ibn Wāfīd, and Ibn Zuhru [q. v.], deal with haemorrhoids (a ḥ-fawārīq), asthma (a ḥ- ḥrab), etc. His medical aphorisms, known as Puṣṭūl Mūṣā, are modelled on the Aphorisms of Hippocrates on which he wrote a commentary. He also wrote a treatise on the computation of the Jewish calendar.

Here we can only touch upon his thorough and fruitful work in the field of Jewish literature; we may mention three works, his commentary (Sharḥ) on the Mishnā on which later known as Sirāḏī “lamp”), his Kitāb al-Sharḥ (Hebr. Sepher ham-Mizwāṭiḥ) in which he discussed all the orders and prohibitions of Jewish canon law, and particularly his Misnāh Tharīḥ (also called Yad ha-Ka-resā) a masterpiece of systematisation, in which he arranged for the first time all the vast material of Talmudic tradition — similar to the corresponding Muslim works — according to subject matter, and discusses it.

Ibn al-Kīfīt and Ibn Abī Usābi‘a say that Maimonides adopted Islam in Spain to avoid persecution and professed Islam in public but in secret practised Judaism. At a later date a certain Abu l-Arab b. Ma‘īṣa is said to have accused him in Egypt of having recanted from Islam and gone back to Judaism. His powerful patron al-Ḥaḍī al-Raḍī however declared that a forced conversion to Islam was not a conversion at all and so saved his life. Ibn al-Kīfīt’s and Ibn Abī Usābi‘a’s accounts — the latter however, as his wa-kīla shows, gives it under reserve — have no claim to historical accuracy. Quite apart from the fact that the biographical notices of Ibn Maimon contain much else that is inaccurate, although according to Muslim law a recantation of Islam to save one’s life is judged less severely than a voluntary one, on the other hand a compulsory convert to Islam is a full Muslim and his later secession would meet with the death sentence. The most convincing argument is the following. In the bitter struggle which arose round Ibn Maimon’s Dalālat al-Hāʾirin in which his enemies did not spare their insults and reproaches, not even his most bitter antagonist made this accusation against him. This would certainly have been the case if his conversion to Islam — which could not have remained concealed — had been a fact.

**IBN MAHKHALD, the name of two viziers:**

1. Al-ḤASAN B. MAHKHALD B. AL-DJARKHĪ (of Dair Kunnà, administrator of the domains from 245 (575-8) onwards. After the death of ‘Ubayd Allah b. Yahya in Dhu l-Ka‘da 263 (July 877) [see IBN KHAŽĀN, 1.] al-Ḥasan was appointed vizier by al-Mu’tamid. At the same time he was secretary to the latter’s brother al-Muwallaṣ but after about a month he fled to Baghdād on the arrival of Mūṣa b. Boghā in Sāmarrā, the capital of that time. Sulaimān b. Wāhī then took over the vizierate and his son ‘Ubayd Allah the secretaryship. In Dhu l-Ka‘da of the following year (July 578) Sulaimān was dismissed and his house plundered, whereupon Hasan was made vizier a second time on the 27th of the same month (31st July). In Dhu l-Hijja (August 878) Sulaimān regained his freedom; Hasan fled and his property was confiscated.

2. Abū l-KĀSIM SULAIMĀN B. AL-ḤASAN, son of the preceding, secretary of state from 301—311 (913—923). After the dismissal of Ibn Muḥān [q. v.] in Dju‘māda I 318 (June 930) Sulaimān was made vizier by the Caliph al-Muktaﬁd. The experienced Al b. ‘Isā [q. v. IBN AL-DJARKHĪ, 2.] supported him by word and deed; Sulaimān was not fit for his difficult position and as there was a want of money and his attitude did not make him popular, he was dismissed on the 24th Rājdab 319 (12th August 931). In 324 (935-6) al-Raḍi dismissed the vizier Abū Dja‘far Muhammad al-Karkhī and appointed Sulaimān his successor; but as the disorder increased the Caliph had to turn to Ibn Ra‘īk [q. v.] and Sulaimān was dismissed for a second time. At the end of 326 (Oct. 940) he regained his office and after the death of al-Raḍi in Rabī‘ I 329 (Dec. 940) he was recognised as vizier by his successor al-Muttaqi. He administered his office in name only however, and was only able to hold it for four months after the accession of al-Muttaqī.

(K. V. ZETTERKÆSTEN)
IBN MĀKULĀ, Abū l- Kháṣīm Ḥibrāt Allāh b. 'Alī b. Ḍāʿūr al-Īḍālī, called Ibn Mākulā, vizier to the Būyād Dājāl al-Dawlā, born in 365 (975-6). Dājāl al-Dawlā appointed him vizier in 423 (1032) but soon afterwards dismissed him. His successor Abū Saʿd Muḥammad b. al-Husayn b. Abū al- Rasūl only held the office a few days; as he was attacked and ill-treated by the Turkish mercenaries in the capital, he had to go into hiding. Ibn Mākulā received the office again. In 424 (1033) Dājāl al-Dawlā had to flee to al-Karkh; the vizier followed him and was soon afterwards again replaced by Abū Saʿd. Next year Dājāl al-Dawlā dismissed the latter, and Ibn Mākulā resumed the office although only for a few days. In 426 (1034-1035) the same thing occurred again. Abū Saʿd who was again made vizier, set out against Fāris b. Muḥammad [q.v.] and Ibn Mākulā again became vizier. On this occasion he held the office for two months and eight days. He was then driven out by the troops and Abū Saʿd became vizier. After a year or two Ibn Mākulā was handed over to the ʿUkāilīs, Karwān al-Maṣṣūla, b. Muḥammad al-Muqalla, who imprisoned him in Hīth. Here he died in 430 (1038-1039) after being in prison for two years and five months.

(K. V. Zetterstèrn.)

IBN MĀLIK, Dīmāl al-Dīn Abī ʾAbd Allāh Muḥammad b. ʾAbd Allāh b. Muḥammad b. ʾAbd Allāh b. Mālik, better known as Ibn Mālik, was born, contrary to the assertion of Brockelmann and those who follow him, in Spain, at Jaen in 602—1205-4; some say that he was born a year or two later. He studied in his native town with Abu ʿl-Muṣṭafar and Abu ʿl-Ḥasan Thābit b. Khiyār, surnamed Ibn al-Tašālān, Abū Raḥmān b. Thābit b. Muḥammad b. Yūsuf b. Khiyār b. ʿAlī b. Muqalla of Niebla, Abu ʿl-ʿAbbās Ahmad b. Nuwārār, Abū ʿAlā ʿAbd Allāh Muḥammad b. Mālik al-Marshān, etc. He then went to the east and studied under the grammarians Ibn al-Ḥadīqib, Ibn Yaʿṣib, Abū ʿAlī al-Shafiʿīn. At Damascus he studied bādīth under Mukrim, Abu ʿl-Ḥasan b. al-Shakhtāwī, etc. Under these pupils we may mention his son Badr al-Dīn Muḥammad who commented on several of his father's grammatical works, the chief kādir Badr al-Dīn Ibn Dīmāl, the poets Bahāʾ al-Dīn b. al-Nawāsī al-Halabī, the jurist Abu Zakariyyā al-Nawawī, the Shāfiʿī Abū ʿl-Ḥasan al-Yūnīnī, etc. After completing his studies he began to teach grammar in Aleppo, became Imam of the al-ʿAdīya at Aleppo, later taught at Hamsa and finally at Damascus where he died on the 12th Shaʿbān 672 = 21 Febr. 1274. He was a Mālik but on going to the east became a Shafiʿī. Ibn Mālik was considered a great philologist, his reputation almost overshadowed that of Sibawāhi. On examining his works and the appreciations of them by his friends and criticisms by his enemies, one can say that he rendered a real service to the study of grammar by coordinating and simplifying the rules, although he may very occasionally be reproached with a want of that clearness and simplicity, which is necessary in didactic works.

He wrote the following works: 1. Kit. Ṭashkīl al-Fawāʾid wa-Tahkīl al-Maṣāḥīd, a manual of grammar the conciseness of which verges on obscurity, pub. at Fās in 1323; 2. al-Khiyār al-
Mubārak wa l-Maʿṣūla, poem in 162 ṭafāṣ verses rhyming in ī, containing almost all the words ending a short ālif or āṣif followed by hamza and of different meaning accompanied by a short commentary by the author, pr. at Cairo in 1897, 1329; 7. Kitāb al-
Muḥkīlat al-Dīmāl al-Sāhib, grammat. commentary on 99 passages from the Sāḥib of al-Bukhārī, Escurial, Derenburg, ib., No. 141; 13. Kit. al-Ṣāḥib al-mukhtalīf, treatise on synonyms, Berlin, No. 7041; 14. al-Ṣāḥib fi l-Farq bain al-ṣāḥib wa l-Dād, a poem of 62 ṭafāṣ verses rhyming in ī, accompanied by a short commentary on words of the same form, either with āḏār and ǧār or with ǧār and ǧār, Berlin, No. 7023, Gotha, Pertsch, Die arab. Hts., No. 414; 15. 49 kūnāl verses containing the trilliteral verbs of which the 3rd radical is written indifferent with īwār or yāwār (reprod. by al-Suyūṭī, al-Musāhir, Bābāl 1282, i. 145—147); 16. Several short treatises each dealing with philological, grammatical etc. anomalies, some of which are given in the Majmūʿa.

Bibliography: Ibn Shakir, Fawāṣ al-Wafayāt, Bābāl 1299, ii. 227; al-Makkiṭ, Naṣf al-Tib, Cairo 1302, i. 427; al-Sakhātī, Tahāzīl al-Shaḥīya, Cairo 1324, v. 28; al-Suyūṭī, Bughyat al-Wuṣūr, Cairo 1326, p. 53; Muḥ. b. Muḥ. b. Ḥamīd b. al-Bannāʾi, Commentary on the Kāhib of the Alhisya (2 ms. in my possession); Commentary on the Alhisya of al-ʿUṣmānī, of Dāḥān, of Ibn ʿAḵl, of al-Maḵkūdī with their annotators; al-Dalālī, al-Fawās al-Maṣfūkān, Cairo 1322, p. 64; Hurrat, Litt. Ar., p. 170; Brockelmann, Gesch. d. ar. Litt., i. 298 sqq. cf. 525; ii. 697; Moh. Ben Cencheb, Étude sur les pers. ment., dans l'Alhisya du chikh Abū al-
Kādir al-Farsī, No. 197. (MOH. BEN CENCHEB.)

IBN MARDANĪŚ, Abū 'Abd Allāh Mūḥammad b. Ahmad (the latter usually omitted; correct in Ibn Khalūdīn, iv. 166; the nephew of 'Abd Allāh b. Mūḥammad b. Sa'd, who fell in the battle of Albacete in 540 = 1146, cf. Zeitschrift d. Deutsch. Morgenl. Ges., xiii. 1909. p. 352) b. Sa'd b. Mūḥammad b. Ahmad b. Mardanīš al-Dīṇdāṇī (according to others, al-Todjībī) was born 518 = 1124-5 at Banāḡaḵāla = Benjshkala = Peninsula between Tortosa and Castellón de la Plana, died on 29th Rādjab 567 = 27th March 1172. In spite of the name, he was apparently of Spanish descent as his great-great-great grandfather after whom he is usually called for short, was called Martinus or Martín "the son of Martín", so that Mardanīš seems to be a corruption of Mardanīš, (for Arabic dataTable cf. Emerita = Márda, Mérida) in spite of Codera's doubt about Dozy's derivation; it is much more difficult to agree with his suggestion of the Byzantine Mardounios. The popular etymology from mard, Arabic ʿadhirūn, "excrement" in Ibn Khalūdīn, Biography of the Dāmmār, iv. 473, is of course a mere play on words. On the collapse of Almoravid rule the unusually capable tyrant Ibn Mardanīš made himself master of Valencia and Murcia in 540 = 1146 and by further conquests (Guadix, Jaen a vast principality of his father-in-law Ibn Hemoqāq = Hemochico, Ubeda, Baena, Almeria etc.) he became king of the whole of South-eastern Spain. As Rey Lobo or Lope, often in coalition with the Christian rulers of Castile, Aragon, and Barcelona, he was able to resist the advance of the Almohad 'Abd al-Muʿallim (died 1163) and his son Yusuf (died 1176). He is accused of treachery of his father-in-law in the last years of his life. He died in 1172 during the siege of his capital Murcia; his sons then surrendered and secured lucrative positions for themselves, while the whole of Muslim southern Spain became Almohad.

IBN MĀṢAWĪ, or Māṣawī (MEṢWA in Latin translations of the middle ages), Abū Zakariyya Yūḥannå (YAHYA), a Christian physician, whose father was a druggist at Dūndjāshāpūr. In the reign of Hūrūn al-Rashīd he was engaged in translation work and studied medicine under Gabriel b. Baktihūr [q. v. i. 602a supra], the Caliph's court physician. In the reign of al-Muʿammān he was appointed to this office and held it till his death in 243 (857). Among his pupils was HunAIN b. Ḳāḏī [q. v.] for whom he wrote his al-Nawādir al-tibbiyya. A Latin translation, attributed to John of Damascus, appeared at Basle in 1579, as a supplement to the Aphorismi Maimonidei, p. 528-542. He also wrote a number of treatises, the titles of which Leclerc gives from Ibn Abī Usāfībī. In the Library at Bankipore, there is a copy of his Kitāb al-Muḥāṣṣāfīūr. Bibliography: Fihrist, p. 295; Ibn Abī Usāfībī, i. 175 sqq.; Ibn al-Ḳiftī, Tārīkht al-Ḥumān, ed. Lippert, p. 380 sqq.; Brockelman, Geschichte der arab. Litt., i. 232; Steinschneider, Die arab. Übersetzungen aus dem Griechischetc., in Verzeichn. Archiv, vol. 124; Catal. Bankipore, iv. no. 1.

IBN MĀṢAWĪ, 'Abd Allāh, ghaffīl b. Ḥaṣīr b. Shāmī b. Fār b. Makhūm b. Ṣāhīla, Kāhil b. al-Ḥāṣīrī b. Tamīm b. Sa'd b. Ḥuṣainī, a Companion of the Prophet. Like many of Muhammad's first adherents he belonged to the lowest stratum of Meccan society. As a young man he herded cattle for ʿOkba b. Abī Muʿāṭ; Sa'd b. Abī Waḳkās at a later date in a polemic calls him a Ḥuṣainī slave (Ṭabarî, i. 251). He is usually described as a client (kāfīf) of the Banū Zubā; his father is also so described. Nothing more is known of the latter; 'Abd Allāh's brother ʿOqba and his mother Umm 'Abd bint 'Abd Wadd b. Sawā belong to the older Ṣaḥāba so that he is called by al-Nawawī (ed. Wustenfeld, p. 370) Ṣaḥābī b. Šaḥābīya. His conversion is given as a miracle. When Muhammad and Abī Bakr were fleeing before the heathens (on what occasion is not stated), they met 'Abd Allāh who was herding sheep. Their request for some milk was refused out of conscientiousness. Muhammad then took a ewe lamb and stroked its udder which yielded an abundant flow of milk; he then made it resume its former size. 'Abd Allāh is regarded rightly as one of the first converts; he was fond of calling himself the "sixth of six" (Muslims); according to other traditions, he was converted before Muhammad entered the house of Arkam, or even before 'Umar. He is said to have been the first to recite the Kur'ān openly in Mecca, although his friends found him unfit for the task, as he did not have his clan with him for protection; he was therefore badly received. Of course he went to Abyssinia, according to some traditions. A Latin translation, attributed to Ibn Māṣawī, he used to be so often entering Muhammad's house with his mother that strangers thought they were members of the family. But 'Abd Allāh was only the faithful servant of the slippers, the cushion, and the dung hill". He imitated his master in externals; but was often mocked for his thin legs. He wore his red hair, which he did not dye, very long; this peculiarity as well as his white garments and his constant use of scent are probably to be attributed to religious views. He laid great value on the past and fasted relatively little to preserve his strength for the divine service. He took part in all the muṣḥāḥid; at Badr he cut off the head of the severely wounded Abū Dājīl and carried it in triumph to his master. He
was also one of those to whom Paradise was promised by the Prophet. When Abū Bakr during the Ridda thought it necessary to make Medina capable of defence, ‘Abd Allāh was one of the men chosen to guard the weak points of the town. He was also present at the battle of the Yarmūk. He was naturally as little fitted to rule as any other representative of the pious of Medina. ‘Omar sent him to Kufa as administrator of the public treasury and as a teacher of religion. He was much consulted on account of his knowledge of the Kurān and Sunna; he is said to be the authority for 848 traditions; it was a peculiar feature of his that in giving information about the Prophet, he trembled, the sweat even broke out on his forehead and he used to express himself with great caution, less he should say anything incorrect. His authority is relied upon for a mild interpretation of the interdiction of wine (Goldzahier, Fortschriften, p. 63, and ‘Uyūn al-‘Abbār, ed. Brockelmann, p. 373 13). The accounts of his end are contradictory. It is said of him that he was dismissed of his office in Kufa. When the news came, the people wished however to keep him. He then said: “Leave me; if there must be offences (fiyān), I will not be the instigator of them” (cf. Matthew, xviii. 7). He is said to have returned to Medina and to have died there in 32 or 33 A.H. over 60 and to have been buried by night on the Bākī al-Gharqad.

When ‘Uthmān visited him on his deathbed and solicitously asked how he was and what were his desires he is said to have given answers which are typical of ancient piety. He appointed al-Zubair his executor and expressed a desire to be buried with al-Abbas and property with al-‘Abbās. According to others, however, he died in Kufa and was not dismissed from office in 26 along with Sa‘d b. Abī Waqāṣa by ‘Uthmān.

‘Abd Allāh is best known as a traditionist and authority on the Kurān. His traditions are collected in Masnad Ahmad, i. 374—446.

Wiensink.)

**IBN MISKAWAIH** (properly MUSHKIRGAY, ABD ‘ALI AHMAD B. MUḤAMMAD B. YĀKŪR, PHILOSOPHER AND HISTORIAN; Yākū simply calls him Miskawaih, without ibn, and says that he was a Magian converted to Islam, which can hardly be correct in view of the name of his father and grandfather and his mistake is probably due to his wrongly giving the name Miskawaih to the philosopher instead of his grandfather. The latter may really have been a converted Magian. Little is known of his career. We know that he was secretary and librarian to the vizier al-Muhallabi [q. v.] and afterwards enjoyed the favours of the vizier Ibn al-‘Amid [q. v.], and his son Abu l-Fahīm in the reigns of the Bayyids ‘Adud al-Dawla and Ṣamsam al-Dawla, and held an influential position in al-Ra’i. At first he seems to have been much occupied with philosophy, medicine, and alchemy; his history called Tadżīri al-Camān (a complete edition in a photographic reproduction is appearing in the Gibb Memorial Series, vii., under the editorship of L. Caetani; de Goeje edited a portion in 1871, Fragmenta Historiorum Arabicum, ii.), comes down to 369 (979-980), although Ibn Miskawaih lived till 421 (1030). He carried on a literary correspondence with Abū ‘Īyān [q. v.] and al-Ḥanḍāfī [q. v.]. Ibn al-Kifīf [q. v.] gives the titles of his writings on medicine. But he was mainly concerned with ethics and wrote several works on this subject, of which we may here mention the Taḥābīh at-Talāik wa-Tā‘īlī al-Myrak, ed. Constantinople 1299, 1299, Cairo, 1307, and a collection of ethical aphorisms by Persian, Indian, Arab and Greek sages, the first part of which is based on the Persian Ṭabrā’īn al-Khīd ("eternal reason"). A Persian lithographed edition was produced in 1246 by Sīra ‘Umarī. A Spanish translation of Lorenzo 1593. On the Persian Ṭabrā’īn al-Khīd cf. Fath al-Mahṣūr, ii. 17 sqq., and Instr. Instr. Instructs in Zapalova, Vost. Ost. Imp. Arch. Ob. Vol. xvii. 180 sqq., and in Sasaniskie Stili, p. 22 sqq. A general appreciation of Ibn Miskawaih’s philosophical works, in de Boer, History of Philosophy in Islam, p. 128 sqq.

**IBN AL-MUṢAKKAṽ** (properly MUSHKIRGAY, ABD ‘ALI (afterwards MUḤAMMAD), the “son of the cripple”, an Arab author of Persian origin, whose real name was Bāshib son of Dā‘ūn; his father, a native of Dijr (Fārāb), so correct Fihrist, i. 118) in Fārs, who was entrusted with the collection of taxes in ‘Atrak and Fārs under the governorship of al-Hādīḍijāb b. Yūsuf, was accused of extortion in the exercise of his duty; he was put to the torture and his hand remained maimed, whence his surname. His son, entering the service of ‘Īsā b. ‘Ali, paternal uncle of the Caliphs Abu l-‘Abbās al-Saffāh and al-Mansūr, adjured Māzdeism, and became a convert to Islam. He was entrusted with the drawing up of the act of amnesty accorded by the second of these Caliphs to his uncle Abū Allāh, but was accused of having cleverly turned the language in a way not entirely pleasing to his sovereign; the latter vowed vengeance and sent secret orders to Sufyān b. Mu‘awiyah al-Muhallabi, governor of Bāṣra, to put the culprit to death; his limbs were cut off one by one and thrown into a blazing furnace. Ibn al-Muṣakkaṽ’s orthodoxy was suspected and the suspicion that he continued to practise Māzdeism in secret contributed to his fall. This event took place about 139 = 757.

Ibn al-Muṣakkaṽ translated from Pehlevi into Arabic the book of Kadāla wa-Dimma, brought from India by the physician Burūzī in the reign of Khusraw I Anoshak-Rāwān (cf. the article KAL), and the Khind-Gāzān (Book of Lords), a collection of biographies of Persian kings, under the title Siyār Muḥāk al-Aghtam, which was one of the sources of the Shāhānāma of Firdawsi (many fragments in Ibn Khutayba, ‘Uyūn al-Aḥkām.

IBN AL-MUKAFFA’ — IBN AL-MUNDIRH.

al-muqaffa (transl. by O. Rescher, Stuttgart 1915) on morals, and other short treatises published at the same time as the Durra; al-Adab al-kabir was published by Aḥmad Zakī-Paša (Cairo 1330 = 1912).

Bibliography: Fihrist, i. 118; Ibn Khalikān, N. 180, transl. de Sclane, i. 431; Alżiżat al-Qur’ān, iii. 50; Muhammad b. 'Abd al-Rahmān bin Na'im, ‘Abd al-Rahmān, 24th ed. (Cairo, 1331 = 1913), p. 6 sq.; de Sacy, Callis et Donna (1816), p. 10 sqq.; Brockelmann, Geschichte der arab., Litteratur, i. 151; Th. Noldeke, Bursā’s Einleitung (Strassburg 1912); Cl. Huart, Litérature arab., p. 211, and Journal Asiatique, xth ser., t. xiv. (1911), p. 554. (Cl. Huart.)

IBN AL-MUKAFFA’, ABU ‘L-BĀGHAR, the Arab name of Severus, Monophysite bishop of Uṣumānain, a contemporary of the Coptic patriarch Philotheos (979–1003). Nothing is known of his life except that he was authorised by the Fatimid Caliph al-Mu’izz to dispute with the kādhāl on religious questions (Huart, Hist. des Arabes, i. 344). He wrote a history of the dignitaries who had occupied the patriarchal see of Alexandria, which forms the basis of Abbé Rénéoud’s Historia Patriarcharum Alexandrinarum (Paris 1713). The municipal library of Hamburg possesses the most ancient Ms. (1266) which only contains however, although in a more complete form than the usual text, the first part from St. Mark to Michael I (61–767), published in the original text by Chr. F. Seybold (vol. ii. of the Voröffentlichungen der Hamburg. histor, 1912); Brockelmann, Katal. d. orient. Hist. der Stadt, zu Hamburg, vol. i. p. xxiii. and 160 sqq.; A. v. Gutschmid, Kleine Schriften, ii. 511). Seybold had already published an edition of the text in the Corpus Script. Christian. Orientalium (Script. arabici, iii. Series, Vol. i. fasc. i et 2, Paris and Leipzig, 1904–1910), as had Evetts in the Patrologia Orientalis (Vol. i., fasc. 2, 4, History of the Patriarchs of the Coptic Church of Alexandria). The Ms. Paris Bibl. Nat., Cat., N. 503, gives the order of the patriarchs from the 4th; Mark II (790–816) to Soterios (1004–1046). His History of the first four Councils has been published in Arabic, Ethiopic, and French by L. Leroy and S. Grébaut in Vol. vi. of the Patrologia Orientalis of R. Grafin in F. Nau. It is an apology for the Monophysite doctrine. There are other works by him in Ms. in Paris and the Vatican.

IBN MUQAL, ABU ‘ALI MUHAMMAD B. ‘ALI B. AL-HASAN B. MUQAL, an ‘Abbasid vizier, born in Baghdad in 272 (886). He was first of all collector of taxes in a district of Fās, but in the middle of Rabî’ I 316 (May 928) he was appointed vizier by al-Muqtadir. After two years of beneficial activity, he was dismissed on Djumād I 318 (June 930) because he was on intimate terms with Mu‘nis, the chief of the Praetorians, whom the Caliph hated, and his enemy the chief of police, Muḥammad b. Yākūt, had him arrested and burned his house. After a considerable sum had been extorted from him, he was banished to Fās. In

Dhu ‘l-Ḥijdja 320 (Dec. 932) the Caliph al-Kāhir restored him to office. But Ibn Muqala soon began to intrigue against Ibn Yākūt and when he also planned the deposition of the Caliph, the plot was betrayed. Ibn Muqala had to save himself by flight and the vizierate was given to his secretary Muḥammad b. al-Kāsim. After his fall he conducted a vigorous campaign for the deposition of al-Kāhir and wandered about the country in disguise, stirring up hatred of the Caliph. When al-Ra‘ūf ascended the throne in Dijmād I 322 (April 934), Ibn Muqala was appointed by him vizier; the real ruler however was the commander-in-chief of the army, Muḥammad b. Yākūt. Although Ibn Muqala did succeed by his intrigues in overthrowing the powerful favourite of the Caliph in the following year, as a result of an unfortunate campaign against Moṣal, where the Hamdānid ʿAbn b. Aḥī ‘L-Ḥajjā‘ ʿAbd Allāh had set himself up as a usurper, he was at the same time preparing his own fall. In the middle of Dijmād I 324 (April 936) he was attacked and taken prisoner by al-Muẓaffar b. Yākūt, Muhammad’s brother. The Caliph was forced to approve and the vizier was dismissed, but received his freedom on payment of 1,000,000 dinārs. After a few years, he was appointed vizier, in name at least, for the fourth time [see Ibn al-Furat, 3].

But when he began to intrigue against the powerful ‘Amir ‘Imārā Muhammad b. Ratki, the latter learned of it and had him seized in Shawwāl 326 (Aug. 936) and frightfully mutilated. According to the usual statement, Ibn Muqala died in prison on Shawwāl 10th 328 (15th July 940). He was also known as a scholar and as one of the founders of Arab calligraphy.

(K. V. Zetterstéen.)

IBN AL-MUNDIRH, ABU BAKR, chief of the stables and chief veterinary surgeon to Sultan al-Nāṣir b. Kalāmīn, died 741 (1340) author of the Kitāb al-Sitt’mat al-Ba’thara wa-l-Zarqā‘a (or Kāshf al-Wāli fī Ma‘rīfat Amrād al-Khaṭīb), which is called al-Nāṣirī in honour of the Sultan and is usually quoted by this name. M. Perron has translated it with a full introduction in a volume entitled: Le Nāṣirī: la perfection des arts ou traité complet d’hygiène et de bipétitation arabes, trad. de l’arabe d’Abū Bekr Ibn Bīrār. The first volume appeared in 1852, it is introductory and contains a wealth of information about the Arab horse, al-Nāṣir’s particular services to horse breeding in Egypt, and a collection of passages from the poems; the second volume (1859) is the translation of the hippology, and the third (1860) of the hippiatry. J. v. Hammer-Purgstall in his treatise Das Pferd bei den Arabern criticises the introduction in a very high-handed fashion, but did not live to deal with the others; but it may well be doubted if this critic possessed the scientific, particularly veterinary, knowledge to enable him to surpass Perron’s meritorious work. The book
is a valuable corpus of information and the first collection of widely scattered references to the horse and must form the starting point of any further work on the subject.

IBN AL-MUSLIMA, the kunya of AHMAD b. ḌOMAR (died in 415 = 1024) which was transmitted to his descendants. Another name for the family is AL al-Ḳaṭīf. This family, the members of which held the office of Raʾis was held in great honour in Baghdād. The grandson of the above mentioned Ahmad, Abuʾl-Kaṣīm Ali b. al-Ḥasan, is better known in history as Raʾis al-Ruʾāsāʾ. He acted for a time (437—450 = 1045—1058) as vizier of the Caliph al-Ḳaṭīm bi-ʾAmr Alāʾ and it was he who induced the latter to make an alliance with Toghrulbeg in order to counteract the machinations of the Fāṭimid Caliphate. This policy saved the ‘Abbasid caliphate but was fatal for its originator, for when Toghrulbeg, who came to Baghdād in 447 (1055), had to undertake a campaign against Mūṣhir in 450 = 1058, al-Basbīrī [q. v. i. 669 sqq.] seized the opportunity to have the khāṣaḥ pronounced in Baghdād in name of the Fāṭimid Caliph. Ibn al-Muslima had the misfortune to fall into his hands and was executed in the cruellest fashion in 450 = 1058, as al-Bāṣasīrī particularly hated him. His son Abuʾl-Faṭḥ al-Muṣaffar was vizier for a short time in 476 = 1083. The latter’s great-grandson, Ḍuḥṣal-Dīn Mūsā b. ʿAbd Allāh b. Ḍaḥsh Allāh b. al-Muṣaffar, held the same office under Mūṣhir for 566 to 573 (1171—8). The Caliph was at last forced to dismiss him by the Turk Kaimāz, on which occasion the Turks plundered his dwelling thoroughly; it was not till Kaimāz had to leave Baghdād (570 = 1174) that Ḍuḥṣal-Dīn was restored to office. He fell a few years later at the hands of a Bāṭini when about to undertake the pilgrimage to Mecca. Like other members of the family (ʾImād al-Dīn devotes a special chapter to him in his Ḍarūra) he was a man of great erudition and is celebrated in several of Sīūbī al-Taʾwīlī’s panegyrics.

IBN AL-MUTAZZ ʿABD ALLĀH, ABDUʾL-ʾABBĀS, poet and prince, son of the Khalīfa al-Muṭazz, was born of a slave mother in the year 247 (861). From his youth he devoted himself to literary pursuits, studying the Arabic language and literature under al-Mubarrad, Thaʿlab, and other eminent masters, with great zeal and success, and composing works in prose and (especially) poetry which attracted ever wider attention. At the court of his cousin, the Khalīfa al-Muṭʿadīd (279—289 = 892—902), he stood in high esteem, and was closely associated with the principal scholars, poets, and literary leaders of Baghdād. He had himself remote from the intrigues of the ‘Abbasid court, which during his lifetime had been passing through the worst period of its history; but when, on the death of al-Muktafi, the dissatisfaction with al-Muṭʿadīd, whom he had named as his successor, culminated in the uprising, Ibn al-Muṭazz was drawn into the conspiracy, and on the 20th of Rabīʿ I 296 (17th Dec. 906) was proclaimed Khalīfa under the name al-Muṭʿadīd. His party remained in power for only one day, however; and he, having concealed himself in a private house, was discovered after a few days and put to death (2 Rabīʿ II = 29 Dec.).

Ibn al-Muṭʿazz was one of the most important poets of the ‘Abbāṣid period. To his native talent, which included originality of a high order, he added sound learning and good taste. He did not imitate the ancient Arab poets, but could bear comparison with them in elegance of manner and purity of diction. His style, moreover, is remarkably simple and direct. His poems covered the whole range of subjects then generally recognized as belonging to the province of poetry (Diwan, Cairo, 1891, 2 vols.). They are not a small number of life high, however, reflecting all its luxury and some of its affection. A field which he cultivated especially was that of songs praising wine and celebrating drinking customs (Kitāb fuṣūl al-muḥājīf fi tabāhīr al-suwar), an anthology in which his own verses held the principal place; see Goldziher, Abhandl. zur arab. Philol., i. 166 sqq.; also Kitāb al-ṣarḥāb). His Ṭabākāt al-ḥālārū al-muḥāfiṣīn, classifying and estimating the “modern” poets, is preserved only in part. A pioneer work of considerable importance was his Kitāb al-badāʾ, a treatise on poetry. For his other works, see Ibn Khalīfa; Fikrist, p. 116; Brockelmann, Gesch. d. arab. Litt., i. 80 sqq.; and Orient. Stud. ..., Th. Nöldeke . . . gewidmet, i. 168.

IBN MUṬ’TĪ, ZAIN AL-DĪN ABŪ ʾL-HUSAIN YAHYĀ B. [ʿABD AL-MUṬ’TĪ B. ʿABD AL-NŪR AL-ZAWĀVI AL-MAGHİRĪ, known as Ibn Muṭṭī, was born in 564 (1168—9), he studied grammar and law in Algiers with Abū Mūṣā al-Dajalī and then went to the east. He spent a very long time in Damascus, where he studied under the traditionalist Ibn ʿAsākir and then taught grammar there. To earn a livelihood he also acted as a ḍāḥīd. When the Ayyūbīd al-Malik al-Kāmil visited the Syrian capital, he invited him to follow him to Egypt and appointed him professor of literature at the ʿAmr mosque in Cairo. Here he died on Monday the 30th Dhuʾl-Ḥidād 628 = 14th Sept. 1231. Ibn Muṭṭī was a Maliki in the Maghīrī, a Shāfiʿī in Damascus, and a Ḥanāfī in Cairo. He seems to have been the first to compose a poem of 1000 verses (Afṣiya) as a grammatical textbook.

His works only the following are preserved:

1. al-Durr al-Afṣiya fi ʿilm al-ʿArabīya or simply Afṣiya Ibn Muṭṭī, a grammar in 1021 verses (rādān and sarʿ musawwīd), completed in 955 (1118—1119) in Damascus, according to Hāfīẓ Khalīfa, according to others, in Cairo, ed. with notes by Zetterstén, Die Afṣiya des Ibn Muṭṭī, Leipzig 1900. 2. Kitāb al-Fuṣūl al-ḥalārū, a short grammar in prose, Berlin, Vers. No. 6556; Bodleiana, Cat., ii. 247, iii. 3. al-Badīʿ fi Sināʿat al-ʿSiḥr, poetical verses in verses, Fleischer, Die Refaiey, No. 246.

Litt., i. 302 sq. (Molt, Ben Chener).

IBN NUBATA, the name of two Arabic authors.

1. 'Abd al-Rahman bin Muhammad bin Ismail al-Hujjat al-Farisi, born in 335 = 946 in Mayyafarihin, lived at the court of Saif al-Dawla in Halab as a preacher and died in 574 = 984 in his native town. His sermons (hujab), mainly short, in rhymed prose and elegant in style, deal with questions of religion and ethics in a threefold arrangement, often with reference to contemporaries, other. They are concerned with some of his son Abu Tahir Malik (390 = 999) and his grandson Abu 'I-Faraj Tahir (abt. 420 = 1029) about 629 = 1223 and printed in Cairo, 1286, 1292, 1302, 1304, 1309, Bairut 1311.

2. His descendant Muhammad bin Muhammad bin al-Hasan, 'Abd al-Din, Abu Bakr al-Kuraishi al-Munawi, born in Rabbi 686 = April 1287 at Mayyafarihin, lived in Damascus after 716 = 1316, from there often visited the learned Ayyubid prince Abu 'I-Fida' in Hamah, migrated in Rabbi 716 = Jan.-Feb. 1360 as secretary to Sultan al-Nasir Hasan to Cairo and died there in Safar 786 = October 1366. As a poet he cultivated besides the panegyrical kashf of short poems, which Ibn al-Djuzayi in Ibn Batutta (ed. Paris), i. 41, 17, thought very highly of. His Divan of which there are several recensions (cf. Rue, Suppl. to the Cat. of the Arab Mus. in the Brit. Mus., Nv. 1056) was printed at Alexandria n.d., Cairo, 1323 = 1905. His panegyric and rhetorical works are given in Brockelmann, Geschichte etc., ii. 11, where No. 13 should be deleted and Zahr al-Manu'llar added, on letter writing, Brit. Mus. Or. 5656, see Descriptive List, etc., p. 64.

Bibliography: al-Subki, Tabaqat al-Shafi'iyya, vi. 31; al-Suyuti, Himm al-Muhaddara, i. 329; Orientalia, ii. 419; Wundenfeld, Geschichts- schreiber, p. 430; M. Hartmann, Minhwa'da, p. 42. (C. Brockelmann)

IBN NUDJAIM, Zain al-'Abidin bin Ibrahim bin Nadjaim al-Misri, was one of the distinguished scholars of the Hanafi school in the 9th (xviiith) century, whose writings on Islamic law are well known and popular in the east. He died in 970 (1562). Of his works we may mention the principal ones: 1. Al-Aqahab wa 'I-Nasirir al-fikha 'ala Madhab al-Hanafiya, printed at Calcutta in 1826; 2. al-Badr al-ru'yi, a commentary on al-Nashafi's well known book Kans al-Da'hat, printed at Cairo in 1311 (1893) 8 vols.; 3. Al-Fatwaiy al-Fikha 'I-Pisht al-Hanafiya, a collection of fatwas published after his death by his son Ahmad (cf. W. Pertz, Die Arabischen Histor. zu Gotha, ii. p. 351 sqq.). See also C. Brockelmann, Geschichte der arab. Litteratur, i. 310 sqq. (Th. W. Junboll).

IBN RA'IK, Abu Bakr Muhammad, Amir al-Umar. In 317 (929-930) Ibn Ra'ik was appointed prefect of police in Baghdad along with his brother

urahim. Both were dismissed in the following year but Muhammad b. Ra'ik received his office back in 319 (931-2), while Ibrahim b. Ra'ik was appointed at the same time high chamberlain. After the murder of al-Mu'tadid in 320 (932) the two brothers fled with others to al-Madina and thence to Wasiit, and after al-Ra'isi became Caliph in 322 (934) he appointed Muhammad b. Ra'ik governor of Wasiit and Bayda. Towards the end of 319 (Nov. 936) the latter was summoned to Baghdad and given the highest military and civil authority with the title Amir al-Umar. In order to overthrow the powerful general Belqiskin (q.v.) in Wasiit (7th c.) in 320, he entered into negotiations with 'Abd Allah al-Baridi [v. AL-BARDI] and promised him the governorship of Wasiit after the fall of Belqiskin. But al-Baridi was defeated; Belqiskin entered Baghdad in Dhu'l-Qa'da 326 (Sept. 938) and was appointed Amir al-Umar, while Ibn Ra'ik had to go into hiding and al-Baridi was given the governorship of Wasiit. After Belqiskin accompanied by the Caliph had set out for the Hamdansid, Ibn Ra'ik appeared in the capital, but promised to withdraw if he received the governorship of Harran, al-Rahia, and Khinnis along with the districts on the upper Euphrates and the frontier fortresses, which was granted him. As he invaded Syria the Ikshid Muhammad b. 'Uthaimin sent an army against him in 328 (939). The details are variously given; in any case, after some time peace was made according to which the Ikshid retained Egypt and Ibn Ra'ik had to content with Syria as far as al-Ramlia. Quarrels soon broke out between the Turks and the army of Baghdad; the latter won the upper hand and the caliphate's captain Kirthegin was appointed Amir al-Umar. To get rid of him, al-Muttaqi appealed to Ibn Ra'ik. In Ramadhan 329 (June 941) the latter set out from Damascus. He met Kirthegin at 'Utkar and after several days fighting entered Baghdad. When Kirthegin appeared with his troops in Baghdad he was defeated and captured whereas the Caliph again gave Ibn Ra'ik the rank of Amir al-Umar. In the meanwhile al-Baridi had seized Wasiit. In Muhraran of the next year Omar b. Hassan set out against him but a peaceful arrangement was come to and al-Baridi promised to pay an annual tribute for Wasiit. Soon afterwards the Turks deserted Ibn Ra'ik and when trouble broke out in Baghdad on account of famine and scarcity, al-Baridi sent his brother Abu 'I-Husain with an army against the capital. The Caliph and the Amir al-Umar had to take refuge with the Hamhansids of Mosul and in Rajab 330 (March--April 942) Ibn Ra'ik was slain.

IBN RASHID, the name of the Wahnabi rulers (Sayyid al-Ma'ali) of Idayal Shammar in Najd. The founder of the dynasty was:

1. 'Abd Allah b. Ali al-Rashid of the Djafar clan of the Shammar tribe of al-'Abda, 1250—1263 (1835—1847). In 1835 he seized the town of Harr and deposed Shaikh Suhayl of the Idayal family, which had previously ruled the Djabal Shammar
under the suzerainty of the Wahhābī princes of Dar-ṣiya [q.v.] and Riayd. He was recognised by Faisāl, Amir of Riayd, who, according to tradition owed his throne to him, and with the help of his brother, Obād, succeeded in maintaining and extending his rule. In 1838 at the same time as Faisāl, Amir of Riayd, was expelled and replaced by Khālid [cf. Ibn Saʾūd under viii and ix] the Djabal Shammar was also occupied by Khūrshīd Pasha and ʿAbd Allāh banished. After the departure of the Egyptians in 1841, ʿAbd Allāh regained his kingdom. On his death he was succeeded by his son.

II. Ṭalāl b. ʿAbd Allāh, 1263–1283 (1847–1867); he subdued the oases of al-Djūf (Dawmat), Khāibār, Taimā and a portion of al-Kaṣīm and was able to keep the predatory Bedouins in check. By these and other clever measures he brought peace and prosperity into the land ruled by him. His dependence on Riayd, which had become loose even in ʿAbd Allāh’s reign, became limited to occasional military service; payment of tribute was replaced by more or less regular presents of horses. Talāl was also on good terms with Egypt, the Porte and Persia; Palgrave (1862–1863) and Gurnani (1864) were able to travel in his county in his reign; he committed suicide according to Huber in Safār 1283 (June–July 1866), according to Euting on the 17 Dhu ‘l-Kaʿda 1284 = 11th March 1868.

III. Mitʿab, 1283–1285 (1867–1869), Talāl’s brother, who succeeded him, was treacherously murdered before he had occupied two full years on the 2nd Rabīʿ II 1285 = 4th January 1869 (Huber; according to Euting, 2nd Rabīʿ II 1285 = 23rd July 1868) by his nephews Bandār and Badr, Talāl’s sons.

IV. Bandār, the usurper, 1286–1289 (1869–1872) was in his turn disposed of along with his brothers and nephews by his uncle Muḥammad.

V. Muḥammad b. ʿAbd Allāh b. Rashīd, 1289–1315 (1872–1897), next to his brother, Talāl, the most vigorous ruler of the Shammar dynasty, continuing the wise policy of his great predecessor strengthened the rising kingdom at home and abroad. Favoured by the Porte, he not only made himself independent of the Amirs of Riayd but in 1891 he occupied Riayd and combined the two rival kingdoms under his own sway. During his reign European travellers repeatedly visited the Djabal Shammar (Doughty, Mr. and Lady Anne Blunt, Huber, Euting, and v. Nolde); he died in the middle of December 1897 without issue and left the kingdom to his nephew.

VI. ʿAbd al-ʿAzīz b. Mitʿab 1315–1324 (1897–1906). The latter came into conflict with the powerful Shīkh Mubārak of Kuwait, the protector of the princes of Riayd dispossessed by Muḥammad b. ʿAbd Allāh and a fierce battle took place at al-Ṭurīfya in 1318 (1901), in which ʿAbd al-Raḥmān b. Faisāl and the Muntashī Shīkh Saʿīdīn fought on the side of Mubārak. In February 1902 ʿAbd al-ʿAzīz b. ʿAbd al-Raḥmān of the dynasty of Ibn Saʿūd took the town of Riayd and maintained himself there against the attacks of ʿAbd al-ʿAzīz of Djabal Shammar. The latter was finally forced to call in the help of the Turks (1322); he fell in a night battle with his enemy on the 18th Safār 1324 (13th April 1906). His son and successor.

VII. Mitʿab b. ʿAbd al-ʿAzīz was murdered in Dhu ‘l-Kaʿda 1324 (Dec. 1906–Jan. 1907) according to another account in Shābān 12th by VIII. Sulṭān b. Ḥamūd, a grandson of Obād, young brother of ʿAbd Allāh (I above); after reigning a few months, Sulṭān was disposed of in the beginning of 1326 (Feb. 1908) by his brother IX. Saʿūd b. Ḥamūd who was in his turn speedily made away with by Ḥamūd Ibn Subḥān, who placed the sole surviving son of ʿAbd al-ʿAzīz (VI), X. Saʿūd, on the throne on the 17th Shābān 1326 (14th Sept. 1908); and since then Saʿūd has been reigning with full recognition in the Djabal Shammar.

Bibliography: the travellers mentioned in the article Ibn Saʿūd (particularly, Wallin, Palgrave (Vol. i.), Gurnani, Doughty, Lady Anne Blunt, Huber, Euting, v. Nolde); articles in the Turkish, Arabic and Anglo-Indian Press; notes supplied by Miss Gertrude Bell and J. A. Madīk.

Notes:

**IBN RASHĪK**, ʻAbd ʻAl-Ḥasan b. Rashīk al-ʻAzdī, whose father was perhaps of Greek origin but a client of the Aṣzū, born at al-Muḥammadīya (al-Masila) in Algiers about 385 (995) or 390 (1000). He studied first in his native town where he learned his father’s trade of a jeweller, but went to Ḳairawān in 406 (1015-16) and was appointed court-poet by the Ḳālid Caliph al-Muʻizz. This appointment earned him the enmity of his contemporary ʻAbd Allāh Muḥammad b. ʻAbd Sa‘īd b. Ahmad, known as Ibn Ṣharaf al-Ḳairawānī, who was also a poet and man of letters. This quarrel which resulted in the publication of several of their works finally induced Ibn Ṣharaf to migrate to Sicily. When Ḳairawān was plundered in 449 (1057) of the Arabs, al-Muʻizz fled, accompanied by his favourite poet, to al-Maḥdiya, where he died in 453 (1061). Ibn Rashīk went in the same year to Mazara in Sicily, where he died in the night of Friday/Saturday 1st Dhu ’l-‘Aṣır 456 (15/16 Oct. 1064), according to others in 453 (1060-1061).

(Moh. Ben Cherif.)

IBN AL-RĀWANDĪ. [See Al-Rawandi.]

IBN ROSTA, Abū ʿAli Ahmad b. ʿOmar, an Arab-Persian scholar of the second half of the 9th (ixth-xith) century. Almost nothing is known of his life. He lived in ʿIsāfūn, where several persons were known as scholars under the name Ibn Rosta. In 930 (903) he visited Medina on the occasion of the pilgrimage. About the same time he wrote his Kitāb al-Aḥāf al-Nafṣīma: of this only the seventh part (ed. by de Goeje, Bibl. Geogr. Arab., v. 1, Leiden 1892) has survived; in it after an introduction on the celestial sphere and the terrestrial globe he proceeds to describe lands and cities. He took his material for the most part from older or contemporary works. Various extracts had previously been published by Chwlonski with Russian translation.

Bibliography: de Goeje, Præfatio to his edition; Brockelmann, Gesch. des arabischen Litter., I, 227.

(C. van Arendonk.)

IBN RŪḤ, Abū ʿl-ʾKāsim al-Ḥusayn b. Rūḥ b. Bahīr al-Bāji al-Nawawardī, third son of the expected Imām (ḡābi) al-Amr of the ʿShīa sect of the Ẓahhārīya (q. v.) during the short absence (al-ghiba al-ʿĀbī) of 264—334 (889-945). In his capacity of nāʾīb (synonymy, ʿābī, wukūf, sīsī, an-nāʾīya al-mukaddasa) he had to issue bulls (tarawīḥ) in the name of the “absent” Imām, who had legal authority among the ʿShīs. He resided in Baghdad, in the Dār al-Nāʾb. He seems to have been appointed by the previous nāʾīb, Abū Dāʾīf al-ʿUmari, before 505 (917). He won so many adherents at the Caliph’s court that the vizier Ḥamdī had him imprisoned. Released in 517 (928) he became implicated in the Karmānī schemes and laid a curse upon al-Ṣaḥmāhghāshī. He died in 526 (937) or 529 (940) after designating Abū ʿl-ʾKāsim al-Ṣāmarrī as nāʾīb. The parents of the great ʿShī theologian Ibn Bāḥyā (q. v.) claimed that they owed his birth to the prayers of Ibn Rūḥ.

IBN AL-RŪMĪ, Abū ʿAli al-ʾAbrās b. Dūrdūdī (Georgios), an Arab poet, born at Baghdad in 221 (836), as the name Ibn al-Rūmī suggests and the name of his grandfather proves, belonged to the land of the Byzantines. He was distinguished for his poetic gifts, but made many enemies by his lampoons, including the vizier of al-Maʿṭahīd, al-Kāsim b. Ḥalāl, grandson of Sulaymān b. Wahb (q. v.), who is said to have got rid of him by poisoning him in 283 (896). The date is not quite certain, for the years 284 and 276 are also given. He left a fairly extensive Divān, which was collected and arranged by al-Ṣāfī. Bibliography: Ibn Khaliḳīn, Wafīṣīṣ, ed. Wustenfeld, N°. 474; Brockelmann, Gesch. der arabischen Litter., I, 79-84.

IBN RUSHD, Abū ʿl-Walīd Muḥammad b. Ahmad b. Muḥammad b. Rushd, celebrated in mediaeval Europe as Averroes, the greatest Arab philosopher of Spain, was born at Cordova in 520 = 1126. His grandfather had been kāfī of Cordova and had left important works, while his father also held the office of kāfī. He studied law and medicine in his native town; one of his teachers was Abū Dāʾīf Ḥāfīz of Truxillo. He lived in 548 = 1153 in Marrākush, whether Ibn Tufail (q. v.) had probably induced him to go. The latter introduced him to the Almohad Abū Yaḥyā Yūsuf who became his patron. An account of this interview is preserved (see Hicr. de los Almohades de Marrakesh, transl. by Fagnán). The Caliph asked Ibn Rushd what was the view of the philosophers on heaven (the universe), whether it was an eternal substance or had a beginning. "It was so overcome with terror" says Ibn Rushd "that I could not answer". The Caliph put him at his ease and began to discuss the question himself by exploding the views of various scholars with an intimacy and learning rare among princes. The Caliph then dismissed him with rich presents.

It was Ibn Tufail who advised Ibn Rushd to comment on Aristotle and told him that the commander of the faithful often lamented the obscure language of the Greek philosophers or rather of the available translations and that he (Ibn Rushd) ought to undertake to explain them.

In 565 = 1169 he became kāfī of Seville and two years later kāfī of Cordova. In spite of the burden of work of this office he composed his most important works in this period. In 578 = 1182, Ibn Yūṣūf summoned him to Marrakush as his physician to replace the aged Ibn Ṭufail, but soon afterwards sent him back to Cordova with the rank of chief kāfī.

At the beginning of the reign of Yaḥūb al-Manṣūr, Yūṣūf’s successor, Ibn Rushd was still in favour with the Caliph, but he fell into disgrace as the result of the opposition of the theologians to his writings and after being accused of various heresies and tried, he was banished to Lucena near Cordova. At the same time, the Caliph ordered the books of the philosophers to be burnt except those on medicine, arithmetic and elementary astronomy (about 1195). Duncan Macdonald observes that these orders of the Almohad ruler who had hitherto encouraged philosophic studies, were probably a concession to the Spanish Muslims, who were much more orthodox than the Berbers. At the time the Caliph was actually waging a religious war against the Christians in Spain. On returning to Marrakush he raised the ban and recalled Ibn Rushd to his court (D. Macdonald, Development of Muslim Theology, New York 1903, p. 255).

Ibn Rushd did not long enjoy the restoration of his fortunes for he died soon after his return to Marrakush (10th Safar 595 = 10th Dec. 1198) and was buried near the town outside the gate of Tagaṭṭāt.

A great part of the Arabic original of Averroes’
works is lost. There have survived in Arabic his Tahāfut al-Tahāfut, the "Collapse of the Collapse", an answer to Ghazâlî's celebrated Tahāfut al-Fālāṣīfā, "Collapse", or perhaps "Collapse of the philosophers" (cf. Miguel Asin y Palacios, Sur le Sens du mot "Tahāfut" dans les œuvres d'al-Ghazâlî et d'avreroes in Revue Africaine, 1906, No. 261, 262, particularly p. 202), also the medium commentaries on the Poetics and Rhetoric of Aristotle (ed. and transl. by Lasinio); the exposition of fragments of Alexander of Aphrodisias on the Metaphysics (s. J. Freudenthal and S. Fraenkel, op. cit.); the large commentary on the Metaphysics in Leiden (Cat. Cod. orient., No. MMXXXCI); small commentaries at Madrid Kitāb al-Qazwīnī (Guillaume Robles, Catálogo... Bibli. Nacion., No. 37; cf. H. Derenbourg, Notes sur les mus. aráb. de Madrid, No. 37, in Homenaje á D. Franc. Codera, p. 577 sq.) referring to Aristotle's treatises De Physica, De Coelo et Mundo, De Generatione et Corruptione, De Meteorologia, De Anima, and certain mathematical propositions; cf. also Derenbourg, Le commentaire aráb. d'avreroes sur quelques petits écrits physiques d'Aristote in Arch. für Gesch. der Philos., xviii. (1905), p. 250, and lastly two interesting treatises on the relations between religion and philosophy (discussed by Léon Gauthier and by Miguel Asin). One of these writings is entitled Kitāb Faṣl al-Maḥbūl and vigorously champions the agreement between religion and philosophy, the other is called Kitāb Ḳahl al-Manahīj, etc. Both works were edited and translated into German by M. J. Müller (see Bibl.) and printed at Cairo under the joint title Kitāb Falsafat Ibn Rushd (1313, 1328). There also exists in Arabic in Hebrew character an abstract of the Logica, the medium commentaries on De Generatione et Corruptione, De Meteoris, De Anima, a paraphrase of the Parva Naturalia (Paris, Bibl. Nat., No. 303, 317), the commentaries on De Coelo, De Generatione and De Meteoris (Bodleiana, Cat., codd. kbr., p. 86) (Renan, Averroës, 3rd ed., p. 83).

The celebrated commentaries of Averroës on Aristotle are of three kinds or rather one in three editions, a large, medium and small edition. This threefold arrangement corresponds to the three stages of instruction in the Muslim universities, the small commentaries, are for the first, the medium for the second and the large for the third year. The exposition of the 'aḵāḍa is similarly arranged.

We possess in Hebrew and Latin translation the three commentaries of Averroës on the Second Analytics, the Physics and on the treatises of the Universe, the Soul and the Metaphysics; the large commentaries on the other works of Aristotle are lacking and no commentary on the Zoology has survived.

Ibn Rushd also wrote a commentary on Plato's Republic, and criticisms on al-Fārābī's logic and his interpretation of Aristotle as well as discussions on certain theories of Avicenna and glosses on the 'Aḵāda of the Mādhī Ibn Tūmar. He also wrote several legal (Kitāb Idāyat al-Muqāṭāt wa-Nīḥāyat al-Muqāṭād, Cairo 1329), and astronomical and medical works. His work on the 'whole art of medicine', al-Kulliyāt (codd. Granada, s. Dossi, Zeitshr. der Deutsch. Morgenl. Ges., xxxii, 1882, p. 343; Petersburg, Dorn, Cat., No. 132, and probably Madrid, Robles, Cat., No. 132; cf. H. Derenbourg, Notes etc. No. 132, Homenaje, p. 587 sq.), corrupted in the Latin translations to Colleget, enjoyed a certain renown in the middle ages, but cannot be compared with the Canon of Avicenna.

The philosophy of Averroës cannot be considered original (cf. Renan, Averroës, p. 58). It is rather the philosophy of the Hellenising school of the Fālāṣīfā (cf. Fālāṣīfā, ii. 397) which had already been taught in the east by al-Kindī, al-Fārābī, and Avicenna and in the west by Ibn Bāḏjījī. On some points, however, he controverts the views of his great predecessors but these points are only subsidiary and on the whole his philosophy runs on the same lines.

He owes his fame mainly to his acute analysis and his gift of annotation, qualities which we can hardly appreciate accurately at the present day on account of the differences in our mode of thought, our methods and scientific resources, but they were all the more appreciated by the scholars of the middle ages, notably in Jewish and Christian circles. His commentaries aroused great admiration, even among theologians who saw in his system a danger to faith.

The school of philosophers had already been vigorously attacked by the theologians in the Muslim east. The Tahāfut of al-Ghazâlî directed mainly against al-Fārābī and Avicenna is the most important memorial of this struggle in the east. In the west the school was first attacked by the Muslim theologians of Spain, and later by the Christian theologians also after the commentaries of Averroës had been made known to them in translations. In the 13th century Ibn Rushd was condemned by the bishops of Paris, Oxford and Canterbury for reasons similar to these that had earned his condemnation by the orthodox Muslims of Spain.

The main doctrines of Ibn Rushd's system, that brought the charge of heresy upon him, concern the question of the eternity of the world, the nature of God's apprehension, and His foreknowledge, the universality of the soul and of the intellect, and the resurrection. Averroës may easily appear heretical on these doctrines; he does not deny dogmatism but proclaims it in such a way as to bring it into conformity with philosophy.

Thus in the doctrine of the eternity of the world he does not deny the creation but only gives a rather different explanation from the theological one. For him there is no creation ex nihilo once and for all, but rather a creation renewed from moment to moment whereby the world is maintained and changes. In other words: a creative power is perpetually at work on the world, maintaining and moving it. The constellations in particular exist only through motion, and the motion is not due to any motive force which is acting on them from all eternity. The world is eternal but in consequence of a creative and moving cause: God is eternal and without cause.

In the chapter on the apprehension of God Ibn Rushd repeats the principle of the philosophers that "the first principle only apprehends his own being". According to that school this presupposition is necessary in order that the first principle may retain its unity, for if he recognised multiplicity of being, he would himself become multiple. Interpreted strictly according to this principle, praevalent must live entirely within himself and have knowledge of his own existence only
and foreknowledge would then be impossible. The theologians endeavoured to force the philosophers to this conclusion.

But Ibn Rushd's system has more elasticity. He grants that God in His own essence knows all the things of the world. But His knowledge is neither to be called particular or universal and is therefore not like man's knowledge, but rather of a higher kind of which we can form no conception. [Cf. Falsafa, ii. 50.]. God's knowledge cannot be the same as that of man's, for God would then have 'sharers' in his knowledge and He would no longer be the one God. Moreover God's knowledge is not like man's knowledge derived from things, nor is it produced by them. On the contrary, it is the cause of all things. Therefore the assertion of the theologians that the system of Averroes denies fore-knowledge is incorrect.

Concerning his teaching regarding the soul, Ibn Rushd has been reproached with teaching that the individual souls after death pass into the universal soul, and thereby denying the personal immortality of the soul of man. But this is not at all correct. The soul must be distinguished from the intellect in Averroes' system as well as in the systems of other philosophers. The intellect is quite abstract and immaterial and only exists in reality when it is associated with the universal or active intellect. What we call intellect in the individual is strictly a faculty for grasping the ideas that come from the active intellect, a faculty to which the name 'passive' intellect is given and which is not permanent by itself. It must realise itself and become the 'acquired' intellect (intellctus adepitus). Then it is bound up with the active intellect, in which the eternal ideas rest, and merged into it this faculty becomes itself eternal.

It is not the same with the soul. This with the philosophers is the driving force which effects the life and growth of organic bodies. It is a kind of energy which gives life to matter not free from the qualities of matter like the intellect, but on the contrary closely associated with it. It perhaps may even consist of a kind of half or very fine matter. These souls are the form of bodies and are therefore independent of the body, but continue to exist after the death of the body and can remain individual.

The latter according to Averroes is a bare possibility. He does not believe that a convincing proof of the immortality of the soul so conceived can be established by purely philosophical means. The task of solving the question is left to revelation. (See Zahafat al-Thalifif, p. 137.)

The theologians have further charged Averroes with denying the resurrection of the body. Here also his teaching is rather an exposition than a denial of the dogma. The body which we shall have in the next world is according to him not the same as our earthly body, for what has passed away is not re-born in its identity. It can at best appear again as something similar. Averroes moreover remarks that the future life will be of a higher kind than earthly life; bodies there will therefore be more perfect than in this world. For the rest, he disapproves of the myths and representations which are made of the life in the next world.

As this philosopher was more attacked by orthodoxy than his predecessors, he made more definite pronouncement than they on the relations between philosophical research and religion. He expounds his views on this subject in the above mentioned works Faṣl al-Maḫālī and Kūṣf al-Manāhiḍī. His first principle is that philosophy must agree with religion. This is an axiom of the whole of Arab scholasticism. There are in a way two truths or so to speak two revelations, the philosophic truth and the religious truth, both of which must agree. The philosophers are prophets of their class, prophets who appeal by preference to scholars. Their teaching may not contradict the teaching of the prophets in the proper sense, who appeal particularly to the people; it must rather give the same truth in a higher, less material form.

In religion a distinction must be made between the literal sense and its exposition. If for example a passage is found in the Qur'an which appears to contradict the results of philosophy, we must believe that this passage really has another than the apparent sense and seek the true meaning. It is the duty of the multitude to keep to the literal meaning; to seek the correct interpretation is the task of the learned. Myths and allegories must be understood by the people as revelation presents them; the philosopher, however, has the right to seek out the deeper and purer meaning concealed in them. Finally the learned should make it a practice not to communicate their results to the masses.

Averroes has expounded how religion must be taught according to the intellectual standard of the hearer. He distinguished three classes of men according to their mental endowments: the first and most numerous comprises those who believe as a result of preaching the divine word and are susceptible almost only to oratorical effect. The second class includes those whose beliefs are based on reasoning but only on such as proceeds from a priori premises assumed quite uncritically. The third and smallest class finally consists of those whose beliefs are based on proofs which rest on a chain of established premises. This method of coordinating religious instruction to the mental endowment of the hearer is evidence of a keen psychological insight but it may run the risk of not appearing sincere and it was natural that it should arouse the distrust of professional theologians.

Finally we do not think that Averroes was an infidel, who was trying to protect himself from the attacks of the orthodox with more or less skilful interpretations; we are inclined to think that in general agreement with the attitude of many scholars in the east he was a syncretist, who honestly believed that one and the same truth could be presented under very different aspects and who was able by his great philosophical ingenuity to reconcile doctrines which must have appeared directly contradictory to less elastic minds.

The commentaries of Averroes were translated in the xiii and xiv centuries into Hebrew by Jacob ben Abba Mari Anatoli of Naples (1232), Judah b. Salomon Cohen of Toledo (1247), by Moses b. Tibbon of Lunei (1260), Samuel b. Tibbon, Shem Tob b. Joseph b. Falaquera and Kalonymus b. Kalonymus (1314). Levi b. Gerson of Bagnois (Gersonides) wrote a commentary on Averroes just as the latter had commented on Aristotle.

In the Christian west, Michael Scott and Hermann, both connected with the House of Hohenstaufen,
began in 1230 and 1240 a Latin translation of the Arabic text of Averroes.

Towards the end of the xvth century Niphon and Zimara made some improvements in the old translations. New translations based on the Hebrew were later made by Jacob Manito of Tortosa, Abraham de Balmes and Giovanni Francesco Borelli of Verona. The two best Latin editions of Averroes are those of Niphon (1495—1497) and of the Juntas (1553).

(CARRA DE VAUX.)

IBN AL-SA'ĀṬI (the son of the clockmaker), FAKHR AL-DIN RUSHD (or RUSHDN) B. MUHAMMAD B. 'ALI B. RUSTAM AL-KHORĀSĀNAWI was born in Damascus whither his father had migrated from Khorāsān. The latter was a skilful clockmaker who made the clocks at the time of the great mosque of Damascus, at the request of the Zangid al-Malik al-造船 Nur al-Din Mahmūd (d. in Shawwal 569 = 1174); he was also learned in astronomy. Ibn al-Sa'āṭi was a physician but had also an extensive knowledge of literature, logic and other branches of philosophy, as well as in clockmaking. He was first of all vizier to al-Malik al-Fā'iz b. al-Malik al-造船 Muḥammad b. Ayūb (a nephew of Saladin) and afterwards vizier and physician to his brother al-Malik al-Muṣṭafā b. al-Malik al-造船 (d. 624 = 1227). He died in Damascus c. 1230. There still exists a manuscript of a work by him in Gotha on the construction of clocks (the Arabic title is lacking) written in Mūṣṭafārian of the year 600 (1203), in which he is mainly concerned with his father's clock which he repaired and perfected.

His brother BAKHIR AL-DIN ABU I-ḤASAN ʿALI likewise called IFFN AS-SĀTĪ was a well-known poet who died as early as 604 (1207) at Cairo; on him cf. Ibn Khalikān, ed. Wiistenfeld, p. 489.

Ẓāhir al-Jārī al-Muṣṭafā al-DIN AḤMAD B. ʿALI AL-RAGHĪBĪ, died in 604 (1205), is known by the same name; he was the author of a much used compendium of fikhr, which bears the title Majmaʿ al-Bahrain wa-Muṣṭafā l-Naṣīrīn, because it is a compilation from the Muḥṣafār of al-Kudrī (q. v.) and the Muṣāma of al-Nasāfī. On him cf. Ibn Ḫūṭūlūghaʾs Ṭabḥat al-Hanafiyya, ed. Fīgel, p. 4, and Brockelmann, e. c., i. 382 sq.

(H. SUTER.)

IBN SABĪN, ABū MUḤAMMAD ʿABBĀD AL-ḤAḲĪ, is a rabbi philosopher and founder of a Synagogue, a native of Murcia, is best known in Europe by his reply to some philosophical questions put by Frederick II to the scholars of Ceuta, where Ibn Sabīn had then lived. Cf. A. F. Mehr, Correspondence du philosophe sabbatique Ibn Sabîn avec le chevalier Frédéric II de Hohenstaufen in Journ. Asiat., Ser. vii. Vol. 14, p. 341 sqq., cf. ibid., Ser. v. Vol. i. p. 240 sqq. Ibn Sabīn died at Mecca in 668 (1269).

IBN SAD, ABū ʿABD ALLĀH, MUḤAMMAD B. SĀD B. MANṣ, is a rabbi phiλosopher and a client of the Banū Ḥāšim known as Kūčh al-Wāqīdī (several times vizier to al-造船). He studied tradition under Ḥusayn, Sulaymān b. ʿIrāq, Ibn ʿIbāy, al-Walid b. Muslīm, and notably with Muhammad b. Ṣād al-Wāqīdī (q. v.). Abū Bakr b. Abī l-Dunyā and other traditionists derived tradition from him. His great work, the Kūčh al-Tafaḥāṭ, i.e., the book of the classes, is famous and gives the history of the Prophet, the Companions and Successors down to his own time. Besides the large, Ibn Khalikān and Hādīḏ al-Khalīfā mention his smaller book of classes. When the author of the Fikhrī speaks of a Kūčh ʿAbd al-Nabī of Ibn Sād, this is probably not a separate work but the first part of the latter's book of classes, which deals with the Sirr of the Prophet. The whole work is being published under the title: Ibn Sād, Biographien Muḥammad's, seiner Gelehrten und der späteren Träger des Islams bis zum Jahre 230 der Flucht, in Vereine mit C. Brockelmann, J. Horovitz, J. Lippert, B. Meissner, E. Mitt.

IBN ŠÂDÅKA, the name of three viziers:

1. Djalal al-Dîn 'Amid al-Dawla Abu 'Ali al-Hasân b. 'Ali, al-Mustashir's vizier. In 513 (1119-20), he was appointed vizier, but in Djamâd 1 516 (July-August 1122) the Caliph dismissed him. His house was plundered and his nephew Abu l-Ridâ fled to Mosul. The office was then given to 'Ali b. Tâirî al-Zainabî and in Shawwâl (October) of the same year, to Ahmad b. Nizâm al-Mulk. When the latter demanded that Ibn Šâdåka should leave the capital, he went to Hitâdhit 'Aina to the Amir Sulaimân b. Mu'nahîrî, but in the following year he was restored to the office of vizier. When the Sâlîq al-Tâhir b. Mu'hammâd was persuaded by Dubâb b. Ṣâdâka [q. v.], to march on Baghdad to subdue the whole of 'Iraq, the Caliph set out to meet him in Sa'dâl 519 (March 1125). Toğhrul and Dubâb encamped at Djalâlîl, the Caliph and the vizier at al-Daskara, N. E. of Baghdad, Toğhrul and Dubâb, then resolved to reach Baghdad by a circular route. The latter was sent ahead with 200 horsemen and occupied the ford of the Dijâla near al-Nahrâwân; but as Toğhrul was delayed partly by an attack of fever and partly by inauditions which made him advance difficult, the Caliph succeeded in ambush him and took Dubâb by surprise. When the latter wished to come to terms with al-Mustashir, the Caliph was willing to make peace but was dissuaded by the vizier, and Toğhrul and Dubâb continued their journey on Khorsânîs to seek help from the Sâlîq al-Sulûk Sandjarî. Djalal al-Dîn Ibn Šâdåka died on Radjab 1 522 (July 1 1128).

2. Djalal al-Dîn Abu l-Ridâ Mu'hammâd, nephew of the preceding, al-Râšíd's vizier. Ibn Šâdåka was appointed vizier by the accession of al-Râshîd in 529 (1135). In the following year, when the Caliph had several high officials arrested, he sought protection with the governor of Mosul, Zânki b. Aş Şonqorî, and was able to hold his office till the deposition of al-Râshîd in Dhu l-Ka'dâ 530 (August 1136). He afterwards filled several high offices. He died in 556 (1160-1).

3. Mu'tamân al-Dawla Abu l-Kâsim 'Ali, al-Mu'âthasî's vizier. He is said to have been a very pious but uneducated man, who knew little of the duties of a vizier, although he belonged to a famous family.

IBN ŠA'ID, Abu l-Hasân 'Ali b. Musâ al-Maghribî, an Arab philologist, was born in 610 = 1214 (according to others, 605 = 1208) at Kašfî Yâshub (Alcalá la Real) near Granada and studied at Seville. With his father he made the pilgrimage to Mecca but when they arrived in Alexandria in 630 (1241-2) his father died there in 640 (1243). He himself remained in Alexandria but travelled in 648 (1250) to Baghdad and from there with Kamâl al-Dîn [q. v.] to Halâb, thence to Damascus, Mosul, Baghdad, Basra, and Mecca. He then went to Tunis and entered the service of Abu 'Abd Allâh al-Mustasîrî. In 666 (1267) he went again to the East and reached Armenia via Alexandria and Halâb, then returned to Tunis and died on returning to Damascus in 673 (1274). According to another statement, he did not die till 685 (1286) in Tunis. He wrote a history of the Magribi entitled al-Magribî fi Hulâ 'Maghrîbî, cf. K. Vollers, Fragmenta aus dem Mscricô des Ibn Sa'id. Semitistik. Studien, Heft 1; Ibn Sa'id, Kitâb al-Maghrib, e. Buch IV, Gesch. der Islîden, Textz. etc. by K. L. Tallquist, Leiden, 1899. He wrote various other works, the titles of which are detailed by Brockelmann and Pons Boëges.

Bibliographie: Brockelmann, Geschichte, etc. i. 336 sqq.; Pons Boëges, Einbau bio-bibliografico, p. 306 sqq. Cf. also the bibliographical references here and in Brockelmann.

IBN SAIYD AL-NÅS, Fath al-Dîn Abu l-Fath Mu'hammâd b. Abû Bakr Mu'hammâd al-Yâmârî al-andalûsî, an Arab biographer, born in Cairo in 661 = 1263 (according to others, in 671 = 1273), studied there and in Damascus and became a teacher of Hâdîth in the Zâhirîa at Cairo. He composed a full biography of the Prophet entitled 'Usîân al-Athâr fi ‘Ummân al-Ma'âthîs, al-Samkil wa l-Sîyar (somewhat differently given in Brockelmann, see below). He also wrote a number of chapters in praise of the Prophet, entitled Bâshîr l-Lubbî fi Dhikra l-Halâb. One of these is published by Kosegarten (Stralsund 1815) and Basset (Louvain 1886). Ibn Saiyd al-Nâs died in 732 (1334).

Bibliographie: cf. the references in Brockelmann, Geschichte etc. ii. 71 sqq. and Pons Boëges, Einbau bio-bibliografico, p. 320 sq.

IBN SARAYA [See al-Hillî]

(C. Brockelmann)

IBN SA'UD, the name of the Wahhâbî dynasty of Dar'îya [q. v.] and Riyâd, Mu'hammâd b. Sa'îd, the founder of this dynasty was a member of the Mu'âdrân clan of the tribe of Masâlîk of the Wald 'Ali, who are considered to belong to the great 'Anaza group of Arabs. His father Sa'îd ruled over Dar'îya and died in the fourth decade of the 13th century A. H., i.e. between 1277 and 1377; according to the genealogy of the Ibn Sa'îd, he left 3 sons besides Mu'hammâd: Thunayyân, Mu'âdrân and Fârîn. The suzerain of the Wahhâbîs of Dar'îya and later of Riyâd has remained in the line of Mu'hammâd b. Sa'îd to this day; the collateral lines
of Ibn Thunayyan and Ibn Mūshāri produced two usurpers (see viii. and x. below) but attained little prominence in the history of the dynasty; Fārāh and his descendants only figure in the genealogical lists. The history of the Wāhhabī kingdom of Dārīyya–Riyadh may be divided into three periods: the first runs from the foundation to the conquest of the land by the Egyptians in 1820 (Dārīyya as capital). The second covers the period from the restoration by Turki and Faisāl to the conquest by Ibn Rashīd of Iṣīlī, 1820–1886 (Kiyyād as capital); the third began with the reconquest of Riyyād in 1902.

I. Muḥammad b. Saʿūd, 1735 (37)–1766. About 1740 Muḥammad b. ʿAbd al-Wahhāb, the founder of the Wāhhabī doctrine, was driven from Ayyān where he had been active and found shelter with Muḥammad b. Saʿūd, a friend of his. The two combined to spread the new doctrine with preaching and the sword. The fighting with the surrounding towns and tribal districts began in 1159 (begins 24th Jan., 1746) and soon led to the intervention of some powerful neighbours, like the Bani Ḥahlīl of Lāḥiṣa and the Makrami of Nadjān, who were however unable to check the progress of the Wāhhabīs. The Wāhhabī pilgrims were regarded as sectarian by the Sharifs of Mecca and excluded from visiting the holy places. The reports of the Sharifs on this matter in 1162 (begins 25th Dec., 1749) brought the first news of the new sect to Constantinople. Muḥammad b. Saʿūd died in 1179 (1765–6) after reigning about 30 years.

II. 'Abd al-'Azīz b. Muḥammad b. Saʿūd, 1179–1218 (1766–1803). The first decades of his reign were passed in constant fighting with the neighbouring towns and tribes, the Bani Ḥahlīl, the Makrami, and the Muntafīs. In 1795 the Wāhhabīs stormed Lāḥiṣa and Kāfīr and thus established themselves on the coast of the Persian Gulf; the repeated attempts of the Turkish governors of Basra and Baghdad and their allies the Muntafīs to oust them from there (1797 the Muntafīs' Shaikh Thuwaini's campaign; 1798 Kīyyā ʿAli Pasha's campaign) ended unsuccessfully and led in 1799 to a six years' truce between ʿAbd al-'Azīz and the Pasha of Baghdad. The Sharif Surūr of Mecca had in 1186 (1772-3) granted the Wāhhabīs the right of entry to the holy places on payment of a tax; his successor Ghālib (from 1202) withdrew this concession and undertook unsuccessful campaigns in 1790, 1795, and 1798 to check the advance of the Wāhhabīs into the Hijāz; he had to make peace with them in 1798 and allow them to make the pilgrimage, and they in return pledged themselves not to make further raids into the Sharifs' sphere of influence. The peaceful relations with Baghdad and the Sharifs were of short duration. To revenge an attack by the Shīʿī Khazaʿlī on a Wāhhabī caravan, Saʿūd, son of ʿAbd al-'Azīz, fell upon Karbalā on the 18th Dhu 'l-Hijjād 1216 (21st April 1802), plundered and laid waste the Shīʿī sanctuaries there, and massacred most of the inhabitants. In 1214 and 1215 April 18, Ibn Saʿūd and Saʿūd b. Saʿūd made the pilgrimage; about the same time the tribes of Ṭasīr and Tiḥāma as well as the Bani Ḥarb, who had hitherto been subject to the Sharif Ghālib, joined the Wāhhabīs, which led to open hostilities. On the 25th Shawwal 1217 (18th Feb., 1803) the Wāhhabīs stormed Ṭasīr and on the 8th Muḥarram 1218 (30th April 1803) Saʿūd made his triumphal entry into Mecca. After Saʿūd's return the Sharif Ghālib drove out the Wāhhabī garrison in Mecca (22nd Rabiʿa 1218 = 11th July 1803) but was forced to make further concessions to the Wāhhabīs.

About 1800 the Wāhhabīs began to extend their power along the coast of the Persian Gulf where in the course of the next few years they subjected Bahrayn and the coast tribes, namely the Dhawasimī tribes of Ra's al-Khirāma.

On the 18th Rājdah 1218 (4th Nov., 1803) ʿAbd al-'Azīz was stabbed by a Shīʿī from Amādiya in the mosque of Dārīyya.

III. Saʿūd b. ʿAbd al-'Azīz, 1218–1229 (1803–1814). After several smaller enterprises against Baghdad and 'Oman, Saʿūd resolved to put an end to the rule of the Sharif Ghālib and occupied Medina in 1220 (1805) and Mecca in Dhu l-Ka'da of the same year (January 1806). To save the remnants of his power Ghālib submitted absolutely to the Wāhhabīs, who now introduced their teaching into the Hijāz. The pilgrim caravans equipped by the Turkish government were forbidden admission to the sacred territory, the khawba in the name of the Sulṭān abolished, and Saʿūd demanded in a formal letter that not only the governor of Damascus, but the Sulṭān himself should adopt the Wāhhabī creed. To the emphatic refusal of the Pasha of Damascus, Saʿūd replied by plundering Jawzān in July 1810. Saʿūd organised the piracy of the coast tribes on the Persian Gulf on a great scale so that the Indian Government was forced in 1809 to equip an expedition which stormed Ra's al-Khirāma on Nov. 13 of this year and destroyed the pirate fleet.

The Porte unable to defend its own territory from the attacks of the Wāhhabīs finally commissioned Muḥammad 'Ali, Pasha of Egypt, to reconquer the Hijāz.

The first campaign of the Egyptian forces under Tūsūn Pasha began with the reconquest of Yanbū al-Bahr and Yanbū al-Barr at the end of Oct., beginning of Nov. 1811; on his advance on Medina Tūsūn Pasha however was defeated on the 7th Dhu l-Ka'da 1226 = 23rd Nov., 1811 in the narrow pass of Djeidele by 'Abd Allāh and Faisāl, Saʿūd's sons, and had to retire to Yanbū. It was not till the late autumn of 1812 that he resumed operations, this time with more success; Medina capitulated in November, Mecca at the end of January 1813 and Tūsūn was stormed a few days later; on the other hand the Wāhhabīs succeeded in checking the further advance of the Egyptians at Tarāba (summer 1813). At the end of August Muḥammad 'Ali himself landed in Djjddah and Saʿūd sought in vain to negotiate peace with him. A second attempt of Tūsūn Pasha against Tarāba (at the end of 1813) was as unsuccessful as the first and the operation of the Egyptians came to an end till the beginning of 1815. In the meanwhile Saʿūd died on the 8th Djamāda 1 1229 = 27th April 1814 in Dārīyya, at the age of 66.

IV. ʿAbd Allāh b. Saʿūd, 1229–1233 (1814–1818). In the beginning of 1815 Muḥammad 'Ali resumed his march against Tarāba, defeated the Wāhhabīs at Tarāba on the 15th January and took the town; he next advanced against 'Asīr and returned via Kūnfūda to Mecca. Tūsūn Pasha entered Nadjād via Ḥanākīya in March
and seized the fortified town of al-Rass where ʿAbd Allāh b. Saʿūd met him. A longish truce followed and peace negotiations which lasted till 1816. In Sept. 1816 Ibrāhīm Pasha, son of Muḥammad ʿAlī, took over the supreme command in Arabia and lead his army amid great privations and fierce fighting for eighteen months up to the gates of Darʿīya (defeat of ʿAbd Allāh at Māwyā on 2nd May 1817, capture of al-Rass in the 21st Oct. 1817 after a three months' siege, storming of Dūmmā in March 1818). The siege of the capital defended by ʿAbd Allāh and his relatives lasted from the beginning of April to the beginning of Sept. 1818; after the town had fallen on the 6th Sept. ʿAbd Allāh held out a few days longer in the Kaşar Darʿīya and surrendered on the 9th Sept. to the victor who sent him to Cairo with his family and the descendants of Muhammad b. ʿAbd al-Wahhāb. Muhammad ʿAlī sent ʿAbd Allāh with his secretary and some Kazāri, where they were all beheaded on the 17th Dec. 1818.

V. After Ibrāhīm Pasha had left Najdī in the first half of 1819, Mūshārī b. Saʿūd, a brother of the executed ʿAbd Allāh, succeeded in establishing himself in Darʿīya; after a short time he was captured by Husain Bey whom Muḥammad ʿAlī sent against him and deported to Egypt but died on the way; the Chronicle of Rāšīd al-Ḥanbālī allots the years 1233–5 (1818–20) to his reign.

VI. Turki b. ʿAbd Allāh b. Muḥammad b. Saʿūd, 1235–1249 (1820–1834). He had fled to Sūdārī after the Egyptian invasion and endeavoured to establish himself in Riyād after the death of Mūshārī b. Saʿūd (V), but was driven out by the Egyptians. In 1822, however, he succeeded in surprising the weak Egyptian garrison of Riyād, and after fighting with varying success against the governors of the Ḥijāz, he finally agreed to pay tribute to Muḥammad ʿAlī. In 1830 he seized the district of Lāḥash which had been occupied by the Turks in 1813 and subdued Bahrāin. Riyād became capital of the new Wāḥhābī kingdom in place of the destroyed Darʿīya. He was murdered in 1240 (1834) by ʿAbd al-Raḥmān b. Mūshārī b. Ḥāsān b. Mūshārī b. Saʿūd, but the latter was attacked in Ḥufūd 40 days later and slain by Faisal, the son of VI.

VII. Faisal b. Turki, first reign 1240–1255 (1834–8). In 1837 Khālid, a son of Saʿūd (III), rose against him with Egyptian help, took Darʿīya, and defeated Faisal at Riyād. Khurshīd Pasha, the commander of the Egyptian troops, defeated Faisal a second time on the 25th Ramadān 1254 (10th Dec. 1838) at al-Delem, took him prisoner, and deported him to Egypt.

IX. Khālid b. Saʿūd, 1255–7 (1839–41). After the withdrawal of the Egyptian troops in 1840, he was driven out of Riyād by ʿAbd Allāh b. Ṭuḥnāyān and retired to Dūmmā, where he died in 1861.

X. ʿAbd Allāh b. Ṭuḥnāyān b. Ibrāhīm b. Ṭuḥnāyān b. Saʿūd, 1275–9 (beginning of 1842 to beg. 1843). After reigning barely a year he was besieged at Riyād by Faisal (VIII) who had regained his liberty in 1841, and taken prisoner. He died in confinement.

XI. Faisal b. Turki, second reign 1250–1282 (beg. 1843—beg. Dec. 1865). By a wise and peaceful policy he was able to establish the rule of his dynasty in Najdī; in his time began the rise of the Ibn Rashīd [q. v.] of Djjābil Shammar, who were his allies. He was on good terms with Egypt and the Sultan. In his reign Falgrāve visited the country in 1862–3, and Pelly in 1865. He died of cholera on 13th Radjab 1282 (2rd Dec. 1865).

XIII. Saʿūd b. Faisal b. Turki, 1287–1291 (1871–4); at the beginning of his reign the Turks, summoned by the banished ʿAbd Allāh, occupied Lāḥash as well as Kaşāf and held them in spite of Saʿūd's repeated attempts to regain them.

XIV. ʿAbd Allāh b. Faisal b. Turki, second reign, 1291–1301 (1874–1884). After Saʿūd's death he regained his throne and held it against his brother Muḥammad and Saʿūd's sons, who disputed it with him. In 1883 he was involved in war with Muḥammad b. Rashīd of Ḥaḍar and was banished by his nephews, the sons of Saʿūd, in the beginning of 1884. As a result, in 1884 Muḥammad b. Saʿūd came to the throne; his rule was of short duration: he was succeeded by his uncle.

XVI. ʿAbd al-Raḥmān b. Faisal, 1302–1312 (1885–95): he was dethroned by Muḥammad b. Rashīd, who placed on the throne.

XVII. ʿAbd Allāh b. Faisal (for the third time, 1887–1888). The latter died probably in 1888 and Rašīd then became a dependency of Ḥaḍar in spite of ʿAbd al-Raḥmān's repeated attempts to regain the vacant throne. In 1881 Muḥammad b. Rashīd conquered Rašīd and in 1892 appointed Muḥammad, the third son of Faisal, Amir of Rašīd. After the death of Muḥammad (date unknown) Rašīd seems to have been governed by Ibn Rashīd's officials.

XIX. ʿAbd al-Azīz b. ʿAbd al-Raḥmān b. Faisal, since the beginning of 1902. With the help of Shaikh Mūbārak of Kuwait, with whom his father had found a refuge, he regained Rašīd in March 1902 by a coup d'état and successfully held it against the Ibn Rashīd of Ḥaḍar, who finally called in the Turks to help them. Nevertheless, he succeeded owing to the anarchy prevailing in Ḥaḍar and with the help of the people, who were attached to the house of Saʿūd, in restoring the supremacy of the kingdom of Rašīd.

Bibliography: Rāšīd b. ʿAlī al-Ḥanbālī Muḥārī al-Waqīd fi Merṣīyāt Ansāb Muḥād Najdī (Genealogies of the Ibn Saʿūd and a sketch of their history to 1291 H.; Ms. in the author's possession); ʿUmmān b. ʿAbd Allāh b. Notes:

6. (ʿAbd al-ʿAẓīz) was 82 at his death in 1803 (Mengin, ii. 467) cf. Scott-Waring, p. 177 of the French transl.

8. (Saʿūd) 68 at his death (Mengin, ii. 20), Rousseau and Birkhardt say 45–50.

9. (ʿAbd Allāh) in 1815 brought about the truce of al-Kass (Mengin, ii. 41 sgg); his son Saʿūd was killed in 1818 after the capture of Darʿīya (ib. p. 131; Šanṭāzāḏe, ii. 383).

10. (ʿAbd al-Raḥmān) deposed to Egypt in 1818.

11. (ʿOmar) deposed to Cairo with his sons in 1818 or 1820.

12. Mengin gives a portrait of ʿAbd Allāh.

13. (Faṣāṣal) fell at the siege of Darʿīya in 1818 (Mengin, ii. 129).

14. (Nāṣir) fell on a raid against Muscat (Birkhardt, ii. 122).

16. (Saʿūd), 17. Khālid, 23. (Faḥd), 24. (Ḥāsān) deposed to Cairo in 1818.

22. (Turkī) led a raid in to ʿIrāk and Syria (Birkhardt, ii. 122).

25. (Saʿūd) deposed a fort of Darʿīya in 1818 and was deposed to Cairo with his brothers Naṣr and Muḥammad in 1818 (Mengin, ii. 130, 133, 158).

28. (Khālid) is only mentioned by Ayīḥab Šābtī, p. 266, probably a confusion with 17.

Notes:
2. (Ābī Allāh) mentioned in Mengin, ii. 482 (a. 1778) and Coranecz, p. 46 (a. 1803).
3. (Turkī), according to Blunt, ii. 269, had two other brothers, Ibrāhīm and Muḥammad.
5. (Ābī Allāh) cf. Blunt, ii. 266.
6. (Djalawī) still living in 1897; s. Doughty, ii. 428; he had five sons: Fāḥd, Muḥammad, Saʿūd, Mūṣīd, Ābī al-Muḥsin.
9. (Muḥammad), according to Nolde, p. 89, not 40 till 1892; doubtful if correct, cf. Palgrave, i. 169 sq. Doughty, ii. 430, and Huber, Journal, p. 162.
10. (Ābī al-Raḥmān), according to Palgrave (ii. 75), in 1863 aged 10–12; Blunt, ii. 267.

IBN SHADDĀD, BAHĀʾ AL-DĪN ABU ʿL-MAHĀ-SIN YΟΥCEF b. RĀFIʿ, an Arab biographer, born at Mūṣāl in 539 (1145), studied there and in Baghādād and became a professor in his native town in 569 (1173). In 583 (1188) he made the pilgrimage and on his return journey went to Damascus, where he entered the service of Shāh al-Dīn who made him Kābi ʿl-Aṣkār of Jerusalem. After Shāh al-Dīn’s death he went to Hālab in 591 (1195) and was made a kābi. He had a very influential and lucrative position at Hālab under al-Zāhir and al-Āzīz and he used it to found and amply endow madrasas. He spent the last years of his life as a private individual till his death in 632 (1234). His chief work is the biography of Saladin ed. by A. Schultens 1732–1755; oriental ed. Cairo 1317. English version by Conder, The life of Saladin by Bekh ad-din compared with the original Arabic and annotated, London 1897. Cf. also Recueil des Historiens des Croisades, Hist. Orient., vol. iii.

IBN SHADDĀD, BIZ AL-DĪN ABU ʿĀBĪ AllāH MUḤAMMAD b. ʿĀLI b. ḤIYĀHĪ, an Arab historian, often confused with the preceding, d. 684 (1285). He is the author of an important work on Syria and al-Ḥassira entitled al-ʿĀʿal al-ḥṣira

IBN SHĀKIṢR. [See AL-KUTUB.]

IBN ŚIDĀ, ABI ʿL-Ḥasan ʿĀLI b. ISMĀʿIL (or ʿAMAẓD or MUḤAMMAD) b. ŚIDĀ, philologist, man of letters, and logician, born at Murcia in Spain and died in Denia aged about 60 on Sunday, 4 days before the end of Rabīʿ II 458 = 25th March 1666.

Ibn Śidā was blind and studied with his father, also blind, who was a not unimportant philologist, Abu ʿl-ʿĀlāʾ Ṣūṭīd al-Baghdādī, Abu ʿOmar ʿAḥmad b. Muḥammad al-Ṭalamanki, Śālīḥ b. al-Ḥasan al-Baghdādi and others. He attached himself to the court of the Emir Abu ʿl-Djālsī Dschajīd b. ʿĀbī Allāh al-ʿĀmīrī and on his death to his successor, the Emir al-Muważṣā. As he had previously avoided the latter on account of a certain disdain he now sent him a long poem of apology.

We possess only three works by him 1. Kīlāb al-Mukrāṣa, a large dictionary, in which the words are arranged in groups according to definite classes, printed in 17 vols. 8 1316–1321.

2. Kit. al-Muḥṣam waʾl-Muḥṣif al-ʿAzām, like-
wise a large and excellent dictionary in which the words are alphabetically arrayed in the order of the first radical, but in this order: 'āin, ḥā, kā, ḥāl, ghain, kāf, kāf, qām, shān, šād, sinn, sin, sā, ṣay, fā, dāl, tā, ṣād, ṣād, rā, ṣād, nūn, fā, bā, mīn, hamza, yā, waw, Brit. Mus., Suppl. N° 854; Khed. Libr., Fihār., IV, 184 (incomplete copy).

(Moh. Ben Chenen.)

IBN SINĀ, Abū ʿAbd Allāh Ibn ʿAbd Allāh (Lat. Avicennæ auctore Helb. Aven Sinā), was for centuries and still is in parts of the Musulm.-east considered the prince of all learning al-Shābī, al-Raʾisī. His biography, given by Ibn Abī Qāsīb (ed. A. Müller, ii. 292) was compiled by his pupil Abū ʿAbd Allāh al-Ṭūsī and from his own notes. According to it he was born in 370 = 980 at Afschān near Buhārā. His father had moved from Bālghī to Buhārā, was appointed governor of the capital of Khurāsān, and married in Afschān. After his birth of two years the resumed his residence in Bukhārā, where the latter received their education. Up to his tenth year Ibn Sinā had a tutor in Kūrān and Adāb. He was introduced to secular learning by Ismāʿīlī propagandists who had been received in his father’s house, but their speculations on the soul and the intelligence made no great impression on him at first. After studying fiqh he was taught logic, geometry, and astronomy by Abū ʿAbd Allāh al-Nīrī. The student who developed early both physically and mentally soon overtook his teacher and studied by himself physics, metaphysics and medicine. His practice of medicine soon enabled him to understand better but metaphysics, which he became clear to him after studying one of Farābī’s works. This decided his philosophical development, al-Farābī’s metaphysical and logical speculations which originated in the Neo-Platonic commentaries and paraphrases of Aristotelian works, determined the direction of his thought. He was then 15 or 17 years of age.

At the same time the marvellous boy had the good fortune to cure the sultan of Buhārā, Nūḥ b. Maṣūr, and as a result received admission to his library. Endowed with a marvellous memory and rapid power of assimilating knowledge, in a short time he gained here all the knowledge that he required in order to systematise all the learning of his time. He began to write at the age of 21; his style as a rule is clear and comprehensive.

After the death of his father — he was now 22 — Ibn Sinā lead an unsettled life, full of work and enjoyment but also of disappointments. When at rest at the courts of Djiūrjīn, Raqīj, Hamadānī and Ṣafāshāh, he wrote his great works, of which we may especially mention the philosophical encyclopaedia, Kitāb al-Ṣāfā (Teheran, 1313), and his chief book on medicine, al-Kūhān fī l-Ṭibb (Teherān 1284, Būlāk 1294); on his travels he wrote synopses of his larger works and treatises of various kinds. Sometimes his activities were scientific, sometimes political, the latter with slight success. He is important as the universal encyclopaedist, who fixed the system of learning for centuries following.

Our philosopher spent the last years of his life under the protection of Ala’ al-Dawla in Isfāhān. On the latter’s campaign against Hamadān in 428 = 1037, Ibn Sinā fell ill on the way and died in Hamadān where his grave is still shown. His works were much read, annotated and translated into western languages. He lives in the popular tradition of the east as a magician, a kind of ‘Fried Piper’.

Ibn Sinā’s doctrines which still possess great authority in theological, philosophical, and medical circles of the east in spite of their partial reftation by al-Ghazālī, cannot be fully expounded here but only briefly indicated and characterized.

(Moh. Ben Chenen.)
In logic and epistemology he closely follows al-Farabi. This is true also of the question of universalia which is in a way of metaphysical importance. The universal is said to exist in the mind of God and the angels (spirits of the spheres) independent of the existence of the many particulars. It emanates from the divine spirit communicated by multiple intermediation on the one side to the particular things and on the other to human intelligence in which plurality is raised to a concept of unity and universality. More Neo-Platonic than Aristotelian is the view that the concept is primarily a gift of the super-human spirit rather than a product of the abstractive faculty of the human reason.

Although he expounds it fully, Ibn Sinâ only considers logic an introductory science. Philosophy proper is either theoretical or practical: the former is divided into physics, mathematics, and metaphysics, with their applications, the latter into ethics, economics and politics. Ibn Sinâ paid little attention to the practical parts of philosophical science. The series, physics, mathematics, metaphysics, marks a gradual advance from the material to the abstract. It is true that metaphysics is generally defined as the science of all being, so that immaterial being is the problem and not the direct object of this science, but this problematic becomes the main point in philosophical expositions.

Ibn Sinâ's physics on the whole is based on Aristotelian tradition, although there are also Neo-Platonic influences here: particularly for example in the doctrine that earthly happenings are influenced by the stars, not through their warmth but through the intermediary of light. Neo-Platonic also are the speculations on the intelligence, in which results his otherwise finely developed psychology.

Ibn Sinâ had most influence through his medicine, in the west down to the XVIIth century, in the east still now. He is the Arab Galen. How far he incorporated observations of his own into this science, has still to be investigated. In theory at least he gives experience a large place and discusses the conditions, under which the healing effect of a medicine shows itself.

Ibn Sinâ's paraphrase of Aristotelian metaphysics (leaving aside his little known mathematics) besides neo-Platonic elements contains an attempt at reconciliation with Muslim theology. The dualism in mind and matter (actuality and potentiality), God and world, is more marked in him than in al-Farabi, and the doctrine of the immortality of the individual souls is more clearly laid down. Matter is defined by him as possible being or merely passive possibility and creation is said to consist in granting actual existence to this possible being. Only in the Deity are being and existence one, but in all that is not the Deity, existence is an attribute of being. In theological terminology, the granting of real existence is called creation, but it is an eternal creation. God, the absolutely necessary and uniform being, is also a necessary cause, which by on its own, produces the effect, the world, is therefore eternal. In itself this is possible (contingent), from the point of view of its divine cause it is necessary. Ibn Sinâ distinguishes the contingency of this at once possible and necessary being from the contingency of all earthly happenings, that exist for a time, the sublunar world is the world of the merely possible. The metaphysical doctrine of the soul in particular induced our philosopher to mystic reflections, some in poetical form. Great danger forced him once to escape his enemies in Shi'a guise. It may therefore have been in hours of depression, that there was a necessity for him to use the language of mysticism. It is therefore an occasional mysticism which crowns the building of his system but does not carry or support it.

(T. J. De Boer.)

IBN SIRÎN, MUHAMMAD, was a contemporary of Hasan al-Bâšî [q. v.]. His father is said to have been a tinker of Djarjarjâyâ, who was carried off as a slave by Khâlid b. al-Walid from 'Āin al-Tamr. His mother 'Âṣîya was a client of Abû Bakr. Muhammad belonged to the second generation of transmitters of tradition; his authorities were Abu 'l-Mu'âzam and Abû 'l-Mu'âzam [q. v.], Anas b. Malik [q. v.], etc. He settled in Bâšâ, was noted for his ascetic piety like his sister Hâfûz (cf. Ibn Sa'd, Tabbâšt, viii. 355 sqq.), and was considered an authority on the interpretation of dreams. Treatises on the latter subject were therefore frequently written by later authors under his name, for example the Muntakhab al-Qâlâm fi Tafsîr al-'Ahlâm, Cairo 1868, and on the margin of

IBN SURAIDJ, Abu l-ʿAbbas ʿAbd al-Muʾmin B. ʿUmar B. Suraidj, was, according to the Arabic biographers, one of the greatest Shāfiʿi teachers of the third century. Many celebrated Shāfiʿis were his pupils, and he attained such repute that he was considered by many to be superior to all other Shāfiʿi students, even al-Muzani. He was kāfi in Shīrāz and wrote treatises refuting the Zāhirīs, etc. The number of his works is placed at 400, but none of them now exists. Only a few of the titles of his works are known. He died at the age of 57 in Baghdad in 306 = 918.

(TH. W. JYNBOLL.)

IBN SURAIDJ, ʿUbayd Allah Abu Yaḥyā, a Meccan singer and composer of the older Umayyad period, was the son of a Turkish slave in Mecca and a client of the Banu Nawfal b. ʿAbd Manaf, or of the Banu Ṭāhār b. ʿAbd al-Muṭṭalib. He began his career as a musician in the caliphate of Othman. He is said to have been the first to introduce the Persian lute into Mecca and to have learned its use from the Persian workmen imported by Ibn al-Zubair to rebuild the Kaʿba. When at the height of his fame he was on intimate terms with ʿOmar b. Abī Rabīʿa [q. v.] whose love poems he set to music; but he also enjoyed a great reputation as a composer of elegies. But as his art could only be transmitted orally, it was soon forgotten after his death; in the time of the singer Djiḥaṣ his tunes were only known to a few old people. He died in the reign of Hisān (105-125 = 724-743).

(C. BROCKELMANN.)

IBN AL-TĀʾĀWIDHĪ. [See IBN AL-TĀʾĀWIDHĪ.]

IBN TAGHIRIBERDĪ. [See ABU L-MAḤĀSIN.]

IBN TAMĪYA, Tākī al-Dīn Abu l-ʿAbbas ʿAbd al-ʿAlī B. ʿAbd al-Ṣalām B. ʿAbd Allāh B. Muḥammad b. Tāmīya al-Ḥarānī al-Ḥanбалī, Arab theologian and jurist, was born on Monday 10th Rabīʿ I 661 = 22 January 1263 at Ḥarrān, near Damascus. Fleeting from the exactions of the Mongols, his father had taken refuge at Damascus with all his family, in the middle of the year 667 = 1268. In the capital of Syria, the young Almohad devoted himself to the study of Muslim sciences and followed his father's lectures and those of Zain al-

In Ahmad b. ʿAbd al-Dārim al-Mukaddasī, Nādir al-Dīn b. ʿAskīr, Zainab bint Maḳkī, etc.

He was not yet 20 when he completed his studies, and at the death of his father in 681 = 1282, he succeeded him as professor of Ḥanbalī law. Each Friday he expounded the ʿUṣūl in a cathedral. Well versed in the ʿUṣūlī sciences, Ḥadīth law, theology etc., he defended the sound tradition of the earlier Muslims by arguments which, although taken from the ʿUṣūlī and Ḥadīth, had hitherto been unknown, but the freedom of his polemics made him many enemies among the scholars of the other orthodox schools. In 691 = 1292 he made the pilgrimage to Mecca. In Rabīʿ I 699 (1299) or 698 at Cairo he gave to a question sent from Ḥamā on the attributes of God, a "response" which displeased the Shāfiʿī doctors, aroused public opinion against him, and cost him his post of professor. Nevertheless he was appointed the same year to preach the Holy War against the Mongols and for this purpose went next year to Cairo. He was present in this capacity at the victory of Shākhsū, near Damascus, won over the Mongols. After having in 704 = 1304 fought against the people of Dijbāl between Ṣyrūk and Ismāʿīlīs, Ṣuṣānīs, Ḥikāmīs, who believed in the infallibility of ʿAlī b. Abī Ṭālib and considered the Companions unbelievers, neither prayed nor fasted, ate pork etc. (Marī, Kawkabī, p. 165). He went in 705 = 1306-7 to Cairo along with the Shāfiʿī kāfi, where, after five sessions of the council of judges and notables in the Shūlān's audience-hall who had accused him of anthropomorphism he was condemned to be interred with his two brothers in the dungeon (gūbā) of the mountain citadel; he remained there a year and a half. In Shawwal 707 (1308), he was examined regarding a work which he had written against the Ḥathālīyin [v. Ḥathālīyin] but the evidence he gave disarmed his enemies at once. Sent with the post back to Damascus, he was forced to return after one stage of the journey and for political reasons was imprisoned in the kāfi's prison for a year and a half, which he spent in teaching the principles of Islam to those under confinement. But after a few days of liberty he was shut up in the fortress (būḍ) of Alexandria for eight months. He then returned to Cairo where, although he refused Shūlān al-Naṣir a fattuṣ allowing him to revenge himself on his enemies, he obtained the post of professor in the school founded by this prince.

In Dhu l-ʿAqīdah 712 = Febr. 1312, he was authorised to accompany the army departing for Syria, and after going through Jerusalem, he recovered Damascus after an absence of seven years and seven weeks. He then resumed his duties as professor, but in Djamāda II 718 = August 1318, he was forbidden by royal edict to give fattuṣ on the oath of repudiation (to swear to repudiate a wife for example if something is done or not done), a question on which he had allowed himself several concessions not admitted by the jurists of the other three orthodox schools (Ibn al-Wardi, Taʿīdīr, ii. 267) who hold that he who takes such an oath, although he is bound to fulfill his contract, is liable to an arbitrary punishment.

Refusing to obey this order he was condemned to imprisonment in the citadel of Damascus. In Rabīʿ I 720 = August 1320, after 5 months and 18 days he was set at liberty by order of the Shūlān. He resumed his old habits till his enemies learned of his
fatwa regarding the visitation of tombs of saints and prophets, which he had issued in 710 = 1310, and in Sha‘bān 726 = July 1326 he was by the Sultan’s order interned in the citadel of Damascus. He was allotted a room, in which attended by his brother he devoted himself to writing a commentary on the Kur’an, pamphlets against his detractors and entire volumes on the questions which had resulted in his imprisonment. But when these works came to the knowledge of his enemies, he was deprived of his books, paper and ink. This was a terrible blow to him, and although he sought relief in prayer and the recitation of the Kur’an, he fell ill and died in twenty days in the night of Sunday—Monday 20th Dhū l-Ka‘dā 726 = 26-27 Sept. 1328. The people of Damascus who held him in great honour, gave him a splendid funeral and it was estimated that 200,000 men and 15,000 women attended his obsequies at the Sūfi cemetery. Ibn al-Wardī composed his funeral elegy.

Although belonging to the Ḥanbalī school, Ibn Taimīya did not follow all its opinions blindly but considered himself a muḍżliḥ fi ‘l-muḍzliḥ [s. MUḌṬAḤĪD]. His biographer Marī in Kawsālī (p. 184 sqq.) gives a certain number of points on which Ibn Taimiya rejected the ḥadīth [q. v.] and even the igmā‘ (consensus) [q. v.]. In the majority of his works he claims to follow the letter of the Kur’an and the Ḥadīth but he does not think it wrong to employ ḥiyā‘, reasoning by analogy (notably Maḏḏab al-Rasūl ‘l-kubrā, i. 207) in his polemics; indeed he devoted a whole rīa‘ā (op. cit., ii. 217) to this method of reasoning.

A bitter enemy of innovations (būda‘), he attacked the cult of saints and pilgrimages to tombs: did not the Prophet say: “One should only journey to three mosques: the sacred mosque of Mecca, that of Jerusalem, and mine” (op. cit., ii. 93). Even a journey solely undertaken to visit the tomb of the Prophet is an act of disobedience (maʿrū‘a) (Ibn Ḥadjar al-Albāni, Fā‘rā‘i, p. 87).

On the other hand he considered a visit paid to the tomb of a Muslim, an illicit act, following the opinion of al-Sha‘bī and Ibrāhīm al-Nakha‘ī, only if it necessitated a journey and if it had to take place on a fixed day. With these restrictions he considered it a traditional duty (Ṣāfi al-Đīn al-Ḥanafī, al-Kawsāl ‘l-jātī, p. 119 sqq.).

An inveterate anthropomorphist Ibn Taimiya interpreted literally all the passages in the Kur’an and tradition referring to the Deity. He was so imbued with this belief that, according to Ibn Baṭṭūta, he said one day from the pulpit in the mosque of Damascus: “God comes down from heaven to earth, just as I am coming down now”, and he came down one of the steps of the pulpit staircase. (cf. especially Maḏḏab al-Karā‘al-kubrā, i. 387 sqq.).

Both by word and pen he combatted all the Muslim sects, Khāridjī, Murjī‘, Ra‘fī‘, Kādirī, Mu‘azzālī, Ḥaḥāmī, Karrāmī, Aṣḥā‘ī, etc. (Kis. al-Ḥurān, passim, in the Maḏḏabī quoted, i. p. 2). al-Aswā‘ī’s dogmatism, he is said, is only a fusion of the opinions of the Ḥaḥāmis, Naḍju‘ā‘, Ibrārīs, etc. He particularly objected to the explanation given of predestination (ṣadaq), the divine attributes (ārā‘) and judgments (‘aḥkām), execution of the judgment (fīqāḥ ‘al-‘a‘dā‘), etc. (op. cit., i. 77, 445 sqq.).

In many cases he disagreed with the opinion of the principal jurists. For example: 1. He rejected the practice of taḥlīl by which a woman definitively divorced by triple repudiation (talā‘ī) could be married again by her husband after having contracted an intermediate marriage with a man who had agreed to repudiate her immediately afterwards (muḥāllīlī, he who makes permissible). 2. Repudiation pronounced during a menstrual period is void. 3. The taxes which are not prescribed by divine order are admissible and if one pays them he is freed from zakā‘. 4. To hold an opinion contrary to igmā‘ is neither infidelity nor imperity.

He also attacked the reputation of men whose authority is recognised in Islam: ‘ Omar b. al-Ṯalī‘ī made many mistakes, he said in the pulpit of the mosque of al-Djābal in al-Sāliḥīya. ‘Ali b. Abī Tālīb made three hundred mistakes, was another of his statements. He also violently attacked al-Ghazzālī, Maḥfī ‘l-Dīn Ibn ‘Arabī, ‘Omar b. al-Fārīd and the Sūfis in general. As to the first, he attacked the philosophical views laid down in his Muḥkām min al-Djāfīl and even in his Āyā‘, which contains a large number of apocryphal hadīths. “The Sufis and the Mutakallimūn are from the same valley” (mi‘a wādi‘ wa wādi‘). He declared, Greek philosophy and its Muslim representatives, notably Ibn Sīnā and Ibn Sā‘īn, were attacked in the great vogue by Ibn Taimīya. *Does not philosophy lead to unbelief? Is it not for a great part the cause of the different schisms which have been produced in the bosom of Islam.*

Islam being sent to replace Judaism and Christianity it naturally incited Ibn Taimiya to attack these both religions. After accusing the Jews and Christians of changing the meaning of a certain number of words in their sacred books (see his works, Nrs 35, 40, 43 and 45 below), he wrote pamphlets against the maintenance or building of synagogues and particularly of churches (cf. N°. 46).

Muslim scholars are not agreed on the orthodoxy of Ibn Taimiya. Among those who consider him at the very least an heretic we may mention: Ibn Baṭṭūta, Ibn Ḥadjar al-Albāni, Taḵī al-Đīn al-Subkī and his son ‘Abd al-Wahḥāb, ‘Izz al-Đīn Ibn Djamā‘ī, Abī Ja‘īyīn al-Ẓāhīrī al-Andalūsī, etc. However, those who praise are perhaps more numerous than his detractors: his disciple Ibn Kā‘īm al-Djāzī‘yī, al-Dhahābī, Ibn Kūdāmā, al-Ṣaṣṣārī al-Ṣūlī, Ibn al-Wardī, Ibrāhīm al-Kūrānī, Ali al-Ḡārī al-Harawī, Maḥmūd al-Ālīsī, etc. This divergence of opinion on Ibn Taimiya exists to this day: Yūsuf al-Nabhānī does not spare him in his Shāfa‘ī al-Djāfīl fi ‘l-Tashbīh bi-Sayyid al-Ḍalā‘īl (Cairo 1224), which was refuted by Abu ʿl-Ma‘ālī al-Ṣaḥīfī al-Salānī in his Ṣayyāt al-Amānī fi ‘l-Radd ‘alā ‘l-Nabhānī (Cairo 1225?).

We know that the founder of the Wahhābīs was connected with the Ḥanbalī scholars of Damascus and it is natural he made use of their works and particularly of Ibn Taimiya’s teaching and that of his pupil Ibn Kā‘īm al-Djāzi‘yī [q. v.]. The principles of the new doctrine are those for which the great Ḥanbalī theologian struggled all his life. [Cf. WAḤHAĪBĪS.]

Of the 500 works said to have been written by Ibn Taimiya only the following survive: 1. Risālāt al-Fārīd bīna, al-Ḥalīl al-Ma‘ārīdī al-Ḍalā‘īl, a refutation of the philosophers and of the Karmātians, who say that the Prophets in certain circumstances may lie, etc.; 2. al-Taḥyīn fi
a sovereign is followed by an account of his ministers. This second part is generally taken literally from Ibn al-Ashtir’s Kamil al-Tawarikh but also contains fragments of lost works such as the medium history and the Annals of al-Maṣūdī; the history of the ministers comes from al-Ṣāliḥ and from Ḥilāl al-Ṣāḥī. Although clearly Shi‘ī in tendency, this book is not biased (E. Amar). The first edition of the text from the MS. of the Bibl. Nat. Paris, n°. 2441, then the only one known, has been published by W. Ahlwardt (Gotha 1860); some fragments of it had been given by Jourdain, Fundgruben des Orient, v. 28—40; de Saçy, Chrestomathie, i. 1—54; 1—92; Hennius, Fragmenta arabica, Petropol, 1828, p. 1—104, and Freytag, Chrestomathie arabica, Bonn 1834, p. 84—96 (the dates given p. iv. are incorrect) and with a French translation by Cheronneau, Journ. As., 1846, i. 297—359, ii. 316—333; 1847, i. 134—147; the second edition which makes use of a second copy discovered in the same collection (n°. 2442) is due to Hartwig Derenbourg (Bibliothèque des Hautes-Études, sciences philosophiques et historiques, 1895). This work has been translated into French by M. Émile Amir (Archives Maro- caines, t. xvi., 1910). The word ṭalāṣa seems to be onomatopoeic (tītacak) applied to fluent and verbose speech (Ṭaḥī al-Arīs, vi. 424, quoted by H. Derenbourg, p. 4). (CL. Huart.)

IBN ῬUFAİL, a celebrated philosopher of the Maghrib, whose full name was ABD BAKR MUHAMMAD B. ʿABD AL-MAḤIR B. MUḤAMMAD B. MUḤAMMAD B. ῬUFAİL ṬUFAİL. He belonged to the prominent Arab tribe of Kais; he was also called al-Andalusi (the Spanian), al-Kurṣaṭī (the Cordovan or al-Iṣḥābī (the Sevillian). The Christian scholars call him Abubaker, a corruption of Abu Bakr.

Ibn Ῥufaʿil was probably born in the first decade of the 12th century A. D. in Wāḥīd Ṭiḥi, the modern Guzż, 40 miles N. W. of Granada. We know nothing of his family or his education. That he was a pupil of Ibn Bādiḏa[g] (q. v.) as is frequently stated, is incorrect; for in the introduction to his romance he says that he was not acquainted with this philosopher. He first of all practised as a physician in Granada and then became secretary to the governor of the province. In 549 (1154) he became secretary to the governor of Ceuta and Tangier, a son of ʿAbd al-Muʿāmin, the founder of the Almohad dynasty. Finally he received the appointment of court physician to the Almohad Sultan ʿAbū Yaḥṣuṣr Yūsuf (558—558 = 1163—1164). It has also been thought that he was the latter’s vizier; but it is doubtful if he really held this title, as only one text gives him it, as L. Gauthier notes out Al-Bīṭrūḏī (q. v.), who was his pupil, simply calls him ʿaḏr (L. Gauthier, Ibn Ῥufaʿil, p. 6). In any case Ibn Ῥufaʿil always had great influence with this prince, which he used to attract scholars to the court. For example he introduced the young Averroes to the Sultan. The historian ʿAbd al-Wahīd al-Marrakūṣi (al-Mīrāḏi, ed. Dozy, p. 174 sqq.; transl. by Fagnan, p. 201—210) gives a description of this meeting from Averroes’ own account. On this occasion the commander of the faithful showed a remarkable intimacy in philosophical matters. It was also Ibn Ῥufaʿil who, at the instigation of the prince, advised Averroes to annotate the works of Aristotle. This is stated by Abū Bakr Bundūd, a pupil of Ibn Ῥufaʿil, who says further: “The commander of the faithful was exceedingly attached to him (Ibn Ῥufaʿil). I am told that he remained whole days and nights in the palace with him without coming out”.

In 578 our philosopher on account of his advanced age was succeeded by Ibn Rusḥḏ as court physician to the Caliph. But he continued to retain ʿAbū Yaḥṣuṣr’s favour and, after the latter’s death in 580, retained the friendship of his son, Abū Yaḥṣuṣr. He died in 581 (1185—6) the Caliph himself attending his obsequies.

Ibn Ῥufaʿil is the author of the celebrated philosophical novel Ḥayī b. Yaḥṣuṣra, one of the most remarkable books of the middle ages, of which we shall have more to say below. Little else from his pen is known. He also wrote two treatises on medicine and corresponded with Averroes about the latter’s medical work al-Kullīyat. According to the astronomer al-Bīṭrūḏī and Ibn Rusḥḏ in his medium commentary on Aristotle’s Metaphysics (Bk. xii), he is said to have had original astronomical ideas. Al-Bīṭrūḏī attempted to refute Ptolemy’s theory of epicycles and eccentric circles and says in his preface that he is following the ideas of Ibn Ῥufaʿil.

The philosophical romance Ḥayī b. Yaḥṣuṣra, which was published by Pococke under the title Philosophus autodidactus, has also the sub-title Arrār al-iḫrāma al-iʿrāḥiyya “the secrets of illuminative philosophy”. This philosophy is really that of the Neo-Platonic scholasticism in its most mystic form. Ibn Ῥufaʿil expounds it in a progressive fashion with great skill by taking the case of a well endowed man with an inclination for speculation who is placed alone on an island from childhood and here discovers philosophy from his sheer force of reason and step by step constructs the whole Muslim Neo-Platonic system for himself. This man as the symbol of reason bears the name Ḥayī “the living”, Ibn Yaḥṣuṣr “son of the wakeful one” i. e. God; at the end of the story Salāmān and ʿAsāl appear who also have symbolic meaning.

The names Ḥayī, Salāmān and ʿAsāl were not new in philosophic literature. Avicenna had already written a mystic allegory entitled Ḥayī b. Yaḥṣuṣra and this work, which was well-known in the middle ages, was also imitated by Ibn Ezza; al-Djūrjadī, who has given us a list of Avicenna’s writings, also ascribes to him a little work on the story of Salāmān and ʿAsāl. We possess a version of this story by Naṣīr al-Dīn al-Tūsī, and the celebrated Persian poet Djīmān took it as the subject of one of his best known works. In these Salāmān and ʿAsāl play different roles but they are always symbolical and represent the human reason struggling with the world of objects. In Djīmān’s poem, Salāmān is a young prince and ʿAsāl his nurse who becomes his lover. In Naṣīr al-Dīn al-Tūsī’s form of the myth ʿAsāl is again a woman, and in another version Salāmān and ʿAsāl are brothers. In Ibn Ῥufaʿil’s work they are a king and his vizier. One of the versions is said to have been translated from the Greek by Hunain b. Ṣağh (q. v.) and it is in fact very probable that this whole cycle of stories has an Alexandrine origin.

The following is a synopsis of Ibn Ῥufaʿil’s romance. The book begins with an introduction which gives an interesting survey of the history of
Muslim philosophy. In it Ibn Tufail praises his predecessors, notably Ibn Sīnā (Avicenna), Ibn Bādijja, and al-Ghazālī and gives as the purpose of philosophy, according to the interpretation of the mystic scholastics, the acquisition of union with God, i.e., reaching a state of happiness and clear vision where truth is no longer obtained by a process of deduction, but is recognised intuitively. Now follows the story of the novel: a boy is born without a father on a lonely island or put on the sea by a princess in a neighbouring island and carried by the current to it. The possibility of spontaneous generation by the fertilization of the earth with moderate heat is fully discussed. A gazelle feeds the boy and becomes his first teacher. When the latter grows up a little he notices that he is naked and unarmed unlike the animals he meets. He covers himself with leaves and arms himself with a stick and thus recognises the importance of his hands. He now becomes a hunter and his arts make further progress; for example he replaces the scanty covering of leaves by an eagle's skin. In the meanwhile the gazelle which had brought him up becomes old and ill; this troubles him and he seeks the cause of the evil. For this purpose he studies himself and thus becomes conscious of his senses. Thinking that the evil is in the breast, he has the idea of making an opening in the side of the animal with a sharp stone. By this experiment he becomes acquainted with the heart and lungs; but also he gets his first notion of an invisible thing that has escaped and constitutes individuality more than body. When the body of the gazelle begins to decay, Haiy learns from the ravens how to bury it. By chance he discovers fire by dead trees catching fire through the rubbing of the branches: he brings the fire to his dwelling and keeps it going. This discovery induces him to reflect on this visible fire and the animal warmth which he has noticed in living creatures; as a result he dissects other animals. His skill makes further progress; he clothes himself in skins, learns to spin wool and flax and make needles; swallows show him how to build a house, and he teaches birds of prey to hunt for him and learns to use eggs of birds and the horns of cattle etc. This part of the novel forms a very interesting and ingeniously arranged encyclopaedia.

His knowledge develops more and more and becomes philosophy. After Haiy has studied all plants and minerals and their properties and the use of limbs in animals he classifies them into kinds and species. He divides the bodies into light and heavy. He comes back again to the spirit of life, the seat of which he has traced in the heart; he conceives the idea of an immortal vegetative soul. Bodies seem to him to be forms out of which come qualities. He now seeks for the elementary substances and recognises the four elements. While examining earth he grasps the idea of matter and conceives of bodies as matter of different extent. Observing that water becomes steam, he discovers the transition of one form from another and recognises that every new creation must have a cause which produces it. He thus gets the idea of a producer of forms in general. This he sees first in nature but as all elements are subject to change and destruction, he directs his attention to the heavenly bodies.

Haiy has now reached the age of 28, that is the end of the fourth septenary. Henceforth he begins to reflect on heaven: he asks if it is infinite, which he thinks absurd; he imagines it as spherical, observes the necessity of special spheres for the moon and the planets and imagines the celestial world as a kind of vast animal. He understands the necessity for the producer of everything not being a body, the motive power of the world not being included in it, if it is eternal: continuing to develop the conception of God, he deduces his qualities from the consideration of the beings of nature. God seems to him to have free will, to be wise, knowing, perfect, etc. Coming then to his own soul he decides that it is incorruptible, from which he concludes that his soul is immortal and his happiness in the contemplation of the perfect being. This happiness will be attained by imitating the celestial qualities, that is to say by practising ascetic morals. Haiy then devotes himself to a life of contemplation, which he leads till the end of his seventh septenary.

Then Asāl a devout follower of the revealed religion arrives from a neighbouring island; after the two men have begun to understand one another revealed religion proves to be at bottom the same as the philosophical belief attained by Haiy. Asāl recognises in the doctrine which the hermit teaches him a transcendent interpretation of the religion and of revealed religions in general. He persuades Haiy to follow him to a neighbouring island, where a king named Sallamān reigns whose friend and vizier Asāl is, in order to expound to him his philosophy. But it is not understood and, after several vain efforts, Asāl and Haiy return together to the desert island to devote themselves to pure contemplation while people continue to live by images and symbols.

This curious myth thus lays down very clearly the position of mystical philosophy with regard to religion (cf. also the article Ibn Rūqād on this question). The novel of Ibn Tufail was much enjoyed by Muslims and translated into various languages. In 1466 the Jew Moses of Narbonne translated it into Hebrew with a commentary. Leibniz praised it knowing it in Pococke's edition.

(B. Carré de Vaux.)

*IBN TŪMART,* a celebrated Muslim reformer in Morocco, known as the Ṣad of the Almohads. His real name was, according to Ibn Khallīl, Amghār which in Berber means “chief”. Ibn Tūmart in this language means “son of ‘Omar the little”. This was his father’s name who was also called ‘Abd Allāh. The names
of his ancestors also are Berber. The date of his birth is unknown but it must have been between 470 (1077-78) and 480 (1087-88). He was born at Idbi-ten-Warghan, a village of Suf. His land belonged to the Hergha, a branch of the Harka, one of the most important tribes of the Atlas. Ibn Khaldun tells us that it was distinguished for piety and that Ibn Tamiya was very fond of learning and industriously visited mosques where he studied so many catechisms that he was called al-Latif (the instructed). What can have driven him to the East? Probably only the desire for knowledge, for it can hardly be assumed that he had already received the training which he afterwards carried out, which rather owes its origin to the doctrines he learned there.

The Almoravid dynasty which ruled in the Maghrib and part of Spain had then begun to decline. Moral decay had followed in the footsteps of conquest and the shallowness of intellectual life is shown by the studies which were prosecuted. The doctrine of Malik b. Anas, one of the narrowest in Islam, was the prevailing one. Siyyid was confined to the Hanafi school of jurisprudence which had taken the place of the Kairan and Hadath.

In the east al-Ghazali had taken up a vigorous attitude against this in his first book Kitab al-I'tilaf (of his Ilm al-Film). This book therefore attracted the hatred of such fugitives as the Kadi Ja'far [q.v.] and even of the Ash'arites like al-Tajashi who tolerated no independent minds in their school. Al-Ghazali's work was therefore burned by order of the Almoravid Emirs. The coarsest anthropomorphism (tas'lid) was also in vogue; the allegorical expressions of the Koran were taken literally and God was given a corporeal form.

Ibn Tamiya began his travels in Spain and it was there that his views began to be affected by the writings of Ibn Hazm [q.v.]. He then went to the east but the chronology of his travels is not certain. If, contrary to al-Marrakushi's statement, he attended on his first visit to Alexandria the lectures of Abü Bakr al-Tajashi, who in spite of his Ash'ari tenets was an opponent of al-Ghazali, they must have made a lasting impression on him. He then made the pilgrimage to Mecca and studied in Baghdad and perhaps in Damascus also. He there absorbed al-Ghazali's ideas and later writers represent this influence symbolically as if Ibn Tamiya had resolved at al-Ghazali's instigation to reform the beliefs of his country. In reality the two never met.

These years of study and travel had utterly transformed the Maghribi ta'lab. He had formed his plan, if not in detail at least in its main outlines. On the ship on which he returned he preached to the sailors and passengers, who began to recite the Koran at his admonition and to offer prayers; it was afterwards related that a miracle related by al-Marrakushi confirmed this report. He continued his preaching in which he championed Ash'ari doctrines in Tripolis and al-Mahdia, where the reigning Sulaiman b. Agha b. Tamim, showed him great honour when he had heard him defend his case, and then in Monastir and finally in Bougie. He there set up as an inexorable critic of morals, literally following the ancient commandment: "He of yea who sees anything blameworthy shall alter it with the hand (i.e. by force); if he cannot do this, he shall do it with the tongue (i.e. by preach-
IBN WAHSIYA ALI BAKR AHMAD (or "MAMMA") AL-AL-QUDSI AL-MURATTAS "U-MARRATH" was a notable writer on alchemy and other sciences. He was born in the second half of the 12th century AD and died in the first decade of the 13th century. His works on alchemy and other sciences are detailed in the "Ibādīs". His influence is felt even in the 20th century, as his writings are cited in scientific and philosophical literature. He was a significant figure in the Islamic Golden Age, and his teachings and writings had a profound impact on later scholars and thinkers. He is remembered for his contributions to the field of alchemy and his influence on later generations. His works continue to be studied and revered by scholars and scientists to this day.
IBN YA'ISH, whose full name was MUVAFîK AL-DIN ABU 'L-BA`ÂJÀ YÂ'ÎSH B. ALI B. YA'ISH AL-ÂLÀHIB, also known as IBN AL-ÂNÀSH, an Arab grammarian, born at al-Âlùb on the 3rd Ramadân 553 (28 Sept. 1158). After studying grammar and Ijdâli, in his native town and in Damascus, he intended to go to Baghdad to study under the grammarian Abu 'l-Dara`Âb Ibn al-A`bâh (see AL-ÂNÀSH, no. 1). When in al-Mawâlî he heard of the death of this scholar, he remained some time there to study Ijdâli. He then returned to al-Âlùb where he devoted himself to teaching. According to Ibn Khallîka [q.v.], who heard him in 626-7, he was considered an authority in the field of Adab. Besides a Hâdiyya on Ibn Dîjinî’s commentary on the Tûrif of al-Âmazing he wrote a very full commentary on al-Âzamkhâshâri’s al-Mufa`âl to whom he often opposed his own views; the latter work was edited by G. Jahn (Leipzig 1882—1888).

Ibn Ya’ish died on 25th Dîjâmî 1 643 (18th Oct. 1245) at al-Âlùb and was buried there in the Mâkâm Ibrahim.

IBN YÂMîN, AMîR FASÎR AL-DÎN MAHÔMÔD b. ÂMIR YÂMÎN AL-DÎN MUHAMMAD, a Persian poet, was born in Fâryûmâd, Khurâsân. His father, an eminent scholar of his time, came to Khurâsân during the reign of Sultan Muhammad Khudâ Banda (703—716 = 1304—1316) and was fortunate enough to secure the high opinion of the famous wazîr Khwâdati ‘Allâ al-Dîn Muhammad. Ibn Yâmîn was a disciple of Shaikh Hâsan. He spent his life as a panegyrist to the Sarhâdars of Khurâsân (737—783 = 1337—1381) and died in 745 (1344).

Among his compositions his Kifâât are well-known. They have been printed in Calcutta and also translated into German by Schlöch-Wessrâl under the title of “Ibn Jemîn’s brukstücker” Vienna, 1852 Stuttgart 1879.

IBN YÂNûS, whose full name was ABU ’L-ÂHÂN ALI B. ÂBÅ AL-ÂRAÎMÂN b. ALMAD B. YÂNûS AL-ÂDÅFÎ AL-ÂMÎR, was according to al-Battûnî and Abu ‘l-Wa`âfî, probably the greatest Arab astronomer. His father, Abå Sa’îd abu al-Âraîman b. Âmad also called Ibn Yânûs, was a notable historian and traditionist, and died in Cairo in 347 (958-9). The year of our astronomer’s birth is not known but he died in Cairo on the 3rd Shawjal 399 (May 31, 1099); he is said to have been skilled in other branches of learning than astronomy and astrology and to have also been a good poet. Ibn Khallîka quotes several stories from contemporary authors of his peculiarities which were chiefly manifested in his dress. His principal work is the Hâkimî Tablîs (al-Zîdî al-kabî al-Hâkimî) begun about 380 (990) by order of the Fatimî al-A`zîz and completed under his son al-Hâkim shortly before the authors’

II. IBN AL-WÂDÎ, SIRÅDÅ AL-DÎN ABU HAFS `ÖMAR, Shâhîfî savant died in Dhu ’l-Ka`da 861 (sept-oct. 1457). He was author of Khwarîd al-`Adîfî wa-Fardat al-`A`râbîi, a kind of geographical and natural history of no scientific value. It seems that, in spite of the authorities quoted in the preface (al-Mas`ûdî, al-Tâ`tî, Ibn al-A`thir, al-Marrakûshî), the Khwarîd is only a plagiarism from Dâ`ûl al-Funûn wa-Sulawat al-Mu`âfîn of Nadjîn al-Dîn A`hzad b. Hâmîd b. Shâbîb al-Harrânî al-`Hânîbî who lived in Egypt about 732 (1322). Several orientalists have translated fragments or given extracts with translation: De Guignes, Hylander, Tornberg, Mehran, etc. The Khwarîd was publ. at Cairo in 1276, 1280, 1289, 1295, 1300, 1302, 1303, 1309.

Bibliography: Ibn Iyâs, Bâdî`i al-Zahîr fi Wasâ`î al-Duhar, Bîlât 1311, ii. 60; Brockelmann, Gesch. d. arab. Litt., iii. 131 sq. (Moh. Ben Chenel.)

IBN WÂSIL, DÇMÁLÅL-DÎN ABU `ABÂL-ÂLÀH MUHAMMAD B. SêLÎM, an A r a b h i s t o r i a n , born in 604 (1207), was at first a teacher at Hamat, was summoned to Cairo in 659 (1261) and sent to Sicily by Bâihars on a mission to King Manfred. He spent a considerable time there and composed outlines of logic called al-Empirîawya which is however known in the east as Nû`ihat al-Fikar fi `l-`Manîfî. On his return he became chief kâfi and professor at Hamat where he died in 697 (1298). He is the author of a history of Arâyûns called Mufarrîdî al-Kurâr fi `Âkhrî Dân Anîyûb and a history of the world entitled al-Tarîk (Vol. i, from the creation to the death of Hasân, in the British Mus., see a Descr. List of Arabic MS. acquired since 1894, p. 33, Or. 6657).

Bibliography: Brockelmann, Gesch. d. arab. Litt., i. 322 sq.; and the works given there; Schack, Poesie und Kunst der Araber in Spanien und Sizilien, ii. 154.
death. They are unfortunately no longer completely preserved. There are portions in Leiden, Oxford, Paris, the Escorial, Berlin and Cairo. Cassinis has published and translated a few chapters from these tables in the *Notices et extraits des manuscrits de la Bibliothèque nationale*, Vol. vi. p. 16–240, which contain observations of eclipses and conjunctions of planets by older astronomers and by Ibn Yunus himself. The latter’s principal object was to test and improve the observations of his predecessors and their statements on astronomical constants, in which the excellently equipped observatory on the Muḥattam rendered him valuable service. In spherical trigonometry he was the first to propound the prosthaphaeresis formula

\[
\cos \phi \cos \delta = \{ \cos (\phi + \delta) + \cos (\phi - \delta) \}
\]

which before the invention of logarithms was of great value to astronomers as it transformed the complicated multiplication of trigonometrical functions expressed in sexagesimal fractions into an addition. He also showed great skill in the solution of several difficult exercises in spherical astronomy with the help of orthogonal projection of the celestial sphere on the horizon and the plane of the meridian.

**IBN ŽAFAR**, İDNEŞI AL-DİN ABU ’ARBAḤ AL-LAḤĪ MUHAMMAD b. ABū MUHAMMAD AL-SAĞALI, A N A R A B S C H O L A R, born in Sicily but brought up in Mecca (according to Suyūṭī also born there), later returned to Sicily and died in 565 (1169) at Hāmāt. On the model of Kalila wa-Dimna he composed the collection of tales called Sultān al-Maṣfṣa jī *Udāna al-Abār* and dedicated to the ruler of Sicily, Abū ’Arbaḥ Allāh Muhammad b. Abī l-Kāsim (pr. Cairo 1278, Tunis 1279, Beirut 1300); Turk. transl. by Kara Khalilzade in Berlin (Pertsch, n°. 445) and Vienna (Flügel, n°. 382), pr. Constantinople 1285; Italian by Amari, Florence 1851, 1852; English from the Italian, London 1852. The author prepared two versions of the book, most ms., editions and translations contain the second of the year 554 (1159). Another less known work İnā ibn Qudāhā’s *Abūna* deals with celebrated children (pr. Cairo 1322) and also exists in a second abridged edition.

For his further literary activity, see the authorities mentioned below.

**IBN ZAIDŪN**, ABU ’L-WALID AHMAD b. ’ABD ALLĀH b. AHMAD b. CHAYBĪ b. ZAIDĪN, ONE OF THE MOST CELEBRATED POETS OF MUSLIM SPAIN and minister to the Arab Emir of Seville. He belonged to a famous family of the Arab tribe of Makhzūm and was born at Cordova in 394 = 1003. Left early an orphan, he was given the best teachers by his guardians and soon distinguished himself among his fellow pupils. At the age of twenty he already composed poems which made him famous.

Our poet became involved in the politics of his country through the civil wars of the Omayyad pretenders and the attempts of the Cordovans to expel from their city its Berber rulers. His origin, the position of his family, and particularly his ambition induced him to take a part. After the retreat of the Berbers he was therefore to be found in the retinue of Abū l-Ḥāzm Ibn Dījar, the chief of the Cordovan oligarchy. A violent love for the poetess Wallāda, of a princely family, brought him into conflict with a powerful rival, Ibn ʿAbdās, the minister of Abū l-Ḥāzm Ibn Dījar. Ibn Zaidūn wrote threatening poems against his rival and held him up to ridicule in a letter that has become famous. The latter denounced him as having secretly worked for a restoration of the Omayyads and he was thrown into prison. From here he wrote tender poems to Wallāda and pressing appeals, in which he defended himself, to his friends. One of the latter, Abū l-Walīd, the son of Abū l-Ḥāzm, succeeded in getting him out of prison. But Wallāda had finally abandoned him for Ibn ʿAbdās.

After an involuntary exile in which he unceasingly poured reproaches upon his lady friend, Ibn Zaidūn returned to Cordova on the death of Abū l-Ḥāzm Ibn Dījar and threw in his lot with the latter’s son and successor Abū l-Walīd. He served him as ambassador at several Muslim courts in the neighbourhood of Cordova. But his ambition was his downfall. For some unknown reason he was disgraced a second time, had to flee from Cordova, and lived in Denia, Badajoz, and Seville successively.

His fame as a poet, his literary abilities, and his knowledge of Muslim conditions in Spain, which he had acquired during his work as an ambassador, gained him a reception at the court of the Emir of Seville, al-Mu’taḍīd. At first he was only secretary to this ruler but later became his first minister. After the death of al-Mu’taḍīd, his son and successor, al-Mu’tamid, retained the poet in the same office and made use of him for the conquest of Cordova which now became the capital.

But Ibn Zaidūn’s popularity aroused the envy of several people at the court, particularly the poet Ibn ʿAmmār [q. v.], al-Mu’tamid’s favourite. A riot directed against the Jews in Seville gave theplotters an opportunity of getting Ibn Zaidūn sent there, to restore order. The poet set off to the great disappointment of the Cordovans who were very proud of their fellow-citizen: his family followed him soon after. But the aged Ibn Zaidūn was seized by a fever and quickly carried off. He died on Radjab 15 463 (April 17–18 1071) and was interred in Seville. The news of his death caused great grief in Cordova and the whole town went into mourning.

Ibn Zaidūn was not only an excellent poet, but he was also a distinguished letter-writer and it is as such that he is particularly famous in the history of Arabic literature. His letters are not all published. The best known are:

1. The letter to Ibn ʿAbdās. It is valuable for
Arabic philology in as much as it contains many allusions to facts, which are only known through it and through the commentary, which Ibn Nubātā (d. 768 = 1364) wrote on it under the title Surk al-'Uyūn fi Sharḥ Risālat Ibn Zaidūn (Būāk 1278, Alexandria 1290, Cairo 1305). This letter was published by Reiske with a Latin translation (Leipzig 1755). 2. The about equally important letter to Ibn Dāhwar was published also with a Latin translation by Beshora (Copenhagen 1889).

Extracts from Ibn Zaidūn's poems were given by Weijers (Leiden 1831), de Sacy (Journal Asiatique, XII, 508 sqq.), al-Maḳkārī, Analcīcīt; manuscript extracts and the biography of Ibn Zaidūn by Ibn Bāṣāmī (Ms. Bibl. Nat. Paris, no. 3322) and Ṣīdād al-Dīn al-Isfahānī (ibid. v. p. 3330).

On the bibliography cf. Brockelmann, Geschichte d. arabischen Literatur, i. 274 sqq. (A. Courr.).

IBN ZUHR, the genealogical family of Muslim scholars who flourished in Spain from the beginning of the 10th to the beginning of the 12th century A.D. They had migrated from Arabia and traced their descent from 'Adnān [g. v.]. Their descendants gradually became scattered over the whole of the Iberian peninsula from Xativa (Ẓāfīn Shātbū) in southeastern Spain where they first settled.

1. The ancestor of the Spanish line was called Zuhr. His biographer, Ibn al-Abbār, gives him the name al-Ṭayyābī, because he traced his descent from Iyādī, son of Ma'add, son of Ṣīrānī, who was regarded as one of the founders of the Arab race. According to Ibn Khāliqān, Zuhr al-Ṭayyābī had a son named Marwān, the father of Abū Bakr Muḥammad, who was the first to take a prominent place among his contemporaries. He was a jurist, celebrated for his learning and piety, eloquence and liberality, and died at the age of 86 at Taḥavara (Ṭalhīn) in 1030-1031.

2. ABŪ MARWĀN 'ABD AL-MALIK B. MUḤAMMAD B. MARWĀN B. ZUHR, son of the preceding, was a celebrated physician, who practised in Kairūn and later for a long time in Cairo. Returning to Spain he settled in Denia (Daniya) where the ruler Mudjāhid heaped honours upon him and took him to his court. From there his reputation spread through all Spain and he is said not only to have been a clever physician but also a learned jurist. Ibn Abī 'Uṣayfī reports that he moved from Denia to Seville, where he died leaving a considerable fortune. On the other hand Ibn Khāliqān assures us of reliable authority, that he died in Denia which he had never left.

3. ABU 'L-'ALĀ ZUHR B. ABU MARWĀN 'ABD AL-MALIK B. MUḤAMMAD B. MARWĀN, son of the preceding, is usually called Abu 'l-'Alā', which since the middle ages has been corrupted into the variants Aḥwāl, Aḥbāl and Ebilāh, and in combination with Zuhr the formus Aḥbālizīr and Aḥbilizīr. Abu 'l-'Alā' adopted a medical career and received an excellent technical training from his father and Abu 'l-'Aināk al-Miṣrī. The accuracy of his diagnosis was marvellous. Among his pupils we may note the poet Abū 'Amīr b. Yannān. The study of belles lettres and Traditus took him to Cordova where he enjoyed the instruction of the most celebrated teachers and soon won a considerable reputation, which attracted for him the attention of al-Mu'tamid, the last 'Abdādīd ruler of Seville. The latter took him to his court, over-

whelmed him with honours, and restored to him his grandfather's estate which had been confiscated. After al-Mu'tamid had been dethroned by the Almoravids Yusuf b. Tāshfīn in 484 = 1091 Abu 'l-'Alā' found an opportunity to show his gratitude to his former patron. But he soon went over to Yusuf b. Tāshfīn, who gave him the rank of vizier, so that in Latin translations of the middle ages his name is often prefixed by the Spanish form Algusar. According to Ibn al-Abbār, Abu 'l-'Alā' died in Cordova. His body was taken to Seville and interred there in 525 = 1130-1131. Wästenfeld maintains, on the authority of Ibn Abī 'Uṣubīsī, that he died in Seville.

4. ABŪ MARWĀN 'ABD AL-MALIK B. ABU 'L-'ALĀ ZUHR, son of the preceding, usually called Abu Marwān b. Zuhr, corrupted by mediaeval copyists to Abu Hormon or simply Avenzoar, was born in Seville. The date of his birth is not given by the biographers, but a few equations place it approximately between 484 = 1091 and 487 = 1094. After receiving an excellent education in literature, law and theology, his father taught him medicine. He soon became equal in knowledge to his teacher and distinguished himself by his original experiments in therapeutics. Like his father he was at first in the service of the Almoravids and later of the Almohads. Averroes [v. Ibn Rushd] was on intimate terms with him and considered him the greatest physician since Galen, but was not his pupil as many insist. On a journey through North Africa Avenzoar suffered many indignities from 'Alī b. Yusuf, the governor of Marrakush, for some unknown reason. The latter even had the doctor imprisoned and he makes some bitter allusions to the event in his later works. On the death of 'Alī b. Yusuf b. Tāshfīn and the overthrow of the Almoravids by the Almohads, Avenzoar went over to 'Abd al-Mu'min and had no cause to repent of his action. He was given rich presents and like his father before him received the rank of vizier. Among his works may be mentioned the Kitāb al-istiṣāḍ fī l-istah al-Anfūs wa l-'Adhādīd, which he composed by order of and on lines laid down by the Emir Ibrahim b. Yusuf, and especially his chief work, the Kitāb al-Tasāir fī l-Mudāhirīn wa l-'Adhādīd, which he wrote at the instigation of Averroes. Avenzoar exercised a considerable influence on European medicine, which lasted till the end of the xvith century, owing to the translations of his books into Hebrew and Latin. From the theoretical point of view, like Galen, he championed the theory of humours, but in practice considered experience the most reliable guide. In him we find not only original views on established facts, but new contributions to knowledge also such as the description of the mediastinal tumours and the abscess on the pericardium, diseases which had not been previously mentioned. He was the first Arab physician to recommend tracheotomy. Artificial feeding either through the gullet or through the rectum was not unknown to him and he explains its working with much skill. The erroneous view taken by several writers that Avenzoar was a Jew has been challenged by Steinschneider (Arch. für pathol. Anatomie [Berlin, 1873, p. 115] and Wüstenfeld Gesch. der arab. Astralte etc., p. 89) and finally clearly refuted by G. Colin (Avenzoar, en vie et ses œuvres, p. 34 sqq.). After a meritorious career devoted to work and good deeds, Avenzoar died, like his father, of a malignant tumour at Seville in
557 = 1161-2. He left a son and a daughter and was buried outside the Victory Gate.

5. ABDU BAKR MUHAMMAD B. ABD AL-MALIK B. ZUHR, son of the preceding; known as al-Hajjaf, the "grandson", born in 944 = 1101-2, died in 950 = 1107-8. He was likewise a distinguished physician but more of a practical man than a writer of medical works, although a treatise on writers of the eye is attributed to him. Almost unknown in Christian Europe, he had a very high reputation among the Muslims of Spain and Africa, although this was due less to his activity as a doctor than to his deep learning in all branches of Arab literature and to his poems of great delicacy of sentiment. The Almohad Caliph Ya'qub b. Yusuf al-Manṣūr summoned him to Africa to court, appointed him his physician, gave him rich gifts and showed him great honour but thus aroused the jealousy of the vizier Abū Zayd Abū Abd al-Rahmān b. Vajīgān. The latter had the physician and his niece who was very skilled in gynaecology and midwifery treacherously poisoned during their stay in Morocco. The Caliph preached his funeral sermon and he was buried in the garden of the Emirs. He left a son and a daughter.

6. ABDU MUHAMMAD ʿABD ALLĀH B. AL-HĀFIẒ, son of the preceding, born in 577 = 1181-2 at Seville, was an excellent physician, trained in the school of his father. The Almohad caliphs al-Manṣūr and al-Nāṣir successively took him to their court and heaped honours upon him. Like his father he was also murdered by poisoning and died in 602 = 1205-6, being only 25, on a journey to Seville (Abū ʿAbū Rabīḥ al-Fath [ibn Abī ʿAbī Rabīḥ]). His body which was buried there was later exhumed, taken to Seville and buried there outside the Victory Gate along with the remains of his ancestors. He left two sons Abū Marwān Abū ʿAbd al-Malik and Abū ʿl-Alāʾ Muhammad, both of whom lived in Seville; the younger was also a physician and had a sound knowledge of the works of Galen.

Bibliography:

IBRĀḤĪM. Ibn al-Ṭabarī, a Biblical Abraham, was, according to the Ḥadīth (Sīta vi. 74), the third son of Azar, whose name is apparently to be derived from Elazar, the name of his servant (cf. S. Frenkel in Zeitscr. d. Deutsch. Morgenl. Gesellsh., i. 72). The Biblical names of Abraham's ancestors: Ṭārīkh b. Nāḥūr b. Sārūgh b. Arghū b. ʿAbīr b. Shālikh b. Kainān b. Arfakhshād b. Šām b. Šāh are found in al-Ṭabarī, p. 44, and Ibn al-ʿAbdhār, i. 67, and this genealogy agrees perfectly with Genesis vi. 10-21 and Chronicles, i. 12-27. Kai-nān alone seems to have been inserted from Genesis v. 12. Born in 1263 after the Deluge or 3337 after the creation (al-Ṭabarī, l.c.) — a combination of the dates given in the Bible and Genesis xii. 10-25 however gives the birth of Abraham 291 years after Noah or 1918 after the creation—he at once undertook his mission of preaching a holy war against King Namrud. His mother ʿUṣrā had to take refuge in a cave at Kāthā where he first saw the light of the world (al-Ṭabarī, l. c.; Tabār, i. 256; Zakhamshārī, i. 172; Baʿdawī, i. 133; Ibn al-ʿAbdhār, i. 96; Yūkāt, s. v. Kūthā; al-Bakrī, p. 485; al-Makaddasī, p. 86; Baḥbā bāṭrī, 91; Maimonides, Dīdālāt al-Ḥūrin, chap. 29).

For bad dreams had induced Namrud to have pregnant women watched and their newborn sons killed. The slaves visited Ibrahim's mother to examine her before the pains of childbirth came upon her. They examined her body on the right and the child hid on the left; they sought it on the left and it fled to the right so that they had to depart after doing nothing (al-Kisāʾ, p. 115-120). The story in the Sefer Ḥayyūḥār (section Noah) that Terach was ordered to hand over Abraham to be executed and in his place delivered up the son of a handmaid has its origin in Muslim tradition. While still quite a child (Talmud Nedarim, 32) an experience gave him the knowledge of Allān which is mentioned in the Kurān vi. 75-79. When he had left the cave and was coming to his father's house, night fell upon him and he saw a star. He said: "That is my Lord!" But when it set, he said: "I do not love those that set!" He saw the moon rise and said: "That is my Lord!" As it also disappeared, he said: "Verily, if my Lord does not guide me, I shall become one of those that go astray!" When he saw the sun rise, he said: "That is my Lord, he is the greatest!" When it also set, he said: "O my people, I am free from your idolatry, See, I turn my face to the creator of Heaven and Earth!" etc. We also find these stories in the Hebrew book, Shebet Mīṣarat (Smyrna 1729), p. 109-111, and Sefer Ḥayyūḥār (Noah). Of the various legends (in al-Ṭabarī, p. 45-47; and Kurān, p. 125-143), which describe Abraham's wars with Namrud and which also found a way into later Rabbinical literature (Jellinek, Bith Hannisārā, i. 25-34; Sefer Ḥayyūḥār [Noah]; Sefer Eliyāḥā sāḥ, ch. 25, and Pirāḥ b. R. El, ch. 32) the following may find a place here, which are based on Kurān xxi. 50-67, as well as on Genesis Kabbā, section 38. One day his fellow tribesmen left the town to offer sacrifices to their Gods. Ibrāhim pretended to be unwilling and remained in the town. Armed with an axe he went to the temple of the gods where tables were laid with food. He said: "Why do ye not eat?" and struck off the hand of the one, the foot of another and the head of a third. He put them into the biggest of the vases and placed various dishes before him. When the people of the town saw this on their return, they accused Ibrāhim of the deed. He answered: "Verily, the biggest of them has done this; ask them, if they can speak." They said: "You surely know that they cannot speak." He said: "Do you, disregarding Allāh, worship what can neither help nor harm you? Fie upon you and your worship of idols!" Thrown into a limekiln as a punishment he left it unharmed after being three or
seven days in it (al-Thalabi and al-Kisà'i, l.c.). Namrûd was completely defeated and Ibrahim with his followers set out for Palestine being now called Khalil Allah, "the friend of God" (al-Kisà'i and al-Thalabi following Jâmi', xii. 8, Shabbi'ah 137, Minaúsah 53). In Egypt his beautiful wife Sâra was taken before Fir'awn (Genesis, xii. 10–20, al-Thalabi, p. 44; Tabari, i. 225; Ibn al-Athîr, i. 72). She said he was her brother so that he might not be slain on her account. She was not telling a lie, as he was her brother in the faith. When Fir'awn tried to touch her, his hand was paralyzed, and restored again when he had sent her back. In Sâlah in Palestine he dug a well of fresh clear water. Being molested by the inhabitants he had to go away whereupon the water dried up (Genesis, xii. 25–30, al-Thalabi and Ibn al-Athîr, l.c.). The people hurried after him to beg him to return. But he refused and gave them seven goats (Genesis xvi. 30) with instruction to place them at the well; the water would flow then again. When a menstruating woman had drunk from the well, the water entirely disappeared. In his 120th year he circumcised himself (al-Thalabi, p. 59). He died at the age of 175 and was buried in a tomb at Khirbat (cf. the article Al-Kisà'i). On the day of his death the moon will take his place at the left hand of Allah and guide the pious into Paradise (al-Thalabi, p. 60; cf. Genesis R., Par. 48).

Legende, 1912; Weiss, Leben Abraham's, Berlin 1913 [contains a fragment from al-Kisà'i, which seems to be of very late origin and differs in many respects from the original.] (J. Eisenberg.)

Sprenger (Leben und Lehre des Mohammed, ii. 276 sqq.) was the first to point out that the figure of Ibrahim in the Kûrâns has a history before he finally develops into the founder of the Ka'bah. This thesis was further expounded by Snouck Hurgronje as follows (Het Mahdhaanse Feste, p. 20 sqq.). In the older revelations (Sûra li. 24 sqq.; xv. 5 sqq., xxxvii. 81 sqq., vi. 74 sqq., xix. 42 sqq., xxi. 52 sqq., xxix. 15 sqq.) he is an apostle of God, who has to admonish his people, like other prophets. Ismâ'il is not yet connected with him. At the same time it is emphasised that Allah had not yet sent an admonisher to the Arabs (xxxi. 2; xxxiii. 43; xxxvi. 53). Ibrahim never appears as the founder of the Ka'bah and the first Muslim. In the Medina Suras on the other hand, Ibrahim is called Hansîf [q.v.] Muslim, the founder of the "religion of Ibrahim", whose palace, the Ka'bah, he founded along with Ismâ'il (iii. 118 sqq., iii. 60, 84 etc.). This alteration is explained as follows. Muhammad had appealed to the Jews in Mecca; in Medina it was soon shown that they seceded from him. Muhammad was therefore forced to find other support; he therefore ingeniously created the new role of the patriarch; he could now be independent of contemporary Judaism by appealing to the Judaism of Ibrahim, which was also the precursor of Islam. When Mecca again became prominent in his ideas, Ibrahim at the same time became the founder of the sanctuary there.

(A. J. Wensinck.)

IBRÂHÎM B. AMD ALLAH, son of the great-grandson of 'Ali, 'Abd Allah b. al-Hasan [1.] was brought up with his brother Muhammad [1.] in the expectation of one day becoming Caliph. They therefore considered the 'Abbasids as usurpers and with all the more justice as before the fall of the Omayyads, 'Abd Djasîr is said to have paid homage to Muhammad as Caliph. The brothers were therefore no little danger to him and as Caliph he sent officers to search for them, so that they were forced to wander from place to place with many dangerous adventures in order to remain concealed. Muhammad finally went to Medina and Ibrahim to Basra to advertise their cause. Although the project was by no means ripe, Muhammad found himself forced to appear openly as a rebel in Ramadân 145 (Nov. 762), which, in spite of his misgivings forced his brother to do the same in Basra. His situation was at first not unfavourable. Sentiment in the 'Irak was strongly 'Alid and 'Abî Djasîr, who was staying in the unruly town of Kufa, had sent the most of his troops to Medina or elsewhere. Ibrahim seized the state treasury and equipped armies, which captured al-Ahvâz, Fâris and Wâṣîf for him. But soon there arrived the depressing news that his brother in Medina had fallen on Ramadân 145, i.e. Dec. 762, which resulted in the Caliph now being able to send his general Isâ b. Musâ from Medina to the 'Irak. Ibrahim, who had left Basra to attack Kufa, met Isâ at Bakhmârâ south of Kufa on the 15th Dhu-l-Ḥa'â (14 Feb. 763). Ibrahim's troops were at first victorious, but then the battle turned and he himself fell, struck by an arrow. His head was cut off and sent to the Caliph. Ibrahim, who was 48 years old, was better fitted for the dangers of an adventurous wandering life than for the task of conducting a revolution. Like many of his family he was personally brave, but his character was weak, he had a dreamy and somewhat sensual nature and above all he had inherited the fatal faculty of the 'Alids for rejecting good advice and following an unreflecting and ruinous course.

IBRÂHÎM B. ADHAM B. MANŞûR B. YAZID B. DÎYâRî (Abû Isâhâq) al-Tâmîmi al-Allîlî, the famous ascetic, was a native of Balkh. The dates given for his death, which is said to have occurred while he was taking part in a naval expedition against the Greeks (Hlyat al-Alyâsing), Leiden MS., i. 188), range between 160 and 169 (776–783). Some verses composed on this occasion by the poet Muhammâd b. Kunâsâ of Kufa (died 207 = 822), whose mother was the sister of Ibrahim b. Adham, praise his asceticism, the nobility of his character, and his personal courage and refer to "the Western tomb," al-gharbi, in which he was buried (Abîhâni, xii. 113, 7 sqq.). According to one account, he was buried at Sûkîn, a fortress in Rûm (Yâkût, edited by Wüstenfeld, ii. 196, i.). The fact that after his conversion to Shi'ism he migrated to Syria, where he worked and lived by his labour until his death, is established by many anecdotes related in the
He is reputed to have said to 'Abd Allâh b. Mubarak, who asked him why he had left Khurasân: "I find no joy in life except in Syria, where I flee with my religion from peak to peak and from hill to hill, and those who see me think I am a madman or a camel-driver".

The Siûfî legend of 'Ibâhim b. Adham is evidently modelled upon the story of 'Abdulla (see Goldscheider, A Budükkûnu hadâ'a az İslâmârma, summarised by T. Duka in Joum. Roy. Asiat. Soc., 1904, p. 132 sqq.). Here 'Ibâhim appears as a prince of Balâqê who, while hunting, was wounded by an unseen voice that he was not created for the purpose of chasing hares or foxes: whereupon he dismounted, clad himself in the woollen garment of one of his father's shepherds, to whom he gave his horse and all that he had with him, and "abandoned the path of worldly pomp for the path of asceticism and piety" (for other accounts of his conversion, see Goldscheider, loc. cit., and Fawwî al-Wafâyât, Balâqê, 1283 A.H., 1, 3, 10 sqq.). The anecdotcs and sayings of 'Ibâhim, as recorded by his earliest biographers, show that he was essentially an ascetic and quietist of a practical type; we look in vain for any traces of the speculative mysticism which developed in the following century. Like many of the ancient Siûfîs, he took every precaution that his food should be lawful in the religious sense of the word. He did not carry the doctrine of tarz-al-kabûl to the point of refusing to earn his livelihood; on the contrary, he supported himself by gardening, reaping, grinding wheat, etc. While he approved of begging, if that it invites men to give alms and thereby increases their chance of salvation, he condemned it as a means of livelihood. He said: "There are two kinds of begging. A man may beg at people's doors, or he may say, 'I frequent the mosque and pray and fast and worship God and accept whatever is given to me'. This is the worse of the two kinds. Such a person is an important beggar". A trait far more characteristic of Indian and Syrian than of Moslem asceticism appears in the story that one of the three occasions on which 'Ibâhim felt joy was when he looked at the fart garment that he was wearing, and could not distinguish the fart from the one, because there were so many of the latter (al-Kushairî, Risâla, Cairo, 1318 A.H., p. 83, 1, 25 sqq.). As examples of his mystical sayings the following may be quoted: "Poverty is a treasure which God keeps in heaven and does not bestow except on those whom He loves"; "this is the sign of him that knows God, that his chief care is goodness and devotion, and his words are mostly words of praise and glorification". In answer to 'Abû Yazîd al-Dûhâmî, who declared that Paradise is the utmost that devotees hope to obtain from God hereafter, 'Ibâhim said: "By God, I deem that the greatest matter, as they consider it, is that God should not withdraw them from their Gracious_countenance". Although such ideas mark the transition from asceticism to mysticism, we cannot regard 'Ibâhim b. Adham as one who crossed the border-line. The keynotes of his religion are renunciation of the world and self-mortification, and in these he finds the fullest peace and joy, not in the ecstasy of contemplation or the enthusiasm of self-abandonment. (Nichtolson.)

[An Arabic romance of 'Ibâhim b. Adham, translated from the Turkish of 'Abd-Allâh 'Abd-Allâhim 'Abd-al-Rûmî and abridged by Ahmad b. Vü'ûsîn Sinân al-Karâmînî al-Dûhâmî (d. 1019 = 1611) is preserved in Berlin (cf. Brockelmann, Gesch. d. arab. Litter., ii, 501; survey of contents in Alwardt's Verz.), and a manuscript having the title Si'mat al-Sultân 'Ibâhim b. Adham ta'lis al-Dûhâmî 'Abd-Allâhim al-Rûmî, is mentioned by 'Abû Yazîd al-Zayyât, 'Abd-Allâhim al-Kutubî fi Dimashq wa-Damasc, p. 39, Nî. 130, 2. A versified Kisâ Wâli Allâh 'Abd-Allâhim is contained in Ms. Gotha, Pers.-cit. Die arab. His., n. 2752. A romance of 'Ibâhim has been versified in Hindûstan by Abû 'Ahlî-Hasan (Husayn) Muhammad, under the title Gulzâr-i 'Ibâhim (Mirat 1865, lith. Lucknow 1869, Caswagger 1871), ed. J. F. Blumhardt, Cat. of Hindûstani Printed Books Brit. Mus., p. 250; Muhammad Tassiy, Hist. de la Litt. hindoustane et hindostanî, i. 101). There exists also a Malay romance of which the following summary is given by Dr. J. J. de Hollander, Handelingen by de Besteeving der Maleisîche Taal- en Letterkunde, 6th ed. Breda, 1893, p. 348: "After a prosperous reign of some years, Sultan 'Ibâhim, prince of Irân, decides to perform the pilgrimage to Mecca and charges the most trustworthy of his viziers with the government in his absence. Having arrived in Kûfâ, 'Ibâhim becomes acquainted with Sitti Sha'îha, the daughter of Sharîf 'Hasan. He marries her, but soon leaves her in order to continue his journey to Mecca. Twenty years later, his son, Muhammad Tabîr, who was born from this marriage, betakes himself to Mecca to visit his father, who had been uninterruptedly engaged in devotion in the holy mosque. Sultan 'Ibâhim, being determined to renounce the world for ever, gives his son his seal-ring, by which he may vindicate his right to the throne of 'Irân, and bids him go to that country. The son obeys and is acknowledged by the vizier as the legitimate ruler. He does not desire, however, to take the reins of government and abdicates in favour of the vizier, on whom he bestows all the treasures left by his father." The Malay romance exists in two recensions, a shorter (ed. with Dutch transl. by P. P. Roorda van Eysinga, Levenskûn van Sultan Ibrahim, batak, Batavia, 1822; ed. of text with notes by D. Lenting, Geschiedenis van Sultan Ibrahim, zoon van Adham, voorst van Irakh, Breda, 1846; new ed. by A. Regensburg, Batavia, 1890, in Latin transcr., ibid. 1901) and a longer one; the latter is said to have been translated from the Arabic of a certain Hadrami shaikh, named Abû Bakr (cf. Ph. S. van Ronkel, Catalogus der Malische Handschriften von der Bataviisch Geenschap von Kunst en Wetenschappen, vol. 57). Stories of 'Ibâhim b. Adham, in part agreeing with the published text, are also found in the Purâna al-Sultânî (composed in A.H. 1650 ~ 1650), Book iv. Ch. i. (ed. H. N. van der Taak in Bydragen tot de Taal-, Land- en Volkenkunde van Ned.-Indie, Ser. iii., i. 424 sqq., Nî. 17; do., Malisch Leesboek, The Hague, 1868, p. 40~8, van Ronkel, o. e. Nî. 55) and in the Javanese works Lasmâs (?) Salatin (Br. Mus., cf. G. Tiemann, Inleiding tot de kennis van den Islam, p. 479) and Nawaerî, cf. J. H. G. Gunning, Diss. Leiden 1881, xxii. sqq.; A. C. Vreelee, Catal. de javaanse . . . Handschr. der Leidsech Univ.-Bibl., p. 303, Nî. 221. Poetic adaptations in Javanese have been made by P. P. Roorda van Eysinga (Am-

THE ENCYCLOPAEDIA OF ISLAM, II. 28
IBRAHĪM B. ADHAM — IBRAHĪM.

IBRAHĪM B. AL-AGHLAB (183-106 = 892-913). Founder of the semi-independent dynasty of the Aghlabids, was the son of al-Aghlab b. Sālim b. ‘Iṣāl b. Tamattā, a native of Marw al-Rūḍānī, who had governed Ifrīqiya after the departure of Ibn al-Aswāth in 148 A. H. and had been killed two years later in the revolt of al-Ḥasan b. Ḥarīb. In 179 (795) Ibrāhīm received the governorship of the Zāb. When the mistakes of the governor Ibn Muḥātīd had roused the people against him, who finally (183 = 799) expelled him, Ibrāhīm came to his assistance, and after the restoration of order, cleverly made himself so indispensable to Ibn al-Aswāth that the Caliph on Hartbama’s advice, left him in possession of Ifrīqiya on payment of a tribute of 40,000 dinars while Egypt was freed from the subvention of 100,000 dinars which she paid annually to Ifrīqiya. This change took place on the 12th Dhu’l-Qa‘da 1184 (July 9, 800). Following Spain and the Maghrib, Ifrīqiya in turn separated from the ‘Abbāsid empire. Egypt was soon to follow. The new king began by building a new capital to replace Kairawān: this was al-‘Abbāsīyya [q. v.]. A year later he received ambassadors from Charlemagne (802), who brought from Africa a number of relics: this was presumably not the only object of their journey and it may be supposed that Charlemagne was seeking an ally against the Omayyads in Spain. In 185 (802) Ibrāhīm suppressed a rising of Ḥamdis al-Kaisī in Tā‘ān; in 189 (805) another broke out in Tripoli, the inhabitants of which drove out the Aghlabi governor Sufyān b. al-Maŷāʾ. Hardly had this been terminated by an amnesty 194 (809) when a more serious rising took place in the very centre of Ifrīqiya. ‘Imrān b. Muḥājīd al-Rablī (Dhahabī has Makhbīd instead of Mudjājīd, v. Fagānī. Ibn al-‘Alīfī, Annāls, p. 158, note i. p. 173) and Kurāshī b. al-‘Umārī were at its head. Ibrāhīm was besieged for a whole year in al-‘Abbāsīyya. Money sent by the Caliph bought off the rebels and Ibrāhīm retired to the Zāb, where he lived till the death of Ibrāhīm without being disturbed. Tripoli was again the scene of a revolt in 196 (811) in the course of which it was pillaged by the Khâlidīyya Huwārī. The ruler sent his son ‘Abd Allāh at the head of an army and after an initial success the latter was forced to fight against the Khâlidīyya from Taḥert (Tugdement) led by their Rustamī āmm ‘Abd al-Wahhāb b. ʿAbd al-Raḥmān [q. v.]. The town was besieged by them, and the assault had begun when the news came that Ibrāhīm had died on the 21st Shawwal 196 (5th July 812) at al-Kairawān. ‘Abd Allāh, eager to seize his heritage, made peace with ‘Abd al-Wahhāb by abandoning to him the whole of Tripolitania, except Tripoli, as well as the districts of Kastilīya and Djerba.

IBRAHĪM B. IBRĀHĪM B. AL-‘Abbāsī ĪRIJĀNĪ, the last ruler of the Aghlabid dynasty. Although he had solemnly sworn to his dying brother Muḥammad Abu l-Gharānīk to recognise his nephew Abī ‘Iṣālī, he seized the throne on the death of his brother on the 6th Dhu’l-Qa‘da 1261 (= 16th February 875) with the acquiescence of the people of al-Kairawān. He was famous for two very different reasons: his taste for building and his ferocious cruelty. He built the Kaṣr al-Ḥarīr at al-Raḳkādī and placed along the coast a number of towers (maŷāris) to signal nocturnal attacks, which has led other buildings to be wrongly attributed to him. He waged wars notably against al-‘Abbāsī, who rebelling against his successor the first Taḥrīrī of Egypt, marched against Ifrīqiya in 266 = 879-880. After defeating the Aghlabid troops under Muḥammad b. Kūrbū at the Wādī Wardāsī, he was held up at first by the siege of Labda and later by that of Tripoli. The Abāḍīs [q. v.] of the Djebele Nefīṣa, led by their chief ‘Iyās b. Mansūr came to the help of the town and destroyed the army of al-‘Abbāsī who fled to Egypt (267 = 880-1). A rising of the Berbers of Ifrīqiya cost the life of Mu-
Ibrahîm b. Kâbir (Dhu ‘l-Hijja 268 = June-July 882) and was only suppressed by Ibrahîm’s son Abu ‘l-Abbâs. The latter having completely defeated the Neîsâ was sent to Bursa where Syracuse had been taken in 839. Ibrahîm followed later and in Radjab 289 = July-August 932 by order of the Abassid Caliph, seized Taormina, then crossing the strait began to besiege Cosenza. He died of dysentery during the siege on the 19th Dhu ’l-Ka‘da 289 = 26th October 902. His body was taken to Kairawân where he was buried on the 1st Muharram 290 = 5th December 902. All the historians unanimously accuse him of cruelty and quote numerous examples e.g. the massacre of the mawlas, the inhabitants of al-Râkîdâda and of Tunis, the murder of his physicians, ministers, pages, his son Abu l-Aghab, and his eight brothers, on account of imaginary fears. He created a bodyguard of negroes whom alone he trusted and who were the instruments of his cruelties.

**IBRAHÎM b. AHMAD**, the youngest son of Ahmad I, was born on the 12th Shawwâl 1024 (4th November 1615) and succeeded his brother Murâd IV (died 16th Shawwâl 1049 = 8th Feb. 1640) on the throne as 19th Ottoman sulțân. His brothers, Osman II and Murad IV reigning before him, had kept him in strict seclusion, and he grew up in awe of their machinations and in continual fear of a violent death, being on the whole of a delicate constitution; all this contrived to render him absolutely incapable of governing a great empire. During the first years of his reign he therefore left the government in the hands of the able vizier Kara Muşafâ. By the treaty of Szon (15th March 1642) the latter renewed the peace with Austria; he reconquered the fortress of Asow, and among some minor disturbances he suppressed the dangerous insurrection of Nasuh-paşâzâde (1642). At the same time he kept a watchful eye on the financial system of the country, and he greatly improved it by reforming the currency, by limitation of the expenses of the State, and by a strict collection of the taxes. After four years he fell a victim to court intrigue and was beheaded on 21st Dhu ’l-Ka‘da 1053 (31st January 1644). The Sulţan, who indulged in the delights of hareem-life as none of his predecessors or successors ever did, was now absolutely under the sway of his odalisks and favourites, particularly the notorious Djinîgî Kâğîa Husîn, an ignorant sofa from Zarafranorlu, who cared Ibrahîm from his fits of faintness by his magic charms and thereby won unlimited control over him. The State revenues were dissipated to humour the foolish whims of Ibrahîm and his court; offices and ranks were given by favour and for gifts i.e. in proportion to the bribes given. The result was an uninterrupted series of changes of grand viziers and ministers.

Such was the wretched state of affairs when on the 28th Sept. 1644 Multrese corsairs seized a convoy of pilgrims near Karpathos; among them was the Sultan’s Kışlar Âghâîi Sumbul with his riches and his retinue, bound for Cairo whither he had been banished. The Sulţan resolved to be revenged, and-as his favourite, the sâhibûr Yâsunî, had already been inciting him against Venice, the Sulţan undertook an expedition against the Republic.

Without a declaration of war a strong Turkish army was landed in Crete in June 1645 and took Canea. In the following year Rhethymonas fell, while the siege of the strong fortress of Candia continued to drag on. In the meanwhile the Turks were repeatedly defeated in Dalmatia. All this roused the Sulţan’s wrath to such an extent that he resolved to massacre all Christians, at least all Franks residing in his empire. This plan failed on account of the opposition of the Shaikh al-Islâm. This war, which was to last for 25 years, weakened the country to utter exhaustion, nevertheless it did not allow the Sulţan to interfere with his disolute conduct. The immense sums spent for the foolish luxury of the Serai rose disproportionately; in order to provide the necessary money, new heavy taxes were imposed on the people. At last the public rage broke forth openly; at the head of the insurrection were the Janissaries assisted by the ‘alâmî and the Shaikh al-Islâm. The Grand Vizier Hezîrî Shaikh Ahmed Pasha fell the first victim of the infuriated mob. Next came the Sulţan Ibrahîm who was dethroned on the 18th Radjab 1055 (8th August 1648) and confined in the Çemlik kâsh, where he was strangled on the 18th days later by the executioner. When Ibrahîm ascended the throne, he was the only living male offspring of the house of Ósman; on his death he left four sons and thus became the founder of the dynasty again, the only thing historical place to his credit.

**IBRAHÎM b. ALI.** [See Al-Shirazi.]

**IBRAHÎM b. HÎSHÂ.** [See Al-Šâhî.]

**IBRAHÎM b. KHÂLID.** [See Al-Ḥawk.]

**IBRAHÎM b. AL-MÂHî.** Al-Bâsîd, born at the end of 162 = July 1677. His father was the Caliph Muhammad al-Mahdi, his mother a negro named Shikla. When the Caliph al-Mamûn, who was then in Marw, appointed the ‘Alî al-Rîdâ successor on the end of Kamân = 24th March 817, disturbances broke out among the
followers of the ʿAbbāsids. At the end of Dhu l-Ḥijjah 7 they proclaimed al-Māmūn’s uncle, Ibrahim, Caliph under the name of al-Muṣārak (“the blessed”) and on the 5th Muharram 202 = 24th July 817 he publicly appeared in the mosque as ruler. His reign did not last long however. The troops soon rebelled because he could not pay them. After order had been restored in the army, Ḥira and Kūfā fell into his hands, but on the 26th Rāgab = 7th February 818 his generals Šīrāz b. Sājdār and ʿĪsā b. Muhammad were defeated at Walīy by the governor Ḥasan b. Sahl and had to retire to Baghdad. ʿĪsā soon went over openly to the enemy and the other generals began secretly to work for al-Maʾmūn. When the latter came back from Khorāsān, Ibrahim could no longer hold out, but had to abandon his claims in the middle of Dhu l-Ḥijjah 203 = June 819 and on the 15th Safar 204 = 11th August 819 al-Maʾmūn entered Baghdad. Ibrahim henceforth lived in retirement. He was arrested in 210 = 825–826 but pardoned in a few days. He died in Ramadān 224 = July 839 at Surr-maʾna. He had not the gifts of a ruler; but he held a refined taste which was especially interested in music and singing.

(K. V. Zettersten.)

Ibrahim ibn ʿAbbās, the second and twelfth Ghaznavid.

[See Ghaznavids, p. 156 sqq.]

Ibrahim ibn Muḥammad b. ʿAlī b. ʿAbbās, brother of the two first ʿAbbāsid Sulṭāns, al-Safawād b. Ṣafawād, born in 82 = 701–702. His father Ṣafawād, according to the usual statement, died in Dhu l-Kaʿda 125 = August 743, was the founder of the secret ʿAbbāsid propaganda and shortly before his death made over to his son Ibrahim his right to the ʿAbbāsid imāmāte. In the following year the latter sent Bukār b. Māḥān [q. v.] to Marw where he informed the Khorāsānians of Muḥammad’s death and proclaimed Ibrahim his successor. After Bukār’s death in 127 = 744–745 Abū Ṣalāma al-Khālīl [q. v.] was appointed plenipotentiary of the ʿAbbāsids. Like his father, Ibrahim himself lived in al-Hamayma, a place south of the Dead Sea, while Kūfā was the centre from which the invisible threads of the energetic propaganda ran. Khorāsān was a particularly fertile soil for the activities of the ʿAbbāsid emissaries, and in 128 = 745–746 Abī Muslim was appointed leader of the secret agitation there. In the following summer the long prepared rebellion broke out and on the 1st Shawwāl 129 = 15th June 747 the first ʿAbbāsid service was held in Ṣīkāḍhān. In the same year the Caliph Marwān II had Ibrahim captured and brought to Ḥarrān, his then residence, and the latter soon afterwards died there. According to some, Ibrahim was put to death by order of Marwān.

(K. V. Zettersten.)

Ibrahim, one of the most prominent of the last Mamluks amirs of Egypt. He was brought to Egypt as a Circassian slave and passed into the possession of Muḥammad Ahmad Abu l-Dhahab, the favourite Mamluk of ʿAlī Bey [q. v.]. He manumitted him and married him to his sister (cf. al-Djabarī’s statement under the 4th Rabīʿ II 1216). In 1182 (1760–61) he was appointed one of the 24 Beys, in 1186 as Amir al-Ḥajjād he led the Egyptian pilgrim caravan to Mecca. On his return the dispute between Muḥammad Ahmad Abu l-Dhahab and ʿAlī Bey had already been decided in favour of the latter. During the few years of his brother-in-law’s rule his prestige must have increased considerably. In 1187 he was Deftedar, in 1189 he remained in Cairo as Shaikh al-Bīlād while Muḥammad undertook his expedition to Syria and when the latter died at Akka, Ibrahim as his nearest relative inherited his great wealth and influence. With Murād Bey, another Amir of Muḥammad’s house, whom the troops had chosen as their leader, he shared the rule over Egypt so that he took over the civil rule as Shaikh al-Bālād i.e. Lord Mayor of Cairo, while Murād took control of the army. The predominating position of these two is clear from the number of their Mamluks. According to Volney, who was in Egypt in 1783, Ibrahim Bey had 600 Mamluks, Murād Bey 400, the other Beys between 50 and 200. That this division of power lasted was mainly due to Ibrahim Bey’s complaisance and love of peace. He probably dealt warily with the impulsive Murād Bey so that serious differences only arose between them in 1198–9. Their joint rule lasted till the French expedition to Egypt in 1213 (1798), although it was twice interrupted when Ismāʿil Bey, the most influential amir of the house of ʿAlī Bey, came to power. In 1191 he was only able to hold out for six months; in 1201 (1786) he was again made Shaikh al-Bīlād by the Turkish Kapudan (Kaptan) Paşa (Admiral) Ḥasan. The object of the latter’s expedition to Egypt was to strengthen the power of the Porte, the influence of which had sunk to a minimum since the days of Ibrahim Kâthkûda and particularly under ʿAlī Bey. Although Ibrahim and Murād in whom Ḥasan Paşa saw the chief culprits, had to leave Cairo they did not dare openly to challenge the authority of the Porte’s envoy, the latter however had to leave the rule of Egypt in the hands of the Mamluks. Even after the departure of Ḥasan Bey, which was hastened by political complications with Russia, Ismāʿil was able to retain his post of Shaikh al-Bīlād. Not till a pestilence had carried him and other amirs off in 1206, could Ibrahim and Murād return to Cairo. They received an amnesty from the Porte and henceforth again shared the government of the country.

During the French advance to 1213 (1798) Ibrahim awaited the result of the fighting at the Pyramid on the east bank of the Nile at Shabra and Būlāk. He ordered the ships at Būlāk to be burned to make it difficult for the French to cross the Nile. After the battles of Khânkâ and Sallimā
he succeeded in escaping with his train to Syria. He stayed at Ghaza and retired to the north-east when Bonaparte sent an expedition to Palestine.

Ibrahim returned to Egypt with the army of the Grand Vizier Yusuf Pasha. When during the battle of Helopolis Nasiri Pasha, whom the Porte had designated governor of Egypt, entered Cairo in Feb. 1800, Ibrahim Bey was with him. He left the town with the Turkish troops when the French were able to hold it. He declined any rapprochement with the French, while Murad Bey made peace with them and received the government of Upper Egypt. He died soon afterwards of the plague in April 1801.

After the final evacuation of the town by the French in June 1801, Ibrahim Bey was again appointed Shaikh al-bilad by the Grand Vizier but soon afterwards on the 20th Oct. 1801 he was thrown into prison with the rest of the Mameluk amirs by order of the Porte, who thought it a favourable opportunity to dispose of the Mameluks. The English forced the imprisoned Mameluks to be handed over to them. Ibrahim Bey thus succeeded in reaching Upper Egypt. From there in the next few years he repeatedly negotiated with the Turkish governor of Egypt, Khosrow Pasha. When the latter was driven from Egypt and the Albanian chief Tahir, who had been appointed kâîmmâkân, was murdered, Muhammad Ali summoned Ibrahim Bey to Cairo in April 1801 and gave him the office of Shaikh al-bilad to prevent Ahmad Pasha, the governor designate of Dijida, who was passing through Egypt at the time, establishing himself there. The influence of the aged Ibrahim Bey was certainly not very great and he must have seen that he was only a tool in the hands of Muhammad Ali. In any case, he developed a great distrust of Muhammad Ali; he probably saw through the latter's policy of making use of the Mameluks when suited himself, while he took care not to allow them to become too powerful and continually sowed seeds among them. The coup de main which Muhammad Ali attempted on 13th March 1804 against Ibrahim and Qothmân al-Bardîf, Murad's successor, failed in as much as both escaped imprisonment by flight. Ibrahim never again returned to Cairo. During the massacre of the Mameluks on the 18th August 1805 he was at Turâ with his son Marzûq and inflicted heavy losses on Muhammad Ali's troops there. His attempt to unite the Mameluks in a common struggle with Muhammad Ali failed owing to the dissensions among them and Muhammad Ali's skill in always winning to his side several of the most influential Mameluks by threats and gifts in honorary offices. Ibrahim declined an attempt at reconciliation made by Muhammad Ali in 1809, saying that too much blood had flowed between them. Owing to Ibrahim's efforts the Mameluks in 1810 were a power against which Muhammad Ali did not dare to take open action. But by stratagem he succeeded in bringing most of the Mameluks to Cairo. Here honours were heaped upon them and thus they were secured. They thus fell into the trap prepared by Muhammad Ali and were massacred in the citadel on March 1st 1811. Ibrahim Bey with a few others had not trusted Muhammad Ali's assurances. He remained on the southern frontier of Egypt and thus was saved. He spent the last years of his life at Dongola with the remnants of the Mameluks in the land of slaves where they sowed millet and lived on it and clothed themselves in robes such as slave dealers wore there, till finally in Rabî' I 1231 the news of his death reached 'cairo' (Djibarî). His widow who in 1811 had been allowed to seek and bury her son Marzûq's body, received permission from Muhammad Ali to bring Ibrahim's body to Cairo. It arrived there in Ramaḍân 1232.

P. KAHLE.

IBRAHIM HAKKI PASHA is the grandson of a Georgian who adopted Islam and the name of Mehmed Remzi, who at the time of his death was president of the Constantinople city council (Sehir Emnneti Meliksi). Ibrahim Hakki Pasha was born on the 22nd Shawwal 1279 = 12th April 1863 in the Beşiktaş-Tagh quarter of Constantinople. From 1877 to 1882 he attended the school of administration (Milhîye Mektebi) in Constantinople and took particular advantage of the lectures of Mehmed Murad Bey (History), Pertuğul Miş'îl Efendi (Finance) and Oğhânu Efeni (Economics). Passing out of the school with brilliant success he became a translator in the Vildiz palace of Sultan Abd al-Hasid from 1883 to 1894. Through his literary and scholarly activities he obtained the professorship of history at the age of 23 in the Constantinople school of Law (Hukuk Mektebi) to which soon afterwards in 1888 the chair of constitutional law (Hukuk-i siyâsîye) was added. Ibrahim Hakki's professorship of history lapsed in 1891. In place of it he was given in 1892 the chair of administrative law in addition to that of constitutional law, and in 1893 that of international law in the school of Law also. Being a brilliant orator and a comparatively bold critic he was able to attach students to himself — and what was more important — also to interest even non-Turks and non-Muslims in the welfare of the Ottoman empire. On 12th Sept. 1894, Ibrahim Hakki was appointed legal adviser (Hukuk Müsbat-i kudüsî) to the Sublime Porte. The Grand Vizier Mehmed Sa'id Pasha in 1901 or 1902 wished to appoint him undersecretary of the Ministry of Foreign Affairs, but the Sultan did not approve. Hakki Bey distinguished himself in the office of legal adviser which he held till 1908, and acted as member or president of over 30 commissions which discussed the conclusion of treaties or disputed questions of law. Being a linguist he was twice sent on mission to Europe by Abd al-Hasid and twice to America. When the Turkish constitution was re-established in 1908 Ibrahim Hakki at once plunged into the political arena, championed extremely modern views, and
took the bold step, during the short time he held the portfolio of Minister of Education in 1918, of confirming in office only a hundred of the five hundred officials in the central offices. Soon afterwards he held the Ministry of the Interior for a short time. His great zeal horrified the backward officials, and he had to retire from these offices. He still continued to hold his legal chairs till in 1909 he was appointed ambassador to Rome. Having already for a long time been the candidate of the Committee of Union and Progress on Jan. 12 (Schulthees, Jan. 10) 1910 he was given the rank of vizier and promoted Grand Vizier. İbrahim Haşki proved himself in the field of politics a distinguished orator, a man of striking, well-marked convictions which, however, lacked the elasticity usual and perhaps necessary in the east. In alliance with the Young Turks he held the office of Grand Vizier for 21 months and was a vigorous opponent of the Albanian and other separatist claims. As a result of Italy’s declaration of war against the Porte, İbrahim Haşki’s cabinet resigned on Sept. 29 1911.

The greatest political success of his vizierate was the successful operations of the Ottoman Chief of Staff, Ahmed İzzet Paşa, against the rebels in the Yemen and in the conclusion of a peace with the leader of the Yemeni Zaidis, İmám Yahya, which was based on religious, legal, and in part financial independence. This treaty was also Ahmed İzzet Paşa’s work.

İbrahim Haşki Paşa’s literary works deal mainly with jurisprudence and to a secondary degree with history. His first book was an ‘Introduction to International Law’ (Melikhaşı Haşki Haşki Diewel) and was soon followed by an “History of International Law” (Taşıkeri Haşki beim Judäwal, Istanbul, 1393 = 1885-6). Both are concise, unexceptionable and reliable compendiums for university teaching. In conjunction with Melhem ‘Azmī he published about the same time a “Brief History of Islam” (Müşküdar İslam Tarihik) which was intended for the lower classes of intermediate schools (Müşküdar); (6th edition Istanbul 1321 = 1903-4). Likewise with Melhem ‘Azmī he prepared a “Brief Ottoman History” and then from his own pen a “Small Ottoman History” for elementary schools (Istanbul 1301 = 1890). Soon afterwards he published his most important historical work a “General History” in three volumes from the earliest times to the xviiith century (Taşıkeri Tarihik, Istanbul 1305 and 1306 = 1887-8 and 1888-9). There is nothing original in any of these works.

İbrahim Haşki’s most valuable work is his Administrative Law (Haşki-i İdäre, 1st ed. Istanbul 1308 = 1890-91; 2nd ed. 1312 = 1894-95) in two volumes octavo. The work deals for the first time with a many branched and complex subject in a masterly fashion. It is far surpasses all similar compilations. He has also prepared a number of unpublished works, which his activities devoted for twenty years to education and politics have not yet allowed him to publish.

**Bibliography:** Schulthees’ ‘Europäischer Geschichtkalender’, N. S., 26th year, 1910 (München 1911), 27th year 1911 (München 1912); Ahmed İlyan, ‘Newali Tercüeti-i Fatihaa, Istanbul 1311 = 1893-94), p. 47-50, 60; İsmail Şuhbî ve-Mehmed Fuâd, Sânâmhe-i Tercüeti Fatihaa, Istanbul 1327 = 1911-12 and 1328 = 1912-13; İsa’l Paşa, Khârî to, ii. 2 (Dervi Seâdet 1328 = 1911), p. 23 sq.; much personal information from İbrahim Haşki Paşa.

**İbrahim Khan** the ancestor of the İbrahim Khanîzâde family, was the son of the Prince İmâm Khanî, a daughter of Sultan II, by his first marriage with the famous Grand Vizier Mehmedmed Şokollî Paşa who was murdered on the 19 Shahrîbîn 827 (11th Oct. 1579). Tradition relates that he was concealed by his father at his birth, so that he was the first who broke the laws of the house of Osman, according to which all sons of the Princes, were to be put to death at birth (Hüdîyet al-Darâmî, ii. 38; ep. article Dârâmî), likewise contrary to the rule Ahmad I appointed him to the post of governor general in different provinces, as a reward, it is said, for the fact that he had presented the Sultan with the property on which the palace of his father Mehmedmed Şokollî Paşa stood, for the building of the great Mosque on the Atmeidan (Barozi-li-reichet, Reisnames of Pasha, p. 173). İbrahim died some time after 1313 (1621-22) and his descendants, the İbrahim Khanîzâde, formed like the Evrenosîade and the Türkîzâde, one of the historic families of the Empire, although they never filled important positions in the state ‘Ali Beg, a grandson of İbrahim Khan, is one of the few mentioned repeatedly by the chronicists (Khâhid, Ta‘rîhî, ii. 220 vs.; Knolles-Rycaut, The Turkish History, p. 263; v. Hammer, Geschichte d. Osman. Reiches, ix. 563; No. 2696; de la Motraye, Voyages, i. 326). About the decline of the 17th century, the legend arose that the İbrahim Khanîzâde would succeed to the throne, in case the Osman dynasty should die out, and that for this reason the Sultan was bound to re-establish the religion of all members of this family (de la Motraye, o. c., i. 261 sq.; von den Driesch, Historische Nachricht, etc., p. 137; Kasten, Ottoman History, p. 107; Ludeke, Beschreibung des Turk. Reiches, i. 292, ii. 63). They had their residence in the suburb of Eyyûb on the Golden Horn, and are still the muftis (administrators) of the Evlâf of their ancestor Mehmed Şokollî Paşa (Drewet, Ta‘rîhî, vi. 198).

**Bibliography:** besides the works quoted in the text see Sîghîdî ‘Osmâni, i. 99; White, Three Years in Constantinople, ii. 307.

**İbrahim Lodi.** The last king of India of the house of Lodi [s. Syamdar Lodi], came to the throne in 1510, and reigned at Agra for about 16 years when he was overthrown and slain by Babur at Panipat in April 1526. He was violent and tyrannical, and alienated his nobles who called in Babur to help them. He fell, however, fighting bravely, along with thousands of his Afghans. Like Harold, he had trouble with his own family, before being called upon to encounter a foreign foe. His father’s brother, ‘Alâ al-Din, attempted to dismisses him, first from Gudjat, and afterwards from Kâbul where he got help from Bâbur. But İbrahim defeated his uncle who gained nothing by joining the Moghals.

**Bibliography:** ‘Na‘ım al-Din. Ta‘bâhi-i Akvat; Bâbur’s Memoirs, trans. Erskine and Pavet de Courteille; Elphinston’s History, Ta‘rîh Dâ‘ûdî by ‘Abdullah of which there is an account, with extracts, in Elliot, Hist., Vol. iv. 434; Nîmat Allah, Hist. of the Afghans, Dorn’s translation, p. 70.

(H. Beveridge)
IBRAHIM AL-MAWSILÎ, IBRAHÎM B. MAHÂMÎ B. BAHMÂN, also known as Al-Nadim al-Mawṣili, one of the most celebrated musicans of Arab history, a man of Persian origin, was born at Kūfâ in 125 (742) and died at Bagdad in 138 (854). He studied music under Persian masters, and attained an extraordinary degree of skill both in singing and in the use of the lute. He stood in high favour at the 'Abdâdîd court, under al-Mahdî, al-Hâridî, and (especially) al-Rashîd. His son Isḥāq, a very learned and accomplished man, followed in his footsteps, being a musician and composer of fully equal ability, and a prominent figure in Bagdad under al-Rashîd, al-Ma'mûn, and al-Muta'âsmin. Marvelous tales were told of Ibrahim's proficiency, e.g. Aghâni, V., 41, 1—15. Two anecdotes concerning him which became very widely popular are the story of the singing-girls whose house he entered in a basket (Aghâni, v. 41 sq.; al-Ghazâlî, Muqaddimah al-budûr, i., 243 sq.; Ibn Badîn, ed. Dozy, p. 272 sq.; and the 1001 Nights [in the two latter cases, told of Is̄hâq]), and the story of his visit from the Devil, who taught him a wonderful melody (Aghâni, v. 36 sq.; al-Ghazâlî, i., 241 sq.; and the 1001 Nights [told of Is̄hâq]).

IBRAHIM MUTEFERRIKA (i.e. court-steward), the first Turkish printer, was born about 1674 in Kolozsvár (Hungary) of Calvinistic parents and, at the age of 18, was taken prisoner by Turkish troops, making a raid into Hungary. He was brought to Constantinople and sold as a slave. He then turned Muslim and occupied himself with theological studies. In 1711

Muhammed, in 1721 on his embassy to the court of Louis XV, Ibrahim established the first printing office in Constantinople, after having received the authorisation for this by an imperial warrant in the middle of Dhu 'l-Qa'da 1139 (beginning of July 1727). The maiden work of this printing office was the dictionary of Wânkîl published in two folio volumes on the 1st Redhe 1141 (31st January 1729). In October 1734 the work in the office was closed, but resumed after an interval of six years, and then stopped altogether in 1155 (1742), the office having in all printed 17 books, the incunabula of Islamic typography, (see exact list in v. Hammer, cf. cit., viii, 583 sqq.).

Bibliography: J. de Karacson in the Revue Historique publique par l'Institut d'Histoire Ottomane, No. 3, 173—185, with the additions given by B. A. Mystakides, ibid., No. 5 and 7; Sidjeli 'Osmanî, i., 127; the fioman of the year 1139, in the preface of the first print of Wânkîl, the epitaph of Ibrahim, with the chronogram of the year of his death, has been published in the newspaper Sabâh No. 8505 of the 14th Dûmu'dâ II 1331. (J. H. Mordtmann.)

IBRAHİM PASHA, the eldest son of Muhammed ʿAli, a great general and viceroy of Egypt. He is often described as Muhammad ʿAli's adopted son. Amina, a relative of his fosterfather, the governor (torbağî) of Kavalla in Macedonia, was certainly a divorced woman when Muhammed ʿAli married her in 1787 and it cannot be denied that Muhammed ʿAli had a certain preference for his son ʿÎsâ, who died on the 28th September 1816. There was certainly also a rivalry between Ibrahim and ʿÎsâ (cf. Mengin, ii., 81 sqq). The year of his birth is decisive, however, and this is usually given as 1789, but occasionally also as 1786. In the older authorities like Djabarî and Mengin we find no hint that he was not Muhammed ʿAli's real son. Djabarî (1228 [1813]) describes him as a young man of not yet twenty, which cer-
title of Pasha by the Porte in recognition of the services of his brother (Mengin, ii. 48).

In 1816 his father sent him to Alexandria to make a final reckoning with the Wahhâbi, against whom his brother Tüsün had been fighting successfully from 1811 to 1813, and from 1813 to 1815. Muhammad 'Ali himself also. After three years of heavy fighting the goal was achieved, the capital of the Wahhâbis, was destroyed and 'Abd Allâh b. al-Sa'îd with his relatives were taken as prisoners to Egypt (cf. above p. 416). In December 1819 Ibrahim made his triumphal entry into Cairo. Soon afterwards the Sultan appointed him governor of Djidda. In the meanwhile, Muhammad 'Ali had entrusted his third son Ismâ'il with the conquest of the Sudan. The discovery of the ancient goldfields and the capture of slaves, who were to form the basis of Muhammad 'Ali's new army, were the two objects of this expedition. Ibrahim Pasha was sent thither with reinforcements to support his brother. He seems to have gone there with very adventurous plans (Vauhabelle, ii. 231), but a severe attack of dysentery forced him to return hurriedly to Cairo in the beginning of May.

In the years following Ibrahim Pasha took part in training the new troops (nizâm djiddî), who were entrusted to the French Colonel Sèves. Ibrahim was an industrious pupil of the European instructor and the latter under the name of Sulaimân Pasha became his main support in his later campaigns.

When Muhammad 'Ali was appointed to conquer the Morea by a firmân of the Sultan, dated 16th January 1824, he sent his son Ibrahim Pasha there with an excellent army trained on the European model and ample supplies of war material at the end of July 1824. The capture of Navarino and his entry into Tripolitsa practically brought the Peninsula under his sway. February to April 1826 were devoted to the siege and capture of Missolonghi. After the intervention of the Great Powers had been declined by the Porte and Muhammad 'Ali, the naval battle of Navarino took place in October 1827, in which the greater part of the Egyptian-Turkish fleet was destroyed by the allied fleets of England, France, and Russia and finally Muhammad 'Ali was forced by the English Admiral Codrington, who appeared before Alexandria, to recall his son and the Egyptian troops. He arrived in Alexandria on the 10th October 1826.

In 1831 Ibrahim Pasha was entrusted by this father with the conduct of the Syrian campaign. On Nov. 1 he arrived with his troops in Palestine. After a six months' siege he obtained the surrender of 'Akka on the 27th May 1832, after previously gaining victories over the Pasha of Tripolis and Aleppo on the plain of Zer'a south of Homs, Ibrahim's march, that followed, through Syria and Asia Minor was made possible by his victories over the advance guard of the Turkish army under Muhammad Pasha of Aleppo at Homs on the 8th July, over the main Turkish army under Hussein Pasha in the pass of Bellân at Alexandria (29th July), and over the Turkish army under Râshid Pasha at Konia (21st December). These victories showed the superiority of the Egyptian army. Ibrahim's policy as a leader, and the success of his policy of uniting the various groups in Syria under one banner by the cry of "liberation from the Turkish yoke" and in winning to his side the influential Amir Bishâr of the Libanon, Ibrahim Pasha advanced as far as Kutahlîa. There on May 1833, without the pressure from the European powers, a treaty was signed between the Porte and Muhammad 'Ali by which Syria and Adana were ceded to the latter. Ibrahim escaped from the Sultan the title of "sâlih" of Adana. His father appointed him to administer the new territory: a difficult task in view of the varied nature of the population of the country. Although the latter were agreed in their discreditation for Turkish rule, the strict régime introduced by Ibrahim did not suit them either. Risings everywhere were the result and Ibrahim was partially successful in suppressing them by the general confiscation of arms. The recruiting of the population for military service resulted in the emigration of great numbers to Asia Minor and Mesopotamia, and the commandeering of beasts of burden for military purposes resulted in the decline of agriculture and trade. Although there was quiet generally, the discontent was very great. When the war was begun again, Turkey in 1839, Ibrahim on the 24th June won a decisive victory over the Turkish army under Hâyâ Fehmi at Nizîb west of Birejik and the Turkish fleet under Fевzi Pasha went over to Muhammad 'Ali. The intervention of the powers, who negociations led to the Treaty of London on the 15th July 1840 (the so-called Quadripartite Alliance), altered the situation of things. Hoping for support from the French, Muhammad 'Ali declined the demand that he should evacuate Syria as far as 'Akka and confine himself to the hereditary pashalik of Egypt. No support was given him and the coast of Syria and Egypt were blockaded by the allied fleets. Ibrahim was in a difficult position between their landing army and the hostile people of the I bânoûn who were stirred up against him. After the capture of 'Akka by the English Admiral Napier and the latter's negotiations with Muhammad 'Ali in Alexandria, the latter was forced to agree to the evacuation of Syria on 22nd Nov. 1840. On the 29th Dec. Ibrahim left Damascus with his troops and returned to Egypt via Ghazza, sending a portion of the army home via 'Aţaba under Sulaimân Pasha.

In the years that followed Ibrahim Pasha was mainly concerned with the administration of Egypt. His interest in and knowledge of agriculture is praised. He was several times in Europe, sometimes visiting watering places to improve his health. He was well received in Europe. At the beginning of 1848 he was in Malta when his father's condition made it necessary for him to return. In June 1848 he became practically ruler of the country. In September he was formally granted the pashalik of the country by the Sultan in Constantinople and on the 19th Nov. 1848 he died in his sixtieth year. He was buried in the family mausoleum near the 53.'Amin al-Shâfi'i. Of his sons he was succeeded by Ahmad (born 1825). Isma'il (afterwards Khedive born 1827), and Mustafa (born 1832).

A portrait of Ibrahim Pasha is given in Cadalen and Barrault, Histoire, etc.; descriptions of his personality in Clot Bey, l. p. xxxii 997.; Paton, ii. 55.

Bibliography: Djalarti, 'Alîj'd al-Abhâr fi Tarikhîm al-Abhâr, Bulâk 1290 and often repr.; translated: Merveilles Biographiques et
Ibrahim Pasha, the celebrated Grand Vizier and favourite of Soliman the Magnificent, was born towards the end of the xvth century of Christian parents in Parga in Epirus. Kidnapped in his early youth and brought as a slave to the Imperial Serai during Selim I's reign, he was afterwards attached to the retinue of the heir apparent Soliman as long as this latter resided as Governor General of Sarkakhan in Magnesia. His social and musical abilities soon won him the young Crown Prince's special favour, and on his accession to the throne in 1520 Soliman made him his kahrib oda bashi (master of the inner chamber) and le hâdkîngilar a gâhasi (high court falconer). On the 13th Shab'ân 929 (27th June 1523) the Sultan made him Grand Vizier, at the same time granting him the governorship of Roumelia. During the thirteen years that Ibrahim filled these high offices he enjoyed more than any other ever did before or after him the Sultan's entire confidence. The Sultan actually shared his monarchical powers with him and gave him the insignia of the sultanate. He granted him the tâbil-kâné (military music) and the half of the Imperial bodyguard, as well as the title zeraneh sulân (Sultan commander-in-chief). Ibrahim's wedding (18th Radjab 930 = 23rd May 1524), which the Sultan himself attended, was celebrated with such pomp and splendour that it has become famous in the annals of Ottoman history. Shortly afterwards, owing to the troubles caused by the insurrection of Khâ'în Ahmad Pasha, Ibrahim went to Egypt (October 1524—September 1525) to re-establish order and to re-organise the administration of the country. In 1526 he conducted Soliman's first campaign against the Magyars, (Battle of Mohacs 28th August, capitulation of Öden-Pest 10th Sept. 1526). Three years later, he undertook a second expedition against Hungary together with the Sultan. Ibrahim captured Öden which had been recaptured by king Ferdinand, and led his army up to Vienna. (Siege of Vienna 27th Sept. till 15th October 1526). In 1532, Ibrahim invaded Hungary for the third time, but he did not advance further than Gunz, and had to content with pillaging the country. The armistice concluded with Ferdinand in the spring of the following year was chiefly due to Ibrahim's influence. The decision of the dispute between the king and Zappolya regarding the Hungarian possessions was placed in the hands of the Sultan, who again entrusted the Venetian Luigi Gritti, Ibrahim's favourite, with the delimitation of the frontiers. In his Persian expedition 1533-1534 Ibrahim was not less successful. After occupying the most important places he returned to Tabriz on the 13th July 1534 and took Baghdad on the 31st December of the same year. He returned to Constantinople in January 1536 and there contracted in February the first French capitulation with the ambassador of Francis I. Ibrahim had now reached the zenith of his power and splendour when he was suddenly executed, without apparent reason, by the Sultan's orders in the Imperial Serai, where he was spending the evening (22nd Rama'dân 942 = 15th March 1536). His body was disposed off with equal secrecy and buried in the vicinity of the Gâhîmeân near the Arsenal, where it was later days shown in the Derwîsh monastery Djâf. It was said that Ibrahim in his ambition coveted the throne for himself and that decisive proofs were in the hands of the Sultan; the fact is that the Sultan had done everything to nourish and encourage such thoughts in his confidant; and it seems that Ibrahim's attitude fully justified current rumours. A series of legends and sayings soon gathered around the figure of the mühîdî wa hadâfî Ibrahim Pasha, some of which are still current among the common people. A number of mosques, tâmilâr [q.v.], bridges, and aqueducts in the capital and in the provinces, chiefly in Roumelia, likewise perpetuate his name and preserve his fame to the present day. His splendid Serai near the Atmeidan was later occupied by the Imperial pages, and his gardens along the Golden Horn remained for centuries famous among the sights of the town.

IBRAHIM PASHA.

IBRAHIM PASHA (DAMAD), the favourite of Murad III and three times Grand Vizier under his successor Muhammad III. He was of Samovac origin, born in the neighbourhood of Ragusa; brought up in the Serai he was appointed ışıl-bâr (armour-bearer of the Sultan) in 952 (1547-1575); from Dhu l-Ka‘da 947-952 (End of Dec. 1579-July 1587) he was Aghâ of the Janissaries and then Beylerbey of Roumelia; he was sent to Egypt in 990, where he remained for a year and a half as Governor General. In the beginning of 985 he conducted the campaign against the Druzes of the Lebanon, and thence he returned to Constantinople in September of the same year. His wedding with the Princess ʿAghâ, daughter of Murad III, was celebrated there in Dümâdâ II 990 (end of May 986). At the end of Radjâb 995 (end of June 1587) he was made Kapudân Pasha, and held this office for about a year. Shortly after the accession of Muhammad III he was appointed ʿâlim-i hakk (deputy) of the Grand Vizier on the 17th Shaban 1003 (16th April 1595) and a year later on the 5th Shaban 1004 (4th April 1596) Grand Vizier. He accompanied the Sultan on his march against Eger (Erlau, Turk. Eğri), was dismissed on the day after the battle of Keresztes, on the 27th October, but restored to office for a second time after six weeks, at the end of Rabî‘ II 1005 (middle of Dec. 1596). The whins of the Sultan prevented him completing a year in office; he was dismissed on the 23rd Rabî‘ I 1007 (3rd Nov. 1597), but recalled to his functions for a third time on the 9th Dümâdâ II 1007 (7th Jan. 1599) and entrusted with the continuation of the war against Hungary. In two expeditions 1008-1009 (1599-1600) he succeeded in stopping the advance of the Austrian army. In Rabî‘ II 1009 (end of October 1600) he captured the stronghold of Nagy Kaniza, and as a reward the Sultan granted him the grand vizierate for life. Ibrahim then returned to Belgrade, where he died on the 9th Maharrâm 1010 (10th July 1601).

IBRAHIM PASHA (KARA), Grand Vizier under Muhammad IV, born in 1030 (1620-21) at Khandawer near Bâlburd, began his career as a lawer, then became ʿâfiya (page) of the outlawed Fâtimâ Muṣṭafâ Pasja (v. Hammer, usb. Gesch., vi. 26), and afterwards served several Pashas, including Kâta Muṣṭafâ, as kâtir (ward or agent), till on the 2 Rabbi‘ II 1011 (8 August 1651) he received the office of kâmîr muṣâfâ and (ten weeks later) that of mukatâr muṣâfâ (mace, and chief marshal). From the 17th Ramazân 1018 till the 12th Rabbi‘ I 1020 (13 Nov. 1667-23 April 1679) he was kapudân pâšâ, and at the same time administered for a period the grand vizierate as ʿâli-yi hakk and again after Dümâdâ II 1094 (June 1683) during Kara Muṣṭafâ’s campaign against Vienna. After the execution of the latter on the 6th Maharrâm 1095 (25 Dec. 1683) he was appointed Genel Vizier, and in the 22nd Maharrâm 1097 (19 Dec. 1685) banished to Rhodes on the 18th March 1686, and was stranded there a few months later in Shabân 1097 (June-July 1686).

IBRAHIM PASHA — IÇ-İL.

443

Libraries, e.g. the Serai library and the library of Ibrahim Pasha, were founded. The art of painting was also introduced in this way by Ibrahim Mutafçi. In his foreign policy, the Grand Vizir's object was to maintain friendly relations with the European Powers. After entering upon office he put an end to the conflicts with Austria by the treaty of Passarowitz (1718). A treaty with Peter the Great (1724) regulated the question of the frontier provinces of Persia by virtue of this the Turkish forces occupied in the following years all the most important cities: Hamadan, Gorgan, Erivan, Tbilisi, etc. definitive possession of which was assured to Turkey by the treaty of Humaydjan (30 Oct. 1727). In 1729 however Ahmadshah Khan invaded the newly acquired province, which resulted in a declaration of war by the Porte, though the Sultan agreed to this much against his will. This was the cause of a serious insurrection (September 1750), the people were discontented with Ibrahim Pasha's government, and rebelled in the fall of both Sultan Ahmad and his favourite vizir. Ahmad would not deliver Ibrahim alive into the hands of the infuriated mob and had him strangled in the Serai on the 30th Sept. 1750; on the following day he himself was forced to abdicate.

AL-ISHâHÎ (AL-ISHâHÎ or perhaps AL-AB-SHIHÂH) HÂKHâ, AL-DIN ÂBDU'L-FATH MUSAHMÂD b. AHMAD (SHIHÂB AL-DIN ÂBDU'L-ÂBÂMâ) b. MANŞûR b. AHMAD b. 'ÂD AL-MÂDÂSHE AL-SHªSHEFî, an Arabic scholar of Egypt, born in 790 (1358) in the province of Al-Bahriya in the place Al-Shªîha. Al-Shªîha cfr. Yâsun, Mâdgrâm, ed. Wüstenfeld, i. 92; de Sacy, Relation de l'Egypte par Abd-Allâtâfî, p. 631, No. 7; Ibn Du'âmâs, al-'Intiâr, Cairo 1310, v. 82 infra). Here, after learning the Qur'an by heart by his tenth year, he also received instruction in Fikh and Grammar. In 814/1412 he made the pilgrimage to Mecca. He often came to Cairo and heard the lectures of Djâlî al-Din al-Balkûnî. He became khatîf of his native place in succession to his father. For the rest he devoted himself to literary activity, showing a particular preference for adab. According to al-Sakhîwî, his grammatical knowledge was not thorough nor his language free from errors. He is the author of the Adab work al-Mustatraf fi kull Fann mustatraf (pr. Bulât 1272, Cairo 1275 [lith.], 1279, 1304, 1305, 1306, 1308), which G. Rat translated into French (Al-Mostafraf, Recueil de morceaux choisis . . . . . par le Sâkî Shªshad-dîn Ahmad al-Âshîhî etc., Paris—Toulon, 1899—1902). According to al-Sakhîwî, he was also composed of a panegyric work in two volumes, Alââb al-Aswâr liîad-Sînâr al-Âshîhî, and began a book on epistolography (fi 'ânâw' al-fatârân wa 'l-ta'âsu). He may be also the author of the Târîkh al-Âbd al-Mu'tahhîr al-Murshid, ibn Hâmadân. Hadîth al-Sayât, Khazîn âl-Mi'marî fi Domâqjî, etc. p. 80. No. 24.

Ibn 'Ahdî al-Bâlîfîmet al-ÎshâHî in 853 in al-Maâhâla and heard his lectures. He died after 850 (1440).

Bibliography: al-Sakhîwî, al-Dâmâ' al-Hâdî, Hs. Warn. 3694, p. 589; Brockelmann, Gesch. d. arab. Litt., ii. 56. (C. von ARENDONK.)

IBTIDÂ (inf. viii form of BD "to begin"); "beginning", "inchoative". Technical term of Arabic grammar denoting the use of a word as subject (muhtâdâ) of a nominal sentence. "The muhtâdan is any noun (or its equivalent) with which a beginning is made in order that a statement may be built upon it: the muhtâdâ and what is built upon it are both in the nominative case: and there can be no ibtida unless something built upon it follows" (Sibawayh, i. 239—43). Thus e.g. in Muhammâd b. Âsînî 'Ellîh, a beginning is made with Muhammâd that, which is nominative by "ibtida", and must be "built upon it" to complete the sense. The distinctive feature of the nominal sentence is that the relation of its subject and predicate is one of logical necessity, and is expressed by any finite verb. In general the subject precedes the predicate, and hence any sentence in which the subject comes first is regarded as nominal: cf. Zâid b. Mâhîa, where Zâidyâ is muhtâdâ, while in the sentence nàsta Zâidyâ Zâidyâ is subject or agent (see esp. Wright, o. c., ii. 251 A. B.). The precedence of the subject is however not universal, and cases are quoted in which inversion (tâbakd) occurs, usually for emphasis or other special reason.

In Prosody, ibtida is a name for the first foot of the second hemistich of a line. [Cf. MUBTADA, MISYAD.]

IÇ-IL (r.) "interior" the name of a province in Asia Minor, which at present forms an independent sanjak of the vilâyêt of Adana [q. v.] with Selsele as its chief town; 17 villages belong directly to it and also the nahiya of Ayash with 13 villages and Bâlûjdû with 6 villages. This sanjak comprises four kaft, viz. Ermenek [q. v.]; Müt, Gûlnîr (Kullünîr, Celendîris) and Anamûr [q. v., capital Corak]. The population consists of
45,000 Turks, 15,500 Kurds, 14,000 Greeks, 12,000 gypsies, and 8,780 of various origins. The hills are covered with woods (221,815 hectares). The products are wood for building purposes and cereals. The Kurdish nomads in the hills prepare butter and cheese, which they sell in the villages. Industry is carpet weaving. The district is covered with Roman remains. It is the ancient Trachæotis (Cilicia Petrea). The principal rivers are the Lamas-su (Lamus) and the Gök-su [q. v.]. The source of the Taṭi-su near the sea is probably indentical with the Nôr of the Greeks.

The origin of the name İç-il may be traced to the Turks considering from their capital Konia this district really seems to be in the interior of the mountains. It has also been suggested that the name is a corruption of Cilicia.

İÇ-OĞHLAN (r.), "servant of the interior" (i.e. of the palace) was the name given in Turkey to the pages in the Sultan's service. They were Christian children who had either been taken as war or given as tribute in Europe; Asia was free from this levy. The most beautiful and best developed were chosen and those who seemed to be best endowed and to possess the best character. Their names, ages, and country of origin were noted and then they were converted to Islam and circumcised. They received a strict training for fourteen years under the supervision of eunuchs. They were divided into four chambers. The first comprised 400 pages, who received a daily pay of four to five aspers, learned to read and write and were instructed in religion and good behaviour. After six years they entered the second chamber, where the same education was continued and they also received a military training, which included riding and fencing. The third chamber contained 200 pages, who learned to sew, embroider, and make arrows, also to play musical instruments, and perform the duties of a chamberlain. The fourth chamber consisted of only forty picked pupils who received a daily pay of nine to ten aspers; they were dressed in satin, brocade, and cloth of gold and acted as chamberlains, as keepers of the wardrobe, major-domos, first barber, first manicurist, secretaries, and inspectors. The highest offices in the empire were open to the latter class and their occupants were chosen from them. From the end of the xviii century therefore the tribute of boys was abolished, as the Turks were ready to pay to get their own children into the corps, so that they might attain the highest offices in the state. The Galata Serai (cf. i. 875), in which the Lycian Imperial now is, was formerly the training house of the R-Oğlan; there was another in the Imperial Palace at Adrianople but it was abolished by Sultan Ibrâhîm (1049–1058 = 1639–1649).

ID, festival. The word is derived by the Arab lexicographers from the root V'w'd and explained as "the (periodically) returning." But it is really one of the Arabic loanwords, which are particularly numerous in the domain of religion: cf. for example the Syrian 'idâ "festival, holiday."

The Muslim year has two canonical festivals, the 'id al-adhâ [q. v.] or "sacrificial festival" on the 10th Dhu 'l-Hijja and the 'id al-ţā'īf "festival of breaking the fast" on the 1st Shawâwal. The special legal regulations for these are dealt with in the following articles. Common to both festivals is the qalât al-'id (au) festival of public prayer of the whole community, which is celebrated sumna. In many ways it has preserved older forms of the qalât than the daily or even the Friday qalât (although in other respects it resembles the latter) and in its general style much resembles the qalât for drought and eclipses. It consists only of two rak'â [q. v.] and contains several takîb [q. v.] more than the ordinary qalât. After it a kmâ'd [q. v.] in two parts is held. It has no 'adhâ [q. v.] and no 'imám [q. v.]; as in the oldest times the only summons to it is the words al-qalât al-qimar. It should be celebrated in the open air on the musjid [q. v.], which is still often done, though mosques are frequently now preferred. The time for its performance is between sunset and the moment when the sun has reached its zenith. At both festivals, which last three or four days in practice, the Muslim puts on new or at least his best clothes; people visit, congratulate, and bestow presents on one another. The cemeteries are visited, and people stay in them for hours, sometimes the whole night in tents. These more popular practices are more usual at the 'id al-ţā'īf than at the 'id al-adhâ; the festival of breaking the fast is much more joyfully celebrated because the hardships of Ramadan are over, so that at the present day the "minor festival" has in practice become of much greater importance than the "major festival."

"ID AL-ADHÂ (also called 'id al-kurban or 'id al-nahr) "sacrificial feast" or 'id al-ţakrîr, the "major festival."") in India ɪbāb 'id (labba 'id) in Turkey bayâk-baiyam or kurban-baiyam (cf. Bairam). It is celebrated on the 10th Dhu 'l-Hijja, the day on which the pilgrims sacrifice in the valley of Minâ (cf. Heracliou), the ayyām al-tashrîq. The old Arab custom of sacrificing on this day in Minâ was adopted by Islam not only for pilgrims but also for all Muslims as sumna. (It is
only a necessary duty [wāṣifah] by reason of a vow [naḍrī].

This sinna (mu'akkada 'ala 'l-baṣaya) is obligatory on every free Muslim who can afford to buy a sacrificial victim. Sheep (one for each person) or camels or cattle (one for one to ten persons) are sacrificed. The animals must be of a fixed age and be free from certain physical defects (one eye, lameness etc.). The period of the sacrifice begins with the '-latul 'iṣra' and ends with sunset on the 3rd of the three 'umrah al-Waṣifah. The following practices are recommended to the sacrificers: 1. the tasmiya, i.e. the saying of the Basmah. [q.v.]; 2. the şálīf 'ala 'l-baṣah, the blessing on the Prophet; 3. the turning towards the kibbah; 4. the three-fold takbeer before and after the tasmiya; 5. a request for the kindly acceptance of the sacrifice. If the latter is offered on account of a vow, the sacrificer must eat none of it but must give it all for pious purposes. If the sacrifice, as is usually the case, is made voluntarily, the sacrificer enjoys a portion (a third) of the animal and gives the rest to charity.

On the public prayer and the wages at the festival on this holiday see 'ID. Bibliography: In addition to the works mentioned at the art. 'ID in the Fiqh books in the chapter on Uṣūlīya. (E. Mittwoch.)

'İD AL-FİTİR, ‘festival of the breaking the fast’ or al-'id al-'aṣghīr the minor festival’. Turkish khănk-baýram or quṭîr-baýram [cf. baýram], is the festival celebrated on the 1st Shawwal and the following days. If the Muslim has not paid the zakāt al-fitr [cf. zakāt] before the end of the period of fasting, he is legally bound to do so on the 1st Shawwal at latest and is recommended to do it before the public prayer 'Īsfīt which is celebrated on this day (cf. 'ID). As this festival marks the end of the difficulties of the period of fasting, although called the ‘minor’, it is celebrated with much more festivity and rejoicing than the ‘major festival’; cf. 'ID. Bibliography: The Fiqh books in the section Zakāt al-Fitr and the bibliography to the article 'ID. (E. Mittwoch.)

AL-'IDĀDA (A.) is the line of vision (diopter) marked on the reverse of the astrolabe, turning round the axis or pivot, with the aid of which various observations can be made, particularly the taking of the altitude of a star (see above i. p. 501). (H. Suter.)

IDĀFA (A.) (inf. iv. ivth form of daf “to draw near”); the adjoining of one thing to another; annexion. Technical term of Arabic grammar commonly named the “genitive relation”, or the “construct state”; the relation of two words of which the former is determined or particularised by the latter. The former (al-mudāf; “the annexed”) is said to be in the construct state, and the latter (al-mudāf ilāhi, “that to which the annexation is made”) is in the genitive case. Their relation expresses the genitive of possession, quality, material, cause or effect, part, object, or agent, and its distinctive features are: 1) that its two members together form one idea, and cannot be separated in writing; hence any adjective or its equivalent qualifying the mudāf must follow the mudāf ilāhi, as 'inna 'l-malaki al-hasanin ‘alā 'l-qubūr, “the beautiful daughter of the king”; 2) that both the mudāf and the mudāf ilāhi are definite in sense, or both are indefinite; in either case the former is regarded as sufficiently defined by the latter, and is regularly written without the article and without tanwin (cf. with above example 'inna 'l-malaki, “a king’s daughter”). An exception to this is seen when the mudāf is an adjective which qualifies a definite noun, and which must therefore have the article: this is iversa gharra al-baṣaya or “improper annexion”. In the strict Arabic interpretation the fact that the mudāf ilāhi is in the genitive is due to the government of a preposition expressed or implied e.g. bān 'alā (‘alā ilāha ‘alā) iversa ‘alā (‘alā ilāha bān); “the house which belongs to Zaid”.

(Robert Steevenson.)

IDDA (A.) is the prescribed period of waiting, during which widows and divorced women cannot contract a new marriage after the dissolution of the previous one. The idda prescribed for widows is legally 4 months and 10 days (cf. Kur'ān ii. 234). Among the ancient Arabs a longer period of mourning was prescribed. Then it was the custom for a widow after the death of her husband to withdraw to a small tent, where she spent a whole year during which she was not allowed to cleanse herself. See J. Wellhausen, Die Ehe bei den Arabern (Nachrichten von der Kgl. Gesellschaft der Wissenschaft zu Göttingen 1893, p. 454 sqq.). 'Idāda after divorce was unknown to the ancient Arabs. Whoever married a divorced woman who was pregnant, was considered the father of the child born after the marriage even though the previous husband was really the father. In Islam, however, the actual father was considered the father of the child and no woman was allowed to remarry within a definite period ('idda) after the dissolution of the first marriage. If she bore a child during this period only the previous husband could be considered its father. This 'idda after divorce lasts, according to Muslim law, for three menstrual periods (kurūf) or for non-menstruating women three months; if a divorced woman is pregnant she must not contract a new marriage in any circumstance for 40 days after the birth of the child (cf. Kur'ān ii. 238; lxv, 4). An 'idda is also prescribed for slave women, but in place of an 'idda of four months and 10 days, it only lasts two months and 5 days, and in place of an 'idda of three kurūf, one of two kurūf and in place of an 'idda of three months, one of one and a half months. (Th. W. Juvnbiil.)

IDGHIHĀM (according to the Baṣra school of grammarians) or IDGHAM (according to the Kufa school), technical term used in Arabic grammar to denote the close association in pronunciation of two consecutive homogeneous consounds. This may take place without complete assimilation, but in most cases the one consonant “enters into” and is assimilated to the other, which is then written and spoken as if doubled. The following is a summary of the rules as given by al-Zamakhshari.

1. In general 'idghām may occur when both
letters are vocalised (as *radda from *radda), or when the first is silent and the second vocalised (as *akhilaka for *akhil laka), but not when the first is vocalised and the second silent (as *fasiriti, *taliiti, etc.). This applies equally to pairs of identical letters, as exemplified above, and to letters which are phonetically related. Thus in the guttural group changes may take place from *h to *h (as *idhalkkakhi for *idhalk *halakhi; from *k to *k (as *lamma *ro*ulakku *lamma *ro*ulaka *kala), from *r to *r (as *marqalun for *marqai *huttun); and from *gh to *gh, *gh, and parallel changes are seen among the dentals, sibilants, and labials (as *sidqkkon from *sid *qkkon, *samhar from *samhar, etc.).

There also occur cases of interchange between dentals and sibilants (as *ga*ab*abshirkun for *ga*ab *qir*abun). The usual tendency is for the weaker letter to coalesce in the stronger, though exceptions are to be found (as *halakkkutta for *halak *kutta).

The letter *lif is not subject to *lid*k*lam, and *Hamsa only in the nominal form *s*al*un (e.g. g. *s*al*un, rd*aun). Generally, r, *dh, *f, and *y are not assimilated to any letter but themselves.

The verbal forms V and VI are frequently influenced. With verbs initial dental the prosthetic often assimilates *lifqariyya (with additional prosthetic *lif) for *t*ur*awa. In the forms, VII the inserted *t becomes *t after fr, f, r, t, or d. (e.g. *itfara for *itfakku; *itfara and *itfari *ara for *itfara and *ara before d, *dl, or r; *izzana for *izzanu. Mention may also be made of verbs initial or medial dental such as *itlak*ara and *itl*ara for *itlakara and *itlara for *itlak*ara, and more rarely, *bit*ala (with loss of *lif) for *bitala.

3. The L of the definite article is always assimilated to the first letter of nominal forms beginning with any of the so-called "solar letters" *l, *dh, *f, *r, *z, *th, *s, *l, *n, *d, and *n (as *arab for *arabash, etc.).

(ROBERT STEVENSON.)

**IDHADJ.** [See MALK AMIR.]**

IDHN (A.) i.e. permission. Special regulations on idhn are given in the Muslim law books on the law on the chapter of the law of slaves. According to law, slaves as a rule are not considered capable of making valid transactions. If however a master wishes to use the services of an Arab slave in the management of a business, he can empower him to perform the necessary legal transactions. A slave who possesses such authority is called madid*al*ahu lahu in the law books i.e. one who has been given an idhn. Contracts made by the slave so empowered are valid and binding as long as he does not overstep the limits of the powers granted him and he guarantees his pledges to the creditors with the goods his master has entrusted to him to carry on the business with.

**IDJAB (A.)** i.e. offer (in contracts), really the solemn declaration that the offer is irrevocable (cf. the Arabic expression *had na*qaba* al-basir i.e. the contract of sale is binding and irrevocable). In all legal transactions the observation of the pre-enibed legal form is most necessary and the mutual declarations, known in the *fiq* looks as id*gab and *kabul (i.e. offer and acceptance) are as a rule indispensable. Nevertheless in detailed books on law the question is discussed how far contracts are legal without such an id*gab or *kabul. For example, in cases where it is the local custom for parties to exchange goods at their value without further formalities, can a valid transfer of the property take place without id*gab and *kabul? Many scholars reply in the affirmative, but others hold such an exchange without the legally prescribed declarations to be only valid in cases of things of very little value.

**IDJAZA (A.)** Permission, a technical term in the science of Tradition, the permission granted to any one by a competent "carrier" of a text or even a whole book — whether it is the latter's own or an older text which he is able to trace back by a reliable chain of transmitters to the original transmitter or to the author — to transmit further the work, and to quote the transmitter as an authority. The *idjaza does not require immediate contact between the person receiving the permission and him who grants it. And there is a difference of opinion as to what formula has to accompany a text which has been acquired by means of *idjaza. Even the 'Abbadsid Caliphs al-`Nasir and al-Musta'sim gave a number of *idjazat for `hidij's which they had themselves received; the former gave authority to individuals to exercise this function in his name (Suyuti, *Tur* az al-Khulafa', Cairo 1305, p. 181, 186). In time the acquisition of the *idjaza from important persons became a favourite hobby. Fathers collected *idjazat for their sons from all possible shaykhs. (Abu 1-Malaii, ii. 2, ed. Popper, p. 194, 4). The celebrated Nadim al-Din al-Ghazzii (died 1061 = 1651) while going round the Ka'bah (from) at Mecca on his pilgrimage, was besieged for *idjaza by 'Abd al-Hamid 1 and his grand vizier Raghib Pasha sought and obtained the *idjaza for Tradion from the author of the author of the *Tiz al-`Aras (cf. x. 970 of this work). People take advantage of the presence of travelling scholars to obtain from them the *idjaza for their works: this is recognised as an honour to the scholars themselves (Abd Allai al-Makki [1250 = 1834] Rihlat Sallar, p. 70, 76, 90). On the other hand, as early as the 11th century A. H. the *idjaza system had developed to such unrestricted limits that a man before dying would declare that he gave all Muslims living at that time the *idjaza for the traditions he knew (Dhahabi, Ta’dibl al-Hafa`if, iii. 363; Ibn al-`Abbar, Tabula, p. 614, 15). Cf. such general grants of *idjaza in the viii. century in Suyuti, Bugha`ur al-Wu`at, p. 14). Out of modest beginnings (a specimen in Kern, Zeitsschrift d. Deutsch. Morgen. Gesellsch., iv. 74) there soon developed a high sounding rhetorical *idjaza style with extravagant epithets (*idjaza tannina, Suyuti, op. cit.)
other battle they fought with the Lahizim, all under the leadership of an ʿIdjī, against the Ta-
min (cf. Ḥanṣāla b. Malik, p. 262). At al-Kharrāb the ʿIdjī were attacked by their relatives, the Dhuhl, be-
cause they had given shelter to Ḥarīrī b. Zalīm, who slew Ḥarīrī b. Dīfār; Ḥarīrī b. Zalīm also did not wish to be the cause of hostilities left the ʿIdjī and went to the Taghlij. Together with the Dhuhl (under Ḥarīrī b. Waṭīja) they fought under the leadership of Mukashahir b. Ḥanṣāla against Kās b. Masʿūd, chief of the Shabiʿān, by whom there were been insulted on a visit. Of other battles of the ʿIdjī may we mention that of Musallīja (Musallīja) against the Kās b. Ṭasīm and Tami, who together made a raid on the ʿIdjī, that of Ṭirāb and one with the Mīnkar. At the battle of Dhū Kār, the ʿIdjī under Ḥanṣāla b. Thaʿlābā took a prominent part (see BAKK B. WIKIL, i. 605); they formed the advanced guard of the Bakr and bravely resisted the Persian attacks. Ḥanṣāla slew the Persian leader Djalāhzin, and another of their group the leader of a Persian body of cavalry named Hāmar. In the battle of Ḫalīṣ (12 = 634) between Ḥarīrī b. Ṭalāib and the Persians, along with other Christian Arabs on the side of the latter there were also ʿIdjī under Abu l-ʿAswad al-ʿIdjī. When in 22 = 644 Ḫaʿat Numair near Nahāwān was taken by the Muslims, in addition to Ḥanṣāla, there were many ʿIdjī among the latter. In Mesopotamia we still find ʿIdjī in the third century 250, e.g. during the rising of the ʿAlīd Yālāy b. ʿOmar at Kufa, in whose following were ʿIdjī cavalry under the leadership of Ḥālābā al-ʿIdjī.

[Text continued]

AL-IDJI, ʿAṣūd AL-DIN ṬABB AL-RAHMĀN B. AḤMAD, THEOLOGIAN AND PHILOSOPHER, HADIRI, AND MUSLIM, was one of the many authors of important works. He wrote a philosophical and theological treatise which has become known in Europe also; Th. Soerenes has published the last two chapters of it and the appendix with al-Djurjani's commentary under the title Statio 1a et 1b et Appendix libri Mehrāj autore ʿAḥlād-al-ʿIdjī cum Comm. Gougaux, Leipzig 1848: complete edition Constantinople 1839. He also wrote a brief catechism known as al-ʿAṣīl al-ʿAṣīl, which has several times been annotated and has been printed at Constantinople 1827, St. Petersburg 1313. Other works are given by Brockelman, Geschichte etc., ii. 208 sqq. Very little is known of al-ʾIdjī's life. We only know that he was a native of ʾIdjī, a fortress in Fars, held the office of ḡāda and muḥādīn at Shirāz (see Ḥarīrī, Dīfār, ed. Rosenschweig, ii. 242) and died in the year 756 = 1355.

AL-IDJI, ʿABU MANŞUR, CALLED AL-KISF (the piece) and AL-KHANNAK (the stranger) lived at the beginning of the ii = viiith century and was executed by Yusuf b. ʿOmar, governor of al-ʾIrāb in 120 = 735 = 744. His nickname al-Kisf owes its origin to the fact that he applied to himself the words of Kūrān, iii. 44 "if they (the unbelievers) saw a piece fall down from heaven, they would say it was a thick cloud", because he alleged he had been in heaven, God had touched him with his hand and let him down to earth with a divine mission. According to some statements he is said to have first of all recited the 'ʿAlīd ʿAbū Dīfār al-Bakrī, Muhammad b. ʿAlt as-

HISTORICAL. In the battles between the Bakr b. Wāṭil and the Tamīm at Nībādī and Taintal the ʿIdjī with other tribes of the Lāḥāzīm group were on the side of the Bakr. In an-
were called Manṣūriya after him, used to strangle their victims. Friedländer has aptly compared them to the Indian Thugs. On these and similar aberrations in Islam see Djähiz, Kirāb al-Ḥayy-arwān, ed. Cairo, ii. 96 sqq., and the discussion of this passage in Van Vloten, Worgers in Iraq in the Festschrift für Veth, p. 57 sqq.

A Bibliography: The main references to Abū Manṣūr are given in Friedländer, The Heterodoxy of the Shiites etc. in the Journ. of the Amer. Or. Soc., xxix. 89; al-Baghḍādi, ed. Muḥ. Badr, p. 234 sqq.

Idjmā (literally “agreeing upon”) is one of the four usūl from which the Muslim faith is derived and is defined as the agreement of the muṣṭafāhīd’s of the people (i.e. those who have a right, in virtue of knowledge, to form a judgment of their own): see iṣlāḥāt, after the death of Muḥammad, in any age, on any matter of the faith. As this agreement is not fixed by council or synod but is reached instinctively and automatically, its existence on any point is perceived only on looking back and seeing that such an agreement has actually been attained; it is then consciously accepted and called an idjmā. Thus the agreement gradually fixed points which had been in dispute; at a certain point, when thus fixed, became an essential part of the faith, and disbelieved in it an act of unbelief (kafr); cf. however, Goldziher, Über ijmā in Nachr. K. Ges. d. Wiss. Göttingen, Phil.-hist. Kl., 1916, p. 81 sqq. Each agreement, that is, became a ḫahif for its own and all succeeding periods. It could be expressed in speech (idjmā al-ḵawāl) or in action (idjmū al-fī) or by silence regarded as assent (idjmā al-sukūt or al-ṭaḏfir); cf. the similar classification as to the sunna of the Prophet. It is especially excluded that it means the agreement of the masses (al-awāmm), and in al-Shāfiʿi’s earlier view, before he went to Egypt, a statement by a single Companion was binding on the following generations. But later he gave up this opinion and it has now been generally abandoned.

A general principle of agreement was held in different forms from an early period. The legal system of Malik b. Anas was built largely on the agreement of al-Medina, the city of the Prophet; this agreement was local. The agreement of the two camp-cities (amṣār) of Kufa and al-Baṣra, with their masses of veterans of the early wars, had great weight. For later generations the agreement of the Companions was naturally decisive. But it was al-Shāfiʿi who developed this general principle into a definite asl, and ranged it with the other three. Further, from deciding points left uncertain by the other usūl it has come to be regarded as stamping with assurance points decided by another asl. This is in virtue of a divine protection against error (ijmā) which inheres in the Muslim people. In Shāfiʿite books of ḥadāt the statement is normal:—“such and such to a passage (Kūrān or Sunna), before the Agreement (ṣaḥīḥ al-idjmā), is the basis for such and such a rule.” At present the Wāhhabis (following the vanished Žāhidites) reject the universality of this principle and limit agreement to that of the Companions. And such specific sects as the Shāʿa and the Bāḥrīs are, of course, quite outside of the idjmā of the Sunnites.

The statement of the principle, which is given formally by the canonists, is as above. But the real working has been even wider. The basic tradition from Muḥammad runs: “My people will never agree in an error”;—and there are also Kur’ānic texts, iv. 115, denouncing those who follow other than the way of the believers (ṣaḥīḥa l-baṣṭan niʿtin). In consequence there is in the thought of the people as a whole a power to create doctrine and law, and not simply to stamp with approval that which has otherwise been reached. By means of idjmā what was at first an innovation (baʿda, the opposite of sunna), and as such heretical, has been accepted and has overridden the earlier sunna. Thus the cult of saints has become practically part of the sunna of Islam and, strangest of all, in the doctrine of the infallibility and sinlessness (ṣaḥīha) of Muḥammad the idjmā has overcome clear statements of the Kurʾān. In this, idjmā has not simply fixed unsettled points, but has changed settled doctrines, of the greatest importance. It is thus regarded by many, at present, both within and without Islam, as a powerful instrument of reform; the Muslim people, they assert, can make Islam whatever they, as a whole, please. Yet as to this there is grave divergence of opinion. Goldziher, Veröf. v. v. 56, viewing the matter historically, sees great possibilities in the future; Snouck Hurgronje, Le Droit Musulman in Rev. d.l’Histoire des Religions, xxxv. p. 15 sqq., 174 sqq.; Juvell, Handb. des Islam., Gesetz., p. 46 sqq. (B. MacDonal).

Idjtihād means the exertion of one’s self to the utmost degree to attain an object and is used technically for so exercising one’s self to form an opinion (ṣaḥīḥa) in a case (ṣaḥīḥa) or as to a rule (ṣaḥīḥa of law (Dict. of tech. terms, p. 198; List, iv. 109, 108 sqq.). This is done by applying analogy (kayfa) to the Kurʾān and the sunna. Thus in the earliest usage idjtihād was formally equated with kayfa, as by al-Shāfiʿi in his Risāla (ed. Cairo, 1312, p. 127 sqq., Bab al-idjmā). In his section on idjtihād he quotes first as a proof, Kur. ii. 145, and demonstrates that it involves that each must follow his own judgment, not to the direction of the kibla. It was therefore for Shāfiʿi practically the same as raʿya, “opinion” and the muṣṭafāhīd was one who by his own exertions formed his own opinion; being thus exactly opposed to the muḥaddith, “imitator,” who, as Subki in his Djama al-idjmā, says, “takes the saying of another without knowledge of its basis (dailī).” For this applying himself he would, according to a tradition from the Prophet, receive a reward even though his decision were wrong; while, if it was right, he received a double reward (Goldziher in Zeitscr. d. deutsch. Morgenl. Ges., lii. 649). The duty and right of idjtihād thus did not involve inaccuracy. Its result was always ṣaḥīḥa, fallible opinion. Only the com-
bined idjthād of the whole Muslim people led to
idjma', Agreement, and was inerrant. On the con-
troversy as to the whole peoples of error in muqjthāhid see Taftāzānī on the 'Akkaid of Nasafi, ed. Cairo, 1321, p. 145 sqq. But this broad idjthād soon passed into the special idjthād of those who had a peculiar right to form judgments and pass judgments should be followed by others. At this point and from the nature of the case, a difference entered between theology (kalām) and law (fikīh). Even to the present day many theologians assert that fikīh does not furnish a saving faith; see, for example, the Kifāyat al-'awāmill of Fadālī, passim, and the translation in D. B. Macdonald's Development of Muslim Theology, pp. 315—351. But all canon lawyers for centuries have admittedly been muqjthāhid of one degree or another.

When later Jāliim looked back to the founding of the four legal schools (muqjthāhid), it assigned to the founders and to some of their contemporaries an idjthād of the first rank. These had possessed a right to all questions from the very foundation, using Kurān, sunna, fiqhā, istiṣlah, istiṣθul, istiθqāb etc., and were muqjthāhid absolutely (muqjthāhid). Later came those who relied upon one or another portion of the Qurān (al-muqjthāhid), determining the fikīh as the masters had settled the broad principles (muqjthāhid of fikīh) and had laid down fundamental texts (muqjthāhid). If the view so stated was found implicitly in a nāṣ of the founder of the muqjthāhid, it was called a wajīh. Still later and inferior were those who had a right only by their knowledge of previous decisions to answer specific questions submitted to them, these were called muqjthāhid. The fikīh was by local opinion of the muqjthāhid's been had in a sense muqjthāhid, givers of fatwa's; but these were muqjthāhid only. Such was the formal and generally accepted position. But from time to time individuals appeared who, moved either by ambition or by objection to fixed positions, returned to the earliest meaning of idjthād and claimed for themselves the right to form their own opinion from first principles. One of these was Ibn Taimiyyā (d. 703/1308), and the list extends to the time of al-Shāfi'i (d. 820/1417). Another was Suyūtī (d. 911), in whom the claim to idjthād unites with one to be the muqjthāhid, or renewer of religion, in his century. At every time there must exist at least one muqjthāhid, was his contention (Goldziher, Characteristic i. ur-Suyūtī's, p. 19 sqq.), just as in every century there must come a muqjthāhid. Another, but a very heretical one, was the Emperor Akbar (Goldziher, Vorlesungen, p. 311). In Śīra Jāliim there are still absolute muqjthāhid. This is because they are regarded as the spokesmen of the Hidden Īslām. Their position is thus quite different from that of the 'alām' among Sunnites.

They freely criticize and even control the actions of the Śīrā, who is merely a locum tenens and a resolver of order during the absence of the Hidden Īslām, the rules of ira divine. But the Sūra 'alām are regarded universally as the subordinate creatures of the Hidden Īslām (Goldziher, Vorlesungen, p. 215—218, 231 sqq.).

IDJMA' [See IṣṭIṣRĀL.]

IDJMR, infinitive of the 1st form of the root
djmr; to conceal; technical term of Arabic
grammar denoting the honorific of a damir [cf. the
art. DāMR]. Iṣṭírār (ellipsis or suppression) of a
verb or phrase is not uncommon; cf. the frequent
omission of the verb of 'Saying' before
quotations of speech (e.g. Kurān II, 119, 121, 127 etc.),
and such expressions as sākūna warā'ayn, meaning
in full sākūa 'Išān sākūna warā'ayn 'Išān ra'ayn,
"God give you abundant water and pasture!"

In Frosody Iṣmr means the quiescence of the
second syllable of a foot; it applies to the Kāmil
meter, in which the foot muqjthāhid may be
shortened to muqjthāhān.

Kunst, pp. 81, 355—6. (Robert Stevenson.)

IDRIS, the name of a man, who is twice mentioned
in the Kurān, Sūra xix. 57 sq.: "Mention
Idris in the book. Verily he was an upright man,
and we raised him to a high place". And
Sūra xxi. 85, mentions him along with Ismā'īl
and Dhu 'l-Kifī as one of the patient (gabarun)
ones. These passages are not calculated to give
any explanation of this character. Even the name
Idris was for long a puzzle to Orientalists till Noldke
pointed out that it probably concealed the name
Andres (Zeitschr. für Assy., xvii. 84 sq. sqq.). That
this Andrus who was raised to a high place, is
Alexander's cook who obtained immortality has
been suggested probably rightly by R. Hartmann
(ibid. xxiv. 314). The post-Kurānic Muslim writers
unanimously insist that Idris is the Biblical Enoch
who also obtained immortality or, as Jewish
literature says, was taken to heaven.

The information given by those Arab writers
regarding Idris is mainly derived from Apocryphal
and later Jewish sources. The Biblical Enoch has
three striking features which are repeated in the
Muslim legends from Jewish models (Genesis v.
23 sqq.): 1. he is a pious man; 2. he lives 365 years
on earth which suggests a solar hero; 3. God
takes him to himself. The name Enoch, the
consonants of which suggest the meaning "initiated"
has probably also affected the formation of this
legend.

As to the last point, Idris appears also in
Muslim literature as 'initiated' in sciences and
arts. He was the first to use pens (kalām), to use
embroidery and sew garments and wear them; previously people had
content with skins. He is therefore the
patron saint of tailors, one of the seven patrons
in the jāmī system. He was also the first
astrologer and was skilled in medicine
(fikīh).

As a pious man he was the first to mount
horse to fight "on the way of God" against the
wicked descendants of Cain. As a prophet
received revelations through Gabriel. Thirty books
(gaṣīfa) were revealed to him in this way in
his activity as a prophet and king see particu-
larly Ibn al-Kifî (ed. Lippert), p. 1 sqq. He received the name Idrîs because he was thoroughly versed in former revelations as the result of industrious study. Baidâwi's philological conscience, however, does not allow of such an etymology from the Arabic; it might perhaps be possible in the cognate languages. His ascetic piety aroused the admiration of the angels. The angel of death asked Allâh for permission to visit him. He came to him in mortal form and invited him to sup with him. But Idrîs declined; the same thing happened on the following two nights. On the third day Idrîs asked him who he was. When he heard his answer, Idrîs asked him to receive his spirit. He therefore remained an hour without his riḥâ; he then received it back. He next asked to be allowed to take him up into heaven to see it and Paradise. When he reached Paradise he would not come out again. He held fast to a tree and appealed to two texts of the Kur'ân: "Every soul shall taste death", for he had already tasted death; and "no one shall drive them out". He therefore would not leave. God then allowed him to remain. He is to return from thence. He and Jesus live in heaven; al-Khaḍîr and Efîas are immortal on earth.

In this version the character of Idrîs as solar hero is seen from the fact that his soul is taken from him at sunset. In another version there are also several traits which point to a solar myth. When one day on a journey he found the heat of the sun unpleasant, he asked God to alleviate it in favour of "him who has every day to travel five hundred years in this heat" (i.e. the sun angel). He begged the latter to postpone his death. He took him with him to the place where the sun rises and transmitted Idrîs' request to the angel of death. The latter could not grant his request. The angel of the sun however was allowed to tell him the day of his death. The angel of death opened his diwân but could not find the date in it. He explained this to mean that Idrîs must die at sunrise. The angel of the sun actually found him dead then.

Nevertheless Idrîs is immortal; expressed in the language of myth this means: the sun dies every day and is revived every day, and is thus immortal. Another recollection of the solar character of Idrîs is preserved in the explanation of the high place of Sûra xxix. 57 as the heart of the spheres i.e. the sphere of the sun.

Idrîs is also identified with Ilyâs and al-Khaḍîr. The Greeks are said to know him under the name Hurmuz, or as Bar Hebraeus says (Hist. Dynast., ed. Pococke, p. 9) Hermes Trismegistus. For further information see Ibn al-Kifî, l.c. In agreement with passages of the apocryphal Enoch Muslim legends also tell that he went through Hell.

On the relation of the Ḥârânsî to Idrîs-Hermes see Chwolsohn, Die Säuber und der Stäbismus, Index, s.v.

Idrîs I. i. ʿAbd Allâh, son of ʿAbd Allâh b. al-Ḥasan [q.v.], an Allîd., founder of the Idrîsî dynasty in the Maghrib, took part in the ʿAlid rising against the ʿAbbasîs (c. 763) and after defeat and death of his nephew al-Ḥasan b. Ṭāhir b. al-ʿAbîr b. al-Ḥasan at Fâ ḳîkh [q.v.] near Mecca on the 20th of Dhu-l-Hijjâh 169 = 11 June 786, when he had himself fought, remained some time concealed, but succeeded in reaching Egypt accompanied by a faithful freedman al-Râṣîd, and with the assistance of the postmaster there, al-Wâdhî, in secret a Shîʿah escaped to the Maghrib, where he was received by Iṣâk b. Muhammad, chief of the Berber tribe of the Awraba. At the instigation of this chief, Idrîs was on the 4th Ramâdân 172 recognised as suzerain by the Awraba and later by the Zenêta, Zuwâgâha, Lâmêya, Luwâta, Ghoumara, and Sadaddîtta, who inhabited the north of the modern Marocco, but this recognition of a ʿAlid by the Berbers, who only shortly before had been Khaṭârdîs was based more on political than religious motives. Idrîs, who only took the title of imâm, is even said by al-Sâghîr to have received the Muṣâli teachings of Iṣâk b. Muhammad.

In the district of Tèmesâ he attacked Jewish, Christian, and heathen tribes, whom he seems to have defeated rather easily, and in a campaign eastwards (about 173 or 174 = 789-790) also brought under his sway the town of Tiemcen (Agadir) and its practically independent prince, Muhammad b. Khâyber b. Sûlàt, who recognised Idrîs as the rightful imâm. In Tiemcen where he spent some time, he founded a mosque (Safar 174), the pulpit of which, with his name inscribed on it, still existed in Ibn Khâlidân's time. Soon after his return to the capital Uli (the ancient Volubilis) he was poisoned at the instigation of the Caliph Harûn al-Râṣîd, apparently by a certain Sulaimân al-Shâmmî (1st Rabîʿ II. 177 = 16 July 793). The details given by some historians of this murder and the means used (watermelon, a grape a toothpick, or tooth-powder) as well as the prosecution of the murderer by al-Râṣîd are only romantic additions.

Leo Africanus, Dell' Africa (Ramusio, Primo volume delle navigazioni, Venice 1903), Pl. 31, D; Fournel, Les Berberes, i. 295–400, 447–449; A. Müller, Der Islam etc., i. 488, 492, 550.

(Rene Bassett)

**IDRIS II, son and successor of Idris I** [q.v.]. The latter at his death left no children but one of his concubines named Kanza was pregnant by him. His freedman al-Rashid persuaded the Berbers to wait till the child was born and in case it should be a son, to proclaim him imam and successor to his father. This expectation was fulfilled. Kanza gave birth to a son on the 1st Djamâa II 177 (793), who was recognised as Idris I's successor and entrusted to al-Rashid's care. The attachment of this man to the family of Idris brought upon him the persecution of Ibrâhim b. al-Aghlab, the almost independent governor of Ifriqiya. He was murdered in the same way as his master, but replaced by a Berber named Bahilû. When the latter was overthrown by Ibrâhim he had to entrust the regency to Abû Khâlid Yazid b. Iyâs. To prevent further intrigues the Berbers summoned the eleven year old Idris to the throne and took the oath of fealty to him in the mosque of Ullî. But Ibrâhim continued his intrigues while Idris alienated the Berbers by his too openly displayed preference for Arabs and by choosing an Arab vizier. When fifteen years of age he had Isâk b. Muhammâd put to death in spite of the great services he had rendered his father, under the pretext that he was negotiating with Ibrâhim b. al-Aghlab, and by this stern, not to say unjust, measure thwarted any attempt at a rising. About the same time 192 (808) he built his new capital Fâs [q.v., p. 76 sq.] and at the age of eighteen again had the oath of fealty sworn to him, while Ibrâhim b. al-Aghlab, being busy putting down risings, was unable to interfere with him. At the same time Idris changed his policy and became more friendly to the Berbers. After a campaign against the Masmûda, whose towns he captured, he marched against Tlemcen (Agadîr) which had made itself independent, and put the government of the town in the hands of his cousin, Muhammâd b. Sulamîn b. 'Abd Allâh. After several engagements with the Khâridjî Berbers, the details of which are not known, he died at Fâs in Rabî‘ I 213 (May 20–June 18, 828) at the age of 36, according to Ibn Khaldûn of poisoning; according to al-Bakrî, he was choked by a grape seed. He owes his fame mainly to the foundation of Fâs, which has kept his memory so green to the present day in Marocco that the beggars there still seek alms in his name. However little we may know of the details of the careers of him and his father, it is clear that he was the less important of the two.

**AL-IDRISI** (formerly usually written Edrisî) Abu 'Abd Allâh Muhammâd b. Muhammâd b. 'Abd Allâh b. Idris al-Hamûdî (see above Hâmûdîs) al-Hâsâni, usually al-Shârîf al-Idrîsî (as a descendant of the Prophet), was born at Ceuta in 493 (1100), died in 560 (1166) (cf. especially Khid., Fihrist al-Kutub el-Arâbîya, v. 166), studied in Cordova, thence called al-Kurûbî (Biblioteca Arabo-Sicula, p. 610 and the Italian version, ii. 487), while the kunya and nida, Ibn al-Thâ’yîrî given by Ibn Bahşûn in the Khâridjî of Imâm al-Dîn is still unexplained, after various travels spent a long time at the court of Roger II, the Norman king of Sicily i.e. Palermo (and it seems also at Sahâlî, the “Sicilian”), where shortly before Roger's death (548 = 1154) he completed the description of the great silver plate map of the world, the celebrated “book of Roger”, the Kitâb Rûdjûr or al-Kitâb al-Rudjûrî, or Nûshât al-Muâshûtî fî 'ibrîkîr al-Anfûs, the text of which (and that 71 maps) is only partly published, but the whole was translated (very incorrectly) into French by Amédée Jaubert (1836–40). For William I (1154–66) he wrote a still larger geographical work, Rawd al-Uns wa-Nâsît al-Nafis or Kitâb al-Mamâlik (walls-Ma‘allûk), which however is only available in the extract preserved in the Hakim Oghli ‘Ali Paşa Library in Stamboul (NM 685) that noticed a decade ago by J. Horovitz in searching the Stamboul libraries for historical manuscripts), while the superficial synopsis of the Book of Roger, entitled Nûshât al-Muâshûtî fî Dhikr al-Anfûs wa-Alfâr wa-Buldân wa-Lajsrur wa-Muâs’dîn wa-Alfûs was printed in Rome as early as 1592 and translated by the Maronites Gabriel Sionita and Joannes Hersonita inaccurately into Latin in 1619 as Geographia Nubium (from the false reading in Clime 8, part 4, at the beginning, dealing with the sources of the Nile: arfâna “our land” for arfâna “their land”). An edition and annotated translation of this is the most important geographical work of the Middle Ages with the important maps from the manuscripts at present known. Paris (2), Oxford (3), Stamboul (only Aya Sofya, as the other all too summary statements of catalogues only refer to the Roman edition of 1592 or to Jaubert!), Petrograd, and Cairo is one of the most urgent tasks for Arabic scholarship. I am already meditating an edition of the smaller unique in Stamboul, as I have photographs of it.

C. F. SEYBOLD.

**IDRISIDS.** We have dealt above with the reigns of Idris I and Idris II. The decadence of the dynasty began with the death of the latter. He left eleven sons of whom the eldest, Muḥammad, succeeded him. But at the instigation of his grandmother Kania, he divided his kingdom into five, which he allotted to eight of his brothers, some of whom must have been still children. He doubtless reserved a kind of suzerainty for himself but this did not prevent the rivalries and quarrels which broke up the empire. The statements of the historians on this division do not agree perfectly. This is the most probable table: al-Ḳāsim obtained Tangier, Ceuta, Ḥadjar al-Naṣr, Tetuan; ʿOmar: Tiḡaṣa and Tarhqa; Diʿūd; the land of the Husayna, Tasaṣ, and Ṭabān and the land of the Ḥaḡyāba; ʿAbd al-Baṣr, Ṭaḡa and al-Awrīsh (Larrache); ʿAbd Allāh: Aḥmad and the land of the Nafs and ʿIṣa; ʿIsa: ʿAḌa (Cinha), Saʿla (Sala), Azemūr and the land of the Tameṣn; Aḥmad: Muḥiṣa (Mequines) and Tadda; Ḥamza: Ulilit and its dependencies. At the same time, Tlemcen (Agadir) remained in the hands of Muḥammad b. Sulaymān, cousin of Idris II. Civil wars began at once, the possessions of ʿUṣayn and al-Ḳāsim, who had revolted against their brother Muḥammad, passed to ʿOmar. The imām of Fāṣ died in Rabīʾ II 221 (836); he was succeeded by his son ʿAlī, who was replaced in Ḥadjar b. 244 (848) by his brother Yaḥyā. The latter founded the celebrated mosque of al-Karawīyyn in 245 (856) [cf. Fāṣ, p. 73–7]. His son Yaḥyā b. ʿAlī succeeded him, but his great debauchery cost him his power and his life. His father-in-law and cousin, ʿAlī b. ʿOmar, took advantage of the disturbances that broke out on the death of Yaḥyā to seize Fāṣ and reconstitute in part the empire of Idris II. But he was overthrown in a rebellion of Berber Ṣufris and the power passed to one of his cousins, Yaḥyā b. ʿAlī b. al-Ḳāsim, called al-Miṣrīn. A revolution replaced him by Yaḥyā b. Idris b. ʿOmar in 292 (905). Civil war was complicated by dangers abroad. In ʿIlīyriya and the central Maghrib the impotent Aḥgalid dynasty had been driven out by the Fātimids. Spain, flourishing under the Omayyads, threatened the Maghrib, and in the country itself, the chief of the Muḥiṣa, Muḥammad b. Abī Ḥ-Ṣayyaa, a mortal enemy of the Idrisids, established his independence in the valley of the Mollīya. The power of the latter at Fāṣ was destroyed by the Ḥaḍirān general Maʿṣūm, cf. *Ḫāmīdīs, p. 88*, cousin of Maʿṣūm b. Abī Ḥ-Ṣayyaa in 307 (919). The princes of this family had to seek refuge in the Rif and among the Ghomāra [q. v.]. Their fortunes seemed to revive under al-Ḥasan b. Muḥammad b. al-Ḳāsim, called al-Ḥadjdījam, the “bloodletter” from the wounds he caused. He recaptured Fāṣ, defeated Muḥammad b. Abī Ḥ-Ṣayyaa in 314 (926) and regained a part of the territories of his ancestor. But the Omayyads gained a footing in the Maghrib by the occupation of Melila. Al-Ḥasan was treacherously handed over to Muḥammad by the governor of the Kairawān quarter in Fāṣ, then died while attempting to escape. The last Idrisids only held two small states comprising a part of the Rif and the land of the Ghomāra, from Tangier to Ceuta [q. v.], where they were pursued by the hatred of Muḥammad b. Abī Ḥ-Ṣayyaa. In establishing themselves at Ceuta the Spanish Omayyads dealt a terrible blow at the greatly reduced dominion of the Idrisids in 310 (911). The latter reappeared a little later, but it was as governors for the Caliph of Cordova. A semblance of power was left them around Ḥaḍjar al-Naṣr [q. v.]. But the final ruin of the Idrisids, tossed between the Fātimids and Omayyads, was consummated in 363 (974). On Muḥarram 1, 364 (Sept. 21, 974) [cf. al-Ḫakam II], the Omayyad general, Gālib, made a triumphal entry into Cordova, bringing in his train the last Idrisids. Their rule had lasted two centuries. At a later date a branch of this family succeeded in forming a state at Malagrica which lasted a little over twenty years [cf. Ḥammūdīs]. In Morocco itself, a certain number of families of Shawris claim descent from the Idrisids. It is not impossible that some of them are, but as a rule these claims are dubious.

(René Basset.)

**IFLĀK,** the Turkish name for Wallachia. In 1391, the Voivod Mircea became tributary to the Turks, but the land remained independent.
The Boyars retained the right to choose their ruler, who was thereupon confirmed by the Porte. This state of affairs remained practically unchanged till the treaty of Adrianople in 1829, although alterations were made more than once in the terms of a voivod refused tribute or Austria or Russia interfered in the affairs of the principalities. For example, as early as the xvth century, the notorious Wlad Drakul, whom the Turks always call Kayzuku (the impaler) Vovoida, rebelled against the Turks, had the Turkish ambassador, Hamza Pasha, impaled according to his custom, and ravaged Bulgaria. This provoked a campaign by Suljo Manshub Mhambad II, through which Drakul was forced to flee to Hungary and Radul was installed as voivod (1462). After his death in 1477 the cruel tyrant returned, but he was very soon murdered in 1479. Towards the end of the xviith century the Vovoid Michael succeeded for a brief period — he was murdered in 1601 — in bringing Transylvania and Moldavia under his sway. In the period following, the custom came into operation whereby the Vovoids, who took and utterly destroyed in 393 (954-955). In 338 (949-950) he had built himself a capital, Ifgan (Fekkan) in the southeast of Macedonia and peopled it with natives of the surrounding country. But Ya’l’s power was of short duration. He fell in 347 (958) in a battle with Fathimid troops, whose general Jjawhar [q. v.] sacked Ifgan.

The confederation of the Iren was then broken up. Some sections went to Spain where one of their chiefs, Abu Nur, succeeded in 405 (1014-1015) in seizing the town of Ronda. The others after first taking refuge on the edge of the Sahara, tried to reinstate themselves in the central Maghrib by combining with the Maghraba against the Sanhadja. Defeated and scattered once again by Bulukkita b. Ziri in 970, they then tried their fortune in the extreme Maghrib. Yaddu b. Ya’l after first of all showing a vigorous attachment to the Omayyad cause tried to form a principality for himself at their expense. He twice took Fas from Ziri b. Atya the governor of the Maghrib, but could not hold it. One of his relatives, Hammama, revived the fortunes of the Iren. He conquered the land of Taida and maintained himself there in spite of the attacks of the Maghraowa of Fas. His brother and successor, Abu’l-Kamal Tamim, led the Iren in a holy war against the Berghhydrate. He destroyed the power of these heretics and installed himself in Shala. He also took Fas from the Maghraowa but was driven out again in 429 (1037-1038). He died at Shala in 466 (1054-1055). The kingdom, which he had founded, did not long survive him. It was destroyed by the Almoravids who massacred the Iren in all the conquered localities. The remnants of the tribe having sought refuge in Tlemcen were exterminated after the capture of the town by Yusuf b. Tashfin.

Ifrikiya (according to Fleischer, Kleine Schriften, i. 239, more exact than the spelling Ifrikiya used hitherto), the name given by the Arabs to the eastern part of Barbary, the name Maghrib being reserved for the western part. Ifrikiya is simply a corruption of the Latin Africa, which name the Romans gave first of all to the province organised by them after the destruction of Carthage and which was then extended to Bar-
bary and finally to the whole continent of Africa. Nevertheless the name has been given various fanciful etymologies. "Some", writes al-Bakri, "say that the name means the "queen of heaven"; others derive it from Ifriq b. Abraha al-Ra'ish, who led an army into the Berber country and built the town of Ifriqiyah (cf. al-Mas'udi, ed. Paris, iii. 224). According to others, the country took the name from Afriq, son of Idris and his wife, the second wife of the patriarch, or from Farq b. Migrim. According to Ibn Khaldun, Ifriqiyah is derived from Ifriq b. Kais b. Saifi, one of the kings of Yemen. According to al-Makrizi (in Ibn Abi Dinâr) Afriksh b. Abraha b. Dhi 'l-Karnain, having conquered the west built a town there which he called Afrika. Ibn al-Shabbât (quoted by Ibn Abi Dinâr) connects Ifriqiya with barîq "clear" because "in Africa there are no clouds in the sky". Leo Africanus and Ibn Abi Dinâr derive Ifriqiya from faraqa "to divide" because it is separated from Europe by the Mediterranean and from Asia by the Nile, or also because it lies between east and west. The boundaries of Ifriqiya, according to al-Bakri, were Barqa on the east and Tangier on the west. From north to south it extended from the shores of the Mediterranean to the "sands which mark the beginning of the country of the negroes". Ifriqiya would thus have comprised, in addition to the Africa proper of the Romans, Tripolitania, Numidia and even Mauretania. Earlier and later geographers give narrower limits. Al-I斯塔khri, for example (ivth century A.D.) places Ifriqiya between Barqa and Tripoli (Bibl. Geogr. Arab., ed. de Goeje, i. 26 and 34). For Abu'l-Fida', Ifriqiya begins at the eastern extremity of the land of Bougie [q. v.] which, according to him, forms part of al-Maghrib al-Awsat and terminates at Barqa. In a general way, however, one may regard the western border of Ifriqiya as corresponding to the meridian of Bougie. In the south, al-Idrisi and later, Leo Africanus, clearly distinguish al-Ifriqiya from Bilad al-Jarid (the Numidia of Leo). In the Sahara, according to Ibn Khaldun, the Ma'rib separates the desert of al-Ifriqiya from that of the Maghrib. It appears moreover that besides this general sense, the term Ifriqiya was often used in a narrower sense. Ibn Khaldun often applies it to the central and northern part of Tunisia and opposes Ifriqiya to Tripolitania, al-Jarid and the province of Constantinene. (cf. especially the passages in this author referring to the Hilâl invasion). Abu'l-Fida' places Bougie, Bône and Gafsa outside al-Ifriqiya. The limits of the country would thus be those assigned by Marmol to the province of Tunis "which is called Africa", that is to say, on the west the province of Constantinene, on the east that of Tripoli; on the south the mountains of the Atlas with the province of the Zab and the province of Numidia and of eastern Libya, on the north the Mediterranean from the mouth of the Niger (Medjerda) towards Bizerta to Capes (Gabes). Finally, in the xvith century, Ibn Abi Dinâr tells us that "scholars understand by al-Ifriqiya the land of al-Kairawân".

At the beginning of the Hidjra, al-Ifriqiya was still in the power of the Byzantines (Rûm). It was peopled by Berber tribes (Huwâra, Luwâta, Awrigha, Neftîsa, Ifren, Nefawâ, etc.) and descendants, of foreign immigrants into Africa, who were called Afrik by the Arab writers. It included a large number of towns and villages and was covered with flourishing fields. The weakness of the Byzantine authorities and the richness of the country attracted the attention of the Arabs, whose incursions began immediately after the conquest of Egypt. The first Muslim expeditions, of which however we only possess incomplete and contradictory accounts, were simply raids. The invaders evacuated the country after having pillaged it and did not attempt to capture the strongholds held by the Byzantines. The conquest proper did not begin till after the foundation of al-Kairawân by 'Oqba b. Nâfi' in 50 (667). Arab domination in the country however remained very precarious to the end of the viith century. The Greeks held the most important towns; on the other hand, the revolts of the Berbers forced Zu'air b. Kais, the successor to 'Oqba, to evacuate al-Ifriqiya on two different occasions. It was only under the government of Hasan b. al-Mu'inn that the Berbers were forced to submit and the Byzantines lost Carthage and the principal towns in the country.

Placed at first under the governor of Egypt, al-Ifriqiya next made an independent government under Musa b. Nasir, who was directly under the Caliph in Damascus in 86 (705). The conquests of this general extended the boundaries of the province to the Straits of Gibraltar. But from the middle of the viith century the Khôrûd revolt considerably diminished the Arab territory. Al-Ifriqiya properly so called was ravaged by the Abadâ Berbers of the east (Huwâra, Wafardjuma) and by Zenata of the central Maghrib. It even was lost by the 'Abassid caliph for a time. Al-Mansûr however succeeded in establishing 'Abassid rule in Ifriqiya again from 144 (761) onwards, while independent Berber principalities were set up in the Maghrib. However, the Aghlabids [q. v.] dynasty (ixth century A.D.) only nominally recognised the suzerainty of the Caliph. The overthrow of the Aghlabids by the Fâtimids caused al-Ifriqiya to pass into the power of the Shi'a, who gave it a new capital, al-Mahdiya, and when they established themselves in Egypt made it a vice-royalty under the Zirids. The foundation of the Êmmâddid kingdom was however not long in depriving the Zirids of the western part of al-Ifriqiya. On the other hand the Hilâl invasion, a result of the repudiation of Fâtimid authority by the Zirid al-Mu'taz in 440 (1048-9) [cf. Fâtimides, p. 90], exposed the country to the most terrible disasters: Al-Ifriqiya, previously very flourishing and covered with vineyards and farms, was ravaged by nomads and almost entirely ruined. Some Arab tribes, notably the Bîyâl and the Djassah, instaled themselves in the country and perpetuated there their habits of disorder and brigandage. Finally, at the beginning of next century, the Normans of Sicily occupied the principal points on the coast. As a result of the Almohad conquest, al-Ifriqiya became one of the provinces in the vast empire founded by 'Abd al-Mu'inn [q. v.], but she soon recovered her independence under the Hafidh [q. v.] dynasty. The rule of these princes was at first extended over Tunisia, Tripolitania, the province of Constantinene, Bougie and the Zab, but from the end of the xvth century it was reduced to Tunisia in the strict sense of the word. Henceforth the history of al-Ifriqiya is merged in that of this country.

Bibliography: al-Bakri, Deux. de l'Afri-

'Ífrîkit, according to the usual explanations, is one who overcomes his antagonist and rolls him in the dust ('áfar); who successfully carries maters through (mutālīgh); who is, therefore, powerful in a hostile sense, evil, crafty (Zamakhshāri and Baidāwī on Kur. xxvii. 39; Līsin, vi. 263, l. 1 sqq.; l. 14 sqq.; De Sacy, Haríria, p. 355). The classical and only Kur'ānic occurrence is in Kurūn xxvii. 39, "an 'ífrīt of the djinn." Hence it has come to be used peculiarly of the djīnn; but in the first instance it was plainly a general epithet, and thus the Kur'ānic passage might be translated, "a powerful djīnni." So, too, "an 'ífrīt of the djīnn" occurs in two traditions from Muhammad in Damīrī's Hayawān (ed. Cairo, 1313, l. 179, l. 15 sqq., l. 104, l. 22 sqq., under djīnn and 'ífrīt). But soon the word became identified with the djīnn and especially with the more satanic and malignant element among them. So Rāghib, in his Muẓafrait (p. 393) speaks of its application to human beings as metaphorical, and even Tābarī, Tafṣīr, xix. 93, seems to limit the word to the djīnn. But it was not understood as meaning a special class of these as e.g. ǧūl (q. v.); contrast the classification (asāfīf) in Aḥmad al-Mardījūn, p. 17 sqq.; and in the Fīrīsīt (p. 309, l. 21) 'áfīrū is used as a general name for both djīnn and šāfi'ān. Even the distinctive meaning of hostility seems often to have been lost. In The 1001 Nights (Galland MS. of xivth cent. A. D.; Story of Second Skaitik, Night vii.) it is said of a benevolent Muslima, ẓurāt 'ífrīta ǧāniyā, "she turned into an 'ífrīta, a djīniyā." In Egypt the word has come to mean also the ghost of a murdered man, or of one who has died a violent death. (Lane, Modern Egyptian, chap. x. 359; Millmore, Spoken Arabic of Egypt, p. 371 sqq.; "Niya Salina," Harem el Musulmanes d'Égypte, chap. xiv.; St. John, Two years residence in a Levantine family, chap. xx.) It also survives in the original sense of a strong man of violence, e.g. the šūrūt al-ífrīt in Cairo which is explained as the one-time abode of a hārām. But the most normal modern usage is of a powerful, evil, clever djīnni.

Bibliography: has been given above. Add: Dossy, Suppl., ii. 143, and Fleischer, Kleinere Schr., ii. 640. (D. B. Macdonald.)

IGHARGHAR, the valley of a river of the Quaternian epoch in the Sahara, which has now disappeared and is reduced to a subterranean sheet of water. The Igharghar, according to Duveyrier, rises near Asakān-a-Akūr, in the massif of the Haggar at a height of about 6000 feet. It ends near the oasis of Gūg, in the south of Tuggūrt, after a course of about 800 miles (900, if one includes the Wād Gībir, which is its continuation). Its basin extends from the crests of Tadat in the west to the oasis of Chāṭ in the east and from the Haggar to the Shott Melghīr, i.e. from the 23rd to the 34th degree of North Latitude.

The Igharghar flows at first from S. to N., passing near Idales, sometimes in a fairly narrow valley, where springs burst up in the middle of its bed, sometimes also broadening out into a plain with banks indefinitely marked 5 to 8 miles broad. After running along the massif of the Maydir to the west and the Tassili plateau in the east, it describes a curve to the east and reaches the foot of the Hamdāda of Tinghert. In this part of its course it receives a certain number of wādīs, the valleys of which present the same characteristics. The principal are those of the Igharghar, the Wādi Assad-Kifāf which drains all the southern part of the Tassili of the Aṣżjer, the Wādi Issawān, of which the confluence however is still to be found, and lastly the Wādi Ahanāt, which comes from the sands of Edeyen.

The Igharghar then traverses the plateau of Tinghert where it cuts for itself "a well marked channel" (Fourcaur) and receives lower down a large number of streams from the eastern side of this plateau, which rejoin it after having disappeared in the sands of the Erg. In the region of sandhills the bed of the Igharghar becomes quite invisible. It probably passes in the vicinity of the Kāsi Twīl (see 'AREG) without however mixing with it. Fourcaur's observations permit us to suppose that it formerly ran much farther east. On leaving the Erg, it can hardly be more easily recognised, except at certain points, for example at the ravine of Shegga near Tuggūrt. However the continuity of the subterranean sheet of water is attested in this region by the existence of a number of wells.

IHRĀM (A.), infinitive ihrām from the root ḥ-r-m, which has the meaning of "warding off" (man); as the Līsin, xv. 9 says: "to declare a thing haram" or "to make haram." (The opposite is ihṭāl "to declare permitted"). The word ihtām has however become a technical term for "sacred state"; one who is in this state is called muhrīm. For example, a person fasting may be called muhrīm. The word ihtām, however, is only used for two states: the sacred state in which one per-
forms the 'umra and ḍaḥḍījī, and the state of consecration during the ṣalāt. Thirdly the word can be used of the dress in which the ḍaḥḍījī and 'umra are made.

I. The iḥrām in the major or minor pilgrimage. The law declares it meritorious for the pilgrim to assume the iḥrām at the very beginning of his journey to Mecca. But as this is very inconvenient, it is usually only done when the pilgrim approaches the sacred territory (haram, q.v.). Pilgrims who make the journey by steamer often however assume the iḥrām as soon as they arrive in Djjūdā. The law has prescribed several stations (muwāžahāt, plur. of muwāžahah) where this is usually done namely: Dhu 'l-'Hulāsāh for the pilgrims from al-Medina; al-Djāhīa for those from Syria and Egypt; Kār al-Manāzīl for those from Nādīj, Yālamāl for those from Yemen; Dḥāt ʿIrāq for those from ʿIrāq. Any one who assumes the iḥrām too late has to sacrifice an animal in atonement. These muwāžahāt are also called maḥālī i.e. the place where the ʿikār begins. The latter means "loud calling" i.e. the calling of labbaika [q. v.]. ʿIkār is thus used in the same sense as iḥrām and one says for example, ʿahāli ṣ-ḥaḥījī in the sense of aḥrām bi ṣ-ḥaḥījī i.e. to assume the iḥrām for the ṣaḥījī. The law further ordains that people who live within the area bounded by these villages shall assume the iḥrām in their dwellings (Taḥtīl, ed. A. W. T. Jayaboll, p. 72), when it is a question of performing the ḍaḥḍījī. For an 'umra they must go to one of the boundary places of the ʿilq [q. v.]; usually Tanīm is chosen for this purpose, and is thus erroneously also called al-ʿumra by modern travellers.

As one can only enter a state of consecration after casting off all that is ritually impure, one must first of all perform the ceremonies necessary for this. The ghūnī is usually performed; the pilgrim dyes his nails and perfumes himself, all of them ceremonies which were connected with exorcism. Frequently also the pilgrim has himself shaved, his beard trimmed and his nails cut (Burton, A Pilgrimage (London 1857), ii. 133, 377; al-Bītānī, al-Ḥikāt al-Ḥijāzīya, p. 172).

On the significance of shaving, see below.

A particular dress has to be worn in which no seams are allowed. This dress consists of two pieces: a sheet that reaches from the navel to the knees (ṭīrā) and another thrown round the body, which partly covers the left shoulder, back, and breast and is knotted on the right side. This latter is called ṭīrāq and from the manner in which it is knotted ʿaṣīlāh. Both garments are ordained by law to be white, but red stripes are also found (see the illustration in Burton, ii. facing p. 58). On this dress we may remark that it is probably the old Semitic sacred dress. The upper garment of the High Priest in the Old Testament was according to Josephus (Antiq., iii. 74.4) also made without a seam. The Jewish priests wear the ephod around the hips and the ʿeṭāl around the shoulders. In Islam itself there are analogies at the ṣalāt and the burial service. The old Arabs also, when consulting an oracle, as well as the later ascetics wore two garments (Goldziher in Wiener Zeitschrift für die Kunde des Morgenlandes, xvi. 138, 328; Wellhausen, Relige, p. 122). White is also the sacred colour in many religions: at first the mourning colour (cf. Wilken, Veränderte Geschichten, ed. van Oppenbruggen, i. 416-422) it was next adopted as a sign of a consecrated state: the ephod of the priests as well as the robes of ascetics are white.

The iḥrām dress is thus very old and does not owe its origin to Islam. The wearing of shoes is also forbidden. The most that may be allowed is sandals. This custom is also an old Semitic one. Among the Jews mourners as well as the officiating priests went barefooted. In the consecrated state it is forbidden to cover the head; perhaps this is also an old mourning custom (cf. Ezekiel, xxiv. 17).

Women need not wear any particular dress. But they usually wrap themselves in a long robe which reaches from the head to the feet, while the face, which really ought to be uncovered, is concealed by a kind of mask (cf. the picture in Burton, o.c., ii. 58).

A ṣalāt of two rakʿa's is offered and the niyya [q. v.] is pronounced. The latter can be done in three ways. The iḥrām can be assumed:

a. either for the ḍaḥḍījī or for the 'umra. This method is called ṣaḥījī (separation).

b. for the 'umra, although the ḍaḥḍījī is to be made at the same time. This is called tamattuʿ (bi ṣ-ʾumra ʿal-ḥaḍḍījī), i.e. the utilisation of the 'umra for the ḍaḥḍījī. This is called iḥrām i.e. combination. On the origin and estimation of these three kinds of niyya a good deal has been written in Muslim literature. The four schools of law (maḏhābī, q. v.) have different views on the order of importance of the various niyya's, as regards the merit acquired by them. The kind called tamattuʿ owes its name to an expression in the Kur'ān (Sūra ii. 192), which later became a technical term. According to Snouck Hurgronje's suggestion (Het Mekkaansche Pooet, p. 86 sq.), the restrictions which were imposed by the iḥrām became too severe for Muhammad, so that during his stay in Mecca before the ḍaḥḍījī he conducted himself in a secular fashion. As the followers looked astakhe at him for this, the revelation in Sūra ii. 192 is said to have been given: "Any one who avails himself of the 'umra until the ḍaḥḍījī (shall offer) as many animals as is convenient for him; any one who is not in a position to do this shall fast for three days during the ḍaḥḍījī and seven days after his return". What therefore appeared to the Prophet and his contemporaries as an omission which could be toned for by a punishment, was considered by later generations as a thing permitted. Pilgrims who arrive in Mecca long before the ḍaḥḍījī secure themselves by the tamattuʿ from a painful abstention. As soon as they have performed the 'umra, they put off the iḥrām and only assume it again when the time of the ḍaḥḍījī approaches. But the tamattuʿ is forbidden to those who have sacrificed animals with them (Sūra ii. 192). Originally the 'umra took place in the month of ṣaḥījī and, according to some traditions, an 'umra during the ḍaḥḍījī period was an unheard of thing in pre-Islamic times.

When one has formulated the niyya, the labbaika calling begins, which is to be repeated as often as possible and only ceases after the shaving on the 10th Dhu 'l-Ḥijāja.

The state of consecration imposes certain pledges of abstention: sexual intercourse, care for one's
toilet, the shedding of blood, hunting and the uprooting of plants are forbidden. With regard to this the following remark may be made. In other cases in some Semitic religions a state of consecration excludes sexual intercourse, at least in the menstrual period. The neglect of the body is a well known feature of a sanctified condition among the Semitic peoples. The old Arab mourning women who were in a sanctified state of mourning are described as being dirty and having dishevelled hair (ṣaḥāḥ, al-Khānāṣ, Dīwān, ed. Cheikho, Beirut 1896, p. 28, v. 4).

During mourning the Jews are forbidden to bathe or clip their nails. It is reported of the pre-Islamic pilgrims and of Muhammad that when in the state of Ḯrām they smeared something on their hair to make its filthy condition more endurable (Bukhārī, Sahih, Kit. al-Hadīṣ, Bāb 126; Muslim, with Nawawī’s comm., Cairo 1283, iii. 205; cf. Liṭrām, iv. 391). In a tradition given by Ibn Mūja (Bāb mā rūḍīṣ al-Hadīṣ) Muhammad in answer to the question: “What is the Ḯdīṣ (pilgrim)” said: “He whose hair is dishevelled and whose mouth smells (al-āk̄ath al-tāfī).” The idea underlying all these customs, including the shaving at the beginning of the period of consecration is perhaps that everything that grows on the body during the period of consecration is devoted to the object of the sanctified condition. At the end of the period in most cases an offering of hair may have been made. The endeavour to make oneself unrecognisable may also have played a part.

The muḥrhim is not ordered to fast. But there are numerous traditions which answer this question, some in the negative and some in the affirmative. It may be that in ancient times this ascetic custom was associated with others.

When one arrives in Mecca from his miḥārī, he performs the ṭawfīṣ and saʿy (q. v.), sometimes also drinks water from Zemzem and has his hair cut, if the Ḯrām was only assumed for an ʿumra. But if it was assumed for a Ḥadīṣ, the shaving and hair cutting is not performed till the 9th Dhu ʾl-Hijja in Minā, after the ceremonies of the Ḥadīṣ proper are over. The pilgrim can now assume his ordinary dress again. But it is usual to put on new clothes (Burkhardt, Travels, London 1829, ii. 60). The law however prescribes another ṭawfīṣ in Mecca and many pilgrims only put on their ordinary dress after this ceremony. Finally on leaving the holy city a farewell ʿumra has to be performed. For this purpose the pilgrim goes to Ṭanʿūr, performs a ṣalāt of two rakāʾs, returns to Mecca to perform the ṭawfīṣ and saʿy there. He then definitely puts off the Ḯrām.

2. The consecrated state during the ṣalāt. This state also can only be entered when one is ritually pure and dressed in a prescribed fashion and has taken one’s stand behind a ṣurah (q. v.). This state is announced by the ṭakhrī (q. v.) which is also called takhrī al-Ḥrām. The ceremonies of the ṣalāt proper begin then and can only take place during this consecrated state. One has to avoid everything which might destroy the latter, that is: every superfluous act and every superfluous word. The jurists specially mention greeting, sneezing, coughing, laughing, all that is connected with sexual life or the process of digestion. These are all actions which were originally ascribed to demoniac or animistic influences. We frequently find the idea that angels are present during the Ḯrām (cf. the commentaries on Sūra xvii. 80).

The consecrated state is ended by the two ṭaslima’s, that is the formulas of greeting pronounced while turning the head first to right and then to left. According to some jurists, the object of the first is to leave the consecrated state as well as to greet those present; the latter is only a greeting for those present. Who those are is a question which is answered in various ways: according to some, it is the angels who are summoned by the ṭakhrī al-Ḥrām and are now dismissed by the ṭaslima al-ḥeṣul (the formula by which one returns to the secular state).

The transition from the sanctified to the secular state is dreaded for demonical influences. These are averted by the so-called kūnāt (cf. Goldziher in Orient. Studien Theol. Noldeke gewidmet, i. 323 sqq.).

A. J. WENSINCK.

IHYYA (;&) “bringing waste land into cultivation”. The Muslim Fiḥk̄-books in the section on legal transactions have a chapter on ihyya al-naḥw, literally, making the dead (soil) alive. Land which is not being used is called mawāt. Every Muslim who cultivates neglected land for himself becomes the proprietor if it does not belong to another Muslim. According to most ṣabīḥ’s express permission from the authorities is not necessary. The imām Abū Ḥanifa however considers it illegal to cultivate a mawāt without permission from the authorities.

(TH. W. JUVNBOLL)

ΙΚΑΒ (;&), punishment, retaliation; especially the punishment from God which will fall upon the sinner after-death (often used in the Kurān in this sense). Cf. Ἄθιακ and: Spranger, A Dictionary of the Technical Terms, p. 947.

(TH. W. JUVNBOLL)

ΙΚΑΜΑ (;&) is the second call to the ṣalāt which is pronounced by the muʿaddānim in the mosque before each of the five prescribed daily ṣalāt’s as well as before the ṣalāt at the Friday service. This second call gives the direction in which the ṣalāt begins. The formulae of the Ḯrām are the same as those of the adhan (q. v.). According
to the Hanafīs, they are repeated as often as in the adhām; according to the other Fīḥk schools, they are pronounced only once with the exception of the words "God is great!", which are repeated twice at the beginning as well as at the end of the iḥāma. Moreover after the formula "come unto blessedness", twice in succession there are repeated the words "kāmat al-salāt" (now begins the salāt). In the lawbooks the calling of the iḥāma is recommended as sunna also to every believer who is performing the salāt alone.

According to E. Mittwoch (Zur Entstehungs geschichte des islamischen Gottes und Kultus, Abl. d. Akg. d. Wissenschaft, 1913, philhist, K., N. 2, p. 24) the calling of the iḥāma was borrowed by the Muslims originally from the benedictions in Jewish prayer. According to C. H. Becker (Zur Geschichte des islamischen Kultus, Der Islam, iii. 389) on the other hand, this Muslim custom developed out of the original adhām in the mosque, which was modelled on the Christian mass (see however al-Makrīzī, Kāfet, ii. 271, l. 14–15).

Iḥāma denotes the action of the mu'adžhdhim (the calling of the prescribed formulae) by which he salāt is to begin. On this linguistic usage see C. Brockelmann, Līmāmat al-Salāt (Festschr. E. Sachau, 1915, p. 314–320) and J. Weiss in Der Islam, viii. (1916), 131–135; cf. the expressions: aqāma 'l-salāt and bihamat al-salāt (Gloss. to Shirāzī, Tanbīh, ed. A. W. T. Juyonboll, s. v.; Buḫārī, ṣalāh, Adhān, No. 23–24). In the Fīḥk books however iḥāma is also explained as the call which is intended to summon the believers to rise for the salāt. See Badārī (Būlāk 1307), i. 167, l. 12.

Bibliography: In addition to the collections on tradition and the Fīḥk-books see also: Dimīqāh, Raḥmat al-Ummma fi ikhlaṣ al-A'imma (Būlāk 1300), p. 14, sqq.

(Th. W. Juyonboll.)

IKHĪṢĀD (A.), to keep (or make) clear and pull cid, to keep free from admixture. In connection with the Kurānic use of the expression ikhlaṣ al-dīn il-tāḥ (cf. iv. 145, vii. 28, x. 23, xxix. 14, 16, etc.), i. e. to honour and serve Allah exclusively, ikhlaṣ by itself received the meaning (cf. Kurān, ii. 133) of "absolute devotion to Allah" and became used in opposition to ʿirrāk, ʿirrīk, "associating divine beings with Allah". Sūra cxii, which emphasises the unity and uniqueness of God and denies that he has any associates was called Sūrat al-ikhlaṣ (also Sūrat al-Tawḥīd); this Sūra is frequently recited in the salāt.

With the development of the conception of ʿirrīk, which covers "every kind of worship of God which is not an aim in itself," and also the cherishing of interested motives in religious practice (cf. Goldziher, Vorlesungen, p. 46), the development of ikhlaṣ is somewhat parallel. According to al-Ğhaṣṣālī, ikhlaṣ, apart from the above technical sense, properly means only that one's action should be dictated by a single motive, so that for example it can be ascribed to one who gives alms only with the intention of being seen to do so. In the language of religious ethics as developed especially by the Shiʿa, ikhlaṣ particularly refers to the effort to come nearer to God and means the keeping free of this ideal from all subsidiary thoughts. In this sense it is often opposed to riya', the wish to be seen. Ikhlāṣ demands unselfishness with regard to one's own religious practice and the abolition of the selfish element which mars devotion to God. At the highest stage of ikhlaṣ even the consciousness of ikhlaṣ itself must disappear and all thought of divine reward in this world or the next be put aside. Cf. al-Ġuθfīsī, al-Risāla fi Ḣum al-Tawāwuf, Cairo 1318, p. 111–14; al-Ḥawālī, Manāṣīl al-Ṣārin, Cairo 1326, p. 16 sq.; al-Ğhaṣṣālī, Iyyā, Cairo 1324, iv. 323–332; ed. with comm. of al-Muṭāf, Cairo 1311, x. 42 sqq.; transl. by H. Bauer, Islamische Ethik, I. Über Intention, seine Abhängigkeit u. Wahrhaftigkeit etc., Halle a. S. 1916, p. 45 sqq.; R. Hartmann, al-Khuṣūsī's Darvīshmān al-Šātīn (Türk. Bld., Vol. xviii.), p. 15 sqq. 59, 60. (C. van Arendonk.)

IKHĪSĪDĪS, an Egyptian dynasty. On the general place in history of the dynasty see above ii. p. 190. The name of the dynasty is derived from the old Persian princely title Ikhsīšdī which the Caliph al-Rādī was induced to grant to the founder Muḥammad b. Ṭūhghī in 326 = 937. It was the title of the old rulers of Farghāna (see ii. p. 62) from which the dynasty claimed descent. Ikhsīšdī is said to mean "king of kings," although others interpret it as "servant." (Cf. Ibn Saʿīd, ed. Tallqvist, transl. text, p. 23 sqq.; transl. p. 41), presumably in the same sense as: 'Abd Allāh was used as an honorific of the Caliphs. Al-Ikhsīšdī's father and grandfather were already in the service of the Caliph; he himself worked his way slowly upwards and seems to have had a supporter in the vizier al-Ŷaḍī b. Ḥānīf of the celebrated family of the Banu 'l-Furūṭ [s. ibn al-Furūṭ, 3]. After he had arranged the disorganised affairs of Egypt (323 = 935), he had to defend his new position against the powerful Amir Muḥammad b. Rākī [s. ibn ğaṭr] who penetrated up to the gates of Egypt but then granted the Ikhsīšdī the country as far as Kānīa on payment of tribute. Five years later new difficulties arose, and the undecided battle of al-Ladjiqīn was fought, after which the contesting Amirs may be said to have begun. The Ikhsīšdī paid a yearly tribute of 140,000 dinars. After the death of Ibn Rākī a new enemy to the Ikhsīšdī arose in the Ḥamādānis, and being now at the height of his power he took part in the contest for the position of Amir al-Umarāk. In Muḥarram 333 (Sept. 944) he met the Caliph al-Muttaṣī al-Raḳkāja, but on this side of the Euphrates, and thought for a time of sharing the fortune of the Caliph in the struggle against the Turk Ṭūzūn, who was ruling in Baghdaḏ. But he ultimately returned to Egypt and began the struggle with the Ḥamādānī Saʿīf al-Dawwālīs, which ended in a treaty by the terms of which Damascus remained in possession of the Ikhsīšdī on payment of tribute. He died at the end of 334 (July 946). Two sons nominally succeeded him but they were only réit faintimīn. The real power lay in the hands of an Assyrian eunuch named Kāfūr, who on the death of the second son was formally granted the government of Egypt and successfully defended Egypt and Syria henceforth from the attacks of the Ḥamādānis. On Kāfūr's death a grandson of the Ikhsīšdī was appointed governor, but the dynasty had completely lost its hold on the country and Egypt with Syria fell into the hands of the Fātimids who were advancing from North Africa.

The following table gives the names and order of the Ikhsīšdīs:
The name Unûdîr is transmitted in various forms. The Ikhsâdî and Kâfûr were certainly important personalities. The Ikhsâdî is described as strong physically, but as cowardly and particularly avaricious and greedy. No man’s property was secure in his reign. More pleasing human traits are also credited to him however. Kâfûr was probably the more important. In spite of his repulsive features, by his intellectual endowments he carved a career for himself, unique even in those days, from black slave to wielder of the dynastic power. At the height of his power he never forgot his humble origin. More features of his character that are pleasing than those that are displeasing have been handed down to us. Both princes cultivated the literary taste of their times. Al-Mutanabî sung both their praises, but afterwards lampooned them. Under the Ikhsâdî began the struggle between the two dynasties of Caliphs (‘Abbâsids and Fâtimîds) for the nominal suzerainty over the various governors who had set up dynasties. These soldiers of fortune played them off one against the other. The Ikhsâdî seems to have seriously considered recognising the Fâtimîds, but he remained faithful to the ‘Abbâsids as their prestige was still too great.

Ikhtilâf (A.), trembling of the limbs: whence ‘ilm al-Ikhtilaf, the alleged science of prophecising from the involuntary twitchings of the limbs, also called palomage. The oldest work on the subject is probably Mâdâmûd’s egesyûmatûm per pâlûmûn manîkît pàs Potholómôn bâsûkî (J. S. F. Franzius, Sceptrum philológmôn evertm, Altenburgi 1780, p. 451 sqq.). The Arabs however usually ascribe the origin of this science to the Indian Tômûm. Who he was has not yet been explained. A suggestion is given by Hauber, Tômûm (Tûmûm) = ádûsûm = Dûnûmûsûm, in Zeitscr. der Deutsch. Morgen. Gesells., liiiii. 457 sqq.

Ikhtilâf (A.), difference of opinion; in contrast to Idjma ̃ [q.v.], the difference of views among the authorities on Muslim law and dogmatics on details of legal practice and doctrine which do not affect great principles, particularly among the former, as it appears in the diversities between the Madhâhidî [q.v.] and also in those within each one of them. In opposition to contrary views urging unity of practice, and in face of the reality of the existence of this difference of opinions, the conviction has arisen in Muslim orthodoxy that they are of equal value and this view finds expression in an authoritative form in the saying attributed originally to various Caliphs and latterly to the Prophet himself: difference of opinion in the Muslim community is a sign of (divine) favour. The registering of these differences has produced a great literature in Islam since the foundation of the study of Fikh and this has been most comprehensively recorded by Fr. Kern.

Al-Khwârîzmi (A.), 52 (in number: the Bombay edition as stated in the table of contents at the beginning and the concluding note in the first Risâla consists of 52 treatises, but in the last treatises in part iv. only 51 are mentioned) is usually given as the middle of the iv. (xiii) century and among the collaborators are mentioned Abû Sulâmân Muhammâd b. Mûshîr al-Bustî, called al-Muqqaddûsî, Abu ’l-Hasan ’Ali b. Hârûn al-Zandjâni, Muhammâd b. Nahrâdûrî, al-‘Awfî and Zaid b. Rîfî’s. Further details cannot be ascertained, mainly because the Pure loved to express themselves in very confusing language. Quotations in the Risâla, as far as they have been identified, are mainly taken from the literature of the vi. and ix. centuries A.D. The philosophical position is that of the older eclectic translators and collectors of Greek, Persian, and Indian wisdom. Hermes and Pythagoras, Socrates, and Plato are often quoted and thought more highly of than Aristotle. The latter appears as the “logician” and also as the author of the Plotian “Theology” and the “Book of the Apple”. Of the knowledge of a relatively purer and more complete Aristotelianism, which begins with al-Kindî, the treatises of the “pure ones” show no trace. It is characteristic of their mental attitude that al-Kindî is not quoted, at least not by name, although his renegade pupil, the fantastic astrologer Abî Ma’shâr (died 272 = 885), is. It is not impossible, however, that they had literary connections with al-Kindî and his school. According to the medieval Latin translation of the 13th Risâla, this treatise was composed by a “Mahomet discipulis Al-quindî”. Cf. T. J. de Doer, Zu Kindi und
IKLIM, the Greek word klima, inclination. Eratosthenes (d. 215 B. C.) divided the orbis vebiterius notus into seven longitudinal zones, of which the limits were arbitrarily fixed. Hipparchus (c. 150 B. C.) made the zones equal in latitude. The division into seven climates of equal width was taken over by the Arabs, though sometimes the countries to the S. of the Equator were reckoned an eighth, and those in the extreme N., a ninth. Al-Idrisi [q. v.] has arranged his book on geography according to climates. The determining factor in defining the limits of the climate is the length of the longest day within it. In Abu l-Fidā's inhabited world lies practically between 10° and 50° N. Latitude, and the length of the longest day increases by half an-hour in each climate from the S. to the N. The following table shows the S. and N. limits of the climates, the length in hours of the longest day at the S. limit of each and the breadth and length of each in degrees.

</table>

The length of the longest day at the N. limit of the seventh climate, that is, at 50° 20' N., is 16½ hours. Inhabited lands, however, lie both to the N. and S. of these climates. The climates also diminish in length as they ascend northwards. Thus, according to al-Birūnī [q. v.], the length of the first climate from E. to W. is 172° 27', or, taking 1° = 18°1/2, parasangs nearly, about 3252 parasangs. On the older basis of 22¾ parasangs to a degree it would be 3832 parasangs. The length of the seventh zone is 119° 23' or about 2255 parasangs (on the older computation 2651 parasangs). These measurements are adopted by Abu l-Fidā.

The term climate (khtagawr) was also used by the Persians to denote one of the seven parts or
kingships into which they divided the world, and which had no dependence on latitude. Persia was placed in the centre and Arabia, Africa, the Romans, the Turks, China and India grouped round it. A similar seven fold partition of the earth is found in al-Masʿūdī (chapter viii). Climate then came to be used locally for “country”, e.g. “Syria, Ṭrāṭ, etc. Abu Ḥ-Fīdā calls this the popular climate as contrasted with the “real” or astronomical climate, which depends on the latitude.

(T. H. WEIR.)

Ikrār (A.), Confession. If the accused in the case before the kāfī confesses that the prosecutor is right, no further proof is needed according to Muslim law. The judge can at once give his verdict. An ikrār however can only be considered valid when it is made by a person of age in full possession of his faculties and without any pressure before the kāfī. Measures to extort a confession are absolutely forbidden. Even an ikrār made by some one perhaps from fear of a flogging is invalid. If the case concerns the law of property, the one who acknowledges the demand must be capable of independent action (ražīd). If the justice of an accusation is once recognised in a case, a later repudiation of the ikrār is invalid, except when the accused has confessed a crime which is liable to be punished as a ḥāʾak Allah (see ʾAdhār, i. p. 132).

Recognition of children who are not born in wedlock is of no value according to Muslim law. If, however, the paternity of a legitimate child is uncertain and the husband expressly acknowledges his paternity, then no further proof is required. The paternity of the child is then established by the ikrār. The declaration however must not be neither contrary to the actual circumstances nor the ʾādab. If it is a case of a cultivated land in private possession, it can only be given to one some if it is in an enemy country but has already been promised as ikrār, before it is conquered. The muqtad receives by ikrār a preferential claim, after the conquest of it, if it is granted at all, if for example the owners migrate. Conquered land that is not private property, for example the private domains of the former ruler or lands belonging to inhabitants who have left the country, is in part reserved for the bāt al-maṣl (treasury) and can only be leased for rent (khārāq al-uṣīr) but never become private property. The unreserved parts become khārāq lands (i.e. liable to land tax); they either belong to the faṭ’ (booty) [q.v.] and are immobilised, in which case they cannot only be rented and not become the private property of the muqtad or they remain in the private ownership of (an unknown owner); then it is not possible to grant them and the khārāq due from them takes the place of the poll tax (disya [q. v. i. 1051 sq.]). Lands which fall to the state, because the owner has no heirs are administered like foundations. Many legal authorities hold the opinion that the government is free to dispose of them: in this case they may

act of bestowing land which is not private property in return for taxes or tithes; 2. the act of giving the produce of land in place of or as a guarantee of payment on the part of the state treasurer. Ikrār may consist of: 1. the granting of a whole province as a fief to a governor (e.g. the granting of Egypt to Ibn Ṭūlūn by the Caliph on payment of tribute), as well as the granting of a few fields in return for the ḫirṣ or taxes (khārāq) or rent (khārāq al-uṣīr) or a poll tax afterwards converted into khārāq (khārāq al-disya); 2. the allotment of the revenue from a piece of ground as salary or pension. The conception of ikrār was then extended in the sense of a permanent furnishing of taxes and customs duties and tolls on rivers and canals. Ikrār later came to be used to designate especially a military fief. Al-Māʿwarī has given a theoretical account of the prescriptions of the ikrār in Ch. xvii. of his “Constitutional Law” (al-ʾĀṣkām al-muṣlīmiyya, ed. Enger, Bonn 1853, p. 330–343). He distinguishes at the outset between the granting of the property and the yield from it and investigates under what conditions land may be capable of ikrār.

I. There are three kinds of land.

A. Maʿṣūr (uncultivated land). a. Waste land without trace of cultivation or an owner. The muqtad (the person to whom the land is granted under certain conditions) promises to cultivate it (cf. the Roman amphyteuria) and for three years he pays nothing. (He then pays a rent which is fixed by public auction [tanāyūd]; but lands were probably often allotted at a definite rent which was not considered capable of being increased, cf. Becker, Die Entstehung von ‘Uṣr und Ḥarāq-Land, s. Bibliography). If he does not cultivate it, it may be taken from him at the close of three years unless he can give satisfactory reasons for his neglect. Otherwise he is granted the land on a long lease with the right to dispose of it, so that it is in a way his property, in return for a pledge to pay a certain sum. b. If the land was previously cultivated, the same regulations hold, if it was cultivated in the Ḥāhiliyya (i.e. the period before Muḥammad). If it was cultivated within the Muslim period, the practice varies. If it is a case of uncultivated land in private possession, it can only be given to one some if it is in an enemy country but has already been promised as ikrār, before it is conquered. The muqtad receives by ikrār a preferential claim, after the conquest of it, if it is granted at all, if for example the owners migrate. Conquered land that is not private property, for example the private domains of the former ruler or lands belonging to inhabitants who have left the country, is in part reserved for the bāt al-maṣl (treasury) and can only be leased for rent (khārāq al-uṣīr) but never become private property. The unreserved parts become khārāq lands (i.e. liable to land tax); they either belong to the faṭ’ (booty) [q.v.] and are immobilised, in which case they cannot only be rented and not become the private property of the muqtad or they remain in the private ownership of (an unknown owner); then it is not possible to grant them and the khārāq due from them takes the place of the poll tax (disya [q. v. i. 1051 sq.]). Lands which fall to the state, because the owner has no heirs are administered like foundations. Many legal authorities hold the opinion that the government is free to dispose of them: in this case they may
be assigned, according to some, only on rent, according to others, as private property.

II. *Iṣṭāʿ* of the produce only takes place as a substitute and guarantee for the payments which the treasury has to make to subjects; the sum which the government has to pay to the persons concerned must therefore be fixed if instead of money a grant of produce is to be made. There is a distinction between:

a. *Iṣṭāʿ* of the tithe (*uṣhr*). The revenues from tithes (*uṣhr*) are intended for the zakāt (alms for the poor). They therefore cannot be bestowed because the claims on the zakāt in the individual cases are only defined when payment is made and the *uṣhr* is only paid at the end of the year so that the two dates do not coincide.

b. *Iṣṭāʿ* of the kharāj. The yield of the kharāj for the reasons just mentioned cannot be granted to any one in substitution for the claim to zakāt. For the same reason, officials holding special offices but receiving no fixed salary or appointed for an indefinite period cannot receive the yield of the kharāj as *iṣṭāʿ*. On the other hand the *iṣṭāʿ* of the kharāj is readily given to members of the army in place of their definite pay because the settlement is easy in this case.

*On the kinds of kharāj* (kharāj dījya and kharāj udjra) see the articles dījya and kharāj. The kharāj udjra can be granted for a number of years in compensation for a definite payment.

If the *mukāla* remains in active service till the end of the period he naturally retains the revenue; if he dies it goes back to the state. His heirs receive a pension from other funds; if he breaks down in health his usufruct of the revenue is settled by local practice, according as his pay is continued or a pension is given from other sources on account of ill health. There is no *iṣṭāʿ* with rights for life and the right of transmitting to heirs, as the financial sovereignty of the state would thus be injured by losing the right of disposal. An *iṣṭāʿ* for life without the right of bequest is only possible when, according to local practice, in cases of retiring on account of ill health, it continues to be paid undiminished. These are in the main al-Māwardi’s theories. On the special regulations for the granting of mines etc., see al-Māwardi at the end of the chapter quoted. He does not discuss the *iṣṭāʿ* of land to Muslims as *uṣhr* land. We know that this kind of *iṣṭāʿ* was usual in Muslim countries. Becker in particular has explained the practice, (Steuerpacht, etc., p. 81 sqq., see Bibliography; in this book the eastern and western systems of granting fiefs are compared).

Al-Māwardi points out that *iṣṭāʿ* of kharāj was especially suitable for members of the army; and in reality the military fiefs did develop out of it. Soldiers and amirs were given the rents either as a guarantee of their pay or as part of it. When the rent came in with increasing irregularity; they were gradually given the estates themselves.

This state of affairs lasted about 130 years from the time of the Būyids [q. v.] to the reign of Sultan Malik Shah (465–485 = 1072–1092) under the administration of his vizier Nizam al-Mulk (see Becker, Steuerpacht, p. 89). The latter distributed the estates as fiefs to the troops and allotted them as revenue and income. The Saldjūks introduced an innovation inasmuch as they made the fiefs hereditary in return for military service.

This is best explained by the fact that as an invading tribe of nomads it was their interest at first to have as many of their own people as possible in their army. They thought that in this way they could secure for themselves a particularly true and devoted army (al-Maḍīrī, Kāfī, ii. 216 quotes a statement on this point by a dījya (mercenary) of the army of the Saldjūk Albag, the almost independent of the Sultān of Aleppo 541–569 = 1146–1173): “The fief belongs to us, it is our property, we pass it on to our children from father to son and in return for it we are willing to run the risk or death.”

The system of hereditary fiefs in return for military service is also found among the Mongols. It was different in the Mamlūk period (see Becker, art. EGYPT, ii. p. 14b sqq.; the whole country under his rule, apart from private property, endowments, fallow or desert land, is the feudal property of the Sultān. It was divided into 24 parts from the time of Sultan Qālā’un (565–580 = 1170–1186) (Kūf). Four parts were for the Sultān, out of which he granted fiefs to his guards, officers and soldiers; 10 parts were for the amirs; 10 for the mercenaries (dījya) and the amirs also held a part of the fiefs for the mercenaries.

The land was redistributed from time to time after a survey (at least once in 30 years) but frequently more often, if abuses prevailed, so that for example the highest amirs got hold of very large estates and introduced a latifundia system or the smaller amirs did not pass on the fiefs to the mercenaries. New surveys were also ordered by Sultan Sultān I (595–603 = 1196–1198) for example took 14 ḫirāt of the land for fiefs reserved for his guards. In the survey of Sultan al-Nasir Muhammad of the year 715 (1315) 10 ḫirāt were for the Sultan, 14 for the amirs and their mercenaries. Another abuse first appeared in the first Mamlūk dynasty in the reign of the extravagant Sultan al-Kāmil Shābān: the mercenaries exchanged or sold their estates to private individuals and in return paid considerable sums to the treasury. This practice was even sanctioned by the institution of a special office (Dīwān al-Badā). (See for further details, Sobernehl, Matériaux pour un Corpus Insct. Arab., ii. n°. 44). This abuse was however of short duration only; it is described by the chroniclers as a wicked, illegal, and arbitrary act. When Sultan Sultān I in 922 (1516) conquered Syria and Egypt, he had these lands resurveyed and divided as crown estates and fiefs according to the Ottoman principles. As elsewhere throughout the Ottoman empire the principle of inheritance was gradually introduced. Muhammad ʿAlī was the first gradually to deprive the Mamlūks and the small vassals of their fiefs and to introduce a system of direct payment into the army. The Turkish Sultāns (see the article TURKEY) claimed a part of the conquered territory as their property and granted the yield of the taxes of whole districts (liwaʿ) to their grandees for life (MOLKAN-I MIRĪYE, q. v.).

The governor who was granted a fief in this way, received the ground tax and other dues, while he in return placed a certain number of soldiers at the Sultan’s disposal according to the size of his estate; later he only paid a definite tribute to the Porte. It thus came about that the great pashas were often almost independent of the Sublime Porte. There arose for example small dynasties
in Syria at Ḫims, Baalbek, in Lebanon and Naḥlāt. The smaller fīs were called, according to their size, ẓālim (from ẓālīm, the leader of an army) and ḥimār; the number of soldiers to be provided varied with the size of their booty. They were hereditary and were divided according to certain principles among the sons or heirs of the holder of the fīf in return for military service. It may be said that almost the whole empire consisted of military fīs. This circumstance which in course of time by its decentralising tendency brought about a weakening of the empire was gradually abolished by the reforms (taṣammūḥ) of Sultan ʿAbd al-Majīd, which Sultan Muḥammad II had gathered the way for (1223-1255 i. 1808-1839). The situation was definitely settled by the land legislation of 1856. General military service for Muslims had already been introduced in 1839. Certain hereditary fīs granted to grandees of the empire, which every new Sultan has to confirm, still exist.

**Iṣṭibās** means to take a kabas, a live bird or a light, from another's fire (Kur. xx. 10; xxviii. 7; lvi. 13); hence to seek knowledge ('ilm) and, as a technical term in rhetoric, to quote specific words from the Korān or the traditions but without indicating these as quoted. If the source is indicated and the quotation is put into verse the figure is called 'aḳd, "binding"; and if it is verse, not Kurānic or tradition, that is quoted, and in verse, the figure is taṣnim, "inserting". In Ḥujjāba the original application of the words may be preserved or may be changed. As to the lawfulness of this there has been much dispute. The Māliki- tes generally pronounced it unlawful; but they allowed it under conditions, e.g. in preaching and prayer and praise (following the usage of Muḥammad), but not in verse, where it was disliked (makrūḥ). Yet others permitted such quotation, even in verse, if done in a right spirit. But it is altogether abominable to twist words referring to Allah so as to make them refer to a creature; or to use any Kurānic words in light jesting. But, as a matter of fact, such quoting and alluding has been quite common, even in the most unseemly contexts as in kutub al-bāk, just as the doubt whether the bāzama should be prefixed to poetry (Ibn Rashīd, Umāda, ed. Cairo, 1325, ii. 250) has had no practical consequences. The Poet (p. 104, 11) notes Kifā al-Muḥaktabay by Mādīnī (d. A. H. 1715 or 252) and another by Marzubānī (p. 133, 52) but it is uncertain whether their iṣṭibās was this technically. In the Asīs al-iṣṭibās of Ikhtiyār al-Din (d. A. H. 928; Broc- kelmann, ii. 103) it is extended to cover proverbs, verses and even short hikāyiyy. - Bibliography: Dict. of tech. terms, p. 1187; Mehren, Rhetorik der Araber, p. 1., lvi. 136, 140, 201; Garcin de Tassy, Rho- tique et Prosodie, p. 202; Lieb, viii. 48. (D. B. MCCDONALD)

**AL-IKWA** (A), a technical term in metre, meaning an error in prosody, which consists in the vowel of the vocalised, rhyme-forming, terminal consonant (raw) being a dhammer in one verse of a poem and a kasra in another, irrespective of whether the majority of the verses of the poem end in one or other of these vowels or not. According to al-Khālīl b. Ahmad, al-ikwā means the presence of an unusual vowel with the rhyme-forming consonant, so that the verses end partly in i and partly in a or u. Other prosodists on the other hand call the insertion of verses with the terminal vowels b or i in a poem rhyming in a, isra' or isra'af.

ILĀH is undoubtedly the same as ḥādād and has the same problem of ultimate derivation (Encyclopaedia Biblica, iii. coll. 3323 sqq.; Brown-Driver-Briggs, Hebrew Lexicon, p. 42 sqq.; Flescher, Kleine Schr., i. 154 sqq.). Here only the Arabic side is considered. The pre-Muslim Meccans regarded Allāh as a proper name (lim ‘alam) and this view is practically universal in Islam; for the arguments of the few who held that it was a descriptive name (ṣifā) see Rāzī, Moṣʿabād, ed. Cairo, 1297, i. 83, sqq. But, according to Rāzī (loc. cit.), al-Khalīfī, Sibawaihi and the most of the formulators of the Muslim fundamentals (al-ṣūḥāyīn) held also that it had no derivation, was murājidī. This Rāzī supports with various a priori arguments. Others, according to Rāzī, held that Allāh was of Syriac or Hebrew origin; others, of the school of al-Kūfā, that it was from al-ṭālāh; and others, of the school of al-Baṣrā, that it was from al-ṭālāh, the infinitive of līm, “to be high”, or “to be veiled”. Of course, as to al-ṭālāh, “the Deity”, Rāzī has shown that it has neither derivation, nor usage, that has come to be practically as a proper name and equal to Allāh. Later Islam has decided that, while Allāh is a proper name, it is also derived (muḥtaṣab, manfūl) and most probably from ab-ṭālāh, in some one or other of its meanings. Al-ṭālāh, then, would mean i. “the god already mentioned”; the article being illāh, ii. “the Deity”; iii. it was softened to Allāh by frequency of usage and in that form came to be a proper name. But ʿalāh, “a god”, still survived in the construct and undefined, as also allāh, “god”, in the plural. Apparently al-ṭālāh does not occur in the Kurʾān as a form, but there are cases where Allāh has the same meaning. So in Kur. vi. 3, wa-ha-wa l-ṭālāh fī ʾs-sāma-wātī, “and he is the deity in the heavens” (cf. Zamakhshari, ʿAskāfī, ed. Lees, p. 394), and in Kur. xxvii. 70, ḥa-wa-ṭālāh lā ṭālāh lā ṭālāh lā ṭālāh ḥa-wa, “he is the deity than whom there is no deity (cf. ʿAskāfī, p. 1064). Then later al-ṭālāh came back in the two senses noted above and was used and is still used by theological writers much as is our “the Deity”. Eight derivations have been suggested for ṣifā (Rāzī, i. 84—86; Baiḍāwī, ed. Flescher, i. 4) but they practically reduce to the following: 1. ṣifā, “worship”, but, as Zamakhshari points out (ʿAskāfī, p. 8), this with the ṡ- and x-stems are derived from the noun. 2. ṣifā, “be perplexed, confounded” — for the mind is confounded in the experience of knowing Allāh; watika has the same meaning. 3. ʿalāh ṣifā, “turn to for protection, or seek peace, or in longing”, again watika has the same meaning. For Allāh the school of al-Baṣrā preferred the derivation from ṣifā in either of its two meanings, “to be veiled” or “to be lofty”. Zamakhshari mentions only 1 and 2, the latter being his choice; in 2 and 3 watika may easily be more original: for the interchange cf. Muṣṣafāl, ed. Broch. p. 172, l. 20.

ILĀT, Arabic plural of the Turkish word il “people” (cf. Thomsen, Inscriptions d’Orkhen, p. 15 and 135, N. 2) is the name given in the Persian administration to the tribes that have remained nomadic in the empire (syn. nāṭa); they are for the most part of Turchoman origin; liable to military service in case of war, they form the only cavalry in Iran (Muḥammad Ḥasan Khān, Matha al-Shams, p. 29 sqq.), except for the regiment of Cossacks. They are also called ḵ arra-tadar (black tents) from the colour of their tents. Their hereditary chief is called ilānī of the people; he enjoys absolute authority and rules his clan in a way absolutely independent of the royal authority. They have teachers of the Kurʾān and of Persian poetry; this is all the education the nomads receive. When the course of the seasons requires the movement of the tribe, they strike their tents, their chief holds a review (ṣān); while the men on foot stand with a large stick in their hands and surrounded by their hunting dogs, the women and children sit on asses, mules, and horses, their domestic chattels being loaded on camels. The nomads pay various revenues to the state; a tax for pasture (ḵaḥḵā-terāb), a certain number of camels and asses to be sent annually to the court; in addition to the usual presents; each tribe furnishes a regiment of infantry (fawṣūd) and a reserve squadron of irregular cavalry (swaūr-ad rādī).

The reforms at present planned by the Persian government aim at increasing gradually the number of tribes who have adopted a settled life, and forcing those who remain nomadic to make their migrations without damaging the interests of the settled tribes on their route. For Fârs, a council of the tribes is to be created on which the ilānīs will be present in person or represented by delegates, in addition to representations of the great families and prominent personages of the region. This organisation will be later extended to the whole of Persia.

ILCĪ (r.) properly elle, from the Uigur ēl, peace, alliance, and the suffix of nouns indication possession, -ēi = peace-maker, ambassador, plenipotentiary. The word ēl “peace”, which is found in Mongol and Manchu, also occurs in Rubghātī, 5, 10 and Kainādār Bīg, 154, 10 (Radloff, Wörterbuch, i. 826). In Turkey a distinction was formerly made between ēyuk iči, ambassador, iči muruqābhār, minister plenipotentiary and ʾurra iči, resident minister. At the present day the diplomatic titles, the employment of which was fixed at the treaty of Vienna, are officially the following: for the first, safir-i hakī; for the second safir-i; the Ottoman Empire has no resident ministers. It maintains embassies at Paris, London, Petrograd, Berlin, Rome, Vienna, and Teheran. The title
ILCI — ILDEGÎZîS.

büyük ilî was nevertheless retained for ambassadors accredited to the Sublime Porte and that of ortal ilî for ministers plenipotentiary (Sâhatnex, 1315, 1072, 1078). The reception of these agents by the Sultan was formerly the occasion of extraordinary ceremony. Now they are content to follow the ordinary European usages. When Ferdinand of Austria sent Nicolas Jurischitz and Joseph von Lamberg (in 1530) on a mission, fifty čavuşlar came to meet them half a league from Constantinople and conducted them to the ambassadors' caravanserais (i'llî-chân), the ruins of which still exist in Stambul. They shut them in there by the Sultan's orders, but took care that they lacked nothing. Three weeks after their arrival they were ceremonially received in audience. The solak, the court valets wearing golden headresses, and 300 Janissaries stood before the chamber of the divân, where the Grand Vizier, two other viziers, the Beylerbey of Rumelia, the two kâdiçâser�, the three defterdar, and the secretary of State (ra'sî efendi) awaited them; then the Chief Marshall and the High Chancellor introduced them to Sultan. The first envoy from the Porte to Vienna was a čavuş, messenger of state or courier (1533), and the practice was continued of appointing ambassadors to foreign countries from this lower category of officials. In 1616 the judge of Galata, who was a negro, forced the ambassadors to pay capitation (il carovgor, the word karâfî being then primarily used as a synonym of Ġiçya, cf. Meninski, Lexicon, s. v.); it was necessary to produce the text of the capitulations to have this judgment of the kâdî annulled by the Grand Vizier. In 1676 (1665) the first account of a mission was inserted in the annals of the empire, on the occasion of an embassy sent by Sultan Mahomed IV, which included Ewliya Efendi and Meninski. Von Hammer at the end of his Histoire de l'Empire Ottoman, xvii. 134 sqq., has given a list of embassies sent by the Porte or received by it down to the peace of Kainardjia.

Persia only has an ambassador in Constantinople (safîr-i kâhir). It was represented elsewhere by ministers plenipotentiary, envoy's extraordinary (wa'ar-i mumtaz, wa'ar-i mahlîk) one for England, Germany, and Holland, one for Russia, and one for France and Austria.

ILDEGÎZÎS, SHAHS AL-DIN, A TABBEG of A Darbâidjan, was originally a slave of the Sâlijuq vizier al-Sumârîmî, murdered in 515 or 516 (1121 or 1122) and afterward of Sultan Ma'âtîd. The latter appointed him governor of Arran, whereby he became one of the first amirs in the kingdom. In this remote province he soon took up a more or less independent position and troubled himself little about his Sâlijuq overlords. His marriage with the widow of Sultan Toghurl I gave him a favourable opportunity to champion the cause of his stepson Arslânîshâh and raise him to the Sâlijuq throne in 556 (1161) while he himself came forward as his Atabeg. Some amirs, namely İnâdîn in in Rayy and Zangi in Fars attempted to put up Ma'âmâd, a brother of Arslânîshâh, against him; but their troops were not a match for those of Ildegiz and the plan soon failed miserably. Ildegiz finally got rid of his troublesome rival İnâdîn by assassinating him with the help of the vizier Sa'd al-Din Asâd al-Ashâlî, who as a reward was made vizier to Pahlavân, son of Ildegiz. Ildegiz, who had several times to wage difficult wars with the Georgians (cf. the additions to Ibn al-Kalânî, ed. Ameshra, p. 261 sq.), thus became the virtual ruler of the Sâlijuq empire, and firmly established the rule of his family in A Darbâidjan. According to Ibn al-Ashâlî, he died in 568 (1172) at Hamadânî in the same month as his wife, Toghrul's widow. If the tomb at Nakhâjûwân described by M. Hartmann (Deutsche Bauzeitung, 1899, off-print, p. 21) is that of this princess, her name was Mu'mîna Khâtûn, but the writer's view that Ildegiz had the tomb erected is contradicted by the date 582. The lækâb Shams al-Dîn's proves nothing, because Ildegiz's son Pahlavân (q. v.) also bore it. Cf. Avîfî, Lüübâb al-Âlbîb, ed. Browne, I, 356 sqq. Dawlatshâh, ed. Browne, p. 117, however, says that both Ildegiz and his wife were interred in Hamadânî.

ILKE-KHANS, a Turkish dynasty in Central Asia, iv. 381—389 (xii. 381—389). From this house which ruled the lands north and south of the Thian-Shan came the first Turkish conquerors of Mä warâ' al-Nahr, in the Muslim period; the first monument of Muslim literature in Turkish, the Kudatshu-Bilik or Kutadgu Bilik, was written about 492—1095-1070 for a prince of this dynasty. In Persian histories the dynasty is usually called "family (aš) of Arfasiyâb (q. v., i. 385) sometimes also "Khâns of Turkistan", the name "İleki princes" or "IleKhâns" was introduced by European numismatists (Tornberg and especially Dorn) from a title peculiar to this dynasty, which, however, is not by any means borne by all its rulers, and which it seems cannot be traced in Muslim literature at an earlier or later period. In the pre-Islamic period the word appears as a princely title among the Eastern Turks; cf. the expression "ilg khan gil Cumhelâb" (K. W. F. K. Müller (Ugurica, Berlin, 1908, p. 6). The pronunciation and etymology of the title is uncertain; the historians and the coins have ilk, sometimes also ilk and ilk, the Ugur ms. of the Kutadgu-Bilik, "ilk or ilk, the Arabic (both the Cairo ms. and the newly discovered ms. of Namangan in Fargoûna) ilk; cf. W. Radloff, Wörterbuch, i. 816, "if this word were pronounced ilk, it could be connected with ilk, the first". Naşr b. 'Ali (d. 503 = 1012-1013), the conqueror of Mä warâ' al-Nahr was the "ilk" or "ilk-khan" xar' bogîr, the title was used later also mainly by the kings of Mä warâ' al-Nahr (cf. Bâhâî, ed. Morley, p. 631 infra) but only so long as there were nominally at least the relations of vassal and overlord between them and the Khâns of Kâshgâr. The expression "the khân (or the khâns) and the ilk" is frequently used (e.g. Baïhaqî, p. 841 sqq.); the "ilk" is thus not the "khân", but a prince subordinate to him, just as the ilk introduced in the Kutadgu-Bilik as the personification of justice is not called "khân" but "beg". After the rulers of Sâmârkhân had definitely assumed the title of Khân and founded an independent kingdom, the title ilk disappears from their coins. The word ilk is mentioned for
the last time about 1130 A. D. as the name or title of the ruler of Balasaghn (q. v., i. 615 ff.). The historical references to the "family of Afsiyah" are very scanty; the limits of the kingdom as well as of the individual principalities, of which it consisted, are difficult to determine; the dates also are mostly uncertain; even the coins leave much to be settled here. The kingdom was never actually ruled by one man; feuds between individual members of the dynasty were usually settled by force of arms, frequently with foreign assistance. This state of affairs was first taken advantage of by the Ghaznavids (q. v., ii. 154 sqq.) and later by the Saljuq sultans for their own purposes; of the latter, Malik Shah and his son Sanjar exercised a kind of suzerainty over the princes of Samarkand as well as over those of Kishan; after the battle in the year 536 (1141) this suzerainty passed to the heathen Karal Khitaii (q. v.). The downfall of the dynasty in Ma wara al-Nahr (c. 609 = 1212-1213) as well as in Kishan (about the same time) was brought about by the rebellion of the Muslim population against the Karal Khitaii and the resultant fighting.

**ILGHÂZI** (i. e. champion of the people) is the name of two Saljuq semi-independent rulers of the Ortoqid dynasty who attained power in northern Mesopotamia.

1. **Najm al-Din Ilghâzî B. Ortoq.** He was first of all a supporter of his brother-in-law Tutush in his struggle for the throne of the Saljuq empire of Fars. After Tutush's defeat and death (488 = 1095) he withdrew to Jerusalem which he had received as a fief from Tutush jointly with his brother Sulman. The two brothers had however after a 40 days' siege to surrender Jerusalem to the Egyptians (Sha'bân 489 = July-August 1096). At a later date (from 493 = 1100) Ilghâzî joined the new pretender Sultan Muhammad, who appointed him governor of Baghda in 494 (1100-1101). He held this important office for four years, ultimately in the service of Sultan Barkyaruk and his son Sultan Malikshah.

When Sultan Muhammad dismissed him from the governorship of Baghdad in 498 (1105), he fell out with the Saljuqs. Between 501 (1105) and 507 (1107-1108) Ilghâzî captured the hitherto impregnable fortress of Mardin, one of the most important in the whole of the nearer east, and in 501 we find him also lord of Nasibin. In 504, 505, 506-7 and 508 (1101, 1102, 1113 and 1115) he refused to perform military service in the war, which the Muslim amirs of the west were conducting against the Crusaders in Mesopotamia and Syria by Sultan Muhammad's orders. During the last of these campaigns he with two of his nephews even attacked the commander-in-chief of the Muslim armies Ashkâner al-Bursuqi (q. v., l. 220 b-24) and defeated him (May 1115), but then fled to Syria and together with Taghtegin concluded a truce injurious to the Muslim cause and even agreed to join arms with the Franks. Taghtegin and Ilghâzî brought 10,000 Muslims to the 2,000 Franks. The Frank-Muslim allies encamped together till August at Apamea and Shaizar in face of the new commander-in-chief, Bursuq b. Bursuq, sent by Sultan Muhammad to fight the Crusaders, without however it coming to a battle between Bursuq and the allies. Shortly after (August or September 1115) Ilghâzî, while on his way back to Mesopotamia, was captured at al-Rastan (between Emesa and Hami; Yakut', ii. 778) by Khîrân, one of Sultan Muhammad's generals, but released after some time for fear of Taghtegin. Ilghâzî managed to get on very well with the Saljuq government after the death of Sultan Muhammad and the accession of his son, Mahmud. 

Lu'tu, the governor of Aleppo, was murdered towards the end of 510 (1117). Owing to internal disputes the town and district of Aleppo were exposed to the inroads and depredations of the Franks. After Ilghâzî had temporarily occupied Aleppo in 511 (1117), he was appealed to in the following year by its inhabitants as their last hope and recognised as prince of Aleppo (Ibn al-Adim Kamal al-Din). Ilghâzî in the second half of 512 (1118) succeeded in definitively gaining possession of Aleppo and thus became a neighbour of the Franks, against whom he at once made energetic preparations. The numerically weaker Franks were outflanked on June 25 1119 by his army of 20,000 men in the valley of Tell Afram, taken by surprise and for the most part cut to pieces or taken prisoner. Among those who fell was Roger, Prince of Antioch. It was one of the greatest battles which the Muslims had so far won against the Crusaders (the village of Balat, after which the battle is often called, appears in Ibn al-Adim as Roger's camp on the night of June 20 1119, eight days before the decisive battle). Antioch now lay defenceless at Ilghâzî's feet; but he neglected to take the city.

The reputation of Ilghâzî's military ability now penetrated far and wide and he received the chief command over the Muslims in the war whilst Sultan Mahmuud was waging war in person against the Christian Georgians. Ilghâzî suffered a very severe reverse (Kamal al-Din, Tarikh Halab, 512 = 1121; Ibn al-Athir al-Kamil, 514 = 1120) which resulted in the loss of Tiflis to the Georgians. In 516 (1122) he was granted Maiyafarikin by the Sultan in addition to his other lands. Soon afterwards on Ramadân 516 = November 3 1122 Ibn al-Kalâni in: Ramadân 6, al-Fârîki: Ramadân 17) Ilghâzî died at the age probably of barely 60 at Maiyafarikin (Ibn al-Athir and Abu l-Faraj); 'Adjulâni on the road from Mardin to Maiyafarikin, according to Ibn al-Adim, Recueil des Historiens des Crusades, iii. 634; al-Fuhâl, according to Ibn al-Kalâni; on the way from Aleppo to Maiyafarikin, according to Michael the Syrian). At his death he was in possession of Maiyafarikin, Mardin, Aleppo and apparently also of Nasibin. He was buried at Maiyafarikin (for further details see the historian of this town, quoted in Amedroz's foot-notes to al-Kalâni). Ilghâzî possessed an influence unequalled at that time over the Turkomans of Mesopotamia. He was a bold and ambitious personality, who claimed a leading position wherever he appeared. He was not a general of great genius; it is said that his drinking habits affected his military decisions. He
struck no coins so far as is known (I. Ghišl Edhem, *Catalogue des Monnaies turcomanes*, Constantinople, 1894, p. 82). He married a daughter of Tugh†egir, Il-Kâhitun, and later during his rule over Aleppo also Parkhândû Kâhitun, a daughter of the former Saldjûk ruler there, Rûdwan. We know the names of several of his children: the daughter Gîhar, (al-Fârîki: Kumâr) Kâhitun, who married the Armenian chief Dubay b. Sadaqa in 513 = 1119-1260; Umâna Kâhitun, the wife of the Inâlid Il-Aldî, lord of Amid, who died in 536 = 1141-2; Ayâz, died 508 = 1141-1155, Sulaimân, Timûr-tâsh, and Shîhâb al-Dîn MaḤmûd (?); another daughter Ighâzî whose name is not known married in 495 = 1101-1102 an unnamed son of Tekish, a brother of the great Sultan Malikshâh. Ighâzî was one of those Muhammadan amirs who were the first to check the advance of Crusaders to the east and before the time of Zangi and Saladin. Ighâzî I was the founder of the Ortokíd dynasty of Mardin which survived till 811 = 1408.

Kûthû al-Dîn Ighâzî I, the son of Nâdim al-Dîn Alpî (probably another form of Alpîn) and a sister of the Turkish ruler of Armenia, Sûkîmûn II, succeeded his father in 572 = 1176-1177; Michael the Syrian: *July 20 1176* in the rule over Mardin, Mayâqaftîn, and Ra’s al-Aîn (in Ibn al-Athir, xi. 268, however, he appears as early as 569 in possession of Ra’s al-Aîn). We have only scanty information about his reign. He first of all oppressed his two paternal (according to another tradition, maternal) uncles, the rulers of Hânî (also written Hana, the modern Hene, north of Amid) and Durû, till they recognised his superiority as they had done that of his father: the two uncles appeared at Mardin and paid homage to Ighâzî II. Soon afterwards the latter fell ill. On his recovery he subdued the Arabs who had become turbulent and is said — according to a statement which is probably exaggerated — to have killed several thousands of them and to have taken 12 000 camels from them. He proceeded to extend his sway towards the Euphrates in the district of Bira (the modern Biredjiki). His uncle Sûkîmûn II seems to have had great influence over him. Ighâzî for example joined the alliance which was concluded towards the end of 578 (beginning of spring 1183) by Sûkîmûn II and ‘IZZ al-Dîn Mas’ûd I of al-Masqîl (a cousin of Kûthû al-Dîn Ighâzî) with the object of checking Saladin’s advance into Mesopotamia. The allies, however, found themselves helpless in face of Saladin’s successes and, after the death of Sûkîmûn II, we find Ighâzî’s troops in the army of Saladin in Syria (Šafar 580 = May-June 1184). Ighâzî II died soon after at the beginning of Dju’dâd II 580 = Sept. 9 1184. His principality in addition to the areas mentioned also included Dunaisir. His name is mentioned in an inscription on the minaret of a mosque at Mardin dated in the year of his accession, but the credit of building it however is given to his father Alpi. On the coins struck by Ighâzî (bronze only, which are called dirhams, are known) he calls himself “King of the Amirs” (Malik al-Umara) and, like other Ortokíd rulers of Mardin before and after him, Shah Diyar Bakr, although he did not rule in Amid, the metropolis of this district. Ighâzî II left two sons Hûsam al-Dîn Yoluq Arslân, and al-Malik al-Mansîr Nasîr al-Dîn Ortoq Arslân, who succeeded their father in turn. Nišân al-Dîn Alpûksh, one of Ighâzî’s slaves, married his widow, while one of his daughters was married to Saladin’s son, al-Malik al-Mu’izz, about the end of Dju’dâd I 578 (Sept.—Oct. 1182) or a little later.

Ighâzî II means literally “to cause to swallow or gulp down” (Littim, xvi. 29, especially two lines). In the Kur‘an it occurs only in the I. 8 — a celebrated but difficult passage — *fe(h) ba’ama ḥuwa ba‘awâda, “then he (Allah) made her (a nafs) swallow down her sins and her godly fear*. The oldest exegetical tradition (Tabari, *Tabîr*, xxx. 115 sq.) gives two explanations: i. Allah explained these to the nafs; ii. Allah created these in the nafs. The Mu’tazilites chose the first (Zamâkhshâri, *Kajîshâf*, ed. Lees, p. 1612) but orthodox Islam generally chose the second, the almost certainly correct view. Thuc Râzi (Mafâthî, ed. Cairo, 1308, viii. 438) and Naisabûrî (margin of Tabari, p. 100) But Baijsâwi (ed. Fleischer, ii. 405) follows Zamâkh-
Central Asia, the tributaries are of greater importance for irrigation than the main stream. As soon as the river leaves the mountains and flows into the broad plain and no longer receives tributaries, it practically loses all importance for agricultural culture. The number of canals fed from the Ili on Russian territory is extremely small, but there is one called Ak-Cughan as far down as the lower course of the river, about 15 miles from its mouth; agriculture is there pursued by the Kirgiz.

The Ili is first mentioned in the history of the Chinese T'ang dynasty (vii.—ix. century A. D.). One of the main roads from China to Turkestan led even in those days through the Ili valley (E. Chavannes, Documents sur les Tchouïs (Tures Occidentaux), St. Petersburg, 1903, p. 11 sq.). The oldest Muhammadan source to mention the river is the Hudūd al-ʿĀlam (572 = 982-3); in it and in most later works the name is written Ila. How and when Islam reached here is not known. In the vii.—viii. (xiii.—xiv.) century the Ili valley is described as the boundary of the Muslim world. The lands to the east of it were only won for Islam in the Mongol period. On the Muhammadan principality which then existed there, the civilisation of the upper Ili valley in the vii.—viii. (xiii.—xiv.) centuries, on the decline of this civilisation and its restoration more recently under the rule of the Calkums and Chinese, on the last Muhammadan movement and its consequences, and the partition of the country between Russia and China see the article KULDZA.

Still more scanty are the historical notices of the other parts of the river valley. The name Kunges first appears in the history of Timur's campaigns (Ẓafar-Nāma, Ind. ed., i. 481, where it is written Kangez); the Tekes is mentioned about the same time under the name Teke (in mss. also Yaka). The valleys of the two rivers have always been highly esteemed by nomads as pasture ground. The post route which now crosses the Ili at the village of Ilijsik visloko (the only bridge over the river is here) seems roughly to correspond to the road described by Rubruck in 1253. North of the Ili and south of the mountains (obviously south of the pass of Altin-Imel) there was, according to Rubruck, a town inhabited by Persian speaking Saracens, which he calls Euphrasie (Reis des Voyages, etc., iv. 280 sq. F. Schmidt, Über Rubucks Reise, Berlin, 1885, p. 42). From its situation it is the same town which is called at the same time by the Armenian king Hethum Hnabalek and is called by the Chinese I-la-ba-li or I-li-ba-li i.e. Ili-Balki "town on the Ili" (E. Bretschneider, Medieval Researches, etc., i. 169). The same name is used by the Chinese in the xvi. century as that of a district, and it is expressly stated that there are no towns there and that the population consists entirely of nomads (ibid., ii. 242). Below the high road the river breaks through a chain of phorphy rocks where there are Buddhist inscriptions and sculptures of the Calmuck period (xvii.—xix. centuries); the rocks are therefore called Tamgali-Tas (inscribed stones) by the Kirgiz (N. Pantusow and A. Posdnejew in Zapiski Vost. Otd., Arch. Obozr, xi., 273 sq. with two plates). About a hundred miles below Ilijsik visloko a dried river bed, the Bakanas, runs off from the modern river and reaches the Balkhash in three arms. There are said to be traces here of old canals and ruins of
ancient buildings (L. Berg, in *Istoriya Imp. Kurskogo Geogr. Otdel*, xl. 590). To what period and people these remains are to be attributed is doubtful, as the literary sources are absolutely silent as far as is known (we may however here add to the article BALKHASH, i. 624?), that the lake is mentioned in the *Zafar-Nâma*, Ind. ed., i. 496, under the name Attrak Köl). So far no inscriptions have been found there either.

The Ili like all Central Asian rivers is little suited for navigation and has so far not attained any importance in this respect, although several attempts have been made, e.g. for example, the voyage of L. Berg up the river from Ilijskij viselok to Lake Balkhash in 1903 (ap. cit., p. 588 sq.) (W. Barthold).

**ILLIYAN** [see AL-KUDS.]  
**IL-KHANS**, Mongol dynasty in Persia, vii,ib-viii,th (xiii,ib-xiv,th) century. On the foundation of the kingdom and the meaning of the title of its rulers see the article HULAKU (ii. 332 sq.), on the later rulers see the articles ARBAKA (i. 4), ARGÜN (i. 433), GAIKHUTU (i. 128), BAIKUDU (i. 591), GHAZAN (ii. 149 sq.) and ARU SAATD (i. 103 sq.). With the death of the latter on Rabî‘ II 736 (Nov. 30 1335), the main branch became extinct in the male line till 736 = 1335-1554, several princes, mainly from branch lines and even a princess, Sahl Beg, sister of Abu Sa‘id 739-740 ascended the throne, but were not generally recognised. Some historians also include the Djalâr (i. 1003) among the Ilkâns; in reality these were only connected with their predecessors in the female line (Hasan the founder of the dynasty was through his mother a grandson of Arghun).

The kingdom of the Ilkhan at the time of its foundation included all the lands from the Oxus to the Indian Ocean and from the Indus to the Euphrates, with the addition of a great part of Asia Minor and the Caucasus countries. Later some lands in the east were lost to the Çaghatalı (i. 843 sq.); on the other hand, the local dynasties, which were at first maintained in South Persia and Asia Minor, were gradually swept away and replaced by governors appointed by the Ilkâns. The attempts to take Syria from the Egyptians, Sulṭân met with no success. In Persia itself, in spite of the inevitable consequences of the Mongol conquest and misgovernment of most rulers, this period was in many ways one of progress. After the conquerors under Ghâzân Ilkhan had definitely adopted Islâm new cities arose under their rule such as the extended Tabriz and the new foundation Sulṭâniya, and splendid edifices like the mausoleum of Khân Uljâitü in Sulṭâniya were built. The Mongol rulers naturally had little interest in Muslim theology or Persian belles-lettres; on the other hand, under their patronage the writing of history in Persia developed to an extent unknown before, so that we are much better acquainted with this period than with the events of preceding centuries. Among scientific subjects medicine, and mathematics were specially favoured.

(W. Barthold.)

**ILLIYAN** is mentioned in the Kur. 83: 18, 19, where it may be a place or a book. It is generally supposed to be a name of the seventh heaven, or of the register of the good deeds of the pious. For the various explanations see Lane’s *Lexicon*, p. 2125 and 3147, and the commentaries on the passage. The word is regarded as a regular plural, or as a plural without a singular; but it is no doubt the Hebrew word *šelom* (Gen. xiv. 18, etc.).

**Bibliography: The Commentaries on the Kurân.**  
(T. H. Weir.)

**ILM** is the broadest word in Arabic for “knowledge”. In the lexicons it is often equated with *ma‘rifah* and *šu‘ur* (Lane, p. 2138), but there are marked distinctions in usage. The verb governs one or two accusatives as it indicates knowledge of a thing or of a proposition (German *kenne* and *wissen*). But *ma‘rifah* is “coming to know by experience or reflection”, and implies preceding ignorance. It thus cannot, unmodified, be used of Allah’s knowledge. Yet some contested this on the basis of actual occurrences of the word used of Allah (*Kiswät al-Awilmin*, ed. Cairo 1315, p. 11). *Šu‘ur* is “perception” especially of details, the *šu‘ir* is the “perceiver”, “feeler”, and thence “poet”. Another early distinction has already been pointed out by Goldziher in his article on *Fiqh* (vol. ii. 101 above). *Ilm*, in its early usage, was knowledge of definite things (Kurân, *taṣfîr, ʾahkâm*) but *fık* was the independent exercise of the intelligence. So *faḥk* (*faḥkà*), was one who was thus intelligent, but that word has come now to indicate a minor canon lawyer or casuist, while *ʾilim* (*łaμà*) following a broadening of the meaning of *Ilm* to “science” and of *al-ʾilâm* to “the sciences”, has come to mean a scholar in a wide sense and especially one using intellectual processes. Against this change of meaning there is a vigorous protest by Ghażalî, in his *Ihya*, Book i., Báb 3, who denounces especially that the praises which have come down of the *ʾilâm* as to Allâh, should be applied to these dialecticians and canon lawyers. Further, this brought the *ʾilâm* into sharp distinction on another side from the *ʾarif*, who is the mystical knower by immediate experience and vision, almost, but not quite the same as gnostic. For this distinction of *ʾilâm* and *ma‘rifah* in Şifî theology see Khusrawî’s *Risâla*, ed. Cairo, 1290, with comm. of Zakariyâ, iv. 60 sq. But when *ʾilm* became philosophical it had to submit itself to the system of the scholastic theologians (*muthallâhimūn*). They gave it a place in the scheme of Aristotelian predicaments (*al-ma‘lûmat*). There it is an *arad* (“accident”, in the sense of the older logicians), one of those characterized by life (*muḥtáṣs bil-hayâ*), coming (along with will, power etc.) in the class of the modalities (*kaysîyât*) of the *naf* (the lower or appetitive soul (*Mawûkîf* of *Ibî* with comm. of Djûrdî, ed. Bulâk, 1266, pp. 272 sqq.; *Dict. of Techn. Terms*, p. 1061, cf. pp. 1055—
It is divided into eternal (baṣīṭ) and originated (kādīūl, muḥbatīl), according as it exists in God or a creature, and there is no resemblance (kaḥāb) between these two. Originated knowledge is of three kinds: intuitive (baṣīṭī); necessary (daʿīrūl), by the evidence of the senses and by unanimous assertion (khabar nuṭawātīrī), deductive (iṣīdālī). See the ʿAṣāʾīl of Nasafi with the commentary of Taftāzānī and others, ed. Cairo, 1321, pp. 18 sqq., and for a number of short definitions of ʿilm see the Tuṣūfī of Dījrānī, sub voce. Those scholastic theologians who distinguished between ʿilm and maʿrīfa used ʿilm of compounds and universals and maʿrīfa of simple things (baṣīṭī; see baṣīṭ in Dījrānī’s Tuṣūfī) and particulars (Taftāzānī on Naṣafi, p. 40). Another distinction enters in the relation of ʿilm to ʿamāl, “works” in the theological sense. There is ʿilm naṣārī, such as knowledge of things; when you know them you have done every thing. But opposed to it is ʿilm ʿamālī, knowledge of religious duties (aʿlāṣdālī); your knowledge is not complete until you have acted upon it (Rāghib, Muṣfrādat, p. 345). This is put rather differently in the Taṣkīr of Ṭārīfī (ed. Cairo, 1306, p. 192). It is the duty of every Muslim to seek knowledge; therefore he who knows and acts on his knowledge has two acts of obedience to his credit; if he neither knows nor acts, he has disobeyed twice: it he knows not act, he has obeyed once and disobeyed once. This in the end joins the question as to what is saving faith (iḥām). For a descriptive classification of all the arts and sciences which have been reduced to writing (al-ʿulūm al-nuḍawwūma) see Dict. of Techn. Terms, pp. 2–53. Ibn Ḥādūn in his Muḥaddīna (Fusul vi) deals with these more historically and philosophically in their development and their relation to the essential facts of life (De Slae’s translation, ii. 319 sqq.; Quatremère’s text, ii. 272 sqq.). But with regard to all sciences there is a fundamental distinction. They are divided into those praiseworthy and those blame-worthy (al-maḥmūda wa l-muḍāmīma), and among the blame-worthy are reckoned those which are not useful for this world or for that to come. The basis is the frequently quoted tradition. “It is the beauty of a man’s ʿIlm that he leaves alone what does not concern him” (mā lā yaʿniḥī). The religious Muslim should therefore avoid such sciences as are not demonstrably useful for this life or for his eternal salvation. (Ghazvī, ʿIlāya, Book I, Bāb 2; Ibn Ḥādūn, Muḥaddīna, ed. Quatremère, iii. 136; Goldziher, Muh. Studien, ii. 157, and review in Zeit. d. Deutsch. Morgen. Ges., lxv. 532; Hujwīrī, Kashf al-Mahdāj, transl. Nicholson, p. 11). Bibliography is given above. (D. B. MacDonald). ILTUTMISH, SHAMS AL-DIN, the slave and afterwards son-in-law of Ḳūṭ al-Dīn Aḥbāb [q. v.], who made him governor of Badāk [q. v.]. After the death of Ḳūṭ al-Dīn Aḥbāb in 657 (1210), his adopted son ʿArām Shāh succeeded to the throne, but some of the nobles conspired against him and invited Ilutmish to come to Dīhilī; ʿArām Shāh marched from Lāḥor to meet him, but was defeated and apparently put to death. Ilutmish had to contend with rival chiefs before he succeeded in firmly establishing his authority; in 618 he resisted the attempt of the infortunate Ḏjalāl al-Dīn Mangaberīl [q. v.] to set up a kingdom in India; later on by a series of successful campaigns he extended his dominions so as to include Lakhnawtī (in 622), Sīndh (in 625), and Gwālorī (in 630), and his expeditions into Mīlāwa (in 631–2) brought all India north of the Vindyāya Mts. under his sway. He was the first of the Muḥammadan princes of India to receive recognition from the Caliph of Baghdād (al-Mustansīr Li-Thālib), and on his coins and in his inscriptions after 626, he styles himself Nāṣīr Āmīr al-Muʿminīn. He continued the building of the great ʿAbū Minār [q. v.], which his predecessor had begun. Bibliography: The best account of Ilutmish is given by his contemporary, Minhājī-Ṣarāḥī, Taḥjīb-ī-ṣāliḥī, trans. H. G. Raverty, (Index s. v. Iyaltimish); Elliott-Dowson, History of India, (Index s. v. ʿShams-ud-din Alumṣāh); E. Thomas, Chronicles of the Pathan Kings of Delhi, p. 41 sqq.; S. Lane-Poole, Medieval India, p. 70 sqq.; J. Horovitz, The inscriptions of Ilutmish (Epigraphia Indo-Moslemica, 1911–2). ILÝĀS, the Biblical prophet Elias, is twice mentioned in the Qurān. In Sūra vi. 83 he is mentioned with Zakariyāʾ, Yahyā, and Iṣā as one of the sāliḥīn without further details. In Sūra xxxix. 125—130 his history is related in the fashion which is stereotyped for all stories of prophets in the Qurān. That Muhammad however knew something more of him is clear from the mention of the Baʿl, which is differently interpreted by the commentators, sometimes as lord, sometimes as an idol who has given his name to the town of Baalbek, sometimes as a woman whom the Israélites served.Verse 130 calls him Ilyās which has given rise to much conjecture; it is however clear from the context that this name was only formed by Muhammad with his usual freedom to get a rhyme in -īn. The commentators on Sūra xxxvii. 123 sqq., as well as the universal historians and the collectors of legends of the prophets give the following about Ilyās. He lived in the reign of king Aḥāb (Lāḏāb in al-Thaʾlabī) and his wife Ṭūbāl (variously written). Aḥāb used to follow Ilyās, but the Israélites were worshippers of the Baʿl. One day, however, Aḥāb had put him off saying that the kings who served gods had as much success as he had. Astonished at this Ilyās prayed God to give him power over the rain. Thereupon a drought arose which lasted three years; Ilyās concealed himself during this period but was provided with food. He cured Alisaʾ, son of a widow, who became his disciple. At the end of the three dry years God reproached him with causing the deaths of many innocent persons by his severity. Thereupon Ilyās proposed to the Israélites that they should appeal to their gods for help and, if they did not hear, they should return to God. The gods could not hear their worshippers and at Ilyās’ prayer the desired rain fell. The Israélites however were not converted. Enraged at this obstinacy, Ilyās begged God to take him up. When he contemplated with his disciple Alisaʾ the holy horse appeared. Then Ilyās ascended amid the cries of Alisaʾ. God transformed him: he became a feathered being of light exalted above all human passions, half angel and half man, of earth and heaven at the same time. This is the version of al-Tabātābāī. Al-Thaʾlabī is much more detailed. According to him, Queen Ārbīl (Jezebel), the representa-
tive of Lādjab, is the incarnation of all wickedness. Her chancellor however is a pious man, who conceals his faith. As in the Bible, here also, the story of Naboth (Naboth is called Mazdaki, obviously an echo of Mordechai) is the cause of Ilyās’ exhortation and the king’s wrath. Ilyās conceals himself for seven years in ravines. Thereupon Lādjab’s most beloved son falls ill. Four high priests of Baal set out to slay Ilyās, the alleged cause of his illness. The latter, however, instils them with such respect that they return full of awe. Lādjab then sends 50 soldiers who call out to Ilyās that they have been converted. The latter prays God to consume them with fire, if they are lying. This happens and a second body of soldiers meets the same fate. Finally, Lādjab sends the believing chancellor to the queen with a free conduct and with a treacherous troop. At God’s advice Ilyās goes with him to save the chancellor. On the arrival in the palace the child dies, so that the king forgets Ilyās and the latter is able to depart unnoticed. As he wearsies of his stay the mountains he enters the house of the mother of the prophet, Ilyās, who being that child, was raised from the dead by Ilyās. He then goes back to the mountains and begs God to give him power over the rain for seven years. He is only granted it for three years during which he himself is fed by the birds. The whole of Israel has now to suffer famine, only one widow is supplied in a miraculous fashion by Ilyās with meal and oil. The rest of the story of Ilyās, the healing of Alīsā, etc. is practically the same as that of al-Ṭabarī. Here also Ilyās is described as half mortal and half heavenly, appearing to men on earth. Al-Ṭabarī tells of a man who met Ilyās in Palestine; after talking to him he went away on his camel.

There is another Elias story in the Kur‘ān, although the name is not mentioned and the person who here takes the place of Elias is not identified by tradition with him, but with al-Khaḍīr. In Sūra xviii. 64 sqq. it is related how Mūsā and his servant while fishing met a servant of God whom Mūsā wished to follow. The unknown one however replied that Mūsā had not the necessary self-control. While travelling together the servant of God performed several apparently ungrateful and cruel deeds. Mūsā reproached him every time, so that the guide finally separated from him after showing him that each of his supposed wicked deeds was justified. Jewish legend relates a journey of Elias with Joshua ben Levi on which Elias did similar things to those of the unnamed servant of God in the Kur‘ān. Here also Joshua ben Levi apparently rightly indignant at them is shown by Elias to be wrong in his premature judgment. The similarity between the two stories is so great that it cannot be doubted that the Kur‘ānic one goes back to the Jewish. The unnamed servant of God in the Kur‘ān is usually identified with al-Khaḍīr. It should be noted, however, that al-Baidawi for example says on Sūra xviii. 64: “it is also said that he is Alīsā or that he is Ilyās”. This confusion of Ilyās and al-Khaḍīr is significant and further cases may be mentioned. The reason is that in view of the Biblical story of Elias’s being taken up to heaven, the latter name of al-Khaḍīr is numbered among the immortals. Perhaps al-Khaḍīr’s name shows this. Al-Khaḍīr “the green” is only an epithet of the man who was called B-l-y-ā or, according to another reading, V-l-y-ā, i.e. Ilyās. But elsewhere they are twins, not genealogically, but in their work and common activity. They go together to the fountain of life and drink from it, a trait which was originally only in the Alexander legend, but which again guarantees Ilyās’s immortality, as his name shows which is interpreted as al-Ås, “the myrtle”, the symbol of immortality, Ilyās and al-Khaḍīr having survived to the first revelation to Muhammad are said to have wished to die. But Muhammad is said to have replied to them: “O Khaḍīr, it is your duty to aid my community in the desert and you, O Ilyās, must aid them at sea”. Usually however al-Khaḍīr-Glaukos is the sea demon, while Ilyās is the patron on land. The two spend Ramaḍān each year in Jerusalem, observing the fast. They then make the pilgrimage to Mecca, without any one recognising them, unless God grants this favour. Their food is pond-weed (karafa) and truffles (kam‘a). After the pilgrimage they clip one another’s hair and separate with eulogies. Any one who repeats these formulas three times at morning and evening is immune against theft, fire, and drowning (a-rāh, bārāh, qabāh), as well as against higher powers, Satan, sorcery, and sorceries. Al-Khaḍīr and Ilyās meet every night at Alexander’s Dam where they fly in the air. In the Jewish legend he also flies about giving help everywhere. (See also the article AL-KHAḌĪR).

Besides al-Khaḍīr Muslim legend also knows the immortal Enoch-Idrīs [q. v.]. Ilyās is therefore sometimes also identified with the latter. In various genealogies of Ilyās he is said to be really Idrīs. Usually however his genealogy is traced to Aaron: Aaron-Eleazar-Pinchus. The latter is described as his grandfather. The name of his father has become, perhaps from Tishb, N-a-b-y, Y-s-y, and finally Yāsīn.

It may further be noted that Ilyās, like al-Khaḍīr, is often identified with St. George (see DIBDIB) probably because the latter is also a patron saint.

2MĀD AL-DĪN MUḤAMMAD B. MUḤAMMAD AL-KĀṬĪB AL-ISFĀHĀNI, A CELEBRATED ARAB STYLIST AND HISTORIAN, born at Isfahān in 519 (1125) of a prominent family, to which the celebrated Kāṭīb al-ʿAzīz, whose biography is given in Ibn Khallikān, Wafayyāt, ed. Wüstenfeld, No. 77, also be-
IMĀD AL-DĪN — IMĀLA.

longed. On him cf. Recueil des textes relatifs à l'hist. des Seljoucs, ii., Préface xix. sqq. He spent his youth in his native city and in Kāshān, but also studied in Baghdad particularly fiqh and made a journey to Mōsul and other places. When the Sulṭān Muḥammad II besieged Bagh-
dād in vain in 551 (1156), he was there and con-
gratulated the Caliph on its deliverance in a kašida, which gained him the favour of the vizier Ibrāhīm Hubārī [q. v.]. The latter appointed him nāʾib in Wāsit; after the vizier’s death in 560 (1165) however he lost this office and lived through the difficult years. Finally he applied to the Ayyūbidis in Syria, which were acquainted with his family, particularly with the above mentioned al-‘Azīz, who was an uncle of ‘Imād al-Dīn. He found a friendly welcome there and was appointed kāthib by Sulṭān Nūr al-Dīn and later mudarris at a madrasa built in honour of him. He was also sent on a diplomatic mission to the Caliph and finally appointed muṣrīf of the Diwān. On Nūr al-Dīn’s death in 569 (1173), however, his en-
emies were able to supplant him so that he had to leave his offices and go to Mōsul. There he fell ill, but recovered and returned to Syria on hearing that Ṣālah al-Dīn was preparing to con-
quer that country. He congratulated him at his capture of Hums in a poem, won great influence with him and accompanied him on all his campaigns. On Saḥādīn’s death in 589 (1193) he retired into private life and devoted himself to literary work till his death in 597 (1201). His chief work is undoubtedly the comprehensive anthology of the Arabic poets of the 9th century entitled Khwārid at-Tajwīr wa-Dhararīt Aḥl al-‘Āyr (still un-
published). His history of the conquest of Syria is better known: al-Fath al-‘uṣūs fī l-Fath al-
Kutbīs; Conquête de la Syrie et de la Palestine par Ṣalāḥ ed-Dīn, ed. Landberg, Leiden 1888. He also prepared a history of the Saljūqīs in al-Īrāq on a basis of the records compiled by the vizier Anuṣṭurwān and called it Nūṣar al-Fatḥa wa-
Uṣrat al-Fītḥa; a synopsis by al-Bondārī [q. v.] has been published by Houtsma. Of his memoirs, al-Barg al-Shāmi, only one volume and a few excerpts have come down to us. ‘Imād al-Dīn’s prose writings are characterised by an exceedingly ornate and bombastic style.

Biography: Ibn Khallikān, Wafâyāt, ed. Wüstenfeld, N. 715; further references in Brockelmann, Gesch. der arab. Lit., i. 314 sq. IMĀD SHĀH DYNASTY, of Herāt [q. v.], was founded by Fath Allāh ‘Imād al-Mulk, by birth a Brahman of Vidjayanagar, who had been captured as a youth in an expedition of Aḥmad Shāh Bahmani I to Vidjayanagar and educated as a Muslim. He served under ‘Abd al-Kādir Khāndāhān, governor of Berār, and in the reign of Mu-
ḥammad III Bahmani succeeded his master. In 1490 Fath Allāh followed the example of Aḥmad Nīgān al-Mulk of Ahmadnagar and Yusuf ‘Ādí Khān of Bīdājrūr and declared himself independent, not from dissatisfaction towards Māḥmūd Shāh Bah-
mānī, but from disillusionment to serve the minister, Kāsim Barīd, the real ruler of the kingdom, who kept the king in confinement and from whose control Fath Allāh subsequently made a fruitless attempt to release him. Though a native Dakhani, he was an intimate friend of the foreigner Yusuf ‘Ādí Khān, and his great influence was ever exercised in the interest of peace between the quarrelsome

sultāns of the Dakhan. Before he declared his in-
de dependence, Berār had been divided into the two provinces of Gāwīl and Māḥtūr, of which he re-
tained the former, but before his death he had added Māḥtūr to his dominions. He died in 1504 and was succeeded by his son ‘Alī al-Dīn, who was far inferior to him in ability and permitted himself to be drawn into quarrels, in which he had no genuine concern, and from which his kingdom suffered severely, with Māḥmūd Shāh Bahmānī I, Makhārār of Gūjārāt and Sulṭān Kūl Kūt Shāh of Golkonda. He was also engaged in disastrous warfare with Aḥmād-nagar regarding the possession of Fāṭūr, on the Godāwāri. He died in 1529 and was succeeded by his son Dāryā, a feeble ruler, during whose long reign the influence of Berār in the politics of the Dakhan was on the wane. He played a subordinate part in most of the quarrels between the other Mūhammadan sultāns and, having joined the unnatural alliance between the sultān of Bīdājrūr and the rādī of Vidjayan-
agar against Hūsain Nīgān Shāh I of Aḥmād-nagar, placed a part more credulous to his orthodox and his political acumen than to his honesty but secretly helping Hūsain Nīgān Shāh and thus preventing the establishment of an Hindū predom-
nance in southern India. For some time before his death Dāryā ‘Imād Shāh was completely in the hands of his minister, Tufāl Khān, and when he died in 1560, Tufāl Khān placed his young son, Burhān ‘Imād Shāh, on the throne but kept him a prisoner and governed Berār with hardly a pretence of subordination. Tufāl Khān was attacked by the sultāns of Bīdājrūr and Aḥmād-nagar for having declined to join the confederacy which finally crushed Vidjayanagar at the battle of Bālikota in 1565, but, though defeated and reduced to great straits, succeeded in playing off one of his enemies against the other and in bribing the sultān of Bīdājrūr to retreat. In 1572 Muḥtār Nīgān Shāh of Aḥmād-nagar again invaded Berār, on the pretext, on this occasion, of liberating Bur-
hān ‘Imād Shāh from his humiliating position. Muḥtār captured Nārānā and annexed Berār; and carried off Tufāl Khān and his son, and Burhān ‘Imād Shāh and all his family to a for-
tress in the kingdom of Aḥmād-nagar, where they all died in one night. The manner of their death is uncertain, but it was not fortuitous.

Biography: Firuṣṭa, Burhān-i Mōs-
thir; Munashfāt al-Indāb, vol. iii; Tabaḵkā-
hā, ‘Abbār; Historic Landmarks of the Deccan by Major T. W. Haig. (T. W. HAIG.)

IMĀLA (=? deflection, Inf. iv. of māla, to bend) is a phonetic phenomenon, which, according to al-Zamakhshārī, consists in the alf inclination to karr, so that the tone becomes homogeneous (liyatādjaša ‘t-sawt),… the case is that a karr or yā occurs near the alf; or that it is changed from a letter moved from karr or from a yā; or that in a certain position it becomes a yā′. It is a question of the transition from long a to or â (the imāla may be satīdī “strong” or mutawasīfî “of medium strength”) under the influence of an adjoining i sound, a kind of Umlaut, which was noticed even by the old Arab grammarians and interpreters of the Kur’ān. The inclination of the short a towards yā mentioned occasionally. As is clear from al-Zamakh-
shārī’s definition the i sound which causes the imāla needs not actually appear, it may merely exist in
IMĀM (from the Arabic amat, "to precede, to lead") originally "leader", particularly "caravan leader, any one who guides a column of camels," a synonym of ḥādī; whence also a person or thing who serves as a guide or pattern, e. g. to the pupil in the school (Lišān, xiv. 291). In the Kūrān, the word is found in the meaning of example, leader, pattern, model, or prototype (ii. 118; xv. 79; xxv. 74; xxxi. 11). Since the foundation of the Muslim community, the term has been applied to the person who indicates the ritual movements of each rakʿa to the believers assembled in rows for the canonical service (ṣalāt), which those who stand behind the imām copy. Originally the imām was the Prophet himself or in his absence some one authorised by him; after him his successors (khulafa) or their delegates filled the office. The conduct of public worship became thus one of the chief attributes of the ruler and the transference of power to the governors of the provinces was seen in a form visible to all when the Caliph's deputy placed himself at the head of the community assembled for prayer. The jurists of Islam therefore give the name imām to the chief of the Muslim community, the spiritual and secular head of the nation with success to show that the kind of imām which is due to the presence of an ī sound is common among the eastern Arabs and is relatively modern, while the other variety belongs to the Hijāz and represents an original Semitic ē sound. In answering the question as to how far the imāla spread in ancient times the Arabic names and words preserved in transcription in foreign sources are naturally of great importance.

The modern dialects also show a kind of imāla. This must, however, be interpreted differently from the literary imāla. In the Syrian dialect of Beirut, for example, it depends mainly on the surrounding consonants and only exceptionally (for example with r) does an ī sound exercise its influence. This is therefore a spontaneous transition from an a to an ā. The sounds which prevent imāla are in this case not only the emphatic and velar but also the laryngal.

There has been considerable discussion as to whether the imāla was marked in Arabic script by a final ū, a question which cannot be considered to be definitely settled, in spite of Brockelmann's answer in the affirmative in his Grammatik und Grundrisse. In Ms. there is no special sign for imāla. In edited texts however it is usual to indicate it by the figure — under the consonant.

IMĀM — İMÂN.

The Zaidis assert that the texts quoted in support of the assignment of the imām to ‘Ali do not refer to him, directly and personally but only according to his distinguishing marks as imām. They therefore say that a mistake could be made in regard to the description of the individual and that the community could legally choose two shaikhs (Abū Bakr and ‘Omar) but that ‘Ali had a greater right to the imām. The former were preferred, although the latter had the greater right. The imām has not the right to appoint his successor; among the Imāms however the imām must be known by his predecessor and be regularly designated by him. The Ghufrāt (extreme school) teach the divinity of the imām (Ibn Khaldūn, al-Muqaddimah, ed. Qustemèra, i. 355 sqq., trans. de Slane, i. 400 sqq.; see ZADĪYA).

Every masjid (q. v.) has an imām, a principal mosque (ǧīmān) may have several. The imām is sometimes an official of the town as he has also to supervise the morals and order of the people in the quarter in which his mosque is. In the Turkish empire he has also the office of making out the certificates (ṭīm u ḵabar) required for the conveyance of property, the determining of civil status etc.

To avoid any confusion in the two meanings of the word imām, the Persian call the active leader of the worship of the Prophet, “leader of prayer”, a literal translation from the Arabic āl-ṣalāhām. The founders of the four great orthodox schools of law are also called imāms and Abū Ḥanifa was even known among his scholars as al-imām al-ṣalāhām “the greatest imām”. This name has also been given to a market place near Baghdad, originally called Rusafa, where Abū Ḥanifa is buried (CL. Huart, Hist. de Bagdad, p. xiv). Finally, imām has become an honorary title of all scholars who have founded schools.

IMĀM AʾZAM, title of the Khallīf. (See KHALIFA.)

IMĀM-BĀRĀʾ A. H. (“enclosure of the Imāms”), a building in which the Muḥarram festival in India is celebrated, and the taṣ‘īyār (q. v.) are kept when they are not being carried in procession; it sometimes serves also as the mausoleum of the founder and his family; the best-known examples are those in Lucknow and Murshidabad.

IMĀM AL-MADRASM. (See AL-MUDAWAINI.)

IMĀM ŚAḤ is a saint of the Ismāʾīlī Shiʿa sect, whose tomb is venerated at Pārāna, about 10 m. S. E. of Ahmādābād [q. v.; he is said to have come from Persia and to have settled here in the middle of the 15th century, and the Mūmāns (formerly Muʾmīn) trace their conversion to him; but the majority of his followers are Hindus, who do not differ from other Hindus, except for their special devotion to Imām Śaḥ and their practice of burying the bones of their dead, after cremation, near the tomb of the saint at Pārāna. He wrote a book of religious precepts, entitled Sīhah Pāṭī, which is read by all his followers; some of the Muslim Imāmāshāhs read it in preference to the Kūrān. Some Hindus worship him as a god and in their prayers repeat the words “Imām Kēvūlah” (the Imām is the One God), but most of his followers do not consider Imām Śaḥ to have been more than a religious teacher or a saint.

IMĀM-ZADE, a Persian title for descendants of the Imāms and an abbreviated designation also for their graves. This name was also given to the Persian scholar, preacher, and poet, Abū l-Mahāsin al-Wābir, born in Surkh near Bihkārā (Schefan, Chronom. Pers., i. p. 24 of the notes).

IMĀMA. (See IMĀM.)

IMĀMĪ. (See IMĀM and ʿIMĀN ASḤĀRĪYA.)

IMĀN. The basic idea in the root ‘mn is rest of mind and security from fear (Rāghib, Muṣfādāt, p. 24; Līlān, xvi, 159, 1b sqq.). In consequence the fourth stem can mean both “to render secure” and “to put one’s trust in” something or some one. Hence in theology al-imān means 1) the putting of one’s trust, the having faith, in Allāh and his prophet and his message, and 2) the content of that message. A consideration of the first of these uses divides roughly into three; cf. the discussion in al-Ghazālī’s Iḥyāʾ, Book ii. Ṭaqāʿ, iv.

I. The Kūrān sometimes distinguishes and sometimes confuses imān and ʿislām and is ambiguous as to their relationship to good works. Theological controversy followed, which is mirrored in the traditions, and the technical use of imān in fāḥ and ʿalām is, in consequence, very contradictory. A tradition, assertedly from Muḥammad, says that whoever has in his heart the weight of a grain of faith (imān) will come forth from the Fire. But what here is imān? Some say that it is simply a holding fast in the mind (ʿiqāl bil-ṣalāhāl), others added a testifying with the tongue (ṣahāda bil-lisām); others added a third element, works according to the fundamentals of the faith (ʿamāl bil-aqāʾīl). The first has been the position of most Asḥārites and Māturiddites; the second of the Ḥanāfīs and the third of the Kātīrjīdites. The Kātīrjīites held that faith was simply acceptance with the tongue (ṣāḏīk bil-ṣalāhāl), i. e. confession (īkār), the narrower sense of ʿislām; others, such as the ʿAṣhrūs, a sect of the ʿAṣhrūs, which was only knowledge (maṣīra) of Allāh gained by reason (ʾikār) and of the messages of the prophets gained by revelation. Orthodox ʿIslām has come to the conclusion, which it, as usually, states as having been the position
of the Fathers (al-salaf), that faith consists of acceptance in the mind of and firm adherence to a belief (taṣdiq, ṭīṣadād, q. v.), statement with the tongue of this acceptance (ikhrār, ḥavel) and good works. The second is Islām in the narrower sense. He who has all three will enter the Garden. But in the case of one who possesses taṣdiq and Islām and dies with a single mortal sin (kabīra) unrepented of, the Muʿātžiṭes held that he was neither a believer (muʿāmin) nor an unbeliever (kaṣif), but a ēreprobate, and that he would remain eternally in the Fire. In the last point the Ḥārāḍiṭes agreed; but they held also that all sins were mortal. Orthodox Islām applies the same name to such an one but holds that eventually he will enter the Garden; for sinful believers the Fire is Purgatory and not Hell, and good works are not of the essence of belief but are additions. At the opposite extreme were the Mūḍjīṭes, the “postponers”. Historically they arose in early Islām from the difficulty which the pious found in treating as Muslims those who professed to be Muslims but were yet notoriously evil-doers. The Ḥārāḍiṭes said roundly that such were unbelievers; the Mūḍjīṭes preferred to “postpone” decision until Allāh revealed all secrets. In the meantime, they argued, a person may claim to be a Muslim, in one form or another and to one degree or another Islām has accepted this position. All who worship towards the Kibla are to be accepted as Muslims, with no questions asked. But the later Mūḍjīṭes developed this into antinomian heresy. It is faith that saves, they taught, and evil works do not hinder the effectiveness of faith, even as obedience in good works cannot save one who is an unbeliever (Van Vloten, Irāq, in Zeitschr. d. Deutsch. Morgen. Gesell., xlv. 161 sqq., Goldziher, Vorlesungen, index sub Murāḍašīrā). Lastly, there is the case of one who professes Islām and acts as a Muslim, that is, goes through the ritual and external observance of Islām, but has no internal faith. He is a hypocrite (mūṣafad) and an unbeliever. In this connection it is to be remembered that the formula (fa'a) and “good works” (ṣamāl fa'il) in Islām primarily and ordinarily mean obedience to the ritual law (al-ṣīḥār).

II. Does faith increase and decrease? In the Kūrān increase of faith is frequently mentioned and the Fathers (al-salaf) held that it increased with acts of obedience and decreased with acts of disobedience. By this, so later Islām taught, they meant that the mental acceptance (taṣdiq) remained and that the good works were not to be regarded as parts of it or essentially affecting it but as additions to it by which it was increased in amount. Conversely with acts of disobedience its amount diminished but itself essentially remained. So the Prophet could speak of faith to the amount of a grain, showing that its amount could vary, and al-Ghazālī shows with great psychological truth and beauty how good deeds go to nourish faith. But the question remained as a subject for verbal dialectic. Those who held that faith (imān) meant acceptance (taṣdiq) and good works (ṣamāl) taught that it increased and diminished, and those who held that faith was simply taṣdiq taught that there could be no question of quantity in it.

III. There appears to have been an early disqualification to say, “I am a believer” (una muʿāmin) without the qualification, in šā Allāh, “if it be the will of Allāh,” and still more with the addition ḥakṣen, “in verity”, or “really, or ṣinda ḥaṭā”, in the sight of Allāh. Examples are quoted in al-Ghazālī’s Iḥyāʾ, Book ii, Fasā’i iv., Muṣāla i.; cf. the commentary of the Saiyid al-Murtaḍa. Hence the Ash’ārites with the mass of Shāfiʿites, Ṣallikites and Ḥanbalites insisted on adding in šā Allāh, while the Māturidites and Ḥanafites prohibited it and permitted the addition of ḥakṣen. They urged that to say “if it be the will of Allāh” implied doubt (ḥakṣ) and doubt in such a connection meant disbelief (kufr). In reply the Ash’ārites argued that the formula was used not to imply doubt of the reality of the absolute acceptance in the mind, but a) to guard against a making of one’s self out to be pure (taṣkīyāt al-naṣīf; cf. Kur. iv., 52, lii. 33); b) out of courtesy (ta‘addub) and to gain a blessing (tabarruk) by submitting all things to the will of Allāh; c) to express a doubt as to the perfectness of the faith in question though not as to its reality or, if works are reckoned a part of faith, a doubt as to whether there will be works; and d) to express a doubt as to whether Allāh will permit the believer in question to die in the faith, for all things must be judged by their ends (khawāsīn). For the Ash’ārite side see al-Ghazālī, reference above, and for the Māturidites, al-Bāṭinī’s commentary on the ʿAḥā’id of al-Nasafi, ed. Cairo 1321, p. 127 sqq.

(D. B. MacKOLD.)

IMĀRET (A.), “building”, “edifice”, the name given in Turkey to eating-houses or hostels where schoolchildren and theological students receive their meals, which consist of bread and one or two hot dishes of mutton and vegetables. Similarly, such food along with a small present in money of 3—5 aspers a day per person, sometimes even as much as 10 aspers, is given to the poor. These institutions are maintained by pious foundations. The first of the kind was erected by Sultān Orkhan in 1336 in Nicaea (İznik) and devoted to the good of mankind; at the opening he presided in person, distributed food to the poor and was the first to light the lamps and candles. Murād II did the same thing after a feast which he had given to the “ulama” of his court in the imāret. At the end of the xviii. century the imārets of Constanti- nople fed over 30,000 people every day. There is an imāret beside each of the great imperial mosques Aya Sofya (kitchen founded in 1155 = 1742 by Maḥmūd I), Bāya zd, Fāṭih, Selimiye, Sulaimānīye, Ḥmedīye, Nūr-i ʿOlāmīne, etc. In Persia, where the word is ‘māret, it means “palace”, e. g. ʿOlām-i imāret, the “Sun-Palace” at Teherān.

IMERETIA. [See Kaukasus.]

IMOSHA. [See Tavrég.]

‘IMRĀN, the Biblical ‘Amrām, was the son of
Yishar b. Kāthīh b. Lāwī, and married Yukhābid, who bore him Mūṣā in his seventeenth year. He lived 137 years (Ibn al-Ābir, i. 119, al-Thālābī, p. 99; al-Kisā'ī, p. 201, and Ṭabarî, i. 443). This account differs from the Biblical in so far as, according to Exodus, 6, 90, Amram was son of Kehat and brother of Yishar, and reached the age of 137. 'Imrān was appointed grand vizier of Egypt and had to keep watch every night by Fir'awn's bed (al-Kisā'ī, p. 201). One night he saw a bird in Fir'awn's apartment carrying his wife upon its wings. He was at once enslaved with love for her and had intercourse with her. The bird then took her back home, without the thousand watchers outside the royal palace noticing. Next morning the astrologers announced to the king that the conception of his future enemy had just taken place and also that his star was in the ascendant and brilliant. Fir'awn ordered the midwives of Egypt to seek out and register the pregnant women from house to house. They did not however dare to examine Fir'awn's wife, as they knew that 'Imrān did not leave Fir'awn's side. Mūṣā thus escaped certain death (al-Kisā'ī, ibid.). The Talmud likewise describes Amram as the most prominent man in Egypt (Sūrā 12; Bāba B. 120; Exodus R. 1. 13). The 'Immān mentioned in the Kur'ān (Sūrā iii. 31), whose wife dedicated the fruit of her womb to Allāh, is not identical with the Biblical Amram or 'Imrān. Thālābī (p. 220) expressly mentions this, with the note that there was an interval of 1800 years between the two bearers of this name. The Kur'ān also speaks of 'Imrān b. Māhān or b. Sāḥim, whose wife Ḥanna, daughter of Fākūth, was the mother of Maryam and the grandmother of Jesus. Our 'Immān b. Māhān would thus be identical with the Jakob b. Matan of Matthew xv. (cf. MIRKAM).

Legenden, p. 131; Eisenberg, Moses in der aram. Legende, Cracow, 1910, p. 16. (J. EISENBERG.)

'IMRĀN b. ḤĪṬĪN AL-SADĪṢI, an Arab poet born in Baṣra, a pious man learned in the Kur'ān and Tradition, who is numbered among the second class of the Baṣra Tābi‘ūn and transmitted traditions on the authority of Ḥaḍīth and of some Companions of the Prophet, but in his old age is said to have been won over by his wife to the Khāridjīs. As he was already too infirm to serve them with the sword, he is reckoned among the ḫāda‘a (see BRÜNNOW, Die Charidchiten, p. 29). He worked for the cause of his party as a preacher, particularly as a poet, for example he celebrated 'Abd al-Ra‘mān b. Mu‘ādjam, the murderer of 'Ali, in a poem. When al-Hādījādī became governor in the ṭūr and began to persecute the Khāridjīs, he had to flee to Syria and found a hospitable welcome with Rawḥ b. Zibīb. When his stay here became known to 'Abd al-Malik, he escaped to the Džāzira to Zufar b. al-Hārīth in Kirkişiyā. There he was also soon betrayed and now went to 'Omnā, where admirers of Abū Bīlāl Mīrād b. U‘ayyār received him. When al-Hādījādī again discovered his whereabouts, he found a final refuge in Rādī Ma‘āsīn not far from Kūfā, where he died.

'IMRĀN b. ShĀHIN played a great role in the swamps (Batritī, q. v.) of the Lower Euphrates at the beginning of the Būyid rule. A native of al-Dāнима, a village between Ṣūṣīt and Baṣra, he had to go into hiding on account of a crime he had committed and henceforth led the life of a robber, for which the neighbourhood offered excellent opportunities. He then entered into an alliance with Abu 'I-Kāsim al-Bārdī (see al-Bukhārī), who found in him to most suitable man to defend the swamps against his enemies. As his robberies however made the road to Baṣra unsafe, the Būyid Mu‘izz al-Dawla was more than once forced to send troops against him, but they could do nothing in view of the nature of the country and were usually enticed to some place from which it was impossible for them to return. From sheer necessity Mu‘izz al-Dawla appointed him governor of the district, which did not however prevent 'Imrān and his robbers from occasionally renewing their activity again. Repeated attempts by Mu‘izz al-Dawla and his successor Bākhīṯyār to put an end to this state of affairs by force met with no better success. Till his death in 369 = 979 'Imrān remained master of the swamps and transmitted his power to his son Ḥusain. 'Aṣūd al-Dawla had the same experiences with him as his predecessors with his father. Ḥusain however was slain in 372 = 982–3 by his brother Abu 'I-Faradj, and the latter met the same fate in the following year at the hands of the Ḥādījī b. Muṣaffār b. 'Abbās, who had been leader of the army during his father's rule and now appointed a minor son of Ḥusain named Abu I-Ma‘ālī as ruler, but soon afterwards put himself in his place by means of a forged appointment from the Būyid Ṣāḥūn al-Dawla. Once again, in 412 = 1022, a son of 'Immān, Abu 'I-Hādījī Muḥammad, attempted to gain power but met with no success.

Bibliography: Ibn al-Ābir, ed. TOMBARG, ix.

AL-IMRĀN, MU‘IN AL-DIN AL-HINDI, born in Dihīl, studied with the 'ulama' of his native land and became a renowned scholar. He spent a large part of his life in teaching students at Dihīl. At first Mu‘īn al-Dīn much disliked the saints of the Cihāt order and especially Naṣīr al-Dīn Muḥammad, known as Cirāg-i-Dīlī, "light of Dīlī" (d. 757 = 1356), who was his contemporary, but the latter's spiritual power and piety induced him to sit at his feet and at last to become his disciple. He was a great favourite of Muḥammad II b. Taghālāk (725-752 = 1324-1351) who sent him to Shīrāz to induce al-Kaṣī, 'Aṣūd al-Dīn al-Hātī (d. 756 = 1355) to come to Dihīl and adorn his court. Our author reported there instead of persuading the īṣī, he was himself persuaded to pass the remainder of his life there.

He is the author of the following works: 1. a commentary on 'Abd Allāh b. Aḥmad al-Naṣāfī's compendium of Muḥammadan law according to the Hanafi school Kanz al-Daḥāʾīb; 2. a commentary on Sīrāǧ al-Dīn Yūsuf b. Aḥī Bakr b. Muḥammad b. 'Abī al-Sakakā’s (d. 626 = 1229) Mīṣrāf al-
"Ulama; 3. a commentary on Muhammad b. Muhammad al-Akhšikati's (d. 644 = 1246) al-Muntakhab fi Iṣāl il-Din, on the principles of Muhammadan law according to the Hanafi school.

Bibliography: Abd al-Haqq al-Dihlawi, Aḥbar al-Abbār, p. 142; Aṣāid Bilgirmānī, Subḥat al-Mašrūfān, p. 34; Siddīq Ḥasan, Abjad al-ʿUlim, p. 892; Fakhr Muhammad, Ḥasan al-ʿAṣim, p. 304. (M. Ḥidayat Hosann, IMRūʾ al-
KAIS, an Arab poet of the vi
d century A.D., whose real name was Ḥundudj b. Ḥujjīr, belonged to the tribe of Kinā which had migrated from the Yamn. His ancestor, Ḥujjīr Aqīl al-Murūr, had founded (about 480) a principality in Najdī which declined under his successors. On account of his inclination to love affairs, particularly on account of a poem which he dedicated to his beloved Fāṭima bint al-Ubaid of the tribe of the Banū Ḫdir, IMRūʾ al-
KAIS was banished by his father Ḥujjīr. The latter is even said to have ordered his freedman Rabīʿa to murder his son but Rabīʿa instead slew a young anteelope (gawḍar) and brought its eyes to Ḥujjīr (Ibn Ḥaṣib, KIt. al-
Sha'ir, p. 48, lines 7–11). After Ḥujjīr had fallen in battle with the rebels of Banū Ḫdir, his son departs on
his kingdom began to lead a wandering life (whence his nickname al-malik al-dīlīlī, "the wandering king"). Pursued by his enemies, he fled to Samawāl, the ruler of Taimāt, who lived in the citadel of al-
Abkāt, and practised a Jewish Christian religion.

About 530 the Emperor Justinian summoned him to Constantinople with the intention of using his services against the Persians on the advice of the Ghasānīd al-
Hārith V "the Lame", the phil-
arch of the Syrian Limes. After a longish stay in the capital he was appointed governor of Pal-
estine and of the border tribes there, with the title of philarch, and on his way to take up his office he died at Angora (between 530 and 540; cf. Nöldeke, art. Mu'Allaḳaṭ in the Encycl. Brit.). According to Arab legend, he was poisoned by order of Justinian whom he had insulted by seduc-
ing his daughter, by means of a robe of honour which covered his body with sores (whence the name Dhu l-
Kurnāb, which tradition gives him), although there never was a princess corresponding to this description at the court of Justinian or of his successor Justin II.

He is said to have been the first to submit Arabic verse to fixed rules, and laid down definite laws for the rhythms. He also introduced that kind of ḩaštīda, in which the poem asks two friends to stop and weep, and thus gave new life to the ancient stock of Arabic poetry, which had so far been limited to the ṣağas. This is the form in which his verses have come down to us is not original, although Sir Charles Lyall has pointed out that the use of a rare form of the bāṣīf metre as well as the agreement between the methods followed by Imrūʾ al-
KAIS and Abd b. al-
Abrās guarantee the absolute genuineness of the poem. He was a freethinker: when he saw that fate prevented him from avenging the death of his father, he threw the three arrows with which divinations were made, at the head of the idol Dhu l-Khalasa in the town of Tabālta. His name means "the man of Kaif", although it is not certain, whether Kaif is a masculine pare-
dros of the goddess Manat, or the name of her sanctuary (Euting, Nabatātisch Inschriften aus Arabien, No. 2; Ph. Berger, Histoire de l'Écriture, p. 274 sq.; Corpus inscr. semit., ii. 198; Dussaud, Hist. des Arabes avant l'islam, p. 125; Wellhau-
sen, Rester arab. Heidentums, 2, p. 67).

One of his ḩaštīda's in preserved in the collection entitled Mu'alākātats (Lat. trans. by L. War-
er [ed. by Lette]; Engl. by Sir W. Jones, London 1782; Swedish by B. M. Bolme, Lund 1824; French by de Sacy in Mém. de l'Acad. des Inscri., Vol. i. 417; German by Nöldeke and by Gandz, see Bibliography). In the editions of the text of this collection the Mu'alākāts of Imrūʾ al-
KAIS is usually accompanied by the commentary of al-
Zawānī (first publ. by Hengstenberg, Bonn 1823; the commentary of al-
Nahšāhī has been published in extracts by Lette (Leiden 1748) and completely by E. Frenkell (Halle 1786), the commentary of al-
Tabrizī by Ch. Lyall in A Commentary on ten ancient Arabic Poems (Calkcuta 1894). The Diwān of Imrūʾ al-
KAIS was published by de Sane (Le Diwan d'Amrozkas, Paris 1837), by Ahward (The Di-
Wans of the Six Ancient Arabic Poets, London 1870, p. 115 sqq., cf. 196 sqq.), in Bombay 1913, and with the commentary of Aṣīm b. Aṣīt al-
Bātalī in Cairo 1823. A translation was given by Rücker (Amrilhās, der Dichter und König, Stuttgart and Tübingen, 1843).

INĀL, AL-MALIK AL-ĂSHERAF SAIF AL-DIN AL-
AL-'ĀLṬ (so called from his first owner) AL-
LUH (after Sultan al-Malik al-
Zahrīr, Barūqī, q. v.) AL-
ADRIJ (the beardless), Sulτān of Egypt and Syria, reigned from 857–865 = 1453–1460. Purchased as a slave by Sulṭān Barūqī he entered his Mamulik corps. His son Sulṭān al-
Nāṣir Farād [q. v.] set him free and enrolled him in the corps of the Djamār [q. v.]. Under Sulṭān al-
Munṣīyad Shāhiḳ he became kāṣīṣī (a member of the body guard) and on the latter's death, amir of 10 Mam-
luk. He rose to higher offices under Sulṭān Barūqī. He first of all became aldīlahān (officer accom-
panied by a band), then second ra's nāba (deputy
chief of the watch); in 831 he was appointed governor of Gharaz. Two years later he accompanied Sultan Barsbay in the campaign against Amid (Djak Bakr) which met with little success. When the Sultan wished to place this frontier area under reliable administration, he appointed Inal governor of the almost entirely destroyed town of al-Ruhā (Edessa). Inal as well as others after him declined to accept this office, but finally the Sultan induced him to do so by granting him the fief of an amir of a 1000 (ta’kdim, q. v.) together with the salary of a governor. After two years he was summoned to Cairo, amir of a 1000 (without office, at the disposal of the Sultan) and in 840 sent as governor to Sa’d. When Sultan Casmak ascended the throne, he summoned him to Cairo in 843 and appointed him amir of a 1000 without office and in 846 Great Dawūdar. In 848 he became Atabek (commander of the army) and as such was chosen Sultan in place of Casmak’s son Ədb-ham, who was unable to hold his position after his fathers death, in a rising of the Mamluks. Although he was now 73, he was able to maintain himself on the throne by meeting the wishes of the Mamluks as far as possible and often proving a too indulgent master for them. Sultan Inal’s reign was on the whole beneficial. Although he could not curb the arrogance of the Mamluks, he succeeded in healing another wound in his kingdom. Amid great difficulties he carried through a reform of the currency. The debased silver money which his predecessors had struck was gradually withdrawn from circulation and new and improved coins issued. In foreign politics also he was fortunate. He was on the best terms with the Prince of the White Sheep, with the prince of Albitan (q. v. in southern Asia Minor), and particularly with the great conqueror of Constantinople, the Ottoman Sultan Mahmand, to whom he sent a special embassy to offer congratulations on the conquest of Constantinople. Wherever necessary he was not afraid to fight. He drove out the prince of Karaman who had taken several fortified places in Cilicia from him and forced him to make peace. He was involved in European politics by the relations which had connected Cyprus with Egypt since the reign of Barsbay. In order to deprive the corsairs who ravaged Syrian ports of a base, Barsbay had taken Cyprus in 830 and forced King Janus to recognise his suzerainty and reinstated him on the payment of a tribute. A small Egyptian garrison remained on the island. When one of his successors, John II, died in 862 = 1456, his daughter Charlotte was made queen. His natural son, James, Archbishop of Nicocia, who feared for his safety, fled to Egypt and set up there as a pretender. Both parties endeavoured to gain Inal’s recognition and after wavering a long time (the ambassador of the Grand Master of the Knights of St. John of Rhodes intervening) he decided in favour of Charlotte. But the Mamluks inclined to James and forced the Sultan to send him to Cyprus with a fleet. With its help James occupied the capital Nicocia without opposition. But when the siege of Cyprus dragged on, the Egyptian fleet returned to Egypt; its Admiral apparently having been bribed by the queen, and only left a small garrison in Cyprus with whose help James held out but was unable to deprive Charlotte of her territory (for further developments see KHORESHADAM). Inal was a mild and kindly ruler, and as far as lay in his power, his subjects were ruled justly and lightly. He died in 865 = 1460. His son Ahmad, whom he had acknowledged on his death-bed, was a far-seeing ruler who aimed at the good of the community, but he was not able to control the indiscriminate Mamluks, so that he was only able to hold the throne for four months.

INAT, a town in Ḥāḍramūt, south east of Tarim, on the wadi of the same name. The family of Shaikh Abū Bakr, the only Sa’iyid family in Ḥāḍramūt to bear arms, lives here. It has two munīs (of whom one is chief of the Banu Thanna [see ḤADRAMAWT]. In the eighties of last century there lived in ‘Inat the greatest saint of Ḥāḍramūt, Sa’iyyi Muḥsin b. Sālim, of the family of Shaikh Abū Bakr, to whom people made pilgrimages from the whole country and from more distant lands, such as the Indian Archipelago, on account of the miracles performed by him. ‘Inat is the most important Ḥawta (q. v.) in South Arabia. According to a statement in an Arabic newspaper (al-Davūsīb of Raḥīm al-awal 1299 = Feb. 8 1882), the town had 5000 inhabitants, according to van den Berg, however, only 1000. In the thirteenth century Inan, Anan, Anad in Ritter and, more recently, A’inat in Hirsch for ‘Inat are due to a false transcription.

Schlieffer.

INAYAT ALLAH KANBU, author of the Baba-i Dānīsh (q. v.) and of a universal history up to the reign of Shahjahan, entitled Turiḥā Dīlawī; he held office in Lahor under the Mughal government, but in later life retired from the world and devoted himself to prayer and the study of theology; he died in 1080 (1669), or, according to others, in 1082, at the age of 65, and his brother, Muḥammad Ṣāliḥ (q. v.), who died five years after him, was buried by his side. During his life-time, he had erected an imposing octagonal building, with a dome supported by four lofty arches, for his place of burial; the tombs of the two brothers were of red sand-stone, but were destroyed by the Sikhs, who turned the building into a powder magazine; after the conquest of the Pandjak by the English, it was used first as a private residence, but is now a church.

INDIA (British). i. Ethnology. According to the census of 1911 the total population of British India was 315,156,396, of which 66,647,299 persons were returned as Musalmans. To this total the province of Bengal contributed nearly
24 million, the Pándjab nearly 11 million, the United Provinces over 6½ million, the Province of Bombay 4 million (more than 2½ million of whom were in Sínd), Madras 2½ million (953,381 of whom were found in the single district of Málabar), Káshmír nearly 2½ million, and the North-West Frontier Province over 2 million. The Muslim population is unequally distributed among the adherents of other religions in various parts of the country; the largest proportion is found in the North-West Frontier Province where there are 2,039,994 Musulmáns, or 93 per cent, out of a total population of 2,196,923; in the opposite corner of India, in Bengál, 23,980,719, or 53 per cent, are Musulmáns out of a total of 45,483,078, the proportion ranging from 13 per cent in West, to 59 per cent in North, and 68 per cent in East, Bengál; in Káshmír there are 2,398,320 Musulmáns out of a population of 3,158,126, i.e., about 76 per cent of the inhabitants of this state; in the Pándjab they form more than half the total population. In the United Provinces, one of the chief historic centres of the Mughal empire, there are only 6,658,737 Musulmáns out of a total population of 47,181,044, i.e., about 14 per cent, and in other provinces the proportion is still lower; e.g., in the Mysore state, in spite of the proselytising zeal of Hídáir ʿAlí [q.v.] and Típú Suláán [q.v.], there are only 314,494 Musulmáns, or 5 per cent, out of a population of 5,806,193. In the Haidárábád state, embracing territory that has been under Muhammadan rule since the 14th century, there are only 1,380,990 Musulmáns, or 10 per cent, out of a total of 13,374,676, chiefly Hindus; while, on the other hand, it is noticeable that the Muhammadans are relatively more numerous in North Bihár, which has been from ancient times the home of Hinduism and Brahman domination, than in South Bihár, where there are old Muhammadan centres such as Patná and Monghyr. The proportion sinks so low as 2.7 per cent in Oরíssá, though this province was under the rule of Afghán for several centuries.

Within this Muhammadan population of over 66 million there is a great ethnological diversity. One broad distinction may be drawn between the descendants of foreign Muslim immigrants on the one hand and of the indigenous converts on the other. Among the latter, the physical types that are most numerously represented are (1) the Indo-Aryan type, occupying the Pándjab, Rádpútána and Káshmír, to which belong the Rádpút and Dágí Musulmáns, (2) the Arýo-Dravidian type, found in the United Provinces and Bihár, and the Mongolo-Dravidian type, represented by the majority of the Muhammadans of Eastern Bengál. (See Census of India, 1901, Vol. I, Ethnographic Appendices, p. 50 sqq.).

Though by far the larger proportion of the indigenous Muhammadan population owes its origin to the lower Hindu castes or to outcasts, still there are few of the higher castes that have not at one time or another contributed converts to Islam. Brahmanes were forcibly converted amid the savageries of conquest, or in periods of intolerance under some settled Muhammadan government; other Brahmanes embraced Islam through the persuasion of Muslim missionaries, or to gain some social or financial advantage.

From the warrior castes Islam has received large accessions from the earliest days of its entrance into India. Rádpút Musulmáns are found in large numbers in the Pándjab and to a less extent in the United Provinces and Rádpútána; in some cases tradition ascribes the conversion of their ancestors to the influence of Muslim saints, e.g., the Rádpúts of the city of Rádpút prétend that their ancestor was converted by a saint named Ābbá ʿAli Kálandar who died there in 1324 A.D.; in other cases, the change of faith was determined by political or social motives, e.g., in northern India there are several Rádpút families, the ancestor of one branch of which is said to have become a Muhammadan, in order to save the family property from confiscation.

From the lower castes among the Hindus there has been a constant stream of accessions during the whole Muhammadan period (for details, see the publications of the Ethnographic Survey of India), as well as from the aborigines of the country who stood outside the pale of Hinduism. Definite historical evidences of these conversions form a most part wanting. In the case of the various Mongoloid or Mongolo-Dravidian tribes of Eastern Bengál, there was probably a mass-movement towards Islam on their part; adherence to the new faith raised them out of the despised condition to which the higher Hindu castes consigned them.

The Musulmáns of foreign origin are numerically fewer than the descendants of native converts, but their influence in the history of Muhammadan civilisation in India has been vastly more important; the various conquerors, Arabs, Turks, Patháns and Mugháls, brought into the country large bodies of foreign troops, whose services they rewarded by grants of land; when their power was established, their courts attracted into India military adventurers, poets, scholars and theologians, most of whom remained and settled in the country; this movement of immigration went on during the whole period of Muhammadan ascendancy and has not even ceased under British rule. One example may be taken from the 13th century, when the devastations of the Mongols had spread terror through the Muslim kingdoms of Central and Western Asia; refugees made their way into India from ʿIrāq, Khúrásán, Dálam, Turkístán, etc., and in the reign of Sultáán Balbán [q.v.] as many as 15 wards of the city of Dihlí are said to have taken their names from such refugees.

Of these foreign immigrants, the first to enter India were the Arabs who invaded Sínd under Muhammád b. Káshír in 712; the trade in spices, gems, etc., early attracted Arab merchants to the west coast of Southern India, and the Mápillas [q.v.] are descended from the Hindu women they married. Thus from the earliest period of the Muhammadan occupation to modern times there has been an immigration of Arabs into India; their numbers have been small, but their influence has been profound and wide-spread. There was a Sajjíd dynasty in Dihlí from 1413 to 1451, and one in Bengál from 1493 to 1537; a dynasty of Arab origin ruled over the kingdom of Khándésh from the 14th to the 16th century; in the second deca-de of the 18th century two Sajjíds of Bárhá for 7 years enjoyed the position of king-makers and set whomsoever they chose on the throne of Dihlí. As administrators, generals, poets, letter-writers, teachers and saints, the Sajjíds in India have played an important part in the history of Mu-
of the Mughal fleet, and a dynasty of Ḥabashi kings ruled over Bengal from 1486 to 1490; the chiefs of Ḍiaṇḍūra [q. v.] and Sačīn [q. v.] are also of Ḥabashi origin.

The largest group of foreign stock is that of the Afghāns or Paṭhāns, who are found in greatest number in the north-west, but also as far east as Bengal and as far south as the Dakhan. The terms Afghān and Paṭhān are used indifferently by the natives of India to designate this large group of the Mughal Muslim population, but it is a matter of dispute as to whether the original Afghān and Paṭhān stocks were the same, or whether a purely Indian origin must not be assigned to the Paṭhāns [cf. ĀFGANISTĀN, i. 149b]. There has been a constant stream of immigration from Afghanistān into India, from the end of the 12th century up to modern times. Most of the Mughal emperors or conquerors of India have entered the country through Afghanistān and have brought in their armies large numbers of Afghān soldiers, who received grants of land as military fiefs and settled in the country. Of the Afghān tribes found in India, the most widely distributed are the Yāzduṭs, of whom a body of 1200 accompanied Bābur in his final invasion of India, and settled in the plains of Hindustān and the Pāndjāb. Migrations on a large scale into the fertile plains of India have also taken place at various times, e. g. during the period of the Lōḍī (1451—1526) and Sūr (1540—1555) Sulṭāns of Dīhlī, the Prāṅgā and Sūr tribes from which these dynasties sprang, and their neighbours, the Nīyās, appear to have migrated almost bodily from Afghanistān into India. The great bulk of the Balāţc has similarly migrated across the border into India; there are about ten times as many of them in the whole of Balōcistān [q. v., i. 636 sq.].

2. POLITICAL HISTORY: A. Under Mughal Rule.

The introduction of ʿIṣlām into India dates from the invasion of Sind [q. v.] in 712 by Muhammad b. al-Ḵāṣm [q. v.]. This led to a permanent occupation of the valley of the Indus as far north as Multān, but the rest of India was unaffected, and it was not until the close of the 10th century that a fresh invasion began with the raids of Maḥmūd of Ghaznī [q. v.], which extended as far east as Kālindjār in Eastern Bundelkhand and as far south as Sūmāth; but the province of Lāḥār was the only part of the country permanently occupied by his troops. The conquest of the rest of India dates from the campaigns of Muhammad Ghūrī [cf. Ghūrī, p. 162-3] and his generals (1175—1203); on his return to Ghaznī he committed the charge of the military operations to Kūṯb al-Dīn Aĭb [q. v.], who became the first of the Sulţāns of Dīhlī; the conquests of his general, Muhammad b. Bakhtīyār [q. v.], extended his authority over the greater part of Bengal. When Muhammad Ghūrī died in 1206, the greater part of India north of the Vindhyā had been subjugated by his Turki officers, some of whom now became practically independent sovereigns. But the Sulţāns of Dīhlī claimed a suzerainty, which they were sometimes able to enforce, over the other Muslim states. Thirty-four sovereigns reigned in Dīhlī from 1206 to 1526; they fell into five dynasties, 1. the Slave kings, 1206—1290; 2. the Khāliṣīs, 1290—1320; 3. the Taghīās, 1320—1413; 4. the Suyīdīs, 1414—
1451, and the Lōdis, 1451—1526. During this period the Muhammadan conquests were extended further to the east and the south, in spite of frequent internal conflicts and revolutions, and the disasters caused by the invasions of Mongol hordes, at intervals from 1223 to 1305, and by the invasion of Timūr [q. v.] in 1398-1399. Outlying provinces took advantage of the weakness of the suzerain power, and a number of independent kingdoms arose which were ultimately absorbed in the Mughal empire; for an account of these see the separate articles BENGAL, DJAWANTURA, GUJĀRĀT, MĀLWA, KHANDSH, BĀHMANI DYNASTY (the five dynasties that arose on the ruins of the Bāhmanī kingdom), BARĪD SHĀH, ADIL SHĀH, NIZĀM SHĀH, KUTB SHĀH, AND IMĀD SHĀH). The invasion of Bābur [v. BABER] and his defeat of Ibrāhīm Lōdī in the battle of Panipat [q. v.] in 1526 laid the foundations of the Mughal empire, but his son, Humāyūn [q. v.], was driven from his throne for 15 years, and the Afghān Shēr Shāh [q. v.] established the Sūr dynasty, which ruled in Dīhilī from 1540 to 1555. Humāyūn regained his kingdom in 1555 but died the following year. His successor, Akbar [q. v.], was engaged in warfare during the greater part of his long reign (1556-1605) and was succeeded by his son, Jahāngīr. The most important of the Muhammadan kingdoms of Gudārāt, Bengal, Kashmir, and part of the Dīhilī [q. v.], and after breaking down the opposition of the Rājputs reconciled them to his rule by the wise policy he followed of conciliating his Hindu subjects. His son, Dja- hāngīr [q. v.] (1605—1627), and his grandson, Shāḥdājahān [q. v.] (1627—1658), kept intact the Indian dominions of Akbar, and Awrangzēb [q. v.] (1658—1707) brought the Mughal empire to its greatest extent by the conquest of the last of the independent kingdoms of the Dīhilī, Būispur [q. v.] and subjected the whole of India as far south as Tānjore to his rule; but his intolerant policy towards the Hindus alienated the Rājputs, and the last twenty years of his life were spent in a vain attempt to crush the rising power of the Mārāthās. Under his successors, the Mughal empire rapidly declined; the Mārāthās encroached upon one district after another, and during the reign of Muhammad Shāh (1710—1748) a general revolt of the provinces began, which resulted in the independence of the Dīhilī from 1723 under the Nizām of Haidarābād [q. v.], of Awadh (Oudh) under Šāfādāt Khān [q. v.] about the same period, of Bengal under Alāwārdi Khān [q. v.] in 1740, and of Kohilkhand under the Kohillass [q. v.] Further, the invasion of Nādir Shāh [q. v.] struck a blow to the centre of the empire, from which it never recovered; his successor was the throne of Persia, Ahmad Shāh Durrānī [q. v.], invaded the Pandjāb and occupied Dīhilī in 1756—1757, and though he joined with other Muhammadan forces to overthrow the Mārāthās in the third battle of Panipat [q. v.] in 1761, the ruin of the Mughal empire was complete. Shāh ʿAlam [q. v.] (1759—1806), in an endeavour to assert his authority in Bengal came in conflict with the English (1760—1761), and having fallen under the power of Shujāʿ al-Dawla, Nawwāb Ważir of Oudh [q. v.], shared his defeat in the battle of Bāskār (1764). In the following year he granted to the East India Company the Diwānī or financial administration of Bengal, Bāhilār and Orissa in consideration of an annual subsidy of 2,600,000 rupees, and under the protection of the British kept his court in Allāhābād until 1774, when he was persuaded to return to Dīhilī; after a brief period of prosperity he was blinded by one of his officers in 1788 and became a puppet in the hands of the Mārāthās, until General Lake's victory over them in 1803 set him free and left him with a nominal sovereignty over the city of Dīhilī and the surrounding district, and a monthly pension of 90,000 rupees. (For an account of the short-lived Muhammadan kingdom of Maśūr, 1761—1799, which was brought to an end by the capture of Seringapatam and the death of Tipāl Sultān [q. v.], and of the kingdom of Oudh, which was annexed by the British in 1856, see these articles.) Shāh ʿAlam's son, Muhammad Akbar (1806—1837), and his grandson, Bahādur Shāh (1837—1857), retained the empty titles of their ancestors, as pensioners of the East India Company; but Bahādur Shāh's complicity in the Sepoy Mutiny of 1857 led to his banishment to Rangōon, where he died in 1862.

None of the self-governing Native States under Muhammadan rulers joined in the attempt to drive the English out of India, while the more important of these States, e.g., Haidarābād, Būispur and Rāmpūr, rendered substantial and valuable assistance, without which the condition of the English would have been still more precarious than it was. After the government was assumed by the Crown in 1858, the territories of these States were enlarged by grants of land, and other rewards for their loyalty were given to them.

Bibliography: It is not possible to give here a detailed list of the numerous works on the history of the Muhammadans in India; a bibliography of the original sources may be found in H. M. Elliot, The History of India as told by its own historians. The Muhammadan Period. Edited and continued by J. Donson. (London, 1867—1877); H. M. Elliot, Bibliographical Index to the Historians of Muhammadan India (Calcutta, 1849); H. E. Mitre, Catalogue of Persian Manuscripts in the Library of the India Office (Oxford, 1903); C. Rice, Catalogue of the Persian Manuscripts in the British Museum (London, 1879—1895). The works of several of these historians have been published in the Bibliotheca Indica. A full bibliography is given in vol. iv. of N. Manucci, Storia di Mogor, or Mogul India, 1653—1708, translated by William Irvine (London, 1907—1908). For the bibliography of the works of Europeans who visited India during the Muhammadan period, see E. F. Osten, European Travellers in India during the 15th, 16th and 17th centuries (London, 1909). For separate dynasties and individuals, see the bibliography under the articles concerned. Among general histories, reference may be made to E. Thomas, Chronicles of the Pathān Kings of Delhi (London, 1871); A. Müller, Der Islam im Morgen- und Abendland (Berlin, 1885—1887); Muhammad Dhaka Allah, Tūrīkh-i Hindustān (Dīhilī, 1897—1898); M. Elphinstone, History of India, 9th ed. (London, 1905); H. G. Keene, History of India (Edinburgh, 1906); S. Lane- Poole, Muhammadan Rule in India under Muhammadan Rule (London, 1903); S. J. Owen, The Fall of the Mogul Empire (London, 1913). Two volumes of the forthcoming Cambridge History of India will be devoted to

The Encyclopaedia of Islam, II.
the history of the Muhammadans. A bibliog-
raphy of works on Namismatics is given in O.
Codrington, Manual of Musliman Namismatics.
(London, 1904) and in Imperial Gazetteer of In-
dia, vol. ii. (Chap. iv.).

Under the British Crown.

(i.) Native States. Nearly two-fifths of the
total area of British India is administered by native
chiefs. Of these Native States (693 in number) a
certain number are governed by Muhammadans,
under the suzerainty and protection of the British
Crown; their rulers and their subjects are free
from the control of the laws of British India; the
rights of the chiefs as rulers within their own
territories are guaranteed by the suzerain power,
but they are not permitted to enter into political
relations with foreign nations or other States. As
a separate article is devoted to each of these
States, all that is needed here is to give an enu-
meration of them, with bare details as to the an-
nual revenue and the population in 1911. The
largest of these Muhammadan States is Haidarabâd,
area 82,698 sq.m., pop. 13,374,676, of whom about
one-tenth are Musulmân; the annual revenue is
about £1,760,000; this is the only Muhammadan
State that is in direct political relations with the
Government of India; the others communicate
either with an Agent to the Governor-General or
with one of the Provincial Governments. In the
Baloutan Agency, Kalât (area 73,278 sq.m.) has
a population of 359,086, of whom all but 13,180
are Musulmân, rev. about £51,000, and Las-
Bela (area 7,132 sq.m.), a population of 61,205,
of whom all but 1819 are Musulmân, rev. about
£15,000. In the Bombay Presidency, Khairpûr
(6,950 sq.m.), pop. 223,788, of whom 182,827 are
Musulmân, rev. about £168,000; Djinagar (3,284
sq.m.), pop. 434,222, of whom 88,130 are
Musulmân, rev. about £175,000; Palanpur (1,766
sq.m.), pop. 226,250, of whom 25,158 are Musul-
mân, rev. about £48,700; Cambay (350 sq.m.),
pop. 72,656, of whom 9,715 are Musulmân, rev.
about £37,000; Dijnjira (324 sq.m.), pop. 88,747,
of whom 14,769 are Musulmân, rev. about £40,000;
Râddhanpur (1,150 sq.m.), pop. 65,567, of whom
8,320 are Musulmân, rev. about £26,000; Bal-
sinor (189 sq.m.), pop. 40,563, of whom 4,578 are
Musulmân, rev. about £8,333; Saôin (42 sq.m.),
pop. 18,903, of whom 2,278 are Musulmân, rev.
about £20,000; Savanur (70 sq.m.), pop. 17,909, of
whom 5,448 are Musulmân, rev. £6,666; three small
States pay tribute to the Maharâjâd Gaikwar of Baroda.
- Dabha (12 sq.m., rev. £266), Panadra (11 sq.m.,
rev. £1,000), and Ramas (6 sq.m., rev.
£200); these three chiefs are descended from a Râdd-
pûr, named Harinsinhdi who was in the service of
Mahmîd Bègâra, Sultan of Gujdarât, and became a
Musulmân in 1483. In the Central India Agency,
Bhopal (6,902 sq.m.), pop. 730,383, of whom only
81,996 are Musulmân, rev. about £200,000;
Djora (568 sq.m.), pop. 75,951, of whom 13,686
are Musulmân, rev. £60,000; Bani (122 sq.m.,
pop. 20,121, of whom 2,349 are Musulmân, rev.
£6,666: among the 153 minor states connected
with this Agency there are a few whose rulers
are Muhammadans, e. g. Korwai (111 sq.m.), pop.
18,456, of whom 2,309 are Musulmân, rev. about
£2,500; Basoda (40 sq.m.), which is nominally
subordinate to the Maharâjâd of Gwalior, but pays
him no tribute, pop. 4,650, of whom 737 are
Musulmân, rev. £1,266; Muhammadgâr (29 sq.m.,
pop. 2,863, of whom 422 are Musulmân, rev.
£266; Pathari (22 sq.m.), pop. 3,866, of whom
390 are Musulmân, rev. £600, and a few still
smaller ones. In the Madras Presidency, Bangana-
palle (255 sq.m.) is the only Native State with a
Muhammadan ruler, pop. 39,355, of whom only
8,054 are Musulmân, rev. £6,400. In the Pandjab,
Bahâwalpûr (15,918 sq.m.), pop. 780,641, of whom
654,447 are Musulmân, rev. £182,000; Mâier-
kot (167 sq.m.), pop. 71,448, of whom 53,942
are Musulmân, rev. £24,000; Lohâru (222 sq.m.,
pop. 18,597), of whom 2,401 are Musulmân, rev.
£4,400; Patawdi (52 sq.m.), pop. 19,543, of whom
3,338 are Musulmân, rev. £5,100. In the Râjdûtan
Agency, Tûnk (2,600 sq.m.), pop. 303,181, of whom
40,432 are Musulmân, rev. £8,900, is the only State with a Muhammadan
ruler. In the United Provinces, the only Muham-
madan State is Râmpûr (892 sq.m.), pop. 531,217,
of whom 244,604 are Musulmân, rev. about
£240,000.

(ii.) British India. After the suppression of the Sepoy Mutiny, the Musulmân (especially in Northern India) found themselves exposed to grave suspicions on the part of the British government. Though large numbers of Hindus had taken part in this insurrection, the ostensible aim of it had been the restoration of the Mughal Empire and had consequently enlisted the sympathies of many Muhammadans. The estates of those who were convicted of complicity with mutineers were confiscated, and thus a number of families of the old Muhammadan aristocracy were ruined. The members of these aristocratic families for the most part held aloof from the service of the British government and sullenly watched the Hindus crowd into those numerous administrative and judicial posts which the Muhammadan aristocracy were by tradition and training peculiarly fitted to fill. Saidit Ahmad Khan [q. v.], himself of the Dihi family, whose maternal grandfather had been wazir to the Mughal emperor, Akbar Shah II, laid upon himself the task of reconciling his co-religionists to British rule. He first combatted the opinion held by some British officials that the Muhammadans had taken a predominant part in the Mutiny, in his treatise, "Kisâlah-î-khaire-kiwâlî Musul-
mânân (An Account of the loyal Mahomedans of
India)" (Urdû and English, Meerut, 1860), in which he enumerated the various instances of distinguished devotion to the English on the part of Muhammadan soldiers, officials, and others. At the same time he sought to reconcile his co-religionists to the rule of a Christian power, by refuting the intolerant opinions of those fanaticos who condemned all social intercourse and friendship with non-Muslims; in this connection he published a pamphlet entitled Akhâm-i-fâsîm-i-
akh-i-kiwâlî (Bânâras, 1868), the purpose of which
was to prove by means of quotations from the
Kurânh, the Hadîth, and the works of theologians
and jurists, that it was lawful for Muhammadans to
eat with Christians and to mix in familiar
social intercourse with them. Muhammadan opinion
at this period was much exercised as to the
question whether India under British rule was
to be regarded as Dâr al-ârâr or as Dâr al-Isâlm
and whether a jihâd against the Christian rulers
was obligatory on the Musulmân. A considerable
literature was published on this subject and even the 'Ulama' of Mecca were asked to deliver a Fatwa. (v. W. W. Hunter, *The Indian Muslims* (London, 1871); Syed Ahmed Khan, *Review on Dr. Hunter's Indian Muslims* (Benares, 1872)). The opinion began to prevail that inasmuch as the British Government left the Muhammadans free to practise the observances of the faith and made no attempt to restrict their religious freedom, they might live under its rule as loyal subjects. But their power and wealth had been steadily declining under British rule, largely through their failure to adjust themselves to the changed conditions of administration. Up to the early part of the nineteenth century they had enjoyed the greater part of state patronage, as collectors of revenue, military and police officers, and judges, but as the old order changed, these posts came to be filled by English and Hindu officials; when in 1837 Persian ceased to be the official language, and English or the provincial vernaculars took its place, a considerable number of subordinate offices passed out of the hands of the Muhammadans, and the abolition of the posts of Kadi and Kadi al-Kifaiya closed to a large number of learned men what had previously been an honourable means of livelihood. (Act xii. of 1856 gave power to the Provincial Governments to appoint a Kadi in any particular locality if the Muhammadans of the place so desired). Though the more far-sighted members of the community recognised that the altered conditions of the country called for a change in the methods of Muhammadan education and urged their co-religionists to study western sciences and learn English, their efforts for some time remained fruitless and met with much opposition.

In 1877 Saiyid Amir 'Ali founded in Calcutta the National Muhammadan Association, which was afterwards, when branches had been started in other cities of India, styled the Central National Muhammadan Association; in 1882 this Association endeavoured to establish a national conference of Muhammadans, but the project fell through on account of the strong opposition of Saiyid Ahmad Khan. In 1885 the first meeting of the Indian National Congress was held in Bombay; this is a deliberative assembly, composed of delegates from all parts of India, which meets once a year to discuss questions of politics and administration. While the third meeting was being held in Madras, Saiyid Ahmad Khan delivered in Lucknow on the 28th December, 1887, the first of a series of political lectures with the object of inducing the Muhammadans to hold aloof from the National Congress and similar political movements. He also endeavoured to organise the Muhammadan opposition by the formation of a society entitled "The United Indian Patriotic Association", to which more than fifty Andjumans in various parts of the country became affiliated; but its activity was short-lived, mainly through lack of funds to continue its propaganda. (Pamphlets issued by the United Indian Patriotic Association, No. 2. *Showing the Seditions Character of the Indian National Congress and the opinions held by eminent natives of India who are opposed to the movement* (Allahabad, 1885)). But though its efforts were successful in persuading the main body of its co-religionists to refuse their support to the National Congress, each yearly gathering continued to be attended by a small number of Muhammadans, especially from the cities of Bombay, Calcutta and Lucknow, and on two occasions the deliberations of the Congress were presided over by a Muhammadan, — the third (Madras, 1887) by the Hon. Mr. Badruddin Tajfylldji, (afterwards Judge of the High Court), belonging to a cultivated family of Bohar in Bombay, and the twelfth (Calcutta, 1896) by Rahmat Allah Muhammad Sayarafi; the latter in his presidential address enumerated and discussed the objections of the Muhammadans to joining the Indian National Congress; they were mainly that the success of the aims of the Congress would imply that a preponderating share in the administration of the country would pass into the hands of Hindus and that the Muhammadans would be reduced to an inferior position; that the movement was disloyal to the British Government; that western methods of government, and especially of selecting officers for administrative appointments on the basis of educational qualifications, etc., were not suited to India and would be detrimental to the Muhammadans, as owing to their backwardness in education they could not readily adapt themselves to such methods. (Report of the Twelfth Indian National Congress, p. 16 seqq. (Calcutta, 1897); Sir Saiyid Ahmad Khan: *The Presid., State of Indian Polity* (Allahabad, 1888)). The main body of the Muhammadans continued to hold aloof from the Indian National Congress, and from 1886 held on the same dates a separate gathering of their own, entitled the Muhammadan Educational Conference (v. § 3). But after the powerful personality of Sir Saiyid Ahmad Khan was withdrawn, some of the younger generation came to the conclusion that Muhammadan interests suffered in consequence of their abstention from political life and they founded an organisation entitled the All-India Muslim League, the first meeting of which was held at Dacca in December 1906. In October of the same year a deputation of influential Muhammadans had presented a memorial to the then Viceroy, Lord Minto, and urged that special consideration should be given to the Muhammadans in the proposed enlargement of the Legislative Councils and in the bestowal of posts in the higher branches of the Public Services. This deputation gave the impulse to the formation of the All-India Muslim League, which rapidly extended its organisation by the establishment of Provincial Leagues affiliated to the central body, and holds a general meeting every year in some city with a large Muhammadan population.

In 1907 Nuwab Imam al-Mulk Saiyid Husain Bilgrami (formerly Director of Public Instruction in the Haidarabad State) was made a member of the Council of the Secretary of State for India, and was the first Indian to become a member of that body. In 1909 Saiyid Amir 'Ali (formerly a judge of the High Court, Calcutta) was appointed by the King a Privy Councillor, and as a member of the Judicial Committee of the Privy Council sits in the final court of appeal for Indian cases. In 1910 Saiyid Ali Imam was made Legal Member of the Council of the Governor-General of India, being the second Indian to hold such high office. These appointments were made in pursuance of a policy of associating Indians more closely with the direction of affairs of state, a policy which led to the passing of the Indian Councils Act in 1909. This Act and the regula-
tions and rules under it increased the size of the legislative councils, and arranged for the inclusion of elected members instead of all the members being nominated as before, and gave to these councils greater liberty of discussion and initiation than they had before enjoyed. While in the Governor-General's legislative councils an official majority is maintained, in all the other (i.e. the provincial) legislative councils, there must be a non-official majority. The Muhammadans claimed to be represented as a separate community, and special regulations were framed for securing the election of Muhammadan members, in accordance with the relative importance and numerical strength of the Muhammadans in different provinces. Much dissatisfaction however was expressed in regard to the regulations for the Muhammadan electors, and the Muhammadans felt that due consideration had not been paid to their claim. The declining fortunes of such independent Muhammadan States as Morocco, Persia and Turkey excited much sympathy in India, and this excitement of feeling was intensified by the successive disasters of the Turks in their wars with Italy and the Balkan States. It was believed that the Christian powers of Europe had banded themselves together to destroy Islam, and the British Government was blamed for not intervening to save Turkey from its enemies. This bitterness of feeling was intensified by the refusal of the Government of India in 1910 to confirm the charter of affiliation to the proposed Muslim University in Aligarh (q. v.), and by the re-adjustment of the boundaries of the province of Bengal, whereby the large Muhammadan population of Eastern Bengal became again a minority in respect to the Hindus of Bengal, and lost that opportunity of self-development which had been opened to them in 1905 by the formation of the separate province of Eastern Bengal and Assam. The most recent tendency in the political life of the Indian Muhammadans is the abandonment by some of the younger generation of the separatist policy of the older school, and co-operation with the Hindus in political activities; and a Muhammadan, Nawab Sayid Muhammad, was elected as President of the National Congress in 1913. The outbreak of war between Great Britain and Turkey in 1914 evoked a fervid expression of loyalty towards the British Government, in which the Musulmān princes, the Andjumans and other organised bodies, and the leaders of Muhammadan public opinion, all joined.

Bibliography: Materials for the history of this period are chiefly to be found in periodical literature, but many general works on India make special reference to the Muhammadans, e.g. Alīf Husain Hāli, Hāyāt-i Dīghād (Kānpū, 1901); W. G. Hunter, The Indian Musalmans (London, 1871); Ameer Ali, A Cbrief from the Indian Mahomedans in The Nineteenth Century, xii. 193 sqq. (London, 1882); Sir Richard Temple, India in 1880 (London, 1881); Sir Alfred C. Lyall, Asiatic Studies, First Series, chap. ix. (London, 1907); W. S. Blunt, India under Rīpōn (London, 1909); Sir John Strachey, India, chap. xvii., xxii. (3rd ed. London, 1903); E. Pirou, L'Inde contemporaine et le mouvement national, chap. v. (Paris, 1905); Valentine Chirol, Indian Unrest, chap. ix. (London, 1910); Sir Banifylde Fuller, Studies of Indian Life and Sentiment, chap. vii. (London, 1910); J. Chall-

3. Social organisation.

The official method adopted under Muhammadan rule for establishing a scale of social precedence was the granting of a mansāb (rank, post), which varied according to the number of men the manṣabādī was supposed to be placed in command of. Though primarily used of the military service, mansāb was not a term confined to this reference; all persons in the employment of the government above the position of a common soldier or messenger, whatever the nature of his duties, civil or military, obtained a mansāb. Some of the manṣabādās were paid in cash, but the commonest method of payment was by the assignment of the land revenue of a certain number of villages or a tract of country. In the case of persons, who were not in the active service of the state, a subsistence allowance was made either in the form of a cash payment (waspāl) or a grant of land (mulk or madad-i maʻāṣ); such grants were made to students, men distinguished for learning or piety, etc. By theory these appointments and grants were personal or for life only (for Ḍinā Il-Din Khālid's arbitrary resumption of all such grants, see Barani, Ta'rīḫ-i Firāz-Shāhī, p. 283), but there was a tendency for them to become hereditary, and thus the original scheme of a graded scale of payment and official rank, dependent entirely on the good-will of the sovereign, broke down, partly on account of the unworkable character of the institution and partly in consequence of a lack of continuity in the administration. (See Aḥnā Akbarī (Bluchmann, i. 236 sq., 268 sq.); Paul Horn, Das Heer- und Kriegswesen der Grossmoguls (Leiden, 1894), p. 11 sq.; W. Irvin, The Army of the Indian Moghuls (London, 1903), p. 3 sq.). A more popular classification of the various sections of Muhammadan society would appear to have owed its origin to the influence of the social system of the Hindus. Just as Hindu tradition gives the number of the higher castes as four, so the Aṣhafrā (or, noble) sections of Muslim society fall into four classes, (1) Sayid, (2) Shahīk, (3) Mughal, (4) Pathān. (1) The Sayīds claim descent from Ḍinā, either through Fīṭimī (the Fīṭimī Sayīds) or through some other of his wives (the Ulwi Sayīds). The Fīṭimī Sayīds have various designations according to the names of the twelve Imāms, e. g. Ḍanā, Ḍusinā, Dja-fa, Mūsāwi, Razawī, etc.; or according to the birth-place of the ancestor who first came into India, e. g. Bakhshī, Gīlānī, Kirmānī, Gordova, etc. The Sayīds in India tend to arrogate to themselves the position of an aristocracy in the Muhammadan community, but economic conditions compel them to follow all kinds of calling and many of them are employed in humble occupations or gain a scanty livelihood as agriculturists. The well-to-do and educated Sayīds carefully preserve their genealogical trees and as a rule intermarry only with Sayīds or even with Sayīds of their own group. But many persons arrogate to themselves the appellation Sayīd, who have no rightful claim
to this honourable title. Akbar is said to have allowed some converted Brahmanas to call themselves Saiyids. A well-known proverb, current throughout northern India, represents a successful man as saying, "Last year I was a vaevar; this year I am a Shaiikh; next year, if prices rise, I shall be a Saiyid." According to popular superstition, fire cannot harm a true Saiyid, and Saiyid Mahmmud of Bahrna (one of Akbar's generals) is said to have successfully submitted to this test by standing for an hour unharmed in the midst of a fire (Blochmann, A'm-i Akbari, p. 390). (For a modern example of this test being applied, see J. C. Oman, The Brahmanas, Tholits and Musalmans of India (London, 1907), p. 323 sq.) (2) Shaiikh is an honorific which is considered properly to belong to persons who can trace their descent from some member of the tribe of the Kuraish. The Shaiikhs are further designated Shaid Uzbek, if claiming descent from Abu Bakr, Fara'id, if from Umar, 'Abd-b, if from 'Abdゥ b. Abd-al-Mutta'id, etc. But Shaiikh is an honorific commonly assumed by Hindu converts, especially from among the lower classes, and as many as 28½ millions (i.e. nearly half the total Muhammad population of India) returned themselves in the Census of 1901 as being Shaiikhs. It is of course quite impossible that more than a very small minority of these persons could have had any rightful claim to be of Arab origin. (3) The so-called Maghals in India claim descent from some ancestor who came into the country with the invading army of Bâbur or was attracted thither during the reign of one of his descendants, but in cases where this claim can be made out, the family is generally found to be of Turk origin. (N. Elias, The Tarikh-i-Rashidi, Introduction, pp. 88—90, 128). These persons add Beg after their names, as an honorific. As the number of persons, who style themselves Maghal, is small compared with either Shaiikhs or Pathans, the number of Muhammadans descended from Hindu converts who lay claim to Maghal descent is not very large, but there is a tendency (especially in the Pandjab) for men of low social standing to assume Maghal as a caste designation. In the Hazara District the working of the Pandjab Land Alienation Act (which was introduced in 1904 in the interests of petty landowners and agriculturists, to arrest the transfer of land to money-lenders) has given a great stimulus to this tendency, as increased prosperity prompts the wish to attain to a more dignified status. (H. D. Watson, Gazetteer of the Hazara District, p. 34. (London, 1908)). (4) Similarly, tribes of undoubted Hindu origin, and even Saiyids and Maghals, will assume the name of Pathan. Tribes dwelling on the border of Afghanistan and exposed to the raids of their turbulent neighbours are said to have invented histories of their Afghan origin, as a protection against ill-treatment; or in cases where this motive was absent but the Pathans were the dominant race, it is common to find men of quite different stock, adopting Pathan as a caste-name; this is especially noticeable in the case of Hindu converts of Râdhpuri origin, who call themselves Pathan and even assume the title of Khan; thus we find a large and influential clan bearing the mongrel name of Lâli Khân Pathân, which claims descent from Lâli Singh, a favourite of the Emperor Akbar, who was given the title of Lâli Khân; his son was the first member of the family to embrace Islam. In Orissa, Pathân is used as a generic name for all Muhammadans, just as Turk is the synonym for Musulmân in some of the eastern districts of the Pandjab.

Such Muhammadans as cannot lay claim to belong to the Agh ráf are styled Aqijid and include the converts of low social status, especially those whose occupation causes them to be formed into functional groups, e.g. the weavers (Djulâbâ, a widespread Muhammad caste), cotton-carders, barbers, tailors, butchers, etc. These castes being descended from converts from Hindustan retain many customs with regard to marriage corresponding to those of the Hindu castes to which they formerly belonged; they also preserve the system of caste government, known as the pandjâyat, which deals with breaches of the social custom of the caste in respect of trade, religion or morality, and imposes fines and other punishments. (Fuzli Rubbee, The Origin of the Musalmans of Bengal, (Calcutta, 1895), chap. iv. v; Census of India, 1901, vol. vi. 439 et seq.; vol. xvi. 244 et seq.).

The spread of western education led to the formation of societies, which introduced into India a form of social organisation previously unknown to the Indian Musalmans. These societies or Anjuman give to energetic and enterprising men an opportunity of coming forward as leaders of the community, irrespective of their position in the old order of society, and each Anjuman tends to become a centre of social activity, and thus to introduce into the community a new principle of social organisation. The aims of these Anjumans are various, educational, social, political, religious. One of the earliest of them was probably the Muhammadan Literary Society founded in Calcutta by Nawâw 'Abd-ul-Latif in 1863. Later in the same year Saiyid 'Ahad Khân founded the Scientific Society of Ghâzîpur (transferred in the following year to 'Aligarh), with the object of translating scientific and historical works from English into Urdu; a press was established in 'Aligarh and a series of translations printed there, but the activities of this Society ceased when the Muhammadan Anglo-Oriental College was founded in 1875. In order to impress upon the Muhammadans the importance of higher education, Saiyid 'Ahad Khân in 1886 originated the Muhammadan Educational Congress (after the second meeting, styled Conference, and finally, the All-India Muhammadan Anglo-Oriental Educational Conference), a yearly gathering held in various cities, chiefly in Northern India; provincial educational conferences were organised later as well as educational associations in several towns. This Conference made its appeal chiefly to such Muhammadans as were interested in the promotion and spread of western learning among their co-religionists, but the Nadwat al-Usâm, established in 1895, was founded with the object of conserving the older learning, in Arabic and Persian, with such modifications and additions as were demanded by modern conditions; it conducts a school in Lucknow, the aim of which is primarily to train religious teachers. The Moslem Institute of Calcutta, started in 1903, is a literary society of the same type as those found in other cities, e.g. the Madras Muhammadan Literary Society etc. Some Anjumans combine educational work with other activities, e.g. the Anjuman Hímâyât-î Isám of Lâhôr has among its objects the refutation of objections brought
against Islam by its opponents, the spread of religious education, the care of orphans, the suste-
nation of preachers etc.; it accordingly has founded a number of schools and a college affiliated to
the University of the Pandjâb, established orphan-
gages, and by preaching and other means promotes
the defence and the propagation of Islam. In most of
the capital cities of India, there is a central body
formed to promote Muhammadan interests
generally throughout the province,—in Bombay,
Lâhore, Nâgpur and Patna called Andjuman-i Is-
lâmiya, in Madras Andjumani-i Islam, in Calcutta
the Central National Muhammadan Association,
in Dacca the Islam Association of Eastern Bengal.
In addition to these societies having an extensive
sphere of operations, there is hardly a town in
India, with any considerable Muhammadan popu-
lation, that has not got its own local Andjumani,
but these Andjumans are too numerous for a list
to be given here; many of them are short-lived and
depend for their continuance in existence to
the zeal of some one individual, and perish with
him. In recent years, especially in Northern India,
in consequence of the attacks made upon Islam by
the Arya Samâdis, societies have been formed of
an apologetic and propagandist character, e.g.
Andjuman Hâmî Islâm (Âdîmî), Andjuman Ta-
bligh-i Islam (Haiderâbâd), Madrasa Ilâhîyat (Cawnpore),
Andjuman Hidayat al-Islâm (Dihîl) etc. The
latest type of Muhammadan society to make its
appearance is the political, in the form of the
All-India Muslim League (v. § 2).

4. LAW AND ADMINISTRATION.

The system of law most widely accepted among
the Sunnis of India was that of the Hâfiz school,
but that of the Shâfi'i school also found adherents
and is accepted by a small number of Muhammadans
in the provinces of Bombay and Madras and the Pandjâb to the present day. The Shâfa'is,
wherever possible, have put into force the precepts
of their own law-books and the decision of their Muqta'ahids. But even under Muhammadan rule,
the extent to which Muslim law was followed,
varied from time to time in different parts of the
country. In towns and cities where the learned
could make their influence felt and could uphold
a standard of orthodoxy, the prescriptions of the
sharî'ah could be more completely enforced; in
country districts, however, among the converts
from Hinduism earlier institutions survived, in
spite of their being in direct contradiction to the
ordinances of the written law. Justice was admin-
istered by Kâdis, with the assistance of Muftis
as exponents of the laws of Islam, which by
theory were independent of the state; but the
real power remained in the hands of the sovereign
and his officials, who did not hesitate to intervene
when, and to whatever extent, they thought fit.
Barani [q. v.] gives an account of an interview
(about 1500 A. D.) between Alâ al-Dîn Khâljî and
Kâdî Muqtabî al-Dîn in which the latter
points out the many ways in which his sovereign's
methods of administration ran counter to the laws
of Islam, but the Sultan states that his policy is
to consult for the good of the kingdom and the
requirements of the situation, without considering
whether the orders he gives are in accordance
with the sharî'ah or not. (Tur'îkh-i Fîrûchosâhi, p. 296
init.; Elliot-Dowson, iii. 188). Even the orthodox
Awrangzâb could interfere with the legal decision
of a Kâdi, when it did not fall in with his wishes
(Ashâm-i 'Alâmgarî: v. Jadunath Sarkar, Anecdotes of
Awrangzâb, pp. 141-2). The Kâdi dealt with all cases
of dispute between Hindus and Muhammadans,
and the penal ordinances of the Muslim law were
applied to all criminal cases and offences against
the state. But the Hindus were left to settle their
internal disputes in accordance with their own
laws or customs. When in 1765 the grant of the
diwâni of Bengal, Bihâr and Orissa was made to
the East India Company, Muhammadan law con-
tinued to be administered, as before, by Muhammadan judges, but in 1772 English judges
were appointed to administer it together with
the help of Muftis acting as expert advisers to
the courts; similarly Pandits sat as assessors to
advise in cases tried according to Hindu law. But
from time to time the Muhammadan criminal
law was modified by the Company's Regulations
and the milder provisions of English law substi-
tuted, but the Muhammadan element did not en-
tirely disappear until 1862, when the Penal Code
and the first Code of Criminal Procedure came
into force; in course of time also the laws relating
to revenue, land tenures, procedure and evidence
have been replaced by the enactments of the
English legislature. But questions relating to family
relations and status (e.g. marriage, divorce, main-
tenance and guardianship of minors, succession
and inheritance), religious usages and institutions,
and dispositions of property by gift, will and
waff [q. v.], are still governed by the Muhammadan
law, provided that the Muhammadans them-
selves wish it to be applied; for in certain parts
of India, it has been superseded in many respects
or considerably modified by customs adopted from
earlier Hindu times, and sanctioned by the legis-
lature and the courts; thus custom takes precedence
of Muhammadan law in the Pandjâb, Oudh, the
Central Provinces, the Bombay Presidency, and
among the Marâthas. In the Pandjâb, for example, in
some districts a widow is not entitled to a share in the property of a deceased
husband, but merely to maintenance; following the Hindu practice of adoption, a sonless
proponent may appoint a kinsman whom he regards as heir to contrast with the
Muhammadan law of gifts (hiba), ancestral immovable property is ordinarily inalienable, except with the consent of
caste of males, or, in the case of a sonless
proponent, of his male collaterals. The Memans
[q. v.] of Kaik, who are descended from Hindu
converts chiefly of the Lohâna caste, are still
governed by Hindu law in questions of inherit-
ance, though a large section of the community wish in future to follow the Sunni
law of the Hâfiz school to which they belong. Similarly, the Sunni Bôhôras [q. v.]
of northern Gujarat follow Hindu law in matters of inheritance
and succession. The Khodjas [q. v.] in the Bombay
Presidency follow Hindu custom in refusing to
females any share in their father's estate, and
generally appeal to Hindu law or custom in regard
to all questions of inheritance and succession;
the right of divorce is limited by the necessity of
obtaining the consent of the djamat (or assembly
of the community) according to the custom of the
sect. The Mappilas [q. v.] in North Malabar
follow the Marumakkattâyam (i.e. descent through
sister's children) system of inheritance, according
to which property descends through the female
line and sons have no claim to a share of their father's property or to maintenance therefrom; they ordinarily follow the custom of holding family property undivided, as the joint property of all the descendants of a common ancestress, in the female line only, each member of the joint family being entitled to maintenance from the property so held; but some Mappillas, while following the Marumakkattāyam system in reference to the joint family property, are governed by Muhammadan law in regard to the self-acquisition of individual members of the family.

**Administration.**

The early Muhammadan conquest of India was more of the nature of a military occupation than an actual appropriation of the whole of the country. The invaders were comparatively few in number, and were constantly engaged in fighting in order to make their position secure; they were content to receive tribute from the Hindu princes who submitted to the new rule, without interfering in the internal government of their dominions; in the parts of the country under the more immediate rule of the conquerors, the native revenue officers were not displaced and collected the revenue much as before. But as Muhammadan power became consolidated and more Muhammadans settled in the country, the internal management of the provinces came to be taken under the direct control of the imperial power, and the Hindu Rājputs became the revenue officials, and both the Rājputs and their former nobles sank to the position of landlords paying revenue to the government. At the same time there was a tendency for the government to enhance the amount of its demand; according to Hindu law the proper share of the king was one-sixth of the produce of the soil, but under Muhammadan rule attempts were made to exact more, and 'Aila al-Dīn (1296–1316) at one time claimed as much as a half. The chief source of revenue was this share in the produce of the soil, supplemented by the dījya [q.v.], which in India was a poll-tax paid by the Hindus; but the latter tax was irrevocably levied, and was abolished by Akbar, while Aurangzeb's attempt to re-impose it brought about a rebellion; a number of petty cessees were also imposed, often of a very oppressive character (Elliott-Dowson, iii. 182, 377). According to the Muhammadan system all land assessed for revenue was divided into the kālīya lands paying revenue direct to the royal treasury, and the dījgir lands, the revenue of which was assigned to individuals, e.g. ministers, courtiers, and especially military commanders, who took the revenues for their own support or that of a military force which they were bound to maintain. The dījgir was originally only a life-grant and reverted to the State on the death of the grantee, and the dījgirdār was not allowed to take more than the sum assigned to him, according to the terms of his sanad, and if more came into his hands, he had to account for the surplus to the State treasury. But such dījgirdārs tended to become hereditary, especially when the central government was weak, and the granting of a new sanad to the incoming heir became a matter of form, or no fresh sanad was granted at all and the dījgirdār came to be looked upon as a proprietor of the land and could do much as he pleased. Attempts were made at times to reduce the system of land tenure and assessment to order, the most successful being that connected with the name of Akbar [q.v.], who entrusted his finance minister, Tūdar Mall, with the task of re-organising the revenue system; the object of the new system was to substitute a money-revenue at a fixed rate for a revenue in kind varying with the crop. A fixed standard of mensuration, the bigha [q.v.], was adopted, the land was surveyed, and the average yield was computed by ascertaining the actual produce for a number of years; the share of the government was fixed as one-third of the average produce, payable in money (unless the cultivator choose to continue to pay in kind). Tūdar Mall commenced the survey in 1571, but the new assessment was never successfully extended to all parts of the empire, and considerable changes were introduced by later rulers; but Akbar's land-revenue system is the basis of that found in India at the present day. Akbar further organised the administration by dividing his empire into 15 sāhās or provinces, subdivided into sarkārs and these again into parganahs; this arrangement secured a centralisation of government and with some slight changes lasted throughout the period of Muhammadan rule.

### 5. Religion.

**a. Sects.** The majority of the Indian Muslims are Sunnis [q.v.], and owing to the high level of theological learning maintained by the 'ulamā' for centuries and the close relations kept up with centres of religious life and thought in other parts of the Muslim world, there has always been a large body of orthodox opinion and practice among the Indian Sunnis, and these have not differed materially from similar manifestations in other Muslim lands. The Shi'ahs [q.v.] have always been in a numerical minority in India; under the rule of the Shi'ah sultāns of Bidjāpur [q.v.] and Golconda [q.v.], and later under that of the Kings of Oudh [q.v.], the Nawabs of Murshidabad
Mu'in al-Din Cīṣṭī, who was born in Sīstan but came to India and settled in Ajmīr, where he died in 1236 [s. Āṣīrī]; his tomb attracts to Ajmīr thousands of pilgrims every year and is venerated by Hindus and Muslims alike (Journal of Indian Art, vol. iii. p. 8). He counts among his successors some of the most famous saints in India: Khwāja Kūṭb al-Dīn Bahākhīyār Kākī, who was born in Farghāna, but after a wandering life spent in visiting various eminent saints, passed his last years in intimate friendship with Mu'in al-Din Cīṣṭī and died in the same year as his spiritual teacher and friend; he is buried near the Kūṭb Minar at Dīlī; — Shāhīk Farīd al-Dīn Shākargāndī (ob. 1265), whose tomb is at Pākpattān, where an enormous fair is held every year, and the object of every pilgrim, whether Hindu or Muhammadan, is to get through the narrow gate of the shrine on the afternoon or night of the 5th Muhārram (M. A. Macauliffe, The Sikh Religion, vi. 359 sqq.); — he had two illustrious disciples, one Kūṭb-ī Abdāl Shāhīk ʿAlī b. Aḥmad Sābir (ob. 1291), whose tomb is near Surkhi (his followers are known as Śāhir Čīṣṭīs), and the other, more famous, Nīzām al-Dīn Awlīyāʾ (his real name was Muḥammad b. Aḥmad b. Dānīyāl al-Būkhrānī), (born at Bādāʾ in 1238), who was nominated by Farīd al-Dīn as his īlṣāfī, or successor, when he was only 20 years old, and died in 1295; some of the most distinguished of his contemporaries were numbered among his spiritual pupils, including the poets, Āmir Khurān and Āmir Ḥasan Dihlawī, the historian, Dīwān al-Dīn Bānārī, and a number of others. (For a list of these, see the biography of the saint, entitled Muṭṭāb al-Talīkīn by Muḥammad Būlākī.)

His tomb in the outskirts of Dīlī is surrounded by the graves of his followers and admirers and is much frequented by pilgrims. His khalīfa was Naṣīr al-Dīn Muḥammad (or Muḥammadūd) Čīṣṭī (s. Čīṣṭī Dīlī), who became his pupil at the age of 40 and died in 1356; his tomb at Dīlī is still a place of pilgrimage. The renown of these saints led to a wide extension of the Čīṣṭī order, but it is not possible to mention more than two of the latter saints, e.g. Shāhīk Salīm Čīṣṭī (ob. 1572), in whose house the emperor Dāhāngīr [q.v.] was born; and Khwāja Nūr Muḥammad (ob. 1791), known as Ḳiblā-i Ālam, who brought about a revival of the Čīṣṭī order in the Pandībā and Sindh. (For further details see the histories of the Čīṣṭī order, e.g. Savaṭī al-ʿAnwār by Muḥammad Akram al-Bārisawī, and the works quoted therein, and Siyar al-ʿĀrīfīn by Ḥamīd b. Faṣlī Ālam Dīmīlī.) The Suhrawardī order, which takes its name from Shihāb al-Dīn Suhrawardī (ob. 1234), was introduced into India by Bāhāʾ al-Dīn Zakariyāʾ, who was born at Mūltān but travelled to Baghdād, where he became the spiritual pupil of Shihāb al-Dīn Suhrawardī; he died at Mūltān in 1266 and his tomb, said to have been built by the saint himself, is one of the few examples of the architecture of this period in India. One of his disciples was Saiyīd Dājāl al-Dīn Surkh-pūsh, the first of this order to come to India from Baghdād, where he was born in 1199; after many wanderings he settled in Uth, where he died in 1291; he is the ancestor of generations of saints, some of whom were active and successful propagandists of Islam. His khalīfa was his grandson, Saiyīd
Djālī b. Ahmad Kabūr, commonly known as Makhdūm-i Djabāniyān (ob. 1354), who is said to have made the pilgrimage to Mecca 36 times and to have performed innumerable miracles. One of Makhdūm-i Djabāniyān’s grandsons, Abū Muḥammad ʿAbd Allāh, known as Burhān al-Dīn Kuṭb-i ʿAlam (ob. 1453) [q.v.], went to Gujārat, where his tomb is still a place of pilgrimage at Bātuwā (Archaeological Survey of Western India, vol. vii. p. 60 sqq.); his son, Sayyid Muḥammad Shāh ʿAlam (ob. 1475) became still more famous and played an important part in the political and religious life of his time; his tomb at Rasalāhābād, near Ahmadābād, is a beautiful example of the style of architecture characteristic of this district (id., vol. viii. p. 15 sqq.). The Kādīrī order derives its name from ʿAbd al-Kādīr al-Djīlī [q.v.], who is reverenced throughout India as Pir Dastgir, Pirānī Pir, etc., his festival being widely celebrated on the 11th of Rabīʿ al-Ṣāhīr. This order was introduced into India by one of his descendants, Sayyid Muḥammad, known as Bandīgār Muḥammad Gwāthī, who settled in Cūh in 1482 and died there in 1517; he was the progenitor of a number of saints and miracle-workers, and his descendants have remained in Cūh to the present day (Gazetteer of the Bikaner District, vol. ii. p. 391 [Lahore 1908]). The Kādīrī saints are too numerous to enumerate here, but mention must be made of Shaikh Mir Muḥammad, known as Miyānī Mir, the spiritual preceptor of Dārā Shikōh [q.v.], who wrote a life of the saint, entitled Sābilat al-Akhyār, he died in Lahōr in 1635 and his tomb is still venerated there. The Shāṭīrī order gave several great saints to India, e.g. Muḥammad Gwāthī, who numbered among his spiritual pupils the emperor Humāyūn; he died in 1562 and was buried at Gwālīyār in a magnificent tomb erected by the emperor Akbar (Sayyid Faḍl Allāh, Manṣūḥ Gwāthīya). His disciple, Wajīh al-Dīn Gujāratī (ob. 1596), a man of great learning, is buried at Ahmadābād (Archaeological Survey of Western India, vol. iii. p. 53), and another saint of the same order, known as Shāh Pir (ob. 1632) at Miraṭh in a tomb built by Nūr Dijāhn, wife of the emperor Dijāhngīr. The introduction of the Naḥāb bāndi order into India is usually attributed to Shaikh Ahmad al-Fārūqī al-Sirhindī (ob. 1625), (for his letters, see Ethē, Cat. Pers. MSS. India Office, no. 1891); this order has not enjoyed the same degree of popularity as those above mentioned, but there has recently been a revival of it in the Panjāb and Kashmir (v. Maḥābād al-Naḍārīt, Ethē, no. 652). To the wide-spread influence of these orders it is largely due that Sūfism has generally been regarded in India as compatible with orthodoxy. Muḥammad b. Faḍl Allāh, of Burhānpūr (ob. 1620), wrote a commentary on al-Tafkhī al-mursala ilā ‘l-Nabī, to prove that the doctrines of the Sūfīs were in accord with the teaching of the Khalīfah and the Sunna. In addition to the above so-called bāṣhārī orders, the members of which observe the customary ordinances of Islam as to prayer, fasting, etc., there are certain irregular (or bāṣhārī) orders, peculiar to India, which are looked upon with disfavour by the orthodox; their adherents are almost entirely confined to uncultivated persons of the lower classes. Among these are the玛드ārīs, who are followers of Zinda Shāh Mádār, a legendary personage said by some to have been a converted Jew (born at Aleppo in the 11th cent.), who settled in India and expelled a demon, named Makan Dēs, from the spot (Makanpur) where his own shrine is now venerated; according to other accounts, he was a disciple of Shaikh Muḥammad Taṣfīr Shāhī and died in 1436. The fakirs of this sect claim to be immune against fire and the bites of snakes and scorpions. The devotion to Shāh Mádār is widespread, and pilgrims resort to his shrine from great distances. The رāṣūl Shāhīs are followers of a certain Rāṣūl Shāhī, of the Alwar State, who in the 18th cent. is said to have received miraculous powers from a saint in Egypt. They rub ashes on their bodies and faces, and shave the head, moustaches and eyebrows; they look upon the drinking of spirits as a virtue, and the sect is consequently considered to be a disreputable one by orthodox Muslims. In Gujārat they wander about begging, without wives or settled homes; but in the Pandjāb they are not celibate, being as a rule well-to-do citizens who are never seen begging, and some are said to be men of literary taste and are popularly credited with a knowledge of alchemy.

3. Saints. The Muslim saints of India may be counted by hundreds. Several of the more important have already been referred to in the account of the religious orders; these are historical personages of whom some record remains, and there are many more like them. But others are historical personages whose identity has become overlaid with a mass of legend, in which the record of history is almost entirely obscured. e.g. Ghāzi Miyan [q.v.], Sakhī Sawar [q.v.], etc. Others are purely legendary, as Khwādja Khīrī [q.v.]. Baba Ratan (v. Horovitz, Journal of the Punjab Historical Society, ii. no. 2), Shaikh Sadu, etc. The process of canonisation still goes on, and new saints are from time to time added to the calendar, e.g. at Mūṭhiār (in Bengal) a Muḥammadan Pir, named Patakh Sīm (ob. between 1860 and 1870), is credited with miraculous powers and his aid is invoked especially by litigants. Besides the many miracles ascribed to these saints in their life-time, they are still believed to be able to work wonders for those who invoke their aid; miraculous cures especially are said to be wrought at their tombs, and childless women pray to them for offspring, and litigants for success in the law-courts; the beneficent activity of others has a more restricted reference, e.g. Khwādja Khīrī, Mālumīyar and Pir Bādṛ are the patron saints of boatmen and sailors, Shāh Shāh (of Multān) of persecuted lovers, Shāh Dāwla takes microphonic children under his protection, etc. Many of these saints are known as Piras, a title of honour applied not only to the famous historical saints above-mentioned but also to living spiritual preceptors, who guide their disciples (murādī) in the practices of the devout life, — not only to the saints whose shrines are visited by thousands of pilgrims from distant parts, but also to those obscure individuals whose tombs are to be found by hundreds in the by-ways of a town or the outskirts of a village and enjoy only a local reputation. For the religious movement condemnatory of the worship of saints, see the art. KĀRĀMĀT ‘ALĪ and WAḤHRĪ.

Bibliography: Besides the works already mentioned, see ‘Abd al-Ḥaḳḳ b. Saif al-Dīn al-Dīhlwī, Aḥḥār al-Ashār; Dārā Shikōh, Sāfī-
fore Akbar’s desire to learn the Hindu doctrines caused him to have the Muhâbârata, the Kamâya and the other Hindu scriptures translated into Persian, and his friend, Faiz, compiled for his instruction a treatise on the Vedanta philosophy. Akbar allowed his Hindu wives to have the ceremonies of their religion performed in the royal palace, and under their influence and that of the Brahmins whose society he cultivated, he adopted several Hindu practices, e.g. he abstained from the eating of beef, and on certain festivals he wore the Brahmanical cord and had his forehead marked like a Hindu sectary. Djahângir had none of the religious earnestness of his father, but he kept up the Hindu customs that Akbar had adopted and observed such Hindu festivals as the Diwâli, or feast of lights, and on Siva-râtri, (or Siva’s night), would invite Hindu yogis to the palace and eat and drink with them. A more earnest and sympathetic student of Hindu thought was Djahângir’s grandson, Dârâ Shikoh [q. v.], who diligently cultivated the society of Hindu yogis, and as a result of this intercourse (he tells us) came to the conclusion that the divergence between the doctrines of the Hindu pantheists and those of the Muslim Sûfs was merely verbal; with the object of reconciling the two systems, he wrote his Madâmaâl-âl-Bahrain; he also translated, or had translated for him, into Persian, several works of Hindu metaphysics, including the Upanishads (under the title Sîr-i Akbar). The large number of such translations from Sanskrit and Hindi into Persian, that were made from time to time (see, Ethê, Cat. Pers., MSS. I. O., no. 1928 sq.; Grundr. der i ran. Philologie, ii. 352–7), bears evidence to the interest which many Muhammadans took in the beliefs of their Hindu fellow-subjects, and in mysticism especially they found a common basis for religious thought. Muslim saints numbered many Hindus among their disciples, and thousands of Hindus still worship at their tombs on the other hand, though less rarely, numbered some Muhammadans among their spiritual pupils. Instances are not unknown of friendship between saints of the rival creeds, e.g. at Gîrût (in the Pandjâb) the tombs of two ascetics, Djamâli Sulân and Dîlâ Bhâvan, who lived in close amity during the early part of the 19th cent., stand close to one another and are reverenced by Hindus and Muhammadans alike. (Bhâvanâ Dîs, Dîvan Carita Sûrîhagat Dîl Bhâvanâî (Lâhûr, 1900)). Bâvâ Fattu (for. 1700), a Muslim saint whose tomb is at Rântâl (in the Kangra District), received the gift of prophecy by the blessing of a Hindu saint, Sûdî Guru Gulâb Singh. On the other hand Bâhâ Shâhâna, a Hindu saint whose cult is observed in the Djangh District, is said to have been the âlta or spiritual disciple of a Muslim fakir who changed the original name, Mihrâ, of his Hindu follower into Mihr Shâh. With a still more remarkable liberality, some Muslim theologians have admitted into their system the gods of the Hindu pantheon, on the ground that the Kurân (xiii. 8; xvi. 38) teaches that God has sent a prophet to every nation, to guide it into the truth; thus (to give one instance only, from modern literature,) one of the present guardians of the shrine of Nîgâm al-Din Auliya’s, — himself a descendant of this saint, — maintains that the life and teachings of Râmâ, Krishna and Buddha clearly show that they are the prophets.
referred to in the Kur'an, though no express mention is made there of India; for it cannot be supposed that God would have made so vast a country an exception to the operation of His general rule. (Hasan Naqshmagli, Hindustân ke dâl-paîgâmbar Râm o Krishan, salâm Allahi 'alâikumâ, p. 3 (Lahore, 1325 H.)). The Muhammadian poets of Bengal went still further in their recognition of Hindu theology, e. g. 'Aliol (for. 17th cent.) sang the praises of Siva, and Mirzâ Husnâ 'All composed hymns in honour of the goddess Kâlî. (Unmesh Chandra Sen, History of Bengali Language and Literature, pp. 626, 793 (Calcutta, 1911)).

Owing to the fact that the Muslims in India have lived for centuries in close contact with Hindus and are themselves to a large extent descended from Hindu converts, it is not surprising that Islam in India presents certain characteristics peculiar to this country. The process of conversion was often incomplete, and the converts, instructed in their new faith, carried with them many of their old beliefs and practices. The sacred sites of the earlier faith continued under a changed name to be frequented by pious persons; this has happened in the case of Buddhist shrines in the Ganges country, and to an enormous extent in Kashmir, where a Muhammadan ziyârat frequently marks the site of a Hindu templa; it is then often stated to be the tomb of a saint, e. g. the tomb of Râmânî Sâhî, a popular place of pilgrimage for Muhammadans in Kashmir, has been identified with an ancient Hindu temple built by Bhûma Sâhî, the last Hindu king of Kûbul (ob. 1026); the saint is now said to have been a Hindu ascetic, and to have borne the name of Bhûma Sâdî, before his conversion to Islam. (Kalhana's Rajatarangini, translated by M. A. Stein, i. 249 (Westminster, 1900); A. Foucher, Notes sur la géographie ancienne du Gauhârâra. Bulletin de l'Ecole Française d'Extrême-Orient, i. 333 sq. (Hanoi, 1901)). Such survivals from Hinduism are more marked in villages and country districts, remote from the influence of the 'ulama'; here the Muslims still continue to worship the tutelary godlings of the village, join in Hindu festivals and employ Brahmins at their marriage ceremonies. (For details see Transactions of the Third International Congress for the History of Religions, i. 314 sqq.). This close association with Hindus has also led to the formation of some mixed sects, which attempt to bring about a reconciliation between Hindus and Muhammadians; among these are the Pirzâdâs, a sect founded by Muhammad Shâh Dullâ (about the middle of the 17th cent.), whose tomb is at Bâhâdûrprî (in the Central Provinces); he compiled a book containing a selection of passages from both the Hindu and Muslim scriptures and adopted as a supreme deity the tenth incarnation of Vishnu, which is to come and is known in the sect as Nishkâlanî, "the sinless one". The Hûsâinî Brahmins call themselves followers of the Athara Veda, but ask for alms in the name of Hûsain; they adopt such of the doctrines of Islam as are not contrary to Hindu teachings, and observe Muslim customs, even keeping the fast of Ramaâdan, and have a special devotion to the saint, Mu'âm al-Dîn Cîshît of Adîmir; the men dress like Muslims, the women like Hindus. The Kâctâbâhiyâs, the members of a sect (founded in Bengal in the 18th cent.), who call their creed the Satya Dharma (true faith), include both Hindus and Musulmans, and in this sect a Muhammadian may even become the spiritual guide of a Brahman. The Sandjûgs, the Sûlyardhûs, and the Lâlîbûs are similar sects on the borderland between Hinduism and Islam. A like syncretism shows itself in the teaching of Nânâk, the founder of the Sikh religion (see T. P. Hughes, Dictionary of Islam, art. Sikhism), and would seem to have originated the worship of the Pânt Pîr[a.v.]. Such an approximation is sometimes indicative of the incompleteness of the process of conversion, as in the case of the Mallânâs in Agra and the adjoining districts, who are converts to Islam but are reluctant to describe themselves as Musulmans; their names are Hindu and they use the salutation Râm Râm; they mostly worship in Hindu temples, but sometimes frequent a mosque, practise circumcision and bury their dead. Such imperfect conversion has rendered possible the recent return to Hinduism of the descendants of such converts. In 1880, about 160 families of Mâttâ Kûnâbis, whose ancestors were converted in the 15th cent. by Imam Shâhî [q. v.] of Pirûna, formed themselves into a separate caste, calling themselves Vaihshaya Mûlâs, gave up all Muhammadian customs, employed Brahman priests and refused to eat with their Muhammadian brethren, the Pirûn Mâttâs. The Arya Samâdî has been very active in the work of re-conversion, and one of the societies affiliated to it, called the Râjpût Suddhâ Sâbâ, having for its chief object the re-conversion of Muhammadians Râjpûts to Hinduism, claims to have converted to the beliefs of the Arya Samâdî as many as 1052 of such Râjpûts in the three years, 1907 to 1910. This change has been facilitated by the fact that intermarriage with Hindus has been common (esp. among the Cawkhâns in the Eastern Pundâb) and the tribal bond with Hindu sections of the tribe has always been stronger than any difference of religion. (6. Literature). Muslim India has always preserved a learned tradition and the study of Arabic has been diligently pursued by the 'ulama', but their literary activity in this language has been largely confined to commentaries,—on the Kur'an, and Hadîth, on the works of fikh, grammar, rhetoric, etc., commonly read by students. Among the commentaries on the Kur'an, mention may be made of Fâî'î's [q. v.] tour de force entitled Sa'âsît al-Ilâmîn, in which all letters with diacritical points were avoided. 'Abd al-Hâkim al-Sîyâl-kîî was an industrious commentator, who enjoyed the patronage of the emperor Shâhidshâhân. Mühîb 'Allâh al-Bihârî (ob. 1797) [q. v.] compiled a treatise on jurisprudence, al-Musâlâm, and another on logic, Sûllâm al-Unaâm, which became favourite textbooks, and generations of commentators wrote glosses upon them. Another industrious commentator was Bâhîr al-Unaâm (ob. 1810), [q. v.]. An important contribution to legal literature was al-Fâlîwâ al-âlamîrî, a collection of legal opinions by Hanfî jurists, compiled by Shâikh Nizâmî and others in the reign of the emperor Awrangzêb. The greater part of the historical and mystical literature of Muslim India was written in Persian, but among Arabic writings mention may be made of Tâhjât al-Mu'jâhîdîn, an account of the Muhammadians of Malzûb, by Shâikh Zain al-Dîn, (ed. D. Lopes, Lisbon, 1898), and al-Dîwân-Shir al-khamisiyâh by Muhammâd 'Abwâth [q. v.]. (Bi-
and other educational establishments, and scholarships granted to Muhammadan students. The total number of Muhammadan pupils under instruction in all classes of educational institutions in 1912 was 1,562,000. Of the various religious communities in India, the Muhammadan on the whole exhibits a greater degree of illiteracy than any other, with the exception of the Animistic tribes: only 40 men, and 4 women, per thousand are able to read and write. This backward condition of the Muhammadans generally is largely due to the low level of education in the parts of the country (e.g. the North-West of India and Eastern Bengal), where they are chiefly to be found. In the ancient centres of Muslim civilisation, their level of education is as high or even higher than that of the Hindus, and the number of Muhammadans attending the Universities is yearly on the increase.

Leitner, History of Indigenous Education in the Punjab (Calcutta, 1883); Abdul Karim, Muhammadan Education in Bengal (Calcutta, 1906); Syed Mahmood, A History of English Education in India (Aligarh, 1895); Quinquennial Reviews of the Progress of Education in India (since 1886).

8. Art. Space does not admit of any account being given here of the vast artistic activity of the Muhammadans in India, and reference must therefore be made to the literature on the subject. — Architecture: The architectural monuments of Muhammadan India are chiefly mosques and tombs (in large numbers), and some palaces in the chief cities. The early conquerors made use of materials taken from the Hindu and Jain temples etc. which they had destroyed, and employed Hindu workmen to erect buildings suited to the requirements of Muslim worship. In the great mosques at Adhiraj and Old Dilihi, built at the beginning of the 13th cent., Hindu pillars were re-erected without any alteration, and dissimilar fragments were sometimes put together; while on the great gateways of the enclosures was lavished a wealth of ornamentation and of stately Arabic inscriptions, which mark out these buildings as among the most richly decorated examples of Muhammadan architecture in India. After this superb beginning followed a rapid development of architectural forms, varying considerably in the several independent kingdoms that arose in the different parts of India occupied by the Muhammadan conquerors. Of these local styles as many as thirteen have been enumerated. They vary from the stern and massive tombs of the early kings at Bidihi and the grand simplicity of the towering mosques of Djanwpur, to the studied elegance and exquisite detail of ornamentation in the buildings of Bhadadabhad and the degenerate tawdriness of Lakhaw. For some account of the architectural monuments in these various localities the reader is referred to the articles under the name of each, e.g. Bidjapuri, Dilihi, Djanwpur etc.; but space has been found for a separate article on Mughal Architecture, which was not limited to a single locality. — Bibliography: Reports and other publications of the Archaeological Survey of India; Gustave Le Bon, Les Monuments de l'Inde (Paris, 1893); J. Fergusson, History of Indian and Eastern Architecture, ed. J. Burgess (London,
1910); E. B. Havell, *Indian Architecture* (London, 1913); *Imperial Gazetteer of India*, vol. ii. chap. V (with bibliography). — Painting: Few examples of Muhammadan painting in India before the 16th cent. are known, but under the patronage of Akbar and his successors Indian artists produced a vast quantity of pictures, sometimes as separate works of art, but most often as illustrations of manuscripts; the *mattamāwants* of Nīfāmī, and romances both in poetry and prose, were frequently illustrated; but the Mughal school of painting excelled particularly in portraiture, and a large number of vivid and realistic portraits of the monarchs and courtiers of this dynasty has been preserved. The influences under which these artists worked were partly connected with the school of painters that enjoyed the patronage of the Timūrid princes, — and painters who preserved the tradition of this school were undoubtedly attracted into India, — but to a larger measure with indigenous Hindu art. European paintings and engravings were also sedulously copied and their influence can be traced in many pieces of the Mughal school. The majority of these pictures are unsigned, but some bear the signatures of the artists, e.g. Mir Saiyid Ali, Abd al-Samad and other Muslīms who painted for Akbar, — Mansūr and Muḥammad Nādir, among the artists patronised by Dājāngīr, etc. — Bibliography: E. B. Havell, *Indian Sculpture and Painting*, Part ii. (London, 1908); Vincent A. Smith, *A History of Fine Art in India and Ceylon*, chap. xiv. (Oxford, 1911); F. R. Martin, *The Miniature Painting and Painters of Persia, India and Turkey*, chap. ix. (London, 1912); A. K. Coomaraswamy, *The Arts and Crafts of India and Ceylon* (with bibliography), (London, 1913). — Calligraphy: The art of the calligrapher was held in high honour in India, as in other parts of the Muhammadan world, and many mosques and tombs are decorated with inscriptions that reveal a superb mastery of the Arabic script. The same skill was shown in the copying of manuscripts, both Arabic and Persian, and monarchs and nobles vied with one another in their patronage of expert calligraphists. Some of these were attracted to India from other countries, e.g. Abd al-Samad, known as Shīrīn Kālam, from Shīrāz, who was patronized by Humāyūn and Akbar; Mir Khaṭīl Allāh, who went from Tārak to the court of Tābārīhīm Aḍīl Shāh II of Bidjāpūr (987–1035 A. H.); Saiyid Ali Khaṭān, of Tabrīz, known as Dājārūrī Khān, whom Awrangzīb appointed to teach his sons the art of penmanship. Under the influence of these and other masters in the art, a long series of native calligraphists was trained, who only slowly gave way before the introduction of the printing press. — Bibliography: *Épigraphe Indiennes*, (with bibliography) (Calcutta, 1908 sqq.). — Chisnū Mūhammad Dihāvī, *Tādhbhir al-Khawānīvāz*, ed. (London, 1913); and the Monographs on Arts and Industries published by the Provincial Governments in India. — Garden design: C. M. Villiers Stuart, *Gardens of the Great Mughals* (London, 1913). — Bibliography: Besides the works referred above, the following deserve particular mention: J. H. Garon de Tassy, *Mémoires sur les Particularités de la Religion musulmane dans l'Inde* (Paris, 1831, 1874); Mrs. Meer Hassan Ali, *Observations on the Musulmans of India*, descriptive of their Manners, Customs, Habits and Religious Opinions (London, 1832; reprinted, 1817); Dījārī Shīrā, Qawwāl-ī-Islām, or the Customs of the Musulmans of India, comprising a full and exact account of their various Rites and Ceremonies, from the moment of birth till the hour of death, by Jaffar Shurreef, translated by G. A. Herklots (London, 1832; 2nd ed. Madras, 1865; reprinted, 1895); I. Goldziher, *Vorlesungen über den Islam*, p. 305 sqq. (Heidelberg, 1910). More detailed bibliographies are given under the separate articles devoted to the Indian provinces, towns, kingdoms, distinguished personages, etc. A vast amount of information is to be found in the official publications of the Government of India (e. Frank Campbell, *Index-Catalogue of Indian Official Publications in the Library, British Museum*), especially the publications of the Ethnographic Survey (e. H. H. Risley, *The Tribes and Castes of Bengal*, (Calcutta, 1891–1892); W. Crooke, *The Tribes and Castes of the North-Western Provinces and Oudh* (Calcutta, 1896); E. Thurston, *Castes and Tribes of Southern India* (Madras, 1909); H. A. Rose, *A Glossary of the Tribes and Castes of the Punjāb and North-West Frontier Province* (Lahore, 1911), and Census Reports and Gazettes. The following periodicals and magazines contain numerous articles dealing with the Muhammadans of India, *Journal of the Asiatic Society of Bengal* (Calcutta, 1832 sqq.); *Journal of the Bombay Branch of the Royal Asiatic Society* (Bombay, 1844 sqq.); *Calcutta Review* (Calcutta, 1844 sqq.); *Journal of the National Indian Association* (London, 1876 sqq.); *Punjab Notes and Queries* (Allahabad, 1883–1888); *North Indian Notes and Queries* (Allahabad, 1891–1896); *Journal of the Modern Institute* (Calcutta, 1905 sqq.); *Revue du Monde Musulman* (Paris, 1906 sqq.); *The Muslim Review* (Allahabad, 1910 sqq.). For newspapers see the art DIJĀRĪA, IV. — INDIES (DUTCHEAST) comprise the Malay Archipelago and the western half of New Guinea as far as Long. 141°, except for the north coast of Borneo, which is English, the Philippines, which belong to the United States, and Portuguese East Timor. These Dutch colonies thus include thousands of islands which run from the largest in the world such as New Guinea and Borneo to archipelagoes of the smallest coral islands. From the geographical point of view they are divided into the Great Sundā Islands (Borneo, Sumatra, Celebes, and Java) with the archipelagoes belonging to them); Little Sundā Islands (Bali, Lombok, Sumbawa, Flores, Sumba, Savu, Rotti, and Timor with the surrounding islands), the Moluccas (Hal-
madeira with Ternate, Tidore, Makian, and Batjians, Sula Islands, Buru, Seran, Ambon, and Banda) and New-Guinea with the adjoining groups of islands such as Misol, Waigeu, Batanta, and Salawati in the west, and Kei, Timor-Laut, and Aru in the south-west. The area is about 350,81 geogr. sq. miles. The whole area of the Dutch East Indies is as large as that of Europe without Central and Northern Russia.

The climate of life in this island world are very much influenced by its position under the equator, between Asia and Australia, and between the Indian and Pacific Oceans, surrounded by warm seas everywhere. The formation and origin of the land is also of special importance. The form and situation of the larger islands is a result of the fold mountains which are on the edge of the area of depression in the Indian and Pacific Oceans. One such range on the west and south edge of the Archipelago supports the islands of Sumatra, Java, and the Little Sunda Islands; the chain of mountains which crosses Borneo from west to east runs parallel to it. Celebes and the eastern islands as far as New Guinea show similar systems of folding which cross one another, being dependent on these two areas. The relative wealth of the larger islands in precious metals and other ores, which, like gold and silver, attracted foreign nations in quite early times, and like tin, which is now an important source of revenue to the government and to great mining companies, is due to the predominance of these chains of mountains formed of sedimentary and granitic rocks. Other valuable minerals, such as petroleum and anthracite, which are exploited on Sumatra, Java, and Borneo, come from the tertiary strata, which are common in the East Indies.

Of still greater importance is the volcanic nature of this chain of mountains, which is most marked on the series of islands from Sumatra to Celebes and on its weathered eruptive products causes the unusually great fertility of these islands. Besides the very numerous volcanoes, the volcanic plateau in Sumatra and the alluvial plains of volcanic origin (Sumatra and Java) are among the most highly cultivated and thickly populated regions of the East Indies. The island of Celebes and the Moluccas are also very volcanic.

Next to folding of strata and volcanic effects, coral has the greatest share in the formation of mountains in the Archipelago. From the very earliest period of the earth, countless coral reefs have been formed in these tropical seas in the shallows, where there is sufficient oxygen, light and temperature (about 22° cent.) and the process is still going on. The growth of coral reefs is caused not only by the coral polypi but also by molluscs, chalk algae, diatomene, and many other organisms. The Indian calciferous ranges formed by these reefs thus very rarely yield pure marble. In the course of time this part of the earth's surface has been subjected to great upheavals and depressions so that the old coral reefs have either been transformed into vast calciferous mountains of varying age or, although they could only be formed in the upper regions of the water, are now found at a great depth. On all the Great Sunda Islands one now finds those limestone mountains which are marked by infertility as are often also the neighbouring plains. The small islands formed of coral rock are also very numerous, which have recently become very important through the cultivation of the cocoa-nut palm. The caves washed out of the calciferous rocks supply the edible swallows' (of the Salanga kind) nests eaten by the Chinese.

Living coral reefs are found on almost all the rocky coasts of the Archipelago and in shallows in the high seas.

The climate of the Indies is a moist tropical one and besides being fertile produces a very exuberant vegetation. It renders possible the cultivation of the most valuable tropical plants such as sugar cane, tobacco, spices, indigo, etc. The most important factor for agriculture in the tropics is the rainfall. Only at isolated places is this less than 75 inches in the year, the minimum for the growth of tropical forests. The usual fall is 160—180 inches. In the north of Central Java as much as 360 inches a year has been recorded.

The situation between Asia and Australia causes a climate affected by the monsoons, the result of which is that, during our summer, dry winds from the east and southeast prevail and, during our winter, winds from the west and northwest with a rainy season predominate, in our spring and autumn, winds form a transition.

The dry monsoon is strongest in the southeast, Timor and the adjoining islands have six or more months of drought each year, for which the winds from Australia are responsible. In the north and west this dryness of the wind is more or less alleviated by the greater breadth of the sea crossed and the vapours which the heat raises from it. The Moluccas, Celebes, Borneo, Java, and Sumatra thus feel this drought less and are more suitable for intensive agriculture throughout the year. Central and Northern Sumatra lie outside the monsoon area. The characteristic tropical temperature of about 27° C. with only slight variations in a day or year of ±5° prevails only in the plains. In western Java at a height of 1800 feet it is much lower (23°) and shows greater variations and thus we have a subtropical climate. The cultivation of tea, coffee, Chinese and European vegetables is possible here. In other countries the transition varies more rapidly, for example on Borneo. These climatic conditions have favoured the growth of tropical forests, which must originally have covered the Greater Sunda Islands entirely, till man destroyed them, almost entirely on Java, in part on Sumatra, and only to a small extent in Borneo. Even at the beginning of our era mention is made of the products of the Sumatra bush, such as camphor and benzoic. In the last 60 years the great demand in Europe for products like rubber, gutta-percha, rotan etc., has resulted in an economic revolution through the increased prosperity of the native population on Sumatra and Borneo.

The flora of the southeast on the other hand is of a prairie and savannah nature. Sandalwood has from ancient times been an important article of export here. The flora and fauna of these islands are predominantly determined by the proximity of Asia in the west and Australia and New Guinea in the east. The connections by land between Asia and the Great Sunda Islands existed for a long time, and Asiatic animals and plants were thus able to spread over them. There were also connections by land with Australia and New Guinea in the east, so that their plants and animals are
now found farther west on the Moluccas, etc. These alone have thus become the home of species like nutmegs and cloves. Of Asiatic animals the tiger is found on Borneo, Java, and Bali, the elephant on Sumatra, the tapir on Sumatra and Java, monkeys on Sumatra, Borneo, and Java, only one kind on Celebes, and none farther east. Wild cattle are found in the woods of Sumatra, Java, and Borneo and Bali. On the other hand, the Moluccas possess no genuine mammals, but only the Australian marsupials, of which two kinds are found as far westwards as Celebes. One also finds the birds of the east even on this island, such as parrots and cockatoos, only the cassowaries and birds of paradise are not found till farther east. Thus these two opposite worlds have penetrated the archipelago somewhat disproportionately.

Population: The population of the Dutch Indies, numbering at present 44 millions belongs, with the exception of the Papians of New Guinea and the surrounding region and isolated remnants of an earlier Vedda people, like the Toala in Celebes, to the Malay-Polynesian race which spread from Madagascar to Easter Island and from South Japan to Java. The archipelages between Celebes and New Guinea with the eastern Little Sunda Islands are inhabited by a cross between Malays and Papuans which is known as the Alfurs. The Malay type is only found in the interior of Sumatra, Borneo, and Celebes, still comparatively pure. South eastern Asia has been indicated as the home of the Malays. Linguistically they seem still to have left traces in the south of British India. If one remembers that the Polynesians must also have been present in their present distribution the Malay Archipelago and that even Pitoeomy mentions the man-eating Batak of North Sumatra, it is clear that present conditions must be the results of thousands of years of migrations. In addition to the powerful influence of foreign peoples who arrived in later times and the influence of surrounding peoples, this affords an explanation of the complicated conditions in the varied population of these islands. Two groups are distinguished among the Malays of the Archipelago in older times. The archipelagoes between Celebes and Borneo is the type of the attack, the Fijians, the Balinese, and the coast peoples of the Moluccas. The Makassars and the Buginese are supposed to be Torajans greatly mixed with Bornean Java. The present Minahassas are Torajans who have been educated by Christianity during the last 70 years. The Alfurs include the inland tribes of Halmahera and the neighbourhood, of Buru and Ceram and the adjoining small islands, of Timor, Flores, Sumba, and Sumbawa. The Buginese, who have been seafarers for centuries, have contributed a great deal to the admixture of the coast peoples of the whole Archipelago.

All these peoples are for the most part settled agriculturists; on the great rivers and on the seashore however the Malays prefer to fish and trade (previously they were also pirates). The people of the Archipelago as a rule only work when necessity drives them. They often appear lazy to us on account of their slight wants and the conditions of tropical life. The original Malays, like the Batakas, Dayaks, and Torajans, as well as the Alfurs and Papuans show a state of society broken up into very many small tribes. Each tribe forms a separate social unit, which as a result of war, feuds, or mistrust is only rarely on constant terms of intercourse with its neighbours and thus develops independently. The result is a great variety of languages, manners, and customs.

The patriarchal constitution of these tribes frequently includes a ruling family, freemen, and slaves. In the east among the Papuans and related tribes there appear to be no chiefs. Among the Malays they are chosen from the ruling family, most frequently the eldest son; if necessity arises, a daughter may be chosen. They manage the affairs of the tribe with the elders. The slaves (slavery is now abolished) usually come from prisoners of war or are slaves through debt. They are frequently considered the property of the tribe and then are allotted to the chiefs. They are well treated and often enter the ranks of the freedmen through marriage. They were rarely sold. For human sacrifices prisoners of war were used or men infirm through old age, who were purchased from the coast Malays. Slavery is now the exception even among the most remote tribes.

The density of this older stratum, including the Alfurs and Papuans, is very slight, from 3 to 4 per square mile. As the birth rate is not small, the main causes of the sparseness of population are the terrible devastations wrought by such illnesses as malaria, cholera, dysentery, by crossing the Malay Archipelago and that even Pitoeomy mentions the man-eating Batak of North Sumatra, it is clear that present conditions must be the results of thousands of years of migrations. In addition to the powerful influence of foreign peoples who arrived in later times and the influence of surrounding peoples, this affords an explanation of the complicated conditions in the varied population of these islands. Two groups are distinguished among the Malays of the Archipelago in older times. The archipelagoes between Celebes and Borneo is the type of the attack, the Fijians, the Balinese, and the coast peoples of the Moluccas. The Makassars and the Buginese are supposed to be Torajans greatly mixed with Bornean Java. The present Minahassas are Torajans who have been educated by Christianity during the last 70 years. The Alfurs include the inland tribes of Halmahera and the neighbourhood, of Buru and Ceram and the adjoining small islands, of Timor, Flores, Sumba, and Sumbawa. The Buginese, who have been seafarers for centuries, have contributed a great deal to the admixture of the coast peoples of the whole Archipelago.

All these peoples are for the most part settled agriculturists; on the great rivers and on the seashore however the Malays prefer to fish and trade (previously they were also pirates). The people of the Archipelago as a rule only work when necessity drives them. They often appear lazy to us on account of their slight wants and the conditions of tropical life. The original Malays, like the Batakas, Dayaks, and Torajans, as well as the Alfurs and Papuans show a state of society broken up into very many small tribes. Each tribe forms a separate social unit, which as a result of war, feuds, or mistrust is only rarely on constant terms of intercourse with its neighbours and thus develops independently. The result is a great variety of languages, manners, and customs.
their development can hardly be overestimated.

Among these heathen peoples are still parts of the Bataks, Dayaks, and Toradjas, and almost all the Alfurs and Papuans.

The above rather detailed sketch of this old Malay population is important, just because we are probably not wrong in thinking that the whole population of the Archipelago at the beginning of our era was so constituted. But then began the overwhelming influence of Hinduism.

During the reign of the Emperor Augustus, pepper, cloves, and nutmegs were sent to Rome via the Red Sea, as Pliny mentions. The trade routes between southern Asia and the archipelago were thus known. Ptolemy in his Geography gives a whole series of names which refer to this Archipelago. He knows the name of the harbour of Pamsur at Baros, from which the Sumatra camphor was exported and he also knows of the mangat Batak of North Sumatra.

We can thus conclude that even then the influence of the Hindu trading peoples must have made itself felt in the Archipelago. We also here find an explanation of the stories of the Buddhist monk Fa-hien, who landed in Java in 412 A.D. on his return voyage from Ceylon to China, remained five months there, and clearly found a Brahman society there but no Chinese and very few Buddhists. Several kingdoms of Sumatra, Java, and Borneo are mentioned at later dates in the Chinese annals. According to an inscription in the modern Kedu, in Central Java, Civaism prevailed there in the Čaka year 654 = 732 A.D. Soon afterwards we find the Malayana there and, as numerous temples and inscriptions prove, both religions continued peacefully beside one another on the island for several centuries till about the end of the Hindu period in the Archipelago, about 1500 A.D. These ruins have been found on Sumatra, Java, the coast of Borneo, Southern Celebes and the Lesser Sundas Islands, although they are by far the most numerous on Java. Besides these proofs of the earlier influence of Hinduism the modern languages, by their scripts and vocabularies give evidence of its spread at an earlier period. The alphabets used by the modern Javanese, Batak, South Sumatrans, Balinese, Makassars, and Buginese are derived from Hindu alphabets and there are many Indian words in the languages of these peoples. There are many remnants of Hindu culture in manners and customs also.

Java [q.v.] was certainly the centre of Hindu rule and from this island Hindu influence for the longest period made itself felt in the Archipelago. If one remembers how much higher the civilization of the Hindu was than that above described of the Malay peoples, one can understand that, during the period of over a thousand years when Hinduism prevailed, a great change must have taken place in the conditions of life in the Archipelago. This was very marked in the political field also; despotic kingdoms arose out of the disconnected patriarchal tribes, such as the Europeans found in Sumatra, Java, the coasts of Borneo, southern Celebes, and in Bali and Lombok, and among the Malys further east also. At that period also arose the division into castes which is still found on Bali and Lombok and the effects of which can still be traced in Java.

In the economic field, agriculture, shipping, commerce, and industry developed. The introduction of writing must have given a great incentive to progress. What a permanent advance was made by these alterations in the Archipelago is shown by the height of development of these peoples, whose density of population is also much greater (up to 120 per sq. mile).

The influence of Hinduism on religion assumed a very peculiar form. We have discussed above the characteristic features that animism possesses in the Archipelago and what a crippling influence it has had upon the conditions of life of the Malay, Alfur, and Papuan populations. If one remembers how much higher are the ideas and philosophies underlying the Indian religions, one expects that these would have considerably altered the views of the Malays of the Archipelago. But the actual facts are quite different. As already mentioned, their mental attitude is, generally speaking, determined by their animistic ideas and even the most educated peoples, like the Javanese, are still much influenced by the belief in pêmati and omens. The peculiar social institutions of the Hindus are probably the main cause of this. What we admire as the highest in the religions of India was and is only the property of the highest castes. The masses of the present Hindu peoples have by no means lost their animistic beliefs. It was presumably not the most educated classes in the Brahman and Buddhist kingdoms that undertook as merchants the dangerous journeys to the Indian Archipelago and settled there. It would hardly be possible for these colonists radically to transform the popular beliefs. In the powerful Hindu kingdoms of Java and the other islands of a later date the great religious problems were no doubt studied as in the mother country, but probably only among the priests, and the masses were little affected therein.

The people of British India also had too little insight into the relations of the phenomena of nature to be able to destroy animistic beliefs to any considerable extent. They were as little able to do so after the introduction of Islám.

Although the religious beliefs were little influenced, the ceremonial and vocabulary of religion were transformed during the Hindu period. Among the above-mentioned peoples who were most subjected to this influence the animistic gods and spirits are given Hindu names, as will be shown below in reference to Java. The manner of worship of this world of spirits also exhibits many Indian forms. What form spiritual conditions in the Hindu kingdoms of the Archipelago took can best be seen in the islands of Bali [q.v.] and Lombok, which are still Hindu.

Islám. When the natives of British India in part became converts to Islam, it's influence also spread in the Archipelago through the merchants who visited these islands and settled on them, at least during a monsoon or longer, and often married a native wife, who had first of all to adopt Islám, and thus a considerable influence over her family and tribe was gained. Among the simple peasants of the country the far travelled, experienced strangers enjoyed a certain prestige, which even now contributes a great deal to the spread of Islám in pagan countries. To become one of these men has a great attraction for the heathen and this makes it easy for him to adopt Islám. This was true in a less degree of the Hindu Malays and they therefore were not so affected by Muhammadan influences as the pagan Malays.
We know little that is certain of the beginning of this movement. Unfortunately the Malay and Javanese historians are little trustworthy and thus the accounts by Marco Polo (end of the xiiith century) and of Ibn Batûtah [q. v.] (middle of the xivth century) of the Muslim kingdom of Pasei on the north coast of Sumatra form the first reliable material to go upon. Islam spread rapidly along the east coast of Sumatra, for in the second half of the xivth century Indragiri and Djambi are said to have been vassal states of Malacca. In 1377 Palembang was regained by the Hindu Javanese. The interior remained for long pagan and in parts is so still. It was probably due to the power of the Hindu Menangkabau kingdom on the west coast that Islam here met with more continued resistance, which was first broken from Atjeh. Not till the xvith century did the conversion of the south coast of Sumatra begin and that of the interior only in the xvith century. The people in the mountains of Palembang are still little affected by Islam.

Native traditions give us no exact data for the spread of Islam in the island of Java. But we know from European sources that the great trading centres of the north coast like Djapara, Tuban, Grêsik, and Surabaya at first formed principalities half or entirely independent of the Hindu kingdom of Majapahit, and that in the first half of the xvith century, in alliance with the prince of Dèmes, they took the capital Majapahit. It was not till then that the considerable kingdom of Dèmes was founded and later that of Pajau and finally that of Mataram. By the conquest of these kingdoms the conversion of the whole island to Islam made rapid progress.

Beside these secular states the princes of Giri at Grêsik long held power which was based on religious prestige.

Soon after the fall of Majapahit a powerful movement in favour of Islam began on western Java of which we have fairly reliable accounts from the Portugese de Barros, Pinto, and Couto. In the then Hindu kingdom of Padjadjaran Muslims must have been long settled. The first foundation of a Muslim kingdom there was however the result of the efforts of a scholar from Pasei, who is now called Sunan Gunung Djati from his tomb at Tjirebon. He left his native town of Pasei in 1521 to study for three years in Mecca. He afterwards arrived in Djapara in Central Java and preached here with such success that he was allowed to marry a sister of the king of Dèmes. He then went to Bantên in West Java, converted the governor here and with the help of Demak gained the political power here also and in 1527 took Sunda Kalapa, the modern Batavia, from the king of Padjadjaran. This kingdom of Padjadjaran still existed in the interior, when he migrated to Tjirebon about 1546 and he must have died there about 1570. His grave on Gunung Djati is still highly venerated. He is also one of the eight or nine walis who, according to native tradition, spread Islam over Java. His son Hasanuddin (Hasan al-Din) was the ancestor of the princes of Bantên [q. v.] and lived till about 1570. His son Yusup (Yusuf) succeeded about 1570 in capturing Pekuan, the capital of Padjadjaran.

At the present day the native population of Java, numbering 33,000,000, is Muslim. The only exception is formed by Christians (about 10,000) and the two little hill peoples of the Badui in the west and the Tengèrese in the east who have remained faithful to the pre-Muhammadan tradition. The latter however frequently become converts to Islam.

On the island of Borneo [q. v.] the population of the west coast seems to have been converted from Palembang; on the south coast, on the Barito, probably from Java. The whole Malay population on the coasts and the great rivers is now Muslim and makes many converts among the still pagan Dayak tribes of the interior.

On the island of Celebes [q. v.] there are in the south the Muslim Makassars and the Buginese who were not converted till later. At the beginning of the xvith century their conversion began in Tello and Goa. They are all enthusiastic Muslims and have done much to spread their religion among the distant coast peoples of the east by their trading journeys and colonies. The Lesser Sunda Islands, Sumbawa and West Flores, which were formerly dependent on Goa, have certainly abandoned paganism through its influence.

The Moluccas in the north east of the Archipelago along with the sultanates of Ternate and Timor adopted Islam very early, as a result of the spread of Islam by Muhammedan traders. This was the centre of the spice trade which attracted foreign traders so much. Under their influence Zainalabdin (Zain al-Abidin), prince of Ternate, who ascended the throne in 1486, was converted, and also Prince Tjiliani of Timor who reigned from 1495. They are called the first sulţans of their kingdoms, the second under the name of Djimaluddin.

The Altur tribes in the interior of the larger islands like Halmahera, Buru, Ceram, the Kei and Aru Archipelagoes, and Timor have remained heathen. Islam has only made little progress among the coast population of New Guinea.

The number of Muslims in the Archipelago is about 35 millions (in 1905, 35,034,025 of whom 29,603,653 were in Java), but they observe the precepts of their religions in very different ways. As is clear from the dates above given, Islam was introduced here when its system was already fully developed. Its characteristic features among these peoples took shape according to the country, British India, from which merchants or adventurers had contributed most to its spread. In British India Islam had already adapted itself to Hinduism and was thus all the more easily adaptable to the altered Hinduism of Java and Sumatra. The popular legends of the times of the Prophet and his first successors are modelled on those of India. In these tales as in individual customs of the Indonesian Muslims one can observe traces of the influence of the Shâafs just as on the coasts of Malabar and Coromandel, where, as in the Indian Archipelago, in other respects the Sunni, orthodox rite is followed, and in legal interpretation the Shâafî school. Here as there, there is also a great love of mysticism, which among the more highly developed assumes a pantheistic form and among the lower classes is mixed with the strongest superstition.

The by no means slight influence of the Arabs was the result, not the cause of the conversion of the Malays in the Archipelago. Intercourse with the sacred cities Mecca and Medina increased steadily from the xvith century and a continually increasing number of young men remained there to

THE ENCYCLOPAEDIA OF ISLAM, II.

32
study. These and the Arabs who migrate to India from the poor district of Ḥadramawt [q. v.] often protest against the customs and ideas introduced from India.

As in other countries, İslâm has here also adapted itself in a high degree to the views of the converts and therefore possesses several curious features. The mosque and its personnel forms even more than in other lands the centre of influence of this religion on the whole life of the people. There are Friday mosques in the more important places in Java, in Atjeh, and Central Sumatra: in the Malay districts of Borneo only in the chief towns, and among the Makassars and Buginese only in the capitals of the many principalities. In the east of the Archipelago they are rare. Smaller mosques in Java, Central Sumatra, and in Atjeh are fairly common. Only a small minority perform the şalâ there; on the other hand, a considerable assembly takes place during the two official festivals of İslâm (see ʿĪḍ al-ʿAḍḥā and ʿĪḍ al-Fīṭr). The structure of the East Indian mosques is characterised by a broken roof which consists of two or four small roofs one above the other, crowned by a separate pinnacle. Only few of the largest mosques have minarets. The muʿādhdhin (outside Java frequently called biṭāl) sings his call to divine worship from this broken roof, but previously it is vigorously announced by the beating of a long wooden drum (ḥodug or ṭabuh).

The personnel of a mosque consists of at least four men: an imām, a khatīb (Jav. kētīp), a biṭāl, and a servant. There may however be as many as forty or even more. In the Dutch Indies these officials are not clergy any more than in other countries. In Java however they often carry out the duties of a kāḍī (Jav. kālī) and perform wedding ceremonies, as they alone have the necessary qualifications. The outer gallery of the mosque (surauhini) therefore becomes a court house for the settlement of all quarrels that are decided in these countries by religious law. In Java these include questions of marriage, family law and inheritance; the pengkutu or chief of the mosque for this purpose sits with some qualified members of his staff, often on Thursdays. In 1882 the Dutch government regulated by law the pengkutu courts and made them courts of justice (Priister-raden) with three to eight members.

These courts have in most cases to deal with complaints by women of insufficient attention or bad treatment from their husbands or to give official sanction to a request of a woman for divorce as a result of a previously pronounced conditional ʿaḍb (taʿlīk) [q. v.]. The Muslims of Indonesia have adopted the principle of a conditional ʿaḍb as a corrective against the too great dependence of women according to Muslim law. In Java, Madura, and other islands it is a regular custom for the husband immediately after the marriage ceremony to secure for his wife the dissolution of the marriage by taʿlīk in case he should not fulfill the obligations of a good husband. Only in the matriarchal people of Menagakabau and among the Achnsh is this conditional ʿaḍb not the custom, as the women there do not leave their family after marriage and remain more independent.

All that is acquired during marriage is in Java considered the joint property of the couple. On divorce therefore disputes as to its division thus frequently come before the Priisterraden. In cases of inheritance law the judges frequently demand 10% of the estate. Wasiyy property is administered by these judges and quarrels about it settled by them. They appoint guardians for minors. They also appear as waali's at the weddings of women who have not a waali available among their blood-relations.

The zakāt (Jav. Mal. djakat) to the Muḥam-madans of the Indies means principally the handing over of the tithe of the harvest of rice and similar fruits of the fields. Only in the Sunda countries (West-Java), Atjeh, Palembang, and some other districts of Sumatra do we find a kind of official collector. These however exercise no rights of compulsion regarding the collection. In other countries this religious duty is either entirely neglected or its fulfilment depends entirely on the degree of piety in the individual. Under various pretexts the staff of the mosque is able to get a considerable portion of the yield for themselves. Where the zakāt is delivered without an official collection, it is given by the pious to honoured scholars etc. At the time of the Atjeh war a considerable portion of the zakāt was expended on the "holy war".

The payment of zakāt al-firād, the small poll tax ordered by law to be paid at the conclusion of the fast, is fairly general. It has practically assumed the character of a free-will offering.

The observance of the five daily şalâs varies considerably with place and time. In West-Java and South-east Borneo for example there are districts where almost every one of these services is regularly held. In Central Java and Atjeh they are neglected by the majority and those who observe them faithfully and at the same time refrain from the popular amusements banned by İslâm, such as gamlān, wayang, dancing, sadaṭ performances etc.) are given special names (wong putih, lebe, ontri) and distinguished from the great mass of the people (wong abangan, bangsat).

The fast of Ramadān (puasa) is more widely observed. The festivals at the end of it are celebrated as the most important of the year and regarded by Europeans as the Muḥam-madan New Year. The ḥajji is very eagerly performed by the people of the Archipelago; in the last years (about 1913) the number of pilgrims was 20—30,000. These usually leave officially appointed harbours by European steamers for Djidda and return the same way. Of these multitudes, several young men always settle in Mecca for some years to devote themselves to religious studies. They form the Djawa colony there (about 7000 souls in 1914) and at their return home form the link which binds international Muḥam-madan culture with that of their native land.

The main characteristics in their religion or their conversion are considered by the Muslim natives to be circumcision and abstention from pork or alcohol. Of all religious duties these are the ones most punctiliously observed.

Elementary religious instruction (recitation of the Qurān and possibly practice in the ʿaḍb) is given by the village "priests" or by other teachers. In many districts only a small number of boys and a still smaller number of girls receive this instruction.

In the larger centres of population there are scholars, who introduce pupils to a knowledge of Muslim learning in the mosque, in their own houses, or in a special building. The great reputation
of such a guru induces many young people from far and near to settle for a considerable time in his neighbourhood. Characteristic however are the institutes on their own ground, which so to speak form separate villages, where students from various districts live together to devote themselves to study under the direction of one or more gurus'. In Java these institutions are called pésantren (i.e. abodes of santri). They consist of the houses of the gurus' with their families, and of pondok's or buildings, which are divided into two parts by a passage down the centre. Each of these consists of a row of cells, which serve as sleeping rooms and also as studies for two or more boys. The whole institute with its buildings and estates is often a foundation (wafiat) by pious people; in Central Java there are frequently villages which were freed by former rulers from taxation, etc., and emancipated from all authority of the usual chiefs and dedicated as perdikan-lewa's exclusively to places of religious study.

In Atjeh such institutions are called rangkang, in Central Java surau. Their organisation shows some differences from that of the pésantren. In all these schools the young native Muslims are more or less initiated into the well known medieaval cycle of Muslim learning: law, religion, and mysticism. The manuals used are the authoritatively accepted texts, which are translated from Arabic into a native language or read in the original itself. Advanced pupils also apply themselves to Kur'ánic exegesis, the sacred traditions, and their explanation, the theory of jurisprudence, etc. The period of study lasts from two to ten or more years, according to the goal aimed at by the santri. Those who study for a long time go from one pésantren to another to hear various distinguished scholars. In the country itself the more talented among them can make great progress in learning, but the greatest fortune that can befall the seeker after knowledge is to study in Mecca.

The Muslims of the Dutch Indies reverence the international saints of Islam known to them. The main objects of their pilgrimages and vows however are their wafiat's, to whom is ascribed the introduction of their religion in their region. In Java they are the eight or nine wafiat's of the old trading-towns of the north coast, where the foreign Muslim merchants settled who first converted the native population in their neighbourhood. They also believe in patron saints of certain places and of certain spheres of daily life and, in opposition to the convictions of the educated believers, in trees, stones etc. being tenanted by spirits. There are also individuals who are worshipped as karuma, wonder-workers. Saiyids and ghā rigorous reap advantages from these beliefs of the credulous multitude. No East Indian Muslim can conduct his affairs without the help of saints. The curing of a dear relative who is ill, the winning of the love of a woman, the blessing of getting children, protection of the harvest against insects, success of a son in a school examination, promotion of a native official to a higher post, appointment of a prince as heir apparent, all these and similar fortunate events are hoped for through the favour of saints and their intervention with Allah, who is Himself enthroned too high to be directly approached with such requests. These often take the form of a conditional vow (nadar, kaul, niyāt, etc.). When a wish is fulfilled, the tomb of the saint is visited and recitations of the Kur'ān held, or a sacrificial animal is killed there, or a feast given or something else done which is known to be specially pleasing to the saints or some particular saint. The simple villager often promises something which he himself estoons very highly but which must be repulsive to the Muslim saint, such as the performance of a wazyān. How much saints' graves were venerated in olden times in Java is seen from the fact that former rulers have freed certain villages from other burdens in return for the maintenance of these aśān's (āshān) villages.

From the earliest times the East Indian Muslims thought more of mysticism than the law, more of religious contemplation than of the fulfilment of ritual duties. The influence of Hinduism as well as the fact that it was Indians who sowed the first seeds of Islam favoured this tendency. In the tradition, frequently expressed in poetical language, of the eight or nine wafiat's of Java, pantheistic mystical sayings are attributed to some of them, and in the Malay poems of Hamaa of Baros, whose doctrines won many adherents in the xvith century in North Sumatra and formed the subject of lively discussions at the court of Atjeh, the relation of man to God is described in erotic metaphors. In later times the influence of Mecca and Haḍramawt there was an increasing reaction on the part of orthodoxy against these heretical doctrines but this could not prevent works like the "Book of the Perfect Man" by 'Abd al-Ḳāsim al-Diji (see Al-Insān al-Kāmil) continuing to be zealously read by a wide circle. Religiously inclined Javanese usually enter all kinds of quotations in private notebooks (primbon's in Java) which they consider suitable for the guidance of their daily life. Among these, pantheistic or even nihilistically coloured sayings are particularly common. Such wisdom is particularly in vogue under such names as limu kaḥīrat (doctrine of the highest reality), "doctrine of the seven degrees of being", limu saḥī, "doctrine of the sand from the path to reality. Half educated people content themselves with learning some formulae by heart with a kind of mystic catechism. Illiterates carry as amulets mystic figures with such sentences on them (daerāh's, from the Arabic daʾira, circle).

Of the mystical orders (farījāh's) the Shāṭariya gained the most adherents in Indonesia in the xvith.-xvith centuries. It had then prominent representatives in Medina. It has since almost disappeared in the rest of the world of Islam, but still has many followers in the East Indies. Here it has adopted many heretical elements from popular beliefs. In later times the Kādiriya, Nāṣhini-bandiya, Shāhidiya, etc. through Meccan influence attained considerable prestige. The Shāṭariya with their noisy dīkh exercises spread among the lower classes and resulted in the rise of popular amusements like the Atjeh sādāt performance, which look like a caricature of the dīkh.

Ethical mysticism of the type best represented by al-Ghazzali [q.v.] is also zealously studied in the Indies among such circles as lay particular stress on strict observance of religious law and on dogmatic orthodoxy.

The Chinese, Arabs, and Europeans also later found their way to this archipelago with its varied products. The Chinese probably traded with the Archipelago from the ivith century. If one may judge
from present conditions, in addition to the traders, the poorest young men from South China emigrated to the Indies to make a living by their work and trade and often married native women. From them is descended the mixed Chinese population of the Archipelago, often prosperous and economically very important on account of their industry and thrift. As these half-caste Chinese people retain the manners and customs of their fathers they do not become merged in the Malays. With the more recent immigrants, some 600,000 in number, they are now settled far into the interior of the greater islands, and in the important places on the coast, following their industry and commerce. Of the present immigrant Chinese see Sumatra. The Arabs also, mainly from Hadramaut, go to the Dutch Indies to earn money. Clever and enterprising they rely, with much success in their relations with the Malay Muslims, on their religion and nationality, especially if they can call themselves Sherif or Saayid. Although, like the Chinese, they often become well to do and return home, they leave behind them their families from native wives, which however show a greater inclination in the end to merge in the native population. Prominent Arab scholars from Mecca and Medina also visit the islands occasionally, and so the courts, sometimes remaining a long time, and certainly contribute to strengthen Arab influence, but on account of their slight numbers cannot be considered an important element in the population. The Arabs in the Archipelago are estimated at about 31,000.

Europeans. Of the foreigners the ruling Dutch are economically the most important. With isolated other Europeans they control the wholesale trade, the working of the plantations, and industry. Shortly before conquering Malacca in 1511 the Portuguese had reached this Archipelago and went in the following years to the Spice islands, where they made conquests, carried on trade, and endeavoured to spread their religion. Their enemies, the Spaniards, who had reached the Moluccas from the east, soon retired to the Northern Philippines again.

Towards the end of the xvith century several European nations succeeded in reaching these islands. In 1594 the English, in 1596 the Dutch, and later the French, Danes, and Swedes with their armed ships came to the ports of North and East Sumatra, the north coast of Java, and the Moluccas to obtain spices, precious metals, and other products, which had previously been the monopoly of the Portuguese, Chinese, and Southern Asians.

The very many small Dutch societies for trading with the Indies united in 1602 into the "Geen-troyeerde Oost-Indische Compagnie" with a capital of 6,000,000 guilders. During the xvith century this trading company extended its political power and influence, besides its trade from Africa to Japan, over the Southern Asiatic coasts and the East Indian Archipelago and maintained its position till the end of the xvith century. The competition of the other European nations, the feuds and quarrels in and between the various native states, and its rigid monopoly system soon forced the company continually to conquer more territory, and the resultant costs of administration and war contributed largely to the fact that they were forced in 1800 to hand over their possessions and their burdens of debt to the Dutch government. Their rule then extended to the coast regions of the larger and entirely over many smaller islands. Their relations to the native population consisted almost entirely simply of contracts and trading agreements with the native chiefs for the monopoly of exports and imports. The European influence on the masses of the people was thus very small. During the Napoleonic wars, when the Dutch lost their independence, the English conquered their Indian possessions, but these were returned at the Congress of Vienna as far as they were situated in the East Indian Archipelago. In the sixteenth century and at the beginning of the xvith all the greater islands were considered right to the Dutch and the influence of the Europeans on the natives thus increased. This is best seen on the island of Java which has always been the centre of Dutch authority.

The Queen of the Netherlands possesses executive power with regard to the Dutch Indies and partly independently and partly in combination with the "Staten-Generaal" in the Hague, the legislative authority. The Indian budget of expenditure (366 million guilders in 1916) is fixed by the Queen in combination with the "Staten-Generaal". The Dutch minister of the Colonies takes upon himself the responsibility of the Queen. A Governor-General represents the Queen in the Indies. He also has legislative power in certain circumstances. In the exercise of his great power he is more or less dependent on the cooperation of the "Raad van Indië", a council of five officials of high rank. Under these authorities appointed by the Queen, seven directors, a commander of the army and a chief of the navy with their nine departments carry on the ordinary business of administration. The "Algemeene Rekenkamer", which controls finance, has, like the others, its seat in Batavia. The Dutch Indies are divided into 34 residencies and 3 governments which are under residents and governors. There are 17 of the former in Java. Under these higher civilian officials are assistant residents, controllers, and deputy controllers, all Europeans. The Indian volunteer army consists of about 12,000 Europeans and about 23,000 natives under 1350 Europeans and a few native officers. The Dutch Indies has a navy of its own of small ships and the battle ships of the motherland are detached there.

Besides the area directly governed there are about 300 native principalities which enjoy a certain amount of independence but are otherwise entirely subject to the Dutch government.

This firm government conducted on European lines secures the natives important advantages in contrast to their previous conditions. There are no longer civil or foreign wars, and the exploitation of the masses by the native princes and nobles is very much limited. Among the primitive tribes there is now security of life and property. Trade and commerce have increased everywhere as a result of this security, and necessities of life such as fabrics, crude metals, salt, tobacco, etc., are imported into the interior of the islands much cheaper than formerly. While formerly nothing was done against the terrible tropical diseases, they are now combatted in many ways, although still to an insufficient extent. The Dutch government is as a rule neutral in matters of religion. The often enormous increase in population, for example in Java excluding immigration, from 4 to 5 mil-
lions in 1812 to 30 millions in 1905, is to be ascribed to these circumstances as well as to native customs such as early and general marriage.

The economic development which these colonies have undergone in the last 50 years through the cultivation of products for the world market is of great importance also for the native population. In 1914 the exports of sugar amounted to 185 million guilders, of tobacco 6 million, copra 48 million, coffee 22 million, tea 27 million, rubber 28 million, pepper 11 million. Certain mining districts also yield important products like petroleum (exports 53 million guilders), tin (30 million), anthracite, gold etc.

*Bibliography*:
The literature on the Dutch East Indies in general and its various parts forms a great library. Only the following works may be mentioned here.

**INDJIL** or *Anjil* is corrupted from *λογγίλον*, gospel. From the Kur'an as well as from numerous authors we see that the Muslims had a certain knowledge of the Gospels. It is easy to show with the help of a few quotations the extent of this knowledge. On the other hand, it is often difficult to define positively and not merely by way of induction how this knowledge was obtained. Some of it was certainly obtained orally in controversies or friendly conversations between Christians and Muslims. But this method of transmission for the most part lacks historical record. There were also reminiscences of Christianity which were brought in by Christians converted to Islam. A similar Christian influence made itself felt on the rise of Sufism, in the teachings of which traces of Christianity can be clearly seen (cf. the writer's, *Gaulil, Paris 1902*). Finally, one may certainly assume that there were Muslim seekers after knowledge among the Arabs who read Arabic translations of the Gospels made by Christians. We therefore here give a brief survey of what can be known about these translations, followed by some instances of recollections of the New Testament in the Kur'an or the writings of various writers.

The Christian Arabs translated the Gospels from the Greek, Syrian, or Coptic. The translation from the Greek took place very early, as is shown by the great antiquity of the manuscripts (Vatican,
Arab. 13, and Museo Borgiano-Propaganda), which date back to the viii\textsuperscript{th} century a. d. According to Barhebraeus, there was a still older translation made between 631 and 640 by the Monophysite patriarch Johannes by order of an Arab prince, 'Amr b. Sa'd.

George, Bishop of the Arab tribes of Mesopotamia, a friend and contemporary of James of Edessa, wrote scholia on the Holy Scriptures; Sprenger (Das Leben des Mohammed, i. 131 sq.) even thought he could recognise in a passage in Muḥammad b. Ishāq (ed. Wüstenfeld, p. 149 sq.) a fragment of a pre-Islamic translation. This fragment contains the verses 23–27 of John XV. The word al-m-n-b-minā, by which μανήματος is translated, is neither Arabic nor Syriac but Palestinian and rather old. But even if so great an age cannot be given them, in any case the first translations from the Greek are hardly later than the Muslim conquest and the spread of the Arabic language, which followed it.

A likewise very old translation from the Syriac exists in a Leipzig ms.; according to Gildemeister's investigations (De Evangelis, p. 35), it must have been made between 750 and 850 a. d. The Muslims were thus able to become acquainted with the principal books of the New Testament at quite an early date through direct reading of Arabic translations.

Besides the canonical gospels we possess Arabic recensions of the following New Testament apocrypha: the gospel of the Childhood, Protoevangelium of James, Apocalypse of Paul, a sermon by Peter, and one by Simon, a Martyrdom of James, and of Simon, as well as a small number of others, which do not appear to have been known in Muhammadan circles. R. Duval, La Littérature Syrienne, Paris 1899, p. 96, mentions an Apocalypse of Peter which, according to him, is an Arabic compilation of the xii\textsuperscript{th} century.

Muḥammad was less acquainted with the canonical gospels than with the apocryphal. He did not obtain his knowledge from purely Christian sources, but must have obtained it orally from Christian Jews. This is shown by the kind of legend preserved in the Kurān. They must have taken them from those whom Muḥammad calls hāniṣ's (see HANIS) who traced their religion to Abraham. This question however is only a particular case of the more general question of the origin and sources of Islām.

Poetry is also one of the ways by which Christian ideas found their way among Muslims. At the time of the rise of Islām poets were fond of visiting Hīra [q. v.], where they were on friendly terms with Christian Arabs. They then related in Arabia the legends which they had heard in the wine booths in Hīra. Among these poets are mentioned Zaid b. 'Amr b. Nufail and Umaiya b. Abi 'I-Salt, of whom the latter was particularly well versed in Jewish legends also. Poetry thus formed for a fairly long time a link between Muslims and Christians. We know with what favour the Christian poet al-Akhbāl [q. v.] was received at the court of the Omayyads. Medicine and administration also led to much intercourse between the two religions.

We need only recall the names of Sergius Manṣūr, secretary to four caliphs and father of John of Damascus, and the numerous Christian clerks who were employed by the Muslim government, as is evidenced by the order made by 'Abd al-Malik forbidding them to keep their books in Greek. But let us come back to the Kurān.

Jesus, Mary, and the Greek are frequently mentioned in the Kurān, and Muḥammad knows the essential difference between the Gospel and the Kurān regarding morals, namely compassion and mercy (liv. 27), how he knew to some extent the parable of the sower (xlvi. 29) and the promise of another messenger of God (xvi. 156, cf. xvi. 17). He is also aware that the Gospel is put forward as a confirmation of the Pentateuch (v. 50). Of the miracles of Jesus he mentions the healing of the blind and of the leper as well as the raising from the dead.

The most popular tradition in those circles from which the Prophet obtained his knowledge, seems to have been that of the Annunciation. "He has chosen thee among women" the angel says to Mary in Kurān, li. 37 (cf. Luke i. 28). He likewise adopts the virgin birth of Jesus (xxi. 91). When the crucifixion is denied in Kurān (iv. 156 and iii. 47), he is following the view of the Christian sect of the Docetists. The brief mention of ascension brings the life of Jesus to a conclusion at the moment when, according to the Gospels, the Passion should begin (cf. al-Zamakhshari, ed. Lees, i. 169, where a tradition of Ibn 'Abīs is quoted). The calling of the apostles is distinctly mentioned (iii. 45–46). The institution of monoamiction is connected with this as in the work of the Ikhwān al-Saḥāfa [q. v.]. A miracle in the Acts of the Apostles finds mention in the Kurān: Jesus lets down from heaven a covered table for the apostles (v. 112–115; cf. Acts, x. 9 sqq.). The story that Jesus miraculously gave life to a clay bird (iii. 43; v. 110) is taken from the Gospel of the Childhood. The name "second Adam" given to Christ is approximately found in Sūra iii. 52. The expression "strengthened by the Holy Ghost", which Muḥammad uses in ii. 81, was not understood by him. He confuses the Holy Ghost with the Archangel Gabriel.

The commentators still further develop the legends in the Kurān connected with the New Testament, particularly those of the childhood of Mary. On the whole the figure of the Virgin Mary is a very attractive one in the Kurān and not very remote from Christian sentiment. On the other hand, the figure of Jesus is much more uncertain and, in comparison with the Gospels, a much lower one (cf. ibid.). Jesus is rather only a pious prophet. Muḥammad leaves him the name Messiah (iv. 169 sq.), but this name does not seem to have any definite theological meaning with him. Of other New Testament personages, Muḥammad only mentions John the Baptist and Zachariah.

The New Testament had an important influence on Tradition (Hadīth, q. v.). Various miracles, sayings, and ideas which are attributed to Muḥammad or his followers have their origin in the Gospel. The stories that Muḥammad increased supplies of food or water go back to the miracle of the loaves and fishes in the Gospel rather than to that of the wedding at Cana, as Goldziher thinks. Numerous traditions regarding the high position of the poor and the difficulty of the rich in entering heaven, again reflect the doctrine of the Gospel and are in contrast to the views of the heathen Arabs. As Goldziher has shown, an Arab traditionist, Abī Da'ūd [q. v.], even puts a version
of the Lord's prayer into the mouth of Muhammad. H. Lammens also points out to me that the tradition, according to which Abū Bakr is moved to tears on hearing the Prophet preach, is of Christian origin. The "gift of tears", which is known to Christian mysticism, was little fitting to the temperament of the Arab conquerors.

On the legends of the Mahdi and on Muslim eschatology Christian apocalyptic literature had a considerable influence.

In several Muslim historians we find a rather extensive knowledge of the Gospels. Al-Ya'qūbī, one of the fathers of Arab history, gives a synopsis of them. Such an inquiring spirit as al-Mā'sūdī does not conceal his relations with the Christians.

In Nazareth, as he tells us, he visited a church highly venerated by Christians and received a large number of Gospel stories from them. He knows of the birth of Jesus in Bethlehem, his childhood in Nazareth, the saying of God in Matthew III, 17: "This is My beloved Son", which he gives with slight alterations. He has also heard the story of the Magi who visited the infant Messiah, according to the Gospel and other sources. He gives the story of the summoning of the Apostles accurately. He also names the Four Evangelists and speaks of the "book of the Gospel", of which he gives a summary, as if he had seen it. On the other hand, he shows a certain distrust of this book, in contrast to the great reverence with which the Kurān speaks of it. Al-Mā'sūdī is comparatively well informed about the lives of the Apostles. He twice speaks of the martyrdom of the apostles Peter and Paul, ascribes to the latter the same kind of martyrdom as, according to tradition, was the fate of Peter only. He knows Thomas as the apostle of India. On the whole, Thomas seems to be the apostle best known to the Muslims next to Peter, and even Paul is less known than Peter.

Al-Bīrūnī is still better informed than al-Mā'sūdī. In order to write his Chronology, he had to consult Nestorian Christians. He knows various parts of the Gospels and also of the commentary of Dādshād (Jesudad, cf. Duval, Litt. Syriacq, 2nd ed., p. 64) and discusses it with a certain spirit of criticism. The four Evangelists to him are four recensions, which he compares with the four copies of the Bible, the Jewish, Christian, and Samaritan. He notices, however, that these recensions differ considerably from one another. Al-Bīrūnī gives the genealogies of Joseph in full from Matthew and Luke, and tells in a very interesting passage how the Christians explain this difference. He speaks of other gospels which the Marcionites, Bardesanesites, and Manichaens possessed, the two first of which differed, according to him, "in some parts" from the Christian Gospels, while the others were contradictory. In view of all these different recensions he concludes that one cannot rely very much on the prophetic value of the Gospels.

The Persian version of Tabarī's Chronicon (French ed. by Zotenberg) contains New Testament legends, which are more detailed than in the Arabic original and correspond with those found in the stories of the Prophets (Kīmas al-Abīyā). Certain details from the Passion for example are given, such as the repudiation by "Simeon", the betrayal by one of the Apostles, who is not mentioned by name, and the story of Mary under the Cross. For the rest the author holds the Muslim view that another person, whom he calls Josua, was substituted for Jesus. As to the history of the Apostles he gives the tradition which makes John come to Edessa.

In the mystic literature, one finds numerous allusions to the Gospel, there are even traces of some knowledge of the exposition of some passages in scripture by the Fathers of the Church. What is given by the Muslim mystics as sayings of Jesus, however, is very far from always agreeing with the Gospel. For example, the sayings ascribed by al-Qāzīzī to Christ are almost all incorrect. On the other hand we find in al-Sahrawardī an accurate and complete version of the parable of the sower. The Rasā'il lṣḥāqīn al-safi' contain remarkable passages about the crucifixion of Jesus, the actuality of which they assume, about the Resurrection, the assembling of the Apostles at the last supper and their scattering over the face of the earth. The Acts of the Apostles (Af'al al-Hawā'iriya) is expressly quoted there (Dieterici, p. 605).

The philosophic literature also shows a large number of controversies between Christians and Muslims. Among the celebrated polemics we need only mention here Abu 'Ali ʿIsā b. Zavrā, who in 387 composed a reply to Abu l-Kāsim ʿAbd Allāh b. ʿĀlīm al-Balikhī, and Yahyā b. ʿAdī, a Christian scholar and pupil of al-Fārābī. The latter produced an apology for Christianity, which he dedicated to Shāhīk Abu ʿĪsā Muhammad b. al-Warāqī. He also replied to strictures by al-Kindī on the Trinity. [See also the articles ʿIṣā and al-Mahdī].

The Muslims in general respect the Gospels and revere Jesus and Mary. The Turks call it Indjil sherīf. Various writers who have lived in Turkey say that many Turks in secret recognize the superiority of the Gospels to the Kurān. In particular they mention the case of ʿAbbās [q. v.], who in the reign of Solmān I openly preferred his preference for the Gospels and was therefore executed (D'Ohsson, Tabululer general de l'Empire Ottomain, i. 153).

INDIJL — INDO-CHINA.

INDIJL. This name, which is properly a name for the royal estates under the Mongols, is usually given to the dynasty which reigned from about 703—758 = 1303—1357 in Fars (Shiraz), as its founder, Sharaf al-Din Mahmûdhshâh, had been first of all sent there by Uldjaitû to administer the royal estates. According to a statement in the *Ta‘rikh-i Čüsäd*, he was a descendant of ‘Abd Allah Anşût [q. v.] under Uldjaitû’s successor Abû Sa‘îd he not only retained his office, but was able continually to extend his power so that by about 725 (1325) he was practically independent ruler of Shiraz and almost the whole of Fars. After the death of Abû Sa‘îd he was put to death by order of his successor Arpa Khân in 736 (1335-6). According to the *Shirâznâmâ*, he had four sons: Dâ’îl al-Din Mahmûdhshâh, Şâyâhâ al-Din Kâjkhusraw, Shams al-Din Muhammad and Abû Islâk Djamâl al-Din. The first name was already named in Shiraz in the lifetime of his father down to about 735, when during his absence his brother Kâjkhusraw took his place. On his return however the latter refused to restore him his authority and a war broke out between the brothers, which ended in 739 (1338-9) with the death of Kâjkhusraw. Mas‘ûd had imprisoned the third brother Muhammad in Ka‘lat Safîd, but he was able to escape and found support from the Čupânid Pir Husain. The latter collected a Mongol army and advanced on Shiraz with Muhammad, so that Mas‘ûd had to take to flight and Pir Husain entered Shiraz.

But his rule did not last long, for, when shortly afterwards in 740 (1340) he put Muhammad to death, the population took up such a threatening attitude that he found it advisable to retire, only however to return next year with new forces. But on this occasion also he had no good fortune, as he quarrelled with the Čupânid Asfâr and, when the two sides were drawn up in line of battle, he was left in the lurch by his own men, so that he had to seek refuge with Shaikh Hasan, who had him put to death. In the meanwhile, Mas‘ûd Şâh had retired to Lûrûstân and made an alliance there with Yaghûbûst, a brother of Asfâr, while Asfâr himself took the side of his brother Abû Islâk. Mas‘ûd, however, succeeded in reaching Shiraz with the help of Yaghûbûst, but there met the same fate as his brother: he was treacherously murdered by Yaghûbûst in 743 (1343). The latter THEREupon quarrelled with Asfâr but made peace again and they jointly attempted to subjugate Fars, but their troops dispersed when the news of the murder of their brother Hasan Kûcûk [q. v.] reached them.

Abû Islâk, a younger son of Mahmûdhshâh, who had previously received the town of Isphân from Pir Husain, now became lord of Shiraz and of the whole of Fars. As he endeavoured to extend his rule over Yazd and Kirmân, he came into conflict with the rising power of the Mu‘azzârîs [q. v.] with varying success. The result was that Abû Islâk was not only driven from Kirmân and Yazd, but was ultimately besieged in Shiraz. The town had to be surrendered to the Mu‘azzârîs in 754 (1353). Abû Islâk had in the meanwhile fled to Ka‘fat Safîd, received some support from the Ilkhan Shaikh Hasan from Baghât and went to Isphân. There also he was besieged and finally captured, handed over to the relatives of a shaikh who had been put to death by his order, and was killed by them 758 (1357). The Persian poet ‘Ubâd Zakâm commemorated his Maecenas in an elegy.

INDO-CHINA. Further India. — ISLĀM in French Indo-China. French Indo-China comprises the whole eastern zone, by far the greater part of the double peninsula which lies between British India and China. The western zone belongs to England and the rather small part in the centre to Siam, which serves as a buffer state between the two. French Further India comprises in the south Cochin China (Annamese Nam ky) which is a direct possession, in the centre the kingdom of Cambodia (in its dialect Srok Khmêr, Nokor Kampûcâ [Sanskrit, Kambuja]), in the north the kingdom of Laos (Laotic: Mông Lao); in the east the empire of Annam (Annamese: Nû‘ô Annam); in the north east the province of Tonking (Annamese Bắc ky), all of which are protectorates.

This country, one and half times the size of France, is only inhabited by about 12,000,000 Annamese, 1,500,000 Cambodians, 1,200,000 Laotes, and about 200,000 Tjams1) and Malays, 275,000 Chinese, 1000 Hindus, mainly Tamils, and about 500,000 savages2) or half civilized men.

1) In French Indo China cham (chams) is written and pronounced tiam. It should be noted that: 𦐃 = ⚖, ListGroup Image 1 = ♂, c, է = թ, j = dj, nh = _ns in the above quoted Indo Chinese words.

2) The natives call themselves Mei, Phong or Kha, which in Annamese, Cambodian and Baoese means "savage".
As regards religion, the Annamese like the Chinese are Buddhists or Confucianists, only a very small number being Christians; the Cambodians and Laotese are Buddhists, the semi-civilised are almost all animists, with a very few Christians; the Tjams, Malays, and a few Tamils are Muslims, except 20 to 25 thousand of the Binh-Thuyhn who have remained faithful to a very ancient Brahmanism. Some Tamils and Bengalese are Hindus.

The Tjams (urang tjam) live partly in Binh Thuyn, in modern Annam, the last refuge of their nationality, partly in Cambodin, along the bank of the Meckong, and on the edge of the great lake (Tonle Sap) partly around the towns of Chau Doc and Tay-ninh in Cochín China, and finally in a few villages in Siam.

The Malays who are almost equal in numbers live entirely near them in Cambodia as well as in Cochín China and are in constant relations with them. They are not found in Annam.

Islam at present plays only a slight part in Further India. It was at one time more important but never predominant, as long as the kingdom of the Tjams dominated the peninsula.

The Tjams, whose physical features and language are obviously connected with those of the Polynesian Malays, at one time founded a powerful kingdom in Further India, which seems to have comprised Cochín China, the modern Annam, with the exception of Tonking, and a part of Cambodin. A memorial of its greatness is the stele of Nhatrang, of the second or third century. In the thirteenth century the kingdom, although already declining, still aroused the astonishment of Marco Polo. In the fourteenth, however, it was broken up when the Cambodians and Annamese attacked it together and in 1471 there were only a few tribes in the valleys of the Binh Thuyn who were much oppressed by Annam. At that time many of them fled to Cambodia, where their descendants still live.

The oppressed Tjams greeted the French rule with joy, but the French are not succeeding in elevating them. Physically they are not degenerate. They are taller and better proportioned than the Annamese, the skin is soft and of a light brown colour, the hair soft and often wavy, the face rather broad, the eye well formed, and with an open look, the mouth of medium size. They belong to those Asiatics whose type is nearest to ours, but their fertility is only very moderate. In spite of a certain childishly liveliness and a great softness of character they are intellectually extremely apathetic. They practise neither commerce nor industry, live in very miserable villages (in Annam they are built on the ground and in Cambodin on piles), weave a few stuffs, and only do as much agriculture and cattle rearing as is necessary to maintain life without worrying whether they can improve their lot.

When was Islam introduced among the Tjams? This question has not yet been solved. One thing however is certain. It was preceded by Hinduism, the most accepted form of which was Civism, which is still practised with the most remarkable variations by some thousands of Tjams who have remained true to this old faith and therefore call themselves Tjan-Diat (Sanskrit jātu), pure-bred Tjams. But by their Muslim fellow countrymen they are called Akhphir or Kaphir (Ar. kāfīr) "infidels", without the one side or the other seeing an insult in the appellations.

Two hypotheses may explain the introduction of Islam into Further India. It was either brought in the 18th or 19th century by Arab merchants, Indians or Persians, in the great movement of the general spread of Islam, or it came later as a result of a Malay immigration.

It is certain that the Arabs were acquainted with Further India at a very early period. As early as the 8th century there were regular relations between Arabia, China, India, and the Archipelago. By 458 the Arabs and Persians were so numerous in Canton that they laid the city waste with fire and sword. In the 6th century they raised a rebellion in Khan-fu, in which 120,000 of them perished by the sword. In these circumstances they must have been acquainted with Indo-China and if they knew it, they must also have endeavoured to win it for their religion with the well known missionary enthusiasm of the Muslims.

A passage in the Annals of the Sung dynasty, Chap. 486, which was ingeniously explained by Ed. Huber (Bulletin de l’Ecole francaise d’Extreme Orient, III, 55, N° 1), shows that Islam was first brought to them by the Arabs or Persians. In the Annals it is stated: “There are (among the Tjams) also buffaloes which live in the mountains. They are not used for agriculture but only as sacrificial animals. When one is sacrificed, the men utter this prayer “A-lo-ho-ki-ka” which means “may it soon rise again”. According to Huber, this A-lo-ho-ki-ka corresponds to Allâhu akbar and warrants the conclusion that there were already Tjams converted to Islam in the time of the Sung. In the same account of the Tjams it is said: “the customs and dress of the Tjams are similar to those of the population of the kingdom of Ta-che (Tâïjik i.e. Arabs)”. The historical statements of the Tjams are not to be taken too seriously. But it must be remarked that their legendary chronicles place at the head of the list of kings who had Sri-Thanoy as their capital, the Po or lord Ovâh (Allâh) who reigned from 1000 to 1036. In the year of the Rat a man of the nature of Ovâh lived a perfect life in the Tjam kingdom, but the land was not contented. This man recommended his soul and body to the lord of heaven and settled for 37 years in Mokkâh (Mecca), then came back to the Tjam kingdom . . .” Did the Muslim Tjams wish to number Allâh among their national rulers out of religious pride or merely give a place among their kings to the Persian or Arab pilgrim who brought them Islam? Both hypotheses are possible.

Another text which comes from the Tjams of Cambodin (see Delaporte, Voyage au Cambodge, Paris 1880, p. 417 sq.), reports that Nao Savan (Nâghîrwan), the divine inoa (youth), the first king of the Tjams, was the inventor of the alphabet, which is still used in profane books. The inhabitants who were previously worshippers of Buddha, were later converted to Islam by Patenta Ali (cf. the Malay Baginda ‘Ali), the father-in-law of Muhammad. At the latter’s birth Nao Savan had gone to Mecca to worship him as all the kings of the earth did, and was installed by him in his residence Bairch Balî (‘îr Bándy, the modern Qui-nho’n, Annam), the capital of Peripanong (the
modern Phan-rê and Phan-rang, Annam), to the east of Cambodia, and the Tjams still say that this is their place of origin.

In short, it is quite possible that Islam had already been introduced in the sixth century by Arab, Persian, or Indian merchants. But it made only slight progress and for the Malay immigration in the xivth and xvth centuries which kept it up and spread it, it would have probably disappeared again. It is moreover due to this immigration that Islam has retained its purity through the relation which the Malays keep up with the Tjams of Cambodia and Cochinchina.

But it is also possible that the law of Muḥam-mad reached them through the Malays of the Archipelago or Malacca. The latter, as Prof. Kern has convincingly proved, themselves come from Indo-China and are related to the Tjams and, as inscriptions and legends show, were from the viith century onwards in uninterrupted close relations with the kingdoms of Champa and Cambodia, partly through intermarriages of the ruling families and partly through invasions. These turbulent Malays, whose Islamism was not of an intolerant type, thanks to the community of religion, kept in such close touch with the Tjams after their political decline that the two are usually confused in the history of Cambodia and Annam. Their common rebellions and intrigues in the xivth and xvth centuries disturbed the peace of the two kingdoms, particularly that of Cambodia. The chroniclers and especially the Spanish theologians, who at the beginning of the xvth century had hoped to see Indo-China brought under the sway of Philip III, bitterly acknowledge at this period (1603) the influence of the "Moros" i.e. the Muslims whom the tolerance of the kings of Cambodia and of the Tjams allow to build mosques everywhere, who endeavour to proselytise and who hate the Christians to the extent of wishing to drink their blood (cf. Brève et vériquie relation des événements Cambodgi de Gabriel Quiroga de S. Antonio ... New Edition of the Spanish text (of 1604) with a translation and notes by Antoine Cabaton, Paris 1904, p. 106, 124, and passim). Matters went so far that about 1624 a prince of Cambodia, Phrā Rām, seized the throne supported by them, married a Malay woman, and adopted Islam to the great scandal of the true Cambodians who were faithful followers of Buddha.

The Muslim Malays and Tjams down to the xivth century took an active part in all the internal strife which disturbed the peace of Cambodia in its decline. For a time they played such an important part that one of them, Tuan Sait Aḥmid (= Shaikh Ahmad) — according to the chroniclers, a Malay of royal descent, but perhaps simply a Tjam with some Malay blood —, in 1820 became regent and right hand man of Ang-Čan, the ruler of Cambodia. He aroused the jealousy of the Cambodians and the distrust of the Annamese, who would have liked the lands of Ang-Čan for themselves, to such an extent that his political enemies succeeded in having him condemned and beheaded without his fellow-Muslims, who would certainly have rescued and saved him, learning anything of it until too late. His sons and followers raised a rebellion in the province of Thbong-Khmun where the Tjams and Malays of Cambodia joined together and united with the Tjams of Chau-dóc and laid the country waste until Norodom ascended the throne in 1859 and French rule finally put an end in 1863 to the political importance of the Muslim element in Indo-China.

From the religious point of view, these Malay immigrants into Indo-China, who are mainly found in Saigon, Chôlô-w, Chau-dóc, Tây-ninh (towns in Cochinchina), Phnom Penh, Kampong-Laong, Kampong Tjam, Lovek, Pursat and in other centres of Cambodia, show no original features. They entirely resemble their brethren in the Peninsula of Malacca, are in constant relations with them, and often receive from there missionaries whose duty it is to maintain the purity of their creed. They are intelligent, active, clever and prudent, but are considered to be treacherous, cruel, cunning and inhospitable. They keep quite apart from the Cambodians among whom they live and only maintain closer relations with their co-religionists among the Tjams. They are mainly traders, farmers, fishermen, boatmen, drivers, growers of vegetables, and are respected if not loved in Cambodia for their intelligence and industry. Although they were well treated by their rulers, their wealth seems to have been often rightly doubted and for their interests do not seem to go beyond that of their community. They are Shi'is and in general are acquainted with the precepts of Islam and they read the Kurân and its commentaries. Among them we find for example the "Aṣida of al-Samā'i, the Si Barung Pingai, Fikh and ʿAṣid books, the Şīrī ʿemustahjīm, various poetical works or legends such as Male Min, Mi Ḡusīn Muḥammad Ḥan-fiyīyīh etc.

These religious ideas and, to a less degree their religious development, the Malays of Cambodia have in common with the Tjams of Cambodia and Indo-China. Both observe the five daily prayers, the ablutions and circumcision, which is performed at the age of 15. They do not eat the flesh of pigs, dogs, crocodiles, tortoises, elephants, peacocks, vultures, eagles, and ravens, and they refrain from intoxicating drinks. If any one worships a strange idol, he is expelled from the community. Some make the pilgrimage to Mecca or pay a certain sum, for which a representative is sent on their behalf. In Cambodia the mosques are almost always built of wood and are placed on slight elevations. The finest are large bare rooms with a platform at the back. The mats which are used as prayer carpets are hung up in a sack from the rafters. On the left at the entrance there is usually a large drum painted red (Tjam garnōng = Malay gendang, Javanese kendang). Outside is a little basin of masonry for ablutions.

Within these precincts the imāms give the children instruction in reading Arabic and in reciting the Kurān. The assembly or ʿijmālah cannot take place without a quorum of 40 believers. Ramaḍān is strictly observed by all, pious families are quite abstemious in this period. On Mondays they refrain from sexual intercourse.

The Tjams of Cambodia also observe the bulan ʿah haji (lasting month of the pilgrims) also called bulan Onlah (month of Allah) three months after Ramaḍān. They also observe the molot or molut (Arab. molat?), when a lock of hair is cut from the children of 3 to 13 and they are given a religious name, which for boys is always Ḥabīb Allah or Muḥammad, for girls Ḥabībīya (Pajims). The imāms, at least four in number, are invited to pray
in the house in which the ceremony is being performed. This custom of hair cutting seems to be borrowed from the Cambodians.

The tanat (Arab tawmā) is a ceremony nearly always confined to the family circle, at which a boy, who has learned the Kurān entirely by heart, which however happens very rarely, is led round the village on horseback amid the acclamations of men and women. He is dressed in his best clothes and is greeted with the greatest reverence by men and women.

The surūḥ (pursuit), which is celebrated in the first Tjām month, is accompanied by two days' fasting and commemorates the migration of the Prophet (Hijīra).

By the tāpāt, which we also find among the Tjams of Annam, who call it sukāh = Ar. tovla, old persons are purified from their sins by means of numerous prayers and sprinkling with holy water.

Malays and Tjams have common religious officials in Cambodia who are given the following names according to their office.

Malay          Tjam          Function.
1. mufsi          mepkati          jurist
2. tuan kadli      tūk kalik          judge
3. raya kadli      rajas kalik
4. tuan pakih      tuan pakē          jurist
5. hakim           hakem          doctor
6. kētēp           kētp          preacher
7. bilal           bilal          mu'ādh jużin
8. lēbāi          lēbēi          officiant.

All are exempt from taxation. The four first have the following Cambodian names: 1. okē in rādā koley, 2. okē in raya koley, 3. okē in tok koley, 4. okē in pakē. They are appointed by the King, belong to his council and are the official superiors of the Muslims. They are regarded by the faithful as representing the four caliphs of the Prophet and enjoy a great spiritual authority.

The religious dignitaries are usually chosen from the most prominent families whose sons can become imāms at the age of 15 and whose daughters are educated with special care to make them worthy wives. The Muslims of Cambodia respect the graves of saints which they call tā-lak: they believe in witches, the werewolf, evil spirits, and in magic and have retained certain agricultural customs which are also found among the neighbouring peoples such as the Cambodians and Annamese. They are relics of an old animism.

The family bonds among the Muslims of Cambodia are very strong; the father has great authority. The wife is well treated but kept strictly within the house as well as the daughters, who are very early initiated into household duties and, being under strict control, are only allowed to marry Muslims.

The Muslim Tjams have adopted from the Cambodians the custom of filing and lacquering their daughters' teeth at the age of 15, an operation which is accompanied by prayers from the imāms and sprinkling with holy water.

The marriage customs are in general Muslim. The boys do not as a rule marry before 18 or the girls before 15. The wedding feast is accompanied with great expenditure. Divorce is possible but rare. If it is demanded by the woman, she loses her dowry (Tjam sakawin, Malay mas kawin) which the husband settled on her at the betrothal.

The burial ceremony is very simple. The corpse is washed twice with a decoction of jujube leaves or benzoin water, then in clear water, wrapped in a piece of linen and placed in a grave about ten and a half feet deep, with the head to the north. A mound of earth is then erected over the grave, which is covered with thorny branches to protect it from wild animals. On the third, seventh, thirtieth, fortieth, and hundredth day the imāms are invited to pray and eat with the family at the grave. The exhumation practised by the Tjams of Annam is not found here.

The husband mourns in white forty days for his wife, the latter three months and ten days for the husband and she cannot marry again before a hundred days.

The Islam of the Tjams in Annam has quite a different stamp. It appears to have a Shi'ī character, as Aṣām (Iṣāsun), Aṣā (Husayn) and A'll are particularly revered and invoked there: they also play the main part in the few manuscripts or legends still preserved in Annam. It is however considerably penetrated by animistic and Hindu ideas and customs which preceded it and still survive alongside of it. The Muslim Tjams of Annam are Muslims mainly through the naive conviction that they are Muslims. They call their Hindu country men kafir without the slightest derogatory intention and themselves banis = banī, the sons of religion, or Tjams Asalām (= Islām), Tjams of Islām. They say that they worship Ovolā (Allāh), but also Pō Devata Thwor (Çevar) (Sanskrit Devatā Swarga), God, Lord of Heaven, and they offer presents in certain agrarian rites, e.g. two eggs, a nyp of rice brandy, and three leaves of betel, to Pō Ovolā, Tak Ala, the mysterious king of the underworld; in reality it is the Muslim expression Allāh tā'tā, out of which they have made a god. They also worship the Brahman goddess Pō Inō Nōgar = "Mother of the Land" (Umā, Bhagavati), and her husband Pō Yang Amō, "the Lord God, the Father [of the land]" (Śiva), whom they identify with Pō Havāḥ (= Hawād), i.e. Eva and Pō Adam, the ancestors of mankind.

The Tjam Kaphir of Annam with as broad a tolerance have taken into their Pantheon Pō Ovolā (= Allāh), an undefined bodiless god, the creator of Pō Raqulik (= Rasić Allāh) and of Pō Latil (= Lā Ilākā), who lives in Mūkāh (Mecca) and who was created by Pō Ovolābuk (= Allāhān) the father of nobi Mahamat (= Nākā Mahāmat), who are par-
asalām (=
kitāb al-Islām), the book of īslām, ki-
tāb al-mu'āma = kitāb al-īlam, the book of
praise, ṭamāh ṭāhārāy, the talisman book. They
never use his real name. The Qurān moreover is
hardly to be found among them at all. The few
copies which exist are incorrect, and written on
chinese paper with the brush and not with the
reed pen. The Bani seem to esteem equally highly
a mystical compendium which much resembles the
Javanese prīmboh and is called nūrlīyān by them.
The "priests" copy it only during rānīvānt (= Ra-
maḍān) and they receive the princely remunera-
tion of a buffalo for each copy.

The Tjams of Annam pray only on Fridays and
during Ramaḍān the five rāh or vākūt (= waḥf)
ṣaḥīf, the names of which they corrupt as follows:
ṣaḥīf, ṣaḥālik (=
ṣaḥīf) "morning prayer", rāh
ṣaṭāk (=
ṣaḥār), "noonday prayer", asārî (=
ṣa'īr) "afternoon prayer", muṣafār (=
ṣa'īr) "evening prayer". They
are in the main content with reciting a few sūrās,
especially the fātihā, without understanding them,
and the Arabic form is so corrupted in their
pronunciation that it is almost unintelligible, e. g.

1. aḥū similla kyor rāh mūnōr rāh hīnāt =
Ar.: bi 'sūnī 'lāhī 'r'raḥāmūnī 'r'raḥīmī;

2. asūnūk akkbār; lā 'lāhā illāwūlāwāh wūwāhāk akkbār =
ar.: allāhū akkbār; lā 'lāhā illā 'lāhī,

They hardly observe any ablutions but are con-
tent with making signs as if they were taking
water out of a hole in the ground. Circumcision
(katān, katāt = Ar. bītān) which is performed on
boys at the age of 15 and must always precede
marriage, is however only symbolical and consists
in the imām with a wooden knife marking the
circumcision. The boy receives a new name (awwāl =
awwāl), usually "Ali or Muḥammad. The Tjām
Bani do not make the pilgrimage to Mecca and,
while they do not eat pork, the priests as well as
the faithful enjoy brandy made from rice, as well as
other intoxicating liquors; the religious dignitaries
do not however drink in the mosque. If the num-
ber of 400 is present on Friday in the mos-
que, those missing are replaced by ceremonial cakes
and the usual service, followed by a meal, takes
place.

The people only observe Ramaḍān for 3 days.
The imāms however must observe it till the end
of the week of the whole community. During this
time they shut themselves up in the mosque with
their prayer books, their rosary, their tea pot,
their sleeping mats, their copper spitoon and their
betel set, which they require to prepare the chewing
material indispensable to all Eastern Asians. For
a whole month they never cross the threshold
except to perform complete ablutions in the river.
The others are taken in the great cisterns under
the penthouse roof of the mosque.

These mosques are also and in such mosques (āmīgik, sāmīgik; cf. Adj.: māqīg) which are turned towards Mecca
are usually rather poor straw huts with walls of
bamboo latticework.

Even the names of the religious dignitaries in
Annam suggest the strange alteration which Islām
has suffered there. At their head is the po gru or ong
guru (Skr. guru), then come the imān (imām),
from whom he is chosen and who are the men
who really perform the ceremonies, then the kāṣīp
(bāthīb), who have to give the religious readings
in the mosque; next come the mūdīn e. e. mu'ādh-
dīn, the ābār (Skr. dāyārya = "religious teacher"),
a kind of religious instructors who belong to the
mosque. In general, the word aṭīr in Annam is
applied to all Muslim "clergy" in contrast to baṣātīk,
which is the name of the Hindu priests.

All the religious dignitaries in Annam shave their
heads and faces. In addition to the simple white fez
worn in Cambodia, they also wear a voluminous
turban with gold, red or brown fringes. The various
ranks are distinguished by the length of the fringes.
Like their Hindu brethren they carry a long
Spanish reed, the lower part of which is woven
into the form of a basket only in that of the ong gru.
A white sarong, a long white tunic which is but-
toned and cut open at the neck is their sole
costume. On high feast days the mibar and the
interior of the mosque are covered with white
cloth; on these occasions they exchange the tur-
ban for a kind of disc, which is bored through
the middle and fastened to the fez by a piece of
linen. The whole looks like the biretta of a judge.

These "priests" are almost as ignorant as their simple
followers; they can hardly read Arabic, hardly
study it at all, and only roughly understand their
sūrās which they repeat only "because their fathers
also did so". They are free from taxation and
forced labour and are held in fairly high esteem
by the people; they are the more educated class,
however slight the education may be. As they are
quite indifferent and tolerant, they do not think
ill of the faithful when the latter make offerings
to the Pū Yang or various Hindu deities, endeavour
to propitiate evil spirits and perform certain agraria-
rian rites or magic ceremonies which have nothing
Muslim in them. They live in perfect harmony
with the Hindu baṣātīk, invite them to their reli-
gious and domestic festivities and are invited in
turn, — only the food for the inmūn must be pre-
pared by a Muslim woman — and give each other
places of honour. From mutual tolerance both
communities refrain from eating pork or beef.

Only from the Hindu cremations do the Muslim
priests carefully absent themselves and this reli-
gious horror of corpses was previously, it is said,
the reason why they alone could enter the royal
palace to pray with women in child-bed and to
watch his wives and children during the absence
of the king.

Either as a result of ancient customs or of the
Malay-Polynesian matriarchal system or through
contact with the Hindus of Annam who have
priestesses called pāḍiṣh, the Muslims of Annam
have priestesses for a domestic cult; they are
called rōjja or rījja. If a sick member of the
family has to be healed, for example, or a journey
or business enterprise to be undertaken auspicio-
ously, the inmūn first of all recites various prayers,
then this rājja — often the housewife herself —
accompanied by the mūdīn who sings and beats
the drum, perform certain ritual dances or falls
into a state of great excitement in order to in-
fluence the 'deities' or 'spirits of the dead', to
whom sacrifices are at the same time made. This
ceremony is always followed by a great feast.
The rōjja's, who must not eat the flesh of the pig or
of the sand cat, even play the principal part at
the great annual festivals, which are celebrated
in December—January and are probably of Malay
or Indonesian origin — the same Java is re-
peatedly mentioned in them — and are regarded by
the Muslim Tjams as the "New Year's festi-
val of the ancestors".
Birth customs in Annam among the Bani are similar to those among the Kaphir except that the Bani do not sacrifice to the gods on such occasions. The seduction of girls is also severely punished. They do not marry till they are 17 or 18. In Panrang, evidently the result of the old Malay matriarchal system—which has left other traces also, like the right of inheritance of women and the tracing of descent through them and their practising the cult of ancestors—the custom prevails that the girls seek the young men in marriage, but everywhere else in Indo-China the reverse is the custom. The wedding (Tjâm, likhaî = Arab. nikâh), which is the occasion of dancing and country festivities, is usually replaced by public cohabitation, which causes no scandal; the pair are free to celebrate it later when they can afford it, and they may already have two or three children to take part in it. It is far more elaborate among the Bani than among the Kaphir. The imûn’s repeat prayers; the ong grû, who represents the “lord Muḥammad”, asks the bride, who is considered to be Fāṭima, whether she accepts the presents of the bridgroom, the lord ‘Ali. Rich feasts take place at the weddings. The dowry given to the woman remains her property in case of a divorce. Divorce is fairly easy and leaves nearly two thirds of the joint property in the hands of the woman. Mixed marriages are rare and in them the children follow the religion of the mother. It sometimes happens that a Muslim woman marries a Hindu, very rarely the contrary.

The burial service is as simple among the Bani as it is elaborate among the Kaphir. The corpse is wrapped in white cotton sheets and placed in a small hut, where the ong grû and the imûn’s repeat prayers. As soon as night falls the dead man is buried, with four imûn’s present, almost secretly, without a coffin and with the face turned to the north. The relatives beseech his spirit not to come and afflict them. On the 3rd, 7th, 10th, 30th, 40th and 100th day as well as on the anniversary of his death a访谈 i.e. a service at the tomb with prayers, a meal and presents for the imûn’s is observed. This festival takes place under the presidency of the ong grû and of two imûn’s for a considerable number of girls on each occasion and lasts two days. It is opened with prayers to Allah, Muhammad, the Hindu deities and the shades of their ancestors as well as with a feast at which the priests eat apart. Two booths are erected, the one for the ceremony itself, and the other as a dressing room for the girls, who sleep there under the supervision of four matrons. The imûn spend the night praying; at 7 a.m. the girls appear wearing their finest clothes and ornaments, their hair loosened and covered with a triangular mitre. Before them goes an old woman and a man clothed in white, who carries a year-old child dressed exactly like the girls except for the mitre. They throw themselves down before the ong grû and the imûn’s. The ong grû places a grain of salt in the month of the child, cuts off a lock of its hair and gives it some water to drink. The same is done with the girls, who then return in procession to their booth. If a girl has been seduced the lock is cut off at her neck as a mark of shame. A second feast, at which the priests eat before the faithful, concludes the ceremony.

The festival lasts two days and three nights. A great booth is built in an enclosure, if possible of quite new material, and the interior is hung with white cotton cloth. The altar is a simple large tray, with dishes on which are betel, food and fruits. Wax lights are stuck on the edge of the dishes and they also are bound round with cotton threads of different colours. A swing hung to two pillars is intended for the radja; she is assisted by three imûn’s and the mödin, who with his tom-tom conducts an orchestra consisting of a clarionet, a violin, cymbals and an oblong drum (ganông). The festival which is interrupted by numerous meals is opened with the bismillâh, then follows the invocation of the mountain and forest spirits and of the shades of the “spirits beyond the sea,” which may not be mentioned by name”; and finally the invocation of 38 deities or spirits by name; at each of them the three imûn recite prayers.

The most characteristic part of the festival takes place on the second day at the rise of the morning star. After the mödin has invoked the deities and the radja has performed a special dance in their honour, they take a small rowing boat made out of a single piece of wood, which is said to come from Java or China to collect tribute. The master of the house in which the festival is held, pretends not to understand Javanese and the mödin acts as interpreter. Amid joking all round, eggs, cakes and the figure of an ape with jointed limbs are put in the boat, the participants then break up the walls and roof of the booth and fight for the cakes. On the third day the radja goes, accompanied by the officiants and the orchestra, to the river and solemnly places the boat with the ape on the water. This ends the festival.

While circumcision is only symbolic with the Tjâm Bani of Annam, the tubah for the old men is practised as in Cambodia and the karob (literally, “enclosing”) marks the declaration of a girl’s fitness for marriage. Not till then dare they cut their hair and marry; until then they are tabunâ i.e. unapproachable, and the seducer would be severely punished. This festival takes place under the presidency of the ong grû and of two imûn’s for a considerable number of girls on each occasion and lasts two days. It is opened with prayers to Allah, Muhammad, the Hindu deities and the shades of their ancestors as well as with a feast at which the priests eat apart. Two booths are erected, the one for the ceremony itself, and the other as a dressing room for the girls, who sleep there under the supervision of four matrons. The imûn spend the night praying; at 7 a.m. the girls appear wearing their finest clothes and ornaments, their hair loosened and covered with a triangular mitre. Before them goes an old woman and a man clothed in white, who carries a year-old child dressed exactly like the girls except for the mitre. They throw themselves down before the ong grû and the imûn’s. The ong grû places a grain of salt in the mouth of the child, cuts off a lock of its hair and gives it some water to drink. The same is done with the girls, who then return in procession to their booth. If a girl has been seduced the lock is cut off at her neck as a mark of shame. A second feast, at which the priests eat before the faithful, concludes the ceremony.

**Al-Insān al-Kāmil**. This expression, which means literally "The Perfect Man", is used by Muhammadan mystics to denote the highest type of humanity, i.e., the theosophist who has realised his essential oneness with God. Abū Ya‘ūq al-Biṣūmī (ab. 261 = 874), quoted in the Kitāb al-Kushāri (Cairo, 1318, p. 140, l. 12 sqq.; cf. R. Hartmann, Al-Kushāri’s Darstellung des Šī‘ī-Tums, Türkische Bibliothek, vol. xviii., p. 168 infra sq.), speaks of the mystic who after having been invested with certain divine names, passes away (fārāya) from them and becomes "the perfect and complete" (al-kāmil al-tāmim). We may identify the person so described with al-Insān al-Kāmil, a phrase which occurs, perhaps for the first time, in the writings of Ibn al-Arabī (cf. Fustūq al-Ḥikam, Ch. 1) and forms the title of a well-known work, al-Insān al-Kāmil fi Ma‘rifat al-Awāzīr wa l-Awāzīr, by ‘Abd al-Karīm al-Djlī, who died about 820 (1417). These authors base their theory of the Perfect Man on a pantheistic monism which regards the Creator (al-Ḥakīk) and the creature (al-Khaṣṣ) as complementary aspects of Absolute Being. A similar but by no means identical doctrine had already been set forth by al-Hallādī (see Kitiš al-Tawāwīr, ed. by Massinon, p. 129 sqq.) "Man", says Ibn al-Arabī, "unites in himself both the form of God and the form of the universe. He alone manifests the divine Essence together with all its names and attributes. He is the mirror by which God is revealed to Himself, and therefore the final cause of creation. We ourselves are the attributes by which we describe God; our existence is merely an objectification of His existence. While God is necessary to us in order that we may exist, we are necessary to Him in order that He may be manifested to Himself."

Al-Djlī, who differs from Ibn al-Arabī in certain details, gives a full and systematic exposition of the theory. His argument runs somewhat as follows:

Essence (dīār) is that to which names and attributes are attached, although in reality there is no distinction between the Essence and its attributes. It may be either existent or non-existent. The existent is either Pure Being (God) or Being joined to non-being (created things). Absolute or Pure Being is the simple Essence, without manifestation of names, attributes, and relations. The process of manifestation involves a descent from simplicity, which has three stages (1) aḥādīyā (2) aḥwāyā (3) anīya. At this point appear the names and attributes whereby the Essence is made known. They are communicated by means of mystical illumination (taḏjāll). The Perfect Man, who typifies the emanation of Absolute Being from itself and its return into itself, moves upward through a series of illuminations until he ultimately becomes merged in the Essence. In the first degree, called the illumination of the Names, he is destroyed under the radiance of the name by which God reveals Himself, so that if you invoke God by that name, the man answers you, because the name has taken possession of him". The second degree is called the Illumination of the Attributes. These are received by the mystic in proportion to his capacity, the abundance of his knowledge, and the strength of his resolution. To some men God reveals Himself by the attribute of life, to others by the attribute of knowledge, to others by the attribute of power, and so on. Moreover, the same attribute is manifested in different ways. For example, some hear the divine speech (kalām) with their whole being, some hear it from human lips but recognise it as the voice of God, some are informed by it concerning future events. The final degree, which is the Illumination of the Essence, sets the seal of deification upon the Perfect Man. He now becomes the Pole (kālid) of the universe and the medium through which it is preserved; he is omnipotent, nothing is hidden from him; it is right that mankind should bow down in adoration before him, since he is the vicegerent (każīf) of God in the world (cf. Kur‘ān 2, 23). Thus, being divine as well as human, he forms a connecting link between God and created things. His universal nature (ḏal‘iyā) gives him a unique and supreme position in the order of existence. Al-Djlī divides the attributes of God into four classes: attributes of the Essence (Oneness, Eternity, Creativeness, and the like), attributes of beauty (ḏanāli), attributes of majesty (ḏaḏāti), and attributes of perfection (kaḏāti). While the attributes of beauty, majesty, and perfection are manifested both in this world and the next — Paradise and Hell, for instance, being respectively absolute manifestations of beauty and majesty — the Perfect Man alone displays the whole sum of divine attributes and possesses the divine in all its fullness. This microcosmic function, according to the Sufistic interpretation of Kur‘ān 33, 75, is freely bestowed as a trust from the hands of His Maker. He contains the types of every spiritual and material thing. His heart corresponds to the Throne of God (kursī), his reason to the Pen (qalam), his soul to the Tablet (al-lahu al-maḥfūz), his nature to the elements (anwāṣir). He is the copy of God (mashhād al-Ḥakīk); cf. the tradition that God created Adam in His own image.

This theory shows the influence upon Sufism of Gnostic ideas (cf. Bouisset, Haupptide der Gnosis, p. 160 sqq.). The Insān al-Kāmil is the Insān al-Kudin of the Manichaens, the Adam Kadmon of the Kabbāšt. It was inevitable that on Islamic ground the Representative Superman should be the Prophet Muhammad, the dogma of whose pre-existence established itself even in orthodox circles, at an early date (see Goldschmidt, Neuplatonische und gnostische Elemente im Ḥadīth in Zeitschrift für Assyriologie, xxii. 324 sqq.). Many Sufis, adopting the Plotinian doctrine of emanation, identify Muhammad, the Perfect Man, with Universal Reason or the Logos. Al-Djlī takes care to state that Muhammad is the Most Perfect Man.
Al-Insan al-Kamil — Frāb.

Ahmed Rūsim, ʿĪāwēlī Khasīna-i Mekātīb (Stambul 1331); Mehmed Fuʿād, Rehber-Kitāb-i ʿOrnānîye yahhīd Mukkemel Munsīhāt (Stambul 1328);
Said Enn. Guidé compit de correspondance turco-français (Constantinople 1331), etc.

The professional letterwriters (kāthī, q. v.) in the chancelleries (divān al-imāk) are called munsīhī, but in India every educated native, especially a native teacher of languages is called munsīhī. Cf. Hobson-Jobson, s. v. Munshree. Cf. also the articles DAWĀTAKĀR and KĀTHĪ, where further references are given.

In Shā Allāh, "If Allah wills." The duty of frequently using this phrase, even when no doubt can really enter, is based upon Kurān xviii. 23 and xlvi. 27. In these passages Allāh, addressing the Prophet, uses it; and in the second passage the event so conditioned was certain to happen and is even qualified by Alī himself with a ḍulāyēt, "in verity.

This Allāh is said to have done to admonish (ilītaḍī) the Prophet to the use of the phrase. A tradition is also quoted in which Muhammad, addressing the dead buried in the cemetery of al-Madina, saluted them with the Peace, and added, "and we, if it be the will of Allāh, shall join you" — a thing of which there could be no doubt. It is therefore used a) in cases where a doubt can really enter; b) to show modesty in replying to a question or remark of a flattering nature, but never when what is answered was unflattering; c) to show good manners (taḍādūd) towards Allāh in submitting verbally and formally to his will, and thereby to gain a blessing (tabarruk). This formal submitting of all things to the will of Allāh makes the phrase in usage equivalent to the expression of a desire or hope. If some one tells you that the death of a friend is imminent, you must not say in shā Allāh, but you should if you are told that he is getting better. The Saiyīd al-Murtadā (see reference below) says that a sect, al-Marzūqī, existent in his time in Egypt, followers of a certain ʿUmmān b. Marzūq, pushed the use of the phrase so far as to fall into heresy (bidā)

D. B. Macdonald.

Inshā Allāh Khan, Indian poet, born in Mursibhābād; about 1200 he settled in Lucknow, where he secured the patronage of Prince Salimān Shikāb; he died about the year 1250. In addition to a Persian and an Urdu divān, he wrote a Persian mathnawī entitled Shīr u Birinjī; by order of the Nawāb of Oudh, Saʿdād ʿAllā Khan (1212-1223), he wrote a grammar of the Urdu language, entitled Daryā-yī Lajfāt, and published a collection of the witty sayings of the same prince, under the title Ḥalāf al-Seʿdād.

Frat (A.) Technical term in Arabic grammar, frequently translated by "inflexion," has however a much narrower meaning. For in the nouns it only applies to the formation of cases but not to numbers and in the verb it refers exclusively to the distinction of the moods of the imperfect and therefore is not applied, as Flügel, Die gramm. Schuilen der Araber, p. 15, erroneously assumes, to the formation of the genders of the
verb and its tenses and even to that of the personal forms, which are regarded as nominal elements added to the verb proper.

According to the view of the Arab grammarians in practice every occurrence of ʻrāb presupposes as effective cause a governing word, ʻamīl [q. v.]. In contrast to ʻrāb is binda [q. v.] which is applied to all words which retain their form irrespective of syntactical influences. According as it is capable of ʻrāb or not, a word is called muʿrab or maḥmī. The two conceptions ʻamīl and ūrāb have thus to be regarded as the central points round which the theory of syntax of the Arab grammarians turns. Where a distinction is made between the singular (muṣafīd) and the plural (muṣāfīf) in the narrower sense), the theory of the ūrāb as Ḍal-al-Dauti, Kātib ʻal-Tūrīfī, ed. Flügel, p. 61, rightly says, is, in contrast to our view, excluded from the former. On the other hand, ʻilm al-nāṣrī is sometimes actually called ʻilm al-ūrāb (Flügel, Gramm. Schulen, p. 15, note 1).

The Arabs differ from our grammatical notions in having no comprehensive terms for "case" and "mood"; but use the same terms without distinction for the various cases and moods if they agree in phonetic character. These terms are taken from the terminations of the cases of the third declension in the singular (muṣafīd) and the strong nouns and from that of the affixless forms of the moods of the imperfect of the strong verb. This results in the following division: 1. ūrāb (u) = nominative (e.g. rādījūla) and indicative (yāṣīlalā); 2. djār (i) = genitive (rādījīlā); 3. nāṣ (a) = accusative (rādījīlā) and subjunctive (yāṣīlalā); 4. dūs (lack of vocalisation) = jussive mood (yāṣīlalā). The three first named are originally simply names of the vowels concerned; they are still used as such not infrequently by older grammarians, without reference to the ūrāb and even for vowels in the interior of a word, and this use is even found in Sibawaih, in spite of the fact that (i, 2, 3) he expressly reserves them for ʻrāb. The usual usage in Sibawaih however proves that even then they were felt to be genuine terms for the corresponding cases and moods. They are in fact used by him in cases where the declension is formed in quite a different way from that of the above scheme. Thus e.g. the nominative of the sound masc. plural (muṣim-ul-u) is called rāb, the oblique case (muṣimi-lu) sometimes djār or nāṣ, although here, according to the view of the strict Arab grammarians the declension is made through the consonants w and y. It is similar with the dual.

In the noun two kinds of declension are distinguished for the singular (in the widest sense, i.e. including the bare plural). The noun (tim) is either munṣūrī or  ḍīrī and has nunation (taṣīr); or it is ghayr munṣūrī, i.e. it has as its declension vowel only a for the genitive and accusative, that is, it has actually only two cases (diptote) and has no nunation. In this connexion it should be noted that those nominal forms of roots with weak third radical, which, like ʿasā, really show no case changes at all, and according to our view are indeclinable, are traced to corresponding strong forms through the application of definite phonetic laws and like the latter — although according to the terminology of the finished system only taṣīr (virtually) — are considered munṣūrī and further as munṣūrī or  ḍīrī munṣūrī. Moreover a noun has not ʻrāb as an unalterable character; although rādījūla is in general considered maḥmī, this does not prevent that in the vocative: ārādījūl-un and in combination with the lā of the general negation: lā rādījūl-a ḍānī, the Arabic grammarians do not regard the rādījūl or rādījū-l as raf or nāṣ but as maḥmī sui generis. The Arab grammarian always revetted his attention on the individual form and not on its place in a system of declension or conjugation, for which he has not even a name. It is therefore quite natural that he should in the imperfect also interpret the 2 and 3 pl. fem. (yāṣīl-al-ul, taṣīr-al-ul) as maḥmī, because here the verb remains unaltered before the na, which is considered the representative of the pronoun, also in the strong roots in all three moods. In the other forms of the imperfect, which have the affixes i-na, āni, ā-ṣa, ā and ū or, according to the Arab view, the consonants y, olīf, w represent the pronoun subject, while the retention of the n with its auxiliary vowel is considered a mark of raf and its omission as a sign of ḍūs and then of nāṣ. The Arab grammarians do not recognise at all an energetic "mood" with a name of its own; to them there is simply a strengthening n (nūn muʿabbida) added to the imperfect forms, which become maḥmī before it. As their n is not a formative element merged in the verb but is regarded as a separate particle, the energetic mood is discussed in Arabic grammars under the particles, which seems strange to us.

On the reason why the linguistic phenomenon here discussed has been given the name ʻrāb, later native scholars puzzled their heads and gave various unsatisfactory suggestions; cf. Ibn al-Anbārī ʻAṣrār al-ʻArabiyā, p. 9, 15 ff. According to Wetzstein (Ztschr. f. Volkerpsychologie, vii. 461), ʻrāb means Beduineing, transferring into the language of the Beduins. V. v. Rosen similarly interprets it (Zeitschr. d. Deutsch. Morgenl. Ges., xxvii. 170): "to speak as a genuine desert Arab". Vollers (Volkssprache und Schriftsprache im Alten Arabischen, p. 141) entirely agrees with Wetzstein; on the other hand, Woldeke (Beiträge zur semitischen Sprachwissenschaft, p. 5) says that the application of the term to the Beduins is only that men speaking pure Arabic at the time is "indeed possible but is uncertain". The obvious thing may be here too the most probable. ʻAṣrāb, the verbal noun of which is ʻrāb, means primarily, to arabicise, to give a word an Arabic form, to pronounce it in the genuine Arab way; the word is commonly enough applied, particularly also by Sibawaih, to foreign words adopted into the Arabic vocabulary in which case there is of course no possibility of a reference to the Beduins, as the contrast between ʻAṣrām and ʻArab, non-Arabs and A rāb s, is obvious. If we reflect that the cradle of Arab learning was in the ʻrāb with its population, predominantly Aramaic and Persian, whose language completely failed to distinguish cases and moods, that the latter must have been the most striking characteristic of Arabic in contrast to the foreign languages with which they were acquainted, especially as according to good and abundant evidence it was particularly difficult for the non-Arab proselytes, who contributed a strong contingent to the linguistic scholastic, so that they frequently found it a stumbling block, one will find it quite natural that ʻrāb "arabicising", by narrowing of meaning should come to have the above limited technical meaning; ʻrāb
is therefore at bottom only arabisation کارلِ 'Iraq. How much 'Iraq was considered the exclusive advantage of the Arabic language is clear from the passionate polemic of Ibn Fāris [q. v.], against the assertion that the Greeks also had an 'Irāk (Goldziher, Muh. Studien, i. 214).

Bibliography: A very useful survey is given in the first sections of the Adhurunmya of Şanfadji in Brünnow [Fischer's Christenmth.] chapters 2, 7, 40, and 41 of the Asrār al-Arabiyā of Ibn al-Anbārī are more detailed and very suitable as an introduction to the controversies of the Arab grammarians. For the rest the student must be referred to the older grammars in Arabic.

Al-'Irāk, also called al-'Irāk al-'arabi in contrast to al-'Irāk al-'adjami. In the older period al-'Irākān, the two 'Irāks', meant the two oldest Muslim towns in the country, Kūfa and Bāṣra (Yakūt, ii. 628, 11 sq.). Later this name was applied to al-'Irāk and al-Dībājī [q. v.] together; Yakūt iii. 15, 18 knows al-'Irāk alone as the name usual among the Persians for al-Dībājī and explains this by saying that the Sādījūk ruler who held the 'Irāk also conquered al-Dībājī. As he lived in Hamadhān, the people referred his title as 'Lord of the two 'Irāks' to the province of which this was the capital; it is however rather to be assumed that the Sādījūk, called himself 'Lord of the two 'Irāks' (with a well-known muhālah gaḥda) and that the people began to call the eastern part of the kingdom 'Irāk also, at the same time differentiating al-'Irāk al-'adjami and al-'Irāk al-'arabi.

The meaning of the name is uncertain. The Arab hypotheses are not satisfactory: a ṭārār = lying ground, according to Ibn al-Arbīt in Yakūt, ii. 629, 13 sq.; a 'coastland', according to al-Kindī in Yakūt, iii. 628, 21 sq. At the same time the 'Irāk is called al-Sawād, i.e. the country of a dark colour, owing to the cultivated land, in contrast to the bright white-yellow steppes, the contrast between the two being expressed in the names by the Beduins, who are very susceptible to colour effects. But the two names are not synonymous: sawād is a movable term, 'Irāk is fixed; one talks of the sawād of Kūfa, but not of the 'Irāk of Kūfa. Balkhi's statement (Iṣlākhār, p. 85; 3 Ibn Hawkal, p. 166, 1 sq.) is typical: 'Between Baghdād and Kūfa lies a sawād with a network of cultivated fields' which shows no gap'; this is a statement based on a correct general conception. It consists only of one long strip, very broad, strip of valuable fertile country running from N. to S. in the 'Irāk and, if one wishes to describe the canal system, this continuous fruit garden must be taken as a basis. In Ibn Khurdiši in which there is still a memory of the name which 'Irāk had under the Persian kings: dint Erāshahr, which he translates 'the heart of the 'Irāk' (5, 18 sq.: cf. Ibn Rosta, p. 104, 4); this agrees with the fact that al-Khwārizmī understands by Erāshahr Persia including the 'Irāk, and that, according to Yazd al-Fārisī, the whole of 'Iraq was compared to a body of which the head is the 'Irāk, similarly also Aṣmāyī (acc. to Yakūt, p. 417). The first Persian name of the 'Irāk was Sarāin (Baladurī, p. 276, 5; Ibn Rosta, p. 103, 22 sq.; Maṣṣūdi p. 177, 1; Taṣbar, i. 89, 4; cf. Noldeke, p. 15, Note 3). The following details of the Geography and History of the country may be given here:

The Encyclopaedia of Islam, Il.
it lay Wasi't; unfortunately however the exact site of this town is not known; the latest travellers to visit the ruins (Koldewey and Moriitz) did not describe them (Sarre and Herrfeld, Archäolog. Reise, i. 247). The Shaft al-Iday, on which Lynch in 1838 was able to travel in a steamer and on which it is still said to be possible for a part of the year to reach Sufk al-Shiyukh, entered the swamps (al-Batäth [q. v.]) at al-Kair, through which it reached, under the name Nahr Abi l-Asad, the Dijlja al-Awra'; the "one-eyed" Tigris, identical with the pre-Muslim and modern Tigris. The Euphrates divided somewhat below al-Musaiyib into the two arms, the western, called the "Hilla" by the ancient Arab, the eastern; since the main stream was turned forcibly into the Hilla arm, the bed of the Hilla arm has been in danger of drying up; it was not till the Hillya Dam was finished at the end of 1913 that the waters were fairly distributed. According to Kudama, the western arm, which makes a slight curve to the west, is called al-Alami (p. 233, 16 sq.; so also Masuli'd, Tonikht, p. 52, 5); and the eastern arm is called Surat; the former runs towards al-Kufa and is lost in the swamps; the Surat arm, more accurately Nahr Surat al-A'la (Ibn Serapion, p. 28), passes the important town of Kafr Ibn Alhabara (ruins a little north of Babel, Tell Irman 'Ali); 6 farsakh below Kafr Ibn Alhabara the upper Surat passes into the lower Surat canal; its direct continuation eastwards is called Surat al-Kabira, and after passing the town of al-Nil it is called Nahr al-Nil and reaches the village of al-Hawl (4 miles from al-Nu'man'ya on the Tigris), where one can tranship cargo and sail direct to the Tigris or turn to the south, reaching the Tigris at Nahj Sabeq (opposite Madhara', which lies on the east bank) (on the subsidiary name Zab, S. zahri, see Marquart, p. 164). The lower Surat (Surat al-Asfal) passes several places, among which the locality called al-Dajami'an by Ibn Serapion is the al-Hilla of the later geographers (found about 495 = 1102 by the Masaddyi Saif al-Dawla); this arm is the modern Hilla arm; at al-Hilla a canal branched off to the S. E., the Nahh Nars, said to be called after the Sasanid Nurses (292) who ordered it to be made. The Surat and the Nars finally pour their waters into the Budæt canal (budat, Yâkib, i. 770), which crosses the northern edge of the Batäth and is taken from the western arm of the Euphrates, a day's journey north of Kufa near al-Kaniqur, which is apparently identical with the Aramaean Pumbedita (= Jam al-Budat); the celebrated centre of Jewish scholarship (mentioned by Benjamin of Tudela in the xith century); after it takes the waters of the Surat and Nars, the Budat (Euphrates arm) after a course of about 40 miles enters the great swamp.

The two main rivers were joined higher up by canals, in addition to the above waterways. The important canal, Nahh Djudjil, which branched off from the Euphrates near al-Rabb (9 miles from Anbar, 16 from Hilt) and reached the Tigris between Ukhba and Baghdad, does not belong to the Irak but to al-Djazra which adjoins it on the north; it sent off numerous branch canals into the districts belonging to the Irak (Maskin, Ka'trabbul); this canal, it appears, was silted up in 340 (951), and its name was transferred to an arm which branched off from the Tigris not far from Samaaret. From al-Anbar onwards four canals leave the Euphrates: 1. Nahr Isä; its course is not certain but it may in general be identified with the modern Nahr Shaklawiya; it is called after Isä b. 'Ali (Ibn Serapion: Mosis): 2. Abdallah b. al-'Abbâs, whose kair lay only a little above the junction of the canal and the Tigris, within the zone of the city of the Caliph; according to Ibn Serapion (p. 14, and Yâkib, iv. 542), it left the Euphrates at Kantarat Dimimma (Abu l-Fida', p. 52, 14, has Dukannâ, which is probably simply a mistake for Dimimma); Abu l-Fida', i.e., also says (on the authority of Sulaimân b. Muhammad) that the canal comes from a place below al-Anbar (on the English map it is entered as "Sifera" on the north bank of the Shaklawiya, 6 miles from its beginning) near al-Faluddja; it irrigated the tashlidj Fersakshir; at al-Mawal, a number of canals branched off towards Baghdad; it entered the Tigris below the Kafr Ibn Alhabara; on the English map the Shaklawiya canal runs through the lake of Akkar Kuft. i.e., 3. Abra'aj of the geographers (e.g., Yâkib, iii. 697) which is assumed to be at the south end; Le Strange wishes to locate the Muhjawal of Ibn Serapion there; on R. Kiepert's map in Oppenheim's book, the Khair of the Shaklawiya is called in the southern part Khair of the Asadjet; not far from the beginning of the canal, west of the Euphrates, on the English map is marked the Habbania (Hibbehiana) lock, which is one of the main works in Willcock's irrigation scheme; on Mutha's plan for draining the Shaklawiya swamp, see Oppenheim, ii. 281; a different account is given by Balkhi (Istakhri, p. 84 sq.); Ibn Hawkal, p. 165); according to him, small streams run off from the Nahr Isä which again join together to form a stream, the Nahh al-Sarrat, which enters the Tigris, while the main stream, Nahr Isä, itself reaches the Tigris in the middle of Baghad: ships can sail on it to its end, while navigation is not possible on the Nahr al-Sarrat on account of the weirs; 2. Nahr Sarrar branches from the Euphrates 3 farsakh (about 12 miles) below Dimimma, flows through a part of the district of Baduryat (spelled -raya in Yâkib, i. 460, this is not correct; it can only be -raïya or -raya) and reaches the Tigris 3 farsakh (16 miles) above al-Madain; so Ibn Serapion, p. 15; according to Balkhi (Istakhri, p. 85; Ibn Hawkal p. 166), the network of canals which intersects the continuous Sawad between Baghad and Kufa (cf. above p. 513) begins with the Nahh Sarrar, on which lies the little town of Sarrar, 3 farsakh from Baghad according to Yâkib, iii. 381, who says that the Nahr Isä is sometimes called Nahh Sarrar; there is obviously confusion with the Nahh al-Sarrat, on the connections of which with the Nahr Isä, see just above; 3. Nahr al-Malik, branches from the Euphrates 5 farsakh below the Nahh Sarrar and reaches the Tigris 3 farsak below al-Madain; it is also the name of a tashlidj in the Sawad; (so Ibn Serapion, p. 16); Le Strange's statement (p. 68), that the Nahr al-Malik began at al-Faladja is incorrect; this is impossible, for this distance is only about 12 miles from the head of the Nahr Isä, while the head of the Nahr al-Malik is at least 30 miles from that of the Nahr Isä and should be sought on the maps somewhere about Khan Makdam; Nahr al-Malik was also the name of one of the four tashlidjs of Bihkubidh al-Awsat, while the two Faluddja were tashlidjs of Bihkub-
A small text reference about the geography and history of Iraq is presented, discussing the Tigris River, the Euphrates, and their tributaries. The text mentions the importance of these rivers as sources of irrigation and transportation. It also refers to historical events and political changes affecting the region.
tertius gaudens. The only clear revelation on foreign politics which survives (others have been lost) hopes for the victory of the defeated Byzantines (Sütra xxx. 1): a weakened Persia was the interest of the Arabian policy of conquest, the guiding spirit in which from the first was 'Omar. The war on two fronts was taken up with a boldness which cannot be sufficiently admired. The conquest of Syria and of the 'Irāk was completed so thoroughly that 25 years after the death of the Prophet the crisis of the first civil war could be passed without serious consequences. The conquerors fell upon the 'Irāk in full strength and here they won their first great victories. In strong, sudden blows the Persian outposts on the Euphrates were taken and the advance relentlessly continued until in the battle of Nahāwand (21 = 642) the Sāsānid power was overthrown. With great skill the Arab generals created a strong base of operations about 400 miles long with the camps of Baṣra and Kūfah as its eastern and western termini (the whole of the materials on the founding of these two cities is given by Caetani, years 16, p. 238 sqq.; 17, p. 13 sqq.). The rich capital of the country, Ktesiphon, which consisted of a group of towns, was ruthlessly plundered and destroyed and the foundations of a new fortified town were not laid upon it, but on the ruins the unimportant al-Maḍā’in (see Noldeke, p. 16, note 1; Streck, p. 246—279) dragged on a miserable existence till it was absorbed by Baghdaḍ. Great care was devoted to the administration of this part of the young empire by the far-seeing 'Omar. Kūfah and Baṣra received separate governors, and that of Kūfah was at first Sa‘d b. Abī Waqāṣah, who was left with the charge of the two important churches. It was taken at the wish of the constantly grumbling Kūfah by A‘mmār b. Ya‘ṣir [q. v.] who was not fit for the office; he was succeeded by Mughira b. Shu‘ba, who had been dismissed from Baṣra on account of a scandal, until Sa‘d was restored to office (25 = 646); then followed al-Walid b. ‘Ukbah (25—30 = 646—650) and Sa‘d b. al-Aṣi (30— 35 = 651—654). Baṣra was more stable; there Abū Mūsā al-Aṣgharī [q. v.] ruled from 17—29 (= 658—660); he played an active part in settling the quarrel between ‘Ali and Mu‘āwiyah before the battle of Siffin. He was succeeded by ‘Abd Allāh b. ‘Amir [q. v.] who hurried to the help of ‘Othmān but arrived too late. In 35 (655) ‘Ali sent to Baṣra ‘Othmān b. Ḥunayfah, and A‘mmār b. Shu‘ba to Kūfah. Ziyād Ibn Abīthībī (cf. Lammens’ monograph) sent by Mu‘āwiyah as governor to Baṣra in 40 (655) became ruler of the whole of the ‘Irāk in 50 (670) and by a salutary firmness restored order in the turbulent country. He died in Kūfah in 53 (673), before his “brother” Mu‘āwiyah; his son ‘Abd Allāh became governor of Baṣra and Kūfah in 55 (675); under him Ḥusain b. ‘Abī [q. v.] met his death and he persecuted the Shi‘a. An important change in the fortunes of Baṣra took place when in the period of confusion after Yazid’s death (680), the Tamīm, the northern Arabs of Baṣra, fell to ‘Abd Allāh b. al-Zubair [q. v.], as did the people of Kūfah. The ‘Irāk seemed to be lost to the Omayyads for a time. The efficient ‘Abd Allāh b. al-Zubair, who was firmly established in Mecca, appointed his governors in the ‘Irāk; the bold and cunning guerilla leader Mūkhāṭir in 66 (686) was able to expel the governor of Baṣra, but in the next year he fell in the battle of Ḥarūrāt near Kūfah. The death of Mu‘āṣir b. al-Zubair essentially altered the situation; his best officer, al-Muhallab, joined ‘Abd al-Malik [q. v.] and the governor of the Damascus government submitted to him (72—694). The Khāḍijah were a source of continual uneasiness; they were spread over the ‘Irāk and adjoinging Khāḍijah; they never permanently held a dominating position and were opposed by all the other parties. The governorship of Kūfah was sometimes combined with that of Baṣra, but in that case the governor-general had deputy governors under him. We know of the following governors of Kūfah: 53—55 (673—675) ‘Abd Allāh b. Khālid, 55— 58 (675—678) al-Dalḥākh b. Ka‘īs, 58—59 (678— 679) Ibn Umm al-Hakam, 59—60 (679—680) al-Nūmān b. Bāshir; 64 (684) we find ‘Amīr b. Ḥurairah (Ibn al-Aṭhar, iv. 109) as deputy (ghālīf) of ‘Ubaid Allāh (cf. under Baṣra) in Kūfah; in the same year Muḥarrīn appeared in Kūfah, where ‘Abd Allāh b. Zubair had a governor. In Kūfah in 75 (694), the activity of al-Hādīdji b. Yūsuf [q. v.] began; he had been appointed governor of the whole of the ‘Irāk by ‘Abd al-Malik and his able and energetic administration suppressed all rebellion. The revolt of the Baṣra, who had joined the pretender ‘Abd al-Rahmān b. Muḥammad b. al-Asbath [q. v.], was finished by the battles of Dair al-Djamīm [q. v.] and Maskin (83 = 702). Al-Hādīdji took efficient measures to put an end to the seditious activities of the towns of Kūfah and Baṣra; he created a centre of economic and intellectual life for the ‘Irāk in Wāṣif on the Tigris (Ṣaḥṭ al-Hayī), from which Kūfah and Baṣra, which were not too far distant (Kūfah 120 miles and Baṣra 180), could be ruled. ‘Abd al-Malik’s administrative institutions were also of great benefit to the ‘Irāk; their fundamental principle was that of unity, which was indispensable for a healthy development; the most important was the reform of the currency, which began in the year 75 (694) and replaced the Byzantine and Persian coins current in the empire by coins with Arabic legends (the older emblems were retained on some of the copper coinages; on the silver in some parts of the empire the bust of Khusraw and the fire altar were retained and only the confession of faith was placed on the margin). ‘Abd al-Malik acquired further merit by organising the postal service although it was only used for carrying persons and messages in the interest of the government. Finally Arabic was ordered to be the official language; previously official documents had been in the language of the country or in it and in Arabic. Under al-Walid also (766—775 = 705—715) al-Hādīdji retained his peculiar position. The figure of this man, in spite of the contradictory, on the whole unfavourable, accounts of the Arab annalists is still quite distinct to us. We know that there was a whole school which systematically depicted in black colours all that the Omayyads did, especially all the actions of their great statesmen; this is the ‘Irāk school, the chief representative of which is Sa‘īf b. ‘Omar (clearly elucidated by Wellhausen, cf. Caetani, year 21, p. 305). Unbiased historical research will do justice to the merits of al-Hādīdji; but it must confess that one element in his administration had a pernicious influence on the development of the whole empire: that was the way in which he favoured his northern Arab countrymen, the Kaisiun. Therefore all the Yamanis in the army and the government and all elements in the population who sided with the
Yamanis were against him, as were also the 'Alids, whose pretensions he ruthlessly combated. He took energetic measures against all men who fought for their particular interest, al-Muhallab, who used every party, then it seemed to be for his advantage. The tension produced by al-Hajjajib's ruthless procedure did not find full vent in explosion, as al-Walid, a true son of his father, by his cautious and clever policy was able to avoid fatal outbursts of the principal feud, viz., that between the Kaisis and the Yamanis. The storm burst as soon as al-Walid had died, for his brother Sulaimân who followed him (96—99 = 715—717) was under the influence of the enemies of al-Hajjajib, the embittered Yamanis. Al-Hajjajib was spared the pain of the change, for he died six months before al-Walid. The new epoch which began with Sulaimân first showed itself in the appointment of Yazid b. al-Muhallab, one of the most dangerous intriguers and agitators, as governor of the 'Irak (95 = 714). The new lord began a reign of terror: the most prominent men of the North Arab party were persecuted and ill-treated. With Sulaimân's death there began a period of government by factions, which at every change in the throne resulted in intolerable uncertainty and dangers. 'Omar II, son of 'Abd al-'Aziz b. Marwan, checked the activities of Yazid b. al-Muhallab for a time by imprisoning him (in the citadel of Aleppo, Ibn al-Athir, v. 36); scarcely had 'Omar died (101 = 720) when Yazid escaped; the rebellion which he at once stirred up in Basra was suppressed by Maslama b. 'Abd al-Malik (102 = 721); as a reward his brother Yazid II (101—105 = 720—724) appointed him governor of Khorasan, Basra, and Kufa, separate deputy governors for them being placed in them by Maslama. The appointment of Khalid b. 'Abd Allâh al-Kasri as governor of the 'Irak by Hishâm (105—125 = 724—742) had a beneficial result. With the death of Hishâm, however, the complete confusion prevailed throughout the empire; passions were vented without restraint, and the factions of North and South Arabs into which all prevailing antipathies almost all other differences were merged, fell on one another. Al-Walid II who followed Hishâm was a Kaisi fanatic who had al-Kasri cruelly executed. In Marwan II (127—132 = 744—750) a Marwânid once more took energetic steps against the rebellions. In the 'Irak, he also put down Khârijid risings. But the flame which the cunning 'Abbasids Abu l-Abbas (al-Saffah) and Abu Dja'far (al-Mansûr) kindled in Khorasan was no longer to be extinguished. Their general Abû Muslim in 130 (748) won the decisive battle against Marwan's governor, Nasr b. Sâyâr. The governor of the 'Irak, Ibn Hâbara, could not check the evil. The Yamanis in Kufa rebelled and gave up the city to the enemy and it became for a time the headquarters of the 'Abbasids. Marwan himself was decisively defeated on the Great Zab in 132 (750). The 'Abbasids took the place of the Omayyads.

Going back for a moment we may mention a political principle introduced by Mu'awiyah and maintained by his successors as a regular rule, but for which the Omayyads could only have disappeared more quickly. Mu'awiyah succeeded in consolidating his rule in the 'Irak and in Arabia and Islamising the country in a relatively short time by his policy of wise moderation, which was seen especially in the consideration he paid to the inclinations of the people and in the introduction into the army of the principle of territorial military service. While at first the troops of the 'Irak were of foreign origin, stationing them in a few depots, the numerous conversions of the Isma'ilis soon supplied sufficient men for the local forces.

The fact that these troops were not used outside the country or only in campaigns against the east had the disadvantage that the enemies of the Omayyads were able to find a strong support in them. Abû Muslim fought with 'Irakis and Persians against the Omayyads, who only had the Syrian troops on their side. In the civil administration also Mu'awiyah and his successors showed themselves far-seeing statesmen: although they did not allow the 'Irakis to choose their own governor, but imposed rulers upon them, yet they wisely gave way to appeals and changed the individuals, an unimportant concession which in no way meant an alteration of the system. In yet another way the Omayyad rule was beneficial to the 'Irak. These rulers recognised that the 'Irak with its agriculture, dependent on special methods of cultivation, required to be administered with particular care; neither arbitrary interference nor complete laissez faire were here suitable. In not a few cases the representatives of the central government saw to improvements proposed by the natives, like Maslama, the Caliph's brother, who built a canal. The economic results of the Omayyad rule in the 'Irak are to be all the more highly appreciated as they had to reckon with the hostility of the population (Kufa was in the hands of the Shia, Basra in the power of the Khârijis). The difference between Syria and the 'Irak during the Omayyad period is that in Syria there was union and coherence and in the 'Irak continual strife. The Shia and Khârijis troubles have already been mentioned as well as the fighting between North and South Arabs, who opposed one another in the 'Irak under the names 'Tamim' and 'Azd'; in spite of these troubles the great Marwânid succeeded in lessening the differences and bringing about a certain degree of coherence in the whole empire. The turn given to the Muslim empire by the victory of the 'Abbasids seemed likely to make the unity permanent. The transference of the Caliph's capital to the new city of Bagdad consolidated the connection of the regions belonging to the central zone. On the other hand, this measure already concealed the germ of decay, since the west could no longer be commanded from Bagdad, while this move did not result in a firmer authority over the eastern territories. Yet the area within the immediate sphere of the Caliph's influence, with Egypt, Syria, Mesopotamia, the 'Irak, and Persia, was still so important both in territorial extent and in values inherited from the pre-Muhammadan period that the 'Abbasids and their statesmen might have been able to build a permanent structure of indestructible political power and economic prosperity. Under al-Mansûr and his immediate successors to al-Ma'mûn this great empire was a type of a political magnitude such as had hardly ever been attained before and can only be compared with the Roman empire under Hadrian. The Roman empire and the caliphate under the early 'Abbasids are hypertrophied structures, they are colossal with feet of clay. The imminence of collapse is the mark which they bear on their brows. In the causes of their decline they have much in com-
mon, but each of them had besides its own special conditions. The error in the structure of the caliphate, which was bound to prove fatal, lay in basing the sovereignty of the dynasty on aristocracy of birth and religion. Alongside of the clan which championed this was another of the same character which unceasingly endeavoured to make good its claim and to work for the overthrow of the dominant clan. The latter were the descendants of ‘Ali and Fāṭima, whose partisans formed themselves into a politico-religious party and were a great danger, not so much on account of their numbers, for then as now they cannot have numbered more than a tenth of all Muslims, but they formed the most intelligent and most industrious part of the Muslim population. Besides the clan and religious elements in the feud there soon appeared a third, the racial. The predominant majority was Arabic. These Arabs treated the Persians with contempt; the latter had also to attach themselves as clients to an Arab clan. Their ill-treatment led them to join with the other group, the Shī‘a; ‘Ali “the followers of ‘Ali”, who were severely oppressed by the dominant clan and its government. Their common sufferings formed a strong bond of union. A religious and nationalist party grew out of the at first purely Arab Shī‘a. “Persian” and “Shī‘a” gradually became synonymous. The danger was at first averted: a skilful policy bridged over the differences for a space of about 40 years. The Caliph Alīsār, the second ‘Abbasid (136—158 = 754—775), summoned a prominent Persian, named Khālid, of the Barkak family, said to be related to the old royal family, to rule in the Caliph’s stead. His successors, unusually capable and clever men, this family attained an almost autocratic position. This period marks the zenith of the political power and economic prosperity of the caliphate, while at the same time a civilization flourished that was conditioned by a limited external adaptation to the great cultural elements which the conquering Arabs found in Syria and Babylonia; but the foundations for a further prosperous development were not created. Nor could it be otherwise; for the system of government which at the very beginning of the Omayyad period had replaced the originally democratic principle was based upon the idea that the prosperity of the Muslim community was secured by placing at the head of the government the man most worthy of this office. To exercise his control perfectly he had to have unlimited power and very soon this conception of the caliph became accepted to such a degree that he was actually regarded as the “Shadow of God”. In practice this absolute ruler was usually not only not the most worthy but frequently one who had the gravest moral defects and at the same time a plaything in the hands of those who exploited the community in his name. In an administration of this kind two tendencies developed in a most disastrous fashion: the formation of gigantic fortunes and the development of the “priesthood” of one particular theological school. At the same time a number of adventurers arose who troubled little about the superman on the Caliph’s throne. The caliphate broke up into a number of communities which existed almost independently alongside of one another. In each of these communities developments followed the course settled by local conditions. The ‘Irak also followed its own devices. From the beginning of the ‘Abbasid rule to the end of the ‘Abbasid period it was a province of a kingdom whose centre was in Persia ‘Irak, but there was no marked policy of interference by the rulers; provided that the inhabitants bore patiently the oppression of their foreign masters and their heavy demands for money, they were allowed liberty to maintain their national life. The revival of the authority of the caliph under the vigorous Caliph al-Nāṣir brought no essential alteration. This period, besides, was soon ended by the Mongol invasion.

In the long period of the ‘Abbāsid rule the ‘Irak suffered many vicissitudes. When the caliphs were strong, the conflicts between the various elements and the aspirations of ambitious adventurers were speedily crushed; otherwise, the land suffered considerable unrest; for the Kūfa and Bātra people were incurable as regards their main faults. The new capital attracted the worst elements to itself; at the same time the revival of economic prosperity brought masses into the country who when the time came could be stirred up by ambitious individuals, as for example happened with the rebellion of the Zanji imported from East Africa; finally, the religious fervour which was glowing beneath the ashes, again and again burst forth in burning and consuming flames. The extraordinary skill with which the Barmakids and, under their guidance, three caliphs maintained the delicate balance between Arabs and Persians, was lacking when the Barmak family was destroyed. The extermination of the Barmakids which resulted in an essential alteration in the ethnic balance of power in the ‘Irak, meant that the policy of co-operation between the two main elements, the Arabic and Persian, was at an end. The overthrow of the caliphate first showed itself in a series of ‘Alid troubles, which began with the rising of Ibn Ta'bātah (199 = 815). The capital stood by the Sunni caliphate and even went so far as to oppose the Caliph himself when the latter in pursuit of an untenable policy of conciliation made the mistake of planning to give the succession to the ‘Alid Imām al-Riḍā as husband of his daughter and adopting the green colour of the ‘Alids. As soon as he saw his mistake, he undid his measure not without the use of force. The extermination of the Barmakids did not conduce to the strengthening of the political power of the Arabs in the ‘Irak, but to its destruction, for the dislocation of the intimate relations between the provinces led to the introduction of a new element into the court service and thus into political life. Al-Mu'tasim created for himself a Turkish praetorian guard and lived under its protection in Sāmarrā which was founded by him. The Turkish force with which the caliphs surrounded themselves stood alone and the existing Arab bodies of troops fell into the background before it, as the former had much more energy and soldierly spirit. The people thus became unfit to defend themselves and were at the mercy of those who ruled the land with the help of foreign troops, either as the appointed representatives of the Caliph or as usurpers who entered the land by force. These foreign bodies also endeavoured to gain control of the other provinces. We have already seen that Turkish families gained the ruling power in Egypt and therefore in Syria, but this did not mean the
coming of a system of regionalism, although the land
furnished hardly any troops worth mentioning.
In the Irāk under al-Mu'tawakkil Turkish prea-
torians came into power and made any orderly
government impossible. The caliphs with a few
exceptions (al-Mu'ta'did 892—902) and al-Muqtāfi
(902—908) were utterly incapable and occasion-
cially criminally self-seeking. The struggle for power
around the caliph, that is for the office of genera-
lissimo (Amir al-Umāra), came to an end for a
time through the rise of the Būyids (354 = 945),
who ruled the two Irāks, Babylonia and Media
(cf. the beginning of the article). During the
great disturbances which attended the complete
collapse of the decadent Būyid family and the
rise of the strong Turk family of Saljūqūs (447 =
1055) a peculiar combination arose: a Turk ge-
neral of the Būyid army, Arslān al-Basāsīrī [q. v.],
rules for a short time in the Irāk in name of the
Fātimid al-Mustanṣīr (451 = 1059). But as a
result of the great distance between the Irāk
and Egypt and southern Syria (the inhospitable
Syrian steppe makes it necessary to take a devious
route via north Syria) there could be no question
of real Fātimid rule in the Irāk. The interver-
vention of al-Basāsīrī was an episode which very
soon passed. The Saljūqūs, who appeared as the
main champions of the Turks and held the caliph
completely in their power, also considered them-
selves the protectors of the true Muslim doctrine
and persecuted the Shi'a wherever he raised its
head in the Irāk. Although they showed an in-
clination for Persian culture (the great Sāljuqūs
resided not in Baghīdād but in Isfahān), they did
not interfere with the Arab culture of the Irāk.
The temporary redemption of a certain amount
of power by the caliphate under Naṣīr al-Dīn made
only slight alterations in the political and religious
conditions. The Irāk became an easy prey to the
Mongol conqueror Hülagū (656 = 1258), and its
capital Baghīdād sank to be a minor provincial
town on the extinction of the caliphate. The
de-solation of the country, which as a result of
the complete neglect of organised irrigation had begun
as early as the beginning of the xth century, con-
tinued. The Irāk became steppe country with a
few large villages and which cultivated stretches on
which the cultivation of the earth was already a
matter of some importance. The incorporation of
the Irāk in Persia by the powerful Ṣafawī Shāh
Īsmā'īl (915 = 1509) was not permanent. The
country very soon (941 = 1534) fell to the Otto-
man empire, of which it was a province until 1918.

(M. Hartmann.)

IRAM, the name of an individual or tribe
which occupies the same position in Muslim gene-
alogy as Aram in Biblical, as may be seen from
a comparison of the Muslim series 'Ūss b. Irām b.
Shem b. Noah. The Muslim line probably, like
many others, entered historiography under Jewish
influence and therefore gives us no new information
regarding the dissemination of Aramaeans in Arabia.
The name is identified with that of the Irām
Dāšt al-'Imād discussed below, the vocalisation
of which was established. Perhaps this explains why
the Muslims say Irām instead of Aram.

Tradition has still further developed the con-
nection with the Aramaeans. The people 'Ād [q. v.]
were called Irām; when the 'Ādis were destroyed,
the name Irām was transferred to Thāmūd whose
descendants were thought to be the Nabateans of
the Sawād. It was also known to Muslim scholars
that Damascus in ancient times was called Irām
i.e. Aram.

Bibliography: see the next article.

IRAM DĀŠT AL-'IMĀD occurs in the Kurān
only in Sūra 89: 6: "(5) Hast thou not seen how
thy Lord dealt with 'Ād, (6) Irām dāšt al-'Imād, the
like whereof hath not been created in the lands".

The connection between 'Ād and Irām in these
verses may be interpreted in various ways, as the
commentaries explain at length. If Irām is taken
in contrast to 'Ād, it is intelligible why Irām
also has been taken as a tribal name; 'Imād
could then be taken in the sense of "tent-pole".

According to others, the poles are a description of
the giant figure of the Irām, which is thus particu-
larly emphasised. If Irām stands in idāfa to 'Ād,
it is more probable that Irām dāšt al-'Imād is a
geographical term: "Irām with the pillars". This
is the prevailing opinion among Muslims. What is
exactly referred to, however, is a point on which
opinions differ widely both in east and west.

According to Yākūt, the view most frequently held
is that which considers dāšt al-'Imād an epithe-
ton of Damascūs [q. v. i. 9035]. Dājrūn b. Sa'd b.
'Ād [see Damascus, i. 904b] is said to have
settled here and have built a town adorned with
marble columns. Loth has used this tradition in
support of his view that only Aramaic traditions
are associated with the name Irām.

Iram, however, is frequently referred by Muslims
to South Arabia to which 'Ād also belonged. 'Ād
had two sons, Shaddād and Shadīd. After the death
of the latter, Shaddād subdued the kings of the
world; when he heard of Paradise he had a town
built on the steepes of Aden which was to be an
imitation of Paradise. Its stones were of gold and
silver and its walls studded with precious stones, etc.,
then Shaddād, after neglecting the warning of Hūd
[q. v.], wished to see the town, he was destroyed
by a tornado with his whole retinue a day's
journey from Irām and the whole town buried
in sand.

In a tradition given by al-Maṣūmī (ii. 421) the
story does not have a tragic ending. After Shad-
IRÂN. [See Persia.]

IRATEN, Berber AIT IRATEN (cf. Ait), Arabic BANû RATEN, a tribe of Great Kabylia, whose territory is bounded on the north by the Sebou, in the west by the Wâdi Aïsi, which separates them from the Banû Yenni, in the south by the district of the Ait Yahyâ and in the east by that of the Ait Frausen, and forms a hilly country from 3000 to 3500 feet in height, yielding olives and figs and some corn. The inhabitants are settled in several villages, of which the most important are ʿAden, Tawrît Amokrân, Usammîr, and Agemun. To-day the Banû Raten form a single dwâr community (cf. Dôrâr at the end) of 9781 souls belonging to the mixed community of Fort National.

We know little about the history of the Ait Irate. Ibn Khalûd (Hist, des Berbîres, transl. de Slane, i. 256) mentions them as inhabitants of “the mountains between Bougie and Tedelys”. They were nominally under allegiance to the governor of Bougie and were on the list of tribes liable to kharrûd, while they were actually independent. At the time when the Mârâbî movement undertook his campaign to Idrîkiya, they were subject to a woman, called Shamsî, of the family of the ʿAbd al-Samad, from whom the chiefs of the Ait Irate were descended.

During the whole Turkish period, the Ait Irate maintained their independence, secure behind their mountains. They formed one of the most powerful federations in Kabylia, which comprised five arch: Ait İrdjen, Akermâ, Usammîr, Auggâsha, and Umâla, and could put in the field a force of 2800 men. They kept their independence until in 1857 the French under Marshal Randon for the first time penetrated into the Kabylı mountains (DJebel Djarjura: cf. Algérie, i. 270). To prevent a hostile invasion of their territory the Ait Irate arranged to give hostages and to pay tribute. Nevertheless, their land remained a hotbed of intrigues against French rule, so that Randon in 1857 decided to subdue them completely. The French troops leaving Tizi-Uzx on May 24 conquered all the Kabyl villages in succession, and on May 29 destroyed the army of the Ait Irate and their allies on the plateau of Sûk al-šârî. On May 26 the Ait Irate offered to submit. To keep them in check Randon at once began to build Fort Napoléon (now Fort National) in the heart of their country and thus placed “a thorn in the eye of Kabylia”. The Banû Raten were then quiet for 14 years, but in 1871 they again had recourse to arms and took part in the siege of Fort National, which however the rebels did not succeed in capturing.

See also bibliography to KABYLIA. (G. Yver.)

IRIBD or Arôd (corruption of an older Arôa, see the following article), the old town (of which the ruins only now exist) of Arôa, on a hill on the road from Tiberias through the so-called “Dove Ravine”. Among the ruins those of a synagogue are noteworthy (see Kohl and Wat-
zinger, *Synagogenvrouwen in Galilea*, p. 59 sqq.).
The remarkable rock caves in the neighbourhood played an important role in later Jewish history. Tradition places here the tombs of the mother of Moses and of four of the sons of Jacob, Dan, Issachar, Zebulon and Gad.

Another Iribid–Arabid, likewise an ancient Arabela, lies in the district of Balṣa (q. v.), 12 Arab miles from Baṣṣān. There the Caliph Yazīd I died.

**IRIBIL,** the name of various places in Mesoopotamia:

1. a town in the wilayah of Mōsul, about 50 miles E.S.E. of Mōsul, 12 hours N. of Alīyun Köprü (see i. 322 b) in 36°10' N. Lat. and 42°49' E. Long. (Ornamented Iribil in the common language also Arbil) is the Arba-iliu of the Babyloni-an-Assyrian and the Arbira of the Old Persian cuneiform inscriptions. This place, which is mentioned as early as in Assyrian documents of the 6th century B.C., played no special political role in antiquity. Its main importance was rather based in the pre-Achaemenid period on the possession of a highly venerated sanctuary of the goddess Ištart. Arbailu was the Delphi of ancient Assyria; at the same time however it was of great importance as the junction of caravan roads. It is mainly to this favourable position at the junction of roads that Arbailu owes the fact that it has survived as an existence and a name alone out of the famous cities of Assyria.

Iribil, almost equidistant from the two rivers named Zāb, formed from the earliest times the centre of the district cut off on north and south by these two rivers. In ancient times this was called either Arbaili, after the capital, or, from the Zābs, Adiabene (the Ḥedayab of the Syrians). It practically coincided with the "land (ord.) Iribil" of the Arab geographers. As after the decline of Niniveh, Arbela was the only important town of Assyria proper, the name Adiabene was later extended to Assyria (even as early as the time of the Diadochi). Adiabene was then also interpreted in this wider sense. In the second half of the second century B.C. a small kingdom arose there, which was able usually to maintain its independence during the Parthian period. Under the Sāsānids Iribil was the residence of governors, who occasionally enjoyed very great independence. One of these, Kardaghe, who lived in the citadel of Mēlšī near Iribil, suffered a martyr's death in 358 under Sapor II for adopting Christianity.

In the Muslim period Iribil does not appear until far on in the time of the later Ḥabbāsids. In Taḏari's great history it is never mentioned; of the older Arab geographers only Ibn Khordādbih in Ḥudaym (xth) mention it dealing with the division of Arab Ibrāk as the capital of a district (fasl) of the province of Ḥulwūn; cf. *Bibl. geogr. Arab.*, ed. de Goeje, vi. 63, 235, s. Iribil is also considered to belong to the Dijār, particularly to the province of Mōsul. In 563 (1167) Zāin al-Dīn Ālī Khāṣṣ b. Begtegin founded a small state with Iribil as capital. The most famous ruler of this Kurd dynasty of Begteginids (q. v. i. 688 sqq.) was Muṣaffar al-Dīn Kūbkūrī, Saladin's brother-in-law. Under him Iribil reached its greatest prosperity during the middle ages. Kūbkūrī in 586 (1190) considerably extended the kingdom which he had inherited from his brother. He conquered the adjoining minor principalities and also brought the district of Shehrizor (with Kerkiūk) under his rule. Several numbers of foreigners then settled in Iribil, which soon became an important town; at the same time a year Kūbkūrī gave brilliant festivals which brought visitors from far and near. This was especially the case with the feast celebrated with great ceremonies on the birthday of the Prophet, which was combined with a great fair (cf. Ibn Khallīkān, ed. Wūstefen, fasc. vi. 66). The lower town of Iribil at the foot of the citadel hill owes its origin to this prince. He also founded a school which bore his name, the Madrasa al-Muṣaffariyya, at which the father of the celebrated Arab historian Ibn Khallīkān (born in 608–1211 in Iribil) was professor. For the Ṣūfīs Kūbkūrī built a monastery (aṣīf) in Iribil.

When Kūbkūrī died childless in 630 (1132), he left his kingdom to the caliph al-Mustaṣfīr whose much shrunk secular power thus received a not inconsiderable accession. The latter had however first of all to use force to gain possession of his heritage, for the inhabitants of Iribil refused to recognise the ʿAbbāsīd as their suzerain. The general Ḥabīl al-Sharābī, who was sent by al-Mustaṣfīr, succeeded in occupying the refractory town after a siege; cf. Ibn al-Ṭiktaḵa, *al-Faqhīr* (ed. Ahwardi), p. 37, 380, 12; Barhebraeus, *Chron. Syr.*, ed. Beijan, p. 466 sqq. and Weil, *Gesch. d. Chaliften*, iii. 468. Soon afterwards the Mongols knocked at the gates of Iribil. By 652 (1250) they had entered the radius of the town in their raids (cf. Ibn al-Ṭiktaḵa, ed. Tornberg, xii. 328). In 653 (1255) they were plundering in its streets (cf. Barhebraeus *Tuʾrīk Muhktasar*, ed. Beirūt, p. 436, 9). In 654 (1256) they appeared again, set the lower town on fire and besieged the citadel, which was valiantly defended; but after 45 days they retired on payment of a considerable ransom; cf. Barhebraeus *Tuʾrīk Muhktasar*, p. 437, 12 sqq., and Wüstefeld in the *Abh. d. Gött. Gesch. d. Wiss.*, xxvii. (1881) p. 120, and also d'Ohsson, *Histoire des Mongols*, iii. 69, 71, 73. When in 655 (1256) Hülagū began his advance on Baghdad, he met in the same time one of his generals to Iribil. The fortress was defended by the Kurds against all attacks for over a year. It was only with the help of Badr al-Dīn Luʾluʾ of Mōsul that the Mongols finally succeeded in taking the hotly contested town. Cf. Rashīd al-Dīn, *Hist. des Mongols de la Perse* (ed. Quatremère), i. (1836), p. 314 sqq.; Barhebraeus, *Chron. syriac.*, p. 506, 3 sqq.; Barhebraeus, *Tuʾrīk Muhktasar*, p. 472, and Weil, *Gesch. der Chaliften*, iv. 9; D'Ohsson, op. cit., iii. 256 sqq. In the period that followed Iribil had again a great deal from the horrors of war and the raids of neighbouring Kurd and Arab tribes. The last days of storm and stress were experienced during the Turkish campaign of Nādirābād in 1743. After a 60 days' siege the victorious Persian king was able to enter the town. Until far into the first half of the sixteenth century Iribil belonged to the great pashalik of Baghdād and as
one of the most important military points in it was garrisoned by a strong force of Janissaries. When the wilayet of Mūsul was separated from that of Baghdad, Irbit went with the former.

The conversion to Christianity of the district of Adiabene and the adjoining regions was mainly conducted from Irbit. A bishop had his seat here at a very early date. The diocese originally comprised only the area between the two Zāb, therefore it was called by the Syrians the diocese of Ḥēdatayb or, from the two seats of office, of Arbel or Ḥūṣaita (a village near A.). At the beginning of the 14th century Irbit was elevated to the rank of an archbishopric, to which the whole of Assyria proper was subordinated. Not till a later date was the bishopric of Nineveh (Mūsul) or Aḥūr separated from it as an independent ecclesiastical province. On the importance of Irbit in pre-Islamic Syrian church history, cf. especially the chronicle probably composed by a clergymen of the diocese of Irbit, which A. Mingana published in SOURCES SYRIQUES, i. (Leipzig 1908) and Sachau discussed in the Abh. der Berl. Akad. d. Wissensch., 1915, N. 6. This chronicle is preserved in the collection of the history of the bishops and martyrs of our bishopric for the period 100—540 (551) A.D. See also Labourt, LE CHRISTIANISME DANS L'EMPIRE PERSE (1904), passim (Index, p. 356).

In 1268 the Nestorian Catholics moved his see from Baghdad to Irbit. But as early as 1271 he removed from here to Uṣūna in Aḥarbadjān, since the Christians as a result of the machinations of the Assassins became suspect among the Muslims and had to suffer many insults, cf. Barhebraeus, Chronic. Escl. (ed. Abelloos and Lamy), ii. 347; cf. also Chron. Syr., p. 557; 10 sqq., 546, 547 sqq.; D'Ohsson, op. cit., iii. 450 sqq. The position of the Christians of Irbit under the successors of Hūlūgā [q. v.] and especially under Gharāz [q. v.] and Ujlaita, was on the whole very miserable. Kurds and Arabs often fell upon them, plundering and murdering, first of all in the years 1274 and 1285; cf. Barhebraeus, Chron. Syr., p. 528—529, 557, 8 sqq. In 1295, as an inscription of the xiv century which still exists in the monastery of Mar Behnam records, the Ilkhan Bādu ṭarraged the region of Irbit, cf. H. Pogson, Inscriptions Smilit. (Paris 1907), ii. 76, p. 135. In the year 1296, as a result of a royal edict all the Christian churches of the town were destroyed (Barhebraeus, op. cit., p. 596, 18 sqq., and Histoire de Mar Jabalaha, ed. Bedjan, 1895, p. 113); in 1297 the Kurds besieged during several months the Christians who had taken refuge in the upper town (cf. Hist. de M. Jabalaha, p. 121—131). In 1310, in the reign of Ujlaita, the Christians, after bravely defending themselves for over three months on the citadel against the besiegers, Arab, Kurd, and Mongol, were overcome and exterminated. We possess an illuminating description of these dark days for Irbit from the pen of the biographer of the then Catholicos Jabalaha iii. (see Hist. de M. Jabalaha, p. 154—201). From this time onward Irbit ceased to be a Christian town. But since then also dates the decline of the town. A few Syrian inscriptions on the walls of a building now used as barracks (Bīгла) recall the earlier Christian population; cf. Cunet, op. cit., p. 857. In Irbit itself there are no longer any Christian families; a few (united Nestorians) socalled Chaldeans, are however to be found in the village of Ainkawa (also written Ainkeba, Ankawa, Ankowa) a short hour's journey from Irbit, certainly the Amkaba of the Hist. de M. Jabalaha, p. 192, and probably the Amkātūd of Barhebraeus, Chronic. Syr., p. 557, 11) as its exclusive inhabitants. Next to the Christians the Kurds form numerically the strongest element in the population of the town. From the xiiith century the Ḥāḍibānī or Ḥākamīya Kurds were settled in and around Irbit; on them cf. Ritter, Erdkunde, ix. 620; Quatremerie des Itineraires et extrait du manuscrit de Sirac, 509—513, extracts form the geographical and historical work of al-Umari, died 749—1348; G. Hoffmann, Syrische Akten persisch. Märtyrer (1881), p. 236, 272. The chiefs of these Kurd tribes, who possessed a considerable number of citadels in the region of Irbit, were frequently fighting with one another for the possession of the town. Accounts of such local feuds in the middle of the xith century are given for example by the histories of Ibn Kaldūn and Badr al-Dīn Aina; see Tiesenhausen in Mem. présentées à l'Acad. Imp. des Sciences de St. Petersbourg, viii. (1859), p. 117, 165. As to the present population of Irbit, it numbers, according to Cunet (1892), 3260 inhabitants of whom 497 are non-Muslims (Jews). The number of houses is said to be 1822 (Belck and Lehmann, in 1899, estimated those of the upper town alone as 800), besides the serai of the Turkish governor, 2 mosques, 10 Muslim chapels and 16 schools. According to the late administrative division of Turkey, Irbit was the capital of a ħaḍēl belonging to the sandjak of Şehrizor and was divided into two districts (pāşıya's) comprising 330 villages and 12000 inhabitants.

Irbit consists of the lower town and an upper town grouped around the citadel. The lower, built by Kūbbār (called Kotrak, according to Cunet), which lies at the west and south bases of the citadel hill, makes a very poor impression and now lies for the most part in ruins. It was earlier much more extensive, as may be deduced from the fact that the ditch which once surrounded it now lies far beyond the present scanty group of houses. The lower town is the centre of commercial life and contains the bazaars and khāns. Of noteworthy buildings the remains of a large mosque with an imposing minaret, about 203 feet high and 48 feet round (cf. the description in Rich, ii. 15 sqq.), are especially striking; according to an inscription on the minaret, it was built by Kūbbār. This mosque is perhaps identical with the Māṣūf al-Kaff mentioned by Kāzwīnī (loc. cit.), in which, according to him, there was a stone with the imprint of a man's hand. Obviously this refers to a sanctuary with a print of 'Alli's hand (Kaff, pandjā), of which others are known in the 'Irāq, Mesopotamia, and Persia; cf. for examples, v. Berchem, in Herrfeld-Sarre, Archaeolog. Reise im Euphrat- und Tigrisgebiet, i. 24).

The upper town with the citadel rises from a round hill not quite 65 feet with fairly steep sides. It is obviously artificial. In its interior are massive vaulted subterranean passages and chambers. It is crowned by a strong castle which is surrounded by a wall now somewhat ruined, 48 feet high, set with crenellated parapets and bastions. This gigantic tell with the picturesque citadel upon it has always aroused the astonishment of travellers; from several hours' journey distant it can be seen commanding the
plain. To some extent it reminds one of the castle
hills of Hims and Halab— with which it has
been frequently compared,— but it surpasses
both considerably in the grandeur of its mass. The
castle is occupied by the kâ'immânûn and the
other officials of the town. The houses of private
citizens are quite close to the surrounding wall.
Systematic excavations have not yet been under-
taken in Iribil nor is anything known of any
accidental finds of antiquities.

The importance of Iribil at the present day is
mainly based on its position as a commercial depot
and centre of a busy through trade. Important
caravan routes enter it from different directions.
First mention should be given to the very an-
cient road which runs from Baghdaâd via Kerkûk,
Altyñ-Kopřa to Iribil and thence to Mûṣûl; it is
the most direct route between Baghdaâd and Mûṣûl,
as it was formerly between Babylon and Nineveh.
Two roads run from Iribil to east and north and
lead over rough mountain passes to the country
of Aḏサラbâyîn; the one goes in the first place to
Rowândîzû in the north east and the other to
Khoul Sarða.jsk in the east. On the road from
Iribil to the Wadi Turabîn, some especially Rich.
296—297; Jones in the Journ. of the Roy. Asiatic
Soc., 1855, p. 380; and Cuijnet, p. 793 sqq.; the
road from Iribil to Marâqâs is described by Hoff-
mann, op. cit., p. 231 sqq.

The town of Iribil is the centre of a splendid,
very fertile country, which looks to the eye more
a flat than an undulating plateau. With an aver-
age height of 1300 feet (the lower town of
Iribil is 1332 feet above sea level) it forms the
watershed between the two Zâbûs. There is a com-
plete absence of trees, but it affords excellent corn-
growing soil; cotton flourishes here exceedingly and
is manufactured in the town. The Persian geo-
grapher Hamd Allah Mustawî praises the cotton
grown here in his geographical work Naḵîl est-
Kûlûb about 1340. Numerous streams run in winter
through the plain but there is no perennial river
so that irrigation has in part to be conducted by
subterranean aqueducts. In the north the spurs
of the Kurd Alps come fairly near Iribil; west
of the town rises the Demir-Dagh, to a height of
1600 feet. In the north east and east the plain
is bounded by the Deredawân Dagh in the south
(at Altyñkopřa) by the Zergawân-Dagh. In the
Southwest the plateau of Iribil is bounded by the
Shemamlik lowland plain which stretches to the
bank of the Great Zâbû.

The well cultivated plateau is covered by nu-
merous Kurd villages. The Kurd tribes, who camp
in the summer in the hills of Rowândîz, migrate
cither in the winter. Most villages are built quite
near characteristic tumuli; everywhere one finds ex-
tensive mounds of ruins, evidence of better days,
when this land so richly endowed by nature was
on a much higher level of civilization than at present.

Bibliography: For the Assyrian Period
bânînes (1916), iii. 711; for the Graeco-Romain
periods cf. Pauly-Wissowa, Realencykl. der klass.
Altertumswiss., ii. 407—8 (S. Fraenkel) and
Sâpperz., i. 117 (Streck). — For the Muslim
period apart from works already mentioned, the

p. 294. Cf. also [Rousseau], Descrip. du Pa-
chalîk de Bagdad (Paris, 1809), p. 85; C. Ritter,
Erdbund, ix. 691—4, where the accounts of
Niebuhr, Olivier, Rich, Dupré (1808), and
Shiel (1836) are utilised; V. Cuijnet, La Turquie
A good map of the environs of Iribil is given by
Czernik, op. cit. Pl. ii. On coins struck in
Iribil cf. Lane-Poole, Catal. of Oriental Coins
in British Museum (London, 1875 sqq.), iii. vi.
ix. 1 and 2 (s. Indices), and the notes by v.
Berchem in v. Berchem-Strzygowski, Amida (1910),
p. 94, Note 4.

2. A place in Tur-'Abîdîn in (Mesopotamia),
South East of Killît, in 37° 30' lat. N. and
41° 15' long E.

3. and 4. See under Iribil.

5. The statement by Yakût (i. 189, 21) that
the town of Sa'da (Sidon) was called Iribil is
probably an error.

It is not impossible that the places named
Arabela (Iribil, Arbêl) outside of Assyria were
founded by inhabitants of the Assyrian Arabela
and were called by them after their native town.

(M. Streck.)
IRTIKA (A.) = height: in astronomy the height of a constellation, that is its distance from the horizon measured on a circle passing through zenith and nadir (vertical, busīrat al-irtišā); in geometry it is also used for the height of a plane figure (triangle, parallelogram) or of a body (prism, cylinder), but anādī (pillar, plumb line) is much more commonly used. (H. Suter.)

IRTIŠIŠ a large river in Siberia, in the basin of the Ob. Its two sources, the Blue and the White Irish, rise in the Great Altai after their junction the river as far as Lake Zaïsan bears the name "Black Irish"; after leaving the lake it flows for about 180 miles through steppe country and the "White" or "Slow Irish", then for 60 miles with a stronger current as the "Rapid Irish" through a hilly country. At the town of Ustkanenorgorski it enters the Great Siberian plain which sinks away towards the Arctic Sea and besides several smaller tributaries, it receives on the right the Om and Tara, on the left the Ishim and the Tobol and falls into the Ob below the village of Samarowsk. The whole length of the river is 2230 miles of which only 253 are in the Chinese Empire. The bridge at Omsk is 795 yards long; the greatest breadth of the river in its lower course is about 875 yards.

The name is mentioned as early as the Orkhon inscriptions of the viith century A. D. (W. Radloff, Die alttürkischen Inschriften der Mongolen, 2nd Ser. p. 19; written without vowels). Mas'ūdī in Kitāb al-Tanbīḥ (ed. de Goeje, p. 62) speaks of the "Black" and the "White Irish" and makes both fall into the Caspian Sea. The author of the Maqālim al-Adam (f. 180) thinks the Irish a tributary of the Olga; the name is venerated Artush (or Artūšh) in the mos. which is keeping with the story based on a popular etymology (fr. tūsh "Man, come down", given by Gardizi (text in Barthold, Oezet o poézê de S. Srednjego, Asju, p. 82). In spite of the trading route from Fārāb (q.v., ii. 53), mentioned by Gardizi, to the Irish, the country was little affected in the middle ages by Muslim culture. The river is only seldom mentioned, e. g. in the history of Timūr's campaigns, Žofarnāma, Ind. ed., i. 475 and 495 (Irīšh). The Muslim town founded by the Russian conquerors on the lower course of the river, with its main fort near the mouth of the Tobol, was probably founded in the Mongol period by colonists from the Volga region. Whether the stories heard by Radloff (Aus Silieren, i. 146) of the sending of preachers of the Muslim faith from Bukhāra are based on facts, is doubtful. In any case, Islam only began to spread up the Irish from the north under Russian rule (see Baraba, i. 651 sq.). All the towns and villages on the Irish, as well as in its valley, only arose under Russian rule; down to the xvith century there was no town farther south than Tara; Omsk and the towns south of it were only founded by Peter the Great.

The Irish is navigable almost up to the rivers which form it. Between Tobolisk and Ustkanenorgorski there is regular steamship traffic. Sometimes the steamers go up as for Zaïsan and then up the Black Irish to the Chinese frontier and even beyond it. Since the making of the Siberian railway, the Irish is of still greater importance as a traffic route. (W. Barthold.)

ISĀ, the proper name of Jesus in the Kurʾān, and thence in Islam, is explained by some western scholars (Marracci, i. 39; Landauer and Nöeldeke, Zeitscr. d. Deutsch. Morgenl. Gesells., xii. 720) as a form imposed upon Muhammad by the Jews and used by him in good faith. They called Jesus Esaū (אִיסָא) in hatred and said that the soul of Esaū had been transferred to him. Others (J. Derenbourg, Rev. des Études juives, xvii. 126; Fränkel, Wiss. Zeitscr., iv. 334; Vollers, Zeitscr. d. Deutsch. Morgenl. Gesells., xlv. 352; Nestle, Dict. of Christ and the Gospels, i. 881) hold that the name originated naturally by phonetic change from the Syriac Yēshā (יושע) combined with imitation of Mūsā. For the Muslim explanation of the name see al-Baṣāwī on Kurʾān iii. 40 (ed. Fleischer, i. 156, l. 2). Titles and descriptions applied to Jesus in the Kurʾān and of importance for his position in the theological system of Islam are: "Son of Maryam" (e. g. iii. 40; iv. 169; xix. 35, and often); he was born of Mary, a virgin, by the direct creative act of Allah; — "a Word (kalīma) from Allah" and "his (Allah's) Word" (iii. 40, iv. 169); this is the creative word "Be" (kalīma) which Allah cast (alīf) into Mary; the creation of Jesus is thus compared (iii. 52) to that of Adam; — al-Mashīh (iii. 40, iv. 169 and often), evidently from the Hebrew māsăxīḥ, but how understood by Muhammad is quite uncertain; for Muslim explanations see al-Baṣāwī, i. 156, l. 2, — "a Spirit from Allah" (iv. 169), so the angels are called angels directly from Allah, so, too, Allah formed Adam and breathed into him of his spirit (min rūḥī, xv. 29; xxxviii. 72); later Islam called him al-Mīšāh (Liṣān, iii. 290, l. 15) and even Rūḥ Allah (al-Khaṣkhāšr of al-Zamakhshari, ed. Lees, i. 338); — Ādīb Allāh (xix. 31); "he is nought but an ādīb (xliii. 59); "he will never disdain to be an ādīb of Allah" (iv. 170); ādīb, literally "slave", is best rendered theologically by our "creature"; man, for Islam, is the property of Allah and not simply his servant, cf. ēʾēʾē in the O. T., and ēʾēʾē in the N. T. and especially of Jesus in Philippins, i. 7; "One of those brought near" (to Allah, masīh, al-muṣārabah, xlii. 40); again the angelic association; later Islam sometimes explains this of his state after his ascension (yūdīd, rāqīf), when he was a semi-angel flying round the throne (surrah) of Allah (insī mubalab, Khīṭāt of al-Thalābī, ed. Cairo 1314, p. 227); but Muhammad in his Miṣrājd found him in the second heaven (Saḥāl of al-Bukhārī, v. 53; ed. Cairo, 1315) — Waḏīḏ, "worthy of regard in this world and in that to come", (iii. 40); al-Baṣāwī explains, "as prophet in the one and as interceder in the other"; — Muḥābāt, "blessed wherever I am" (xix. 32); but al-Baṣāwī explains the word here and elsewhere as "possessing much profit for others", apparently possessing a barakah; — Kāwał al-ḥāʾ, "the sure saying" in xiii. 35 is obscure and may not be a title but apply to the statement made — see al-Baṣāwī, i. 580, l. 25. He is a nābi, "prophet" (xiii. 31) and rāḥiḥ, "messenger" (iv. 156, 169; v. 79), and he has a "book" (kitāb, xiii. 31), which is the inqīlāt (v. 50; lvii. 27). The sending of him is a "sign" (ayā) and "mercy" (raḥma, xix. 21); and he and his mother are a "sign" (xxii. 52); he is made an "example", "parable" (mathāl, xliii. 57, 59). He brought "proofs" (bagaim) and "wisdom" (hiṣma, xliii. 63; i. 169), and was aided by Allah with the
rūḥ al-khuds (ii. 81; v. 109), obscure like all mentions of rūḥ in the Qurʾān but explained by later Islam as Dājīrī; so al-Baʿḍī, (in loco) and Liʿānī, iii. 290, l. 15. Allāh taught him (iii. 43; v. 110) and he possessed peculiar miraculous powers of raising the dead, healing the sick and making clay birds, and by the permission of Allāh, breathing life into them (iii. 44 sqq.; v. 110 sqq.).

On the death of Jesus the statements of the Qurʾān are contradictory. It is certain that Muḥammad rejected the Crucifixion and accepted the Ascension, apparently in the birth-body and not in a glorified body; the crucifixion was prevented by a change of resemblance (shāhāhā lāhu, iv. 156), again an obscure phrase explained later by the commentators that his likeness was put upon another and the other crucified in his place. But his death is referred to: "before his death" (iv. 157); "on the day I die and on the day I am raised, alive" (xix. 34), yet this verse may have been a mistaken repetition of verse 15. In iii. 48 Allāh says to him, "I am about to take thee to myself (muʿašṣaflīha) and lift thee up (rūʾMedical) unto me". The first expression is commonly used of a blessed death, but that is not necessarily its meaning here, for it is also used in the Qurʾān (vi. 60) of Allāh's taking to himself the souls of sleepers during sleep, to be returned when they awake; cf. Frankel in Zeitschr. d. Deutsch. Morgenl. Gesells., ivi. 77. For his Second Coming the only Qurʾānic authority is xliii. 61, a very obscure verse, the reading even of which is in doubt. Some read, "And he is verily a knowledge (laḥīf maʾn) of the Hour", i.e. by (the descent of) whom the approach of the Hour is known. But others read, "a sign (laʿālamun) of the Hour" and even, "a reminder (lādīkhīrān)". Others, again, refer the pronoun to the Qurʾān, "it is". His second coming being taken as established, his death is put after it and the references in iv. 157 and xix. 34 are thus explained; as also the descriptive kohlān in iii. 41, because he was taken up by Allāh as a "youth" (rābīb) before he attained kūlā, "middle age" (cf. al-Baʿḍī on these passages). The later doctrine of his return is given soberly by al-Baʿḍī. On xliii. 61: that he will descend in the Holy Land at a place called Afšīr with a spear in his hand; that he will kill with it al-Daḍījāl and come to Jerusalem at the time of the fast of the morning (mubh); that the imām will remain forty years and he will die, and the Muslims will hold funeral service for him and bury him; and Medina, it is universally accepted, beside Muḥammad, in a vacant space between Abū Bakr and ʿUmar. But others interpret, "before he—the believer—dies", even though it is thus a useless belief, he being at the point of death.

So little can be gathered from the Qurʾān. The oldest traditions have but little more, as in the Ṣaḥīḥ of al-Bukhārī where Ḥāṣim is merely mentioned in connection with Dājīrī in Kitāb al-Fitan, Part ix. 60, ed. Cairo 1315. Muḥammad had been interested in the idea of Anti-Christ as the story of Ibn Sāʾīd shows (Macdonald, Religious Attitude in Islam, p. 34 sqq.), but the early Muslims, for political and theological reasons, developed elaborately in forged traditions the doctrine of the Last Things, and especially of the Mahdī and Jesus. Thus the Muṣbah has much more, see ed. Cairo, 1316, ii. 136 sqq., 140 sqq. (chaps. on Signs of the Hour and on the Descent of Ḥāṣim). See too, al-Thalālī, Kīfā, p. 22 sqq.; the full account of Ḥāṣim, the most complete of all, covers pp. 215—220; Tabarī, ed. Leiden, i. 713 sqq., and Ibn Wādīh, Historiae, ed. Houtsma, i. 74 sqq., give extracts from the Gospels. But in this development the roles assigned to Jesus and to the Mahdī came to be confusing alike, and one party tried to cut the knot with a tradition from Muḥammad. "There is no Mahdī save Ḥāṣim b. Maryām". For this and also for their respective roles when they were distinguished, see al-Shaʿrānī, Muḥshiṣar of the Taḏkīrāt of al-Kurṭubī, p. 118 sqq. (ed. Cairo 1324). Ibn Khālīdīn in his Muḥādāt (ed. Quatremère, ii. 142—176 = De Slane's transl., ii. 158—205) gives a philosophical examination of the whole subject, showing the untrustworthiness of the different traditions and tracing the development of the idea of a restorer of Islam before the end, as it was influenced by Shiʿītes of different degrees, by Fātimītes and by Ẓūfīs. An explanation given by him of the tradition quoted above is: "None has spoken in the cradle (muhād, cf. Kur. xix. 30) save Ḥāṣim" (ed. Quatremère, i. 163); for another see al-Kurṭubī, p. 118. On the whole subject Goldziher in his Vorlesungen, p. 230 sqq. and notes thereon, has a few luminous pages. See the same, p. 313 sqq., for the modern Aḥmadiya sect in India which teaches that Jesus escaped from Jerusalem, wandered to the East, settled at Srīnagar in Kashmir and died there, where his tomb is still shown. Ghulām Aḥmad, the founder of the sect, professed to both Jesus's return and also the Mahdī. Finally, Goldziher has well remarked that for Sunni Islam, as opposed to Shiʿism and other outlying sects, the expectation of a future restorer of faith and life has never become fixed as a dogma but is only the mythological embellishment of an ideal representation of the future. This may well be due to lack of Khurānic basis.

From the above it is evident that Muḥammad had learned a definite story of Jesus from some heretical Christian teacher, in defense of whose position he polemizes vigorously in the Qurʾān. He knows more, of sorts, about him than about any other of the religious figures of the past. But it is evident, too, that he omits something. For the appearance of the earth in this unique figure, a second Adam, a semi-angel, a Logos much like that of Philo but with a difference, we are given no reason. It is not explained how he is a "sign", a "mercy", and an "example" or "parable" (xix. 21; xxii. 52; xliii. 57, 59). At his birth he— as had been the case with his mother— was
guarded from the touch of Satan, who seeks by touching every newly born infant to implant a tendency to sin (iii. 31 and al-Ba‘id, in loco). Some even say that he and his mother, in consequence of this, never committed sin (Kiṣaṣ, p. 210). But it should be noticed that the same is said, even more absolutely, of John the Baptist because he it called ḥāṣṣūr, “chaste” in Qur‘ān iii. 34; cf. al-Ba‘id. and Kiṣaṣ, p. 211 sqq. But all the Qur‘ān has is that Mary’s mother exclaimed (iii. 31), “Verily, I put her and her seed in thy (Allah’s) care from the stoned Shi‘aṭūn. How much or how little of the later view was in the mind of Muḥammad or was a legitimate development of his position it is impossible to say. He left something uncodified and classed Isā with all the other prophets, although so essentially different. The story of the table with food sent down from heaven (v. 112 sqq.) which is to be to them a festival (Iṣā) and a sign to all generations seems a genuine confirmation on the part of Muḥammad himself in regard to the eucharist. It is significant that the commentators (al-Ba‘id, i. 290) sometimes say that the food was a large fish, thus suggesting the Iṣā symbol.

Later Islam has pictured Isā as separated from all human ties except to his mother, as constantly wandering, barefoot and without abiding place, passing the night in worship wherever he might be when the sun set, living from day to day for nothing but devotion and miracles of benevolence (Kiṣaṣ, p. 218). At the judgment he will be the example of absolute poverty (fuḥr, al-Ḫaṣāli, Durra, p. 90 sqq.). At the maw¬ka‘i on that day men will ask him to intercede for them with Allah and he will refuse, not for any sin of his own, as in the case of the other prophets, but because his followers have taken him and his mother as gods along with Allah (Durra, p. 62 sqq.); cf. many other forms of this tradition in the Iṣāya, ed. with comment. of Sayyid Murtaḍa, x. 459 sqq. Margoliouth has gathered a valuable catena of his sayings and doings from the Iṣāya in the Expositori, vol. v., 1893-94; pp. 59, 107, 177, 553, 561.

Isā b. ‘Ali [See also ‘Ali b. Isā.]

Isā b. Muḥamмaḍ, Ǧharaf al-Dīn, an Arab Amīr, who played an important part during the war between the Mamluks and the Mongols in Syria. His genealogy in Abu ‘l-Fīdā’s (Constant. 1256 A. H., iv. 91, is Isā b. Muḥamмaḍ b. Ṭāfṣa b. Ḥadīth b. ‘Arāfa b. Fadd. Sāliμa and Sarim were the seats of his family; he probably belonged to the Rabī’a. His grandfather Māḏāf and other members of the family are several times mentioned in the history of Halab by Kamāl al-Dīn (cf. Blochet, Histoire d’Alep, p. 168, 210, 213). Isā fought on the side of Kuṯūr in the battle of ‘Ain Dālāt [q. v.] in 658 (1260) and in the following period also was usually on the side of the Mamluks, although there were frequent quarrels, as the Mamlūk sūṭāns on the one hand had little trust in the Amīrūn and the latter like true Bedouin chiefs troubled little about the government and, if occasion arose, did not hesitate to join the Mongols. Isā was already on bad terms with Bahbars [q. v.] and the feud became fiercer under Kālātān as Isā had taken the side of Sonḵor al-Asīḵār. In 679 (1280) the two even called in the help of Abāṣqā [q. v.] and his Mongols but this unnatural alliance did not last long; soon afterwards Isā had a reconciliation with al-Malik (‘Abd Allāh) on his side in the battle of Himṣ in 680 (1281) against the Mongols. Isā died soon afterwards and his son Muḥamмaḍ Ǧusam al-Dīn succeeded him. The latter continued his father’s policy; in 692 (1293) treacherously arrested by Sulṭān Khalīl, he was released again and recognised as Amīr of the Arabs. He intervened with Sulṭān al-Nāṣir on behalf of Kārā Sonḵor, which gained him the former’s enmity, so that he joined the Mongol Ilkhān. After the treaty of peace between the Mongols and the Mamluks in 723 (1323) Muḥamмaḍ returned to Syria. Muḥamмaḍ, who made the pilgrimage to Mecca in 697 (see Wüstenfeld, Chron. der Staat Mecca, ii. 275), died in the same year (734-35). Ibn Khayyat, i. 169 sqq. gives a detailed account of him and (iii. 271 sqq.) gives interesting information on the fortunes of a member of the family who was at the court of the Sulṭān of Dīlī, Muḥamмaḍ Ǧāh. Muḥamмaḍ left several sons but they soon fell out with one another. Nevertheless, the amirate of the Arabs remained for over a century in the family of Isā b. Muḥamмaḍ and the dynasty is said to have survived till 879 (1474). The authorities available, however, do not enable one to give in any detail the later vicissitudes of the family.

Bibliography: In addition to the sources quoted in the article, cf. the historians of the Mamluks and Ilkhān, especially Weiß, Geschichte der Chalifen, Vol. iv. (Index), and d’Ohsson, Hist. des Mongols, Vol. iv.

Isā b. Muṣraḥ b. Muḥamмaḍ b. ‘Ali b. ‘Abd Allāh b. al-‘Arrāb, nephew of the two first ‘Abbasid Caliphs, al-Saffāḥ and al-Mansūr. In the last year of his reign al-Saffāḥ had homage paid to his brother Abū Dījāfār and after him to his nephew Isā b. Muṣrat as heirs-apparent. Isā, who a few years previously had been appointed governor of Kūfah, retained this office after the accession of Abū Dījāfār al-Mansūr. When the ‘Alīids Muḥamмaḍ b. ‘Abd Allāh rebelled in Medina in 145 (762), Isā was sent with an army against him. On the advance of the Syrians, many of the people of Medina saved themselves by flight and in Ramadān of the same year (Dīn 762) Isā stormed the city. Muḥamмaḍ fell in the battle and his head was sent to the Caliph. In the meanwhile his brother Ibrāhīm had raised the standard of revolt in Baṣra. The Caliph’s troops were defeated and as the revolt was spreading more and more, al-Mansūr feared that the easily influenced people of Kūfah might be involved in the revolution, so he went in person to the city. He succeeded in keeping the city under control while Isā hurried with help from Medina. His advance guard under Ǧumāʾ b. Kaḥṭāb was defeated in Bahkhamā [q. v.]; a part of the main army also at first retired, but Isā mastered the situation, his troops were put to flight and he himself remained. By the victory of Bahkhamā on 25 Dīn 1 Ka‘b 145 (Feb. 14, 763) al-Mansūr’s rule was secured. Nevertheless he treated Isā slightly and wanted
to exclude him from the succession. The Caliph had even said when he sent him against Muḥammad b. 'Abd Allāh: "I do not care which of the two kills the other", and in 147 (764—765) he had homage paid to his son Muḥammad al-Maḥdī as successor and even deposed Ḥaṣā from his government, because he declined to abandon his rights. In the end Ḥaṣā had to give in and pay homage to al-Maḥdī, on condition however that he was to follow the latter. After al-Maṣūrī's death he wished to renew his claims as his consent had been extorted from him by threats; his attempts met with no success and in the reign of al-Maḥdī he had again to renounce the succession in favour of his son Mūsā b. al-Maḥdī, son of al-Maḥdī. He died in 167 (783—784).

**ISAAC.** [See ISHĀK.]

**ISAĪF**, name of an idol at Mecca, which is almost always mentioned along with *NĪʿila*. Tradition relates that a man and a woman of the Dājrūn were so called and were turned into stone as a punishment for indecent conduct in the temple. They were first of all placed as a warning on al-Ṣaṣā and al-Marwa, but were later idolatrously worshipped by order of 'Amr b. Lais. It is therefore a question of two sacred stones, but the origin of their names is so far unexplained. Attempts are given in Dozy, *De Israëlieten te Mekka*, p. 197.

**ISAGHŪDI** isasoge, from the Greek *íasouo*, is an Arabic adaptation of the Introduction (al-Madīkh) to an Arabic composition by Porphyry of Tyre. According to Ṣaʿīd al-Andalusi (Ṭabarî-ʿat-Umm, Beyrouth 1912, p. 49), the Arabic translation was made directly from the Greek by Ibn al-Muqaffaʾ [q. v.] and, according to the Fihrist (i. 244), it was made from a Syriac version by Auyūb b. al-Kāsim al-Rakī. In any case, it is certain that Arabic versions of Porphyry's work were multiplied quite early, in commentaries, epitomes and adaptations. Of the latter we only possess the two following: 1. that of Abū l-Ḥasan Ibn al-Makna and 'Omar Ibn al-Bikāʾ al-Shāfiʿī (cf. Brockelmann, *Gesch. d. Arab. Lit.*, ii 142—3, 144, with a commentary by al-Sanusi, cf. *op. cit. and Bibli. Nat. d'Algiers*, Cat., N° 1382, N° 1); 2. that of al-Aḥbarī [q. v. and add Ibn Khallikān, *Wafayāt*, Cairo 1910, ii. 132], which is the best known and the most annotated. This little treatise on logic discusses very succinctly the following subjects: term, definition, proposition or judgment, opposition, inversion, syllogism, controversy, rhetorical, poetic, sophistry. The Ṣaʿīdī of al-Aḥbarī was put into *radjus* verses by al-Aḥbarī [q. v.]

**ISAWI.** [See NĀRAŠĀN.]

**ISAIWA, ISAWA (Assoua),** a collective name from the singular *Isāb* (cf. Marqāṣ, *Textes Arabes de Tanger*, p. 397 sqq.): a name given to the *kbīr* [q. v.] or members of the Moroccan religious brotherhood founded by Sidi Muḥammad b. Iṣāf and derived from this last name.

In spite of the fame of this brotherhood, the life of Muḥammad b. Iṣāf al-Fihri and his origin are little known. The ethnic al-Fihri suggests a Spanish Arab origin. He travelled a great deal in his youth and was initiated in the east into the ecstatic exercises of the religious orders of the
and the island of Djebha. They are not widely disseminated in Tripolitania and are almost unknown in Egypt. Like all the great Moroccan religious orders they have a sâwîya at Mecca.

(A. Cour.)

Iṣba‘ (A.) “finger”, the inch, an Arab measure of length, as in Europe the twelfth part of the foot (bādīm), 'īsa of the ell (dhīrā). The inch belongs to the earliest of the Arab measures of length and was marked, probably from the earliest period, on the Nilometer of the island of al-Rawḍa built in 66 A.H. [see MIYAS]. Its length there was 2.2925 cm. = 1 inch (the ell is 54.07 cm. = 21.6 inches). Being a derived measure the inch is not an invariable magnitude, for example to-day in Cairo the inch of the dhīrā mukdanda = 3.195 cm. = 1.25 inches, of the dhīrā istanbūl = 2.82 cm. = 1.1 inch, of the dhīrā hindīs = 2.658 cm. = 1.05 inch, and the dhīrā baladi or mārī = 2.404 cm. = 0.95 inch. In Turkey the most usual is the dhīrā baladi of 65.58 cm. which gives an inch of 2.857 cm. = 1.15 inch. It should be noted however that the name ḫūṣ has long become obsolete in everyday life and the ell in the east is very commonly divided into quarters (raḥb) and twenty-fourths (kīra‘), wherever the metric system has not completely driven out the native system.

IṣFĀHĀN, 'Aṣrāzdānā, Ptolemy, vi. 4.; Firdawstī: Sīpāhān; in Arabic Iṣfāhān, an important town in Persia, formerly the capital under the Šafā-
widā, now the chief town of the province of Ḩarīk ‘Adjamī. Its name means "the armies" (Hamza al-
Iṣfaḥānī) and has been referred to by a popular etymology and in derision as aštāb, which in the
local dialect means "dog" (Median στασ, Herod. i. 110). It was formerly composed of two ancient
quarters, Djalal on the site later occupied by the ṣabristān, the "city properly so called", and
Yahādiya, "the Ghetto", a Jewish colony es-
blished there, it is said, by Nebuchadnezzar (Schrei-
ner, Revue des Etudes Juives, xii. 259; Ibn al-
Fakih, p. 261, 29) or under Yazgird I at the
request of his Jewish wife Shōşa-ḵušt (E. Blochet,
Liste des villes, § 54 in Recueil des Travaux,
xvii., 1895; J. Marquart, Erānshāh, p. 29). Anci-
ent legends, which are transmitted by Ibn Rostam,
attribute the building of the citadel to Kay-Kús
[q. v.] and it was later rebuilt by Bahman, son of
Iṣfandiyār. There are two versions of the story
of the capture of Iṣfaḥān by the Muslims. Accord-
ing to one, the historical school of Kifā, the capture took
place in 19 (640); by order of the Calif ʿOmar,
ʿAbd Allāh b. Ḥishām marched on Dža'yay, which
was commanded by one of the four pādoshīn of
the Persian empire (= governors, Nüdeke, Gesch.
d. Perser u. Araber, etc., p. 151, no. 2, cf. A.
Christensen, L'empire des Sassanides, p. 87), who,
after several battles, capitulated on condition that
the gīzaya was replaced by an annual tribute.
Ṭabar (ed. Leyden, i. 2637 sqq.) gives the date
as 21 a. h. The Bašra school says that in 23 (644)
Abū Mūsā al-As'ārī [q. v.], after Nehawand, took
Iṣfaḥān or that his lieutenant ʿAbd Allāh b. Budāl
received the capitulation of the town on the usual
conditions of the establishment of khaṭrdīg and gīzaya
(al-Bidāhī, p. 312); on these varying versions
see Caetani, Annali, v. yr. 23, § 4—35. It was
again, after a rebellion, in the Caliphate of
al-Mu'tazz, during Mūsā b. Boghā's campaign against
the 'Alids of Taḥarastān (247 = 861). Its popula-
tion was decimated and its notables deported
(al-Bišālūrī, p. 314). It was henceforth an
important town, the capital of a large province and
a centre of industry and commerce. Ibn Rosta, who
lived there and wrote his book probably about 290
(903), enumerates its four gates and 100 towers;
the geometerian Ibn Lodda measured its diameter
(it was round in plan) and found it to be 6,000
cubits or half a parasang. The Būyid Rukan al-
Dawla increased the town and repaired its walls,
which were still standing in the xth (9th) cen-
tury. There was a building there like a fortress,
which bore the same name as the citadel of Ha-
madīnā, Ṣātār (Sātiye, Fihrist, p. 240, 16, 279
241, 14; Hamza, p. 197; Ibn al-Fakih, p. 219, 241,
244). Silver mines were found in the neighbour-
hood, the exploitation of which had been aban-
donated since the Muslim conquest, and mines of
copper, antimony, tin, etc. The distribution of the
water from the Zindā-rūd for irrigation pur-
purposes and the name zarīn-rūd, river of gold
(cf. Flandin, Voyage, ii. 336), adopted by Ibn Rosta,
were attributed to Ardašīr, son of Būbak. To the
present day the cultivation of the poppy, cotton,
and tobacco constitutes the wealth of the country.
Passing under the same rule of the 'Alids rulers ad
301 (913), it was taken by Mardšīwīdī b. Žīyār in
316 (928) and taken from the Būyids by Maḥmūd
of Ghazni shortly before his death in 421 (1030).
It was the favourite residence of the Saldīḵūn
Malik Šāh. The Ismāʿīlīs made numerous con-
verts there at the beginning of the xith (9th) century.
During the Mongol invasion a battle fought under
its walls by the Sultān of Khwārizm, Djalāl al-
Mangobūrī, although indecisive, saved the town
(625 = 1228); it nevertheless became part of the
Mongol Empire. Muḥammad b. Muṣaffar took it
from Abū Iṣḥāq Indīlū in 757 (1357). When cap-
tured by Timūr, the inhabitants rebelled and were
massacred (massacres of 70,000 heads, 790 = 1388).
It was taken by the Ottoman Sultān Sulaimān
during the rebellion of prince Ilkān-Mīrzā (155-
1548). After the battle of Gūlūnchūb (1134 = 1721)
the Afgān Maḥmūd besieged Iṣfaḥān and it suf-
fured terribly from famine and capitulated, which
resulted in the abdication of Shāh ʿHasīn. Its popu-
lation was massacred for a fortnight after the
victorious rising in Ḩādūn (1136 = 1723); it was
liberated by Tāḥmasp Kūli Kūhān (Nādir Șāh) in
1141 (1729).
Choosing Iṣfaḥān for his capital, Shāh 'Abbas I
[q. v., i. 7b sqq.] made it a large and beautiful
town, with a large population (at least 600,000
in the xvith century), whence the Persian proverb
Iṣfaḥān nisf-i Ḧājan "Iṣfaḥān is half the world".
It lies along the Ūndā-rūd (now called Zāyin-
dūd), which is crossed by three fine bridges, one
in the centre of the town, Pul-i Dżula or Pul-i
Allāhverdi Kūh, because it leads to the suburb
of Djufla [q. v.] and was built by the general of
'Abbas I, now called Pul-i so sīn Čašma (bridge
of the 33 arches), the two others at the two extre-
mities of the town, the lower, the bridge of Bābā
Rukan, which led to the cemetery in which the
mausoleum of this derviš stood, now called Pul-i
Hasānābād; the bridge of Pul-i Mīrām (Jāmān
or Jāne, name of a district) also called the bridge
of Shabristān, higher up the river. A fourth bridge
called Pul-i Čubī ("wooden bridge") connected the
two halves of the palace of Sašdaštūbūd.
The town was surrounded by a wall of earth,
badly kept and encroached on by houses and
gardens. This wall had eight gates, — formerly
twelve, — but four were built up (see their names
in [Dupré] Voyage en Perse, 1819, ii. 158). Iṣfaḥān
was divided into two parts, Dżawbarā and Dardāšt,
which were inhabited by the hostile factions of
Ni'mat Allāh and the Ūdārī. The Mādīnā-Șāh,
"Royal Square", is a long rectangle enclosed by a
canal built of bricks coated with a kind of plaster
called șah-ki sīyāh, "black mortar"; behind it
along its margin are ranged the houses which se-
parate the square from the bazaar which surrounds
it outside, as well as large buildings like the gate-
way of the royal palace, the mosque of the Šadr, the
clockwork pavilion, the royal mosque in the south
and the imperial market on the north. The centre
of the square was marked by a tall pole used for
target shooting and two great columns of marble
used as goals for the game of polo (waghān). The Royal
Mosque (Masjīd-i Șāh), which is still in existence,
completely covered with enamelled bricks, was built
by Shāh 'Abbas I at the end of the xiiiith cen-
tury; it is one of the most beautiful buildings in
the world. Shāh Șaft I covered its gates with sil-
ver. The mosque of the Šadr, also called the mosque
of Fath Allāh, is much smaller. The pavilion of
the clock was built for the amusement of 'Abbas
II; it was a clock which struck with musical
chimes at each hour of the day; a clockwork arran-
gement caused large marionettes fastened to painted
figures to move along the wall, as well as birds and other animals in painted wood. The imperial market (bâşarî) was, like the other buildings in this square, entered by a gateway covered with bricks of facing; the centre was surmounted by a dome. The finest stuffs were sold there. The royal palace also had an entrance on this square through a large gateway (çatî kâbîli, the many coloured gateway), always open, day and night, used as a place of refuge (batac). In the centre of the garden was the pavilion called the Pavilion of the Forty Pillars (ekliî sultan), although there are only eighteen of them; it consists of a hall and two rooms covering the royal throne; its walls were covered with paintings.

The Kârwan-sarai of al-Khurâsân and that of Ma'âşûd A'sâr (the presser of oil), the palace of the Şâdî mânûbûfî, "superintendent of religious endowments", built by Rustam Khaan, the Kârwan-sarai irections by order of Abûbâs II, the tower of Khâlid al-'Ali, usually called Çulhâ, "Inden with flowers", the Tower of the Hows, covered from top to bottom with heads of wild beasts with their horns, a memorial of great hunts, the citadel called Ta-barak (Chardin, Kâl'a-i Tabarruk, "Castle of the Benediction") were the most beautiful monuments adorning the capital. The garden of Hâzûr Djarîb was formed of twelve terraces and fifteen avenues of trees, of which some were watered by a canal; pavilions and fountains completed the decorations.

The misfortunes of Persia during the Afghan conquest and the removal of the capital to Teherân under the Kâdîjûs ruined Isfahân. The Avenue of the Çâhâr Bagh still exists, as well as the Madrasa-i Mâdîr-i Şâhî, the "college of the king's mother", but many of the beautiful plane trees which adorned it were cut down and taken to Teherân for the building of the palace of Zill al-Sultân. The three bridges are in a good state of preservation. One can still see the Madrasa of Sultan Hussein, which dates from a little before the Afghan invasion, the palace of Hasht Bishtî, which belonged to Sârim al-Dawla, Zill al-Sultân's minister, and in the village of Galândân, in the environs of Diîfja, the two Mîrâz-i Diîfânî, "moving minarets" (explanation of the phenomenon in Mme Dieulafoy, La Perse, p. 278). The Mîrâz-i-Dihân has preserved its fairy-like, aspect; in the evening and morning the royal musicians (tambourines and trumpets) still play in the nakhshârâ khaînâ opposite.

The poet Khaîkânî (vi = viiith century) devoted a long ode of 81 verses to the praises of Isfâhân (Kulîyâ, i. 512).

On the Armenian colony New Diîfja see the article DULFA.

AL-ÎSFÂHÂNî, ABU BAKR MUHAMMAD B. Dâ'ûD B. `Àli. Born in 255 (868), this fākh succeeded his father at the age of 16 as head of the Zâhirî school (cf. Dâ'ûD B. KHALîP); he died in Baghîdâd 297 (909). His juridical polemics against Ibn Su-râjî, al-Nââîî al-Akbar, al-`Alîjîlî and al-Tabârî are recorded, but what has made his memory endure is a work of his youth, the Kitâb al-Zâhirî (ms. Cairo, êFûr, iv. 260), containing in 50 chapters 5000 verses selected from the poets on "the aspects of love, its laws and variations" accompanied by personal notes in very elegant prose. He there expands the Platonic conception of amour courtois (hâshî al-warî) with a grace which has never been surpassed. The friendship which linked him till his death to Muhammad b. Dâ'ûD al-Sâlâdî, to whom this book is dedicated, has become famous (cf. Ibn Fadl Allah al-`Umârî, Ma'âlîkh al-A'zîrî, Vol. 1, ch. v., s. v.; Brockelmann, Gesch. d. arab. Lit., i. 195 sqq. (L. MAshhîM.)

AL-ÎSFÂRAYÎN, formerly a small fortified town in the N. E. Khârûsân, south of the Atrak, in the province of Nâshîrûf. five relays distant from this town. Its name, which is still given to the plain in which it was situated, is derived by popular etymology from isfârâyîn "shield-like" on account of the custom of the
habitants of carrying shields, but it used to be called Mīhrādān, a name which since the time of Yākūt has been given to a village in the vicinity. The city itself which defended it was called Ḍaʾlā-i Zard "fortress of gold"; in the great mosque, there was a vessel of brass 12 cubits (gaz) in circumference. The district produced excellent grapes; there were many rice fields there. The inhabitants were Shāhi’s and have produced a certain number of jurists. Sacked by the Mongols in 617 (1220) it was destroyed in the Uzbek invasion a little before 1006 (1597). Its site is now represented by the ruins of Shahr-i Bilqis.

ISFENDIYAR OĞLU, the name of a Turkom district, which founded the independent kingdom of Kastamūnî on the decline of the Seldjuk kingdom of Konya, at the end of the viith (xiiith) century in N.W. Asia Minor, in the ancient Paphlagonia. The name is taken from that of the best known ruler of this dynasty, Isfendiyyar Bey; in the xviith century we find the name Ḥizil Aḥmed, from Ḥizil Aḥmed, the brother of Ḥizil Bey. The Byzantines called the Isfendiyyar Oğlu "the sons of Amurias" or of Omur. The founder of the dynasty appears to have been Šams al-Dîn b. Yāman Dîndar, who held a grant of the district of Aṣfârân; he went to war with Masʿūd II (681—697 A.H.), captured the town of Kastamūn and in 690 A.H. (Mānedjījibâhî) was appointed

GENEALOGY OF THE ISFENDIYAR-OĞLU.

1. Yaman Dîndar (for Yaman b. Dîndar?)
2. Šams al-Dîn (= Şonkor Bey Šamsi Pasha?)
3. Shūḏā al-Dîn Sulaimān Pasha
   4. Emir Yaʿqûb
   5. İbrahim Pasha
      6. ʿAli Bey
      7. Naṣratīs (= Naṣir al-Dîn?)
      8. ʿĀdil Bey (ʿAll)
      9. Bāyâzîd Kūṭūrūm (Vall)
10. Sulaimân Pasha
   11. Mubâriz al-Dîn Isfendiyyar
   12. İskandar
   13. (daughter) (reg. 795—843 A.H.)
      14. daughter, married to Murâd I.
      15. ʿĀrâr Yaḥyâ
16. İbrahim, reg. 843—847 A.H. married (828 A.H.) a sister of Murâd II.
   17. Kiwān al-Dîn Kâsim Bey
   18. ʿĀdîrî Bey
   19. Murâd
   20. Ḥaṭîma, married 825 A.H. Sulṭân Murâd II.
   21. 24. İskandar, called Mirzâ Bey
   25. Ḥasan, killed 855 A.H.
21. Kamal al-Dîn Abu l-Ḥasan Ismâʿîl; reigned 847—864; in 844 A.H. married a daughter of Murâd II.
   22. Kiwâ Kâbir
   23. Ḥaṭîma
   27. Mehmed, called Mirzâ, married a daughter of Bâyâzîd II.
   26. Ḥasan
28. Şemsî Pasha
   29. Muṣṭâfa Pasha

on this cf. the genealogy of Ḥizil Bey in the Hulawiyât-i Sulṭânî in Rieu, Catal. of Turkish MSS. in the British Museum, p. 11, and that of Şemsî Pasha in Pečewi, ii. 19 sqq.; 4 perhaps the brother of Sulaimân Pasha, called al-ェfendi by Ibn Batūṭâ; the sons of Sulaimân Pasha, 5—7, in Ibn Batūṭa, ii. 349, 348, Shihâb al-Dîn, and Pachymeres, ii. 327 sqq., 611; 8 according to Mânedjîjibâhî, son of Sulaimân Pasha; 13 according to Saʿd al-Dîn, i. 192; another sister of Isfendiyyar and her son is mentioned by Clavijo, p. 92, but without giving her name; 14 according to Târîḵ-i Sâf, i. 39 sq.; on 17 see Saʿd al-Dîn, i. 277 sqq., 284 sq., 318 sq., 320 sq.; Ḥâmid Wahbi, p. 1350 sq.; on 18 Saʿd al-Dîn, i. 287; on 19 Saʿd al-Dîn, i. 318 sq.; on 21, the epithet in Feridût, i. 250; on his marriage with a daughter of Murâd II: Dukas, p. 243; Saʿd al-Dîn, i. 342; on 23 cf. Rev. Hist., p. 390 sq.; on 24 Ḥâmid Wahbi, p. 1354; on 26 Saʿd al-Dîn, i. 474, 476.
governor of the districts seized by him by the Ilkhan prince Kaikhosru. He seems to be identical with Sonqor Bey Shemsi Pasha, who conquered Buli according to Ewliya, ii. 173. His son, Shujud al-Din Sulaiman Pasha (700-740 A.H.), at first acknowledged the suzerainty of the Ilkhan, but afterwards made himself independent and conquered Sinope, which was still in possession of a daughter of Mas'ud II. He is mentioned in Ibn Batutla (ii. 343 sqq.), Shihab al-Din (Not. et Extr., xiii. 340 and 361 sqq.) and Abu l-Fida' (Geographie, ed. Reinaud, ii. 1, p. 35; 2, p. 142, 145); Pachymeres, ii. 345 sqq. and 456 sqq., knows him by the name Eulamitakos. His successors were: his son Ibrahim Pasha; Adil Bey, son of the Emir Ya'qub and grandson of Shams al-Din (about 746 A.H.); Djalal al-Din Bayazid, son of Adil Bey, from 787-795 A.H.; Sulaiman Bey, son of Bayazid, from 795-799 A.H., Suljan Bayazid I killed him and seized his land (according to Rev. Hist., p. 289; the Ottoman chronicles give no mention of Bayazid Sulaiman and make Bayazid Koutchur reign till 795 A.H.). Mubarriz al-Din Isfendiyar, son of Bayazid, was restored by Timur in 805 A.H. He died on Rama'dan 22 843 A.H. About 820 A.H. he had to cede the towns of Tosia, Kiangri and Kalfedik and the district of Djank to Mehemmed I and later the rich copper mines to Murad II; Ibrahim, son of Isfendiyar, 843 - beg. 847 A.H.; Isma' il, son of Ibrahim; was deposed by Sultan Mehemmed II at the instigation of his brother Kilis Ahmed in 864 or 865 A.H. and died in Philippopolis, which was allotted to him as a residence by the Sultan. He was the author of a widely circulated book, Huismayyini Sulaymi, on the ritual prescriptions of Islam. His brother Kilis Ahmed fled to Usun Hasan after the confiscation of Kastamun, returned to Constantinople after the death of Mehemmed II, and was honourably received by Bayazid II; his son Mirza Mehemmed married a daughter of the Sultan and his grandson Shemsi Pasha filled high offices under Selim II and Murad III; Shemsi Pasha in particular had great personal influence as the confidant (mustafib) of Murad III. He fabricated a gilded history of the "Kilis Ahmed al-Isfendiyar-Oghlu" which went back to Khazid b. al-Walid, and invented the name Kilis Ahmedlu for the dynasty of Isfendiyar-Oghlu. Descendants of this family still exist and when at the beginning of the xvith century it was feared that the Ottoman ruling house might become extinct, the Kilis Ahmedlu were considered amongst other as possible claimants to the throne on account of their frequent marriages with relatives of the Sultans.

**ISFID DIZ.** [See \kalat sef'd].

**ISHAK,** the Biblical Isaac, whose birth, according to the Talmud (Rash ha-shana, p. 11), took place at the feast of Passah and, according to Muslim tradition, in the night of "Asgib" (al-Thalabi, p. 60; and Kisak, p. 150), was promised to his father Ibrahim a year previously by Allah (also in Gen. R. 45). Ibrahim was in the habit of eating only when the poor and hungry shared his meals. On one occasion fifteen (al-Thalabi, p. 48) or three (al-Kisa, p. 149) days happened to pass without a guest appearing. Three strangers then appeared before him but he gave them a roasted calf. They did not touch it (Kur'an, xi. 73). They said "We eat nothing without paying its price". He said "The price is that you should utter a blessing before and after the meal" (al-Thalabi, l. c.; Gen. R. 54). They then foretold to him the birth of a son. Sara laughed at this, as she was 90 and Ibrahim 120 years old. The latter said: "Then he shall be sacrificed as an offering to God!" (These features probably have their origin in the accounts in the Midrash [Gen. R. 15; Tanchuma Gen. 40]). When seven years old, Ishak visited the sacred place. Ibrahim then received in a dream the order to make sacrifices. The next morning he sacrificed a bullock and divided the meat among the strangers. In the night the voice again said to him: "God demands a more valuable offering". He killed a camel. In the following night the voice said: "God demands thy son as an offering". Ibrahim awoke in horror and said: "O my son, I saw in a dream that I must sacrifice thee" (Kur'an, xxxvi. 101). The latter replied: "Father, do what was ordered thee. Thou wilt find me a patient person, if God will" (102). Taking a knife and a rope they went together to the mount. Ishak said: "Father, take my shirt from my body, lest my dear mother find blood upon it and weep for me. Bind me firmly, so that I do not move, and look away while sacrificing me, lest thou lose thy courage" (al-Kisak and al-Thalabi, l. c., according to Gen. R. 56; cf. also Sefer haysid'ar, Wayyera and Pirke de R. El. 31). "May God comfort thee for my loss! Give my mother my shirt that it may comfort her and do not tell her how thou didst sacrifice me. Never look at boys of my age, lest grief overwhelm thee!" Ibrahim directed the knife against the throat of his son but three times it slipped and glanced aside. Then a voice called to him: "Ibrahim, Thou hast satisfied the vision" (Kur'an xxxvii. 105). Then a ram appeared, which said it had been the offering of Habib and had hitherto been in Paradise; it was offered as a sacrifice (Abath V; Pirke de R. El. 32, and al-Kisak). When a rumour arose that Ishak was a foundling adopted by Ibrahim, God gave father and son the same figure so that they were very like one another. But Ibrahim was grey (Baba M. 87; Gen. R. 53; al-Kisak, p. 152).

As the Kur'an verse above quoted does not state, which son was to have been sacrificed, many Muslim theologians refer the intended sacrifice to Isma'il (al-Zamakhshari and al-Baidawi on the passage; al-Tabari, i. 291; Ibn al-Athir, i. 88; al-Thalabi, p. 55-56; al-Kisak, p. 150). But it may be said that the oldest tradition — al-Thalabi expressly emphasises the "Asgib and Tibbun", i.e. the Companions of the Prophet and their successors from Omar b. al-Khattab to Ka'b al-Ahbar did not differ from the Bible in this question.

**Bibliography:** al-Zamakhshari, i. 224; al-Baidawi, i. 233; al-Thalabi, Kisas al-Amiklay (Cairo 1312), p. 48-60; al-Kisak, Kisas al-
Asiyâ, p. 136—140; al-Tabari, ed. Leyden. i. 272—4; Ibn al-Athîr, i. 87—89; Grünbaum, Beiträge, p. 110—120; Eisenberg, Abraham in der arab. Literatur, 1912, p. 30—31; Encyclop. Hebr., New-York, v. 18, s. v. Isâk. (J. Eisenberg.)

Išâk b. Ḥuṣain b. Išâk al-Ḥarîbî, Abu Yâqûn, the son of Ḥuṣain b. Išâk [q. v.], a physician and philosopher, but more important as the translator of Greek, mainly philosophical and mathematical works into Arabic. He was in great favour with the caliphs al-Mu'tamid and al-Mu'taḍîd, and the vizier of the latter, Ḵâṣîm b. 'Ubaïd Allâh. He died in Kâbi II 295 or 299 (Nov. 910 or 911) in Baḥdâd. Of his most important translations we may mention the Elements of Euclid, afterwards improved by Thâbit b. Ḷûra, his Daṭa, the Almagest of Ptolemy, also improved by Thâbit, Archimedes' books On the sphere and cylinder, Menaclus' Sphaerica, Plato's dialogue Sophistes with the commentary of Olympiodorus, the Categories of Aristotle, his Topica, Hærmenaiæta and Rhetorica, de Coelo et Mundo, de Generatione et Corruptione, a part of the Metaphysica. Of these translations the following has been edited: — Aristotelis Categories cum versione arabica Isaacii Honenti et variis lectionibus textus graeci e versione arab. ductis a J. Th. Zenker, Lipsiae 1846. — Into the question, which of these translations were made from the Syriac and which direct from the Greek, we cannot enter here, but refer the reader to the Bibliography. In the case of several of these translations there is still doubt as to whether they are by Išâk or his father Ḥuṣain.

Išân, Persian pronoun 3rd pers. plur. The word is used in Turkestân in the meaning of šâhâk, murqâd, ustâḏâlī, pîr, teacher, guide [see DERKÄŠI i. 950], in contrast to murîd, adherent, pupil. When the first person always has still to be investigated; it certainly existed in the middle ages; the celebrated Kâbi (Bed. 895—941, also called Išâk in Samarkand) is always called Išâk in his biography. The rank of Išâk is frequently transmitted from father to son. The Išâk lives with his followers in a dervish monastery (ḵânaḵâh), in Central Asia pronounced xhanâka), sometimes also at the tomb of a saint. Most Išâk's make journeys from time to time into the steppe, where they have more adherents among the Kirghiz and receive richer presents than from the settled population. Greater attention was attracted to the Išâk's by a rebellion stirred up by an Išâk in Farghânâ in 1898; but the literature on the subject is still extremely scanty. Cf. J. Geijzer, Materiali k islamným blízovým čerí mužstva manskogo nasledenija Turkistanu krajâ, i. Išâk (Šorňák materialov dlia stastâtiky so Dariâxîskîmi oblasticî, Vol. i.): Šorňák materialov a mužstva manskâ, St. Petersburg, 1899; Sattar-Chân, Mužstva'skîe ishâki (Pravoslavnyj Sobórâčnîk, Sept. 1895, and later N. P. Ostroumîov, Sârî, izd. 3e, Taghkiten 1908, p. 206 sq.); Prince V. Maslîskij, Turkestanskiy krai. St. Petersburg. 1913, p. 355 sq.; Fr. v. Schwartz, Turkstan, Freiburg in Breisgau 1909, p. 198. (W. Barthold.)

Išâkî-yûn (scil. al-Ḫusâkî) i.e. the adherents of the Ḥikmat al-Išâkî or maṣâḥib Išâkî (read by many, e. g. Pococke, Munk, Renan, as maṣâḥib Išâkî = eastern). The name is given especially to the disciples of al-Suhrawardî (died 1191) but the name and the matter are older. On the name cf. Ḥikma; it is really a question of the synergetic philosophy of Helenism, which reached the east from Neo-Platonic, Hermetic and allied sources and was there amalgamated with old Persian and other speculations. It is a spiritualistic philosophy with a mystical theory of knowledge. God and the world of spirits are usually interpreted as light and our process of cognition as an illumination from above through the intermediary of the spirits of the spheres. The following are regarded as particular authorities for this doctrine: Herodes, Agathodeemon, Empedocles, Pythagoras, etc., and Plato more than Aristotle (at least the genuine one). These authorities are often described as prophets or inspired sages. From the beginning to the present day, this philosophy of revelation has influenced Muslim philosophy to a great extent. The so-called Peripatetics in Islam are in part under its influence, Ibn Rushd perhaps least of all.

Išâkî, Abu Išâk Muhammad b. Ahmad [or Išâkî] al-Kârâxî, al-Muttaqî's vizier. In 323 (934—935) he is mentioned as secretary to Muhammad b. Yâkît, chief of police in Baḥdîd, and in Shawwâl 320 (June—July 941) the Caliph gave him the office of vizier, but after only six weeks, in Dhu 'l-Ka'da (July—Aug.) of the same year, the Amir al-Imâm 'Kûrîtî dismissed him. Some time after 'Kûrîtî's fall he received again his rank, but could only hold it for 40 days. In Shawwâl 330 (June—July 942) he was again given the same office and after he had held it for 8 months 16 days, the Hâmidîd Nâṣir al-Dawla [q. v.] dismissed him.

Išâkî-yûn, Alexander the Great (the Arab authors usually see the Arabic article in the first two letters of the name). In the Muhammadan accounts of the world-conqueror there are here and there echoes of genuine historical tradition but as a rule we have to deal with legendary tales, which originate in the romance of Alexander (see the article ISKANDAR-NÂMA below) and were considerably extended and embellished by later writers. We confine ourselves here to giving in its broad outlines what the older Arab historians relate on the subject. In the first place it should
be noted that Alexander's genealogy is artificially made up in various ways as may be seen from Friedländer's *Die Chahār-lēgāned und der Alexanderroman*, p. 294 sqq. As a rule, however, the name of his father Philip is correctly given, frequently in the form Fileššu, Filalkšu or otherwise corrupted, as well as that of his mother Olympias (also almost always in a corrupt form); some authorities even give the name of his grandfather Āminta or Āminātā. Even in the earliest historians however we find also the view, which was as its original Persian national pride, that Alexander was not the son of Philip, but of Dārāb (Dāra al-Akbar) so that he was the half-brother of Dārā (Dāra al-Asghar), the last Persian king. It is said that, when Philip was conquered by Dārāb but had to pay a yearly tribute in golden eggs, his daughter, who is given the name of Halai (otherwise in Firdawsi) to get a fantastic etymology for the name Alexander, was married by Dārāb but on account of her repulsive odour was at once repudiated by him and sent back to her father. They endowed a hospital in order to cure her defect by a medicine called *sândar*. In the meantime born of said son, he was called Alexandros after the name of his mother and that of the medicine. The boy was brought up at the court of his grandfather; his tutor was Aristotel, and after Philip's death he succeeded him. Alexander soon omitted to pay the tribute and, when his half-brother, who had in the meantime become king of Persia, demanded it Alexander sent the messenger home with the answer that he had killed and eaten the hen which laid the golden eggs. We omit here the story of the symbolic gifts which Dārā sent to Alexander and Alexander's reply, although it is found as early as al-Tahārī i. 605. Alexander then prepared for war, collected a great army and went first of all to Egypt, where he founded buildings (see *Al-Iskandarīya*). In the meanwhile Dārā also had assembled his troops and Alexander advanced against him, until the two armies met on the Euphrates where a sanguinary battle took place (its site is also placed elsewhere), in which Alexander was victorious. Dārā fled, but was treacherously wounded to death by two of his own people who sought thereby to gain the favour of Alexander. According to some accounts, several encounters took place between Alexander and Dārā but in the end the result was the same and Alexander met his dying foe. The latter recommended his wife to his care and asked him to see to the punishment of the murderers and to other matters; in particular he expressed the wish that Alexander should marry his daughter Rushang (Roxana). Alexander promised to fulfil his requests and ordered Dārā's obsequies to be carried out in regal fashion. As a result of his marriage with Rushang he now acted as the legitimate ruler of Persia, ordered the affairs of the government, and advanced on India to conquer Fūr (Porus), who was allied with Dārā. He had a fierce battle with Porus and only succeeded in disposing of him by rendering his elephants innocuous by stratagem and finally overcoming his opponent in single combat. Another Indian king, named Kaid, submitted to him voluntarily and sent him four valuable gifts (a virgin of wondrous beauty, a vessel which never became empty, a physician and a philosopher who could answer every question). He then took an interest in the Brahmins (gymnosophists) and had a conference with them in which he put various questions which they answered. After thus becoming acquainted with India he began his expeditions throughout the whole world, which are however usually but briefly mentioned by the historians. After India, came China and Tibet (Dinawari mentions the meeting with Candace) and finally he went to the Land of Darkness and met Khīrīr (Khādīr). The historians apparently knew a great deal about all this, but they omit to narrate it, either because they thought that it was not the contemporary of Dārā but an older Dhu 'l-Karnain who was the real hero of these incidents, or for other reasons. We shall deal with this question below: here it is sufficient to say that Alexander finally died on his return to Persia at Šehrūzr or in Bābil, according to al-Dinawari, in Jerusalem, at the age of 36, after reigning 13 or 14 years (many other figures are also given). According to some accounts, he died from poison and having a presentiment of his approaching end, sent a letter of consolation to his mother in Alexandria. The corpse was placed in a golden sarcophagus, over which the philosophers spoke in turn and in brief speeches when opened, the words of earthly greatness. The sarcophagus was taken to Alexandria and buried there in a tomb, which, according to al-Masʿūdī, still existed in 322 (964).

Among Orientals, Alexander is not only the world-conqueror and founder of cities — he is said to have founded 12, all called Iskandariya — but the hero who reached the ends of the earth (cf. i. Macc. i. 3). It was not lust of conquest but the thirst for knowledge that was his motive. Philosophers therefore accompanied him everywhere and the wonders of nature and enigmatical problems attracted his special interest. Mubashshir b. Fāzik and al-Shahruzi, quoted by Mīrkhwān, therefore deal with Alexander in their biographies of Greek philosophers. Cf. Meissner in Zeitschr. der Deutsch. Morgen. Gesellsch., xli. 583 sqq. At the same time he appears as the champion of the true faith, because his epitaph, Dhu 'l-Karnain, which is variously interpreted [cf. i. 961b sqq.] led to his being identified with the prophet of the same name mentioned in Kurān xviii. 82 sqq. This is however not approved of by all expositors; the majority distinguish an earlier and a later Dhu 'l-Karnain; the later is then identical with Alexander. For further details and the peculiar confusion with Mūsā in Kurān xviii. 59 sqq. see the articles Khīrīr (Khādīr) and Yaʿṣūr (Wa-Maṣūr). The connection indicated by Lādzbarki, Meissner and others of these stories with very ancient Oriental ideas and myths (Gilgamesh epic) will there be dealt with.

**Biography:** All universal histories deal with Alexander so that one need not only mention the older Arab historians: al-Yaḥyā, ed. Houtsma, i. 96, 161 sqq.; al-Dinawari, ed. Girgas, p. 31 sqq.; al-Tahārī, ed. Leiden, i. 693 sqq.; al-Masʿūdī, ed. Paris, ii. 250 sqq.; Eutychius, ed. Pocock, p. 281 sqq.; al-Thaʿlabī, *'Arāf*, ed. Cairo 1314, p. 203 sqq. etc. Cf. also the references given in the article ISKANDARI-NA."
1036.

A little known version in Eastern Turki we owe to the celebrated Mīr ʿAlī Shīr [see NEWT]. The Ottoman Turkish version by Ahmedi [q. v.] is based on the Persian of Firdawsi (see Gibb, A History of Ottoman Poetry, i. 203 sqq.). A similar work by Fīghāni [q. v.] is also mentioned (Gibb, op. cit., iii. 36).

Bibliography: In so far as it is not given in the work itself, given in Friedländer’s book. Cf. also Chauvin, Bibliographie des ouvrages arabes, vii. 79 sqq.

AL-ISKANDARIYA, occasionally AL-ASKANDARIYA, often SIKANDARIYA, ALEXANDRIA, the principal seaport of Egypt, in Ptolemaic times the second city of the world, now among the most important trade centres of the Mediterranean, with a population of nearly 400,000 including a strong foreign element, is situated at the Western angle of the Delta in latitude 30° 11’ N. and longitude 29° 51’ E. It was founded in 332 B.C. by Alexander the Great. When it came into the hands of the Arabs, it was the capital of Egypt and, though its glory had diminished, it is still a great and splendid town. Under Muhammadan rule it declined to the verge of utter ruin. Its revival dates from the beginning of last century. The present Alexandria is almost entirely modern and needs no description here. It covers the site of mediaeval Alexandria, of which nothing is left but the most scanty remains.

Topography. The port of Alexandria is formed by a peninsula, consisting originally of an island, called Pharos, joined to the mainland by a mole or causeway seven stadia long and known for that reason as the Heptastadium. On the north eastern point of the island stood the Pharos, the great lighthouse built by Ptolemy I, a vast building, prototype of all our lighthouses and generally acknowledged to have been one of the wonders of the world, survived the Arab conquest by several centuries. The Arab writers call it the manāra or manār. Their accounts show that it consisted of a large and lofty structure of white stone, square in plan and massive in frame, above which rose a pile of brick and plaster in the form of an octagonal tower, tapering into a round tower towards the top, with a dome at the summit; they differ greatly as to its height. There are records of the Pharos having been damaged by earthquake and having been repaired on various occasions in the Muhammadan period. A
large part of it fell in 724 (1324), but some portion seems to have been standing a century later. Soon afterwards it had collapsed entirely and in 882 (1477) the present Fort Pharos was built by Ḍaiṭ Bāy [q. v.] on its ruins. The harbour to the east of the peninsula was originally the principal harbour of Alexandria, and (contrary to what is sometimes stated) was the one generally used in Muhammadan times. Even up to the middle of the xviith century the western harbour was resorted to only by galleys, but later it came into use for trading ships, though Christian vessels were not admitted to it until 1803. The Heptastadium, broadened as the course of time by the accumulation of silt from being quite narrow into an isthmus, some three-quarters of a mile in width; it was a vessel of buildings in the middle ages. The town lay to the south, covering an oblong area of about 3 km by one km. Its walls remained in existence till 1811. They consisted of an outer wall some 20 feet high, backed in most parts of the circuit by a thicker and higher inner wall distant some 20 to 25 feet from it; both inner and outer walls were flanked by frequent towers. A further defence was afforded by a moat or ditch designed to be filled from the Nile in case of need. The town had four gates: Bāb al-Bahr leading to the Heptastadium, Bāb Rashid, Bāb al-Sidra at the beginning of the road to al-Maghrib and Bāb al-Akhḍar leading to the cemetery. The walls had been repaired in the reign of Baibars [q. v.] and again in 703 (1303) after an earthquake, in which 17 of the towers had been thrown down; al-Ghūrī also repaired the towers during his reign. The whole system was a curious specimen of mediaeval fortification. It is not possible to say for certain when it was built. A solitary remnant was the so called Tour des Romains, which recently stood near Ramla railway station.

Statements by Arab writers of the ixth to xith centuries, when pieced together, give a very general description of the town itself. It was laid out on a regular plan; eight straight streets intersected eight others at right angles, producing a chess board pattern with direct and continuous thoroughfares, a marked contrast to the meandering roads and blind alleys usual in Eastern towns. The streets were colonnaded, columns were used in most of the buildings; many of the columns were marble. Marble was abundant in the buildings and was employed also in paving some of the highways. There was a market street, a league (so it is said) in length, all built of marble, both its walls and floor. The columns and stones were often of prodigious size and enormous blocks were poised at great heights. Much variety and beauty of colour and fine workmanship were displayed. For instance, pillars like emerald and others resembling onyx are mentioned, all of the highest polish and finish. In the inside of the town there were gardens (kurām) and sycamores. A remarkable feature was that the houses were built on vaults supported by columns, rising above one another in as many as three tiers. The object of this subterranean architecture was to provide cisterns for the storage of water, which was derived from the Nile, and also from the rain, for Alexandria has a fairly considerable rainfall in winter. Materials for reconstructing the plan of the town are quite insufficient. The monuments and buildings noticed may be divided into three classes. In the first, those which dated back to ancient times, there come Pompey's pillar or the column of Dio- cetian (Camīd al-sawārī), the important ancient remain still standing in its place; Cleopatra's needles (al-misīlātān), the two well known obelisks removed in recent times, one to London and the other to America; the Caesarian, a most famous edifice, originally a temple and afterwards the patriarchal church or cathedral, which appears to be mentioned once under the name of al-Ḫaisariya and is probably to be identified with Kanisat Asfāl al-ʾArī, alluded to as a wonder; the remaining remains belong to famous Serapeum, consisting of a forest of columns known as Sawārī Sulaimān, many of which were still standing in position in the xviith century; a magnificent dome called Kubbat al-Khādi, spoken of by several writers; a colossal brass statue known to the Arabs as Shārḥīl, which stood on a rock in the sea; its foot was as long as the utmost stretch of a man lying down at full length; this statue was melted down in the time of al-Walid. In the second category come the churches, buildings but rarely alluded to by Muhammadan writers. Beside the patriarchal church referred to above, which was dedicated to St. Michael, there were two churches of St. Mark, a church of St. John, a church of al-Suwar (the Saviour), churches of St. Cosmas and St. Damian, St. Mary Dorothea, St. Faustus, St. Theodore, St. Athanasius, a Greek church of St. Saba. The list might be extended, but as a rule little more is known of the churches than their names, though one or two of them are described as beautiful or highly ornamented. The great church of St. Mark, which contained the tomb of the saint, was situated a short distance within the Eastern gate on the right hand of one entering. The shrine was known in the xviith century. Whether the modern church of St. Mark occupies the same site does not appear, but it seems that none of the existing churches, even if they mark the site of old ones, preserve any features of interest. There are instances of churches having been built at Alexandria in Muhammadan times; on the other hand, some were destroyed in popular commotions or deliberately demolished, and some were converted into mosques. The third class of buildings consists of additions made by the Muhammadans. It may perhaps be placed the citadel (kiṣām), described as strong and swept by the sea from the west, whence it would seem that it was situated at the north west corner of the town. It was in existence as early as the viiiith century. An ancient citadel, presumably pre-Muhammadan, which was in being in the xth century, contained a government house (dār al-laṣrāb), built by one of the early Arab governors. The Mamlūk sultāns had a similar house (dār al-ṣulṭān), which was situated on the sea-shore and contained many columns of variegated marble and had courts paved with marble,—some ancient palace reserved for their use, but rarely, if ever used. One reads of a great hall of al-Muʿāṣarāy. There was an arsenal or armory "sufficient to equip the people of Egypt". The places of worship included an oratory or maṣṣalā, which, as at Fustārā, had fallen into ruin within a couple of centuries of the conquest. There was a mosque attributed to ʿAmr b. al-ʾĀṣi [q. v.], but whether it stood on the same site as the present mosque
of Amr seems doubtful. The second principal mosque, the western mosque or mosque of the Septuagint, also known as the mosque of the 1001 columns, had been a monastery up to the end of the 1st century, and seems to have been converted into a mosque between this time and the middle of the 5th century. A large mosque "built" by Badd al-Maqdèsī (iii, p. 477) (1084) is presumably represented by the existing Dziμi al-Attairīn, which would seem to be identical with the mosque and former church of St. Athanasius. Ibn Ṭūlūn built a mosque on the Pharos. Early shrines were a mosque of Mūsā near the Pharos, mosques of Sulaimān, of al-Khādir, and of Danīlūlī, still in existence — one notes the Jewish association of these names, — of Dūh l-Karaṇīn or Alexander and the mosque of al-Rahma, marking the spot where Amr stopped the slaughter when he entered Alexandria the second time.

In the ivth century, Alexandria is described by a European traveller as "exceeding beauteous and long" and "exceeding clean" and "carefully kept". In 507, according to another, there was "nothing to be seen but a prodigious heap of stones" and it was rare to see a "continuous street"; in 1634, the town was "almost nothing but a white heap of ruins". There is mention of many houses of Jews on the Heptastadium in (about) 1580, built there "in respect of the air", the earliest allusion, it seems, to habitations on the peninsula. The scanty remnant of the population concentrated there not long after, forming a "new city of very mean appearance" and leaving the town within the walls almost entirely deserted. Enough has come under European observation fully to preserve the former splendour of Alexandria. At the present moment the principal remains, apart from the column of Pompey, are a few of the cisterns.

Alexandria was joined to the Nile by means of a long channel. This work had a tendency to silt up and, instead of being kept open by regular clearing, it was allowed from time to time to become more or less thoroughly blocked and then it was re-excavated. Occasionally after re-digging, it was open to traffic all the year round, but as a rule only for a part of the year. In 1800, the navigable period was only about 20 days. Sometimes communication by water was cut off altogether and the people of Alexandria had to depend on their cisterns for their drinking supply. In the earlier part of the Muhammadan period, the canal left the river at Shāhābur. In the ixth century an alternative waterway from the Nile below Fāwa, through the lakes of Idrīs and Abū Kūr to the neighbourhood of Alexandria, came into use. Al-Nāṣir in the ixth century either improved or reconstructed this channel, the original canal from Shāhābur being abandoned. Various lesser alterations took place subsequently. The damage resulting from the neglect of the canal can be easily understood. It is one of the reasons why the surroundings of Alexandria had become, generally speaking, a desolate waste at the beginning of the ixth century. Maryūt was once busy and thriving and the progress of its gradual decline can be traced. Buḥairat al-Iṣkandariya, identical with the now dry lake of Abū Kūr, has alternated between water and dry land more than once in the Muhammadan epoch.

History. When Alexandria was surrendered to the Arabs in 21 (642), a considerable number of Greeks took advantage of the terms of the capitulation and left it, abandoning their homes. The Arabs on taking possession did not molest the inhabitants. The well known story of the burning of the great library by order of the Khalīfa ʿUmar, which belongs to the 1st century, must be considered as true. On their re-entry into Alexandria after the invasion of Muḥammad in 25 (645), the Arabs revenged themselves on the inhabitants by a massacre; churches were burnt and the town walls, it is said, were thrown down. In the first century of the Hijra, Alexandria was of great importance to the Arabs as a naval station. Hence, no doubt, the rapid increase in the number of its garrison, part of which was drawn from Mađina, and the frequency of visits by the Umayyad governors of Egypt. The Arab occupation at first was purely military. An Augustal was in office late in the century, a sign that the civil administration continued unchanged for a long while.

When the last of the Umayyad Khalīfahs fled to Egypt, al-ʿAswād, a grandson of ʿUkba b. ʿNāfi', declared for the ʿAbbāsids at Alexandria. His followers included 30,000 Muslims of Buḥaira and Maryūt. This host, however, was dispersed by a detachment of 500 troops sent to Alexandria by Marwān; the Khalīfa's men entered the city and there was slaughter there again. The ʿAbbāsids rewarded al-ʿAswād with grants of lands at Alexandria, which seem to have been Umayyad possessions previously. In the course of the struggle between al-Amin and al-Maʿāmūn, Alexandria was coveted for by the Arab tribes of Lakhm and Muddajj. A band of Arab adventurers or pirates from Spain, who happened to be in the port, took advantage of the opportunity to seize the town and managed to hold it against all comers for 16 years (106—212 = 811—827). Four or five sieges occurred during their tenure and, although there are not many details, it is clear that it was a period of tyranny, misrule and excesses, and altogether most disastrous to Alexandria. At this time a band of religious revolutionary fanatics styling themselves Šūfis came into view. There are some signs of similar associations at Alexandria more than a century earlier. Al-Mutawakkil (not Ibn Ṭūlūn) built the walls of Alexandria in 244 (858), for fear of attacks by the Greeks. If these walls were the origin of the walls of 1800 — which is not proved — the town had already become reduced to half the size it had been at the conquest. But little appears during the next two centuries. Alexandria was occupied two or three times by the Fātimids [q.v.] before they achieved the conquest of Egypt. A notable event of the Fātimid period was the transfer of the Coptic patriarchate from Alexandria to Cairo. For a while during the slave revolt (about 460 = 1067) Alexandria was in the hands of the blacks. It was the centre of revolts in 479 and in 547 and on each occasion was taken by siege. A descent by Sicilian Normans on Alexandria in 550 (1155) is mentioned. Amaury, King of Jerusalem, in conjunction with Shāwar and forces of Egypt and aided by the Pisan fleet, besieged it in 562 (1166), when it was occupied by a Syrian garrison, which included Saladin himself. A formidable Sicilian attack on Alexandria in 569 (1173) was beaten off. Baibars built up the galleys at Alexandria and restored them to what they were before. In
762 (1365) Alexandria was surprised and plundered by the King of Cyprus. There is evidence that it had declined greatly in importance by this time, inasmuch as its governors were persons of quite minor rank. The Mamlik Sultan very rarely visited it. They made constant use of it as a place of imprisonment for political offenders. Guns were included in its defence in the xviith century, and al-Churii, when he feared an attack by the Turks, sent a large quantity of ordnance to it in 922 (1516). After the Turkish conquest, the taxes of Alexandria were not included in the revenue of Egypt, but were paid direct to Constantinople. In the xvith century it served as the port of Turkish galleys, which were dismantled and hauled up during the winter. The marauds of these vessels extended as far as the Straits of Gibraltar and the prisons of Alexandria held many Christians they had captured. The ruins of the town now began to be used to provide materials for beautifying mosques and other buildings at Constantinople. The French took Alexandria in 1798. It was taken from them by the British and later by the British in 1801, after the events of 1798-1801, it is not likely to have been much more. In 1828 it was stated to be about 13,528 - smaller than that of Rostova. By 1829, it was estimated at 40,000 and in 1862 at 164,400 In 1871, it was 219,602. As a result of disturbances during the rebellion of 'Arabi Pasha [q. v.] in 1882, the forts of Alexandria were bombarded by the British fleet in July; next day part of the town was destroyed by the mob.

Manufactures, trade. Alexandria was noted for its weaving. Its textiles are described as incomparable and are said to have been exported to all quarters (cf. Egypt, II. 179). Some of the linen manufactured at Alexandria was so fine that the flax for the stuff was sold for its weight in silver and that for the embroidery in it for many times its weight. Alexandrian silks occur in Fatimid inventories (9th to xiith centuries) and it is believed that some of the fabrics presented by Popes to churches in Italy in the xiith and xith centuries were executed by Alexandrian workmen. A great number of miscellaneous manufactures, the character of which is not specified, are said to have been carried on. It was as a market for the products of the Indies rather than those of Egypt that Alexandria was of special importance to trade, particularly for the spices, pepper, cloves, nutmegs, cinnamon, ginger and so forth; - though the list of commodities included other articles such as pearls and precious stones. After being landed on the west side of the Red Sea and conveyed to the Nile by caravan, this merchandise was transported to Alexandria by the river and canal. It was in constant demand in Europe and elsewhere, so that Alexandria was resorted to by people from all parts for commerce. This trade can hardly have been maintained during the early part of the Muhammadan epoch and for various reasons is not likely to have become active until the era of the Fatimids. Towards the end of the reign of the Umayyads or the beginning of that of the 'Abbâsîds, Christian ships began to visit the port, and in the removal of the relics of St. Mark to Venice in 828, according to the well-known story, there is evidence that commercial relations with Venice subsisted then. It seems, contrary to what might have been expected, that the trade with the west was stimulated and developed as a result of the Crusades. In the xiiith century it was well established, and people from all Christian kingdoms resorted to Alexandria; a contemporary name 28 Christian towns or states represented by traders there. Among the number were Amalfi and Genoa, which with Venice appear to have been the earliest in the field, Ragusa, Pisa, Provence, and Catalonia. Besides Christians were to be met Muhammadans from Spain and Barbary and from Mesopotamia, Syria, and the countries towards India. It is known that ships belonging to Alexandria went at the same epoch as far as Amheria in Spain. Each of the various states of the xiiith century had its own fondaco (fondACo), a building in which the merchants warehoused their goods and also resided. The Venetians, as the leading commercial power, obtained a second fondaco in the xiiith century, besides other privileges, and they had also a fondaco at Figo. Their colony was presided over by a consul, and the Pisans, Marseilles and Genoans likewise had consuls there in the xiiith century. Florence established a consul in the xivith century. The first English consul was appointed in 1583. There are many details of commercial treaties, the customs, measures taken with regard to the trade by the Sultan, disputes between Christians and the inhabitants and between the Christians themselves, and other similar matters showing the conditions under which the merchants carried on their work and the difficulties they suffered. The discovery of the route by the Cape of Good Hope in 1498 diverted the Indian trade from Alexandria and reduced the commercial importance of the port to small proportions. When the trade in coffee and other commodities began in some measure to flourish in about 1680, a certain revival at Alexandria manifested itself.

Bibliography: The materials for a history of mediaeval Alexandria are widely scattered. Contributions are to be found in almost every one of the principal Arab histories of Egypt; see article Egypt. To be noticed particularly are Ibn 'Abd al-Hakam (ed. Masâ'îd, Cairo 1914, in progress; ed. Torrey, in preparation); al-Masâ'îd, Murâdî al-Dhahab (Cairo 1303; Paris, 1861-77); Bibliotheca Geographorum Arabicorum, i.-viii.; al-Ithârî, ed. Dozy and De Goeje (Leiden 1866); ibn Djbâhir, Gibb series, v.; Yakûtî, Mu'allîm al-Buldân; 'Abd al-Latîf, Kitâb al-Isfâda wa'l-Fîlîhâr etc. (ed. White, Oxford 1800, and Cairo 1832, transl. and annot. by de Sacy, Paris 1810); al-Makrizî, al-Khulafâ wal-Ahâr; ibn Iyâs, Badî' al-Zuhhâr fî Wâdî al-Duhâr. The Christian writers Severus, ed. Everts and ed. Seybold (cf. ibn al-Mukaffa', 2); and al-Makrizî (Elmaciûn), Lugd. Bat. 1625, supply a few facts not to be found elsewhere. Benjamina of Tduela (many editions) has a brief but important notice. European travellers and accounts in Eu-
European languages include Arculfus (680), Bernard the Wise (870), Ludolf von Sachem (1350), all three in *Palestine Pilgrims' Text Society's Series*; M. Baumgarten (1597) in *Churchill's Travels*; Leo Africanus (1517). Hakluyt Soc. 92—94 various titles in *Hakluyt's Voyages*, vol. ii., relating to the xviii century; Sandys (1610) *Travels*; Blount (1614) in *Pinkerton's Voyages*, vol. x.; Maillet (1692); Pococke (1777); Volney (1783), and others.

AL-ISKANDÂRÎYYA = ISKANDARUNA [see ISKANDARUN]. According to *Tadhq al-Arûs*, iii. 276, al-Iskandariyya was the name of 16 distinct places called after Alexander the Great, including the town of Balkh as well as the two towns mentioned above.

(plaintext)

ISKANDARUN (Alexandretta), the Iskandarûna or Iskandariyya of the Arabs (see the variants of the MSS. of al-Ishkhrî and Ibn Hawqal), the port of Aleppo on the Mediterranean, is the ancient 'Aleksandriya kâtâ 'Isâ, which was afterwards also called little Alexandria ('Aleksandria ū 'umkârî Malalas, ed. Bonn, p. 297), which was reproduced by the Arab actors in the form of the Arabic Iskandariyya; it should not be confused with the place of the same name between Sûr and 'Akka, cf. Maqrizi, *Hist. des Mamlûkes*, ed. Quatremère, ii. 2, p. 256 sqq.; Dimishkî, transl. by Mehrer, p. 280. The 'Aleksandrov of Skylitzes, ii. 677, is formed from Iskandariyya and from 'Aleksandrov then there arose the form 'Aleksandros (Michael Attalî, p. 120; Zonaras, iii. 691; Georgi Cyprius and the episcopal list, *Byz. Zicher*, i. 248); the form usual with us (the Roman diminutive formation) is used as early as the Western pilgrims of the middle ages (Wilibrord von Oldenberg, i. ch. xviii.). Under Arab rule Iskandariyya was the i,jwâd of Kinnasrîn-Halab; the castle is said to have been built in the reign of the Caliph al-Walîthik (Abu 'l-Fida', ed. Reinaud, ii. 2, p. 33). In the wars between the Byzantines and the Arabs the town was repeatedly taken by the former (Murult, *Chronogr. Byz.*, year 1068; Ibn Hawqal p. 121). In Abu 'l-Fida's time it was deserted. In the period following it again gained importance as the port of Aleppo, which was beginning to flourish, but the unhealthy climate, a result of the surrounding swamps, and the not very favourable conditions at the port have so far impeded the commercial development of this important place. It is the capital of a kazîh with 10—15,000 inhabitants. It is connected with Aleppo by a road 60 miles long.

ISLAM is the name which Muhammadans in every country give to their own faith. The word means "submission", "resignation", (to God), and occurs eight times in the Qur'an, in such verses as iii. 17, "The (true) religion with God is Islam"; v. 5, "This day have I perfected for you your religion and have completed My favour upon you and it is My pleasure that Islam be your religion"; vi. 125, "Whomsoever God wishes to guide, He opens his breast unto Islam". See further art. MSK.

In the present article merely a statistical account will be given of the extent to which the Muslim religion prevails in the various countries of the world at the present day. For an exposition of the religious tenets and ordinances of Islam, the reader is referred to articles such as Allâh, Muhammad etc., and for the biography, history, geography etc., of Muhammadan peoples, to the appropriate articles under each head.

Various estimates of the total number of Muhammadans in the world have been made, differing as widely as from 175 to 270 millions; but there is a large element of uncertainty about the estimate, as in several countries where Muhammadans are to be found in large numbers, no religious census has ever been taken, and accurate statistics are accordingly wanting. This is particularly the case in the land in which Islam had its origin, and any estimate of the total Arab population must be conjectural only. Some reliance may be placed on the figures given for the districts under European control, as 56,000 (Aden and the neighbouring islands, Perim, Sokotra, etc.), and 89,000 (Bahrain Islands), but estimates of the population in the independent parts of Arabia, e.g. Nadîd, Hâdramût, etc. — 2,500,000 (Zwemer), 3,500,000 (Hartmann) — and those (e.g. Hasjâz, Yemen), under Turkish suzerainty, l,050,000 — can be tentative only. The Arabs are not however confined to the limits of the country that bears their name; as early as the third century of the Christian era had commenced those scattered migrations of Arabs to the north which gradually led to the formation of settlements in Palestine, Syria, and Mesopotamia; as time went on, advantage was taken of the conflicts between the Byzantine and Persian empires, and larger numbers of nomad Arabs settled in the more fertile countries bordering on the arid land of their origin. This migratory movement culminated in the vast expansion of the Arab race, rendered possible by the conquests of the seventh century, when the Arabs despoiled the Byzantine empire of some of its fairest provinces and subjugated the whole of the territories of the Persian king. The fact that the Arab language was gradually adopted throughout the greater part of Syria, Egypt and North Africa.
is some evidence of the interpenetration of Arab blood in the population of these countries, and a steady, though intermittent, stream of migration from Arabia into Africa set in across the Red Sea. Another stream moved eastward across the Indian Ocean and by the middle of the eighteenth century Arab traders had made their way as far as China and were present in large numbers in Canton. Arab trading settlements are found scattered throughout the Malay Archipelago, and at different historical periods small groups have established themselves on the coasts of British India, and individual Arabs have made their way to most parts of the Muhammadan world, especially those accessible by sea. But no attempt has ever been made to estimate the total number of these Arabs living outside the limits of the Arabian Peninsula, as separate groups in the Muslim populations of which they form a part.

For some countries of Asia which are under European rule, we have accurate statistics. In India, where varieties of religious belief are carefully noted, the Muhammadans, according to the Census of 1911, numbered 66,647,299, out of a total population of nearly 331,515 millions. (For details as to the varied composition of the population, see article INDIA, §1). The Muhammadan community shows a tendency to increase in numbers relatively to their Hindu fellow-countrymen; in the decade ending 1901, while the total population of India increased by 2.4%, the Muhammadans increased by 8.9%; in the following ten years, their number rose by 6.7%, as compared with only 5% in the case of Hindus. Proselytism may partly account for this, but the chief reason for the rapid growth appears to be that their social customs are more favourable to a higher birth-rate than those of the Hindus; they have fewer marriage restrictions, and widows frequently re-marry. Conversions to other religions are not frequent, but Christian converts from Islam are numbered by thousands in Northern India, especially in the Paigah (The Mohammedan World of To-day, pp. 170, 294), and a certain number of Muhammadans of Hindu origin have been re-absorbed into Hinduism through the missionary activity of the Arya Samaj (v. art. INDIA, §5c). In Ceylon, in spite of the intimate trade relations with Arabia, Islam has not achieved any great extension among the inhabitants and there were in 1912 only 284,000 Muhammadans, out of a population of over four millions.

For the Malay Peninsula and Archipelago, complete statistics are wanting. One estimate (Zwemer) gives 673,159 as the Muhammadan population of the Federated Malay States and the Straits Settlements, while another (Hartmann) gives nearly double that figure. Introduced into Malacca from India, Islam spread along the great trade route to Java and the other islands of the Archipelago. The Muslim population of the Dutch Indies in 1905 was 35,034,025; including 29,605,653 in Java, and was said to be rapidly increasing as the result of conversions to Islam from among the sections of the population that still remain heathen; on the other hand, Christian missionaries have in recent years been winning converts from Islam in Java, where more than 300 baptisms are said to take place every year, and in 1906 there were living 18,000 Christians who had been converted from Islam (The Mohammedan World of To-day, p. 237); in Sumatra the various missionary societies working in this island claim to have made 6,500 Christian converts, together with 1150 catechumens, formerly Muhammadans, since the year 1860 (ib., pp. 222, 228).

In Siam, Islam has never succeeded in exercising much influence; converts have been won in the north through contact with the neighbouring Malay States, and in the coast towns as the result of intercourse with the Malay Archipelago; but the total number of Muhammadans is probably not more than 10,000.

In other parts of Asia under European rule, there are found in the French possessions in Indo-China 1,146,000 Muhammadans out of a population of 17,800,000; in the Asiatic possessions (including the Caucasus) of the Russian Empire 11,966,700 Muhammadans out of a population of nearly 25 millions; and in the Philippine Islands, under American rule, 277,547 Muhammadans out of 8½ million inhabitants.

But when we pass to countries in which accurate census returns after the European method are entirely wanting, there is still more uncertainty as to the figures. In Persia, an estimate made by Christian missionaries assigns to Islam all but 500,000 out of the five millions of inhabitants. In Afghanistan it is conjectured that there are about four million Muhammadans.

The first serious attempts to ascertain the number of the Chinese Muslims were made by Broomhall and d'Ollone; the former suggests 8,421,000 (Islam in China, p. 215), the latter (Recherches sur les Musulmans Chinois, p. 430), 4,000,000 only. These figures are in striking contrast to the exaggerated estimates made in the 19th century when their number was alleged to be as much as 20 or 30 millions or even 70 millions; but some Christian missionaries consider that the more recent estimates are too low. But whatever proportion the present Muslims bear to the total population of China, it is probable that their numbers were considerably larger before the massacres that accompanied the suppression of the many Muhammadan insurrections of which a list is given by d'Ollone (op. cit., p. 436), in which millions of persons are said to have perished. In Tibet there are believed to be as many as 25,500 Muslims, most of them settlers from China and Kashmir, with a few converts, and descendants of converts. Islam has succeeded in gaining but few adherents in Japan, and these in quite recent years; there are probably not more than 200 Muslims in Japan itself, but about 25,500 in Formosa.

In regard to some of the oldest parts of the Muhammadan world, now included in the Asiatic possessions of the Sultan of Turkey, and excluding the independent parts of Arabia, various estimates of the Muslim population are given e.g. 11,190,000 (Hartmann) and 12,278,800 (Zwemer), but in the absence of accurate census returns these figures can be considered as approximate only. (v. A. de la Jonquières, Histoire de l'empire ottoman, p. 457 sqq., Paris 1914).

Next to Asia, Africa is the continent that contains the largest number of Muslims, but materials for an exact judgment are so scantily available that estimates vary even by the most recent investigators that estimates vary from 42 to 76 millions. The most rigid investigation has been made by Professor D. Westermann, and his figures, with a total of 42,039,349, have been adopted by Zwemer as follows: Abyssinia,
500,000; Egypt, 10,269,445; Liberia, 280,000; the rest of this continent forms part of the empire of one or other of the powers of Europe, but for the greater part of these vast dominions no exact census returns are available; Belgium, 60,000; France, 15,085,000; Germany, 14,500,000; Great Britain, 12,539,904; Italy, 1,365,000; Portugal 330,000; Spain, 130,000. While much of these estimates is necessarily conjectural, some reliance can be placed upon the figures given for those parts of the continent in which the population is almost entirely Muhammadan, e.g. Morocco (in which there are 3,100,000 out of a total of 3,220,000); or in cases where whole sections of the population such as the Hausas or the Fulbe have adopted Islam. This faith is still making progress among the heathen tribes and new converts every year come in to swell the numbers of the faithful.

In Europe, on the contrary, the influence of Islam continues to decline. What the population of Muslim Spain may have been in the days of its widest extent, it is impossible even to conjecture, but in 1492 the Jewish and Muslim community together numbered over two millions, and when Philip III expelled the last remnant of the Moriscos in 1609-1615, the number of those who left the country was probably about 500,000. (H. C. Lea, *The Moriscos of Spain*, p. 359, London 1901.)

At the present time, the Muhammadans in Europe are almost entirely confined to Russia and those countries that formed part of the Turkish dominions at the beginning of the 19th century. In Russia in Europe, the total number of the Muslims is about 3,500,000, but there has been no religious census in the Russian empire since 1897; they are mainly Tatars by race, but proselytism has taken place to a considerable degree among Finnish tribes such as the Cheremiss, the Votians and the Chuvash. Since the promulgation of the edict of religious toleration in 1905, there has been an increasing number of accessions to the faith of Islam. There is a considerable amount of uncertainty about the religious statistics of the Balkan Peninsula, and even the official estimates are open to grave suspicion of being manipulated to suit some political or racial interest.

In Turkey in Europe (in Asia) there are said to be about 3,200,000 Muhammadans; Hartmann, writing in 1909, gives 3,295,000. In Bulgaria, the Muslims number 603,876 out of a total population of nearly 4½ millions. In Rumania there are about 43,700 Muhammadans, living for the most part in the Dobrudja. In Serbia in 1910 there were 14,435, and in Montenegro 14,000. In Albania the total Muslim population is said to be 334,000, of whom 12,000 are Gypsies, 40,000 Serbs and 26,000 Albanians. Greece still contains 24,000 Muhammadans, while in the island of Crete the number has shrunk to 27,852; but so recently as 1909 there were 33,496 Muhammadans on the island, and in 1881 more than 73,000. In Bosnia and Herzegovina the indigenous Serb population includes 61,437 Muhammadans, and in the rest of the Austrian empire there are about 14,500 more.

In the other countries of Europe, chiefly France and Great Britain, there are some small scattered groups of Muhammadans, mostly of African or Asiatic origin, temporarily resident in these countries.

Emigration and commercial activity have added 8,000 Muhammadans to the population of North America, and 166,000 to that of Central and South America (including the West India Islands, where there are 10,499 in Trinidad and 3,000 in Jamaica). In Australia there are 195,000, chiefly at Perth.

**Bibliography:** The first comprehensive attempt to give a statistical survey of the followers of the faith of Islam, was made by Hubert Jansen, *Verbreitung des Islams in den verschiedenen Ländern der Erde* (Berlin 1897), but his figures are often very exaggerated, and later investigations have shown that many smaller estimates are nearer the truth. Martin Hartmann, *Der Islam: Geschichte—Glaube—Recht* (Leipzig 1909), gives detailed statistics, but does not mention his sources of information. S. M. Zweimer in chapter iii. of *Mohammed or Christ* (London 1910), gives a census of the Muslim World, with a bibliography. Separate studies have been made of the statistics of certain parts of the Muhammadan world e.g. by M. Broomhall, *Islam in China* (London 1910); S. Bobrovnikoff, *Moslems in Russia* (The Moslem World, vol. i. London 1911); D. Westermann, *Der Islam in West- und Zentral-Sudan* (Die Welt des Islams, i. 85 sq., Berlin 1913), and G. Campfmeier, *Statistik der Mohamme daner auf der Balkanhälsung und in Österreich* (ib., i. 32—33). For Africa and Asia see *The Mohammedan World of To-day* (New York 1906). Details as to the spread of Islam are given for their respective territories by the British and Dutch governments in their decennial official publications, the Censuses of India and Kolonial Verlag respectively. Religious statistics are given in *The Statesmen's Year Book*, published annually in London. The *Revue du Monde Musulman* contains articles giving statistics of the Muhammadan population of several countries, see *Index général des volumes I à XVI* (Paris 1912).

(T. W. ARNOLD.)

**ISLĀMĀBĀD,** a town of some importance in the south-eastern part of the valley of Kashmir situated at the head of the navigable channel of the River Djełām. Its Hindu name was Anantāgā, but it was named Islāmābād after the Muhammadan conquest, probably by Sulṭān Zayn al-Abīdīn, 820—872 (1417—1467). The town was formerly famed for its shawl manufacture, but this has died out, and at present the only manufacture is that of white felt, embroidered rugs and embroidered tablecloths. In the immediate neighbourhood are the celebrated Hindu Shrine of Mār tand and Dījāngīn's gardens at Aṭībal.

**ISLĀMĀBĀD.** The name Islāmābād was given on more than one occasion by the Emperor Awrangzēb to towns conquered from Hindus. Of these the most important are Cittāgonga (Çitğām) (q. v.), at the head of the Bay of Bengāl, Çāṅkā in the Dōcān, and Mathurā in the Djamān. Islāmābād was the place of mintage of these coins, but Mr. C. J. Rodgers ascribed them to Mathurā. Çāṅkā
however received the name İslāmābād in 1970 (1659) and Čitgām not till 1075 (1664). The name is not now in actual use for any of these three towns.

(M. Longworth Dames.)

ISLĀMBOLO. [See ĨSTAMBUL.]

ISLĀM GİRĀY, the name of three Khāns of the same.

1. İslām Gīrāy I b. Muhammad Gīrāy, brother of Ghaźī Gīrāy I (q.v., ii. 1514), during the troubled period that followed the death of his father, he succeeded, as his brothers had done before him, in occupying the throne for a short time (a few years till 939 = 1532), but he was not recognised by the Sultan. After the appointment of his uncle Şahib Gīrāy, he rebelled against the Sultan and was murdered in 944 (1537).

2. İslām Gīrāy II b. Dewlet Gīrāy, brother and predecessor of Ghaźī Gīrāy II (q.v., ii. 1514), 990—996 = 1584—1588. In contrast to his successor he was not popular in his country and was only able to maintain his position with Turkish help.

3. İslām Gīrāy III b. Selçuk Gīrāy, 1054—1064 = 1644—1654, in contrast to the two other Khāns of this name, was a vigorous, warlike ruler who also took up more independent attitude than his predecessors to the Porte and played a prominent part in the political events of his time, notably in the liberation of Little Russia from Polish rule. In his youth he spent seven years in Polish imprisonment. Several raids into Russia were made by him. About 1650 he even made an attempt but without success to enter into relations with Queen Christina of Sweden and to procure money from her for the campaigns against Russia. İslām Gīrāy died in the beginning of Shabān 1064 (began 17 June 1654) at the age of 50 after reigning 10 years and five months. For the Bibliography see the article ǦANİČE SĀRĀK, i. 562 sq.; see also the documents edited by Vehlāniq Zernof, Matériaux pour servir à l'histoire du Khanat de Crimée, p. 340 sq. The last document composed shortly before the death of İslām Gīrāy is specially important, it is a threatening letter from the Khān to the Czar Alexei Michaelovit (p. 475 sq.).

(ISM.) pl. asmāʾ, properly "name", technical term in Arabic grammar for the first part of speech, the nōm, noun. The term corresponds exactly to the Greek ὄνομα used as early as Aristotle, and to the Sanskrit nāma, which is found as an established term in the Nirukta of Yāska, who lived many generations before Pāṇini, an authority of the fourth century B. C. There is however no interconnexion; the term occurred spontaneously and obviously in every day speech, in which nāma, īsm and bhūva comprise all words — not merely proper names — which signify a thing, especially one perceived by the senses. In fact, such words represent in the first class of words the predominate element for thinking and speaking (cf. Ztsch. d. Dtsch. Morgenl. Ges., last. 350 sq.). It is not therefore a consideration based on grammatical science but the simple and most obvious semasiological point of view which underlies the term among the Indians, Greeks, and Arabs. The same is true of the Arabic term for the second part of speech, fāʿi, which means "action", while the word ḳūs (saying), which goes back to Aristotle, the precursor of our "verb" and the Sanscrit ākhyātaṃ, used already by Yāska, which means "communicated, related", point to the predicative function, i.e. they are chosen from a logical or syntactical point of view.

To the asmāʾ, first of all belong the substantives, for which there is no special term, and the proper name, al-īsm al-ʿalām (see ĀLAM) is distinguished from the ism al-ṭıfīns or class name; the latter again is divided into ism ʿain and ism maʾnā (Masṣṣal, § 3) accordingly as it denotes a concrete or an abstract. As with the Greeks and Romans the adjective (ṣifa [q.v.], also ṣawf or naʾf) belongs to the ism and the numeral (ism al-ʿadad). Differing from them, the Arabic system includes the personal pronoun (jamār, q.v.) under the ism — the reason being partly the meaning of the words concerned as characterising things and partly their conditions of infexion and the demonstrative pronouns (asmaʾ al-ḥaṣār), classed as muḥāmāt [q.v.], the relative (al-ʾism aš-šawāf), and the ininitive (masūd, q.v.) and (as had been done by the Stoics, the participle, active and passive (af-ṣāfīl and ism al-ṣawāf); the same time the Arabs were by no means unaware of the close relations of the participle with the verb as regards etymology, meaning and syntactical application, which led the Greek grammarians to insert a part of speech called significantly ṣawāf between the noun and the verb. Finally there are considered as nouns, even the exclamations and appeals of very different linguistic character, classed in our grammars under the inappropriate name of interjections, and even purely onomatopoeic formations like ḳāḥ of the crows' caw. The Arabs called these words, when they have a verbal (usually imperative) significance, asmāʾ al-ʿafāʾil, otherwise ʿawād i.e. tones, sounds (sing. sawād). That their classification under the noun was really only at the time they could not be placed anywhere else in the three-fold scheme, is rather bluntly confessed by Ibn al-Ḥadīb in the commentary to the Kāfya (Constantinople 1311) p. 75,8 a f.: "wa lâdhi ya-dīlū ṣal aš-šinṣātā ṣal ad-dāhār u l-harīfīyat wa l-fīlīyat fīhā "and what shows their character as nouns is the circumstance, that the character of particle and of verb is impossible with them".

(ISM.)
In order, however, to be just to the Arab grammarians, one must not forget that the division of the parts of speech usual among us, which goes back to the ancient grammarians, is of an arbitrary character, and that the attempt to build up a strictly logical system is quite impossible of execution (H. Paul, *Prinzipien der Sprachgeschichte*, § 244).

Sibawaihi does not give a definition of *ism* in his survey of the three parts of speech in his first chapter, because the term was intelligible without more ado. He contents himself with three examples: *radīj* (man), *faras* (horse), and *ḥīj* (wall), merely names of species of concrete things. The other - more fundamental - made him the Muham- mad (d. 285 = 589) and the Kūṭa Ta'lab, (d. 292 = 904) and given by Ibn an Anbārī in *Kitāb al-Insāf*, p. 2, have, as Ibn an an Anbārī himself says, more the character of an etymological explanation. The former, who derives *ism* from the root *swm*, the second conjugation of which, *samān* means "to name," says: al-*ismu* mādalla 'ala musawma tažhahū "ism is that which indicates something named that underlies it". Ta'lab, who derives *ism* from the root *wsn*, "to mark with a brand (stigma, note)," says: al-*ismu* simatin tuḍu'allā 'lāli l-ḥairī yu'waru bi hiwa, "ism is a mark (note) put on a thing by which it is recognised." This explanation by its remarkable similarity recalls that of Friscian (ed. Keill), i. 57, 3: vel ut aliī, nomen quasi nō- tāmen, quod hoc nātās unum cujusque substantiae quidem. It is not till a later date that we recognise the Aristotelian definition: *φωνή* ἐνακτική κατὰ συνέχεια ἔννοις χρήσει κτλ, among the Arab grammarians. Thus al-Strażī (d. 368 = 978) says: Kullu ḥa'tîn, dalla 'ala ma'ānī ghairar mukṭarin bi-zamānin mukhāsanān niin muqūfin an gharihī, ḥalawan *swm*, "everything that indicates a conception without being associated with a definite time namely the past etc., is an *ism*" (Jahn, *Siberwitsch's Buch über die Grammatik*, Note 5 zu § 1; Ibn Ya'qūb, p. 25, 19). This is the definition which with slight variations became usual later (see Ibn Ya'qūb, p. 16, 13). Instead of "with a definite time," the Kūṭa says "with one of the three times" (present, past, and future): Ibn al-Hādżib (l.c., p. 7) gives a full explanation of the reason of this extension of the *swm* χρήσεων and of the difficulties resulting from the nature of the Arabic language in regard also to this definition.

The points of view from which the Arab grammarians regard the declensions of nouns are given in their general lines in the article *rās*. It may be further mentioned that Arab terminology has no equivalent for our "number" and "gender." The word *djins* borrowed from the Greek *νόμος* is never used for grammatical gender, as Merx, *Histoia artis grammaticae apud Syros*, p. 145 and 151, erroneously assumes; even with the grammarians the word only means the genus to which the species (namu) is subordinate (Ibn Ya'qūb, p. 22, 7).

For all details of the theory of the noun in the system of the Arab grammarians, the reader must be referred to the original works, to which Fleischer's *Beiträge zur Arab. Sprachkunde* give valuable elucidations.

**ISMA (A),** in dogmatics, immunity from error and sin, such as is ascribed in Sunni Islam to the prophets and in the Sh'ā to the imāms also. As to the extent of their immunity, the orthodox theologians differ in opinion as regards the prophets except Muhammad (on such points as whether it also exists before or only after their prophetic calling or whether it includes immunity from all kinds of sin or only applies to minor slips). It is applied in unlimited fashion to Muhammad only, in opposition to his own judgement. Among Sunni authorities Fākhʾr al-Dīn al-Rāzī in particular extends the *isma* to all prophets in the greatest degree. According to the Sh'ā teaching, *isma* is inherent in the imāms to a higher degree than in the prophets on account of their exalted qualities of substance. Abū Zaid al-Balkhī (d. 322 = 934) wrote a *Kitāb Ishrat al-Anbāy* (Vakīl, *Irshād*, i. 142, 5 a 462), as did Fākhʾr al-Dīn al-Rāzī (Brockelmann, 1, 507, no. 14). Every work on Muslim dogmatics contains a chapter on definitions and the different views in regard to them (e.g. Ibn Ḥazm, *Mīlād*, ed. Cairo 1321, iv. 1—31; Maʿwīj, ed. Soeren, p. 220 sqq.; a mystic definition of *isma* is given by al-Ḥazālī, *Mīlād al-Amal* (Cairo 1328), p. 116 paen.

**ISMAĪL, the son of the patriarch Ibrāhīm, is mentioned several times in the Korān. In Surah ii. 130 (= iii. 78) and iv. 161 it is said of him that he received revelations. In xix. 55 he is called a messenger and prophet, who summoned his people to *ṣulāt* and *ṣalāt*. These references fit in very well with Muhammad's account of the religion of Ibrāhīm. In Surah ii. 127, he is called one of the fathers of Jacob, along with Ibrāhīm and Ištāk; and in ii. 119, he, along with Ibrāhīm, is commanded to purify the Holy House at Mecca.

Tradition knows nothing of Ismaīl as a messenger nor of his revelations nor has it explained his relations to the spread of the religion of Ibrāhīm. It knows that his mother Ḥādżar bore him to Ibrāhīm as his first-born and that a feud arose between Ḥādžar and Ibrāhīm. With the mention of disfiguring Ḥādżar, Sara even pierced her ears; so this then became the fashion with women. Ismaīl and Ištāk are also said to have fought with one another occasionally. In the end, Sara's jealousy induced Ibrāhīm to decide to travel to Arabia with Ḥādżar and Ismaīl. The party was guided by the *Sakina* or, according to others, by Gabriel (on the form of the *Sakina*, cf. *The Novels of the Earth*, Verh. Kon. Akad. v. Wetenschappen, Ald. Letterkunde, Nieuwe Reeka, xvii. no. 1 p. 60 sqq.).

When Ibrāhīm and Ismaīl had dug the foundations of the Holy House, Ismaīl helped his father in the building of the temple. When this work was completed, Ibrāhīm abandoned the boy with his mother in the barren country, afflicted by thirst. In her need, Ḥādżar stood on the hills al-Ṣafā and al-Marwāa and looked for water and ran hither and thither between them, the origin of the *sāy* [q. v.]. Gabriel then called "Who art thou? To whom did Ibrāhīm entrust thee?" The boy then impatiently thrust his foot (or finger) into the sand and a spring arose; if Ḥādżar had not hurriedly scooped up the moisture in her jug, the Zamzam would have become a bubbling spring. It is also said that Gabriel pushed his heel into the ground and the Zamzam burst forth beneath it. In those days the Djūrūm [q. v.] lived near
the sanctuary; after Hâdjar’s death, Ismâ’il married one of their daughters. In his absence Îbrâhim visited his wife but did not find a very hospitable reception; when the woman after this repeated to her husband some words which Îbrâhim had said, he understood that the latter was suggesting he should divorce his wife. He did this; afterwards he married another woman of the Djurhum. Îbrâhim visited her also and in the same allusive fashion gave his approval to the new choice.

Îbrâhim and Hâdjar, according to Muslim tradition, are buried in the hâjer of the Holy House, a distinction which they share with most of the prophets: the prophet belongs to the home of the prophets.

Muslim tradition also knows the story given in Genesis xxii. But there are several theologians who say, it was not Ishâk but Ismâ’il that was the ḍabīh. For this view, the sayings of ‘Abd Allâh b. ‘Omar, Ibn ‘Abbas, al-Sha’bî, Mudjâhid, etc. are quoted. It is related, for example, that ‘Omar b. ‘Abd al-Azîz asked a Jew convert to Islam about this difference of opinion and he answered: “The ḍabīh is Ismâ’il; the Jews know this also, but as they are jealous of you, they say it was Ishâk.”

Îbrâhim is also considered the ancestor of the North African tribes. In the native genealogies, the Arabs are divided into three groups: al-Bâda’i (those who have disappeared), al-Tîrî (the indigenous) and al-mustâriba (the arabised). Ismâ’il is considered the progenitor of the last group, whose ancestor is called ‘Adnân. The chain between Ismâ’il and ‘Adnân is given in very divergent forms, sometimes in partial agreement with the list in Genesis xxv.

Fleischer, p. 192; Ibn Khotaiba, ed. Wüstenfeld, p. 18, 30; Die Chroniken der Stadt Mexka, ed. Wüstenfeld, passim.

(A. J. Wessinck.)

ISMA’IL, formerly a Turkish fortress, now the district town in the Russian government of Bessarabia, on the left bank of the Kilia arm of the Danube, between the lakes of Jalpuch and Katlabuch, with about 40,000 inhabitants (in 1897: 32193). The name Ismâ’il (Moldavian Smeril, Smil, or Smeth, also Simil) is said to be derived from the Slav smiž, a snake or a dragon, the epithet of several Moldavian princes; according to a Turkish folk etymology, from the alleged conqueror, a Capudan Ismâ’il, who took the town under Biszņicz in 1484. The origin of the town is unknown. It is said to have been at one time in the hands of the Genoese. It only attained importance under the Turks as a fortress to curb the Budjak Tatars, who had been settled there in 1569, and particularly as a point d’appui of the Turks against the advance of Russia, owing to its splendid strategic situation as the best gate of sortie from the north into the Dobruja and the intersection of the roads from Galatz, Khotin, Bender and Kilia. After Ismâ’il had been taken by the Russians without a blow in 1770 in the First Russo-Turkish War, the Turks endeavoured with the help of foreign engineers to make the town, which was restored to them by the peace of Küçük Kainardje in 1774, the strongest fortress on the left bank of the Danube, an “army fortress” (ordu kalâ‘î), i.e. the permanent quarters of large bodies of troops of a defensive character. The fortress, thought to be impregnable, was taken as early as Dec. 11 (22), 1790 by the Russians under Suvorov in spite of a most valiant defence by the Ser’asker Aidosli Mehmêd Pasha; in the three days’ massacre over 26,000 Turks, including the whole Muslim population, were killed, 9000 taken prisoners and only one escaped by swimming the Danube bearing the appalling news. This deed of arms, celebrated by Byron and Djerzhavin, aroused a tremendous sensation in Europe; in Constantinople it resulted in a revolution and the execution of the Grand-Vizier.

By the peace of Jassy in 1791 Ismâ’il was restored to the Turks and fortified again by them. (The splendid stones with the tughrâ of Selim III, testifying to the restoration of the fortress in 1794–5, are in the Odessa Museum). But in 1809 Ismâ’il again capitulated to the Russians, to whom it remained by the peace of Cæsarist in 1812, whereupon many colonists settled there, viz. Russian fugitives and sectarians, especially Ras kolniki, Rumanians, Greeks, Bulgarians, Armenians, Jews and Gipsies. In 1810 General Tuchkov founded at a short distance from Ismâ’il the town of Tuchkov, which bears his name and gradually expanded to form one town with Ismâ’il. By the peace of Paris in 1856, Ismâ’il after the demilitisation of its fortifications was added to Moldavia with a portion of Bessarabia and remained Rumanian till its capture by the last Russo-Turkish War on 14 April 1877, by the Russians, to whom it finally passed by the treaty of Berlin.

Only a few ruins of the fortress exist. The town, which in spite of many vicissitudes of war (such as being plundered by the Cossacks) was at one time an important centre for traffic in fish etc., fruit and corn and a populous town (always with a very mixed population, in contrast to the purely Tatar population around), suffered severely through the wars and the forcible expatriation of the former population of Bessarabia. At the present day its commerce is again highly developed in spite of the fact that means favourable shipping conditions.

ISMA’IL I, founder of the Safawî dynas ty of Persia, born of a Shi’ite family, settled in Ardabil [q. v., i. 425 sqq.] in Ahdharbajdzan since the time of the shâkh Sai’î al-Dîn, who was said to be descended from the imâm Mîsîs al-Kâzîm. He was the son of the shâkh Haidar [q. v.]; after the death
of his maternal grandfather, Uzun Hasan (about 883 = 1478), in the confusion of the anarchy that followed, supported on the one hand by the followers of his father and on the other by the seven Turkish tribes which had taken his side (Ustadli, Shamli, Tekkelu, Behiri, Dhu 'l-Kadr, Kulafr, and Ashgari). Isma'il collected an army of 7,000 men, who received the name of Kizil-bash (q.v.). In 817 (1410) he was master of Shirwan, Adharbaidjan, and 'Irak 'Adami and now took the title of shah ("king"). In 914 (1504) he extended his kingdom eastwards as far as Herat, westwards to Diyar Bakr and Baghda; but the forcible propagation of the Shi'a tenets which he conducted in the newly won territories brought him the enmity of his nearest neighbours on the north and west, the Khan of Bakhshis and the Ottoman Sultan, both Sunnis.

The former, Muhammad Shahbani Khan, who had made himself master of Turkistan after his victory over Babur [q. v.], was defeated near Merv by Isma'il in a great battle, in which he himself was killed (Shahbani 910 = Dec. 1510). This success brought Isma'il into the possession of the whole of Khurasan, but he could not prevent the Uzbekts from founding an independent kingdom in Khwarizm with Khiva as its capital. He fought with less success against the Ottoman Sultan Selim I. In the plain of Califdaran (east of Lake Uruzia) the Persian cavalry gave way before the infantry of the Janissaries supported by artillery (2 Radjab 920 = 23 Aug. 1514). Tabriz, Isma'il's capital, and Mesopotamia and the west of Persia as far as Mysul were occupied by the Turks (921 = 1515).

Isma'il compensated himself to some extent for this loss by the conquest of Georgia, but he sought to attain the realisation of his plans of revenge against his most dangerous enemy by an alliance with European powers. An offer of this kind was made him by Charles V after Leo X and Maximilian I had previously in 923 (1517) thought of gaining Isma'il as an ally against the Turks, but on account of the great distance which separated the Shah and the Emperor (it took almost six years for a letter to reach Charles V from Isma'il), no definite agreement was reached.

Isma'il died in 930 (1524) at Ardabil where the tombs of the Safawis are. The beautiful and valuable MSS. on the history of the Safi family are now in the Imperial Library at Petrograd. From the library he added to the tomb of Shah Isma'il. Isma'il restored the Persian kingdom and his dynasty ruled till its overthrow by the Afghans over two centuries later.

(See H. Huart.)

ISMA'IIL II, Safawi of Persia, son and successor of Shah Tahmasp I. After the latter's death on 15 Safar 984 (14 May 1576) his son Haidar Mirza with the support of the Turkish tribe of the Ustadli sought to usurp the throne, but on the day after his accession he was seized in the harem on the information of his sister Peri-Khánun and murdered during a rising in which the Ustadli and Ashaz paid the Kizil-bash. Isma'il, to whom his father had refused the rank of wali 'ahid (heir-apparent), as he knew him to be cruel and hard-hearted, had been a prisoner for nineteen and a half years in the fortress of Kâhshâh. But he was released by the Kizil-bash and proclaimed Shah on 27th Djamâda I 984 (22 Aug. 1576). A greedy and covetous man, he filled his treasury with all the gifts offered him without offering anything in compensation. He also neglected to visit his aged mother who had retired to the mosque of Shah 'Abd al-'Azm. He thus made himself hated by all his subjects. The princes of the ruling house were put to death by him in 985 (1577) under the pretext that they had planned a rising with the support of Turkish dervishes. He forbade the Shi'is to curse the persons revered by the Sunnis. He was particularly fond of giving himself the title 'Adil (the noble), which he certainly did not merit. He died, after a reign of a little over two years, in his capital Kazvin, at the end of a long illness after taking an elephant in Ramadan I 986 (6 Oct. 1577).

ISMA'IIL b. 'ABBĀD. [See under 'ABBĀD.]

ISMA'IIL b. AHMAD, ABU IBRĀHĪM, a Sâmnâd prince (amir) of Mā warā' al-Nahr, who laid the foundations of the power of his dynasty, born in Faqihāna in Shavwāl 234 (28 Apr. - 25 May 849), from 260 (874) to 279 (892) governor for his brother Nasr in Būkhāra; he continued to reside in this town even after he became amir of Mā warā' al-Nahr by the death of his brother and in 280 (993) was confirmed in this position by the caliph. In the same year he undertook a campaign as far as Tarāz (the modern Awliyā-Allāq, q.v.), conquered this town and changed its principal church into a mosque. On his struggle in Mā warā' al-Nahr with the Sa'darī 'Amr b. Alaih see the latter article, i. 335. Although Isma'il was declared to be dismissed from his office by the Caliph and his province granted to 'Amr, the Caliph expressed his satisfaction to the victor at the result of the struggle. The heritage of the Sa'darīs in Khorasan was disputed by Muhammad b. 'Ain, prince of Tabaristan. Isma'il's general, Muhammad b. Hārun, not only succeeded in driving the enemy out of Khorasan but even conquered Tabaristan; but he then rebelled against his master, adopted the white colour, the colour of the rebels against the legitimate government (Tabari, ii. 2208) and occupied Rāyi; Isma'il had to take the field in person against the mutinous general; after his defeat, Rāyi and Kazwin were incorporated in the Sammād kingdom and its frontiers thus settled in the west (289 = 902). In 291 (904) an inroad by a numerous Turkish people was repulsed with the help of volunteers from other Muslim countries (Tabari, ii. 2249). The date of Isma'il's death is given as 14 Safar 295 (24 Nov. 907). In Bukhāra, which was made the capital of the Sammād kingdom by him (cf. i. 775), his tomb is still shown, but its authenticity is not vouched for by inscriptions either on the building or on the sarcophagus.
defeated Ghilân in the north of Fâs and had him put to death. But Ahmad b. Mahraz once more raised the lands of the south and the Atlas. To obtain peace Ismā‘îl had to recognise his nephew as Amir of the lands south of the Atlas and his brother al-Hajrâni as Amir of Tûfîlât.

These civil wars, which had lasted five years, had hardly terminated when a descendant of the Marabouts of Dîlîn, Muḥammad al-Hajjîdî al-Dîlînî, also supported by the Turks of Aqîrîs, fomented a terrible rebellion in the country of Tâdâ and the provinces of western Morocco. But his Berber troops could not withstand Ismā‘îl’s disciplined troops, especially his artillery. Mûlîy Ismâ‘îl, being victorious, terrorised the people to keep them quiet; more than ten thousand were beheaded; thousands of prisoners of war along with Christian slaves had to help to build the palace of Mekines, which the Sultan made his military capital. At the same time the plague carried off thousands of victims (1090 = 1679) in the regions of the Gharb and the Rif.

The vigorous repressio of the Berber revolt and the epidemic afforded Mûlîy Ismâ‘îl a certain respite. He took advantage of it to raise a professional army. He enlisted former negro slaves. He gave them wives, allotted estates to them, trained them in the use of arms, and made of them the famous Black Guard of the "Aḥbâd-Bûjârî which was to assure him supremacy over all Morocco.

At the same time, nominally to favour the intransigent religious party, but in reality to watch the dealings of the Turks and Europeans in the seaports, and to counteract the influence of the corsairs, he organised the corps of the Mudţahâdûn or "volunteers of the faith". The latter corps, the cadre of which was formed by several hundred carefully selected "Aḥbâd, waged an unceasing irregular warfare against the European possessions. They took Tarîb al-Mâmûra (al-Mâmûra), the modern al-Mahdiya, by surprise from the Spaniards. Mûlîy Ismâ‘îl collected over 100 pieces of artillery there (1681). They harassed the English at Tangiers and the latter evacuated the town after blowing up the mole and the fortifications (1684) (cf. Davis, The History of the Second Queen’s Royal Regiment, i., London, 1883, p. 118 sqq.). Larache also was forced to succumb to the blows of the "volunteers of the faith" in 1689, Azîlî in 1691. But all attempts against Mîla and Céuta failed. It was in vain that Mûlîy Ismâ‘îl endeavoured to get Louis XIV to aid him against Spain. French commerce had to suffer for some time as a result.

But the Peace of Ryswick in 1697 raised considerably Louis XIV’s prestige above his enemies. Mûlîy Ismâ‘îl then sought his alliance against the Turks of Algiers who were mixed up in all the plots made in the Atlas against the Sharifs of Fâs. An entente between France, the Bey of Tunis and the Sultan of Fâs was then concluded. The latter even tried to cement it by a matrimonial alliance and demanded the hand of the Princess de Conti (cf. Plantet, Moulay Ismaïl et la Princesse de Conti, Paris, 1893). In spite of the failure of the latter plan, the entente secured to France great commercial benefits at Salé, Têwâmân and Safi. Frenchmen superintended the building of the palaces, roads, and forts of the Sultan and sometimes (like Pillet) accompanied his artillery. On his part, the Sultan organised
several expeditions against the Turks with the help of France, whose merchants supplied him with arms and munitions. But the slowness of the Moroccan armies did not enable Isma'il to reap the advantages expected. He even allowed his ally, the Bey of Tunis, to be defeated near Constantine, which enabled the Turks of Algiers to come to fight the Moroccans in the west in full strength in 1701 and to drive them back.

The expeditions of Mulya Isma'il against the Turks, in spite of their relative lack of success, enabled him to pacify his frontiers where he built or renovated the fortifications. He built the fort of Reggâda in the mountain of the Beni Ya'lis commanding the high valley of the Wâd Shibaret and the lands of the Arab tribes of the High Plateaus. He built the fort of 'Ayûn Sidi Mallûk in the plain of Angâd and that of Salbân in the land of the Trifa. He thus closed the exits on his north-east frontier. Forts built in the lands of each tribe kept the country quiet, especially the Marabouts, the natural allies of the Turks, whose privileges were tending to pass into the hands of the Sharifs. The latter gradually took over the direction of the religious elements, which were organised into brotherhoods. Isma'il completed his system of domination by the creation of military zones. Taza, notably, had its walls rebuilt. This town became the headquarters of the eastern march. A garrison of 2500 'Abid secured the passage from western to eastern Morocco by the pass of Taza. It also had to keep in control the Berbers of the Rif in the north of this ravine, and the Berbers of the middle Atlas in the south.

For this organisation and these works, Isma'il raised his revenues from a monopoly of the commerce at his ports and from continual raids on the tribes of doubtful loyalty. The monopoly besides filling his treasury enabled him also to prevent contraband traffic in horses and arms. But hardly had the Salibân, after reigning 50 years succeeded in imposing, either by skill or terror, peace within his territory than the rivalries of his sons brought his hopes to nought. He had centred all his policy on the struggle against the Turks of Algiers. He could not realise his dream. He died on 27 Rajab 1139 (March 30 1727) just when the dissensions which were breaking up the Regency of Algiers might have secured his success. He was succeeded by his son Mulya Ahmad al-Dhahabi.

ISMA'IL ṬHÂ'B. [See CEBELİZADE.] ISMA'İL HAKKÎ, ŞAHÎKH ISMA'İL HAKKÎ AL- BRUSİWI, or İFLAHİ NAMERî, a celebrated Ottoman scholar and poet and one of the most prolific of mystical writers. Born in 1665 (1652—3) in Aidsos in Rumelia, to which his father had retired after the great fire in Constantinople, he had at quite an early age the benefit of instruction by the Dâwelik Şahîk Faţih Ilahi 'Othmânî. In Adrianople he was initiated into the higher branches of knowledge and Dâwelik mysticism. At the age of 20 he began his fruitful activity as an author in Brusa. On account of some of his mystical tracts he was banished at the instigation of the 'ulamâ to Rodosto. The impulse to wander peculiar to many members of Mahammadan orders never allowed him to settle permanently anywhere, especially as he had not unfrequently to suffer from the fanaticism of the 'ulamâ. After a two years' pilgrimage to Mecca and long stays in Uskûb, Damascus and Scutari he finally settled in Brusa, where he built a mosque and monastery in 1135 and died in 1137 (1724—5). The date 1127 also given is in contradiction to the date of composition of several works.

Hakkî composed over a hundred theological works and mystical treatises, which still enjoy considerable esteem and some of which are printed. The best are Küb al-Bayân (Bâlâk 1276 = 1859—60 in four volumes), a celebrated commentary on the Korân: Kûb al-Mutâ'awwâl, a commentary on Djalâl al-Dîn Rûmî, and Fârâb al-Kûtân (Delight of the Soul), a commentary on the Muhammedyâ of Yâzîdîh Oghlu Me'med b. Salîh b. Kâthîb, Bâlâk 1252 and 1258, Constantinople (lipography) 1258. The following are also often mentioned: Şârîk al-arâbîn hadîkh, Constantinople 1253, ed. Mollâ 'Ali al-Hâfi; Kütâb Hâdîqat al-Bâligha and Râzât 'Ain al-Hayât (1291); 'Uthîfî Isma'ilîye (1292); Şârîk al-Kûsîr, 1257 (1841); Şârîk Shî'âb al-Ismân, 1305; finally a commentary on the Pund-nâmâ of Aq.î.

Bibliography: M. Nâjîdî, Esâmî (1308), p. 58—9; Sâmî, 'Umâm al-Âlâm, ii. 950; Hammer- Purgstall, Gesch. der Osmanischen Dictkunst, iv. 135—137; Flügel, Die arab., pers. u. türk. Handwriting, ... zu Wien, iii. 143, 150 sqq. 478—

ISMA'İL HAKKÎ, an modern Turkish man of letters and literary historian, editor of the periodical Mekûb, a moderate follower of the old Asiatic school and a former officer of artillery. Besides a few poems, tales, translations, and articles in periodicals, a series of treatises on literary history have been written by him.

In 1308 (1890—91) appeared his collection of poems Sevdâ-î Khâsan yahudî Têhassar (Autumn Love or, Repentance too Late). Two Millî stories written under French influence: İki Heçîkat (Two Truths) published in no. 7 of the Arakel kitâbî kitabên dîjîb romanîlarî, 1311 (1905—6). In the periodical Mekûb appeared his translation of Octave Feuillet's Roman d'en jeunesse uomo, tarnen under the title Âlîfâ. He translated Lamartine's Ra- phael and Grecia. His literary studies are more important, as is by no means a superfluity of such works in Ottoman literature. In the four volumes of his On dordunyî ârîn Türk Nakar
ISMA'IL HAKKI — ISMA'IL PASHA.

...to develop the Sūlān on the same line as Egypt, and to suppress the slave trade there. In 1805 he had obtained from the Sultan of Turkey a firman assigning to him the administration of Susāwān and Mossawāt, and subsequently (1870—1875) extended his authority over the coast of the Red Sea from Susā to Cape Guardsafui. In 1874 he sent an expedition to Dar

Für [q. v.], defeated the forces of the slave-trader, Zurbair Pasha [q. v.], and annexed this country, but further progress eastwards was checked by the resistance of the Abyssinians. But these various schemes for the aggrandizement of Egypt were costly, and the Khedive had borrowed and squandered money recklessly, both for public purposes and personal ostentation, so that by 1876 the debt of Egypt to foreign financiers had risen to nearly one hundred million pounds, and the country was so impoverished that its ordinary resources were no longer sufficient for the most urgent needs of the administration. Being no longer able to raise loans in the European market, on April 8, 1876, he suspended payment of his Treasury bills. The European powers interfered on behalf of the bondholders and instituted a Commission of the Public Debt, and established the Dual Control, in accordance with which an English official was appointed Controller-General of the revenue and a French official Controller-General of the expenditure of the country. A Commission of Inquiry in 1878 led to the vast landed property of the Khedive being placed under a similar control, and Isma'il accepted a constitutional ministry, including English and French ministers, under the presidency of Nībār Pasha [q. v.]; but in February 1879 Isma'il dismissed him, on the occasion of a military disturbance headed by Sābi Pasha [q. v.], and two months later dismissed his European ministers also, and restored the demand of the Governments of England and France that the British and French ministers should be reinstated. On June 26, 1879, he was deposed, and four days later he left Cairo for Naples, where the King of Italy had placed a residence at his disposal; later, he went to Constantinople, where he died March 2, 1895.

ISMA'IL PASHA, called Niẓām-ud-Dīn, Grand Vizier of the Turkish Sultan Selim III, a native of Aydıği in the province of Angors. After first of all filling the office of a šahdār (mandebearer) to the Sultan he was retired with the rank of Beylerbey of Rumili. In 1080 (1678) he entered...
the office of muṣṭafī-writers and on the outbreak of unrest in the reign of Sultan Muhammad IV received the rank of a vizier (1698—1687).

After the assassination of Siyâwush Pasha in the rebellion of the Janissaries, which took place on the accession of Salâhîn II to the throne, he was appointed Grand Vizier, but dismissed after holding the office for 69 days (1 Radjab 1099 = May 2 1688), imprisoned in the citadel of Kâwâli and soon afterwards banished to Rhodes. Prosecuted by the heint of Zain al-Abîdîn Pasha, Beylerbey of Rûmî, who had been unjustly executed by his orders, he was beheaded in accordance with the jus talianis by order of the Grand Vizier Kùrpîrûl Muṣṭafa Pasha at the age of over 70 in Radjab 1101 = April 1690. Although of a mild temperament in his youth he grew tyrannical and cruel in the exercise of power. Instead of taking supreme command of the troops himself, he chose quite incompetent people as generals like the rebels Yegen Othamân Pasha.

İSMÂİL AL-ŞEHÎD, MAVLANA, was born on the 28th Shawwal 1196 (1781) in a renowned Dîlîh family which traces its pedigree to the Caliph 'Umar. He was the only son of Mawlânâ 'Abd al-Granî and nephew of the illustrious Mawlânâ Şâhî 'Abd al-Azd (d. 1329 = 1823). While a mere boy his father and was brought up as an adopted son under the care of his uncle Mawlânâ 'Abd al-Kâdir (d. 1342 = 1826). In childhood he was very inattentive and fond of swimming in the Jamna, but as he had a retentive memory and a sharp intellect, in time he became a learned man. He was shocked at the gross idolatrous tendencies which then prevailed amongst the Muslims of India. He preached the doctrines of Islam against all opposition. It was at this time that he came in contact with al-Saiydi Âmîd al-Mudjdadd. The religious sanctity of the Saiydi won his admiration and he became his disciple and was his constant companion throughout his life. In 1326 (1820) they made a pilgrimage to Mecca, whence they proceeded to Constantinople. There the Hâddîs were received with marked consideration. Six years later they returned to Dîlîh and began to deliver religious lectures with re-doubled energy. Many people were reclaimed from the darkness of ignorance to which they had been reduced owing to the influence of the professional Nullâs. Mawlânî İsmâîl's charm and erudition excited the envy of the Nullâs who afraid of being discredited with the public tried to lower him in their estimation by severe criticism and malicious censures. But truth triumphed and they were all silenced.

In 1323 (1827) Mawlânî İsmâîl, with his religious guide, proceeded to Peshâwar and declared a religious war against the Sikhs. They were joined by large numbers of people and succeeded in establishing their authority at Peshâwar. But owing to some innovations upon the usages of the Afghâns, their authority was overthrown. They had to fly across the Indus but fell in with a Sikh detachment; a skirmish took place in which İsmâîl with his spiritual guide met with his death in 1324 (1827).

He is the author of the following works: 1) Rûdîlât Uğût al-Fikhr, a treatise on the principles of Muhammadan law according to the Hanafî school, printed, Dîlîh A. H. 1311. 2) Muṣâbî-Imâmât, a Persian treatise on the problem of the imâmat. 3) Tâzîyêt al-Imâm, an Urdu treatise on theology, printed 1293, translated into English by Mr. Ŝâhîmat, 4) al-Masâlif al-Masûlif, a treatise in Persian on the Islamic doctrines; on its contents cf. Joum. of the As. Soc. of Bengal, i. (1832) 479 sqq. Bibliography: Siddîk Hasân, İfât al-Nubailâ, p. 416; Sir Saiyid Ahmad, Allah al-Shanid, ii. 97, and Joum. Roy. As. Soc., xiii. 310 sqq. (M. Hidayet Hosain)

İSMÂİLÎYA, a Shi'a sect, so called because it stopped the series of İmâms at İsmâîl, eldest son of Dja'far al-Sâdîq [q. v.], the sixth imâm, so that İsmâîl to them was the seventh; his father had at first nominated him as his successor, but having learned of his eldest son's intemperance, he changed his decision and declared Mûsâ, his second son, as his successor. The İsmâîlîya refused to admit this alteration, claiming that the imâm, being infallible, could not have prejudiced himself by declaring that it was not permitted to God to change His opinion, contrary to what Dja'far had stated. İsmâîl died five years before his father at Médîna in 143 (760/1) and was buried in the cemetery of Bâkî al-Ghârak. In spite of the precautions taken by the father to have the death of his son confirmed by numerous witnesses, his partisans would not admit his decease, claiming that he was still alive five years after his father's death and that he was seen in the market at Bâṣra, where he cured a paralytic by taking his hand. The sons of İsmâîl, involved in the political persecutions of which the 'Alids were victims, left Médîna; Muhammad, the elder, went to hide in the district of Damâward, near Raiy; his descendants concealed themselves in Khurâsân, then in the Ḵandâbâr region and migrated to India, where they still exist at the present day. 'Ali, his brother, set out for Syria and the Maghrib. From their places of retreat, the descendants of İsmâîl sent out missionaries (da'i q. v., plur. da'at) to traverse the Muslim world and there preach the doctrine known as that of the esoterics (Bâṭîniya), whose starting point was the allegorical exposition of the Kurân. One of these missionaries was Maimûn, called al-Kaddâh the "occultist", whose son 'Abd Allâh [q. v. i. 26] became chief of the branch of the Karmâtians [q. v.]. With the assistance of a rich Persian, Muhammad b. 'Îsâ, called Mandâni, read in the sacred 'Alam the Iranians were going to regain the empire (Fikrit, p. 188; O. Lloth, in Morgenländische Forschungen, p. 307; M. Amari, Storia dei Musulmoni di Sicilia, p. 114), he made them adopt his system, at once religious and social. At the end of the third century A. H. Câbad Allâh b. Muhammad al-Mahdi, recognised as imâm by the Berbers of the tribe of Ketâma [q. v.], founded in Tunisia the empire of the Fâtîmids [q. v.] or Câbadîs, soon afterwards extended to Egypt.

İsmâîlîya of Persia, Ḩasan b. Šâbîb [q. v.] was born in Raiy and was there instructed in the doctrine of the Bâṭîniya; to perfect himself in it, he went to Egypt in the caliphate of al-Mustânîr in 471 (1078—1079); after a stay of
a year and a half there, he was expelled and returned to Persia to act as a missionary and surreptitiously introduced himself into the fortress of Alamut [q. v.], where he had already numerous partisans (6 Radjab 483 = Sept. 4 1090). Taking this castle as a base, he made raids in all directions with his disciples, taking the existing fortresses by surprise and building new ones. It is said that he made beautiful gardens in which the fâdâlī’s [q. v.], initiated of the first degree, enjoyed in anticipation the delights of Paradise; but it is more probable that this paradise was purely imaginary and was a result of the hallucinations caused by taking gâshâd [see the article Assassins].

Thinking this a dangerous establishment, the Sâlûtâb Sulţân Malik-Shâh ordered the Amir Arslân-Tâsh to attack Hâsan b. Şâbâb (483 = 1092). He laid siege to Alamut but was completely routed in a nocturnal sortie by the garrison. In the same year another centre of Îsmâ’îli propa-
ganda, the fortress of Derg, was besieged in vain by another lieutenant of the Sulţân, Kišîl Şâ’yârî. The death of Malik-Shâh put an end to these attempts of repression. Forty days previously the assassination of the vizier Nişân al-Mulk by a fâdâlī, named Zâhir Arslân, had been the first of these mysterious executions which were to plunge the Muslim world into terror. Two of the disciples of the master, the râ’s Muṣaffar and Kišîy Buṣurzân Umdî [see BUZURGMÎD], seized respectively the fortress of Gîrd-khî and Lëmsar (Lenbâr, Handollâb Mustawfî, Niṣbat al-Kalîlî, p. 61) (495 = 1102). Sulţân Muḥammad sent against the Îsmâ’îlî Nişân al-Dîn Ahmad, who for seven years ravaged the country round Alamut, and next the Aštâb Nushîtgin Shir-gîr, who was about to take Lëmsar and Alamut at the end of the year 511 (April 1118), when the Sulţân’s death interrupted the campaign. Sandjar, terried by the sight of a dagger which a fâdâlī had plunged in the ground in front of his throne, made peace with the Îs-
ma’îlya.

Hâsan dying on 26 Rabî’î 1 518 (June 12 1124) Kišîy Buṣurzân-Umdî succeeded him and reigned without being disturbed till his death on 26 Dji-
mâd 1 532 (May 11 1138); it was the same with the latter’s son, Muḥammad (died 557 = 1162). Muḥammad’s son Hâsan, called Âlî dîkh-
rîh al-Salâm introduced innovations into the cult. He placed the minbar opposite the khâba, while the rule is that the pulpit should be placed to the left of the mihrâb (559 = 1164) and he claimed to be a descendant of Niṣâr, son of al-Mustanîr, which gave him the quality of Îsmâm; the rescript in which he took this title and revived the Îsmâ’îlî doctrines, is called by his followers the sermon of the resurrection. At the end of four years he was assassinated at the castle of Lëmsar by his brother-
in-law, a descendant of the Bûyids. His son Mu-
ḥammad II avenged his death by the execution of the members of the family of the murderer and reigned undisturbed for 49 years. While the latter had carried on his father’s tradition, his son Dja-
lâl al-Dîn Hâsan III on the contrary announced at his accession his intention of re-establishing the true religion of Islam. He ordered the mos-
quês to be rebuilt and re-established public worship on Fridays. He was therefore given the name Naw-Muslimân (new Muslim). He died of poison like his father. His son ‘Âlî al-Dîn Muḥammad

III was only nine years old; his youth as well as a loss of blood caused by an accident in the fifth year of his reign forced him to withdraw from public affairs. Henceforth he lived confined to his palace and was murdered during a fit of in-
toxication (last day of Dhu ’l-‘Awâl 651 = Jan. 21 1254) at the instigation of his son Rûkîn al-Dîn Kûrî-Shâh. Hûlîgû [q. v.] having received orders from the Mongol emperor to destroy the stronghold of these dangerous fanatics (654 = 1256) laid siege to the fortress of Mîrmûndiz, where Rûkîn al-Dîn was. The grand-master surrendered, was kept a prisoner and taken to the court of Mangû, who refused to receive him; on his way back he was murdered on the banks of the Oxus. The fortress of Alamût capitulated; that of Gîrd-
khî in Dâmghân held out for three years. The last traces of Îsmâ’îlya disappeared from Khi-
ståin in the reign of the Mongol Khân Ahi Sa’îd, who sent a proselytising mission to Kân. Shâb-Râh, son of Timûr, also had the last followers of heresy hunted out in the same province; only the persons that could be suspected were a few soldiers, Sâyi’id and derwîsh.

Îsmâ’îlya of Syria. Their establishment in this country followed soon after their installation in the mountains of Dîlâm. They are found at Aleppo towards the last years of the 12th century of our era in the reign of the Sâlûtâb prince Kišqîm b. Tûrûq, who was converted to their doctrines by a physician-astrologer. Their first victim was the father-in-law of this prince, Dja-
lâh al-Dawla Hûsam, lord of Hûnîn, as he was about to march against the count of St. Gilles to make him raise the siege of Hûnîn al-Katrî [q. v.]. He was assassinated while at prayers by three Persians disguised as Sîfis. The astrologer was not long in dying suddenly (he was perhaps assassi-
nated) and handed on his power to a companion, also of Persian origin, Ahi Tâhir Ibn al-Sa’îdî. The Îsmâ’îlya took Aapamaye a euse in 499 (1106), but the Crusaders took it from them again very soon afterwards. Their excesses provoked a massacre of their partisans at Aleppo (507 = 1113). The missionary Îbrâmî, having escaped, tried to seize Shâzan on the Qontar by taking a Christian festival. In spite of the successful surprise, the inhabitants, led by the Amirs of the family of Mûnﬁzîrî, regained the caravan (kûhûrî) and were hauled up by ropes into the interior by the women who had remained there. Although the Îsmâ’îls had again gained a certain amount of influence in Aleppo the ruler Ishâqî prevented their gaining possession of the Kût’at al-Sharîf [cf. p. 231 infra]. — On Ramdân 23, 515 (Dec. 5, 1121) Îsmâ’îlî fîd’î’s assassinated the Fîtîmî vizier al-Afjal b. Badr al-Djamâlî [q. v.].

A rising of the population of Amdîr (Diyâr-
Bakr) resulted in the massacre of the proselytes they had made in this town (518 = 1121) but the acquisition of the fortress of Bûnîyân [q. v.] re-established their fortunes. Toghteghîn, prince of Damascus, wishing to save his favourite Bahîram from the ill-treatment of the Damascenes, had left it to him. Bahîram fell in battle in 522 (1128) against the rebel natives. Îsmâm the Persian succeeded him; after the massacre of his partisans at Da-
mascus (15 Ramdân 525 = Sept. 1 1129) he handed the citadel of Bûnîyân over to the Crusaders.

To make up for this loss, the Îsmâ’îlya pur-
chased from Sâlî al-Mulk b. ‘Amarîn the castle of
Muhammad is the son of this Agha Khan; from his father he has inherited his taste for sports.

Present Distribution of the Ismā‘iliya. There are still several thousands in Syria, who live in the ancient fortresses of Maṣṣūth, Kadmus, etc. They are inoffensive, and faithful subjects of the Ottoman empire; the plundering of the first of these sites by the Nāvāris in 1809 produced the ms. publ. and transl. by Stanislas Guyard (Fragments relatifs à la doctrine des Ismā‘īli dans Nabilat et Extravétoires, xii. i. 1874). In Persia there are some in the district above mentioned of Maḥjūlāt near Kunān in Central Asia they are found in Badakhshān, Khorāsān, and Kāzān; in Afghanistan, they are known under the name of Muṣṭarad. In Khūrāsān (valleys of Dākhīlātād and Kermar) there are many Muṣā‘īlās, as well as in several valleys of the upper Osāk (Sārījol, Wālūkān and Yāsīn). In India there are 99,476 in the districts of Ađīmar, Bihār, Rājpūtanā, the Punjab and Kāshmir, and 5,265 in those of Bombay, Baroda and Coorg (Census of India, 1901, I, 561 sqq.). They are not all followers of the Agha Khan. Among the Bōhūrā [q. v.] of Gargārāt, the Dā‘ūrī, who form the bulk of this community (130,000), are Ismā‘īlī (Rev. du Mon. 47, 472).

They are numerous in ‘Omnā: there are some in all the towns; their headquarters are at Mātār, near Muscat. They are also found at Zanzibar and in what used to be German East Africa, where they number tens of thousands and are increasing in numbers by conversions.

Doctrine. God is entirely without attributes, incomprehensible and incapable of being cognised. He did not create the universe directly; by an act of will called anw, he made manifest Universal Reason, in which are all the divine attributes and which is God in his implied outward manifestation. As prayer cannot be addressed to an inaccessible being, it is turned toward his exterior manifestation, Reason, which thus becomes the real divinity of the Ismā‘īlīya. As one cannot attain to knowledge of God, but only of Reason, the latter is given the names of the Veil, the Place, the Antecedent, Spirit, the First.

Reason creates the universal Soul, whose essential attribute is life, as that of reason is knowledge; being imperfect in the latter respect, it necessarily strives to reach perfection. Whence arises a movement which is the inverse of emanation. The Soul produced primal matter, which forms the earth and the stars; it is passive and receives the impress of forms, the ideas of which exist in Reason.

There are two necessary and primitive entities, space and time. The combined action of these five entities produces the movements of the spheres and of the elements. The appearance of man is explained by the need which the universal soul feels to attain perfect knowledge in order to rise to the nature of universal Reason. When this end is attained all movement will cease. To gain salvation knowledge must be acquired, which can only come from the earthly incarnation of Reason, the Prophet, with his successors the Imāms. In the case of each of these the second is the interpreter of this word by means of the inner meaning which this word contains (is‘āwīd).
The three last principles became the inam, the hasidja, charged with giving proof of the mission of the aya, and the ala or "missionary". Muhammad was the nafs and 'All the aya.

There were several degrees of initiation (at first seven, then nine). The missionaries began by putting forward absurd questions, the neophytes then knotty points of Muslim theology (the usual process with the Baitiya) and led him quite gradually to admit that these difficulties were easily solved by the allegorical and symbolical interpretation of the Koran. Calculations made from the numerical value of letters played an important part (see Fragment ii. of St. Guyard and the article Hukmi above ii. 338 b). When the proselyte had acknowledged the force of his arguments, the missionary made him take an oath not to reveal any of the mysteries which were going to be entrusted to him and taught him that in order to be saved it was necessary to submit blindly, fermae ac cadaver, to the spiritual and temporal guidance of the Imam. The majority of the adepts did not pass beyond the first or second stages of initiation; the missionaries hardly reached the sixth. Only a few superior individuals could hope to reach the higher degree (cf. the theories of the Sha's and mysteries of the inam kaimil [q. v.]).

Paradise allegorically signified the state of the soul which had reached perfect knowledge; hell was ignorance. No soul was condemned to hell eternally; it returned to earth by metempsychosis until it had recognised the inam of the epoch and had learned theological knowledge from him. Evil did not exist as a principle, and had only one day disappear through the progressive assimilation of all creation to universal reason. In spite of the reputation as assassins, which tarnished the name of the Isma'ilis, it should not be imagined that their crimes were the application of a dogma; one should rather see in this the excesses of the absolute political power which the grandmasters had arrogated to themselves. Rousseau (Annals des Voyages, xiv. 286) has noted that those whom he knew were hospitable and of a gentle temperament. They do not care to travel, are active at home, much attached to their religion, which however offers much from the old creed, and are brave at need and obedient to their chiefs.

ISMA'ILIA, a town situated about the middle of the Suez Canal. It was laid out in 1863 during the construction of the Canal, and named after the Khojide Isma'il. It was a place of much importance whilst the work of excavation went on, but as soon as the canal was completed, it quickly decayed. In recent years it has recovered some of its prosperity through the traffic between Cairo and the mail steamers. It is connected by railway with Port Said, Cairo and Suez, and there are good hotels, baths, etc. The town is surrounded by plantations and gardens, Lake Timsah being on the south side.

ISNAD (A) e. e. the chain of traditions. See Hadith, ii. 190a and 190b sqgs. (Sections ii. and iii.) and cf. on the connection with Jewish tradition, J. Horovitz, Alter und Ursprung des Isnâd, in Der Islam, vii. (1917), 39-47.

ISPAHBAD (Pahlavi i'spah-pat, head of an army, Procopius' 'ispahbân), a general of cavalry. Under the Sasanians, as a proper noun, it meant one of the seven privileged families of Arsakid origin: as a common noun, it was applied to the fifth of the great hereditary offices, the command of the cavalry (Theophylactes, iii. 8); the second of these offices, that of military affairs in general, was that of the Erânspâhân. Under Khusraw I Anôshhrânawân, Persia was divided into four great military commands, the chiefs of which had the title ispahbad (Arab. al-ispahbâq, al-Balâhûrî, p. 336 psen.). Mäsiyr (Mayazdyûr) b. Kârin was appointed by the Caliph al-Ma'mûn governor of this province with the same title (ib. p. 339). The coins struck by these princes give the names of Khwarâshbî b. 93 (711) and 97 (715), Farrukhan (105—110 = 725—728), Dâd Bûdjî Mîhar in 120 (738), Khwarâshbî II (122—148 = 740—765); after 151 (768) the names are those of Muslim governors. When in the viiith (xiiith) century, the family of Bawân reconstructed an independent state in Tâbaristân, these princes, who added Muslim titles to their Iranian proper names, received the title ispahbad ('Ali b. al-Dawla 'Ali b. Shahrârî b. Kârin, Naqar al-Din Rûstam, Tâdji al-Mullâk, Kârin b. Mârdâwîd, Hûsâm al-Dawla Arzâshî b. Hasan).

ISPABAD — ISRA'. 553

(C. Hüart.)

ISPANDĂRMADB (v.), twelfth month of the Persian solar year, also name of the fifth day of each month.

ISPÂRTA (in Ibn Batûtâ: Sabûtâ; Sabûtâ in the modern). The translation of the Acts of the Apostles, xxii. 1, for the Greek Patra, cf. Zscherl, Der deut. Morgenl. Gesellschaft, ix. 731), the ancient Baris Pisdiaeae (Pliny, Nat. Hist., v. § 147; Ptolemy v. 5 § 5), was taken from the Byzantines by the Safïdâls of Konya in the reign of Kildîj Arslam III (600—601) = 1203—1204 (Houtsm, Rec. de Textes relat. à l'Hist. des Seljoucides, iii. 62 = iv. 26). After the downfall of the kingdom of Konya Isparta belonged to the Hamidoglu [q. v.] and was sold by the last ruler of this dynasty in 1283 (1381—2) with the greater part of his lands to Sultan Murad I. (Lencclavius, Hist., p. 238; Sa'd al-Dîn). Under Ormazd (1652—7) it was the residence of the sayfâ-dâlay of Hamid-elm, now it is the headquarters of the nichtezâriff of Hamidâbâd and of the Greek Metropolitan of Pisdia. The population of the prosperous town is estimated at 30,000, of whom 600 are Greeks and 500 Armenians; it has numerous mosques (13 džâms, 63 masjids), the mosque of Firâwnes being a work of Sinân, 9 madrasas and a library of 600 volumes; also 8 Greek churches and one Armenian, the former not without interest. Among the products of industry may be mentioned carpets (600 looms), alâdja and baghâshi (250 workshops), silk, cotton of roses, and alcohol.

J. H. Mordtmann.

ISRA'. The term isra' was taken from the Kurâ, Sûra xvii. 1: "Glory to Him who caused His servant to journey by night (isra' bi 'abdilî lâîn) from the sacred place of worship to the further place of worship, which We have encircled with blessings, in order that We might show him some of our signs! Verily He (i. e. God) is the Hearer and the Beholder." — Do. do not know whether this verse originally formed part of chap. xvii. or was first promulgated in some other context, nor need we enquire what may have been the real sense of the verse. In any case it is noticeable that the discourse gives but three explanations.

1. The older one, which disappears from the more recent commentaries, was doubtless in this verse an allusion to Muḥammad's Ascension to Heaven. This is the more interesting, as these traditions (Bukhârî, ed. Cairo 1278, ii. 185, Bâb kâna 'I-nabîyu lamâm 'sinu'nu wâlî yânâmu kalbâku, no. 2; Muslim, ed. Bûlûk 1290, i. 59; Tabari, Ta'rif, xv. 3; cf. Der Islam, vi. 12, 14) retain also the original signification of the story of the Ascension which has been shown to be the initiation to the prophetic career (Bevan, Mohammed's Ascension to Heaven, p. 56; Schricke, Der Islam, vi. 1 sqq.; see the art. Mu'âdja). This explanation interprets the expression al-masjid al-âkâf as "the further place of worship" in the sense of "Heaven" and, in fact, in the older tradition isra' is often used as synonymous with mu'tâfia (Der Islam, vi. 14).

2. The second explanation, the only one given in all the more modern commentaries, interprets al-masjid al-âkâf as "Jerusalem" and this for no very apparent reason. It seems to have been an Umâyad device intended to further the glorification of Jerusalem as against that of the holy territory (cf. Goldziher, Muh. Stud., ii. 55 sqq.; Der Islam, vi. 13 sqq.), then ruled by 'Abd Allah b. Zubair. Tabari seems to reject it. He does not mention it in his "History" and seems rather to adopt the first explanation (see Der Islam, vi. 2, 5, 6; 12, 14; Tabari, Annales, i. 1157 sqq., a passage which appears to represent the historian's final verdict formed on full consideration of the evidence before him. beyan, op. cit., p. 57).

Explanations 1 and 2 concur in interpreting 'abîd in xvii. i by Muḥammad and this seems to be right (Der Islam, vi. 13, note 6). The idjâma admitted both interpretations and, when the Umayyad version had arisen, harmonised the two by assigning to isra' the special sense of night journey to Jerusalem. The Ascension, having lost its original meaning, was altered in date, being made to fall at a later period (see art. Mu'âdja) and it became possible to combine both stories as appears, in fact, to have been done previously by Ibn Ishaq in the oldest extant biography of Muḥammad (Bevan, op. cit., p. 54).

The story of the night journey to Jerusalem runs as follows:

One night as Muḥammad was sleeping in the neighbourhood of the Ka'ba at Mecca (or in the house of Umm Hâni', Der Islam, vi. 11) he was awakened by the angel Gabriel who conducted him to a winged animal, called Burâk (Bevan, op. cit., p. 55, 57, 59; Der Islam, vi. 12 sqq., with the literature quoted there and the art. Burâk, and with Muḥammad mounted on this animal they journeyed together to Jerusalem. On the way thither they encounter several good and several wicked powers (Mîqâk al-Masjîd, ed. Dihlî 1268, p. 521 sqq.; Baghawî, Mîqâk al-Sunnâ, ed. Cairo 1294, ii. 179, with a harmonising interpolation) and visit Hebron and Bethesda (Nâsi'a, Sunan, ed. Cairo 1312, i. 77 sqq.; Nuwâiri, MS. Warner 23, i. 93, i. 7—10). At Jerusalem they met Abraham, Moses, and Jesus, of whom a description is given (e. g. Bukhârî, ed. Cairo 1278, ii. 147). The şâlât is performed, Muḥammad acting as imâm and thereby taking precedence of all the other prophets thereto assembled. This meeting with the Prophets at Jerusalem resembles and may have been modelled on the transfiguration of Jesus on Mount Tabor (Matt. xviii. 1; Mark ix. 1; Luke ix. 28), cf. Der Islam, vi. 15.

3. The third interpretation of Sûra xvii. 1 is based on xvii. 62, where ruwâ' "vision" is explained as isra'.' This implies that the night journey was not a real journey but a vision.
Standing at the bâdîr Muhammad saw Jerusalem and described it to the unbelieving Kuraishites (Bukhârî, ii. 221, iii. 102; Muslim, i. 62; Tabarî, Tafseer, xv. 5, l. 14 a.f., etc.). The story is woven into a connected whole as follows: Muhammad journeys by night to Jerusalem, returns and at Mecca describes his adventures; the Kuraishites disbelieve him and Muslims apostasize; Muhammad seeks to defend the truth of his story, but he has forgotten the particulars; whereupon Allah causes him to actually behold Jerusalem (see Der Islam, vi. 15 sq.).

In the more modern and longer narratives the story is further amplified (see e. g. A. Müller, Der Islam in Morgen und Heuteland, i. 86 sq.). The prophet is said to have held 70,000 conversations with Allah, although the whole journey proceeded so quickly that, when he returned, his bed was still warm and the watercup which he had overthrown with his foot at his hurried departure, was not yet empty. By Muslim theologians the question has been discussed, whether the isra' happened while Muhammad was asleep or awake and whether it was his spirit or his body which journeyed. The orthodox opinion is that the journey was performed by Muhammad with his body and awake. Tabarî in his commentary (xxv. 13) very succinctly sums up this meaning for the following reasons: 1) If the prophet had not been carried away in a corporeal sense the event would afford no proof of his divine mission and those who disbelieved the story could not be accused of infidelity. 2) It is stated in the Kur'ân that God caused his servant to journey, not that He caused his servant's spirit to journey. 3) If the prophet had been carried away in spirit only, the services of Buraq would not have been required, since animals are used for carrying bodies not for carrying spirits (Bevan, op. cit., p. 60; Schrieke, Der Islam, vi. 13; Tabarî, Baidâwî, and Baghawi, Tafseer, ad xxvii. 7). Mystics and philosophers often favour an allegorical interpretation (Goldrath, Geschichte der Philosophie im Mittelalter in Kultur der Gegenwart, i. v., p. 310).

(R. Schrieke.)

ISRA'IL. [See ISRÀ'IL.]

ISRÀ'IL, the name of an angel, which is probably to be traced to the Hebrew Seraphim as it is indicated by the variants Sarafîl and Sarafîn (Tafseer al-Aris, vii. 375). The change of liquids is not unusual in such endings. His size is astounding; while his feet are under the seventh earth, his head reaches up to the pillars of the divine throne. He has four wings: one in the west, one in the east, one with which he covers his body and one as a protection against the majesty of God. He is covered with hair, months and tongues. He is considered to be the angel who reads out the divine decisions from the well-kept Tablet and transmits them to the Archangel to whose department they belong. Three times by day and three times by night he looks down into Hell and is convulsed with grief and weeps so violently that the earth might be inundated by his tears.

For three years he was the companion of the Prophet, whom he initiated into the work of a prophet. Gabriel then took over this task and began the communication of the Kur'ân.

Alexander is said to have met him before his arrival in the land of darkness; there he stood upon a hill and blew the trumpet, tears in his eyes. He is called Lord of the Trumpet, it is mainly because he continually holds the trumpet to his mouth in order to be able to blow at once as soon as God gives the order for the blast which is to arouse men from their graves. It is however also said that Isrâ'il will be first aroused on the day of the Resurrection. He will then take his stand upon the holy rock in Jerusalem and give the signal which will bring the dead back to life.

In modern Egypt it is said that his music will refresh the inhabitants of Paradise.

(A. J. WENSCIN.)

ISRÀ'IL, the name of the Patriarch of Israel. Only appears once in the Kur'ân, apart from the frequent name, Banû Isrâ'îl, for the people of Israel. In Sâra ii. 87 it is said: "All foods were permitted to the Israelites except that which Israel declared forbidden for himself before the Tora was revealed." According to the commentators, this means that the restrictions on food were only revealed as a result of the wickedness of the Israelites. Their ancestor himself only refrained from eating camel flesh or drinking camel milk; according to some, because he was afflicted with the disease called 'în al-nâsû, which kept him awake by night and left him during the day. He therefore made a vow to abstain from his favourite food, if he should be cured. According to others, he did not eat the 'în al-nâsû (nerev išchâdûtus) by the advice of his physicians; or he abstained from all sinews (yâfî). The word is a translation of the Hebrew gid and al-nâsû is a transcription of the Hebrew נסוח. This points to Genesis xxxi., the well known story of the dislocation of Jacob's thigh by the angel as an explanation of the fact that the Israelites "to this very day do not eat the nerev išchâdûtus."

The question remains how could Jacob's private abstinence be obligatory for the Israelites. According to some, a prophet, as Jacob was, is by nature qualified to decide questions of law (Arabic muqaddâm). According to others, Jacob received God's permission to make this regulation.

The rest that is told of Isrâ'il in the Kur'ân is found under the name Yâkûb. At first Muhammad seems to have regarded Yâkûb as a son of Ibrahim. In the prophecy made to Sarn, he says: "Then we promised her Ishâk and afterwards Ya'âqûb" (xi. 71; cf. Snouck Hurgronje, Het Hebreeuwsche Ferset, p. 32). The commentators hasten to explain that according to the Arabic usage "afterwards" must refer to the grandson.

It is further stated in the Kur'ân that Ya'âqûb on his death bed warned his sons to be steadfast in the faith of Ibrahim (ii. 126 sqq.); like most of the patriarchs he received revelations (i. 130 etc.).

Muslim legend is acquainted with the main points of Jacob's history. Only divergent and non-Biblical
features will be noted here. Ya'kub was actually older than his twin brother Esau. When he was going to be born in front of the latter, Esau was angry and the two brothers quarrelled even in the mother's womb. Esau then said: Walketh, if thou wilt be born first, I will close up my mother's womb and kill her. Ya'kub then yielded and Esau was the first born. — This story is also found in Jewish literature. After winning the first born's blessing by trickery, Yahwéh took him as his uncle. From fear of Esau he concealed himself by day and travelled by night (vusir or yusir f'labi), hence the name Isrā'il. The Muslim legend therefore does not know of the change of name at Pauel. — As to his marriage with two sisters, it is said that Moses was the first to forbid this. But it is also said that Ya'kub did not marry Rahel until after Liyā's death.

Issik-Kul (Turkish "warm lake"), the most important mountain lake in Turkestan and one of the largest in the world, situated in 43° 30' N. Lat. and between 76° 15' and 78° 30' E. Long., 5116 feet above sea level; the length of the lake is about 115 miles, the breadth up to 37 miles, the depth up to 1381 feet, and the area 4200 square miles. From the two chains of the Tian-Shan, the Kungei-Alatau (in the north) and the Terskei-Alatau (in the south) about 80 large and small mountain streams pour into the Issik-Kul, of which the most important, Tup and Djergalan, flow into it from the east; of the others there may be mentioned: on the south bank, the Karaköl, Kijīl-Su, Djuka (or Zauka), Barskoun and Ton, on the north bank, two Aş-Su's and three Koś-Su. On the origin of the depression Kutemalī, which now connects the Ču with the Issik-Kul [cf. Ču, i. 380b sqg.], views differ; it is said that the Końčar, now the upper course of the Ču, previously flowed into the Issik-Kul and the latter had an exit in the Ču; at present the Końčar sends an arm to the Issik-Kul through the Kutemalī only when it is flooded; at other times there are only a few ditches there filled with water, without any definite current. The question is only of importance for geology and physical geography; in the historical period the Issik-Kul has, as all accounts show, always been a salt lake without an exit.

The oldest of these descriptions we owe to the Chinese writer Huan-Cuang (viith cent. A. D.); the Chinese name (yo-ho) (warm sea; the lake never freezes) corresponds exactly to the Turkish name. The latter first appears in the Hudud al-Ālam (372 = 982–3); in Kūdāma (ed. de Goeje, p. 262) the lake is only mentioned, but not named. The ms. of the Hudud al-Ālam has Iskīk (f. 3b) or Iskūl (f. 18b); the form is probably the same in the Mudmjud al-Tawʾarīkh (the ms. has S-kūk, cf. W. Barthold, Turkestan etc., i. 19); Gardziā (in Barthold, Oṭet, etc., p. 80 ult.) writes Iskīh-Kul, Dījahānī quotes Iskūl from al-Kharaqī in Nallīn, al-Battānī, p. 175, but with tādzhīd over the k. In the history of Timur's campaigns, in Sharaf al-Dīn (Gafar-Nāma, Ind. ed., i. 494, ii. 634), as well as in Ibn Ārabīshā (Egypt. ed., p. 156) the form is Īsūl in the Tur̲k̲i-i Rāshādī (cf. the text in Barthold, Oṭet etc., p. 50, note 1), Isīh̲ Kūl.

In the oldest Chinese accounts (from the viith century A. D.) the land appears in the possession of the nomadic people of the Wu-sun. But from the viith century A. D. on, permanent settlements, even towns, are mentioned. One of the trade routes from China to Western Asia at that time led through the Jādul pass to the south bank of the Issik-Kul and from there into the valley of the Ču; the most important market on the Issik-Kul was Barskān, the name of which is probably identical with the modern name of the river Barskoun. Gardizī gives a legend due to a popular etymology about Alexander the Great and Persians left behind by him on the Issik-Kul; this popular etymology makes certain the reading Barskān against the form Nushdzān given by de Goeje according to Ya'kub, iv. 823. According to Gardizī, Barskān could put 6000 men in the field; according to Kūdāma, the principal place on the shore of the lake could itself raise 20,000 men (Barskān, according to Kūdāma, consisted of nine towns, four of some size and five small ones). Three days journey west of Barskān lay Tūnk, the name of which obviously corresponds to the name of the river Tūn; between Barskān or Tūnk there were only to be seen tents of the nomad Dijikil. I2 farsalī west of Tūnk was the town of Yār, which could raise 3000 men. In Hudud al-Ālam there is further mentioned "a prosperous place, visited by merchants", the town of Stūkūr, on the border between the settlements of two nomad peoples, the Dijikil and the Khallūk̲ (Kārāk̲); the town probably bore the name of the lake; a town "Iṣṣīl" on the north shore of the lake of the name is still given in the Carta Catalana of the year 1375 A. D.; there was said to be an Armenian monastery with relics of the Apostle Matthew (Notices et Extraits, siv. Pt. ii., p. 132 sqg.).

Of this civilization, which probably was destroyed about the same time (viiith—xivth century) and under the influence of the same causes as the civilization on the Ču [cf. i. 881], only a few walls and mounds of brick, and some cemeteries have survived, including a Muhammadan cemetery on the Kungei-Aksu with inscriptions of the viith (xiiith) century (Protokol Tur. Khruša Ljub. arkh. xi. 5 sq.) and a Nestorian cemetery discovered in 1907 on the Djuka, with inscriptions in Syriac and Turkish; one of these inscriptions (of 1330 A. D.) was published by P. Kokowioff (Bulletin de l'Académie, etc. 1909, p. 774 sq. 788 sqg.).

The Turkish and Mongol nomads liked to use the shores of the Issik-Kul as a winter resort on account of the favourable weather conditions (the snow here rarely lies to any considerable depth), so that the Issik-Kul is several times mentioned in the military history of Central Asia. A fortress was built by Timur "in the middle of the lake", i.e. on an island, to which, amongst others the Tatars departed from Asia Minor were banished. It is probably the same fortress as is called Koi-su by Haidar Mīrzā (q. v., ii. 219) (Tur̲k̲i-i Rāshādī, transl. Ross., p. 78); a Mongol amir is said to have sent his family there in the ixth (xviith) century, to put them in safety from the inroads of the Kalmucks. At the present day there are no islands in the lake; the disappearance of the island mentioned, with the fortress upon it was probably caused by an earthquake.
Connected with this perhaps is the fact that pieces of bricks and other fragments are frequently washed up on the shores of the Issik-Kul itself. Of the Issik-Kul itself it is said that a great town here was overwhelmed by the waves of the lake and its walls and buildings can be seen in clear weather; but this story has so far not been confirmed and is probably based on folklore about sunken cities (which is to be found in the most diverse countries). The catastrophe, if there was one, can only have happened comparatively recently; Haidar-Mirza, to whom we owe the latest and fullest account of the Issik-Kul in Muhammadi's literature (Târîkh-i Rastâhî, p. 366 sq.), knows neither of the disappearance of an island nor of rubble being washed up, nor of any sunken town. What Haidar-Mirza has to say about the Issik-Kul corresponds in general to the facts, but there are a few peculiar assertions. He says for example that on account of the great proportion of salt in it, the water is unsuitable for washing in; in reality the proportion of salt is very slight.

In the xvith—xviiiith centuries the shores of the lake were under the rule of Buddhist Kal-mucks; Tibetan inscriptions in the country south-east of the lake still recall this period. The Mongol name of the Issik-Kul was Temar-tu-Nor, "iron lake"; many of the mountain streams flowing into the Issik-Kul carry ferriferous sand; small knives, etc. are made from them (by the Kara-Kirgiz); the Turkish peoples about the same time also called the lake Tüz-Köl ("Salt-lake"). Even in the Kalmuck period the Kara-Kirgiz [q. v.] had grazing grounds here; the land remained in their possession after the conquest of the Kalmuck kingdom by the Chinese; Chinese rule was never firmly established here in spite of several attempts; About the middle of the xixeith century the Russians advanced across the III; the Issik-Kul was reached in 1856 by Colonel Klimentowski; a part of the Kara-Kirgiz was forced to submit to Russian rule as early as 1855 and the remainder in 1860. The Russians founded the town of Karakol, called Przewalsk since 1888, so far the only town in the country round the Issik-Kul (according to the census of 1897, 7987 inhabitants, now about 15000) and several villages; all these settlements are in the eastern part of the Issik-Kul valley; the western part is still inhabited only by nomads. The settlements are still, in the middle ages, called after the rivers on which they lie; the official Russian names are rarely used, even by Russians; even the Russian peasant always says "Tüp" for Preobraženskaya and "Kizil-sau" (which is corrupted to "Kozelzii") for Pokrowskaya, Thanks to the fertility of the soil, the villages are in a flourishing condition, in spite of the frequent earthquakes.

(Cf. L. Berg, Osto Issyk-Kul (Ziemledejki), 1904, Nov.) (W. Bartold.)

Išţakhr, a town in Fârs [q. v., ii. 70]. The real name was probably Stâghr as it is written in Pahlavi; the Armenian form Stähr and the abbreviation S T on Sâsànian coins point in the same direction. The form with prosthetic vowel is modern Persian; it is usually pronounced Išţakahr or Išta-šahr, also with inserted vowel Sitakahr, Sitakahr, Sitårk; cf. Pulver, Lex. Pers.-Lat., i. 943, 97a, ii. 223, and Nöldeke in Grundr. der iran. Philol., ii. 192. The Syriac form is Ištar (rarely Išṭahr), in the Talmud probably Išṭāhar (יִשְׁתָּחָר, Miegilla 13a, middle). According to the statements of Per-
IŞTAKRH.

557

speak sometimes of 40,000, sometimes of 100,000 of the enemy slain. This second capture of Işṭakhr probably took place in 29 (649), but according to some accounts, it was in 28 (648), cf. J. Wellhausen, Skizzen und Vorarbitten, vi. (1890) 111 sq. For other details of the Arab expeditions against Işṭakhr see: Baldhurri (ed. de Goeje), p. 386 sq.; Tabari, Anuarat (ed. Leiden), i. 2546 sq., 2549 sq., 2601 sq., 2830; Ibn al-Athir (ed. Torbergh), ii. 420 sq. iii. 30 sq., 77 sq.; Chronique de Tabari (Pers. vers., by Belami), transl. Zonlight, iii. 452—3; Weil, Gesch. der Chalifen, i. 86—7, 163, and thereon A. D. Mordtmann in Zeitschr. der Deutsch. Morgenl. Gesellschaft, vi. 455—6; Caetani, Annali dell'Islam, iv. 151 sq., v. 19—27, vii. 210—20, 248—56.

Işṭakhr, which in the Sasanian period can have yielded little in size to the ancient Persepolis, remained a fairly important place during the early centuries of Islam also. However it gradually sank to be merely the chief town of a province and was the capital of the kūra, bearing its name, the largest of the five districts into which the province of Fars was divided, comprising its northern and north eastern parts. The heaviest blow suffered by the erstwhile Sasanian capital was the foundation in 64 (684) of Shirāz (a day’s journey south of Išṭakhr), which soon became the capital of the province of Fars and attained great prosperity, particularly from the 7th (ixth) century. Henceforth Işṭakhr, declined visibly. From the description of the geographer al-Iṣṭakhrī, a native of the town, it was about the middle of the ivth (xith) century a town of medium size of the area of an Arab (= Roman) mile; the wall around it was in ruins. Al-Muğaddasī, writing about thirty years later (655), praises the splendid bridge over the river in Işṭakhr and the fine park. Concerning the chief mosque, situated in the bazaar, he mentions the remarkable pillars of bulb capitals. This probably refers not to an original Achaemenid building, but to a Sasanian, — al-Muğaddasī mentions that the mosque was thought to have been previously a fire-temple —, in the building of which pieces of carving from Persepolis had been used. Only a few years after the date of al-Muğaddasī’s account, a fatal catastrophe overwhelmed the town, brought upon it by the rebellious attitude of its citizens to their suzerain Šamsām al-Dawla, a son of Aḥmad al-Dawla [q.v.]. The latter sent against it an army under the amr Kutulmysh, who laid it in ruins. This sealed the ruin of Išṭakhr. In a description of the province of Fars dating from the beginning of the viiith (xith) century, in the Persian Fārs-Nāma, it is described as a modest village with barely a hundred inhabitants. Probably the whole area of the former town was quite uninhabited before the end of the middle ages.

As to the mint of Işṭakhr, coins struck here in the Sasanian period bear the abbreviation ST (新西) in Pahlavi characters; this certainly means Işṭakhr. Numerous specimens of these coins exist from the reign of Khusraw II (612—39 A. D.) to the end of the dynasty. In the Muhammadan period also the Pahlavi legend with the above abbreviation was retained for a considerable time. Such coins struck in the name of the Caliph or of governors are known down to the year 70 (680), cf. for example the references in Zeitscr. d. Deutsch. Morgenl. Gesellschaft, viii. 13, 147 sq., xii. 56, xix. 400, xxxi. 148, xxxii. 120, 131. On the other hand, the Pahlavi coins with mint-names Irān (Iran) and Bābā (Babak) — contrary to Mordtmann (ibid., xxxii. 114—5 and Sitz.-Ber. d. Bayr. Akad. d. Wiss., 1874, p. 250—1) — are not to be attributed to Işṭakhr: Noldeke, Zeitschr. d. Deutsch. Morgenl. Gesellschaft, xxxiii. 691—2. Of Arab coins struck in Işṭakhr specimens are known from 88 (770) and 90 (708) to 167 (783); Stanley Lane-Poole, Cat. of Orient. Coins in the Brit. Mus., x. p. cii.; H. Lavolv, Cat. des monnaies musulmanes de la Bibl. Nat., i. 518; and the notes in Zeitschr. der Deutsch. Morgenl. Gesellschaft, ix. 249, 250, xvi. 776, xix. 286, xxxix. 19, 38.

The present system of ruins at Işṭakhr, which still awaits a detailed investigation, is fairly extensive (about 5—6 miles around); the Pulwar and a small irrigation canal led off from it across the ruins and the area includes two almost equal parts. The remains of the town are mainly recognisable in the mounds of earth of varying height. Here and there parts of the surrounding walls still exist. The most remarkable seems to be a place lying towards the village of Hadji-ābād called Harim-i Djamshid — “Djamshid’s Harem” (cf. below) by the travellers J. Morier and Ker Porter, — where a column stands erect in the midst of an area covered with fragments of pillars. Its capital, composed of bodies of bulls, at one shows it to have been removed from Persepolis. We shall not go wrong, if we look here for the mosque mentioned above, described by al-Muğaddasī. The most detailed account of the ruins of Işṭakhr is that of Flandin and Coste, who spent two months in the neighbourhood about the end of 1840; cf. the pictures in the great volume of plates, Voyage en Perse, ii. (Paris 1843 sq.), Pl. 58—62, and the archaeological text accompanying it, p. 69—72, and also Flandin’s Relation du Voyage, ii. (1854), 137.

In the vicinity of Işṭakhr there are several other sites remarkable for their monuments or history. For example about 700 yards north of the village of Hadji-ābād, which lies quite near the north-east corner of the ruined area of the former Sasanian capital, there are natural caves in the valley of Tang Shāh-i Sarwān. One of them, which contains an inscription of historical importance of Sapor I (241—272 A. D.), is usually called Shahk All by the Persians, as a pious ascetic of this name is said to have ended his days in it; at the same time one hears it called Zindān-i Djamshid, “Djamshid’s prison”. Similar popular names like “Zindān, Harīm” (cf. above Djamshid’s Harim) are also found elsewhere in Persia and in the Irāk; cf. Daštājerd, i. 926, and my Seleucia et Keïphlon (Leipzig 1917), p. 55. Prominent buildings and monuments of antiquity are frequently attributed to Djamshid, a mythical ruler of ancient Iran whom the Muslim Persians identified with the Solomum of legend (cf. below, Takhti-i Djamshid).

Another place of historical importance is the Nāgh-e Radjāb, “Sculpture of Radjāb” (a legendary personage), about ¾ mile S. W. of Işṭakhr. This is a ravine-like split in the wall of rock on the south bank of the Pulwar, which is adorned with three Sasanian reliefs. Sarre thinks (Sarre u. Herzfeld, Iranische Reliefskizzen, p. 98) that this decoration may be explained by the special purpose of the place (a sanctuary of the God Ormuzd?) as the consecrated place of coronation of the Sasanian kings.
On account of its considerable remains from the ancient and mediaeval Persian periods, the best known sites are Takht-i-Djamshid and Naqsh-i Rustam, the former a short hour's journey south of Ištakhr on the southern bank of the Pulwar, the latter on the north bank of this stream about 1 1/2 miles from Ištakhr.

Takht-i Djamshid is the most usual name among Orientals for the complex of Achaemenid palaces of Persepolis. Persian popular fancy frequently gives imposing buildings the name of takht, i.e. bench or throne, of a celebrated legendary king of the past. Besides Takht-i Djamshid one also hears the older name Cihil, or abbreviated, Cil Minâr (also Menare), "the 40 pillars," which is found as early as the Persian historians of the xivth century. This name is taken from the most noteworthy parts of the whole site, the colonnade of King Xerxes I with its pillars originally 72, now only 13 in number. 40 is a round number very popular in the east to express a considerable number; a cave called Cihil Sutun (the 40 pillars) is shown, for example, in the valley of Shirwan in Luristan (cf. H. Grote, Wunderungen in Persien, Berlin 1910 p. 62). The number 1000 is also used in quite a similar fashion to 40. This explains another name, common at an earlier period, Hazâr Sutun, "the 1000 pillars," which first appears at the beginning of the xivth (xiii) century in the annals of Ḥamza al-Iṣfahānī, as well as several times in later Persian chronicles, where there is still "the seven walls," found as early as about 1100 A. D. The Arab geographers of the middle ages from about the ii2d (ixth) century knew the ruins of the Persepolitan terrace by the name Malab Sulaimān, "Sulaimān's playing-ground," with which we may compare the name Kūrsi Sulaimān, "Solomon's throne (throne)," found in the Persian history Muqarn-i Tawārīkh (beginning of the vii = xith century), which in its turn may have been the model for the present synonymous name Takht-i Djamshid. It may be noted that Takht-i Sulaimān is also found elsewhere on Iranian soil as a geographical name; for example, a part of the ruins called Takht-i Sülâman-Murghāb; q. v., a mound of ruins in the S. E. of Ḍārbandi, a mountain east of Kābul, and finally the town of Žāb (see above, ii. 63b) in Farghāna; cf. Ritter, op. cit., vii. 482, viii. 150, 443, ix. 808; 1040.

The "Bench" or "Throne" of Djamshid (Saloman) is an artificial stone terrace of polygonal, almost rectangular shape, which lies at the foot of a steep, dark grey mountain of rock. The latter, according to the reports of recent travellers, now bears the name Kūh-i Raḥmat, "hill of mercy," but this is not to be found in literature; it apparently dates only from the post-mediaeval period (first mentioned by Sir Thomas Herbert in the beginning of the xvith century). The name still heard by Osuley, Shāh Kūh, "royal hill," might be older; it coincides with the bâxānîn ēsâ of Diodorus (xvii. 71). At the same time, according to the same authority, the inhabitants also use the name Kūh-i Takht, "hill of the throne (of Djamshid)." The section of the Kūh-i Raḥmat which forms the back wall of the platform contains three tombs of Achaemenid kings. The people know these by the names of the "mosque," the "bath" and the "mill of Djamshid," according to Stolze (Verhandl. der Gesellschaft f. Erdkunde in Berlin, x., 1883, p. 273). The terrace, which at the same time bears a markedly fortress-like character, was, as already mentioned, only intended for royal palaces and monumental buildings; the town of Persepolis lay in its immediate vicinity. Ancient remains of it may be still recognised. Older travellers were able to identify even more of these ruins lying outside the Takht-i Djamshid in the area of the town. It may be expressly mentioned that the view held by Stolze and Andreas (o. c., p. 250 sq.), and Persepolis, i. 3, that the citadel and town of Persepolis are to be sought at Naqsh-i Rustam, to be exact, the former at Naqsh-i Rustam and the town on the site of the later Ištakhr, while the buildings in Takht-i Djamshid were intended for solemn ceremonies closely connected with the cultus, does not appear tenable; cf. against it most recently Herzfeld in Sarre-Herzfeld, o. c., p. 100 sq. The Persian historians make a similar mistake when they identify Persepolis with Ištakhr without more ado, and in order to be able to explain all the ancient and mediaeval monuments and ruins in the plain of Mervâdâšt and its more immediate vicinity as the remains of a single town, ascribe to it the fabulous extent of 16 parasangs in length and 16 parasangs breadth.

Iranian tradition varies regarding the founder of the Persepolis-Ištakhr; sometimes it is Kayûmarsh, the mythical ancestor of the Persians, sometimes the builders or extenders are legendary rulers of the past like Kayûmarsh's descendants Hūshang (Cushanjī), Tahmûrath, Djamshid, Kâi Khusraw. Solomon also is named, for whom the spirits (djin) subject him to carry out marvellous works. A legendary princess, Humây, who plays the role of Semiramis as a builder in Iran, is also mentioned. Persian tradition transfers to Persepolis-Ištakhr the residence of the old Iranian kings and makes them be buried there also. According to Firdawsī's Šāhānama, the town was the residence of the reigning dynasty from the time of Kâi Khusraw. Muslim writers connect the origin of Persepolis with Solomon; the name is often taken, for example, as Solomon or Shahin above. According to their legend, this king dwelled alternately here and in Syria and was rapidly carried by the djin from one place to the other. Separate buildings on the terrace of Takht-i Djamshid bear in Arabic writings the names "mosque" and "bath of Solomon" (cf. with these the above mentioned names of two royal tombs of Kûh-i Raḥmat). Solomon — so the story goes — shut the wind up in a room there; Persian sources of the xiii th and xiv th centuries still speak of a "prison of the wind" here (Zindān-i Bâd) (cf. the reports in Osuley, o. c., ii. 381, 387).

Unfortunately the Arab accounts of the monuments of Persepolis are rather defective and moreover in parts distorted into fairy tales; cf. especially the accounts of the geographers al-Iṣfahānī, al-Muṣaddaṣī and al-Kazwīnī (see Schwarz, l. c.); various not uninteresting information is given by Persian historians of the later middle ages, especially Ḥamd Allâh Mustawfī and Iḥāzī Abūl (see Ouseley, ii. 387 sq., 387 sq.) According to these two, the pillars of the ruins there were celebrated as a source of zinc oxide (hiyā) important for medical purposes. The vandal disfigurement of the heads of the figures on the bas-relief of Takht-i Djamshid (and still more so in Naqš-
Rustam) is primarily due to the fanaticism of the Muslims with its object to the representation of human faces.

The caliph al-Manṣūr (754–775) wished to use the ruins of Persepolis, like those of al-Madīn-at-Temsifon, as a quarry, but was persuaded against it by the advice of his vizier Khālid al-Barmaki, who said that Persepolis was used as place of prayer by AI; see Fargūn. Hist. Arab. (ed. de Goeje), p. 256.

Various Muslim rulers have perpetuated their visits to the ruins of Persepolis by having inscriptions incised. Here are to be seen three Arabic inscriptions in Kufic characters by members of the Būyid dynasties (ixth = xi cent.; three inscriptions, two Persian and one Arabic, of Abu ‘l-Faṭṭ Ābār, a grandson of Tīmu’r (ixth = xiv cent.).), also three inscriptions (2 Arabic and 1 Persian) of ‘Alī b. Khālīf, a grandson of Ūrūn Ḥasan (ixth = xiv cent.). These inscriptions were thoroughly discussed by de Sacy in his Mém. sur diverses antiquités de la Perse (Paris 1793), p. 139. The inscriptions thereon were given by Noldeke in Stolze, Persepolis, ii. 6. H. Petermann, Reisen im Orient, i. 188, also mentions an inscription of the Muẓaffarid Muhammad b. al- Muẓaffar b. al-Muẓaffar b. al-Mansūr (d. 765 = 1363). The various verses scratched on the walls show the high respect in which Persepolis has always been held among the Persians; their modern poets often make allusions to the ancient capital of the country.

As to Naḵš-i Rūstān, its primary significance is only the steep south wall of the long, high mass of rock, Ḫusain Kūh, which has in niches four Achaemenid royal tombs and Sasanian reliefs. But the name is often extended to the whole of Ḫusain Kūh. The name Naḵš-i Rūstān is due to the popular idea that the sculptured figures there represent the Iranian national hero Rustam. Before the wall of the tombs there rises a remarkable towerlike building, now called Kaḇā-ḵār, the citadel of Kūh-e Zoroaster. As to its real purpose the opinions of scholars vary; probably it has something to do with a former fire temple. Two other small buildings are perhaps to be similarly regarded, not far from the Kaḇā-ḵār on the summit of a rock called Sang-e Sulaimān, "the stone of Sulaimān," cf. Ussele, a. e., ii. 300. We may also mention that the Sasanian sculptures of Berme Dekel 5 miles E. S. E. of Shirāz are also called Naḵš-ḵi Rustam.

A stone platform in two layers on the south bank of the Pulvar (about 500 yards W. of Naḵš-i Radjab) is called by the inhabitants of the district, Takht-i Rūstān, the throne of Rustam. The latter, in view of its limited dimension, can only have served as the pedestal of a sepulchral monument or of a fire temple. Cf. Flandin et Coste, Voyage en Persie, i. 72–73 (and Pl. 63). Instead of Takht-i Rūstam, the name Takht-i Ṭājūn, "peacock-throne," is also used. The name Takht-i Rustam is found elsewhere in Iran also: cf. Oussele, a. e., ii. 522.

A somewhat greater distance from Isťakhār, about 3–4 hours journey N. W., on rocky peaks stand three forts within 1½ to 2 miles each of other. Three, which lie practically in a straight line, are frequently comprised under the name Kaḷa’ or Kūh-i Isťakhār, the citadel or the mountain of Isťakhār; also Kūh-i Rāmūdjar, from a district of this name on the left bank of the Kur (into which the above mentioned Pulvar flows). Firdawsi in a distich speaks of the Sīh Sīdy Gumbādān-i Isťakhār, "the three fortresses of Isťakhār" (cf. Oussele, a. e., i. 386). At the same time the separate castles have each its own names, which have however changed frequently in course of time according to the reports of the older historians and travellers. The most important of the three, the Kāl-i Isťakhār in the narrower sense, is also called Miyyān, Kalā, "the citadel," from its position between the other two. Flandin and Coste heard it called Kāl-ḵār Sarw, "the cypress castle," from a single cypress tree standing there. For the two other citadels Persian authors, for example, give the names Kāl-ḵār Shīkastān, "the broken (ruined) castle, and Aḵšunwān (Sakunwān and similar names). To judge from the traces of foundations and pieces of walls found between the forts there were always all linked up by fortifications.

In the Muslim history of Fārs, especially in that of Isťakhār, these inaccessible fortresses played an important part. They were guarded as essential military points d'appui for the holding of the surrounding country. The most prominent is the "citadel of Isťakhār" proper, the origin of which Persian legend places in mythical times by assuming it was built by King Djамshīd. The old Iranian ruler Gushihās is said to have deposited the Javosta, written on cowhides with golden ink, in the castle of Isťakhār, after his conversion to the doctrine of Zoroastrianism; the citadel is therefore also called Diz-i Niβāšt (Castle of the writing) or Kūh-i Niβāšt (Hill of the writing); so in Ḥandi Allah Mustawī; cf. Ţabari, i. 676; and Ibn al-Athīr, i. 182, as well as the Persian reports in Oussele, a. e., ii. 344, 364, 370–1, 375, 384. Under the caliphate the governor of the province of Fārs very frequently resided in this stronghold, which was easily defended by its natural situation. Thus the governor Ziyād b. Abīth was able to hold out up here against Mu’awiyah for a considerable time after ‘Alī’s death; cf. Wellhausen, Das arabische Reich, etc. (Berlin 1902), p. 76. The Būyids, who not infrequently stayed in the region of Isťakhār (cf. the inscriptions dating from their time mentioned above, at Takht-i Djamshīd; *imād al-Dawla [q. v.] was buried in Isťakhār), paid particular attention to the citadel of Isťakhār. Aḏūd al-Dawla [q. v.] in the ivth (xth) century built on it a great system of cisterns, taking advantage of a natural pond already there, which could provide water for several thousand persons for a whole year and which aroused the admiration of contemporaries and of later generations. In 467 (1074) the rebel Faḍlūya, who had seized the government of Fārs, was besieged by the troops of Niẓām al-Mulk in the sulṭānate of Malik Shāh in the citadel of Isťakhār. An earthquake which suddenly caused the cisterns to overflow forced the besieged to a premature capitulation. Faḍlūya was then kept a prisoner in the fortress and put to death next year after an unsuccessful attempt to escape. The castle was later much used as a state prison for high officials and princes. About 1590 the citadel was still in good condition and inhabited. Some time afterwards a rebel general of Fārs took refuge in it and it was besieged by Shāh Aḥmad I, stormed and destroyed. Pietro della Valle, who stayed here in 1621, therefore found it in ruins.
The citadel of Iṣṭakhr has so far been only rarely visited by European travellers, e.g. by Morier, Flandin (and Coste), and Vambery. According to the account by Flandin and Coste, to whom we also owe drawings and plans of the citadel, it stands on a plateau 300 yards round, about 1300 feet above the plain. Of the old defences there have survived the powerful ramparts solidly built of stone; the great system of cisterns of the Byzantines, among which a well hewn deep into the rock is specially remarkable, is still to be seen. It is true that some of them are said to date from the Muslim period. Cf. on the castles of Iṣṭakhr the accounts from Persian sources in Ouseley, o. c., ii. 371, 376, 385 sq., 389, 395-7, 399, 404-5, 407, 531; Ritter, viii. 863-5, 868, 877; Flandin et Coste, Voyage en Perse, ii. 71-72; Flandin's Relation du Voyage, ii. (1852), p. 140-2; Vambery, Meine Wanderungen und Erlebnisse in Persien (Vest 1867), p. 250; Cl. Huart in Revue sémitique, i. (1893), p. 259 sq., 337 sq. and in Hist. de Bagdad (Paris 1901), p. 28, 31; G. Le Strange, o. c., p. 276; Herzfeld in Sarre and Herzfeld, o. c., p. 114-5 (Pl. xvi. and Fig. 45).

(M. Strecker.)

AL-ĪṢṬAKХRI, Abū ʿĪṣāʾ b. Mūḥammad b. ʿĀlī-Pārīsī, an Arab geographer, whose biography is nowhere to be found, because in the geographical handbook ascribed to him, which bears the title Maṣūlī kh-Māmīlīkh and is printed in the first volume of de Goeje's Bibliotheca Geogr. Arab., no biographical data are given. De Goeje however has shown that his work is only a new edition of an older one by Abū Zaid al-Balkhī, just as later Ibn Hawkal [q. v.] took al-Īṣṭakīrī's work as a basis for his own after giving up his first intention of only making some corrections to it, as al-Īṣṭakīrī himself, whom he had met in 340 (951-952), had asked him to do. It is thus at least certain that he must have lived in the first half of the 19th (20th) century. The text which was published in facsimile by J. H. Moeller as early as 1839 only contains a synopsis of the book.

ISTAMBOL. [See CONSTANTINOPLE.]

ISTANKÖI, Turkish name for the island of Stano = Cos; cf. Cui net, La Turquie d'Asie, i. 435 sqq.

ISTAR (istārā), a weight in the apothecary's or troy system, taken over from the Greeks and usually estimated according to two different scales. On the one hand we find the equations: 1 istār = 6 dirham and 2 duqqa = 4 mishāb (an apothecary's stater); on the other, we have 1 istār = 63 dirham = 4 mishāl (commercial istār in the East). The first equation will only be correct if the coined dirham and the mishāl maiyāl are taken (2,97 + 2,97 = 18. 18 = 4,72 × 4 = 18,18); the second equation is approximately correct only if we take the coined dirham and the old mishāl (gold dinār) (2,075 × 6,5 = 19,3 = 4,25 × 4,5 = 19,125). In both cases the result is a much larger amount than that of the usual Greek stater. The further ratio that 20 istār go to the raft (pound) is only true of the istār of 63 dirham and the Baghdad raft of 130 dirham.

ISTIBRÁ (A.) means the "inquiry whether the uterus of a slave woman is empty," prescribed by Muslim law. If a Muslim acquires a slave girl by purchase, inheritance or by any other means, the law forbids him to cohabit with her, until it is ascertained that she is not pregnant, in order that there may be no uncertainty about the paternity of the children. The prescribed period of waiting ends after the first menstruation or, in the case of pregnancy, after the birth of the child, and lasts a month for non-menstruating women. Further a slave, after she is manumitted, may only enter into a marriage after the expiry of the legal istibrá period.

(TH. W. JUYNBOll)

ISTIFHĀM (from the root fīHM "to understand"; x. "to ask to be made to understand"; a. technical term by Arab historians denoting "interrogation," "interrogative sentence." An interrogative sentence is nominal or verbal, and is subject to the grammatical rules governing the sentence in general. An interrogation may be indicated merely by the tone of the voice, but more often it is introduced by one of the interrogative particles (qarfa 'l-istiftiham) 'a, 'al, 'um, etc., or by an interrogative pronoun or adverb, e.g. man = who?, mā = what?, kāfa = how, etc.

(Robert STEVENSON)

ISTĪḤĀN (A.), i. e., to consider something hāsan (i. e. good). This is the name given to a method of argument used in the Ḥanafi school to settle fiḥā in conformity with the requirements of every day life, equity or social conditions. The object of istiḥān is much the same as that of istiḥāṣ (i.e., to think that something is qālīb, i.e., in the general interest or most appropriate) applied in the Mālikī school. According to both methods, the results of ḥayāt (i.e., analogy) were often simply disregarded, when it was considered necessary or simply desirable to depart from the strict demands of theory. For this arbitrariness istiḥān and istiḥāṣ are objected to by many and have never been generally recognized as reliable fundamentals in the science of law (uṣūl al-fiḥā).

(TH. W. JUYNBOll)

ISTIKBĀL (A.), in astronomy means the proportion of the positions of sun and moon i.e. their relative positions when the difference of their longitudes is 180°, as is the case notably during an eclipse. Muḥābala is also occasionally used but this word is a common term among the astrologers for the opposition of two planets. The opposite of istikbāl is istifsimā = conjunction, i.e. the relative positions of sun and moon when they have equal longitudes, as is the case for example in an eclipse of the sun. In astrology other expressions are commonly used for the conjunction of planets among themselves or with the sun and moon, viz. muḥārara, ištīrān and ḵirān. Besides these positions (opposition and conjunction), astrology further distinguishes the hexagonal (ṣaṣṣād), the tetragonal (ṭarīb), and the trigonal (ištihāṣ) aspect, according as the angle between the two planets is 90°, or 120° or 180°.

rān; al-Khwārizmi, Maǧâth al-Ulūm (ed. van Volken), p. 232. (H. Suter)

ISTIKHĀRĀ (AN), the prayer (iḥdā) of a man who has not yet made up his mind, in order to be inspired with a salutary decision regarding an intended enterprise, a journey, etc. This term is connected with the first conjunctive of the verb ʿara', especially in its use in phrases like Allāhumma bārîs li-ʿaḥālka (Tabari, Anwa'l., i. 1832, q); khār lahu (Ibn Sa'd, ii. 11, 73, 75, sq); khārū 'lāhan li (ibid., viii. 92, sq). The proverb istiṭkāhar al-lamā'ī fī 'l-ṣamā'ā ḫakāy laka bi-issīnīkī fī 'l-khāfī (Ibn Sa'd, viii. 171, sq); Kāfī, Anāli, ii. 106 pan.), is even given from the pre-Islamic period, but it is hardly to be believed that such an aphorism could date from that time. In Islam the formula of the religious istiṣḥārā, consists of a form of prayer of some length, traced back to the Prophet in Bukhārī, Tirmīzhī, n. 10, Da'awāt, n. 45 (ed. Krehl—Juynboill, iv. 202, 400); Ibn Mājah, Dībāj 1282, p. 99 infra, — the authenticity of which however is disputed even by Muslim critics, in Ibn Ḥadījār al-Hāsimī, Fātiṣa al-ḥadīthīya, Cairo 1307, p. 210 — whereas Tirmīzhī (Būlāk 1397), ii. 206, gives only the brief formula: Allāhumma bārīl ṣanā'ī fī iḥdā'ī cf. the Dhaihab, Mīzn al-ḥīdāyāt, ed. Lucknow 1884, i. 315, 4, only as a haddāt of doubtful authenticity. It is introduced by two ra'ās (zilā' ra'kata al-istiṣḥārā, Subkhī, Tāb. al-Sharī'a, vi. 175, 6 infra). Directions are also given regarding the verses of the Kurān to be recited within the two ra'ās (Nawawi, A Ḍādir, p. 56). In Āwīj, Lūhh al-ṣībāh (ed. Browne), i. 210, 12, people go to the mosque to perform the namāz-i ʿistiṣḥārā; but this is not obligatory. It is the rule that the ʿistiṣḥārā appeal should be made from case to case before a definite purpose, and not in a summary fashion (e. g. in the morning for all cases which may crop up in the course of the day) (ʿAbdārī, Mādhūl, iii. 240 infra).

In keeping with the above mentioned traditional saying, Muslim practice shows the ʿistiṣḥārā in use from the earliest examples. The oldest example, probably quite independent of that ḥadīth, seems to be Aghānī, xix. 92, 3, sqq. The poet ʿAbd al-Ḥādī (Tānūn, N. 12, 83; Aḏāḏīz al-Arād, p. 120) praises Ḥādījād, because he undertakes nothing without securing God's approval (illā ra'kāhu ʿistiṣḥārā). And when ʿAbd Allāh b. Tāhir enters on his office of prefect of the Irāk, his father impresses upon him repeatedly in a letter of advice he sends him, to observe the ʿistiṣḥārā in all official business (Tāfīr, Kāb Ilkhāzādād, p. 49, p. 52, p. 56, p. 52, 4 infra, 52, 3). In this way literature gives numerous examples of the custom that the Muslim has to consider as well as unimportant resolutions, in private as well as public enterprises, also conquerors before their expeditions, thought to secure the divine approval by ʿistiṣḥārā. This habit indeed is sometimes fictitiously credited to them, as for example when Muḥāḍrān yīn in ʿistiṣḥārā to be made in this regard by ʿAbd Allāh b. Tāhir, T(abīrī, op. cit., p. 34, 6). Cf. the loud ʿistiṣḥārā
prayer of al-Muqtadir on his accession (with four rak'a's). 'Arīn, ed. de Goecel, p. 22, 13). In the 1007 Night in the tale of 'Uthman al-Wujūd and Ward fi l-'Akāmāt the latter's mother performs a "salāt al-istiikhāra of two rak'a's" in order to obtain an effectual indication in regard to her daughter's love affair (373rd Night, ed. Bulāq 1279, ii. 269). The choice of a baby's name seems occasionally to be made after an istiikhāra by the name (Snouck Hurgronje, Mekka, ii, 139, i). There is no lack of examples to show that in deciding thorny theological questions the learned arguments were strengthened by istiikhāra (e. g. Nawawi, Tabâkhī, ed. Wustenfeld, p. 237, infra.). Authors in the introductions to their books very frequently mention istiikhāra as the motive or excuse for the publication (cf. Dhubahi, Tadhkīrat al-Huffāz, ii. 288, 1). A story, of course quite unhistorical, makes 'Omār II only allow the publication of a work of Ḥabbūn a. l-Yūn which he had in his library, after he had exposed it for 40 days with an istiikhāra at his place of prayer (Ibn Abī Uṣāfīa, i. 163 infra.).

The form of the istiikhāra laid down by religious usage (istiikhāra sharī'ya) is usually in actual practice accompanied by all kinds of forms not sanctioned in the Hadith, for example the expectation of receiving the divine inspiration in a dream (tayyara) after a prayer (Snouck Hurgronje, Mekka, ii. 16, note 4; Doutté, Magie et Religion dans l'Afrique du Nord, p. 415) or strengthening the istiikhāra formula by an oracular casting of lots, in which the alternatives are written on cards (Tabarsi, Makārim al-Akhbār, Cairo, 1903, p. 100). Such additions are strongly condemned by fervid Sunnī orthodoxy ('Abdārī, op. cit., iii. 91 sqq.). There is also the istiikhāra by opening the Kurān (al-ďurū ... fā l-maṣṣāf ... wa-takādim istiikhāra), in Ibn Bishkuwāl, p. 243 ult., cf. Faraīj b. Aš-Shāhī, i. 44; an anecdote on the subject is given by Karwini, ed. Wustenfeld, p. 105, and Seebars, al-Musannif, p. 122, 18 (see Snouck Hurgronje, Mekka, i. 10, 17), as in the case of the Sūras Virgiliānæ, are employed for the purpose of the Persians, especially the Dīwarān of Ḥāfīz, or the Mathnawi of Ḥājīl al-Dīn Rūmī (cf. Bankfort, Kalamgari, i, 151). This use of the Kurān is likewise rigorously forbidden by most Sunnī authorities (cf. Danīrī s. v. Tārik, ii. 119, 8 sqq., ed. Bulāq 1284; Murtadā, Ḥāfīz al-Sidā al-Muṭahār, Cairo 1311, ii. 285 infra); this custom in connection with the istiikhāra has led among the people to an excessive use of 'alī magic with the Kurān, of which a full account is given in Lammens, Les Custumés, Ch. xi., i. 328. — There is a proverb: "Ha khí man istiikhāra wa-lā nadīma man istaḍhāra (as hadith in Ṭabarānī, Muṣjam Ṣaghīr, ed. Dhibī, p. 304 infra). Abū 'Abd Allāh al-Zubairī in the beginning of the 4th (5th) century wrote a Kitāb al-istiikhāra wa-lā 'istiikhāra (Nawawi, Tabākhī, p. 744, 3). Bibilography: The above mentioned Ḥādīth passages; Ghaḍālī, Ḥāfiz 'Uṯlām al-Dīn (Bulāq 1289), i. 197; Murtadā, Ḥāfīz, iii. 467-409, and the pertinent sections of the Fīkh books. — Ct. journ. Asiat. 1861, i. 201, Note 2; 1866, i. 447; Philott, Bibliomansy, Divination, Superstitions among the Persians in Journ. As. Soc. of Bengal, 1906, ii. 399 sqq.; Bulletin de la Société de Géographie d'Oran (1908), xxviii. Number 1. (L. Goldziher.)

ISTIṆĀF (A.) means in Muslim law: the performance over again from the beginning of a religious act (e. g. a salāt) which has in some way been interrupted. If, on the other hand, only the part still to be performed when the interruption took place is later carried through, this is called bīnā (i.e. the continuation of an interrupted act).

Bibliography: A Dictionary of the Technical Terms (Calcutta 1862), i. 80.

(Th. W. Juynboll.)

ISTINDJĀ (A.) means a purification fully described in the Fīkh books in the chapter on ritual purity. It is a religious duty (according to Abū Ḥanīfa, however, only a recommended action) for every Muslim who has attended to the call of nature. A Muslim is in general allowed to delay this purification until he is about to perform the salāt, or has to be in a state of ritual purity for some other reason.

Bibliography: al-Dimashqī, Raḥmat al-Ummā fā Ḫāfīs al-Aṭīmā (Bulāq 1300), p. 7; A. J. Wensinck in Der Islam, i. 101 sqq.

(Th. W. Juynboll.)

ISTINŠĀK (A.), the inhaling of water through the nose, is considered by most fāṣīhs as a suunnā (i.e. a commendable act, according to Ahmad b. Ḥanbal however, a religious duty) both at the ghūf [s. v.] and the awzāfā (i.e. the major and minor ritual purification).

(Th. W. Juynboll.)

ISTIṢÂHĀB (A.), i.e., the seeking for a link (i.e., to something which is known and certain). This is the name of a process of settling fīkh rules by argument, which was especially used in the Shafi‘i school and with certain limitations among the Ḥanafis also. This seeking for a link means the endeavour to link up a later set of circumstances with an earlier, and is based on the assumption that the fīkh rules applicable to certain conditions remain valid so long as it not certain that these conditions have altered. If for example the length of some one it is doubtful whether he is alive or dead, then by istiṣâhāb all rules must remain in force which would hold if one knew for certain that he was still alive.

The Ḥanafis only recognise istiṣâhāb in so far as it concerns the retention of rights already granted, the Shafi‘i on the other hand even when it is a question of assigning new rights. An absent man for example would not be recognised by the Ḥanafis as legitimate heir to an inheritance falling due while he was away, but he would be according to the Shafi‘is, as the latter assume that even during his absence he can obtain new rights.

ISTIŠKĀ (A.), prayer for rain. The treatises on canon law expound in what circumstances the hadith prescribes the istiṣâhāb prayer as an obligatory act or leaves it to individual descretion. They also give details of the special ritual to be observed in this prayer. This ritual comprises 1. a prayer of two rak'a performed in the morning outside the town; 2. the faithful ought to put on ordinary dress, without elaboration or luxury; 3. the prayer
is followed by two lá'atba, of which the first is accompanied by a turning of the cloak (a sympathetic rite to produce a change in the weather); 4. the déj which follows the prayer is a supplication for rain; 5. the usual takbir is replaced by an invocation intended to implore God's pardon (istišqāf). This prayer ought to be completed by a series of pious works recommended to the faithful (fasting, almsgiving). Prayers for rain by non-Muslims according to their religions (Jewish or Christian) are admitted and even recommended in orthodox Islam.

Rites and ceremonies to obtain rain are as ancient as man himself and vary not only according to different religious beliefs, but even among the different groups of human beings belonging to the same religion, as I have shown in my Quelques rites pour obtenir la pluie en temps de sécheresse chez les musulmans maghrébins dans Recueil de Mémô- res et de Textes publié en l'honneur du XIVe Congrès des Orientalistes, by the professors of the Collège impérial des Lettres et des Médecins, Alger 1905, p. 47-8). The ceremonies and rites, rather various in the Muslim world, even in the orthodox ritual, much impregnated with animism and magic, may however be grouped under several rubrics: adaptation to the cult of saints; physical and moral sufferings which the faithful impose upon themselves; formulas, songs and hymns; rites relating to a kind of divinity of rain, named ghadja or an analogous name in Bar- bary; sacrifices of victims and communal meals; sympathetic and symbolic acts.

In the article referred to, there will be found, in addition to useful bibliographical notes, references to analogous ceremonies in non-Muslim countries. There it will also be seen that for the Maghribi and other religious services have rather the character of agrarian festivals and they take place at a fixed period of the year, but not in every season.

(Alfred Bel).

ISTISLĀH (λ), i.e., to think that something is in the general interest. [See ISTISHĀH.]

ĪTĀ (א), a term in prosody, meaning the presence of the same word with the same sense used as a rhyme at the end of phrases of the same poem.

(Alfred Ben Cheyeb).

IṬAK. [See ‘ABD, i. 18.]

IṬHĀNA ‘ASHARĪYA (Arabic ʾithnā ‘ashari, twelve, "the Twelvers", a name given in contrast to the Salafīyya [q.v.], the partisans of the seven imāms, to those Shi‘is who allow the series of twelve imāms and say that the imāmate passed from ‘Ali al-Ridā to his son Muḥammad al-Taṣi, to the latter’s son ‘Ali al-Naṣiḥ, then to his son al-Ḥasan al-ʿAskari al-Zaḵī, and finally to Muḥammad al-Mahdi, who disappeared and will come again at the end of time to announce the last judgement and to fill the earth with justice. The series of twelve imāms is made up as follows:

Such has been the succession which has been definitely admitted since the viith (xiith) century; but this sect has not always been in agreement with itself, and at one time numbered no less than eleven parties, without special names but distinguished from one another as follows: 1. al-Ḥasan al-ʿAskari is not dead, he is only absent; 2. al- Ḥasan died without children, but he will return and raise from the dead; 3. Muḥammad his brother Djaḥar by will; 4. the latter died without leaving heirs; 5. Muḥammad son of ‘Ali is the imām; 6. al-Ḥasan had a son, two years before his death, who was called Muḥammad; 7. there was indeed a son, but he was born eight months after his father’s death; 8. al-Ḥasan died without children and the world is without an imām on account of the sins of men; 9. al-Ḥasan had a son, but he is not known; 10. an imām is necessary, but it is not known if he is descended from al-Ḥasan or not; 11. a stop is made at ‘Ali al-Ridā and the coming of the last imām is awaited, whereas the name al-Wāṣābiyya given to this party, i.e., those who suspend their judgement regarding the imām’s death. They were at first called Kaʿīya (Kāʿiyya), because, unlike the Wāṣābiyya, they admitted the reality of the imām’s death or, according to others, because they interrupted the line of the imāms at Muṣaḥ al-Ḵāzin, son of Djaḥar, in order to keep it exclusively in the line of his descendants. Others admitted after Muṣaḥ, the imāmate of his son Aḥmad, excluding ‘Ali al-Ridā; it is also said that Muhammad, the latter’s son, being very young at the time of his father’s death, had not been able to receive from him the training for the imāmate; others admitted his quality of imām, but asked which of his sons Muṣaḥ or ‘Ali should succeed him. After ‘Ali the same question arose between Djaḥar and al-Ḥasan. Those who admitted the imāmate of al-Ḥasan al-ʿAskari were called by objectors al-Ḥimārīyya because they describe the chosen imām as an ignoramus. After the death of al-Ḥasan, some adopted Djaḥar, the pretended son of a concubine, al-Ḥasan according to them not having left any children.

The Šafawids, who claimed descent from Muṣaḥ al-Ḵāzin, made the Shī‘a and more particularly the doctrine of the İtıhāna ‘ashariyya the state religion of Persia, as it still is. After his accession Shī‘a Isma‘īl (906 = 1500) gave formal orders to the preachers of Aḏharbāйdžān to preach the sermon in the name of the twelve imāms, and to the muʿāththīnān to add the Shī‘a formula: “I testify that ‘Ali is the saint of God”. The troops were ordered to put to death any objector.

The cult of the twelve imāms has attained an extraordinary importance among the Persians; hypostases of the Divinity, they direct the destinies
of the world, and preserve it and guide it. With them all is salvation; without them all is perdition (Gobineau, *Religions et philosophies*, p. 60). Their ministry, their intercession ( Intiās) are indispensable. Prayers with special formula are reserved for them; Sunday is sacred to Alī and Fāṭima; the second hour of each day is set to al-Ḥasan, the third to al-Ḥusayn, the fourth to Zain al-ʿĀbidin and so on. Pilgrimage to their tombs (ziyāra) procures special rewards.

**Īṭīkād** is only "belief" that a thing is so. It may be only the "belief" of the English "thinking", or the German "Glauben", or it may be a feeling perfectly assured, and so the word is used especially of belief in religious dogmas (Lane, *Doxy, Supplement*). It is then exactly equivalent to taṣdiq, firm acceptance in the mind of a thing as true, and is distinguished from imān, "faith" in that some held imān to cover works (amāl) and confession (ṣiṣṭ). Al-Tūfāzīnī, in his commentary on the *ʿAṣāf* of al-Nasafī (ed. Cairo 1921, p. 7) explains that some of the revealed precepts (ahākim sharıya) connect with manner of action and are called faršiya, "derivative", and amalıya, while others connect with belief (al-Īṭīkād) and are called asliya "essence" and ʿĪṭīkādiya (cf. al-Ḍabūrī, Ḥāshīya ʿalā Sharḥ Ibn Kāsim, Cairo 1321, i. 20; Ḥāshīya ʿalā Muḥ. al-Sanūsīyya, Cairo 1283, p. 11 sqq.; Lucanī, *Les prolégomes théol. de S.OUNASSI*, p. 4 sqq.; *Dict. of Tech. Terms*, s.v. ḫaṭm).

In consequence al-Īṭīkād is used much in the sense of al-ʿaql, the doctrine of the faith. The exact scholastic definition of the word evidently gave difficulty. In the ʿĪṭīkād is used much in the sense of al-ʿaql, the doctrine of the faith. The exact scholastic definition of the word evidently gave difficulty. In the *Dict. of Tech. Terms* (p. 954) two uses are distinguished: one generally known, "firm belief", and a rarer, "conviction, certainty". The first is a mental judgment, absolute (ṣiṣṭ), but susceptible of doubt (ṣiṣṭ, al-taṣākhkāb). The second is a mental judgment, absolute or preponderant (rājīḥ) and includes "ilim, "knowledge", which is a mental judgment incompatible with doubt or belief or opinion (ṣumāl). The second is sometimes called "certain knowledge" (al-āthār al-yaṣīn) and excludes "compound ignorance" (al-īṭāik al-murakkab), the ignorance that does not know that it is ignorance. Others distinguished the first Īṭīkād into two; that which corresponds to fact and that which does not. See IMĀN.

**Bibliography:** has been given in article.

(D. B. Macdonald.)

**Īṭīkād Khān**, title of a Kashmiri named Muḥammad Murād, who gained such an ascendency over the emperor Farrukhsīyar [q. v.] that he became his confidential adviser, received from him the title of Ruh al-Dawla Īṭīkād Khān Farrukhsīyar, and ultimately became his vazir. When Farrukhsīyar was blinded and deposed in 1714, Īṭīkād Khān was thrown into prison and his property confiscated, but he was subsequently released, and died in the reign of Mughal Emperor Shāh [q. v.]

**Īṭīkāf (A.)** is the name of a religious custom of which the main feature is that the believer retires for a time from the world in a mosque. The ʿĪṭīkāf is always considered meritorious (ṣunnā) and is numbered among those good works which are recommended in the law-books to be performed during the last ten days of Ramāḍān, in order to participate in the blessings of the holy Šarād night. According to the Muslim tradition, the Prophet also used to spend the last third of the month fasting in the mosque in Medina. On the *Lāliš al-Šarād* (Night of the Divine Decree) see Kurān, xiv, 2, xvii, 1-5; cf. Kurān, ii. 181. The question of what is to be considered the Šarād night is not settled. According to the view of most Muslim scholars, it must be assumed that one of the last ten nights of the month of fasting (especially one of the five odd nights, i.e. 21, 23, 25, 27 or 29 Ramāḍān) is meant. According to others — this was Abū Hanīfa's view — there are no indications that the Šarād night belonged to this period of the year.

**Īṭīkād al-Dawla**, (Arabic: support of the king), title of the Persian Prime Minister under the Safawīs; also called waṣīr-i ʿām, "great minister", nusewāb ("Naboh"), deputy or ʿām madīrī, "the hinge of Persia". As the chief administrator of the kingdom he possessed far-reaching powers and no document of the king was valid without his seal; his position however was exceedingly precarious as his fate depended entirely on his master's humour. A controller (māṣīr, supervisor) appointed by the king assisted him as secretary. The residence of the Prime Minister was near the royal palace in Iṣfāhān, in the vestibule of which he held his reception. At public audiences he stood on the right of the ruler and when the latter rode out through the city he accompanied him on the right, while his epithet waṣīr-i ʿām, "minister of the right". His dismissal resulted in his banishment to some town where he lived as a simple citizen. His salary consisted of a definite sum called rūsām, "fees", which he drew annually from the khāns or tribal chiefs whose interests he pledged himself to represent at court. In 1650 his income was estimated at 900 to 1000 tomans or £ 14,000 to £ 16,000.

(C. Huart.)
ITTĪḤĀD, 'becoming one'. Muslim scholastics distinguish two kinds of ittiḥād, 1) 'real' (ḥaḇīṣ); 2) 'metaphorical' (muqāṣīs). The former class has two subdivisions, according as the term is applied to two things which become one, e.g., Amr becomes Zaid, or Zaid becomes Amr; 2) to one thing which becomes another thing that was not existent, e.g., earth becomes some inanimate individual who did not previously exist. Ittiḥād in this 'real' sense is necessarily impossible; hence the saying, al-ittiḥād lā yattaḥṣīlūn. The 'metaphorical' class has three subdivisions, according as the term denotes a) one thing's becoming another thing by instantaneous or gradual transformation, e.g., water becomes air (in which case the real nature of water is destroyed by the removal of its specific form from its substance, and to this substance the specific form of air is added), or black becomes white (in which case one attribute of an object disappears and is replaced by another attribute); b) one thing's becoming another thing by division of complexity into a third thing results, e.g., earth becomes clay by the addition of water; c) the appearance of one person in the form of another, e.g., of an angel in the form of a human being. All these three species of 'metaphorical' ittiḥād actually occur. In the technical language of the Sufis, the name ittiḥād is given to the mystical union by which the creature is made one with the Creator, or to the theory that such a union is possible. This conception of the unitive state, like the parallel doctrine of ḥaḍālī, i.e. the doctrine that the Creator becomes incarnate in the creature, is generally regarded by the Sufis as heretical, on the ground that it involves homotheology and is therefore inconsistent with the true notion of divine unity (tawḥīd), which admits no real existence except that of God. Ittiḥād, thus understood, presupposes the existence of beings which are made one, whereas, according to the more orthodox mystics, human individuality is only a phenomenon that passes away in the One Eternal Reality (fānā f il-Ḥaḥīṣ). Sometimes the term ittiḥād is employed like the Sufistic waḥdat or tawḥīd, in reference to the doctrine that all things are non-existent in themselves, but derive their existence from God and, in this respect, are one with God (Abd al-Razāz al-Kashf al-Iṣlāḥ b al-S̱ajīf, ed. by Sprenger, p. 5). According to 'Ali b. Wafā (quoted by Sha'rān in al-Yaḥṣūb wa'l-Djawāhir, Bālāsh, 1277 A.H., p. 80, l. 18 sqq.), the meaning of ittiḥād in the terminology of the Sufis is "the passing away of that which is willed by the creature in that which is willed by God."

TWĀD (أ) means in Muslim law all that must be given or done as a guarantee of the fulfilment of what the other party is pledged to, in a contract or sale or other agreement.

(IYĀD, a great Arab tribe belonging to the Maʿaddī (Ismaʿīlī) group. Their genealogy is Iyād b. Nizār b. Maʿadd b. Adhānā. The Rabīʿa, Annār and Muffar were consanguineous tribes of the Iyād. A section of the Iyād professed Christianity. The poet Abū Dūrādī, famous for his descriptions of the horse, and the celebrated Khāṣ b. Ṣalīma were members of the Iyād.

At first they dwelt in Tihāma up to the borders of Najdījīn [q. v.]. In the first half of the 8th century they emigrated in large bodies to Eastern Ḥira and thence to Mesopotamia. Among their settlements were Anbār (they are said to have the first to introduce the Arabic characters there), Ain Ubāğī (behind Anbār), Sīnād, Takrit, Baṭn Iyād (lying towards Kūfah), Bāḏīja, Ḥalijā, al-Dījāl (in the Iyād, Jōwār Zarafah, al-Ḥafa, Khīlād, Mawīl (Mawīḥāb), al-Mustarād, al-Salawār, Shībāk, al-Shāfikā (in the Iyād), Sāwār 'Aṣḥādī, al-Tha'lābiya (between Mekka and Medina), al-'Uḏmān. Among the waters of the Iyād were Ḥaşāf and al-Ḥīṣāf.

A section of the Iyād, probably before these large emigrations to the Ḥira, joined the Kašfā in the latter part of the 7th century, and another remained in Ṭādir Bāsha [q. v.]. We also find scattered settlements of the Iyād in Syria, e.g. in Antioch, Ḥims (Emessa), ᴨaḥab, and in Greek territory at Ankyra (Angora in Asia Minor), Bâgγas (Pâšhā), etc.

History: Towards the beginning of the 10th century of our era a quarrel arose between the Iyād and Muddar regarding the possession of the Kašā, which also involved dominion over Mecca, after the two tribes in alliance had driven the Tājurhum from Mecca. The Iyād were defeated and emigrated to the Ḥira, where they established themselves mainly in Ain Ubāğī and Anbār. Some settlements south of al-Ḥira during the first period of their sojourn in the Ḥira the Iyād were exposed to the invasions of Djaḥīma b. Malik of the Aṣd, whose rule extended over all the Arabs in the Iyād, Djaḥīma demanded from them the surrender of their relative, 'Adī b. Rabī'a; after long hesitation the Iyād submitted and delivered 'Adī up, who then married Rīš, sister of Djaḥīma.

In the Ḥira the Iyād seem to have acknowledged the suzerainty of the Lakhmīd princes of al-Ḥira. During the wars of Mundūrī b. Māʿ al-Samā against the Kinda chief al-Ḥarīth b. 'Amr b. Ḥujjār we find them in Mundūrī's train. At the beginning of the 8th century, the Iyād made inroads into Persian territory. They crossed the Euphrates. A detachment of Persian cavalry sent against them was completely destroyed by them near Kūfah [see Dair al-Zamālīm]. To defend himself against their inroads and to take vengeance on them, Khusrav (Kisā) Anšīrīnān sent an army against them under Mālik b. Ḥarīzah, which is said to have included a detachment of the Bakr b. Wālī [q. v.]. In spite of the warning given by their fellow tribesman, the poet Lākīt, the Iyād were surprised and put to flight. The Persians followed them and, according to a tradition, inflicted a considerable defeat on them at the village of al-Ḥurrah. In consequence of their defeat, they are said to have retired into Syria. One section of them reached Byzantine territory at Ankyra, where they found others of their tribe already settled. An isolated tradition mentions a punitive expedition by the Persian king Sābir (Sabūrī) Dhu 'l-Akṭāf in the 10th century against the Iyād, but there is probably confu-
sion here between Sabûr and Kisrâ. In the battle of Dhl Kâr [see BAKR b. WILH] they fought alongside the Kûdâ'î tribes of Mesopotamia under Kâlid b. Yaqûd al-Bahraini on the side of the Persians. A section of the Iyâd had made secret arrangements with the Bakr and took to flight during the battle, thereby throwing the Persian lines into disorder. After the battle of Dhl Kâr they, like the other Christian Arab tribes of Mesopotamia, remained a few more years under Persian suzerainty. In the battle of 'Ain Tamr (near Anbar) we find them on the side of the Persians along with the Mesopotamian tribes under Mîrdhân b. Bahrâm Dhubin. In the reign of Abû Bakr, in the year 12 (634), a large number of the Iyâd, like many of the Tabîm and the Christian Arab tribes of Mesopotamia, joined the false prophetess Sâdîjâh [q.v.]. In the same year Kâlid b. al-Walid [q.v.] inflicted a serious defeat on them and the Persians, on whose side they fought, at Fîrâd (on the East bank of the Euphrates). In the caliphate of 'Omar, in the spring of the year 17 (638), the Byzantine Emperor Heraclius made the last effort to regain the province of Syria, which had been lost to the Muslims. For this purpose he sent a large army which included Iyâd along with the tribes on the Euphrates and Tigris to Hibûn, the siege of which was begun. In the meanwhile the Muslims invaded Mesopotamia and conquered Takrit, secretly supported by the Christian Arab soldiers in the city, among whom were Iyâd, who then adopted Islam. When the Moslem tribes besieging Hibûn heard of a raid into Mesopotamia and the approach of an army, they abandoned the Byzantine army in order to defend their threatened homes. The Arabs in Khinnân, Harb, and other Syrian cities, who had previously joined the Byzantine army, negotiated secretly with Kâlid b. al-Walid and attacked the Byzantines, who were beaten and had to take to flight. The remnants of the Byzantine troops including Iyâd retired to Cîlicia, whither they were followed by the Muslims and almost entirely wiped out. When in the following year 18 = 639, Iyâd b. Ghânam succeeded Abû 'Ubayda [q.v.] as governor of Hibûn, Northern Syria and Mesopotamia, all the Moslem tribes submitted and adopted Islam with the exception of the Iyâd, who fled to Cappadocia in Asia Minor. Here, however, they only enjoyed their security for a brief space, for the Caliph 'Omar demanded their extradition from the Emperor Heraclius under a threat of reprisals against the Christians in his provinces, and Heraclius was forced to agree. Four thousand of the Iyâd then went to Syria and Mesopotamia and submitted to the Caliph. In later times we hear almost nothing of them.

After studying in his native town he went in 567 (1114) to Cordova where he devoted himself particularly to Hâdîth and attended the lectures of Abû Muhammad 'Abî 'Allâh b. 'Attab and Abu 'l-Walid Ibn Rûmân. His life lasted a hundred. He returned to his native town and held the office of Kâdî where his administration was much appreciated. In 531 (1136–7) he became Kâdî of Cordova but after a time again became Kâdî of Cûta. He was one of the first to welcome the arrival of the Almoravids and went to Salã to pay homage to their chiefs, but when he saw in 543 (1148–9) that the Almoravids dynasty was weakened by discords he fled from his native town and took refuge in Marrâkûsh, where he died and was buried near the Bâb Ailân.

IYAD b. MUSA — IZMIR.

IYAS b. MU‘AYNA was appointed kâdi of Bašra by ʿOmar b. ʿAbd al-‘Azîz and died at the age of 76 in 121 or 122 (739-740). He has be-
come proverbial in Arabic literature on account of the many examples of ready wit and intuiti-
on (azkanu min ḫiyâṣ, Freytag, Prov. Arab., i. 593) related of him, which were collected by so-
early a writer as al-Madâ‘înî in a work (Zakân ʿiyâṣ). In this way he has become a familiar figure in literature (cf. R. Bassel, Revue des Traditions papouases, vii. 1937).

rrî, Com. on al-Ḥarîrî, Majmî‘at (vii.).

IZMID (older forms: IZNÜMÎD; İZNİMD; in Ibn Khordâbwheb and Idrîsî: İKÜMİDAYA; in mo-
ternal times officially written İzmîr), the ancient Ni-
cmeida, capital of the ancient Lias (nûzərîrîpîk) of the same name (cf. Kôdîa-III). The town was taken by the Saljûqis on their invasion of Asia Minor at the end of the 11th century and belonged to the lands of Salâmîn b. Kutlumûsh (470-479 = 1078-1085) who had chosen Nicaea as his capital; shortly after his death it was recaptured by Alexius I Comnenus (Anna Comnena, ed. Reifferscheidt, i. 212, cf. 247, ii. 72) and, apart from the brief period when the Latin Emperors of Constantinople held the town (1204-1207), remained in possession of the Byzantines till it was taken from them by the Ottomans under Ürğânî, according to the Turkish sources, in 727 (1325-26) or 726 (1326-7) or 731 (1320-31), according to Byzantine sources, in 1338, cf. v. Hammer, Gesch. des Osm. Reiches, i. 85 and 580; (for the legends associated with the Turkish conquest see Leucclavis, Hist., p. 186-
90; Sa’d al-Dîn, i. 34-37; Christo Papadopoulos, p. 65 sq.). In 1399 Marshad Boucicaut had to turn back from the strong walls of the city (J. Dela-
ville Le Roux, La France en Orient au XIVe Siècle, p. 371); in 1402 it was sacked by a body of Timur’s troops (Ducas, Bonn ed., p. 72). Under Turkish rule İzmîd acquired special importance as an arsenal for the navy and as a yard for building small merchant vessels from the wood supplied by the rich forests of the neighbourhood. The arsenal, said to have been founded by the Kö-
prîli’s, abandoned since the middle of last century, was to have been restarted again by English engineers. The population of the town may be put at 25,000, of whom the majority are Muslims, and the non-Muslim element is represented by a strong Armenian community (which immi-
gated from Persia at the beginning of the 18th
century), several hundred Greeks, and a small Jewish community. Since 1873 İzmîd has been connected by rail with Constantinople (terminal station Hai-
dar Paşa; distance 70 miles) and since 1892 with Angora. — Only insignificant ruins exist of the ancient and mediaeval buildings; the Byzantine for-
tifications on the hill are better preserved, which Busbecq and Belon still saw in their original form in the xvith century. Of the Turkish buildings we may mention the madrasa founded by Salih al-Or-
în in the upper city (originally a church; restored by ‘Abd al-Maqlîd); the mosques of Per-
tew Paşa, Muhammed Bey and ‘Abd al-Salâm Bey, built by the architect Sinân, the baths of Rustam Paşa and the Khan of Pertew Paşa. The pleasure palace with park (zîrâ‘ baghîsî) built by Murâd IV has disappeared; another was built by Muhammed II and restored by ‘Abd al-
‘Azîz. Among the Greek churches the oldest is that of St. Panteleimon, said to be also the tomb of this patron of the city; destroyed in the reign of Murâd IV; it was rebuilt in 1760 and again restored in 1861. In the Chapal al-Chams (Çick Mevâidî), where Emerich Thököley, prince of Transylvania, spent his last years, till his death on Sept. 13, 1705 in a voluntary exile (De la Motraye, Voyages, i. 309; Paul Lucas, Voy. dans la Grèce, l’Asie Min., etc. Amsterdam 1714, i. 49); his remains buried in the Armenian cemetery were brought to Hungary in 1906 with his tombstone (cf. von Hammer, Ümlblick, p. 192).

( J. H. MOROTTMANN.)

IZMIR (SMIRNA), the most important commercial town in Asiatic Turkey and the residence of the Wali of the province of Aidin. The form İzmir (in İbn Baṭṭûta: Yâmîn) corre-
sponds to the form used by Westerners in the middle ages, Smir, Zmirra, etc. (Tomaschek, p. 28; Esmirî in Ram Muṭanîr, c. 202; İsmîrî in Schilbierger). On the incursion of the Saljûqis into Asia Minor at the end of the xith century the Turk Turşus (Tayzâk, only in Anna Com-
nena), the father-in-law of Kılıçdâr Arslân I, who lived in Nicaea, established himself in Smyrna and undertook from there his campaigns of conquest against the islands of the Archipelago and the Hellas: it was only after the Saljûqis were driven from Nicaea (June 1207) that Smyrna was restored to Byzantine rule. John Vatazes Dukas, emperor of Nicaea (1232—1255), laid out the great system of defences on the Pagus hill (Corp. Inscr. Græc. N. 8749), which commands the town. After the dissolution of the Saljûq king-
The town was twice visited by earthquakes and almost destroyed. In the first, which took place on July 10, 1688 (Râmasân d. 12, 1099), the Sandjak Ka‘fesî was overwhelmed by the waves, most of the buildings collapsed, and thousands of people — at the lowest estimate 5,000 — perished among the ruins (Kâshîd, Ta‘rîhî, i. 147; Rycaut, Tur- kish History, p. 301 sq.; Carayon, Relations inédites des Missions de la Compagnie de Jésus, p. 291 sqq.; Pacificus Smit, Vier jaren in Turkije, p. 178 sqq.; 246 sq.; De la Motraye, Voyages, i. 182 sq.; Slars, p. 76, 128). The second took place on July 3 and 5, 1778 and did equal damage, chiefly through the conflagration which broke out among the falling buildings (Bjornstahl, Briève, iv. 131—147; Slars, p. 132 sq.). Almost equally dangerous was the rioting which broke out on March 14, 1797 as a result of a quarrel between Cephalonians and Croats, and spread fire and death through the town (Djewdet, op. cit., vi. 220 sqq.; Zinkeisen, op. cit., vii. 13 sq.). During the war of the Porte with Egypt, on Febr. 19, 1835, emissaries of Ibrahim Pasha, after he had defeated the Turks at Könya (21 Dec. 1832) and advanced to Kütâhya, occupied Smyrna for MuhammadAli but retired again after a few weeks (Rosen, Gesch. der Türkîke, i. 171).

Smyrna is singularly poor in historical monuments. Nothing worth mentioning is left of the remains of antiquity. The amphitheatre and the circus, in which St. Polycarp, the patron saint of Smyrna, suffered martyrdom, were destroyed in the xvith century and the materials used to build the Bezesten and the Wazîrhân (v. infra). The alleged tomb of Polycarp near the circus was changed into the grave (turbe) of a Muslim saint at the beginning of the xvith century. The Byzantine castle on Mt. Pagus has for years been abandoned and left to decay; the old mosque and the great cistern (kârîk direk), both presumably of Byzantine origin, are in ruins, and the historical foundation inscription of John Vatatzes, as well as the ancient colossal head of the so-called Augustus, which was formerly built into the wall over the entrance gate of the castle and formed the badge of the town, have in recent times been ruthlessly destroyed. The Turks considered this head to he that of Kaidafâ, queen of Sabba and therefore called the castle Kaidafâ Ka‘fesî, which in the popular language has been corrupted into Kâfîdî Ka‘fesî (Velvet Castle). Among the numerous mosques (ca. 20 large, dîjmî, and 46 small, mardhî) the following are specially mentioned: Hîşar Dîjmî (said to be the old Frankish cathedral), Shadrewân Dîjmî, Kestânepârâ Dîjmî (traditionally said to have been at one time a Greek church), Kemer-alî Dîjmî, Hâdidî Hzâsîn Dîjmî; the large Wazîrhân and the Bezesten were built in the years 1546 and 1547 by Grand Vizier Ahmad Köprülü. Other old kânîn (warehouses) are the Derwisbegli Khân, Madama Khân, and the Kânî Əlhamn-zâde Khân. A peculiarity of Smyrna are the numerous arcades of the Frankish quarter, the so called Ferîkhânîn (corrupted from Frenkhhânîn). In the year 1108

dom of Könya, Aidin, Amir of Ephesus, seized the town about 1320, and it once more, as in the days of Tzachas, became the base for piratical raids against the islands of the Archipelago and the merchant ships of the Franks. To put an end to such naval powers concerned combined under the aegis of the Pope and stormed Smyrna on Oct. 28th 1344 (Heyd, Histoire du Commerce du Levant, i. 538). The Knights of Rhodes, to whom the defence of the town was entrusted, built at the harbour the fort of St. Peter, near the later customs-house, which survived up till about fifty years ago. The citadel, on the other hand, remained in the hands of the Aidin-oglu; Bayzad I, who dispossessed them, installed a sâhibî (city governor) there. It was not till January 1403 that Timûrânrek stormed the Frankish fort and drove the knights out of Smyrna (Şurar al-Dîn, Zafaranma, ii. 484—477; Dukas, p. 72 sqq.; Chalkokondylas, p. 161, cf. von Hammer, Gesch. d. osman. Reiches, i. 332 sq. and 626 sq. After the withdrawal of Timûrânrek from Asia Minor the adventurer Djiunâd [q.v., i. 1063 sq.] seized the town; on his overthrow, about 1425, the town passed definitely under Ottoman rule.

The further history of the town is of little general interest. On Sept. 13, 1472, Smyrna was attacked by the Venetian fleet under Pietro Mocenigo, plundered and set on fire (Hopf, Chroniques Gréco-Romanes, p. 207; Cippico, Delle Guerre dei Veneziani nell’Asia, p. xxvi sqq.; Zinkeisen, Gesch. d. osman. Reiches, ii. 405). In the later wars of the Turks with the European powers, the latter, in view of the numerous European inhabitants have repeatedly refrained from attacking the town, for example the Venetians in the autumn of 1694, when after the fall of Chios the Turkish fleet had retreated before them into the Gulf of Smyrna (Kantemir, Gesch. des Osman. Reiches, p. 649; Zinkeisen, op. cit., v. 175) and the Russians in 1770 after they had destroyed the Turkish fleet near Çeçme (Ypsilanti, Ta mêrî ta’rîx âlmosîn, p. 466 sq.; cf. v. Hammer, Gesch. d. Osman. Reiches, viii. 358). As a defence against such attacks from the sea, the town after the battle in the Dardanelles (June 26, 1575, iv. 567), in which Venice built defences at the narrowest part of the Gulf on Cape Sandjak Burnu, called Sandjak Ka‘fesî (saluting fort) or Venîkâîfî, which was completely destroyed by the earthquake of July 10, 1688 and then imperfectly rebuilt. In modern times the batteries were remounted and mine barriers laid during the recent wars.

From the land Smyrna has been repeatedly ravaged by the turbulent Djîalî and Ra‘îa, who were a plagia to Anatolia from the beginning of the xvith century, e.g. in 1600 by the hordes of Kalenderoghlu and Kara Sâdî (Sandys, Travailles, 6th ed., London 1658, p. 12; cf. v. Hammer, op. cit., iv. 398), 1625 by Djennet-oglu of Karasi (Roe, Negotiations, p. 410; Zinkeisen, op. cit., iv. 55 sqq.), and in 1767 by Serbey-oglu of Köhînâs (Pococke, ii. 2 p. 38; Isplanti, op. cit., p. 334).

Equally dreaded were the regular visits of the Barbary corsairs, who till the conquest of Algeria by the French had the permission of the Porte to recruit their crews from Smyrna and the neighbouring (Dumont, Voyages, 1699, iv. 106 sqq.; Tournefort, ii. 198; Dijewdet, Ta‘rîhî, iv. 23; vil. 183, x. 233). The Jewish community of Smyrna produced in the xviith century the Messianic he-

retic Sabbatai Șebî, the founder of the Dönme [q.v.] sect (crypto-Jewish Muslims), which is still represented by a small body (cf. the contemporary narrative of Rycaut, the English consul at Smyrna, the continuation of Ktôles, History of the Turks, ii. 174 sqq.).
(1696—7) a mint was instituted in Smyrna to strike ducats (asbrātī) and silver piastres (abrākī); it closed after a few years however (Raaβ, Tuβrīkī, i 2262; cf. Isma'īl Ghālib, Tažvīnī-i Mesūlīkāt-i 'Othūmīnīye, no. 597—600). Its great importance as a place of export for the products of the soil and industries of the interior (guns, figs, cotton, poppy seeds, opium, valonia, licorice, carpets, etc.) was attained by Smyrna in the xvith century. The goods of more distant lands, e.g. Persian silk and the camelots of Angora in those days and down to modern times found their way to the west via Smyrna. Numerous English and Guelf merchants settled there and the English colony had a distinguished part in the development of the country, economic and cultural. Trade with Persia and Angora resulted in a considerable immigration of Armenians. The Jews (Şehārdīm) had the exclusive right to serve as brokers. The Europeans lived in the Frank quarter and conducted themselves there with the same freedom as in their own land. They were later joined by a strong community of trading Greeks, while the Muḥammadan element was gradually driven into the back ground. Gaur Izmir ("ünafīd Smyrna") therefore became a name of the town; the quarter of the town inhabited by the English and already so called by Timūr's time in contrast to the suburb of which remained in the hands of Muslims (Izmîr-i Gâbūr in Şaraf al-Dīn). — The present population is estimated at about 300,000, of whom 90,000 are Muslims, 110,000 Greeks, 30,000 Jews, 15,000 Armenians, 55,000 foreigners, including 30,000 Hellenes.

IZNIK, the ancient and Byzantine Nicaea (Νίκαια in Ibn Khordādhbih and al-İdriṣî), was besieged in vain by the Arabs in their first campaigns against Byzantium in 717 and 725 (Theophanes, ed. de Door, i, 397 and 405 sqq.) and fell at the beginning of 1018 into the hands of the Saldjuk Salujmân, son of Kûtûmlûsh, who made his residence there. The first Crusaders under Walter Habenichts were severely defeated before Nicaea in 1096 by Alp Arslân, son and successor of Salujmân; next year, however, the town could not withstand the onslaught of the Crusaders, led by Godfrey de Bouillon, and surrendered on June 19, 1097 to the Byzantines in alliance with the Crusaders, in whose possession it remained till the Ottoman invasion. Sultan 'Othmân I is said to have attacked Nicaea, but it was not till the time of Orkhan that it was taken after a prolonged siege in 1331; he moved his capital thither for a time (Ašḥăk-paşazade and Leunclavius, Hist., p. 195; cf. Nicephoras Gregorios, ii, 508 sqq.). In 1402 the town was taken and devastated by a raiding body of Timūr's troops (Ducas, p. 72; Şeref al-Dīn, Zağvānumā, ii, 454 sqq.), but it soon recovered from this blow, and it is described as flourishing and prosperous at the time of the rebellion of Prince Muṣṭafâ (Leunclavius, Hist., p. 525, l. 46); Bâyiāzīd II is said to have intended after the death of his father, Muḥammad II, to renounce the throne and retire to Nicaea.

The decline of the town began about the middle of the xvith century; the population then estimated at 10,000 (Gretel) has since sunk to 1500. The once flourishing manufacture of faience tiles (imīr), which Otter (Voyage en Turquie, i, 44) still found working in 1736, has now ceased. Only a slight memory of it, no longer understood, remains in the name İznik (or Cin İznik, "faience İznik"), which the town popularly bears. The present village occupies a small part of the area described by the town walls and forms with its district a community (mâzkâya) of the Kašā of Yenişehr, in the wilâyet of Khudawendi (Brussa), while İznik was formerly the capital of a kašā of the sâlet of Kôşâ-cheli. The general decay has also affected the ancient buildings. The best preserved are the Roman and Byzantine walls consisting of a double rampart (best described by Prokosh and Texier; cf. thereon Körte, Mitt. des Deutsch. Arch. Institutes, Athens, xxiv, 398—409) with their monumental gateways and 238 towers (Texier). The Byzantine part of these defences dates from the time of Leo III the Isaurian, who had them built here after the Arab invasion of 726 (Corp. Insbr. Grec., no. 8864); Michael III in 838, and later Theodore Lascaris (Corp. Insbr. Grec., no. 8745—8747) completed and improved them. Of the foundations of Sultan Orkhan only a madrasa is preserved in the xvith century; the mosque (restored in the xvirh century by Sinân for Salujmân I) has with its imārât been dismantled for centuries; of the buildings of the family of Dândarli Khair al-Dîn Pasha, the Yeshil Dijâmi (built in 780—794 A. H.) and the mosque of Mukûrine Khaṭūn, dedicated to Esrefzâde Rûmi (flourished in the reign of Muḥammad II; cf. Mitt. d. Seminars f. d. Sprachen zu Berlin, v. 2,
are tolerably well preserved; the tomb of Eshrefeide is still a much visited place of pilgrimage. Of the three churches which the Greeks still had at the end of the xvi. century (Crusius, Turcogracia, p. 204), those of St. Theodori and of St. George have disappeared; the third, that of the Καθεδρική Παναγια, restored in 1607, is a Byzantine building of the 16th century with additions of the 18th and of interest on account of its old mosaic decorations.

On the Greek Church: Oskar Wulf, Die Konsistore in Nicaea und ihre Menäken, Strassburg 1903; also: Α’ Κωνσταντινουπόλεως εἰς Νησίαν ὑπὸ τὸν Καβανέρα Μαρκουζά, Constantinople 1909.

Izrail. (In European literature one also finds Astrail), the name of the angel of death, one of the four archangels (next to Djielbrīl, Mīkhāīl, Astrail). The name is perhaps a corruption of a word which is given by Eisenmenger, Eudekräfte Judentum, li. 333, as the name of the prince of Hell. Like Astrail, whose office of trumpet-blower at the last judgment is sometimes given to him, he is of cosmic magnitude; if the water of all the seas and rivers were poured on his head, not a drop would reach the earth. He has a seat (parv) of light in the fourth or seventh heaven, on which one of his feet rests; the other stands on the bridge between paradise and hell. He is however also said to have 70,000 feet.

The description of his appearance agrees almost exactly with that in Jewish literature: he has 4000 wings and his whole body consists of eyes and tongues, the number of which corresponds with that of the living. He however, is also said to have four faces. At first he was an angel like others. When Allah wanted to create man, he ordered Djielbrīl to snatch from the earth for this purpose a handful of its main constituents. The earth, however, stirred up by Iblis, offered resistance, so that neither Djielbrīl, nor Mīkhāīl nor Astrail could carry out the commission. But Izrail managed to do it.

On account of his hard-heartedness (fiṭlat al-rehnuma) Allah then appointed him angel of death.

On account of his strength he is also master of death. When Allah had created Death, he summoned the angels to look at him. When they saw his astonishing strength, they fell down unconscious and remained lying for thousand years. Then they awakened and said: "Death is the most powerful of creatures". But Allah said: "I have appointed Izrail to be lord over him".

Several angels of death are mentioned, as in Jewish literature. One said that Izrael deals with the souls of the prophets while the souls of ordinary men are under his khaṭiṣr. Special stress is laid on the beginning of Sūrah Ixxix, as authority for a number of angels of death: "By those who tear forth and by those who draw forth" etc. The former are said to be those angels who drag the souls of the unbelievers by force from their bodies, while the latter are meant those who have to separate the souls of the believers from their bodies. The explanation of the verse however is not certain. In Sūrah xxviii. 11 mention is made of the angel of death (in the singular).

Izrail keeps a roll of mankind. But he does not know the date of death of the individuals. Whether one belongs to the blessed or the damned, he sees from the fact that the names in the first category are surrounded by a bright and those in the second by a dark circle.

When the day of a man’s death approaches, Allah causes to fall from the tree below his throne the leaf on which the man’s name is written. Izrail reads the name and has to separate the person’s soul from his body after 40 days.

But there are some people who strive against the separation, and object that the angel of death is acting arbitrarily. The latter then goes back to Allah and asks his experience. Allah gives him as a credential an apple from Paradise on which the kasmala [q.v.] is written; when the man sees this, he yields.

Man also has other means of making it difficult for the angel of death to carry out his task. If the latter wants to creep into his throat to fetch out his spirit, the dying man recites a ḏikr [q.v.] and thus closes the entrance. The angel then returns to Allah, who advises him to try it with the dying man’s hand. If the latter however is just making a ṭadak [q.v.] the angel’s entrance is again impossible. Finally however Izrail writes the name of God on the man’s hand. Then the bitter feeling of separation disappears and the angel can enter to fetch the spirit. — On the other hand, it is also said that he pierces men with a poisoned lance. Another account is as follows: When a believer is on his deathbed, the angel of death stands at his head and draws his soul out as gently as water runs out of a skin. He hands it to his assistants who carry it through the seven heavens up to the highest and then place it with the body in the grave (the soul’s journey to heaven; cf. Bousset in Archiv f. d. Religionswissenschaft, iv.),

But if an unbeliever die, the angel of death tears the soul out of his body in the roughest fashion. The gate of heaven closes before the soul, as it is carried up, and it is thrown down to earth again. Characters like İdris, Iyās, İsa and al-Khādir [q.v.], as is well known, were not subject to death. As regards Moses the same thing could not be asserted; but the Bible throws a veil over his death. Muslim tradition accordingly says that Moses defended himself against the angel of death, who came with the fatal message to him, and bruised his eye. Allah said to the angel when he came back:
If he places his hand on a cow, as many years are to be granted him as his hands covers hairs'. "And then?" asked Moses. "Death," said Allah. — It is also related that the angel of death came to Moses with an apple from Paradise; when he had smelled this, he died.

On an experience of Solomon's with the angel of death, see al-Baidawi on Sūra xxxi. 34; on his visit to Idrīs, see that article.

IZZ AL-DAWLA, honorific name frequently assumed by Muhammadan princes, e.g. Bakhtiyar[i.e.v.].

IZZ AL-DIN, honorific name, for princes often combined with the preceding (Izā al-Dawla wa Dīn). However, not only princes bear this name, but scholars also.

IZZET MOLLÁ, KECİDDİ-ZADE MEHMET, 'Izzet Efendi, an important Ottoman statesman and poet in the reign of Mahmūd II. Born in 1200 (1785-6) in Constantinople, the son of the kâdıl-asker Şəlîh Efendi, he devoted himself to a theological and legal career, following in his father's footsteps. When he had reached the position of Mollá of Galata, he was subsequently involved in the fall of his patron Hayet Efendi, as he had written satirical verses on his behalf. He was therefore banished to Keşhān near Rodosto. Pardoned a year later he regained Sultān Mahmūd's favour, who chose him as a statesman. 'Izzet received the highest religious offices. In 1245 (1829-30) he acted as a representative at the peace negotiation with Russia. His openly displayed bias in favour of peace at any price brought upon him the enmity of the war party, whose intrigues succeeded in getting him banished to Siwās. There he died soon after his arrival in 1245 (1829-30), of poison, it is said. One of his sons is the statesman Fuʾād Pasha.

In addition to numerous chronograms he composed two diwāns, Behār-i Efkar (Springtime of Thoughts), concluded about 1240 (1824-5) and Ḩaḍān-i Aṯār (Autumn of Actions), only put together after his death. Neither transcends mediocrity. 'Izzet however won great renown through his two romantic Mathnawi: Gürben-i Aškaš (Rose-garden of Love), completed 1227 (1812), lithogr. Constantinople 1263, is a short romance on the old Persian model with a strain of Mevlewi mysticism. The subject matter shows a pretty and original imagination. Still more attractive is his thoroughly characteristic Mathnawi composed during his exile in Keşhān with the ambiguous title Miḥṣir-Keşhān ("The Sufferer" or "Suffering in the place of exile at Keşhān"). This is the poetical diary of an exile, in which ghazals, iṣṣāds and chronograms are scattered through the Mathnawi verses, and it gives an interesting insight into the world of ideas of a highly educated dignitary of the time and especially truthfully reflects provincial life in European Turkey at the period of the beginning of Mahmūd's reforms. The work, the language of which is already remarkably national Turkish and is interspersed with Turkish every-day idioms, secures 'Izzet Mollá a distinguished place among the reformers of the language and the modernists. It was lithographed in 1269 at Constantinople. Zīyā Pasha also published it in his Khaṭlabā. Türk Mathnawiyat (1292).

IZZI (WAGHATU SULĀMĀN ʿIZZI EFENDI); Turkish historiographer-royal and poet. He was the son of Khalil Agha, commander of the Balaḏji Guard, and of Khadija, daughter of Ahmad III, and entered the Imperial Diwan as secretary. In 1156 (1745) he was appointed the seventh holder of the office of historiographer-royal (waḵaʾi-niswās) in succession to Šuḥbī. In 1160 he became master of ceremonics (tekhirfāt). He died in Djamād II 1160 (March/April 1755) and was buried beside Şahīkh Murād-zāde, who had initiated him into the Naḵṣbandi order. 'Izz left a Diwan and a chronicle covering the years 1157–1165 (1744–1752). It was printed in 1199 (1784) as a continuation of Šuḥbī's history. 'Izz's prose is more praised than his poetry. But his style is the most exuberant and to us the most unpleasing of all Ottoman historians. His fondness for chronograms is notorious. He enjoyed a considerable reputation as a calligrapher.

J.

JACOB. [See ISRĀIL.]

JAEN, situated at the foot on the north east of the Tabalcauz (= Džabal Kūz), west of the Guadalbullón, is a capitol (1700 feet above sea level; 30,000 inhabitants) of the Spanish pro- vince of the same name (300,000 inhabitants), the area in which the Gandalquir-Baetis takes its rise in Upper Andalusia; Andalusia in
the narrower use of the word (el Andalucía) compr-
ishes the whole basin of the Baetic and its tri-
butaries and from west to east includes the five
modern provinces of Huelva, Cádiz, Sevilla, Có-
doba and Jaén, while Andalusia in the wider sense
includes also the ancient kingdom of Granada, fi-
ally reconquered in 1492 by the Reyes Católicos.
Feuding for the Ferdinand III the Saint, with the
modern provinces of the Mediterranean, Málaga,
Granada and Almería, so that greater Andalusia
 corresponded to the ancient classical (Provincia
Hispania) Baetica.

The name Jaén is derived from the Arabic
Dhīyān (in Spain pronounced Džayyín with
imāla [q.v.]), the origin of which is unknown (old
Spanish usually Gien), as Dozy’s derivation from
U-cien-se (Edrisi, Descr. de l’Afrique et de l’Es-
pagne, transl., p. 248 sq.) seems impossible to us,
especially as the ancient Útica is rather to be sought
on the Baetis itself near Andújar. Jaén is rather
the ancient Auriga or Flavius Aurigiunum, which
still survives in Ávila (Yaşküt, ed. Wüstenfeld,
i. 400, ii. 186), if we read Ávira instead of
Amarsha. Ávira-Jaén is said by Yaşküt to
be the capital of the Kūrāt Dhīyān, also called
simply al-Ḥadīra, the capital. At the Arab con-
quest, the province of Jaén was colonized by im-
migrants from the Persian Dhīdīr [q.v.] of Kinnasrin.
The most celebrated among its numerous scholars
is the grammarian Ibn Mālik [q.v.].

The history of Jaén is naturally closely bound
up with that of the adjacent capital of the western
annate and caliphate of Córdova, after the fall
of which it formed for a time a small kingdom
of slight importance until in 1248 it was con-
quered by the Ferdinand III the Saint, of Castile.
In D. Miguel Lafuente Alcántara’s Historia de
Granada, based quite uncritically on Conde, the
history of Jaén as well as that of Málaga and Al-
mería is superficially discussed.

JANINA (澂接纳人, Yenova, turkish Yëniva)
town in lower Albania, on the west bank of
the lake of the same name, at the foot of Mount
Mitrikēlís, 1900 feet above the sea-level. It was
formerly the capital of the vilâyet of the same
name. The palace of the Pasha and two of its
mosques are situated on a peninsula which runs
out to the middle of the lake. It was defended
by several forts. It replaced the ancient Do-
dona which had become the see of a bishopric,
and the ruins of which are still to be seen 12 miles away;
after the invasion of the Goths under Totila in
551, it took the name Joannina, derived from
that of St. John (ς Ἰωάννης) who had be-
come the patron saint of the town. In the reign
of Sulṭān Murād II, after the capture of Salonika,
the deputies of the town offered to surrender
Janina to him, if he allowed the inhabitants to
enjoy their privileges and liberties. The Sulṭān
accepted their conditions, received the keys of the
town and handed over to the deputies a khaṭṭ-i
sharif, signed with his own hand (1st Safar 835 =
9 Oct. 1431); it is said that the ceremony took
place at a place near Salonika called Khlīd (key).
Eighteen officers under the charge of Simān Beg
were ordered to take possession of the town and
to build outside the walls, in accordance with the
treaty, the houses they were to build; in spite of
the pledge, the commissioners had the care of
St. Michael in the middle of the town demolished
and the fortifications dismantled; taking advantage
of a festival celebrated in the church of the Pan-
tokrator, they attacked the crowd and carried off
the daughters of the best families. Janina had no
particular history till the time when ‘Ali Pašha
of Tepe-Dilen [see ‘ALİ TEPEDillow], desiring
to escape from the yoke of the Sublime Porte,
made it his capital. He brought prosperity and
life to the town, protecting agriculture and com-
merce. The siege of 1236 (1820) ruined the
town. Of the 16 churches which formerly
existed only six are left. The mosque of Arsān
Ağha was built in 1712 on the site of the an-
cient builtika of St. John; many ancient columns
are still found there. Other noteworthy buildings
are the Bairaḵāy Džāmī (the "mosque of the stan-
ard"), built by Bāyażid II, and that of Muş-
taşa Effendi. Besieged by the Greeks at the end
of 1912 it capitulated on March 6, 1913, and was
definitely ceded to Greece by the Turkish Empire
(Treaty of Athens, Nov. 14, 1913).

Local industries include the manufacture of
blankets called velōnza, fine carpets, a serge called
shahāz, slippers called yaniya torşy, mir-
rors, gold and silver thread, and garments em-
brodered with gold for the use of the Albanians.
The population was given as 16,230 in 1874
by L. Moreau, French vice-consul in Bull. de la
Société des, Geogr., 6th Ser., xii. (1876), 543 sqq.,
cf. Peterm. Mitt., suppl. Vol. xii. 42 sq. and
supra i. 4515.

The former province of Jannina comprised the
sandjaq of Yanniya, of Ergeri (Argyrokastro), of
Preveza and of Berat, and also, before the cession
of Thessaly to Greece, that of Tīrāla (Trilkala).

(C. F. Sjövold.)

JANISSARIES (ﾂ黒人, yeniği, "new
troops"), the name given to the regular in-
fantry created by the Ottoman Turks in the
sixth century, which became their principal
force and rendered possible the vast
conquests made in this and the following centuries.
Their organisation goes back to Sulṭān Orkān
(1266 = 1326), son and successor of Othmān, his
brother and prime minister ‘Alī al-Din, and Kara
Khalīl Cendereli [see CENDERLERL], brother-in-law of
Shāhād Edebbī. Before this time the chief Ottoman
troops were, as in the Persian armies, bodies of
horsemen called ahvānji (light cavalry); they were
supported by infantry called in Persian piyānda and
in Turkish şeye (foot-soldiers) who, although
organised in companies of ten, a hundred, and a
thousand men were in reality mere levies without any
great cohesion. It is Kara-Cendereli's merit that he created regular regiments of infantry at an age when mediaeval Europe was still at the stage of armed bands, before the organisation of the companies of archers in England, and a century before the first standing armies in France under Charles V. It was very profitable to the conquerors with the legions of the Byzantines, although far sunk from their former glory, that gave the Turks the idea of supporting the Turkoman cavalry with well-trained infantry. But recruiting for the latter was carried out on entirely different lines, of which, moreover, the Janissaries are the only example in history.

In the article DEWSHURM [q. v.], it has been explained how the Ottoman government used to levy from Christian peoples conquered by them a tribute of children, who were converted to Islam and educated in special schools and continued to be regarded as slaves of the sovereign (hâl; the children of J. swaris were proscribe to native in the Barbary regencies and their descendants are called hul ogâsh "sons of slaves" [cf. i. 260b, 271a]). An institution of this kind was contrary to Muslim law which does not allow a sovereign to force the dînmî [v. DİMMÂ] to give their children into slavery; the Turks who were in the service of the 'Abbasid Caliphs came from captures made on enemy territory (dâr harb) and not from conquered territory (dâr islâm); it was only possible to form the Janissaries by an act of the ruler ('urf), in disregard of canon law (şarî'at).

From the first the new troops were under the patronage of the dervish Hâdidê Bektâsh and regarded as related to the religious order which he had founded. (cf. Bektâsh and Hûrûfîs); as headgear they were given a bonnet of white felt; to which there was attached behind a piece of cloth in memory of the bizzathia, during which the saint had left his sleeve hanging on the back of his flocks. This bonnet had a wooden spoon as a badge. The names of the officers were taken from various departments of the kitchen: törbası-bashy (chief soup-maker), aşîl-bashy (chief cook), as we shall see later. The most sacred object in the regiment was the great cauldron of bronze (bûzavân) around which they assembled not only at meals but also to take counsel. Upsetting the cauldron was a sign of revolt, which became more frequent in course of time when, from the reign of Sultan Muhammad IV (1051—99 = 1641—57), the ancient practice of dewshirim fell into disuse.

The corps of Janissaries was called onja, "hearth"; it was divided into several tactical units called orta, "regiment", fixed in number and of varying strength (according to the period, 100, 500 and up to 3000 men); these orta were lodged in barracks called ada "rooms" (East Turk. otak). In the field the regiments encamped under huge round tents on which were embroidered their distinctive emblems. Numbering 165 at first, the orta were increased in number to 196, not including 59 orta formed by the Ademî ogân [q. v.], as dîjmeât, "reunion, assembly" comprising 101 orta; 2. bolik, "division", comprising 61 orta; 3. şîghân, "hunters, hound-keepers"; popularly called sîmen, to the number of 34 orta.

This corps was commanded by a general with the title yenî-işeri-âghasy, "agha [q. v.] of the Janissaries", who had a special residence in the capital and offices where the business of the corps was conducted. The Sultan was not obliged to choose him from among the officers of the onja. He was also in control of the police and of the maintenance of order in the capital; he was always followed by âides-de-camp carrying the jûlayg (see Veliêkerê). In war this general was preceded by a white standard surmounted by a horse-tail (gêşê) and followed by footmen (têşît), having the tails of their robes tucked up and fastened in their girdles. — The şîghân-bashy was originally, as his name indicates, the chief of the şîghân; but as, in time, the orta of the şîghân were placed under the direct command of the agha, this post lost some of its importance; however when the agha set out for war at the head of the onja, the şîghân-bashy acted as his deputy in the capital with the title kûmû-nâmûmân. The kûlaya, "superintendent of the slaves", commanding the bolik, was also adjutant to the agha; in war he was chief of staff of the corps; he enjoyed great influence, being the first to the post by the Janissaries themselves and having the right of reporting the matter to the agha, to appoint subalterns of a rank lower than that of the törbası. The other general officers of the corps were in order of precedence, the türbağdî-bashy, "chief of the bloodhound-keepers", commanding the 64th orta; the mûşir-agha, "chief of the uşers", who represented the interests of the corps with the Grand Vizier; the senior and junior hâşêkî, "charged with special duties", who were sent into the provinces to settle questions concerning the orta there; the bâsî-bashy, "chief of the sergeants", commanding the 5th orta, the crier of the council, who carried out its decisions and enrolled the recruits; the kîlaya, "lieutenant of the intendânt", representing the kûlaya with the agha, who transmitted the latter's orders to the provinces; the kiştîh, "secretary", who had to keep the registers called kûlîh, "tree-trunk".

The officers of each orta were 1. the törbası, colonel of the regiment, an expression which has survived in vulgar Turkish with the meaning "notable of a village"; 2. the onja-bashy, "chief of the barric-room", adjutant to the preceding, who kept order on parade and saw that the rules were obeyed; 3. the wâble-bashy, "controller of expenditure", who looked after the rations; 4. the bâraofâr, "standart-bearer"; 5. the bâb-bashy, "chief of the veterans", the oldest soldier in the orta, who enjoyed great consideration on account of this title; as he was in command of the kara-bal, "guards," he was also called bâb-kara-kolûkü; 6. the aşîl-bashy, "chief cook"), the quarter-master of the regiment, having under his command the yames, "assistants", who were also head of the guard-room and of the prison of the regiment; his sign of office was a large knife; 7. the sîghân-bashy, "chief water-carrier".

The offensive and defensive weapons of the Janissaries varied at different epochs; we shall give here a few indications of their nature taken from Djeväd, from a stock-taking made in the depot for old arms (Museum of St. Irene) in Constantinople; sling, bow and arrows (employed alongside of fire-arms until 955 [1548]), according to Şolak-Sâde, Târîf, 200, 474, but kept as a sport down to our own times in the clubs of the archers called kemân-kesh; at the old exercise ground at the Oğ-Meşdan marble pillars mark the
distance of the Sulṭān Mahmūd II's shot; claw-footed and screw-jack and winding arbalests (tārā-śky), javelin (qerid), matchlock, flintlock, blunderbuss (cf. Montecuilli, Mémoires, Bk. II), pistol, bayonet (introduced in 1151 = 1739, then dropped and taken up again in 1168 = 1755), maces (gûzâ, lâshif, şvettek, şwhips, flails, axes, scythes, hammers, bills, straight swords, for one or two hands, sabres (kûlyî, şâla, yataghân), daggers (șama), lances, bucklers, coats-of-mail covered in places with metal plates, helmets of copper or steel (the peak in imitation of the shape of a fez, terminating in a sharp point).

Each orta had an emblem which was placed upon its flags as well as upon the doors of the barracks; the Janissaries also had a habit of tattooing it on their arms and legs. Promotions in rank were always made by seniority. The Janissaries were only punished by their own officers; the punishments were imprisonment, the bastinado and death; in the last case the execution took place secretly in the yard at the back of the barracks. The body was thrown into the Bosphorus with a cannon ball at its feet; a cannon shot however announced the execution of the sentence. Soldiers who became old and infirm or disabled, were retired with a pension; they were called ortaşak.

The admission of foreign elements, outside of the recruits from the ranks of the ʿadżemi-ogluhan [q.v.], gradually caused the corps of Janissaries to lose its value; the origin of these abuses dates back to the Sulṭān Murād III, who in 950 (1582) forced the olğah in spite of the regulations and in spite of the resignation of the agha Ferhid, to receive into their ranks acrobats and wrestlers who had amused the people at the festivities on the circumcision of the prince who was later to become Sulṭān Muḥammad III. Since then individuals of every kind, to gain the privileges of the corps succeeded in gaining admission to it by patronage or purchase. In 1153 (1740) the authority to deal in salaried offices (şahfü) which anyone could buy or sell, completed the ruin of the Janissaries as a military force. Those who were really soldiers no longer drew their pay but lived by exactions; soon hardly a dozen were found in every body of police to keep order in the streets and take their pay from the passers by.

Mutinies were frequent under the pretext of claiming an accession gift (bâkhiṭik) which the Sulṭān used to distribute to the troops on his enthronement, since the abortive attempt, energetically suppressed, which the Janissaries made against Sulṭān Muḥammad II, on the occasion of his second reign (985 = 1451). From the time of the assassination of Sulṭān Oṭhūmān II (1031 = 1622) the Janissaries played a part in politics, terrorised sovereigns, made and unmade grand viziers. They served as the tools of the factious, who remained in the background, escaping responsibility. The only exception was the glorious reign of Murād IV (1032—49 = 1623—49) who restored their discipline. The unfortunate wars against Russia at the end of the xviiith century persuaded the authorities that they ought to replace this obsolete and degenerate institution, incapable of reforming itself and ready to impede all progress, by new military formations. Sulṭān Selim III, acting on the decisions of a grand council, decided to form a regular army on the estate of Lévent-Cıflık, lying on the heights of Orta-koğ and Arnaut-koğ (Bosphorus, on the European side) under the name of nişan-i-ğeladi (new organisation). This attempt at reform, unpopular and opposed by the Janissaries, who did not wish to submit to military drill, led to the rebellion of Kâbaḵiṭ and the imprisonment of Selim III in the Serā, where he was not long in being assassinated. Bairâḏdīr Paşa in vain gave the name şebān to the new militia, he had resolved to form, for it did not survive its creator.

Sulṭān Mahmūd II finding himself pressed by the Russians, Egyptians and revolted Greeks, resolved to take up his brother's plans again; he created a body of regular soldiers who were called eikheneti “active soldiers”, reviving an old designation given to the Janissaries when on active service; but the announcement of the beginning of regular drill provoked a mutiny (9th Dhū l-ʿKaḏa, 1241 = 19th June 1826) on the Et-Maḏān (the men-square) in the centre of the barracks. The Sultan at once went in a caique to the Serā, consulted the ʿulemā, brought out the standard of the Prophet and summoned the Muslim population, victims of the exactions of the Janissaries, to come and fight them. The gunners and marines of the navy, formed one column, the bombardiers and sappers formed a second and marched on the Et-Maḏān. The great gate was barricaded but soon fell before the cannon; the barracks were set on fire and the rebels overwhelmed. A great assembly, whose decision was ratified by an imperial firman, pronounced the complete suppression of the Janissaries. Since then the Ottoman empire has been able to create a regular army modelled on these of Europe.

In this connection I take the opportunity to mention Djowād, Toškīrī, Aškârī, ʿAshmidī, French transl. by G. Macrid, Etat militaire ottoman, t. i. (all issued, with atlas, Constantinople 1882); Esṭad-Elendi, ʿUsīr Zafar, trad. fr. par Caussin de Perceval, Précis de la destruction des Janissaires; J. von Hamm, Des osmanischen Reiches Staatsverwaltung u. JAPHE. [See YAPÈLE.]

JAVA, the most important island in the Malay Archipelago, 2,390 geographical square miles in area, in 5° south. Lat. is oblong in form, as it lies with Sumatra and the Little Sunda Islands on the southern Sunda fold mountains [see İNDES (DUTCH)]. In contrast to the western (Sumatra) and the eastern (Timor) end, the oldest rocks on the island of Java are entirely covered by tertiary and later volcanic products and coral limestones. The latter shows that the island was at one time for the greater part sunk below the sea-level and was afterwards raised at least 4,000 feet; the former come from the 109 volcanoes of the island of which 13 are still ac-
tive, and cause by their weathering the great fertility of the plains and of the slopes of the volcanoes. The two groups of rock are fairly equally distributed in the mountains of the island. Flat country is found almost only along the northern coast as the swell and the depth of the Indian Ocean prevents its formation in the south. The rivers are very numerous, almost all flow north and are of no great length. They are therefore of no importance for navigation except the largest, such as the Solo or Bengawan and the Brantas in Eastern Java. But they give the water to irrigate the ricefields and are therefore of economic importance.

The oblong shape, the fertility and the excellent climate of the island have all contributed much to its great economic development. As early as the beginning of the sixteenth century a road was made along the north coast for military purposes by Governor-General Daendels. Since then there has developed the system of roads between the chief towns of the interior, which has been supplemented in the last quarter of last century by railways. At the end of 1917, the state railways in the west amounted in length to 1240 kilometres, in the east to 980, and in Central Java there is a privately owned line 262 kilometres long. The tramlines of the whole island measure 2135 km. (1 km. to each 28.4 sq. km. and to 7350 inhabited).

On the north coast there are harbours at Tandjong Priok near Batavia and at Surabaya and in the south at Jatilatap. Other trading centres like Tjirébon and Sémaring in the north and Patihan in the south have only natural roadsteads.

The island of Java enjoys a very favourable tropical climate without excessive heat or drought. The average temperature of the coast towns is 26°—27°C., the daily and annual variation does not exceed 5°C. The monsoon climate of the Dutch Indies [q. v.] prevails here only in a modified form; as it becomes narrower towards the west, Western Java enjoys a more regular rainfall than Eastern Java, where during our summer months little rain falls in the plains. The annual rainfall amounts in low-lying districts like Batavia to at least 80 inches and rises to 178 inches at a height of 975 feet at Buitenzorg, while in isolated estates in the northern mountains of Central Java up to 360 inches is recorded. Its climate and fertility give Java a luxuriant vegetation which in the west displays the character of the tropical rain forests and towards the east with trees like Tectona grandis (teak) and, in the cool zone, with pines like Casuarina, approximates to the monsoon forests. In consequence of the dense population and the European settlements these forests have been almost entirely uprooted except in the southwest and east, and therefore great floods occur in the rainy season. The high slopes of the mountains are well fitted for intensive agriculture, of which the tropical zone (in West Java up to 2100 feet and 27°—23°C. temp.) bears plants like rice, sugar-cane, tobacco, coffee, indigo, rubber, sweet potatoes, palms, screw-pines and mango trees, the subtropical (up to 5000 feet and 23°—18°C.) plants like tea, coffee and cinchona, European potatoes and vegetables, the cool (up to 8200 feet and 18°—13°C.) coffee, oaks and other trees of temperate climates. Above 8200 feet, mosses and lichens are found. The fauna of Java belongs to the Asiatic zone of India [v. INDIA]. Among the larger kinds are apes, tigers, panthers, rhinoceros, wild cattle, deer and wild boar.

The earliest mention of the name Java is found in a passage in the Kambayana which Kern dates about 150. There Yavadvipa appears as the island of gold. About the same time Ptolemy (vii. 2, 29) mentions the island of labaduni as very fertile and yielding much gold. He interprets the name as barley-island, which is literally correct, but as barley does not grow on Java, the equally possible interpretation millet island may be more appropriate. How far these names agree with the modern geographical denotation is not clear. Java and Sumatra or a part of it are apparently regarded as a whole. (Cf. H. Kern, Java en het Goudeland volgens de oudste bronnen, and De naamooorsprong van Java, in Verspreide Geschriften, v. [The Hague 1916], 303—21). In the old Javanese inscriptions of King Er-Laiga of the 1031 the name is Yawa and in the Kavi poem Nagarakretagama (1565) Java alternates with Yawa as the name of the island.

The oldest Arabic source in which we find the name Džawa seems to be Yākūt (d. 676 = 1228) Madīm. But here as in some other sources it is not quite clear, what is to be understood by it, as the mention of an article of export like camphor points to Sumatra. From the time of Ibn Sa'īd (viii—xixth century) Džawa is usual as a name for Sumatra (Rashid al-Din, Abu 'l-Fida, Ibn Battūta), but in 'Ali Ra's (1554) we find Džawa for Java. But so early a writer as Ibn Khordâbîbîh (272 = 885/6) gives Džaba as the name for the island of Java (ed. de Goeje, trans. p. 46) and it is found in several later works (Ibn Wâsif Ṣāhâ, al-lirdsi, al-Kazwini, Ibn al-Wardi, Ibn Khalîdîn). The name Jawa is also chanted in the name Zâbadāh, which most probably arose out of Džawaga (Javaga) and means Javanese (Malay) (see H. Kern Versp. Geschriften, iii. [The Hague 1915], 283 sq., and Jabudies in Bijdragen tot de Taal-, Land- en Volkenkunde van Nederl. Indië, 7th Ser. iv [1905], 365 sq., cf. thereon C. Snouck Hurgronje, Een miëgende Arabische paleisal, in Tijdschr. voor. Ind. Taal-, Land- en Volkenkunde, xlviii [1906], 85 sq.). Al-Zâbadâh however refers sometimes to Central and South Sumatra and sometimes to Java and occasionally comprises the whole archipelago. Cf. on the above: Relations de Voyages et Textes géogr. arabes, persans et turcs relatifs à l'Extrême-Orient du VIIIe au XVIIIe siècle, trans. by G. Ferrand, ii., Paris 1913—14; G. P. Koutser, Artikel Techten (Oudste Ontdekkingen) in Encycl. van Nederl.-Indië, 1st ed., iv. 363 sq.). See also the article DžAWA.

The trading journeys made by the Hindus along the coast, in dependence on the monsoon, to the Malay archipelago on the way to the Spice Islands, touched at this island also, which soon came to bear their most important colonies, presumably because of its fertility and the shelter offered by its north coast. The great accessibility of the interior enabled the Hindu peoples to settle here also, and thus their power and culture expanded quite early over this Malay island. A Chinese source mentions the presence of Hindus on the island of Java in the year 132 A.D. (cf. G. Ferrand, Le K'ouen-Louen etc., Journ. Asiatique, 11th Ser., xiii. 155 sq.). At a later period the Chinese Buddhist Monk Fa Hian says that in 414 A.D. he found many Hindus but few Buddhists on
this island, which he calls Ya-va-di. This Hindu period comes down to Portuguese times but offers great difficulty to the historian as literary and oral traditions have been distorted almost to unintelligibility by fantastic additions. The best data are afforded by the numerous ruins of temples, statues, copper plates (often charters of endowment) and bronze objects with inscriptions and dates, which are found principally in central and eastern Java. They are even sufficient to enable us to sketch the changing political conditions in this Hindu period. Only a few engraved stones are older than 760 A.D., and some copper-plates from Central and Eastern Java, of which the oldest are one of the year 732 from Central Java and another of 760 from Eastern Java.

Numerous inscriptions dated later than 760 exist and are evidence of a flourishing state of Hindu civilisation in Central Java which lasted to the year 860. Eastern Java then came into prominence. It has been established that the celebrated kings Sindok, Airlangga and Djïayâ-Bâyâ ruled here in the 10th, 11th and 12th centuries. In 1222 the king of Singasari, Parameswara, was defeated by the ascendency over that of Daha in Kâdiâri. In 1294 arose the kingdom of Mâdjâphahit in Surabaya, which afterwards became a great power in the Archipelago. The latter existed down to the beginning of the 14th century.

The temple ruins by their situation and architecture considerably increase the importance of these facts. They may be divided into two groups, an older in Central Java and a younger in East Java. Both are rich in marvellous buildings, which however are executed in different styles. In Central Java they are built of tuff and are closely related to Hindu architecture in British India; in Eastern Java, on the other hand, they are mainly of bricks, and here a more independent Javanese style has developed, which shows Chinese influence.

Of the latter we only know that the Emperor Khuâbilai of China in 1293 sent a military expedition to East Java, which was only partially successful. We have only a few small antiquities from Western Java.

In Central Java are the ruins of the Buddhist temples of Bârâ Budur, Tjandi Mêndut, Tjandi Kalasan, Tjandi Sari, Tjandi Sêwu and the Siwaike Tjandi Frambanan. In Eastern Java the most important are Tjandi Panataran, Tjandi Singksari and Tjandi Tumpang or Djâgâ. Ruins like those of Bârâ Budur are among the most beautiful Buddhist ones. From the mixed character of their very numerous statues of gods and religious and profane reliefs it is clear that, as still the case on the island of Bali [q.v.], Brahmanism and Buddhism on Java were closely connected and existed side by side. The Buddhism of the Javanese at that time was of the Mahâyâna school.

In addition to these remains in stone, numerous objects in bronze, gold and silver, such as statues of deities, temple bells, plates etc., are found buried in the ground. Only few remains of secular buildings, of royal palaces, have been discovered; probably they were of wood and other perishable material. (Cf. on archaeology and epigraphy, the works of Cohen Stuart, H. Kern, J. Brandes and N. J. Krom).

The above remarks show us how highly developed must have been the civilization and how flourishing the prosperity of the island to enable so many costly works to be erected. In view of the lengthy period of their existence in Java it is not surprising that these Hindu kingdoms exercised a transforming influence on the Javanese culture. We shall probably not be wrong if we assume that the Javanese at the beginning of the Hindu period were probably in about the same stage of culture as the modern Dayaks or Toraja. It seems however certain that even then they knew how to grow rice on irrigated fields, as the technical performances in this connection are not of Sanskrit but of Indonesian origin. But it must have been considerably advanced by the Hindus.

The formation of despotic Hindu kingdoms among Indonesian tribes organized on a patriarchal system was also of economic importance, as on the one hand it abolished the great insecurity and seclusion of these tribes and secondly brought the masses of the people under the rule of their kings and nobles. The latter brought about the development of native arts and crafts whose ornamental motifs are still Hindustic. That architecture and sculpture were greatly stimulated by the use of temples and statues, and their disappearance after the introduction of Islâm, Foreign trade arose through connections with the outer world in the West, and Java became the centre of the wholesale trade in spices, precious stones, timbers, resins, etc.

The Javanese still use an Indian alphabet and the vocabulary of their language contains a large number of Hindu words and expressions. The introduction of writing was of the greatest importance for the advancement of civilization and it is based the literary development of the modern Javanese.

When the Brahman sects finally attained preponderance in the island of Java, they gradually introduced the caste system in the form in which it is still found on the island of Bali. With the introduction of Islâm this distinction of the classes disappeared. The gulf that exists between the common people and the nobility and official classes with the princes at their head and the submissiveness of the former must be regarded as consequences of the caste system. They are foreign to the aboriginal Indonesians.

Islâm spread to Java from Malacca, into which it had been introduced by merchants from India (such as Persians and Gujaratis), and was predominant in the beginning of the 14th century. Besides the Malays, after the rise of Malacca, Malay traders also by their residence in Java created an opening for Islâm. Around the families founded by such merchants at the ports, communities of native believers gradually grew up, which finally developed into small states. Influential traders no doubt succeeded in entering into close relations with princes of the seaports through marriage, whereby Islâm could gain influence in the upper circles. The relations of the Mâdjâphahit kingdom to its vassal states also gave occasions for the advance of Islâm: it is often reported that princes of Mâdjâphahit married Muslim princesses of conquered or allied states. At the same time commerce between Java and the states dependent on the island (Pasei) and an important commercial town like Malacca contributed to no small degree to the spread of Islâm. In the last named place there was about 1500 large settlements of Javanese who were for the most part Muslims, according to Portuguese accounts. The latter no
doubt influenced their mother country in religious matters. Influences like the above were of all the more effect in a period when there was no strong central authority in the kingdom of Majadapahit. Following the trade route Island first gained a footing on the coast of Eastern Java. There, in the xvitl century, Tuban was the most important harbour of Majadapahit and in the following century the most important commercial town next to Gréisk. The oldest relic of the Muslim settlement in Java is the tomb of a certain Fathima bint Maimun, d. 475 or 495 (1082/3 or 1101/2), in Leran. The tomb of Malik Ibrāhim in Gréisk dates from 522 (1419); according to native tradition, he was a merchant. According to a statement of a Chinese Muslim, there were in 1426 not yet any native Muhammadians, but a settlement of Muslims who had come from the West and a group of Chinese, some of whom were converts to Islam. In view of the position of Island in the Moluccas about 1450, it is very probable that about the same time the Muslims "were beginning to assert their influence in Java also in the coast region from Djapara (?) to Surabaya, Tuban and Gréisk particularly". In the course of the next fifty years the communities of native Muslims with the support of immigrant Muhammadians developed into small states on the coast, which soon endeavoured to assume authority over Eastern Java. (On the above cf. B. J. O. Scholte, Het Heiliglandse Suwun, Leiden dissertation, Utrecht 1916, p. 39 and the literature there quoted; H. Kraemer, Een Javaansche Prinsdom uit de Zestiende Eeuw, Leiden diss., 1921.)

Legend ascribes the conversion of Java to Islam to the joint activity of eight or nine walis. The names of these saints who are called by the honorific title suwan (jisuhunum) and are usually named after their place of burial or activity, are as follows: (1) The already mentioned Malik Ibrāhim (also called Māuliāna Maghrabi) who died in 1419. (2) Sunan Ngumpel (Raden Rahmat) who about 1450 married a princess of the family of Tjaparan, Tuban and died about 1470. His tomb is in Ngumpel, among the descendants of Sunan Ngumpel's marriage with the Tuban princess and born probably about 1465. His activity in Tuban, probably as head of the Muslim community there, must fall between 1475 and 1500. He perhaps lived to about 1525. His tomb is shown in two different places (cf. Schrieke, op. cit., p. 39 ff.). (4) Sunan Giri (Raden Paku), who is considered the ancestor of the so-called priest-kings of Giri and whose tomb is on the hill of Giri near Gréisk. (5) Sunan Gunung Djati, who left his native place Pasai in 1521 and after his studies in Mecca came to Djapara and probably about 1528, had great success with his religious teaching and he married a sister of the king of Dêmak. He then went to Bantén, where with the help of his brother-in-law he succeeded in gaining power. In 1527 he took Sunda Kelapa from the king of Padjadjaran, at whose expense he gradually extended his power. He finally settled in Tjirebon where he died about 1570; his tomb is to be seen near by on the hill called Gunung Djati. (See Hoesain Dja'adininger, Critische Beschouwing van de Sadjarah Banten, Leiden Diss. 1913, Haarlem 1913, Index s. v. Goe-noeng Djati). 6. Sunan Kudus, buried in Kudus (Res. Sémârang). 7. Sunan Muria, called after his tomb in the Muria Hills (Djapara). 8. Sunan Drajat, a second son of Sunan Ngumpel; his tomb is in the desa Drajat on the road from Tuban to Sedaya. 9. Sunan Kalî Djaga, whose tomb is in Kadilangu (Sémârang) (on him cf. Hoesain Dja'adininger, op. cit., Index). - These nine, it should be noted, are also given with partly varying names (cf. the article Heilig in Encyclopaedie van Nederlandsch-Indie, ii., and the literature quoted there).

About 1520 a coalition of Muslim kings of the coast states under the leadership of the king of Dêmak, Raden Patih, destroyed the Hindu Javanese kingdom of Majadapahit. An attempt made about 1546 to conquer Pasuwan did not succeed. It appears certain also that the kingdom of Dêmak was overthrown by that of Padjang (c. 1568) and the latter again by that of Mataram (c. 1580), out of which the present "Vorstenlanden" of Central Java have arisen.

For the development of political and religious conditions among the Javanese of the xvitl and xviiit centuries Mataram has undoubtedly been the most important sultanate. It was brought to its greatest prosperity by Tjâkrâ Kusumâ (1618-1646), also called Sultan Agung after 1641, and extended its rule over almost the whole of Java. During his reign there existed in the West the independent sultanate (since 1631) of Bantén and the sultanate of Tjirebon dependent on him. The kings of Giri-Gréisk at this time had great religious prestige.

By Agung's conquest of the Northern ports of Lasîm (1616), Tuban (1618), Gréisk (1622), Surabaya (1625), and Madura (1627), and by their destruction, the foreign commerce and the shipping of Java received a severe blow, which was not repaired by the foundation of the state harbour of Djapara.

The European competition of the Dutch, English, Danes etc. was thereby much encouraged. By the foundation of the town of Batavia in 1619 on the site of the former Sunda Kelapa or Djapara the former obtained a commercial and political centre in the vast area of the despots of Mataram, who had as little success in driving them out by a siege in 1628/1629, as had the Bantênes of the West.

The histories of the Javanese kingdoms of Mataram, Tjirebon and Bantén since that date show us classical examples of the destructive influence of the unbridled passions of their rulers and the latter's officials. Agung's kingdom suffered already from his many costly conquests, his successors and their relations only enriched to increase their revenues and gratify their lusts. Domestic conflicts in the royal house itself and several wars with enemies outside incited thereby, weakened the kingdom more and more.

These circumstances had consequences which were of interest to the "Nederlandsche Generale Geocroyeerde Oost-Indische Compagnie", founded for trading purposes only and managed from Holland, and were important for the development of modern Java. These and the endeavour to maintain a monopoly drove it to a policy of conquest, which became one of the main causes of its decline at the end of the xvitl century. As early as Sultan Agung's death in 1646, the Company made a treaty of mutual support with his successor Amangkurat I. The latter in 1677 found himself forced
to call for the Company's help when pressed by the Madurese and Macassarese. He died a fugitive and his son Amangkurat II was only able to ascend the throne with the help of the Dutch Company. The kingdom was next shaken by two wars of succession (1704–1706 and 1746–1755). When the three claimants to the throne were all maintaining their position in the field during the latter of these wars, the Company found itself forced to divide the kingdom of Mataram between two of them in 1755. Thus arose the kingdom of the Suhuhuns of Surakarta and of the Sultans of Djokjakarta. In 1758 the third pretender had to be pacified, by granting him the semi-independent position of a prince Mangku Negara. At that time the Dutch East India Company already possessed the North coast of the Mata-
aram kingdom and the central part of the West down to the South coast. Up to the end of the eighteenth century the influence of this trading company on native culture remained relatively small, as their officials only dealt with the natives as far as was necessary for the compulsory deliveries of agricultural products by the kings and the monopoly of imports of clothes, opium, etc.

In the course of the sixteenth century, when the kingdom of the Netherlands had assumed the suzerainty in the Indian Empire of the East Indian Company, the conditions of life among the Javanese population have altered very much. Having English rule 1811–1830, the sultanates of Bantun and Tjiribon in the West were completely incorporated in the territory of the Indian government and considerable stretches in Central and East Java. The foundation of the independent kingdom of Paku Alam (1813) also broke the resistance of the Sultan of Djojokarta. When, after the rising of 1825–1830, the present residences of Banyumas, Bagelen, Madian and Kediri were incorporated by the Dutch in their territories as a war indemnity, only 7% of the surface of the island remained to native princes. As they have since then been still further restricted in their powers, the situation of the masses of the people has been much improved. Before this can be judged, we must deal with the population. It consists of 33,000,000 natives, 318,700 Chinese, 72,700 Europeans, 29,370 Arabs and 3000 other foreigners; with a population of 254 to the square kilometre it is therefore one of the most thickly populated parts of the earth's surface. If we consider that in the first and second decade of the sixteenth century, the Governor-Generals Daendels and Raffles estimated the native population at four and five millions and that this enormous increase has taken place without immigration, its explanation certainly appears desirable.

The foreign inhabitants of Java, if we except those only temporarily settled there, are for the most part half-breeds, sprung from intermarriages with native women. The Japanese are included with the Europeans. The Chinese, whose families in many cases have been living for centuries in Java, come from the South Chinese province of Kwan-Tung, the Arabs from South Arabia (Hadramawt) and the other foreigners from British India. With a very few exceptions, all came with the object of earning a living by commerce or industry, and they often succeed very well.

The natives with few exceptions (Baduy in the West, the majority of the Tenggerese in the East and the Christian Javaneses) are all Muslims. Their languages, customs and phyletic divide them into three groups: in the West the Sun-
danese, in the Centre the Javanese, in the East the Madurese. The differences are to be ascribed more to the influences of foreigners (Hindus) and surroundings, than to race. They all belong to the Malays of the Archipelago, but those in the West were less exposed to these influences than those in the East and Centre. The Sundanese therefore remained truer to the original type and more accessible to Islam. The Madurese on their relatively less fertile island have devoted themselves less to agriculture than to cattle-rearing and fishing and formerly to piracy, and thus became more energetic, vigorous and ruder than the Hindu-
ized Javanese. In Western Java the latter only spread along the North and East coasts, while the Madurese are found in East Java in the residencies of Besuki, North Pasuruan and East Surabaya also. The native populations of the large towns like Batavia and Surabaya deserve special mention; in these commercial and administrative centres of the Dutch the native population arose out of traders, slaves, soldiers, political internees of the most varied origins in the course of the last three centuries. As the language formed here has become the lingua franca (Malay) of Euro-
peans and natives for the whole archipelago, these conditions are of special importance.

The natives are an intelligent, circumspect, easily contended, agricultural people who cling firmly to their traditions. They are fond of festivals, games and the use of opium, which sometimes are lead to abuses. The long period of despotic rule has divided the people into two classes, the princes with the nobility and officials on one side and the bulk of the people on the other, and has caused a very complicated system of ceremonial to grow up, which has laid a firm hold on all their customs and also finds expression in their language. The subservience of the masses to their superiors is a further result of these political conditions. In keeping with their geographical situation the Ja-
vanese are more submissive than the Madurese and Sundanese. The awakening of Eastern Asia is now being felt even in Java.

The despot was possessor of the soil, granted it to the peasants in return for half the produce in kind and in addition levied taxes in labour and produce on his people regularly and irregularly. His relations and officials were granted lands, and in the Vorstenlanden, where this system still prevails, these have since the beginning of the sixteenth century been let more and more to European planters. Outside these principalities, the possession of land is private among the Madurese and Sundanese and partly communal among the Javanese. The most popular crop is rice, grown on inundated fields; other food-stuffs are sweet potatoes, beans, spices and fruits; for export tobacco, coco-nuts (copra), cotton and kapok are grown. Of all these a number of varieties are known. The rearing of cattle and buffaloes is only subsidiary to agriculture. The horse is used for riding and as a beast of burden but is also eaten like the sheep and the goat. All these domestic animals except cattle were imported from Asia. Hunting as a means of livelihood is of very subordinate importance. The same applies to fishing in the rivers and in the sea. Many fish are reared in artificial ponds of fresh
water or on the seashore. The wholesale traffic of the island is in the hands of Europeans and Chinese, the retail is mainly carried on by Chinese and a few natives, and the huckstering in the markets is mainly in the hands of native women.

Javanese industries consist of handicrafts almost exclusively concerned with supplying local needs. Weaving and iron-smelting have decreased very much owing to the large imports of clothes, raw iron, and articles of iron. A few genuine Javanese arts like the making of krises (daggers), the manufacture of copper musical instruments and ornamental articles of copper, wood carving and baticking of cotton clothes are still practised. Only a few of their products such as brass gongs and batik clothes are exported. They bear witness to the abilities of the Javanese in these fields.

The language of the Javanese has developed out of the Old Javanese (Kawi) of the pre-Majapahit period and the Middle Javanese current down to the new Kingdom of Mataram. At the courts of the Hinduistic princes the vernacular was frequently used for the adaptation of Indian and indigenous legends; when poets and men of letters of the Muslim kingdom of Mataram continued in this way, the contents of those literary products became modified, but the language remained Indonesian under these Hinduistic and Muhammadan influences. Both in vocabulary and subject matter the very rich Javanese literature has adopted much from Hindu and Muhammadans. Javanese literature contains the modern Javanese recensions of the products of three periods. From the first came Kawi poems like the Arjunawiwaha, Nalagarakrigama, Bharatayuddha (an adaptation of the Mahabharata) and Ramaaya in addition to mythological poems like the Manus-Maya on creation and mythology, and Bandung and Adip Saka which contain the mythical history of old Java. The versions of the Mahabharata are prose works from this period. From the second period comes the Pandjic cycle which celebrates the chivalrous, sentimental love of the Javanese prince Parangtritis for the princess Angrani and his adventures. To the third period belong the Menak Hames, a work of Muhammadan Malay origin, which deals with a Muslim hero endowed with supernatural powers who only achieves his wonderful deeds through his belief in Allah. The Javanese chronicles or Babad's are in rhyme but are of no poetical value, and they are only of historical value when their writers are describing their own experiences. Ambiya contains the Javanese recension of the Muslim legends of prophets. The history of Moses is given in a prose work Radja Pirangon. In addition to the epic the Javanese have also developed poetry (Wulang Rei; also the beast fable with the dwarf deer, kanjiil, as the main character). Poetry is principally cultivated at the Javanese courts, but a good deal is composed elsewhere also. The lack of Javanese prose works is striking. (Cf. also under Indies (Dutch), p. 493 sqq. and Malay).

In the West of the island the language is Sunda and in the East Madura, both languages closely connected with Javanese and having a similar literature, which however in keeping with the less refined civilisation of the Madurese and Sundanese shows a simpler character as regards form and matter. On account of its general interest the language of the town of Batavia and the surrounding district deserves special mention.

The Islam of the native population possesses the same characteristics as have already been described under Indies (Dutch) and indicated in its most important features for the island of Java. It is so important in the lives of the natives up to the highest classes of society that the prevailing political and economic conditions can only be understood if full account is taken of it. This Muhammadanism is grafted upon animism which often appears under Hinduistic forms.

From the economic point of view, agriculture, by far the most important industry, shows most significantly how powerfully the animistic mental attitude makes itself felt. As a result of lack of knowledge of the real conditions of growth, it causes and maintains the neglect of good tillage, of careful choice of plants, of care during growth and precautions at harvest time. Agriculture also labours under the burden of the many animistic sacrificial festivals and ceremonies, which are given a Muslim significance for the people, because a religious person prays for Allah's blessing at them. The yield of all native crops is therefore much smaller than it would be under European management. It is the religious significance of agricultural customs to the natives that forms a great obstacle to their improvement under European guidance. The government has seriously attacked the question of the study and advance of it. It is similar with cattle rearing; with the help of the ruling and other native chiefs, very satisfactory results have been obtained in Central Java in improving the breed of cattle and their care.

Politically Islam is only of importance so far as its teaching regarding infidel rulers makes it appear a subsidiary factor in all troubles which arise out of economic or political grounds. Further, the belief in the personal help of the Almighty and his saints, in amulets, in invulnerability etc. leads in local disturbances to the phenomenon so inexplicable to Europeans, that sometimes a very small number of people, often lead by a gurun, vigorously resist the authority.

The rule of the Dutch is to the advantage of the natives of the Archipelago in several respects, as has already been mentioned at the end of the article Indies (Dutch), and on p. 578. As regards the island of Java, in the last fifty years, economic conditions have largely contributed to this result. The very dense population of the island could not possibly support itself on the yield of their fields and other sources. But in addition there have arisen the constantly increasing sources of revenue which the natives owe to the plantations of tropical products of the Europeans. What huge sums are involved may be gathered from the amounts paid out in wages and rent to the natives by the sugar industry, which moreover is the most highly developed one.

If we consider all these facts together with what has already been said under Indies (Dutch), the astounding increase of the population of Java in the last century will be understood. It could only have been attained however by the fact that marriages are general and early among the natives.

As regards administration, the islands of Java and Madura differ from the other islands (Buitenbezit-tingen); the civil officials are accordingly divided into two classes. There are 17 residencies in Java and
Madura and in districts under European residents and assistant-residents who have controllers under them. Alongside these, the native officials with their regents at their head form the link with the people. The often peculiar organisation of the 32,000 native villages has been left untouched as far as possible.

The native princes occupy a special position. The four kingdoms arose out of that of Mataram, as was briefly outlined above. The residency of Solo or Surakarta contains the kingdom of the Susuhunan of Surakarta and in the South that of the Pangeran Adipati Arya Mangku Negara: the residency of Djokjakarta contains the kingdoms of Djokya or Djokakarta and of Pangeran Arya Paku Alam in the South-West.

Justice is administered with slight exceptions, in the native states as well as in Java and Madura, by jurists trained in Holland.

Public instruction in the present century is being continually extended by the government, missions and private persons. In the larger places, Dutch is often the language of instruction (at the end of 1917 in 5 secondary boys' schools and two secondary girls' schools and in 198 elementary schools with European teachers). The education of the natives was conducted in 150 schools in seven year courses with Dutch, and in 991 schools in four year courses. There were 4815 village schools with three year courses, 1853 schools for Chinese and 30 for Arabs.

*Jeremiah, the prophet.* His name is vocalised in Arabic *Irmiya, Armia* or *Ermiya* (see *Tadj al-Arbii*, x. 157) and these forms are occasionally given with *madd* also (*Irmiyā*).

Wahb b. Munabbih gives an account of him which turns upon the main points of the Old Testament story of Jeremiah: his call to be a prophet, his mission to the king of Judah, his mission to the people and his reluctance, the announcement of a foreign tyrant who is to rule over Judah, Jeremiah then rends his garments and curses the day on which he was born; he would rather die than live to see this. God then gives him the promise that Jerusalem shall not be destroyed except at Jeremiah's own request.

Bukht Nasār then attacks the city on account of the increasing sinfulness of the people. God sent an angel in the form of an ordinary Israelite to Jeremiah to find out his opinion on the fall of Jerusalem. He twice sent the angel away to enquire how the people were behaving. The latter returned with the worst reports and communicated them to Jeremiah who was sitting on the wall; the prophet called out: O Lord, if they are on the right path, let them live, but if they are on the path of evil, destroy them! Hardly had he spoken these words than God sent a thunderbolt (sibla) from heaven which laid the altar and part of the city in ruins. In despair Jeremiah rends his garments, but God said: 'You yourself gave the word'. He then realised that his companion was an angel in disguise. He fled into the desert (Tabari, i. 658 sqq.). — The second episode in the Muslim legend of Jeremiah refers to his meeting with Bukht Nasār. The king found the prophet in prison in Jerusalem, where he had been interned on account of his prophesies of ill fortune. Bukht Nasār at once released him and showed him honour. He thereafter remained in Jerusalem with the miserable remnants of the population. When the latter besought Jeremiah to implore God to accept their repentance, God said to the prophet: 'Tell them only that they are rabbani here'. They refused to do this and took Jeremiah with them into Egypt (Tabari, i. 646 sqq.). According to Ya'qūb, Jeremiah had hidden the ark in a cave before Nebuchadnezzar's entry into the city. — The third episode runs as follows. When Jerusalem was destroyed and the army had retired, Jeremiah came back riding on an ass. In his hand he carried a bowl of grape-juice and a basket of figs. When he stopped at the ruins of Iliya (Aelia), he became irresolute and said: 'How can God call all this to life again?' God thereupon deprived him and his family of life. After a hundred years had passed, God awakened him and said: 'How long hast thou slept?' He replied: 'A day'. God then told him what had happened and brought his ass to life again before his eyes; the grape-juice and the figs had remained fresh. God then granted him long life; he appeared to men in the city and in the desert (Tabari, i. 666). Of the first two episodes one can say that they are a development of Biblical statements. The third however is based on an misunderstanding connected with Sīra ii. 261: 'like him who passed by a city which had been laid in ruins; then he said: How could God revive this after its death? Then God caused him to die for a hundred years; He
then wakened him and said: "How long wast thou dead?" He said: "A day or so." He replied, "Nay, a hundred years; look on thy food and thy drink; they are not corrupted; and look on thine ass: we will make thee a sign unto men: And look on the bones, how we will join them together, then clothe them with flesh".

The commentaries on the Qur'an identify this doubling man with various Old Testament figures, including Jeremiah. But we know that the story in Oriental legend was associated with 'Ebed Melek, who appears in the story of Jeremiah (Jeremiah, xxxix. 16 sqq.; cf. The Paralipomena of Jeremiah the Prophet, ed. Rendel Harris). The confusion of Jeremiah with 'Ebed Melek has apparently given rise to another one. 'Ebed Melek, according to the Jewish view, is one of the immortals who never saw death. In Muslim legend al-Khadr is one of the immortals. This is probably why Wabbi b. Munalibih explains al-Khadr, "the green", as an epithet of the prophet Jeremiah. This also explains the emphasis laid on his retirement to the desert where, as in the towns, he sometimes meets men; for this is a statement which elsewhere refers to al-Khadr in contrast to Ilyas [q. v.] who is the patron saint on the sea.

K.

KA‘ANĪ, ḤABĪB ALLĀH, a modern Persian poet, son of the versifier Mīrzā Muḥammad Ḥabīb-Allāh. Born at Shihrūz, he was court poet to Muḥammad Shāh, successor to Fath Ḥājī Shāh (1250–64 = 1834–48) and to Nāṣir al-Dīn Shāh. He was very precocious and attracted attention from the age of eight. His father died when he was eleven (Perīḵān, Bombay, 1277, p. 19) and he had to go to Khurāsān to complete his studies. Prince Shudjā al-Saltāna Ḥasan ‘Alī Mīrzā, governor of Mashhad, took him under his protection. This was the beginning of his good fortune. In addition to the three classical Persian languages, he learned French. He was addicted to opium but was not guilty of debauchery. He died at Teherān in 1270 (1854). He left a collection of anecdotes in prose and verse entitled Kiṭb-i Perīḵān, "Book of Scattered Leaves", a parody of the Guliśtan of Sa‘di (lithographed at the top of an edition of the Divān, Bombay 1277, and separately at Teherān in 1302, and a Divān containing his collected poems (lithographed at Bombay 1277, 1298, 1306 and at Teherān in 1277).

He is incontestably the greatest of the modern poets of Persia, and is perhaps the most witty of all Persian poets. His irony is deep and biting, unfortunately it is often coarse.

(Çl. Huart.)

KA‘ARTA, the region of the French Sudan between the upper waters of the Senegal and the Sahara. The boundaries of Kaarta are

in the north the land of the Dowahī Moors and the Hōdh [q. v.], in the east Bakalima, in the south Beledugu and Fuladugu, and in the west the Senegal from the western branch of the Kula pool to the confluence with the Baulé. It is a vast schistose plateau inclining towards the S. E. so that the majority of its rivers run towards the Senegal. The climate is that of the Sahelian zone: a very short rainy season followed by long periods of drought; the showers are not abundant. Surface water is rare, hence the settlements have clustered round wells which serve to irrigate gardens, planted with millet and vegetables. Although the country is steppelike in character, it is not yet unsuited to agriculture. Stretches of soil on the banks of the rivers and areas uncovered when the streams are low are especially fertile and yield two crops a year. The principal products are rice, maize, millet, earthnuts, cotton and indigo. Cattle and horse-rearing are fairly well developed. The population is not a dense one. Before the conquest of the country by the Tuculor, Faidherbe estimated the population at 300,000 and the area at 20,000 square miles. To-day it does not seem to exceed 5 to 6 inhabitants to the square mile. This very mixed population comprises Khasanské, Peuhl and Moors in addition to the Bambara [s.d.] and Soninke, who form the most important element. Islam is observed by the Moors and Peuhls, while the Bambara refuse to have anything to do with it. The principal subdivisions of Kaarta are:—Fuladugu (Tambaraka) and Diombo (Konkari) on the right bank of the Senegal, the Guediar (Niogomera) to the north of Diufun; Tomera (Diala) in the centre; Baghê and Kaarta-Lini to the north of Fuladugu; Danghiré in the east; Kingui (Nioro) on the Moorish borders. Adjoining the French possessions in Senegal, Kaarta was traversed at the end of the xviiiith century by Houghton and Mungo Park (1795) and visited in the xixth by Duranton (1828), Kaffelen (1849),
Mage and Quintin (1863), and Lenz (1880).

History. Kaarta after being included in the empire of Ghūna [s. d.] and in the Mandingo empire broke up into several small kingdoms on the dissolution of the empire of Malti, which at the end of the xviiith century was won by the Bambara Massassi who came from Segu under a chief named Sunsa. The latter conquered Fula-dugu, Kaarta, and Bam-buk and took up his residence in a place called Suntanian. His successors had to wage continual war against the Bambara of Segu. Conquered at first, they regained the advantage under the direction of Sīé Banman (1709–1760) who collected the remnants of the Massassi and reconstituted their empire with Guemu as capital. He annexed Danghirit, Diara, Diomboko and Bambug. Towards the end of the xviiith century, the Massassi were again overwhelmed by the people of Segu, but their chief Dassé reconstituted his army by means of slaves taken from the merchants. His successor Musa Kurabo recaptured the lost territories and added Konia-kari to them. The rulers who reigned after him, suppressed the rebellions which broke out in various provinces. The last of them, Kandia (1844–54), took Niore as his capital and after seven years of war conquered the Diamara and forced them to migrate to the Sahara. Kaarta was then a powerful state measuring 190 miles from E. to W. and 110 from N. to S. (Raffenberg). Power was exercised by a chief belonging to the family of Kulubari. He bore the title of fanma and his dignity was hereditary in the collateral line. His authority was absolute but in matters of importance he summoned a council formed of the Kulubari, representatives of certain tribes, and the "chiefs of the captives".

The Kaarta kingdom fell before the blows of the Tuculor. Kandia having put to death an envoy from al-Hādi 'Omar, Kaarta was invaded by the bands of this marabout. The "fanma" army which took the field against the enemy was routed and the "fanma" himself obliged to submit. The town of Niore was occupied by the Tuculor and the members of the royal family massacred. Kandia, spared at first, was not long in suffering the same fate. Kaarta henceforth formed a province of the Tuculor kingdom and was administered by a viceregal until 1894. At this date the Sultan of Segu, Aḥmadu, disturbed by the power of his brother Montaga to whom he had confided the government of Kaarta, decided to dispose of him. Montaga besieged in Niore blew himself up rather than capitulate. Aḥmadu then installed himself at Niore and lived there till the French undertook the conquest of the Tuculor empire. In 1890, the troops of Colonel Gallieni entered Kaarta and seized Konia-kari. On Jan. 1, 1891, they took Niore and completed the subjugation of the country. Aḥmadu had to take refuge in Macina. Kaarta was incorporated in the French possessions and divided into the administrative districts of Niore, Kita and Kayes.

KAB AL-AHBAR, RABU 'ISĀK KABB B. MATTI B. HĀDI, the oldest authority for the Jewish-Muslim traditions among the Arabs, a Jew of Yemen who became a convert to Islam in the Caliphate of Abū Bakr or 'Omar and was called KABB AL-AHBAR or KABB AL-HABR, "the rabbi Kabb," on account of his wealth of theological, particularly Biblical, knowledge. Lidzbarski (De propheticis, quae dicitur, legendis arabicis, Berlin diss., Leipzig 1893, p. 34 sq.) supposes that his name was originally Helew, 'Akbūr or Ya'kūb, and was afterwards changed into the Arabic name Kabb, habr or hibr (plur. ahibūr) is taken from the Hebrew habir, a title of scholarship among the Babylonian Jews, lower than that of rabbi. Al-Khwārizmi also describes it as a Jewish title equivalent to the Arabic al-'ālim (Ma'āzīth al-'ulūm, ed. von Vloten, p. 35). We have very little information regarding Kabb's life and work. According to al-Tabarî, he was on intimate terms with the Caliph 'Omar; he was in his retinue when 'Omar entered Jerusalem in 15 (636) (Annales, i. 2408), became a Muslim in 17 (638) (ibid., p. 2514) and is said to have prophesied the death of 'Omar in 23 (644) three days before it happened (ibid., p. 2792). According to al-Nawawī (Ṭahāhib, ed. Wustenfeld, p. 523), he was alive in the time of the Prophet, but never saw him. Then 'Anṣārī Abu 'I-Darḍā (q. v.) said of him that he possessed great knowledge and that there was only one opinion regarding the vastness of his learning and his reliability (al-Nawawī, ibid.). From Yemen he moved to Medina in the reign of 'Omar and then from there to 'Himṣ in Syria. The Omayyad Mu'awīya, then governor of the province of Syria, is said to have taken Kabb as teacher and counsellor to his court. In the conflict between 'Oṯmān and his opponents Kabb vigorously championed the Caliph, which on one occasion brought about his corporal chastisement by the pious Abū Dāhrr (q. v.) (Ṭabarî, i. 3946 sq.). He died under 'Oṯmān in the year 32 or 33 (652 or 654); (Ṭabarî, iii. 2474 sq.) at Himṣ and was buried there or, as others say (Ibn Barā'ī, ed. Defrémery et Sanguinetti, i. 222; Vālīlī, Muqām, ii, 595), in Damascus. His most important pupils were 'Abd Allah b. 'Abīs (q. v.), one of the earliest expositors of the Kurān, and Abu Harsira (q. v.). Kabb's teaching was given orally only; that he ever wrote a book, is, at least, nowhere stated. Many sayings seem to be credited to him; in many, notably those given by al-Ṭabarî, an older origin can be proved from rabbinical or church-patriarchal traditions (for examples see Lidzbarski, op. cit., p. 38 sq.). Reliable historians like Ibn Kataha and al-Nawawī do not quote him at all or, like al-Ṭabarî, only rarely; on the other hand, he is the more frequently quoted as an authority by story-tellers like al-Tahāhib and al-Dāhribi. In almost uninterrupted succession however he appears as narrator in the aljamiatic Leyenda de José (edited in Spanish transcription by F. Guil- len Robles, Leyendas de José hijo de Jacob y de
ALEXANDRO MAGNO, Zaragoza 1888) so that it almost seems as if this leghenda was in its whole substance a translation descending from Ka'bah. The editor translates Ka'b Abūn (in Spanish transcription, Caba Abhár, p. 4 note 2) by Caba el historiador, as he — like formerly von Hammer (cf. Ledzbardski, op. cit., p. 26 note 4) — confuses Abhár with Abūn and calls him el narrador or el cronista. This Moreño legend is however for the most part, especially the first chapter, a literal translation of the Thālābī’s Yūṣuf legend, and also where the Thālābī mentions other traditionists or none at all, refers to Ka’b, who is mentioned as an authority only five times in al-Thālābī’s story, the first time in his introductory description of the creation and beauty of Joseph (Kiyyūs al-Aqibbā), Cairo 1524, p. 61, l. 4 infra). This passage is lacking in the Legeenda, as the first page of the MS is lost. The agreement with al-Thālābī begins in the former at the very beginning, p. 3 l. 4 infra: Y despues fue Allah muer etc., in al-Thālābī, op. cit., p. 62, l. 23: an la Alhā b to’llār anbata etc., where it is related that God made a tree grow up for Jacob in the courtyard of his house and whenever a son was born to him, made a branch sprout from the tree. As the boy grew, so did the branch and when the boy attained manhood, Jacob cut off the branch and gave it to his son. While al-Thālābī here gives a quite general reference to the statements of people “who know the legends of the prophets and the history of past ages”, the Legeenda as early as p. 4 and on almost every other page gives Ka’b as the narrator. This frequent reference to Ka’b is however, as a further comparison with al-Thālābī’s story shows, quite arbitrary in the Legeenda. Al-Kisā’i in his legend of Yusuf (Kiyyūs al-Aqibbā), Cord. Bonn So. 7, p. 315—352) quotes Ka’b once as an authority viz. in the beginning, where it is related that God gave Abraham five precious gifts, which afterwards all passed into Joseph’s possession and that this aroused the envy of his brothers; then follows the story of Joseph and Jacob’s dream (cf. Well, Biblische Legenden der Moslemmänner, p. 101). We find Ka’b as narrator in one passage in Firdawsī’s Yūṣuf u Zalīkhā (ed. Elbè, in Anthologia Orientalis, Aryan Ser., Part vii., Vol. i., Oxford 1908, p. 258, l. 2599) where he says: Ka’b’ al-Thālābī was the first to say this, from Ka’b I have the following text: he follows the description of the ruler of Egypt (here called Khāṭrās or Khāṭrāgh with the kuṣūr Abū l-Ḥasan) and of his vizier Rāyūn b. al-Walid (the Potiphar of the Bible) and his wife Zalīkhā and of the preparation for the sale of Joseph by public auction. The fact that al-Tabarī in his story of Joseph (i. 371—415) does not mention Ka’b at all, and al-Thālābī, al-Kisā’i and Firdawsī, on the other hand, in the same story quote Ka’b as authority in different, never in parallel passages, strengthens the hypothesis that this name is a late invention not only in the Moreño legend but also in the three authors last named.

(Re. SCHMITZ.)

KAB b. ABU-ASRAF, a Medina opponent of Muḥammad, according to one statement a Naṣīrī, according to another, a member of the Tāqīy family of Nahhān but the son of a Naṣīrī woman. In any case, he was an ardent champion of Judaism (cf. the expression ṣayyīd al-ḥabār, Ibn Hisām, p. 659, 12). Aroused by the result of the battle of Badr, he went to Mecca where he used his considerable poetic gifts (in the Kītāb al-Aqhānī he is called faḥī ṣafīq) to incite the Quraysh to fight against the victor. He then returned to Medina, where he is said to have compromised the wives of the Muslims by love-songs. After the prophet had uttered his fateful “Who will rid me of this man?” Muḥammad b. Maslama offered to do so and he with several others including Ka’b’s foster-brother succeeded by a despicable intrigue in enticing him out of the house on a bright moonlit night and killing him in spite of his valiant resistance: cf. the confirmatory allusions in Ka’b b. Malik’s poem, Ibn Hisām, p. 658 sqq., while Ḥassān b. Ṣlīḥīt (ed. Hirszfeld, no. 97) gives an account of this murder and its counterpart, the assassination of Ibn al-Huṣayn, with startling frankness. According to al-Wāqīdī, the murder took place on the night of the 14 RabīI of the year 3 A.H., but this date, which is in contradiction to his own dating of the raid against Dhū Amarr, is probably due to the events being all compressed within the same period in the source he followed (cf. Ibn Hisām), which might make it appear that Ka’b was murdered soon after his return from Mecca. It is however clear from the poem (Ibn Hisām, p. 658, 18, 60 sqq.) as well as from a tradition in al-Halabi according to which the Naṣīrī’s were in deep mourning for Ka’b’s death, when Muḥammad began to attack them, that his murder did not take place till the year 4 as a kind of prelude to the attack on his kinsmen. It is also natural that punishment only overtook him after the battle of ‘Uqab to which he had contributed by his instigations.

(Re. SCHULZ.)

KAB b. MALIK, Abū ‘Abdullāh, a native of Medina of the Khārazī tribe of Salīma. After taking an active part in the sanguinary tribal
battles in Medina, he was won over to Islam even before the Hijra and took part in the momentous second meeting at the Akaba [q. v.]. He was a poet and along with Hassān b. Thābit [q. v.] and ‘Abd Allāh b. Rawthā [q. v.] was employed by Muhammad to glorify his military exploits and answer the polemical poems of the enemies. He did not fight at Badr [q. v.] but was in most of the other battles. At Uhud, wounded himself, he found the wounded Prophet, who was thought to be slain. On the other hand, he was one of the few followers of Muhammad who, in spite of their devotion to him, could not bring themselves to take part in the difficult campaign against Tabuk. But he later regretted it and after severe penance received the forgiveness of the Prophet (cf. Sūra, ix. 103, 107, 118 sq.). It is noteworthy that he who is fond of emphasising the connection of his tribe with the Ghassānids [q. v.], was at that time summoned by a Ghassānī chief to abandon Medina and Muhammad. In the caliphate of ‘Othmān we again hear of him when he with Hassān and Zaid b. Thābit vigorously championed the Caliph, when he was assassinated; after ‘Othmān’s death he wrote an elegy on him and declined to pay homage to Ali. He died blind in 53 (673): according to others, as early as 50 A.H. His poems have a somewhat nobler tone than those of Hassān and show a real enthusiasm for the religion of Muhammad besides a strong local patriotism.

(K. BUH.)

KA’BA. ZUHAIR, son of the celebrated poet and a Ma’alāda, Zuhair b. ‘Abī Salmā, and of Khalīfa bint ‘Amrām. Poetic talent seems to have been one of the privileges of the family, for, not to speak of Ka’b and his father, we have verses by eleven of its members, including the famous Tūmādīr (al-Kāmil). We do not know the date of his birth; he was the eldest of three brothers, the other two being Bu‘dair and Sallim. Traditions, more than suspicious, report that he early gave proof of his poetic talents, in spite of the opposition of his father who ended in being convinced after a decisive test. He was involved in the wars of his tribe against the Tā‘īrī, the Kūrāsh and the Khaṣārāj, as we see from various poems in his Diwān. At the time of Muhammad’s mission, Bu‘dair was converted shortly before the year 7, but Ka’b refused vigorously to imitate him and launched satirical verses against the Prophet. The latter solemnly authorised his assassination. Henceforth “the earth became too narrow for Ka’b” and he resolved to submit. He appeared unexpectedly in the year 9 in a mosque of Medina where Muhammad was and recited to him his famous poem known as Fānat Sū‘ād (Su‘ād has gone). The Prophet was overcome with admiration on hearing this eulogy of himself and the Kūrāsh and threw on his shoulders his own striped Yemen cloak, the burdā, whence the name often given to this Ka‘b. The date of Ka’b’s death is unknown, but he seems to have reached an advanced age. The Fānat Sū‘ād has nothing of a religious poem; it is inspired with the sentiments of pagan poetry and begins with such a commonplace that Ḥāmid al-Rāwīya [q. v.] claimed to know 700 poems with the same opening. It was frequently produced in the form of tā_qīf and tā_ṣur. Its commentators are numerous. The best known are: Tha‘lab, Ibn Durayd, al-Tibritī (published by Krenkow, Zeitschr. d. Deutschen. Morgen. Ges., lv. 241—279), Ibn Hiṣām (of which the best edition is that of Guidi, Leipzig 1871), Ibn Ḥijāj, al-Suyūtī, al-Bāḍūrī. It was first published by Lette (Leiden 1740); of later editions we may mention those of Freytag with a Latin translation (1823), Noldke, Dictats. Veter. Carmina Arabicoth. Berlin 1840, p. 110—114. I have given an edition with a French translation and two unpublished commentaries (Algers 1910): The _Diwān_ is not yet published.

KA‘BA, the palladium of Islam, situated almost in the centre of the great mosque in Mecca.

I. The _Ka‘ba_ and its immediate neighbourhood.

The name, not originally a proper name, is connected with the cube-like appearance of the building. It is however only like a cube at the first impression; in reality the plan is that of an irregular rectangle. The wall facing northeast, in which the door (the front of the Ka‘ba) and the opposite wall (back) are 40 feet long: the two other are about 35 feet long. The height is 50 feet.

The Ka‘ba is built of layers of the grey stone produced by the hills surrounding Mecca. It stands on a marble base 10 inches high, projecting about a foot (ṣāḥärwān). Four lines drawn from the centre through the four corners (rukn pl. arkān) would roughly indicate the four points of the compass. Four perpendiculars from the centres of the four walls would run north-east, north-west, south-east and south-west. The north corner is called al-arkān al-ṭūrāqī, the south corner al-arkān al-ṣawārī, the eastern al-arkān al-ṣawān, and the western al-arkān al-ṣawār (after the Black Stone).

The four walls of the Ka‘ba are covered with a black curtain (kiswā) which reaches to the ground and is fastened there with copper rings, which are fastened in the ṣāḥärwān. Gaps are left in only for the water-spout and the door. The kiswa is prepared in Egypt every year and brought to Mecca by the pilgrim caravan. The old covering is taken down on the 25th (or according to al-Batāni, the 28th) Dhu ‘l-Ḥijād and the Ka‘ba temporarily covered with a white covering which hangs down to within 6 feet of the ground; the Ka‘ba is then said to have put on the ḥātīm [q. v.]. At the end of the Ḥadīj it is covered with the new cloth. The door is covered by a separate covering also of Egyptian manufacture, which in Egypt is called al-bur‘akā (the veil).

The kiswa consists of black brocade, into which the ṣāḥādā is woven (see Snouck Hurgronje, Bilderatlas zu Mecca, no. xvii). At two-thirds of its height a gold embroidered band (ḥiṣām) runs round, which is covered with verses from the Kurān.
in fine calligraphy. Every inch of the garment, which is taken down each year, is of course regarded as a relic and small pieces are sold by the Banū Shaiḥa, the door-keepers of the Ka'bah, as amulets.

In the north-east wall, about 7 feet from the ground, is the door, parts of which have mountings of silver-gilt. In Burchhardt's and Ali Bey's times the threshold was lit up every night by a row of candles. When the Ka'bah is opened, a wooden staircase (darājā, māriyā) running on wheels is pushed up to the door: when not in use, it is kept between the Zamzam building and the Gate of the Banū Shaiḥa (see Snouck Hurgronje, Bilderratlas zu Mecca, n°. ii.). For a picture of the staircase, see Ali Bey, Travels, ii. 80.

In the interior of the Ka'bah are three wooden pillars, which support the roof, to which a ladder leads up. The only furnishing is the numerous golden and silver lamps suspended. On the inner walls there are many building inscriptions. The floor is covered with slabs of marble.

In the eastern corner, about 5 feet above ground, not far from the door, the Black Stone (al-haḍar al-ārba'a) is built into the wall; it now consists of three large pieces and several small fragments stuck together and surrounded by a ring of stone, which in turn is held together by a silver band. The stone is sometimes described as lava and sometimes as basalt; its real nature is difficult to determine, because its visible surface is worn smooth by hand touching and kissing. Ali Bey (ii. 76) gives a profile sketch of it which clearly shows the surface hollowed out in undulations. Its diameter is estimated by al-Batānī (p. 105) at 12 inches. The corner is reddish black with red and yellow particles.

The part of the wall between the Black Stone and the door is called al-mulūsa'am, because the visitors press their breasts against it while praying fervently.

In the east corner too, about five feet above the ground, another stone (al-haḍar al-ḥadid), the "lucky", is built into wall. It is only touched and not kissed during the perambulation.

Outside the building there is still to be mentioned the gilt water-spout (mizāb), which juts out below the north-west wall, and has an appendage which is called the "heard of the mizāb". The spout is called mizāb al-rājina, "spout of mercy" (so it isf. Ben Chérif, Les Fêtes de l'Islam, p. 75); the part between it and the west corner is the exact kihla [q. v.]. The rain water falls through the spout on the pavement below which here is inlaid with designs in mosaic. The ground all round the Ka'bah is covered with marble slabs.

Opposite the north-west wall, but not connected with it, is a semi-circular wall (al-ḥafīma) of white marble. It is three feet high and about five feet thick; its ends are almost six feet from the north and west corners of the Ka'bah. The semi-circular space between the ḥafīma and the Ka'bah enjoys an especial consideration, because for a time it belonged to the Ka'bah [see ii.]; in the perambulation therefore it is not entered; the rawāfī goes as close as possible along the outer side of the ḥafīma. The space bears the name al-haḍar or al-haḍīr. Here are said to be the graves of the patriarch and his mother Hagar. The pavement on which the rawāfī is performed is called ḥafīṣ; a depression in it just opposite the door has still to be mentioned; it is called al-mīghān "the trough"; according to legend, Ibrahim and Ismā'īl [q. v.] here mixed the mortar used in building the Ka'bah.

Around the mizāb, and a little higher than it, runs a paved border, a few paces broad, on which stand 31 or 32 slender pillars. Between every two pillars hang seven lamps which are lit every evening — to make the darkness visible, as Burton says. The row of columns is closed by the Bāb Bani Shaiḥa, an arch which stands opposite the north-west wall of the Ka'bah and affords an entrance to the mizāb. Between this archway and the Ka'bah is a little building, a kind of pagoda, with a small dome, the mizāb al-Ḥānim. In it is kept a stone, on which Ibrahim is said to have stood at the building of the Ka'bah. Admission is granted to visitors on payment. Europeans have however not been able to see the stone. Burton says that the five dollars asked was too high for his finances. According to Oriental travellers and historians, it is a soft stone on which the footprints of Ibrahim can still be seen. During al-Mahdi's caliphate it was provided with a gilt hand holding it together. Beside the Makhām Ibrahim, also opposite the north-east wall of the Ka'bah and within the row of pillars, but farther north of the Makhām, is the pulpit (musābār) of white marble. It consists of the usual staircase, shut at the foot by a door, and above the staircase are four short pillars supporting a spire like that of a Gothic church tower.

The pavement on which the row of pillars stands is somewhat lower than that which runs round them, to which eight paved paths from the colonnades round the mosque give access. On this outer paved part are four small buildings. Beside the Bāb Bani Shaiḥa, on the left of the path of the rawāfī and just opposite the Black Stone, stands the kubbah built over the Zamzam well. In the room on the ground floor is the well, which is walled in; its water is drawn up in buckets, fastened to a pulley. On one part of the flat roof is a small chapel partly open, which has a roof with a small dome.

In d'Ossian's as well as in Ali Bey's plan of the sacred mosque we find two further buildings north-east of the Zamzam building, at the edge of the outer paving, which are called al-Kubah-tam, "the two Kubbas", by him, Burchhardt and Burton. They are not marked in Snouck Hurgronje's pictures because they were demolished in the eighties and removed entirely. One held various objects, such as chamber stools, jars for Zamzam water; the other, books.

The three other small buildings on the outer pavement are the so-called makām's, the standing-places of the imāms of the various ritual schools during the ṣalāt. The Makhām or Musalla 'l-Ḥanabili stands south of the Zamzam building, opposite the south-east wall of the Ka'bah. It consists of a roof tapering to a point and supported by slender marble columns. The Makhām al-Mālikī is of the same form and is opposite the south-west wall of the Ka'bah. The Makhām al-Ḥanafi looks out on the ḥafīma and the north-west wall of the Ka'bah; it has two roofs, one above the other. The Shafi'īs have no makām of their own; during the ṣalāt they stand under the kubbah on the roof of the Zamzam well or at the Makhām Ibrahim.

Finally we may mention receptacles placed here and there beside the pavements, in which various articles are kept (see Snouck Hurgronje Bil- deratlas, n°. i., ii.; Bilder aus Mecca, n°. i., iii.).
II. History.

The Arabs possess no historical or semi-historical records of the origin of the Ka'ba, and we as little. According to Snouck Hurgronje's supposition, the Zam zam spring in a waterless valley may have been the cause of the rise of a sacred place. It is to be noted that Ptolemy (Geography, vi. 7) in place of Mecca mentions Macraub, which is probably to be interpreted, as does Glauser (Skizze der Gesch. u. Geogr. Arabiens, Berlin 1890, ii. 235) as the South Arabian or Ethiopian mihrāb, "temple". From this one may conclude that the Ka'ba already existed in the second century A.D. The accounts of Abrah's campaign, which has been elaborated with legendary features, also suggest the existence and worship of the Ka'ba in the sixth century but tell us nothing of its appearance or equipment. The Tuba'a of 'Abd Allah karib al-Himyarī, who came to Mecca, is said to have for the first time provided the building with a κύρος and with a door with a lock. The information available regarding the distribution of the offices [see below iii.] among the sons of Kuṣayy shows that the worship of the sanctuary had developed into a carefully regulated cult several generations before Muhammad.

As to the history of the building of the Ka'ba the legends referring to the pre-Muhammadan period are dealt with below [iv]. Whether Kuṣayy demolished and restored the building, as the historians say, is a question that cannot be definitely settled. The historical references only begin with Muhammad. When Muhammad had reached man's estate, the fire of a woman incensing the Ka'ba is said to have caught the building and laid it waste. It happened that a Byzantine ship was thrown ashore at Ḥijādī [q.v.] and the Meccans brought its wood hither and used it for the new building. In connection with this the name of a man Bāḵūm (it is given in various forms) is always mentioned, sometimes as the captain of the ship, sometimes as the carpenter whose advice was taken; he is said to have been a Coptic Christian.

The old Ka'ba is said to have only been of the height of a man and to have had no roof. The threshold is said to have been on the level of the ground so that the water had an easy entrance in the frequent floods (sail). The Ka'ba was then built of alternate layers of stone and wood, its height was doubled and a roof covered it. The door was placed above the level of the ground so that whoever wished to enter had to use a ladder. Unwelcome visitors were tumbled down from the high threshold. When the Black Stone was to be put in its place, the Meccans quarrelled among themselves as to who should have the honour. They had just decided that the first comer should be given the task when Muhammad (who had been engaged in helping to carry the stones) came past. With superior wisdom he is said to have placed the precious object in his cloth — or in his cloak — and to have ordered the heads of tribes to each take an end. He himself then took out the stone and placed it in position. Legend and history are probably hopelessly confused in this story. At the conquest of Mecca in 8 A. H. [see iii. below], Muhammad left the Ka'ba as a building unaltered. But according to tradition, he later said that only the very recent conversion of the Mec-
the day of covering, but in Kadžib also and in other months the building has changed its covering. The kiswa consisted sometimes of Yemen and sometimes of Egyptian or other cloth; during 'Omar's time the building threatened to collapse on account of the many coverings hung on it. All sorts of colours are mentioned also. The Wahhâbîs even covered the Ka'bah with a red kiswa.

The mu'âmîrs around the Ka'bah are mentioned as early as the 'Abbasî period; sometimes under the name zula ('a shade'). The present buildings are said to date from 1074 (1663). A dome over the Zamzam well is mentioned at an equally early period, the present one was built in 1072.

The Ka'bah had offerings dedicated to it in the heathen as well as the Muslim period. Al-Arârî devotes a detailed chapter to this subject (p. 155 sqq.). Many a worldly ruler has used these treasuries for political purposes. Tradition reports that 'Omar said: "I will leave neither gold nor silver in the Ka'bah but distribute its treasuries." To this, however, 'Aît is said to have raised vigorous objections so that 'Omar desisted from his plan.

III. The Ka'bah and Islam.

We do not know the personal feelings of the youthful Muhammad towards the Ka'bah and the Meccan cult, but they were presumably of a conventional nature. What the biography of the Prophet tells us about his Meccan period in this respect can lay no claim to historical value. The Meccan revelations tell us nothing about these relations during this important period in the life of the Prophet. In any case he felt no enthusiasm for the Meccan sanctuary.

During the first period after the Hijra Muhammad was busy with very different problems. But when the expected good relations with Judaism and the Jews did not come about, a change set in. Henceforth — a year and a half after the Hijra — the Ka'bah and the Hâfîdji are mentioned in the revelations.

The change of attitude was first shown in the kibla edict: the faithful were no longer to turn towards Jerusalem in the gûlî but to the Ka'bah.

"We see them turning their faces every part of heaven, but we will have thee turn towards a küba that will please thee. Turn then thy face towards the sacred mosque and wherever ye be turn your faces towards that part. They verily to whom the Book hath been given know this to be the truth of their Lord: and God is not disregardful of what ye do" (Sûra ii. 139). From the dogmatic point of view this volte-face was justified by an appeal to the "religion of Abraham", which was specially invented for the occasion (Sûra ii. 129, iii. 89 etc.), as Snouck Hurgonje has shown in his Meccaanse Beest. This religion of Abraham, the prototype of Judaism and Islam, is said to have been obeyed by the Jews and to have been brought to light again by Muhammad. The Meccan cult was now drawn into it. 'Ibrâhîm and Ismâ'il laid the foundations of the Ka'bah (Sûra ii. 121). The Ma'kâm 'Ibrâhîm is described as a place suitable for the gûlî (ii. 119). 'Ibrâhîm prescribed the pilgrimage to mankind at Allah's behest (xxii. 28); and the Ka'bah to be the first sanctuary that was founded on earth (iii. 90); it is now called the Holy House (v. 98); or the Ancient House (xxii. 30, 34).

In this way there was created for the reception of the old heathen cult into Islam a basis in religious history, which was at the same time a political programme; henceforth the eyes of the faithful were turned towards Mecca.

In the year 6 a council of taking part in the Mecca cult was held out to the Muslims by the pæct of al-Judâbiya (q. v.); in connection with it, the 'Unrâl al-Kâthâ took place in the year 7. Muhammad's political endeavours culminated in the conquest of Mecca in the year 8.

All the accumulation of heathenism, which had gathered round the Ka'bah, was now thrust aside. 360 idols are said to have stood around the building. When touched with the Prophet's rod they all fell to the ground. The statue of Hubal which 'Amr b. Lu'ay is said to have erected over the pit inside the Ka'bah was removed as well as the representations of the prophets. When they began to wash the latter with Zamzam water, Muhammad is said to have placed his hands on the pictures of Jesus and Mary and said: "Wash out all except what is below my hands." He then withdrew his hands. A wooden dove also which was in the Ka'bah is said to have been shattered by Muhammad's orders. The two horns of Abraham's ram did not crumble to dust until the rebuilding of the Ka'bah by 'Abd Allah b. al-Zubair.

At the capture of Mecca, Muhammad made arrangements regarding the religious and secular offices which had been filled in Mecca from ancient times. The historians say that in the old heathen period Ka'îsaï after a fierce struggle with the tribe of Khuzâ'a became master of the Ka'bah and held all the important offices, religious and secular: the administration of the Dâr al-Nâdâwa and the tending of the standard, the provision of the pilgrims with food (rîfâda) and with drink (sîkîya) as well as the supervision of the Ka'bah (sîdâna and hîsâba). His descendants 'Abd Manâf

'sîdâna and hîsâba.

His descendants

| 'Abd al-Uzâ

'Abbâs [q. v., i. 98 sqq.] or, according to another tradition, 'Ali was asked for the administration of these offices. But Muhammad said that they must all be crushed beneath his feet except the sîkîya and the guardianship of the Ka'bah. The former remained in the hands of 'Abbâs; the latter he gave to 'Uthmân b. Ta'hâ who allowed his cousin Khâib b. Abî Ta'hâ to act as guardian. The Banî Sha'bâ are the doorkeepers at the Ka'bah to this day. The rîfâda, which was in the hands of Abû Ta'llîb, was taken over by Abû Bakr in the year 9; after his death the Caliphs looked after the feeding of the pilgrims.

Muhammad's control over Mecca and the Meccan cult was first clearly marked at the Hâfîdji of the year 9. As plenipotentiary of the Prophet, who did not participate in the pilgrimage, Abû Bakr announced to the assembled pilgrims the latest arrangements, which were put in the form of a revelation. They are contained in Sûra ix., which
from them is often called the Sūra of Immunity (barā'a) (v. 1—12, 28, 36 sq.).

According to it, idolsators are henceforth forbidden to participate in the Meccan festival as they are impure (mujjar). Moreover, they are declared outlaws. A period of four months is given them during which they can go freely about the country; but after that "kill them wherever ye find them". Excepted are those with whom an alliance has been made in so far as they have punctiliously observed its terms and helped no one against the Muslims.

In the year 10 A.H. Muhammad himself led the pilgrimage, at which therefore according to tradition not a single idolator was present: the Kaba had become an exclusively Muslim sanctuary, and Mecca was and is for Islam what Rome is to the Roman Catholic and Jerusalem to the Jew. At every ṣalāt the Muslims throughout the world turn towards Mecca and at the ceremonies of the pilgrimage the Ka'ba forms the beginning and the end of the holy rites.

Two special ceremonies concerning the Ka'ba may here be mentioned, the opening and the washing of the building. The opening takes place on definite days and men are first admitted, then the women. On this occasion the above mentioned staircase is pushed up to the building. The days in question change at the will of the Meccan authorities — but some usually fall in the month of the pilgrimage and one on the 10th Muharram (Aqīrā day, q.v.). It is considered particularly meritorious to perform the ṣalāt in the Ka'ba.

After the Ḥajj is completed, at the end of the month Dhu'l-Hijjah, the Ka'ba is washed, a ceremony in which the Grand Sharif, the governor and other authorities as well as a number of pilgrims take part (or took part). The first to enter is the Sharif, who after a ṣalāt of two rak'as, himself washes the ground with Zamzam water which flows away through a hole in the threshold.
The walls are washed with a kind of broom made of palm leaves. The Sharif then sprinkles every thing again with rose water and finally the building is fumigated with all manner of perfumes (cf. al-Kibīb, n. 409, p. 1). The Sharif throws the broom away among the crowd of pilgrims who fight among themselves for possession of it Al-Batānī says (p. 109) that the Zamzamis and the Muṣawwifs sell the pilgrims similar brooms for a minimum of half a real.

As is evident from this example, the veneration for the sacred building extends to all that comes in contact with it: to the Black Stone, the water-spout, the mukarram, and above all to the Zamzam water. It is however said — and probably with truth — that 'Omar thus expressed himself on the Black Stone: "I know that thou art a stone, that neither helps nor hurts, and if the messenger of Allāh had not kissed thee, I would not kiss thee". But then he kissed the stone.

And hardly a single pilgrim will think of 'Omar's words during the twâfif. The ṣalāt under the water-pipe is described as particularly efficacious: "Anyone who performs the ṣalāt under the mustaqab becomes as pure as on the day when his mother bore him" (al-Azraqi, p. 224). The Zamzam water, which the pilgrim has poured over him again and again, is useful for every purpose for which it is drunk (mā' Zamzam li-nā sharīka lahī, Kūṭh al-Dīn, p. 34).

There is abundant testimony in Muslim as well as European literature to the intense devotion of the Ka'ba produces in the pilgrims. We may here quote al-Batānī's description of the ṣalāt at the Ka'ba as particularly characteristic (p. 29). "The assembly stood there in the greatest reverence before this highest majesty and most powerful inspirer of awe before which the greatest souls become so little as to be almost nothing. And if we had not been witness of the movements of the body during the ṣalāt and of the raising of the hands during the prayers, and the murmuring of the expressions of humility and if we had not heard the beating of the hearts before this immeasurable grandeur we would have thought ourselves transferred to another life. And truly we were at that hour in another world: we were in the house of God and in God's immediate presence, and with us were only the lowered head and the humble tongue and the voices raised in prayer and weeping eyes and the fearful heart and pure thoughts of intercession" (cf. also Macdonald, The Pilgrimage of handsome, Chicago, 1909, p. 216 sqq.; Ben Chérif, Les Œuvres Saintes de l'Islam, p. ii, sqq., 45 sqq., 68).

Even the Shi'is and the Wahhābis have left the Ka'ba's place in Islam. For the Karmanis alone has an exception to be made, as can be well understood.

Although moderns like al-Batānī (p. 24) put the question: Why is God particularly worshipped in Mecca, when the whole world is His sphere, they themselves give the answer: "But Mecca is His citadel and the place of revelation of His dominion and power. And the Ka'ba is His temple and the place of His grandeur and grace. And there in any of the four quarters of the earth a place not quite seven square miles in extent where half a million people assemble on a pilgrimage, all of whom call to God with one heart and one tongue? And although they differ in race and language, they all turn towards one kiya and at the ṣalāt move with one motion, without any hope other than the grace of the one God, who has not begotten and is not born and is without equal".

As to the mystics, their attitude to the Ka'ba depends on their position regarding the law. For, so to speak, nomistic mystics like al-Ghazālī, the Ka'ba is, it is true, the sacred building which one has to go round in the twâfif. The twâfif and its object however only receive their value for men when they give them an inducement to rise to a higher spiritual level. Ibn al-'Arabī goes a step further when he says that the true Ka'ba is nothing other than our own being (al-Futūḥât al-Makhūṭa, i. 733); the Ka'ba however also plays a part in his mystic experiences. Hadjīwirı however quotes some sayings of mystics, who no longer require the Ka'ba as an inducement to rise, and even despise it. Muhammad b. al-Fadl says: "I wonder at those who seek His temple in this world: why do they not seek contemplation of Him in their hearts? The temple they sometimes attain and sometimes miss, but contemplation they might enjoy always. If they are bound to visit a stone, which is looked at only once a year, surely they are more bound to visit the temple of God, where they may see three hundred and sixty times in a day and night. But the mystic's every step is a symbol of the journey to Mecca, and when he reaches
the sanctuary he wins a robe of honour for every step”. Abū Yazid (al-Bīṣānī) says: “If anyone's recompense for worshipping God is deferred until to-morrow he has not worshipped God aught today”, for the recompense of every moment of worship and mortification is immediate. And Abū Yazid also says: “On my first pilgrimage I saw only the temple: the second time, I saw both the temple and the Lord of the temple; and the third time I saw the Lord alone”. In short, where mortification is, there is no sanctuary; the sanctuary is where contemplation is. Unless the whole universe is a man's trying-place where he comes nigh unto God and a retired chamber where he enjoys intimacy with God, he is still a stranger to Divine love; but when he has vision the whole universe is his sanctuary. “The darkest thing in the world is the Beloved's house without the Beloved”. Accordingly, what is truly valuable is not the Kā'ba, but contemplation and annihilation in the abode of friendship, of which things the sight of the Kā'ba is indirectly a cause. (Hūqūqī, transl. Nicholson, p. 327).

IV. The Kā'ba in Legend and Superstition

The alleged religion of Abraham gave a lasis for the esteem in which the Muslims held the Kā'ba. Legend attached itself to the Qur'ānic statements and spun them out. As Snouck Hurgronje has proved in his Meekkoanse Feest against Dorz's hypotheses (see his Israelieten in Meekko), there can be no question of a local Meccan tradition in this connection. There was, it is true, a local tradition, but it consists of semi-historical reminiscences of the last few centuries before Islam. But all that tradition relates regarding the origin of the Kā'ba and its connections with Biblical personages, belongs to Islamic legend.

The latter first of all attached itself to the statement that Ibrāhīm and Ismā'īl raised (rafa'a) the foundations of the Kā'ba (n. 121). God's command to Ibrāhīm to build the Kā'ba is by some placed before the episode of Hagar and by others after it. The patriarch came to Arabia led by the Sākina, which had the shape of a stormy wind with two heads; it is also described as having a snake's head. When it reached the site of the Kā'ba it wound itself round its foundations (see below) and said "Build on me". According to others, Ibrāhīm built on its shadow. He was helped by Ismā'il in this; the stones were taken from five (or seven) hills: Hīrā', Thābīr, Lebanon, Mount of Olives and the Dījāl al-Ahmār near Mecca (other names are also given). When the building had risen to some height, he stood at his work on the stone, which still shows the impress of his feet, the Mašūm Ibrāhīm. The Black Stone, which was still white in those days and only received its present colour as a result of contact with the impurity and sin of the pagan period, was brought to him by Gabriel after having been kept in Abū Kubais [q. v.] since the Deluge. Within the building (which was not high and had no roof) Ibrāhīm dug the hole, which afterwards served as a treasury. When the work of building was completed, he took his stand on the mašūm, which now rose high above the mountains, and proclaimed the pilgrimage to all men. From all sides they answered: Labbaika, Allāukumma! Labbaika!

On the other hand Muslim legend has developed the passage, Sūra iii. 90: "Truly, the first temple that was founded for men is that in Bakka; a blessed house and a guidance for (all) creatures". The ambiguous expression according to which Ibrāhīm and Ismā'il "raised" the foundations of the Kā'ba left room for the view that the foundations already existed on which he erected the building. Al-Ṭabarî in his commentary on Sūra ii. 121 (t. 408 š.) however recognises that there are two views: according to the one, Adam, according to the other, Ibrāhīm laid the foundations. Legend relates the following regarding the foundation by Adam. When after the fall Adam was hurled out of Paradise on the earth, he came to Mecca. Gabriel with his wing uncovered a foundation, which had been laid in the seventh earth, and the angels threw blocks on it from Lebanon, the Mount of Olives, Dījāl al-Dūlī [see Dūlī] and Hīrā' until the hole was filled level with the earth. God then sent from Paradise a tent of red jacinth in which Adam lived: what was afterwards the black stone, then a white jacinth from Paradise, served as a seat. When God made his covenant with men, the latter acknowledged God's sovereignty; the document on which their acknowledgment was written was given by God to be swallowed by the Black Stone. At the Last Day it will be given a tongue, to bear witness against men: according to others, because it was originally an angel.

There was a particular reason for sending down the prototype of the latter Kā'ba. Originally Adam's stature was so great that he could hear the song of the heavenly hosts around God's throne. As a result of the Fall, however, his stature was shortened; he then lamented to God that the higher spheres were now closed to him. God then sent down the tent around which Adam now performed the tawāf, following the example of the angels. But Mecca was without inhabitants and the sanctuary without worshippers. When he gave vent to his regrets on this point, he was promised by God that in time this place would be the site of a cult; that the sanctuary would enjoy a particular kara'ma; that it would be a kūrah [q. v.] whose kurna would extend above, below and around, and to which men would make pilgrimage with dishevelled hair and covered with dust, breaking out of every cleft with weeping and takbir [q. v.] and tahlīya [q. v.].

After Adam's death his descendants (Shīth) is specially mentioned) built the Kā'ba. But the deluge washed the building away while the sacred stone was concealed by the angels in Abū Kubais. According to others, however, the flood did not touch the Kā'ba and Noah performed the tawāf round the holy house. According to the first tradition, only a red mound was left of the Kā'ba, which Abraham afterwards found.

But the legends also extend to the period after Abraham. The hole in the Kā'ba, which is called al-Akkahaf or al-Akhikaf, is said to have been several times plundered under the Dājurum [q. v.]. Therefore at God's command a snake took up its abode there and guarded the treasures. When the Kuraishis wanted to pull down the Kā'ba, the monster opposed this plan, until God sent a bird which carried it off to one of the surrounding hills. — Every renovation of the Kā'ba is said to have been carried out amid ter-
rible portents, such as lightning-flashes. It is also said that on such occasions the foundation of the Ka'ba was brought to light and it looked like the necks of camels intertwined.

Or, for the legend connected with the origin of the Zamzam, see the article IMÁM. The following may however be added here. Once when 'Abd al-Muttalib was sleeping in the ḫidr, one appeared to him and in mysterious words ordered him to dig out the Zamzam, which was “at the battle-ground of the Kuraísh” at the “Ravenhole”, and at the “Ants nest”. Now when the Kuraísh contested his right to it (or the claim to the well already dug) both parties went to the Ka'bah of the Imm Sa'd b. Hudhail. On the way their water gave out. But the water which sprang from the impression of the hoof of 'Abd al-Muttalib’s mount was an indication from heaven that the latter was right. They therefore turned back to Mecca; and when 'Abd al-Muttalib had begun to dig, he found there two golden gazelles which the Djurhum had concealed there, as well as swords and armour. All this was deposited at the Ka'bah or used to decorate the buildings.

This legendary story of the origin of the Ka'bah was easily brought into conformity with the cosmological views current among Christians and Jews in the East, the central point of which was the sanctuary itself. Muslim tradition at first adopted this cosmology completely, as is evident from the statements which are still wholly under the influence of the predominance of Jerusalem. They were however not content with this and transferred a considerable part of these sayings to Mecca. These traditions are grouped round the navel theory, the main ideas of which are as follows. The earth has a navel, whose functions are parallel to those of the human navel. It forms the part of the earth which was created before the rest of it and around which the rest stretches. It is also the highest point, the place which provides the whole world with its nourishment; and its forms the place of communication with the upper and under world.

This navel was at first Jerusalem and later Mecca. But not all the properties of the navel are attached in equal degree to Mecca. They may be briefly summed up as follows. About 40, according to others, 2000 years before the creation of the world, the sanctuary was an agglomeration (ḏabūk) in the world ocean. The beginning of the creation consisted in the stretching out of the earth around this point as centre, in the following order: after the substance of the earth (which coincides with the navel) heaven was formed and lastly the earth itself. In agreement with this theory is the fact that in the Kūra’-an Mecca is called the mother of cities (Umm al-Kūra’) (vi. 92, xlii. 5) and in popular literature the navel of the earth (Yaḵūṭ Miḏqam, iv. 278; al-Kabīrī, i. 37; al-Ḥalabi, i. 195, etc.).

That the sanctuary is the highest point in the world cannot be scientifically maintained. The popular traditions however like to move in this direction. Thus, in the story of the creation, it is said that the heavenly man is extended below the sanctuary. The semi-scientific cosmography says that the position of the Ka'bah corresponds to the Pole Star: as the latter is the highest point in the heavens, so the Ka'bah is the highest point on earth (al-Kisā’i, ‘Adilb ḥ-Malakūt, Ms. Leiden, f. 186). This view is probably connected with the conception of heaven and earth as domes or tents put one upon the other, which can be shown to exist in Muslim literature.

The view that the sanctuary connects on the one side with heaven and on the other with the lower world, is clearly not regarded to Mecca as to Jerusalem. But it is said that no place on earth is nearer heaven than Mecca; and in the pagan period men are said to have gone up to Aḥū Kubais to offer particularly urgent prayers. Whether the pit in the Ka'bah was really regarded as the entrance to the underworld, like the corresponding arrangements in Jerusalem and Hierapolis is uncertain.

One typical characteristic of the lower world is certainly possessed by Mecca. It is described as a tomb. Not only Ismā‘īl, but a whole series of prophets, numbering hundreds, is said to have been buried round the Ka'bah. Every prophet belongs to Mecca. This is an essential staging point and termination of his career. Muhammad therefore also belongs to Mecca and Mecca is his real grave as theologians say (al-Ḥalabi, i. 197) in opposition to the fact that he is buried in Medina.

Traditions which emphasize Mecca's importance for the nourishment of the world are hardly represented at all.

These theories had to be brought into consonance with the later cosmology of Isfān, which regards the universe as a series of stories of seven heavens and seven earths. The Ka'bah is now not only placed in the centre of the earth (according to the navel theory) but it forms the central point of the whole universe. Its foundations as well as those of Aḥū Kubais lie in the seventh earth and form a kind of axis which runs through all these worlds.

The so-called stories are exactly like one another in plan. Every one has a sanctuary in the centre so that if the top one fell down, it would fall exactly on the lowest in the seventh world.

The highest of the sanctuaries is the throne of God. Of those which lie between the throne and the Ka'bah two are mentioned by name, the Bait nan‘īr, the name of which is taken from the Kūra’-an (lii. 4) and al-Lūṭ, Jewish literature was already acquainted with a heavenly sanctuary in which the angels act as priests. In Islam these priestly functions are usually replaced by the ṭawāf.

V. Comparative History of the Cult.

From the fact that Ptolemy calls Mecca Maco-raha (i.e. Miḵrān, temple) we may conclude that in his time the Ka'bah was regarded as the dwelling of one or more deities. According to a statement of Epiphanius (Haereses, V, following the text in Philologus, 1860, p. 355), Dhu 'l-Šaḥā had his qaṣāyā in Petra, in which word Ka'bah is also probably concealed. It is however not clear from Epiphanius, whether the temple in Petra was meant or the quadrangular black stone, which represented Dhu 'l-Šaḥā, Al-Bakri (Muṣ'jam, ed. Wüstenfeld, p. 46) relates that the tribe of Bakr Wā'il [q. v.] as well as the main body of the tribe of ‘Yūd had their centre of worship in Sindād in the region of Kafa and their holy tent (or temple, ba‘t) here was called Dhat al-Kabābī (cf. however al-Ḥamdānī, Sīfa Līmārat al-Arāb, p. 171, 14, 17, 230, 12). According to Wellhausen,
the Ka'ba owed its sanctity to the Black Stone; this may be right, for the religion of the ancient Arabs was essentially stone-worship.

The form of the building may be compared with the apse of the Jerusalem temple, which was twenty ells in each direction.

It is not related that the Black Stone was connected with any special god. In the Ka'ba was the statue of the god Hubal who might be called the god of Mecca and of the Ka'ba. Caesari gives great prominence to the connection between the Ka'ba and Hubal. Besides him, however, Al-Lat, Al-Uzza, and Al-Manit were worshipped and are mentioned in the Qur'an; Hubal is never mentioned there. What position Allâh held beside these is not exactly known. The Islamic tradition has certainly elevated him at the expense of other deities.

It may be considered certain that the Black Stone was not the only idol in or at the Ka'ba. The Makâm Ithâlim was of course a sacred stone from very early times. Its name has not been handed down. Beside it several idols are mentioned, among them the 360 statues.

The Ka'ba possessed in a high degree the usual qualities of a Semitic sanctuary. First of all it made the whole surrounding area into consecrated ground. Around the town lies the sacred zone (haram) marked by stones, which imposes certain restrictions on each one who enters it [see hêram]. Moreover, the sanctity of the area is seen in the following points. In the haram the truce of God reigns. When the Arab tribes made a pilgrimage to the Ka'ba, all feuds were dormant. It was forbidden to carry arms. Next, the haram — and the Ka'ba especially — is a place of refuge. Here the unintentional manslayer was safe just as in the Jewish cities of refuge. On the Ka'ba there was a kind of handle to which the fugitives clung (Al-Azra'î, p. 114), an arrangement which recalls the purport of the horns on the Jewish altar.

Blood was not allowed to flow in the haram. It is therefore reported that those condemned to death were led outside the haram to execution. The idea of peace extended even to the flora and fauna. Animals — except a few injurious or dangerous sorts, are not to be scared away; hence the many tame doves in the mosque. Trees and bushes were not cut down except the idhâ-khir shrub, which was used for building houses and in goldsmiths' work. These regulations were confirmed by Islam and are in force to this day.

As to the rites, it is said that in the heathen period victims were slain at the Ka'ba. Among the ancient Arabs the idol of stone replaced the altar; on it they smeared the blood of the sacrificial animals. In Islam the killing takes place in Minâ.

It is a question, whether and how far the Ka'ba was connected with the hajjijî in the pre-Islamic period. Wellhausen (Reste Arab. Heidentums, 2nd ed., p. 79) defends the view that originally only the 'umra [q. v.] was concerned with the Ka'ba while the scene of the hajjijî was 'Arâfat, Muzdalifa and Minâ. The connecting of pilgrimage and 'umra is regarded by him as a rather clumsy correction made by Islam. It must be conceded that Wellhausen with justice points to the fact that the 'umra far down into Islam was closely connected with the month of Rajab. Moreover, the hajjijî is called simply hajjijî.'Arâfat and, according to the Shāfi'î school, the 'umra in 'Arâfat is the main ceremony of the hajjijî. On the other hand, it should be remarked that in the Qur'an (iii. 91) pilgrimage is connected with the Ka'ba (hajjijî al-ba'tî) and that tradition nowhere gives us the slightest hint of this being an innovation. The facts emphasised by Wellhausen may however be interpreted otherwise. He himself has pointed out that the ancient Arabs were fond of connecting sacred places situated close to one another by ceremonial rites. It is therefore more probable that the rather clumsy alteration had taken place by the pre-Islamic period and is to be regarded as the result of a connection of the cult of 'Arâfat with that of Mecca.

As was said above, the Tabba is regarded as the first who covered the Ka'ba. Whether this tradition is historically correct is beyond our knowledge. It is noteworthy that the coloured cloths are mentioned which were placed over the building, a rite which one has to consider in connection with similar rites used in other cases. The Jewish tabernacle, the high places of Canaan (Exod. xvi. 16), the throne of the gods, the mahmal, and sacred tents in ancient Arabia as well as the Sidrat al-Muntahâ in Paradise are all covered with coloured cloths. It is misleading to give a general explanation of all such things. But the idea of a connection with the sun shining in the heavens seems obvious here; particularly for the Sidra this notion can be traced further. The question might even be asked whether and how far the Ka'ba was regarded as an astral symbol. For the affirmative there is the fact that the Ka'ba is the object of the 'azaf and that 'azaf and Ka'ba are represented by Muslim tradition itself as connected with the host of spirits round the throne of God. The throne of God is, as is well known, a cosmic magnitude, and the Ka'ba and the Black Stone are described as the throne of God's khâliifa on earth, Adam. The dance of the heavenly spirits can easily be interpreted as a dance of the planets. Moreover, golden suns and moons are repeatedly mentioned among the votive gifts (al-Azra'î, p. 155 sqq.). According to al-Mas'udi (Muru'dî, iv. 47), certain people have regarded the Ka'ba as a temple devoted to the sun, the moon and the five planets. The 360 idols placed round the Ka'ba also point in this direction. It can therefore hardly be denied that traces exist of an astral symbolism. At the same time one can safely say that there can be no question of any general conception on these lines. The cult at the Ka'ba was in the heathen period syncretic as is usual in heathenism. How far also North Semitic cults were represented in Mecca cannot be exactly ascertained. It is not excluded that Allah was of Arabian origin. The dove of aloe wood which Muhammad found existing in the Ka'ba may have been devoted to the Semitic Venus.

KA'BĀKĪZĪ, or Kabākīwī, the gourd-game, the oriental form of the Popinjay. It was a sort of tilting at the ring, but the weapon was an arrow, and the archers were on horseback. A ring was shot through, but the mark was a pigeon or other bird set on a high mast. In Bābur’s time the mark was a duck (v. Bābur, 377; Gibb. Mem. i. and mrs. Beveridge’s transl. i. 34; and P. de Coutellerie, i. 39). The game was much practised in Egypt (v. Quatremer, Hist. des Mamlouks, i. 243, note 118; also Dozy’s Supplement). It was also practised in India and Persia (v. Akbarāna, i., transl. p. 440; Vuller’s Lex., ii. 710). The game is alluded to in the Gulistān, iii. Story 28. (H. Beveridge.)

KABATASH. [See constantinople, i. 8756.]

KA'B (A.) means the legitimate taking possession of a thing, for example by inheritance or as a result of the contract. Ka'b is usually discussed in the Muslim law-books in close connection with dealings in property, as the contract of sale, for example in al-Bāḍjūrī’s Hājībīya on Ibn Kāsim’s Fatḥ al-Karīb, at the beginning of the chapter on Bā'ī (Bālaq edition 1307, 358); cf. E. Sachau, Muḥammad. Recht nach Schafī‘itischer Lehre, p. 283 sq.; Th. W. Juynboll, Handb. des isl. Gesetzes, p. 263. (Th. W. Juynboll.)

KA'B (A.) “contraction, oppression,” in Sūfī terminology means a state (ḥāl) which is the opposite of bāt, “expansion, gladdening.” (In the phrase Allāhu yāsābin wa-yāsābu, quoted by Sufi authors from Kurān ii. 246, however, the words have a more general meaning). Both happen to the ārif (gnostic) only, while in the novice the cor-
responding emotions are fear and hope, but with the distinction that the latter refer to the future, while bāt and bāat express a present feeling of spiritual dullness or joy. In the language of Western mysticism, they might be said to correspond approximately to the expressions consolatio (consolation) and doelastio (spiritual dryness).

KA'B, a term in prosody. It is the suppression of the fifth quiescent letter in the primitive feet ša’ālun and maša’ālun and is therefore found in tāfāl, ḥazādī, muḍārī and maṭuṣārī.

In ša’ālun, kāb is recommended (according to some, it is obligatory) when this foot is the penultimate of the second hemistich of the third ātār of a tāfīl; everywhere else it is optional. In maša’ālun, ka'b is obligatory in the last foot of the first hemistich of a tāfīl. In all other cases it is only permitted if the foot is not liable to ka'b or suppression of the seventh quiescent letter (w); nevertheless, it is very rarely found in tāfīl, ḥazādī and muḍārī.

AL-KABĪD one of the names of God, see the article ALLAH, i. 3036.

KABĪD (Kābi‘) a Turkish Sunni theologian, founder of the sect of Khuwamshījas (popularly called Chapmanesīhs). By order of Sulaiman he was tried before an extraordinary court, sentenced to death on 8th Safar 934 (3 Nov. 1527) and executed the following day as a sandīq (i. 397). He maintained the (moral) superiority of Jesus over Muhammad (al-faḍīyat lā ‘alā Muḥammad). On the occasion of this trial Ibn Kamālpashazade wrote his treatise on Zindīkism.

KABA‘IL, i. e. Cain. [See KABIRIL.]

AL-KABIR, one of the names of Allah, see the article ALLAH, i. 3036.

KABĪR, an Indian mystic, of the 15th century, who was claimed both by the Hindus and Musalmāns as belonging to their faith. A large collection of Hindi verses is attributed to him, but their authenticity is doubtful, and a like uncertainty attaches to his biography, which is obscured by legends. He is said to have been the son, or adopted son, of a Muhammadan weaver, and to have become the disciple of Rāmānanda, the Vaishnav reformer, at whose feet he sat in
Benares, joining in the theological and philosophical arguments that his master held with Brahmins and Súfs. He appears to have earned his living as a weaver, and to have been a married man, the father of a family, and to have been as contemptuous of the professional asceticism of the Yógi as he was disregardful of the doctrines and ordinances of orthodoxy, whether Hindu or Muslim. The boldness with which he sang his mystical doctrine of the divine unity exposed him to persecution, and he is said to have been driven from Banaras in 1495, when he was about 60 years of age, and to have died at Maghar, in the district of Basut, in 1518. Legend says that his Hindu and Muslim disciples disputed as to the disposal of his body, which the former wished to burn and the latter to bury; when they lifted the cloth that covered the body, they found in place of the corpse only a heap of flowers; of these, the Hindus burnt half in Benares, while the Muslims buried the rest at Maghar, where the shrine is still in the charge of Muhammadan Kabir-Panthís. Modern scholars, like Kabir's contemporaries, claim him for one or other of the rival creeds: H. H. Wilson (op. cit., pp. 69, 74) and R. G. Bhandarkar (op. cit., p. 69) maintain that he was a Hindu; G. H. Westcott that he was a Muslim (op. cit., p. 29, note 107); G. A. Grierson's theory (Journ. R. As. Soc. 1907, pp. 385, 492) that he derived his opinions from Christian sources, may be dismissed as a pious fiction. A study of his poems makes it clear that he had no desire to attach himself to any organised religion: "Let me make self-relection my saddle, And put my foot in the stirrup of divine love... Sahír Kabír, they are good riders Who keep themselves aloof from the Vedas and the Kurá'n"; nor did he attempt to formulate any religious or philosophical system of his own, but he popularised the current Vaisñav teaching of his age, without however connecting it with any particular incarnation, and he spoke of God indifferently as Ráma, Hari, 'Alí or Alláh. He rejected the outward signs of Hinduism, e. g. the sacred thread, the distinctions of caste, the ritual observances of temple worship, etc., and his references to Muslim authorities and institutions (e. g. the Kurá'n, circumcision, pilgrimage, the Múllá, the Kájí etc.) are accompanied with a denial of their validity. He represented God as the omnipresent reality, but maintained the separate individuality of the human soul, which could attain union with God through love, not by knowledge or by ceremonial observances. Through his homely illustrations and his close contact with daily life, he presented his doctrines in a form readily acceptable to unlettered persons, who appear to form the majority of his followers.

(T. W. ARNOLD.)

KABIRPANTHÍS (Hindi puntí, path, sect). Despite the non-sectarian character of Kabír's teaching, his followers now form a distinct sect, the majority of whom are Hindus. The best ac- count of their organisation is given by Westcott, op. cit., chaps v. and vi. According to the Census of 1911, there were 597,199 in the Central Provinces, and 49,605 in the United Provinces; in the other provinces they either are not found at all, or their number is too inconsiderable to call for separate enumeration.

(T. W. ARNOLD.)

AL-KABÍSÍ, whose full name was 'Abd al-'Azíz also 'Abd al-Ráhím b. 'Óthmán b. 'Álí b. 'Ásír, an important astrologer probably of Persian descent. He was known to the Christian world of the middle ages as ALCABÍTUS(also AL-CHARBITUS). He lived for a considerable period at the court of Sultan 'Abd al-Hamíd (d. 356 = 969) and dedicated his principal astro- logical work to him: al-Madáríj ilí Šihad Asbák al-Nudjum (Introduction to the art of Astro- logy) of which copies still exist in Oxford, Gotha and Cairo. It was translated into Latin by Joh. Hispalensis. This translation was printed in Venice in 1481, 1485, 1491 and 1521. The edition of 1485 is entitled Libelli syagochici Abílasi, id est serví gloriosi Dei, qui dictur Alichbitus, ad magisterium judiciorum astrarum. Interpretatúra a Ioanne Hispalensi, Venetìs 1485. The edition of 1521 is called Praecratonis Alchabitis usus ad secundum stellarem mundi astrarum. A commentary on it was compiled by Joh. de Saxonía in 1331 and printed at Bologna in 1473, and again in 1485 and 1521 at Venice at the end of the editions of Alcabitius. Al-Kabíši also wrote several smaller astrological treatises. The dates of his birth and death are unknown.

Bibliography: A special article on this astrologer is given by al-Baihaki (c. 1150) alone among the Arab biographers, in his T arbík Huk- mám al-Islám (Ms. Leiden, 1324, Gol.), cf. E. Wiedemann, Bier. z. Gesch. der Naturwissenschaft., xx. 68; scattered notices are found in Fikrist, p. 265 (Abyd. Ed.); Khallílán (Cairo 2130), i. 365, trans. de Slane, ii. 335; Ibsk, Mu'djam, ed. Wüstenfeld, iv. 35. Cf. also H.
Suter in Abhandl. z. Gesch. d. mathem. Wis-
enschaft. x. 60, xvi. 165. (H. Suter.)

AL-KABİR. DİBAİL (DİBAİL) AL-KABİR of AL-
KABİR, as al-Tarā," i. 2660, 2664, 41, 2666, 16
and Yāḵūt iv. 314, 23 have it, and as should be
read, in al-Maʿrūf (ed. Paris) for al-
Kabāb, is a name for the Caucausus, common in
Muslim authors. Hubschmann, Armen. Granum.
(Leipzig 1867), i. 45 derives Kabīb from Arme-
nian Kāpēkh, Pehl. Kāfēkō. An older geographical conception regards this
chain as belonging to the Kāf [q. v.] range which
encloses the world (cf. B. Munkeste, Der Kaukasus
n. Ural as "Gürtel der Erde", in Keleti Szemle, i.
236 sqq.). The name Albūz is no doubt con-
nected with this idea, which Mustawfi, and ap-
parently following him Kāṭīb Celebi, give to the
Caucasus, while the name Kabīb (DİBahnumma,
K-7-1-7) is limited to its eastern (transl. p. 182
wrongly "western") side. Here the range appears
to be considered the continuation of the North Per-
sian mountain chain of the same name, with which
also are associated notions of its being the bound-
ary range of the world. (Cf. the article ALBURZ;
F. Justi Beitr. zur allgemeinen Geographie Persiens,
i. 4sqq., ii. 4 sqq.; Melgunow, Das südliche Ufer des
Kaspischen Meeres, p. 27). To similar con-
erations is probably to be ascribed the fact that
the Caucasus is connected with mountains which,
beginning with Dībaal al-ʿArдж between al-Madinah and
Mecca ( Ibn Khordadbeh, p. 172 infra sq.; Ibn
al-Fakih, p. 23, 7 sqq., 295, 5 sqq.) or in Yemen
(al-Hamdanī, Dīwānat al-Arbaʿī, p. 126, 92 sqq.)
run northwards through Arabia and Syria. The
connecting of these mountains with Kāf led to the
localisation in the Caucasus region of the rock,
sea and village (Kūrān xviii. 59 sqq.) known
from the legend of Moses (Alexander) ( Ibn
287, 14 sqq.; al-Mukaddasi, p. 46, 16 sqq.; Yāḵūt,
i. 220, 21 sqq., 454, 5 sqq., iii. 282, 9 sqq.).
The Caucasus has further been regarded as the
range beyond which dwelt Yāḏḏūd and Māḏḏūd
[q. v.]. The al-Saddān of Kūrān xviii. 89,
explained as "the two mountains", between which
Dhu l-Karain caused a barrier to be built to
check the inroads of Yāḏḏūd and Māḏḏūd is iden-
tified with Armenia and Ḍabārbaḏījan (al-Ta-
bari, Tafṣīr, xvi. 121 sqq.; al-Baiḍawi on Kūrān
xviii. 89). But when geographical knowledge was
extended, Yāḏḏūd and Māḏḏūd were placed farther
north.
The Sasanians in particular had closed the
Caucasus passes with fortifications to prevent the
inroads of the northern nomadic peoples. The
most famous of these passes (cf. Ibn Khordadbeh
p. 23, 13 sqq.; Yāḵūt, i. 439, 2 sqq.) are Bāb al-
Abwāb or Bāb Sūr or Derbend [q. v.] and Bāb
Allān, the gate of the Alans, or the Dariāl pass.
The multiplicity of ethnic groups and languages
in the Caucasus is mentioned by most Muslim
geographers. According to an oft recurring state-
ment (70 (72) different languages are found there
(Ibn al-Fakīh, p. 25; al-Muḥallabi, ii. 2) according
to al-Muḥallabi's Kūrān al-ʿAṣīrī (in Abu ʿl-ʿFida'),
as many as 300. Wherefore the mountain ranges
are also called Dībaal al-ʿĀlīn "Mountain of Lan-
guages" (Abu ʿl-ʿFida', Taḵīwīn al-Baldaun, ed.
Rein.
and de Slane, p. 71, 15 sqq., 393, 3 v. Ta-
rāsūlīn, 405, 5 v. Sarīr Allān).
For groups of peoples, states, and towns in the
Caucasus the reader is referred to the separate articles and the literature given below. See the articles ARKHĀZ, ALLĀN, ARMINYA, ARRĀN, BĀKū
BARDAHĪ, BAGHESTAN, DEREBD, GANA."
phers call this river by various names. Al-Bīrūnī speaks of the River Ghurwand which falls into the Indus below Wairand, the capital of al-Kandahār (i.e. Gandhāra). This name is taken from the Ghurwand Pass near which the Pandj-hā River rises. Al-Maʿṣūdi says “the fourth river of the Pandj- hā comes from the country of Kābul and its mountains which form the frontier of al-Sind”. The modern name of the river in Pashto is Sīnd, (also a general term for “river”). Bābur speaks of the Sīnd river as rising in a mountain to the west of Kābul, and no doubt also to the Kābul, that is somewhere where is applied the name Sīnd to the Indus. The name Kāma given by Elphinstone (Appendix on Rivers) appears to be a misnomer, as Kāma is the name of a tributary only.

The town and district of Kābul seem to have taken their name from the river.

2. An important city, now the capital of Afghānistān, situated in 34°30′N. 69°13′E. 5780 ft. above sea-level, in a fertile and well watered plateau. Population about 150,000.

Although the Kābul River under various names [q.v.] is known from the earliest times, there is no mention of any town which can be identified with the capital city of Kābul. Some name of a Kābuli appears by some to be Kāboura, and the people by names Būlīti are conjectured to be properly Kābolītai or people of Kābul, but these guesses rest on no evidence. Kāphēnē is probably the name of the whole valley derived from the river Kāphēn.

This territory was reoccupied by the Bactrian King Demetrios and formed a Greek kingdom until about the commencement of the Christian Era. The Parthian Gondophares seems to have held it for a time and the Kūsāni invaders were in possession of it during the 1st century. A vase bearing an inscription of King Huvishka has been found at Wardak near Kābul Buddhism was the religion at this period. The Kūsāni were supplanted by the Eūthalitai for a period, but some branches of the race seem to have recovered power afterwards, and held it when Hūsen Thang passed through in 657 A.D. Kao-foo is the name given to Kābul by the Chinese at this period. Buddhism was gradually replaced by Brahmanism, and this was the religion of the later Kūsāni kings, known by the title of Shāhī, who, as we learn from al-Berunti, were superseded by their Brahman waizirs, probably about the time of the first Muhammadan invasions. It is probable that after the first invasions the Hindu kingdom of Gandhāra was ruled from its capital, Udabhanda (or Wairand) on the Indus, and extended to the foot of the mountains west of Djalalākād, but did not include Kābul proper, which continued as a separate principality under its own Shāhī, sometimes under Muhammadan influence and sometimes independent, till Ṣabuktīgin’s time. By the earliest Arab chroniclers the country as a whole is termed Kandāhār i.e. Gandhāra, which has often been mistaken for the town of Kandahār. Thus Ţabarti tells us that under Ūmar in the year 23 Ḍāsim b. Amr and “Abd Allah b. Omair passed on through Sistān as far as the Indian frontier and Kandahār. The town of Kābul is not referred to, mentioned, the Kābul Valley and the adjacent Kābul moves up to the Hindu Kush passes being described as the country of the Kābul-Shāh and the capital as an inaccessible mountain fort of an uncertain name (read Djurwas by Le Strange). Yaḵūbī says that it was conquered under Ūthman by Ūbd al-Rahmān b. Samura, but when he wrote it was known only by the export of the Chebulic (or Kābuli) myrrobalsans. Another expedition followed in Muḥāwiya’s time, and again in 176 (793) under Ḥārūn al-Raṣīd an army from Balkh invaded the valley from the north via the Bāmiyān Pass. There was another invasion in the time of al-Ma’mūn, which led to the submission of the Kābul-Shāh and his acceptance of Islam. These expeditions seem to have led to a nominal submission and acceptance of Islam but there seems to have been no actual occupation before that of the Šaffārīn in 257 (871). Pandjābīr with its silver mines was no doubt a powerful attraction and coins were struck there by Yaḵūb b. Laḥī. But it cannot be said that the name of Kābul applied to any particular town until later, and in any case it was not an important centre. It may be noted that the attack made by Yaḵūb b. Laḥī was from the north by way of the Hindu Kush passes, and not by the more obvious route from Sīdjiśān, by way of the Arghanā Valley and Ghāzna. The ruler of Kābul at this period is described as a Turk by race and a Buddhist by religion, and it is probable that he was a representative of the later is an ancestor of the Īrānīs [cf. AFGHANISTĀN, i. 161].

It was never a mint town before the time of the Mughal Emperors. Coins were first struck there by Bābur [see art. BĀBER]. Throughout the rule of the Ghaznavīs [q.v.] and Ghōrīs [q.v.] Ghāzna was the capital. Al-Idrīsī mentions Kābul as a large Indian city on the border of Ṣukhārīstān, and adds that no ruler could take the title of Shāhī till he had been inaugurated at Kābul. His information was probably derived from authorities much earlier than his own period, when the kingdom of the Shāhis had long ceased to exist.

It seems probable that the frequent destruction of Ghāzna led to the rise of Kābul and after Timūr’s time it became the centre of a principality under some members of his family. After the death of Abū Saʿīd [q.v.], his son Ulugh Beg obtained possession of Kābul and held it till his death. His son was expelled by Mūkim, a son of Dhu ‘l-Nūn Beg Arghūn, who in his turn was driven out by Bābur in 910 (1504). This formed the foundation of Bābur’s Indian empire, and even when his son Ḥumāyūn was driven out of India, Kābul was not lost by the family, but was held first by Kārmīn and afterwards by Ḥumāyūn himself till India was recovered. Bābur was fond of Kābul, and gives an enthusiastic description of its climate, its streams, its fruits and flowers. After his death at Agra his body was brought to Kābul and his tomb still exists in a garden laid out by himself near the town. From this time the history of Kābul is bound up with that of the Mughal Empire of India. It became a mint for gold, silver and copper, and coins of most of the emperors are found up till the time of Muḥammad Shāh. In 1738 it fell into the hands of Nādir Shāh, and although a rupee of the emperor ‘Alamgīr II was struck there after Nādir Shāh’s death, it never again belonged to the empire, but was very soon taken by ‘Alamgīr Durrānī [q.v.]. It soon superseded Kandahār as the capital of the Durrānī dominions, and has continued to hold that position under Sadozai and Barakzai till the present day. [For history see under art. AFGHANISTĀN, i. 169 sqq.]. The town grew in prosperity as the capital of an important kingdom, although it suffi-
ered much during the various wars, especially those between 1839–1842 between the Sadorais and Barakais, in which the British army of occupation took part, and in the civil war between Shēr ‘Ali and his brothers. Under ‘Abd al-Rahmān Khān [q.v.] and ʿAbd Allāh the town has been improved and good roads and bazaars constructed. The Bālā Ḩijār or old palace citadel on a rocky hill has been dismantled. On the upper part has become an arsenal. A new fortified palace known as the ‘Ark was built by ‘Abd al-Rahmān outside the town between Shērpūr and ʿAlamgirān.

In addition to the tomb of Bābur mentioned above, the tomb of Tīmūr Shāh Durrānī is also near Kābul. 3. Kābul is also the name of the province in which the capital is situated. It is bounded on the north by Afghan Turkistan, on the west by Herāt, on the south by Kandahār and on the east by Džalalābād. It includes the Paghmān Mts. to the north-west and the Hazārd,ānd in the south-west. Ghāzni is comprised in its limits, and the boundary between Kābul and Džalalābād is at Džalgalak.

(K. Longworth Dames)

KĀBUL (a). Acceptance of the offer (in contracts); see Īdāb. KĀBŪS b. WAshmīrī, Shams al-Maʿālī, Aḥūn al-Hasan, nephew of Mirdwijdī b. Ziyār and fourth ruler of the Ziyārid dynasty (his genealogy is given by his grandson, Kābul ʿAbd al-Maʿālī in his preface to the Kābulīnamah). Called to the throne by a military conspiracy, in 366 (976) he succeeded his brother Zahir al-Dīn Bahāstīn as ruler of Džurdjān and Tābaristān. When the Bāyīd Fakhr al-Dawla [q.v.] had quarrelled with his brother ʿAḏud al-Dawla [q.v.] and the latter deprived him of his whole kingdom in 369 (979/80) Fakhr al-Dawla took refuge with his father-in-law Kābul. As the latter declined to hand him over to the victor, ʿAḏud al-Dawla sent a force against Kābul who after a defeat at Astarābād in 371 (981/2) fled with his protégé to Nishāpūr to ʿHazām al-Dawla, governor of Khorāsān under the Sāmānid Nūḥ b. Maḥsūr. The latter sought to conquer Tābaristān for himself, but ʿHusām was defeated. On the death of the Vizier, Abu ʿl-Husān al-Uṭūa, ʿHusām was summoned to Bukhāra to succeed him and took Fakhr al-Dawla and Kābul with him. Soon after the death of ʿAḏud al-Dawla at Baghābdād (371 = 983) Fakhr al-Dawla gradually reconquered Džurdjān and Tābaristān and wished to restore them to Kābul but was persuaded by his vizier Ibn ʿAbād al-Šāhīb [q.v.] to keep them for himself. After the death of Fakhr al-Dawla however Kābul regained his inheritance about seventeen years' exile in 388 (998) and held it till in 403 (1012) his tyranny and the many executions ordered by him produced a rising of the troops, who deposed him and put on the throne his son Minūṣīr, who was summoned from Tābaristān. Soon afterwards he was put to death by the rebels in the fortress of Džurshākh between Džurdjān and Tābaristān by being deprived of his clothes, while engaged in his religious aubiations, and then allowed to perish of cold. He was learned in several branches of knowledge, particularly astrology, and left several short treatises (rasā’ilī) as well as Persian and Arabic poems. He was also a distinguished calligrapher. The poets Ābā Bakr Muḥammad b. ʿAli of Sārkhāsh and Ziyād b. Muḥammad of Džurdjān sang his praises (Muḥammad ʿAwfī, Lūbāb al-ʿAbdī, ii. 18, 19).

(CL. Huart.)

KABYLIA, a mountainous country in the Algerian Tell. The name Kabylia or land of the Kabyles (Arab. Bilād al-Kabīlī) is of comparatively modern origin; it is not found in the Arab historians or geographers, nor is it usual among the natives. It seems only to have been introduced as a geographical name by European scholars since the sixteenth century. The name Kabylia is taken from the Arabic kabīl, plural of kabīl, tribe; which some Arab writers use as a synonym for Berbers; this is found as early as the author of the Kīrīf, who several times (e.g. p. 217 and 238 of the Arabic text), in detailing the contingents of troops in the Marinid armies, carefully distinguishes the Kabīlī from the Arabs.

The European geographers sometimes give the name Kabylia to the whole mountain system of the Algerian coast from the mouth of the Isser to the Tunisian frontier. These elevations show in fact several common characteristics: predominance of the older strata with a few less extensive chalk zones intervening, an irregular outline, a striking development of forest flora, a population consisting of settled tribes who for the most part have retained their Berber dialects. According to the different mountain ranges, Kabylia is divided into the following fairly well defined areas: Great Kabylia or Kabylia of the Djerdja, Little Kabylia or Kabylia of the Babour mountains between the Soumm in the west and the Wād al-Kabīr in the east, Kabylia of the Collo, Kabylia of the Diebel Edugh and Kabylia of Bōna. The first named of these areas is the most extensive and has the most marked character; it is therefore called Kabylia by preference and we shall deal with it alone in the following.

Great Kabylia is bounded on the north by the Mediterranean from the mouth of the Wād Buḍuṣ to Bougie, i. e. for a length of 100 miles. In the east it is bounded by the eastern shores of the Wād Sāhel (called Soumm in its low course) and by the upper course of the Isser, in the west
by the valley of the Wād Būdān and the Mi-
tidja plain. The area thus included measures about
41 miles from N. to S. between Delys and Bwira
(Bouira) and covers some 2307 square miles. Ac-
cess is rather difficult except from the west. Here
the gateway of Mēnerville (pass of the Beni Aūsha
450 feet high), the valley of the lower Iisser, the
depression of the Wād Shander and the pass of
Haussonvillers (600 feet) afford an easy access to
the Kabyl plain i. e. the heart of Kabylia.

Kabylia falls into three separate areas very
different from each other: the Kabylian mountains
in the narrower sense, the Djerđura chain and
the coast range. The Kabylian mountains "consist
in the centre chiefly of gneiss and micaceous
schists with larger or smaller intrusions of granu-
litic rocks and, on the flanks, of archaic schists
and primary argillaceous schists, the layers of
which form the outer spurs with their gentler
slopes. In the west of these mountains and sepa-
rated from the main group by tertiary deposits
rise several isolated rocky peaks: Bit Āris, the ma-
mountain of the Khâghna (2050 feet), the Djebel
Bellâwa (2200 feet) on the north side of the Tassili
and the central part of the Djerđura and cut
off on the other sides by a continuous de-
pression, in the north by the valley of the Sebou,
as much as 11 miles broad, in the west by the
valley of Draj al-Mirān and in the south by the
depression of Bughni. The whole system, sloping
from west to east (from 2225 to 1950 feet) is
divided by deep and narrow valleys into mountai-
neous blocks (hills of the Maqata, the Flissa
and of the Zwa, etc.).

The Djerđura forms in the south the edge of the
Kabyl massif for about 40 miles from Tizi (Berber = pass) Djeblit (350 feet) to Tizi-n’Shria
(4010 feet). It consists of lies limestone, split
up into a series of sharp combs or steep rocky
walls, and maintains an elevation of a little over
6500 feet. The highest summits, which run in two
rows, are the Haizer (6935 feet) and the Akukur
(7490 feet) in the north and in the south the
Lalla Khadidja (7500 feet). This altitude and the
scarcity of the passes, which are impassable in
the winter (the most important is the Tirurda
Pass (8655 feet), make traffic between the two
slopes very difficult. In the east of the Djerđura
proper, in the Djebel Arbal, there reappear
scattered layers of limestone, running down to
the sea where they end in the Gūraya of Bougie.

At a lower elevation (2500—3000 feet) the
coast range stretches along the sea-coast from the
mouth of the Sebou to the Djebel Aksfadi and
covers the greater part of eastern Kabylia with its
sandstone formations.

From this variation in elevation and geological
structure result marked differences in climatic con-
ditions. In the valleys, notably in the basin of
the Sebou, cut off from the sea by the coast
range, the summer is very hot (mean July tem-
perature in Tizi Uss 33° C.). In the Kabyl moun-
tain country on the other hand there is a long
cold winter, during which the ground is often
continually covered with snow, which lies on the
summits of the Djerđura from December to June.
The rainfall is unevenly distributed — being par-
ticularly heavy in the east of the district where it
averages 40 inches p. a., while the lowlands, nota-
tibly that of the Wād Sāhel-Summam, which is shel-
tered from the moist winds by the wall of the
Djerđura, are relatively dry. Nevertheless Kabylia
is one of the best watered areas in Algeria. Four
river-systems are distinguished: — the Isser, the
Wād Sāhel-Summam, the coast rivers, and the
Sebou. The latter collects the water from the
north slope of the Djerđura, supplied by tribu-
taries, flowing at the bottom of narrow valleys
cut through the Kabylian mountains. None of all
these water-courses is navigable; they are all
mountain torrents and are able to considerable
variations in their amount of water. The winter
rains and the melting of the snow produce a con-
siderable, often devastating, increase in their
volume.

Lying within the so-called Numidian zone which
is marked by luxuriant forests, Kabylia does not
have the treeless appearance of most Algerian
landscapes. The flint and sandstone formations
of the eastern part support great wooded moun-
tains (Yakur, Tizi Ufella, Aksfadi etc.) which
are covered with different kinds of oaks such as
the cork, the sān (chènes sèns, quercus Mirteckii),
the afores (quercus castaneofolia) and bāllūt or
pine-nut oak. Several cedar plantations, which
however are on the verge of extinction, dominate
slopes of the Djerđura up to a height of 3900
feet. Trees are especially cultivated in the Kabyl
mountains where they afford the inhabitants the
greater part of their resources. The leaves of
the ash-trees are used to feed the cattle, while its
wood is used for agricultural and domestic imple-
mants and vines sometimes cluster round their
stems. The fig and olive trees, the first of which
is grown up to 3250 feet and the latter to 1950
feet, play an important part in the life of the Kabyls.
Dried figs and oil form the basis of the food of
the population; the superfluity is sold abroad.
These fruit trees are therefore cultivated with the
greatest care and in increasing numbers, so that
we find fig and olive trees even on almost inacces-
sible slopes, where the soil has to be supported
by mortarless stone walls. Vegetable fields and orchards
surround the houses and villages and their pro-
duce serves to supply the daily wants of the
inhabitants. Wheat is grown only on the low-lying
ground and as a rule only in the districts settled
by Europeans. As the scarcity of meadows hardly
allows cattle to be reared, the native stock con-
sists of a few cattle and sheep and a large num-
ber of goats. The mule is the only suitable beast
of burden for this mountainous region.

Kabylia is the most populous part of Algeria as
it has about 660,000 inhabitants or 250 to the
square mile. The population however is very
unevenly distributed. Scattered in Djerđura, com-
paratively thin in the forest region, it is however
very dense in the Kabylian mountains where the
soil of the nature and abundant springs afford
more favourable conditions for human settle-
mants. The mixed community of Fort National and that
of Djerđura number, the former 61,726 to 145
miles, the latter 66,353 to 125 miles that is about
418 and 530 to the square mile or about the
density of population in Holland. The natives live
in groups in villages, sometimes up to several
thousand in one village. These settlements lie on
the hill-tops or on the mountain ridges which se-
parate the valleys from one another. The choice
of site was settled by consideration for the most
profitable use of the arable part of the slopes
and also for the necessity for securing a defenc
against neighbouring tribes. Surrounded by a belt of gardens protected by cactus hedges and encircling walls of stone without mortar, accessible only by steep paths, these villages were really fortresses, sometimes impregnable to an opponent unless provided with artillery. Since however the French occupation guarantees the peace of the land, the natives show a certain tendency to leave the summits and move their dwellings nearer to the valley. In spite of the picturesque appearance which the closely huddled together white houses with their brown tiles make, these villages are in reality only piles of wretched dirty hovels. Most of the houses consist of one storey only and have neither windows nor chimney. As a rule they are divided into two by a wall breast high, of which one part is for men and the other for cattle. The very scanty furnishing consists chiefly of mats, which take the place of bedding, and stone vessels, which hold the family provisions. The groups of houses are separated from one another by narrow passages, which are just broad enough to allow a loaded mule through, and are enshrouded in the dust of the native road. The only public building is the mosque which, only recognisable by its minaret, is in almost as miserable a condition as the private dwelling houses. As there are no shops in the village where the natives could make their necessary purchases, they have to go to a market (ṣīḥ) which is held weekly at a definite place, usually in the neighbourhood of a river or spring. This market has a great attraction for the Kabyls as they come to it not only to purchase food and other necessaries but also to meet the inhabitants of other villages and learn what is going on. The market usages have therefore been very strictly regulated. The market formed a neutral area, visitors to it enjoyed a special protection called "ṣānṣa of the market".

The Kabyl population is increasing steadily and rapidly, but the soil, which is of only average fertility, in spite of the aptitude of its inhabitants cannot support them all. The once flourishing native industries such as weaving, making carpets, ornaments, and arms (especially among the Flissa and the Banī Yenni) are disappearing more and more before European competition. The natives thus find themselves forced to leave their native land and seek work outside it, as moreover they used to do in earlier times also. Under Turkish rule the dwellers used to come in considerable numbers to Algiers to gain a livelihood as servants, porters or gardeners. Others, notably the Banā Yahyā, the Banī Iliten and the Banī Šāfā, went about among the Arab tribes as peddlars (ṣittarēn) and combined money-lending with commerce, as their descendants still do. The French conquest and the expansion of colonisation have opened new outlets for the industry of the natives. While they work in the coast towns as bricklayers, hodmen, and dock labourers, the Kabyls at the same time supply the farmers of the Tell of Algiers and Constantine with the labour so necessary for the harvest and vintage. They also readily labour on public works as well as in the mines of Algeria and Tunisia and for some years past in those of France also. Others again enlist in the native regiments, especially the tirailleurs. But the Kabyl's emigration is only temporary: — as soon as the pedlar, the agricultural labourer or the miner has saved a little capital, he returns to his village to buy a strip of land or at least a few trees at the earliest opportunity. The impulse to acquire property is very strong in them and the land is thus broken up into very small shares.

The Kabyls form the most important and at the same time the most compact Berber group in all Algeria. Yet they cannot be regarded as aboriginal and are descendants of the old African race which inhabited North Africa before the foreign conquests and the immigrations of the historical period. The very formation of the country made it a place of refuge for the inhabitants of the plateaus and valleys, who were pushed back by the continual inroads of foreign peoples into North Africa. In addition, as Hanoteau points out, Kabylia was at all times an asylum for outlaws and evil doers. The present Kabyl type is therefore the result of numerous crossings and far from being homogeneous. Many individuals can hardly be distinguished from Arabs, others and indeed the greater number, with their large bones, their square heads and their coarse face, are a mixture of Central and North African. As to the colour of their hair, two types can be distinguished, the brown and the much rarer blonde. Yet in spite of these differences, the natives of Kabylia have all the linguistic, social and religious peculiarities common to all the tribes described as Berber. They talk different Berber dialects, of which the Zwāwa spoken in Jdūrīja and in the Kabyl mountains is the commonest. "The Zwāwa, especially the Beni Raten, are those who, owing to their isolation, are considered to have preserved the purest Berber dialect; this gradually changes by almost imperceptible degrees as one goes westward into the dialect of the Ait Khaflīn and eastward into the dialect of the Wādī Šāhël (Wad Sāhil) and that of Bougie."

(R. Basset, Études sur les dialectes Berbères, Paris, 1894, Introd., p. viii.). The linguistic frontier even crosses the geographical boundaries of Great Kabylia and follows the watershed between the basin of the Wād Bī-Sellām and that of the Wād al-Kābir. The persistence of these dialects is all the more remarkable as the French occupation, the extension of Muslim as well as European education and finally the continual development of emigration seemed likely to bring about a rapid decline in the use of Berber. Although many natives have a more or less superficial knowledge of Arabic and French, Kabyl is nevertheless still the language of the home, and the only language used by the women and children in the villages. In many districts a decline in Arabic has been noted. In the quartier de la Grande Mosquée, for example, several Arabic speaking groups comprising some 18,400 persons have become completely berberised in the last few years (E. Dousté and E. F. Gautier, Études sur la dispersion de la langue berbère en Algérie, Algiers 1913).

The Kabyls possess no written literature but have a fairly varied and copious popular literature (songs, often inspired by current events, fairy tales, riddles, etc.). These productions, composed by illiterate people, often women, have been handed down by oral tradition and transmitted from village to village by wandering singers whose profession is often hereditary. Some of these singers (meddāb, fakīh) who sang the praises of the Dey, the faults of the tribes and the heroic deeds of the warriors, were held in high esteem by their
countrymen; others again who sang songs of love or humour to the accompaniment of the tambourine or the oboe were as despised as the butchers, measurers of corn and other individuals, who followed a trade regarded as degrading.

As Muslims, the Kabyls, like the other Berber tribes, adopted the creed without recognising the Kur'ān as law (see HERBERT, i. 702). Their customs are in many points contrary to orthodoxy. Lending money at interest, condemned in the Kur'ān, is generally allowed. "The acceptance of the principle that money is to be considered as goods," writes Hanoteau, "is a characteristic feature of Kabyl society which in order to remain true to its traditions has not shrunk from showing its contempt for the punishment of exclusion from the Muslim community, threatened as a punishment for usury". (Hanoteau and LE-TOURNEUX, La Kabylie et les coutumes kabyles, ii. 497.) The social and material position of women is far behind that assured her by Muslim law. All rights, being continually in tutelage; excluded from participation in the paternal inheritance, she herself is one of the family chattels. Marriage is merely an act of purchase. The man who divorces his wife still remains her owner and he fixes the price which must be paid him before she can marry again. Polygamy is legal but little practised and only a few marabouts are rich enough to afford it. The position of woman thus appears a very miserable one; she is, according to Hanoteau, "a human chattel" (Poeésies populaires de la Kabylie du Fjurdjara, p. 287). In practice, however, it appears that her position is easier than one would expect, as the local customs are not rigid, and an important place in the family and even in the villages, and, according to some authors (Rînî, Masqueray, Bouïfa), she exercises a role that means negligible influence in domestic life and even in public life.

In spite of the liberties they take with orthodoxy, the Kabyls are not, as is sometimes alleged, lukewarm Muslims. They have always been and still are to-day very susceptible to the influence of fanatics. Perhaps they, at one time, like many other Berber groups, embraced Khâridjî doctrines but they were regained for orthodox Islam at the beginning of the modern era and have since then remained steadfast in their faith. Their ignorance, it is true, leaves them defenceless against the incitements of marabouts. The latter held and still hold a special position in Kabyl society. Enjoying numerous privileges (exemption from taxation, entertainment allowances etc.) they were not expected to bear arms except in the holy war and, thus placed outside tribal wars and quarrels of the gelf, they kept for themselves the fruitful roles of intermediaries and peacemakers. The only representatives of education in the midst of an illiterate population, they gave the rudiments of instruction in the village schools and in the schools attached to the sîwâya, a word which among the Kabyls means a village exclusively inhabited by marabouts. Education in these schools (Kabyl thîmmâmr, Arab. madîrâ) is confined to the elements of Arabic language and grammar, theology and law. The marabouts live either scattered among the people or grouped in families or tribes. Some claim for themselves an Arab or even Sha'ri fi origin. These Shîrîf form a privileged caste and only marry among themselves. At all periods the past played by marabouts — male and female — has been considerable. It was they who stirred up the native resistance to the foreigners, Turk or French, who tried to conquer them. They were supported by the religious orders, of which the largest is that of the Rahmania, which originated in Kabylia itself under the marabout Sîlî Muhammâd 'Abî al-Rahmân Bû Khoirân, sprung from the tribe of the Ait Smâîl, who lived from 1126—1208 (1715—1798). Recruited at first from the Guechèula, a confederacy of which the Ait Smâîl were part, the order gradually extended throughout Kabylia. Its chiefs were the fiercest opponents of the French in 1857 and in 1871; although its influence has declined, the brotherhood of the Rahmâniya, of which the parent lodge is at Akiû, is still that which numbers most adepts (9000 members and 43 sîwâys in 1897, according to DEPONT and COPPOLANI, Les Confréries religieuses du Maghreb). History. Practically nothing is known of the history of Kabylia before the 18th century A.D. There are no native chronicles and the notices supplied by Arab, Latin or European writers are few and fragmentary. The characteristic fact of Kabyl history during this long period seems to have been the resistance of the Kabyls to foreign penetration. In ancient times even the Romans did not succeed in establishing themselves in the massif. Their principal settlements Sâldae (Bougie) Rucacuza (Tiziirt), Rusucurru (Dellys) were situated on the coast. Military posts kept a watch on the valley of Wâd Sâhel and of the Iser, but the Bôjirjara (Mons Perunas) remained politically independent under the rule of native chiefs, vasalls of Rome. The inhabitants of the mountainous region formed the confederation of the Five Nations or Quinque Gentes: — the Massisenses (perhaps the Mlisma of the Wâd Sâhel), Tsaflenses (Iliissens?), Jabubeni (Beni Jubaar), Tendenses and Jasabenses. These natives rose in revolt several times, notably in the first century A.D., during the rebellion of Tacfarinas, then again in the time of Dioecletian. From 285—297, they ravaged eastern Mauretania and western Numidia. To subdue them, Maximian had to depopulate them de masse. In the following century they adopted Donatist doctrines and again took up arms under their national leaders, Firmus (372—375 A.D.) and later Gildon. We do not know at what period and under what conditions, Islam was introduced into Kabylia, taking the place of Christianity and paganism. We may, however, conjecture that this land must have for some time escaped the Arab conquest and served as a place of refuge for the last remnants of Roman and Byzantine population as well as for the Berber tribes fleeing before the invaders. In the 6th century however, the conversion to Islam was an accomplished fact, since Ibn Khdalîn (Histoire des Berbères, transl. of Slane, i. 256) mentions the Zwâwa at the same time as the Ketâma among the pariahs of 'Obaid Allah and the founders of the Fatimid empire. Well treated by the Şanhadjî Zirids, the Kabyls then passed under the rule of the Mmâmidîs, who reduced to obedience the mountain peoples of the Bougie region, and then under the sway of the Hafsids. But Ibn Khaldûn himself says that the authority of the sovereigns of Bougie over the Kabyl tribes was quite nominal [cf. IRÂÌÍN, Zwâwa].
At the beginning of the xvith century, the people of Kabylia were divided into three political groupings called by western writers, the kingdom of Kūko, the kingdom of Lābbes, and the principality of the Beni Jubar. The kingdom of Kūko stretched from Djiurdjura to the sea, and through the port of Azzefûn was in touch with European countries. The kingdom of Lābbes comprised several tribes of little Kabylia of which the most important was that of the Beni ʿAbbas in the east of the Wād Sāhīl [cf. the article KALĀT BANĪ ʿABBĀS]. The principality of the Beni Jubar comprised the population of the coast east of Bougie. The Turks who first appeared in Algeria at the same time and there founded a powerful state, relied on these different groups in turn. ʿArādī contracted a close alliance with the Sulṭān of Kūko, Ahmad b. al-Kādī, who gave him auxiliaries and took part in the expeditions against Algiers and Tiemcen [see ʿARDH], but he thereby alienated the Beni ʿAbbas, who took the side of the Spaniards. After the death of ʿArādī, ibn al-Kādī quarrelled with his successor Khaīr al-Dīn [q. v.]; he inflicted a bloody defeat on him on the land of the Flissat Umellī, and remained for several years master of Algeria and of Mīdītā. An alliance with the Beni ʿAbbas enabled the Turks to regain the advantage. Pursued right into their mountains, the Kabylia were forced to submit and to pay tribute. During the period of the Beylerbeys, the inhabitants of great Kabylia lived on good terms with the Turks. Khaīr al-Dīn and his successors recruited from among the Zwāwa soldiers whose fidelity they appreciated and on whom they could rely if necessary against the undisciplined soldiers of the Janissaries. The alliance with the Sulṭān of Kūko enabled Ḥassān b. Khaīr al-Dīn to triumph over the Sulṭān of Lābbes who became in his turn a tributary of the Turks (1550). As to the ʿAbd al-Djaḥābār, they had shown themselves friendly to the Spaniards and after the reoccupation of Bougie by the Turks never ceased to wage war on its garrison.

The rulers of Algiers did not however succeed in definitely imposing their supremacy on the Kabyls. The latter during the closing years of the xvith century and during the whole of the next century, were in a state of almost permanent insurrection against the Turks. The expeditions undertaken by the Pashas to chastise the rebels yielded no permanent result. The conquered tribes agreed to pay tribute but cast off the obligation as soon as the Turkish columns had quitted the country. In the course of these struggles, important changes modified the political organisation of Kabylia. The kingdom of Kūko disappeared and was replaced by the confederation of the Zwāwa. A new confederation that of the Gueḥšāla (Iqūṣshāl) was founded in the middle of the xviith century by a shāikh named Gassem and united together the population of the western part of the Djiurdjura. In the xviiith century, the Turks made some progress. They succeeded in taking the mountainous region between the Wād Buğdurta and the Wād ʿAssī (1745—46) but could not subdue the Bani Rūṭen. Their military ports at Buğhnu, Bwira, Burdi Sebā, were destroyed on several occasions. The first years of the xixth century were still more unfortunate. The Flissat invaded Mīdītā several times; in 1816 the Gueḥšāla seized the burdij of Buğhnu and only spared the garrison at the intervention of the marabouts.

Turkish authority in Kabylia was therefore up to the end very precarious. The tribes which recognised it were distributed over two kaʿids: the kaʿid of Buğhnu, which included the confederations of the Gueḥšāla, the Bani Sāaḍa and a part of the Maʿātika, and the kaʿid of the Sebā, including, besides the town of Delys, the Bani Kahlīna, the Bani Waguennūn, the Flissat al-Bahar, the peoples of the upper Sebā and those of the Wād al-Ḥamāmūl. In the north-east, finally, the Turks occupied Bougie. To maintain order in the country they(prog. number=1, start=152, end=155, label=Fig. 4.2) established at a few land the a few hundred janissaries installed in fortified posts (burdij), and smala, of which several were composed of negroes (ʿabāt). They levied taxes—which were however quite light—on the produce of the plain, collected dues in kind (sheep, grain, figs & oil) for the use of the garisons, claimed the right of investiture of shāikhs and granted for a fee passports to natives, etc. In return the Turks interfered very little in local affairs and only did so when they thought they could make profit out of it. The most efficacious means employed by them to bring recalcitrant tribes to order was the blockade. As the country did not produce enough grain to feed its inhabitants they were not long in submitting. The Turks, moreover, observed local divisions with the greatest care and showed themselves full of consideration for influential marabouts, to whom they gave exceptional privileges. They heaped gifts on their sāwiyas and built kubahs on the tombs of the most venerated saints. Turkish rule therefore has left no feeling of hatred among the Kabyls. "The Turk", says Hanoteau (Poeésies populaires de la Kabylie du Foujura, p. 63—64 note), "is the type of bravery and dignity in the popular songs; when the poet wants to praise one of his compatriots, he compares him to a Turk".

Where nominally subject to the Turks or completely independent, the Kabyl tribes preserved intact their political and administrative institutions. Kabylia, far from forming a state, was simply an aggregation of little municipal republics, grouped in confederations of small size. The political and administrative unity was the village (ḥadārli), whether a single village or a union of several hamlets (ṭaḥk) and subdivided again into divisions called by different names in different districts (adrīm, tharīf, tāqāhriḥ, ḥārāk). Several villages bound together by mutual obligations formed a tribe (ṭaršā). At the time of the French conquest there were 1400 villages divided among 120 tribes. A confederacy of several tribes was called a thāqibāt (Arab. qabīla). The chief of these confederations were those of the Gueḥšāla, the Ait Šeqa, the Zwāwa, the Eastern Zwāwa, the Ait Irida, the Ait ʿAssī, the Maʿātika, the Flissat Umellī and the Flissat al-Bahar (Ḥlis- sen), the Ait Waguennūn, the Ait Djenma, the Ait Chobri, etc.). In certain cases several confederations could unite for some common defensive or aggressive purpose, but such leagues had never more than a temporary character. All tribes however were not grouped into confederacies and some were content merely to contract, when in case of need, temporary alliances with their neighbours.

The village, the fundamental element in the

Kabyl organisation was a kind of municipal republic subject to the authority of the assembly of its citizens (the ūnama, or ūme). This had most extensive powers. It appointed a president (amakru, amar, año), who was charged with carrying out its decisions, and tenmman (plural of ūmen), a kind of assistants, who had to supervise the aman in the exercise of his duties. The qamāla fixed the quota and the assessment of taxes. As declared war, made peace, administered public charity and, lastly, modified, if necessary, local customs. All male inhabitants old enough to observe the fast of Ramadān took part in the assembly and were bound to be present, but in practice decisions were made by a minority of rich and influential persons, so that the government of the village was only democratic in theory. The authority of the qamāla was, besides, limited by the obligation under which it found itself to respect the rights of individuals or families, kindred or collective guarantees sanctified by long custom, market-laws, etc. The tribe, and the council with which it was identified, was the chief legal and political unit. The relations of the tribes and confederations were based on feudal considerations.

The capture of Algiers by the French in 1830 put an end to Turkish rule. On hearing of this event, the garrisons retired to the Titteri, leaving the country to itself. The Kabyls, however, proved themselves no more able to unite than they had in the past. Various chiefs, Ben Sâlem of the Baidīya, Dâd Zamun of the Flissa, St Djâdi of the Zemāna, Bouman or Hammoud es-Skâd, attempted to ascend the throne, but without any success. The French, their forerunners, had been in occupation of Bougie since 1833, while the Kabyls of the east made frequent incursions into the Mitidja. To dispose of such dangerous neighbours the government therefore decided to conquer Kabylia at a time when 'Abd al-Kâdir seemed definitely reduced to impotence. A first expedition conducted by Bugœaud in the valley of the Sebou resulted in the submission of the Flissat al-Bâh and the occupation of Delles (1844). Interrupted by the Franco-Moroccan War, then by the struggle with 'Abd al-Kâdir, who in 1849 again tried to raise the Kabyl tribes, operations were resumed in 1847 and brought the tribes of Wad Sâhel to recognise French authority. But the Kabyl massif and the Djurdjura served as an asylum for all malcontents and continued to be a smouldering fire of rebellion, which was continually blazing out again. In 1849, the Zîwâ, the Gueshtâla, and the Banû Mellîkhâ attacked the tribes who had already submitted; in 1851, the Shérif Bûl Baghî, with several thousands of mountaineers threatened Bougie, then, repulsed by French troops, sought refuge in the Djurdjura. Pelissier in 1851, Bouquet in 1852 had to take the field against him.

To facilitate penetration of the country, roads were built from Algiers to Bougie, from Delles to Aumale and finally from Sétif to Bougie across Little Kabylia, only recently pacified. The natives, however, were not yet subdued; they took advantage of the reduction of the effective troops during the Crimean war to take up arms again. The rising of the tribes of the upper Sebou necessitated the dispatch of a column which crossed the country between Bougie and Delles and pushed as far as the Banû Yahyâ in the very heart of the Kabyl massif (June—July 1854). New disturbances provoked by the Kabmâniya brotherhood in 1855 and 1856 forced the French once more to fight the tribes of the Sebou and the Gueshtâla. The results obtained however would have remained insecure so long as the Banû Râtan, the most turbulent of the tribes of the massif, were not reduced to impotence. A new expedition was therefore organised in 1857 by Marhal Randon, then governor-general, supported by Generals Macmahon, Renault and Yûsuf. While returning to the southern slope of the Djurdjura, three divisions left Tizi Urt and scaled the slopes of the massif. The Banû Râtan were the first to be attacked and defended themselves energetically for two days. The capture of their villages and the defeat inflicted on them on the plateau of Sûk al-Arbâ forced them to sue for peace (25 May). The Ait Mengueltet, their allies, continued the struggle and were crushed at Išeriden (24 June). The Ait Yenni had to submit in their turn in the beginning of July. The defeat of the Ait Iten, who had been stirred up by the female Ansha about Lalla Fâtma, terminated the campaign. The tribes delivered hostages and paid a war indemnity, but retained their municipal autonomy and their kânâm. The building of Fort Napoléon (now Fort National) on the plateau of Sûk al-Arbâ enabled the French troops to control the whole massif. The country was opened up by roads, put under military rule and divided into four administrative districts.

The most complete tranquillity reigned until 1871, when the Kabyls rose again at the instigation of the grand-master of the Kabmâniya, Shaîkh al-Haddâd and especially of his son al-Azîz, who made an alliance with Mokrâni, the rebel bashaghâ of the Meğjâna. A holy war was proclaimed on April 8 at the market of Şedûk and soon the rebels numbered 180,000 fighting men. Bougie, Delles, Tizi Urt, Fort National, and Dres' al-Misân were blockaded by the natives, the village of Palestro was taken and sacked by the rebels in spite of the resistance of the Europeans. The rebels even threatened Mitidjâ but were held up on the Alma by Colonel Fourchault's flying column. Troops sent from Algiers delivered the towns and garrisons besieged by the insurgents, who were routed at Išeriden on June 24. Shaîkh al-Haddâd
surrendered to the French on July 13 and at the end of the same month, the valley of Wād Sāhel was cleared of rebels. Kabylia lost its municipal autonomy and a war indemnity of 36,582,000 francs was levied on it. Besides, 446,000 hectares of land were sequestered and appropriated for European colonisation, for which centres were created in the valley of the Isser and in the valley of Wād Sāhel. Since that date peace has not been disturbed and civil government has been organised in Kabylia as in the rest of the Tell (cf. the article ALGERIA). Primary schools with technical instruction have been established in the principal villages and education is compulsory for the natives. The latter seem to have adapted themselves to the new situation; their resources have increased to such a pitch that in some districts European colonisation has reeded and considerable areas of land have been bought back by the natives. The isolation in which the Kabyls lived so long is tending to disappear and, if it is chimerical to hope even in remote future for an assimilation of the Berber and European elements, perhaps it may be permitted to foresee for them sufficient community of interest to prevent new conflicts.

KĀČI (sometimes written KÂ; al-Baladûrî and al-Yâkûbî; getContext: {'function': 'add', 'prev': 'KĀČI', 'next': 'KĀČI'}, 'ed. Wûstenfeld, iv. 126, l. al-Kâsâ, but i. 505, 294. iv. 94, 10: al-Kass; in Anglicised spelling CUTCt; an Indian State attached to the Pālānąpur Agency of the Bombay Presidency, lying between 22° 47’ and 24° N. and 68° 25’ and 71° 11’ E. Its area is 7016 sq. m. and the population in 1911 was 513, 429 (Musulmans 126, 133). It is separated from the mainland of Sindh and Kathiawâr by the great salt-swamp known as the Rann of Kācî (Great and Little) which makes it a quasiland. The Rann is included in its boundaries, but not in the area given above. The country is hilly in some parts, but is flat for the most part. There are signs of former volcanic action. Earthquakes have frequently occurred; that of 1819 wrought great destruction, including the capital Bûdî.

The Rann was undoubtedly at one time an arm of the sea and may with probability be identified with the great lake described by Arrian as visited by Alexander near the mouths of the Indus. It has been identified by S. Juliari, V. de St. Martin, Watters and V. Smith with the Ki-ch’a of Hwen Tsang, which he describes as under the suzerainty of the Vâllâhâr kings, but this is open to doubt as the province described by Hwen Tsang does not seem to have been near the sea.

Al-Baladûrî mentions a king of Kâsâ called Râsak (Râsik) in the time of the Caliph al-Walîd I (86—96 = 705—715). The town of Surasta (Soroṣhta) situated in the Bay of Kâcî still existed in the ixth century. It was inhabited by the Maid (Mêd), who were reputed as pirates. According to Al-Baladûrî, the people of Kâcî were Muslims in the time of Hîshâm 105—125 (724—743). When the power of the Muslims in the region of the Indus declined in this period, they endeavoured to maintain themselves in Kâsâ (al-Yâkûbî). Al-Berûnî describes the eastern branch of the Mîhrân of Sîndh (the Indus) as flowing into the ocean at a place called Sîndhu-sâgara (the Sea of Sîndh) in Kâcî, and this is clearly the Rann of Kâcî. The Rann was therefore an arm of the sea as lately as 1000 A. D., and a branch of the Indus still flowed into it. Kâcî is described by al-Berûnî also as the home of pirates (bawîrdî). The Simma Râjâbî fîlers of Sîndh conquered the country probably in the xivth century; the majority of them became Musulmans, but the Dihâdjeđa clan, whose power was established by Môda about 1270 to 1298, adopted a modified form of Hinduism. They have continued to rule the country under the suzerainty first of the Kings of Ghûjarât, then of the Mughal Emperors and lastly of the British Government. The Khalîbâs of Sîndh invaded Kâcî in the xviith century (1762—5). The early reputation of Kâcî for piracy was revived in more recent times and led to the British occupation in 1815—1818. The Râo was however soon restored.

The Dihâdjeđa fîlers bear the title of Râo. Their capital is at Bûdî and coins are struck there in the name of the Mâhârâo joined first with those of the later Emperors of Dihli and more recently with those of Queen Victoria and her successors. The port of Mandvi is a considerable town with a large coasting trade. The Kâcî language is peculiar to the province. It belongs to the Western Indian group of languages and is commonly classed as a dialect of Gujjarâtî, although, according to Grierson,
KAČCHI — KAḌĀ.

It may perhaps be more correctly considered a dialect of Sindhi. In accordance with its geographical position it forms a link between the two languages.

KAČČI, or KAČČH GANDĀWA. A province in Bālūcistān extending from 27° 55’ to 29° 35’ N. and from 67° 11’ to 68° 28’ E. with an area of 6,415 sq. m. It forms a level plain enclosed on the N. and E. by the southern Sulaimān Mts. and on the W. by the Kirthār Ranges. To the S. it is open being bounded by the plain of N. Sindh. Politically it forms part of the Khānate of Kaḥūt [q. v.] with the exception of the small area of Sībī in the north which was nominally part of Afghanistan and was transferred to the British Government under the treaty of Gandanak in 1879. This district is part of British Bālūcistān. The tribes in the western half of Kaḍch, the Dōmmī, Umārānī, and Khāirsī are only nominally subject to the Khān. These tribes are the successors of the railway from Jacobabad to Quetta, which traverses the province from south to north. The territory west of this line is also mainly occupied by Balūc tribes with the exception of the area near Dīddhar in the north, where nomadic Brahōs are found. Everywhere there is a large settled population of Dīssī. There are no large towns; Gandāwā, Sūrān, Dīddhar, Sībī and Lāhrī are the principal villages. Cultivation is carried on by irrigation from the small streams and hill-torrents which issue from the mountains; the Nātī and Bālūcī on the north, the Mula and Sūkhjēdi on the west, and the Lāhrī and Chāตร on the east. Without irrigation, cultivation is impossible as the climate is intensely hot and the rainfall very scanty. The valleys of the Mula, Bālūcī and Nātī form passes by which communication with the uplands has been carried on from time immemorial. The two first-named are now traversed by railways which lead to Quetta and Peshāin by the Bālūc and Harnai countries. The strip of territory called Naṣirābād is politically part of the Sībī district. It lies adjacent to the British District of Jacobabad in Sind, and receives its irrigation from the Sind Canal fed by the Indus.

The population is scattered but denser than in most parts of Bālūcistān. Including the Sībī and Naṣirābād tahsils, and the Dōmmī-Khāirsī country, all of which are geographically part of the Kaḍch plain, the total is 175,860 (census of 1911). The history of this tract is dealt with under atta. BāLūCISTĀN and KAḌĀWĀ.

BiBliography: Census of India 1901 and 1911. Balochnia. (See also s. v. BālūCISTĀN.)

M. Longworth Dames.)

KAḌĀ means literally "deciding" (जन्म, फ़ाळ, फ़ाळ, तरिक, cf. Ibn Ḥarm, Mīlāl, iii. 51) but the root is found in many diverging senses already in the Kaḍch, "commanding," "judging," "making so as to be fixed," "informing," "substituting," "discharging (obligation)" etc.; cf. al-Iṣfāhānī, Mafradāt, p. 416, and Lāsūn, xx. 47 sqq. Technically it indicates a) the office and functioning of a judge (कान्त); b) the discharging of a previously neglected religious obligation, e.g. of the daily worship or of fasting in Ramadān; thus opposed to adā, the performance of the duty at the appointed time (Juyuboll, Ḥanāfī, Ḥanāfī. Gezetei, p. 68, note); Lane, Lexicon, p. 380); c) the eternal, universal decision of Allah as to all existent things as they are continuously, very nearly the "eternal decree" of Calvinism. The point in doubt in the last use is the relation of the term to kādar (कादर), "measuring or estimating an amount," "assigning something by measure;" to iṣāna, "providence;" and to the will (कार्य) and knowledge (ज्ञान) whether kādar is one of the "essential qualities" (al-ṣifāt al-ḥāliyya) of Allah or of His "qualities of action" (al-ṣifāt al-fāliyya); is eternal (कादाण) or originated (कादिक). For orthodox Ashārites kāḍa is the will of Allah (al-Baiḍāwī on Kur. ii. 111) and its eternal connection (tāʿalītaḥ), while kādar is His bringing things into existence in accordance with His will. Or it is His eternal knowledge and its connection with the thing known, while kādar is His bringing the thing into existence in accordance with His knowledge. Kāḍā therefore, is eternal as one of the eternal qualities and kādar is originated because it is the "connections" tie to the "qualities" of the original power. But others taught that ḫaḍā is the bringing forth (तोरन) of transitory things (al-kāʾimāt) in accordance with the knowledge of Allah, while kādar is the eternal defying of each thing with what of good and bad, advantage and disadvantage, it is to have when it exists. Ḫaḍa, then, is originated and kādar is eternal. Further, ḫaḍā, if it equals Allah's will or knowledge, is one of the essential qualities, but if it is this "bringing forth" it is only one of the connections of Allah's power, and these, according to the Ashārites, are originated. The Māturidīs called these "active qualities" and held that they were the names for the Māturidī quality takawīn (making to become) which the Ashārites did not admit as a quality (al-Fadālī with comment of Al-Baidāwī, Cairo 1315, pp. 55, 61; al-Nasīfī's Aḵāṭī with comm. of al-Taftīzīn, etc., Cairo, 1321, p. 95). But the overwhelmingly accepted position makes ḫaḍā the universal, general and eternal decree and kādar the individual development or application of that in time. A phrase quoted in the Sīhāb under KDK is significant, Mā yaḥṣādiruḥu ʿuḥad min al-ḵaḍā, "That which Allah measures out of ḫaḍā", Al-Rāzi on Kur. xxiii. 37, 38 ( Mushāfī, Cairo 1320, vi. 52) even applies the distinction to the prohibition of evil and of human responsibility. That which is by kādar comes in incidentally, almost accidentally, and the disadvantages (dārar) of the world are through it, while the good (ḵhaʾir) is by ḫaḍā. Man was created by Allah subject to lust and anger in order that, striving against these under the guidance of reason and religion, he might be rewarded. That leads in some to sin, but Allah did
not produce this consequential sin in them by intention, although it was by His ḫadār. Again, that which is by ḫadār being unlabelled is always perfectly intelligible — we see it happening all the time; but some of weak understanding may ask the reason for a thing which is by ḫadār. Yet it must not be thought that these latter things are necessary consequences following of themselves according to the Muṭalālī doctrine of tawīl of or the philosophical teaching that there is a nature in things (fāb). Everything is by the choice (fāṣīd) of Allāh and He admits only a certain custom (ṣāfa) in things. Among philosophers the tendency is to equate ḥadār with Allâh's knowledge or with His eternal providence (ṣināya) or even to say that it is an expression for the existence of all existent things, taken as a whole, in the world of reason, while ḥadār is their external existence, separated, one after another (Dict. of Tech. Terms, p. 1234 sq.).

Bibliography: has been given in the article.

(D. B. Macdonald.)

KADÂ (A.). In the terminology of Turkish administration kadâ (kuza) denotes a district governed by a kâtib-mahmûd (q. v.).

KADAM SHARIF (Kadam Rasûl Allâh). Along the routes (muṭār) popularly attributed to Muhammad was the fact that when he trod on a rock, his foot sunk into the stone and left its impress there. (This miracle is usually referred to along with others e. g. that he cast no shadow, that if one of his hairs fell in the fire, it was not burnt, that flies did not settle on his clothes etc. (v. al-Ḥalabi, al-Sîr al-Ḥalabiyya, Bûlîk, 1292, III, 407), or that his sandals left no imprint on the sand (v. Ibn Ḥadîj al-Haṭîmî, commentary on al-Bûṭrî’s al-Kaṣīda al-Ḥamîliya, I, 176. (Ind. Off. MS., Loth, n. 826, fol. 94). No early authority refers to such a miracle, nor can any ḥadîth be quoted in corroborative of it, as Ḧâṣîl al-Dîn al-Sûyûtî himself pointed out (v. al-Ḥalabi, op. cit., i. 497). But sufficient evidence of this miracle is considered to be provided by the numerous impressions of one or both of the feet of the Prophet, which are venerated in different parts of the Muslim world. The most famous of these footprints is that in the Masjid al-ʿAṣû, at Jerusalem, on the rock from which Muhammad mounted Burûq for his journey to heaven (ṣams al-Dîn al-Sûyûtî, Ithâf al-ʿAṣûq, Fî Fadâl al-Masjid al-ʿAṣûq, Journ. Res. Al. Soc., xix., NS., 1887, p. 258–9). In a mosque near the southern gate of Damascus, on the road to Ḥawrân, is shown the imprint of the foot of the Prophet, when he half-lighted from his camel, but was warned by the angel Gabriel that God had given him the choice between the Paradise of this world and that of the next; whereupon he relinquished his intention of entering the city (W. G. Palgrave, Journey through Central and Eastern Arabia, London, 1865, ii. 19). In Cairo there are two footprints, one in a mosque called Mihrâr al-nabî (Rev. des Trad. Pâpe., ix. 653), the other at the tomb of Kâbir Bey (q. v.) (Baedeker’s Egypt, 1914, p. 113), who, according to Aḥmad Dâhlûn (q. v.,) purchased it for the sum of 20,000 dinars; in Tâba there are impressions of both the feet of the Prophet, in the shrine of Sâyid Aḥmad al-Badawi (Rev. des Trad. Pâpe., xxii. 410); as also, at Constantinople, in the mosque where Sulṭân Aḥmad al-Ḥamîd I is buried (ibid., ix. 473); cf. also Constantinople, i. 871.

KADAM SHARIF. But it is in India that this veneration for the footprints is always so great as to have attained its fullest extension, and such slabs of stone are found all over the country, — sometimes venerated in buildings specially erected for their reception, as the Kadam Rasul Mosque at Gâwir, or kept with other relics, as in the Djinâ’i Masjid, Dîhî, or left disregarded in a corner of a cemetery, as in that of Shâh Djinâlî, near ‘Aligâr, or preserved in the house of some private person. Usually, there is the imprint of one foot only, but in the Kadam Rasul building at Balasore (in Orissa), the stone bears the marks of both feet, as well as those of ‘Ali. (Abdus Salam, The Qudam Rasul Building at Balasore in Journ. As. Soc. Beng., iv. [1908], 31–2.) One of the most highly venerated of these footprints is that placed over the tomb of Fâth Khân, the son of Firûz Shâh Tughlîk (q. v.); this monarch had associated his son with him in the government as early as 760 H., and the death of Fâth Khân in 776 H. was a cause of great grief to his father, who erected a stately tomb over his grave, with a mosque and a madrasa attached. The footprint is said to have been brought from Madâna by the great saint of the Ḥâlij order, Sâyîd Ḧâṣîl al-Dîn Bûkhârî, known as Makhîmîn-i-Dijânîyân; it is kept immersed in water, which is believed to possess healing power; a religious fair is held here every year, on the 12th of Rabî’ al-awwal, the anniversary of the death of the Prophet (Sâyîd Aḥmad Khân, Description des Monuments de Delhi, Journ. As., 1860, p. 411–2). At Uâh, which has a rich collection of relics of the Prophet, there is a footprint in the shrine of Bandâgî Muhammad Ghâwî (oh. 923 H.), a descendant of ‘Abî al-Ḥâdi Dîlî (Gazetet of the Bahawalpur State, Lahore, 1908, p. 166).

The slab of stone with the footprint of the Prophet, preserved in the Kadam Rasul Mosque at Gâwir (q. v.) is said to have been brought from Madâna by ‘Ali al-Dîn Husain Shâh, king of Bengal 1494–1521; the fine mosque in which it rests was built by his son and successor, Nûrî Shâh, in 1530 (J. H. Raviwhâb. Geog. Gen., London, 1878, p. 20). About fifty years later, Mr Abû Turâb, who had been appointed by Akbar leader of the pilgrims’ caravan, brought back from Mecca, in 1579, a stone bearing the imprint of the right foot of the Prophet; that brought by Makhîmîn-i-Dijânîyân to Sultân Firûz Shâh is said to have represented the left foot. Akbar himself went out several miles from Agra to receive the holy relic, and carried it on his shoulder for about a hundred paces, his example being afterwards followed by his nobles and courtiers, who escorted the stone with great pomp and ceremony to the city. In the following year, when Mr Abû Turâb was returning to his home in Gandhar, he received permission from Akbar to take the footprint with him; he erected a building in Asâwâl, near Aḥmadâbâd, as a shrine for this slab and for some hairs of the Prophet, which he had also brought from Mecca with him; after his death the footprint was placed over his tomb, which is still standing to the south of the city of Aḥmadâbâd, but the footprint is no longer there, having been removed (it is said) to Khamâyî (Mr Abû Turâb Valî, History of Gujarat, Calcutta, 1909, pp. 97–9). The footprint on the
grave of Sayyid Muhammad Maqbul Alam, who is buried in the precincts of the shrine of his ancestor, Sayyid Muhammad Shih Alam, at Batusya, to the south of Aujmahbudd, is said to be a copy made from the stone in the Djami Masjid at Dihli (J. Burgess, *The Muhammadan Architecture of Ahmadnabad*, London, 1905, ii. 20, 50). Similar copies on stone or on paper are sometimes found in the houses of private persons (G. A. Herklotz, *Qanun-e-Islam*, Madras, 1863, p. 153).

Closely connected with the veneration of the footprints of Muhammad, is that paid to representations of his sandals. Copies of these are hung up in the houses of the pious, as a protection against the assaults of the Devil, as a symbol of purity, as the depredations of robbers, etc.; they are also said to have the power to dispel the pangs of childbirth (al-Qasamali, al-Marwakib al-ladaniya, Cairo, 1281 H., i. 357); such representations are common in Algeria, Egypt, India and Syria.

(T. W. Arnold.)

**KADAR.** The contradictory statements of the Kuran on free will and predetermination show that Muhammad was an opportunist preacher and politician and not a systematic theologian. It has been demonstrated (Grimme, *Einleitung in den Koran*, vol. ii.) that his predeterminist position steadily hardened towards the close of his life, and the least conscious Muslim attitude on the subject seems to have been an uncompromising fatalism. KDR was the root used most generally to express it (see, too, KADAR) and appears to mean primarily "to measure, estimate" and then "to assign specifically by measure" as though Allah "measured out" his decrees. On the early opposition to this, which showed itself apparently before A. D. 700 and under Christian influences, see **KADARIYA.** In the course of the conflict two extreme views and two mediating views developed, the mediating views becoming those possible in orthodox Islam. All could appeal to Kuranic texts and to traditions. The traditions are, of course, in great part shadows thrown back from the later controversies. They may be found in al-Bukhari, Kitab al-Kadar and also in part of the Kitab al-Tabib; see, too, al-Ashabi, *Kitab al-Fama*, Haidarabad, p. 84 sqq. (D=P al-Kinajat fi l-Kadar). The Djabiyya [q. v.] were absolute predeterminists; man had no part at all in the actions which apparently proceeded from him. This became an heretical position in Islam. The other extreme, that man produced his own actions, was that of the Kadarites who eventually merged in the Mutazilites. At first they did not venture to use the word "create" (khala')—Allah alone was khaliq—of this producing, but employed supposedly safer terms, such as lqad, 'idhara', but eventually they came to speak of man *creating* his actions. The intermediate parties were the Ash'arites and the Maturidites. Of the Ash'arites had thought out their position most logically, while the Maturidites stated simply the evident facts in the case. The basis of the upholders of free will seems to have been ethical; the justice (qadi) of Allah requires man's freedom. But orthodox Islam in general cared little for that, although some, as al-Taftazani and al-Razi, spend dialectic on the point. It maintained the Pauline parallel of the potter and the vessels; Allah could do what He pleased with His own. The orthodox difficulty was rather man's consciousness of freedom. This the Maturidites met by admitting that man did possess "free choice actions" (al ihkayyatiya) for which he is rewarded or punished (al-Nasafi, *A'zam*, ed. with comment. of al-Taftazani, Cairo 1231, p. 97). Man knows the difference between a voluntary grasping and an involuntary trembling, but the contradiction of this with the absoluteness of Allah's creative power is left unsolved. Al-Ash'ari introduced the idea of ikhtisar [see KAS] "accepting for one's self": man accepts for himself the action of Allah and this accepting is man's consciousness of free will. Apparently al-Ash'ari meant that this consciousness was only another part of Allah's creative action. Man is still an automaton although part of his machinery is that he believes himself free. Between the two wide scope was left even in orthodox Islam for discussion. The ultimate, scholastic, Ash'arite statement, denying that man possesses any action at all—which must not, however, be taken for the only possible one in Islam will be conveniently found in al-Fadlili's, *Kifayat al-Awmm* with al-Baidjrati's commentary, and in Luciani, *Prolegomenes theologiques de Souusi*. This attitude struck so deep that even al-Ghazali, and that even at the end of the wonderful psychological analysis of the book of the Ihya 'on the marvels of the heart', could quote with approval the tradition: "These are such men that they do not, and these to Him and I care not" (ed. with comment. of al-Sayyid al-Murtada, vii. 308); (cf. Macdonald, *Religious Attitude in Islam*, p. 301). For kadar among mystics see art. 'ABD AL-RAZZAK above.

**KADARIYA** is given regularly as a descriptive or surname (lajab) of the Mu'tazila, but it points back to a pre-Mu'tazilite time when the Muslims were beginning to ask theological questions and
when, the first apparently among these questioners, there were doubters of the harsh predestinarism of Muhammad's last period. The later Mu'tazilites asserted the name and held that it applied better to those who maintained Allah's kadr of all things, good and bad, than to themselves who held that man has a certain power (kundr) over his actions. This, the orthodox said, was because they wished to avoid the saying of the Prophet, "The Kada- rites are the Madjīs (Zararitians, Dualists of this People)", which meant that they made man a khalıkh al-asfāl, "creator of actions", thus giving Allah a partner in creating. But this saying was certainly later than the rise of the Kadarites and the name may well have been first invented and applied to themselves by those who claimed a kadr over their own actions. Another saying ascribed to Muhammad in this connection is, "They are the opponents of Allah in kadr", i.e. they profess to have a rival kadr to that of Allah. Al-Tashkānī (on al-Nasafi, p. 96) has presented a story of how a certain Madjīsil silenced (uzama) 'Amr b. Ubaid on both of these points. The name which the Mu'tazilites preferred for themselves in regard to this doctrine was the "People of Justice" (kālüd); Allah's justice required that man must be free if he were to be rewarded or punished.

**Bibliography:** See that of kadr and add al-ldjī, Mas'ūdī, Bālūq 1266, p. 620; al-Shahrastāni, Mīlāt, i. 54 on margin of Mīlāt of Ibn Ḥarīm; Nallino, Sul na'me di Qudratti in Riz. degli Studi orient., vii. 461 sqq.

(Ö. B. Macdonald.)

**Kadhif (a.)** is slander in a special sense. If anyone accuses a respectable person (mahsūn) of incontinence, without being able to bring four witnesses to support him, he is liable by law to a definite punishment (kālüd) of So lashes for kadhif. The regulations on this subject in the law-books are based mainly on Kur'ān xxiv. 4. In a case of kadhif, all male and female persons are considered mahsūn who have never been guilty of incontinence and who, in addition, are believers, freemen, of age, and in possession of their mental faculties. The right to demand the punishment of the guilty one is in the view of most kadhif a private right of the person slandered (i.e. a kadhif adawāt) so that the latter (or his heir) may also voluntarily refrain from exercising it. In the view of the Hanafii school, however, the kadhif punishment for kadhif is a right of God (kadhif Allāh), and neither the person slandered nor his heir can avest this punishment from the guilty one. If a husband has accused his wife of unfaithfulness without being able to prove the charge in the prescribed manner, he can secure exemption from punishment by procuring the lābīf formula [see ifāk]. Punishment, moreover, may not be inflicted on the father, mother or more distant ascendants of the insulted party, nor on minor, and slaves. For a slave the punishment is only 40 lashes.

**Bibliography:** The chapter on Hadd in the collections on Tradition and the Fiqh books; al-Qādiri, Hādhīya alā Sharî' Ibn Qāsim al-Abbasī, ii. 241 sqq. (Bālūq 1307); Sadr al-Shāria al-ḥanāfī, Miṣkāt al-Wāhīya (Kazān 1296), p. 167 sqq.; al-Dināshī, Rahmat al-Annām: 'ṣīlahāf al-Ammā (Bālūq 1300), p. 142 sqq.; E. Sachau, Muhamm. Recht nach Schafī-
disinclination to fill the office of judge. Traditions were put into currency in which the Prophet was made to utter grave warnings against accepting the position of kâdi. Fious faši's e.g. Abu Ha-
ufa [q. v.] declined to fill the office of judge.

For many centuries past no Muslim judge has any longer come up to the original theoretical requirements of the law; therefore any existing kâdi is regarded by Muslim scholars only as kâdi 'l-ja-
râzî, i.e. as an emergency kâdi, to whom one must go, in default of a better.

H. Goetheil, New York 1908 (with an introduction); cf. The Governors and Judges of Egypt of al-Kântî, ed. by R. Guest (Glib Mem. xix.), 1912; and also the important remarks on the office of kâdi in Cordova by Ribera in the introduction to his edition of al-Khushâni, Kitâb al-
Kufî bi-Kurtuba (Hist. de los Jueces de Cordoba por Ajoyani, Madrid 1914; cf. Hâdîdji Khalifa, li. 141, n°. 2279)

The Prophet and the early Caliphs often decided disputes in person as judges, as did their governors and prefects in the various provinces. Justice was always administered in Muslim lands to a great extent by local authorities, notably the police offices. This was sometimes called Nasar ašša al-
Masulim (al-Mâwardî, ed. Enger, p. 128 sqq.; H. F. Amedroz, The Malazin Jurisdiction in the Ahkâm Sultaniyya of Mâwardî, Journ. Roy. As. Soc., 1911, p. 635 sqq.; de Sacy, Chrest. Arab. 2, i. 132 sqq.). Moreover Umar and Uthman and their successors had appointed special officers as judges (kâdî). These kâdî's, who always belonged to the faši class, never obtained an independent position in Islam. They were often dismissed — soon after their appointment — and always remained subject to the caprice of the ruler. Cf. for example Autobiog.
graphie d'Îbî Khâldîn, transl. de Sâne, Paris 1844, p. 103-110 (Journ. Asiat., 4th Ser., iii. 328 sqq.).

The kâdî's had not only to decide cases but they also had to administer pious foundations (wakf's) and the estates of orphans, imbeciles and other persons. They had often to draw up contracts for marriage of women without male relations, etc.

The chief kâdi in the capital was one of the high officials (al-Mâzrî, al-Kâtafî, Bâlûk 1270, i. 403). In eastern countries he was called kâdi l-kufâ', in the western kâdi l-jumâ'â (Dozy, Suppl. aux Dict. Arâb., ii. 364). In later times the kâdi l-asfar was also a high official (cf. al-Kalâshandî, Shâb al-Askâr, iv. 36; Autobiogr. d'Îlbâl Khâldîn, p. 102, Journ. As., 4th Ser., iii. 327; J. v. Hammer, Des Osmanischen Reichs Staatsverfassung, ii. 378 sqq.). Some kâdî's were military leaders.

In the large cities, where numerous adherents of the different fâk schools lived together, a kâdi was appointed, if necessary, for each madhâbah. For example, there were in later times four kâdîs in Cairo. (Quatremère, Hist. d. sultans mamlouks, i. 
98, Note; Autobiogr. d'Îl-Khâldîn, loc. cit.).

Al-Kâdî al-Fâdîl, Abû 'Ali 'Abîd al-Kahîm B. 'Ali b. Muhammed B. al-Hasan al-Lâkîmî al-Bâshâni al-A'skâlânî, Muhyî (Muqir) al-Dîn, Saladin's celebrated vizier, was born on 15 Djamâd ii. 529 (3 April 1135) at Asklân [q. v.] where his father, a native of Bâasân, called al-Kâdî al-
Ashraf, filled the office of judge. In 543/ 1148—9 his father placed him in the Divân al-
âlîqî in Cairo as a learner. By 588/ 1193 he had entered the service of Îlb Khâldî, kâdi of Alexandria, as secretary. As his elegant reports from there attracted attention to him in Cairo, in 1190 he was summoned thither as superintendent of the Dîwan al-Dîshâ by al-Âdî Ruzzik b. al-Sâlih Tâli'a, the last representative of the vizier-family of the Banû Ruzzik. When the latter soon afterwards was overthrown by Shâwâr, prefect of Tus, al-Kâdî al-Fâdîl became secretary to Shâwâr's son Kamîl and after Shâwâr's murder to Shirkûh, his successor in the office of vizier. In 563 (1167—8) he became deputy for Îlb al-Khalîlî, chief of the Dîwan al-Dîshâ, under whom he had begun his official career and on the latter's death on 23 Djamâd ii. 566 (March 4, 1171) was appointed his successor, Saladin having in the meanwhile taken over the vizierate. When in the next year, on the death of the last Fîtimid, Saladin himself assumed the rule in Egypt, the Al-Kâdî al-Fâdîl be-
came his right hand man in carrying through the reforms necessary in the army and taxation. He then accompanied the Sultan on his campaigns in Syria. He was in Egypt from 585 to 586 (1189—90) to control the financial administration and re-
equip the army and navy. He then returned to Syria and remained with Saladin till the latter's death on 27 Safar 589 (March 1193). When al-
Mālik al-Afḍal, who had taken over the government in Damascus, very soon jeopardised his authority by stupid measures, al-Kādi al-Fiḍlāī went to Egypt to al-Mālik al-‘Aḍzīz. War soon afterwards broke out between the two brothers, but in 591 (1195) peace was made through the mediation of al-Kādi al-Fiḍlāī. He thereupon retired into private life. He died suddenly on 6 or 7 Rabi‘ 596 (26 or 27 Jan. 1200). Of the numerous state documents which al-Kādi al-Fiḍlāī composed during his activity in the Diwān al-Imāmāt, many examples are preserved in MSS. and in Abū Shāma. Helbig gives a complete list (p. 67—75). In addition there is his correspondence with Usāma b. Munkīd concerning the latter’s Kitāb al-‘Aṣīla from the Khārida of ‘Imād al-Dīn in H. Derenburg, Novo. Méll. Orient., p. 147—52; Vie d’Ousama, French transl., p. 383—392. During his official career he also edited an official journal, Muhaddidāt, of which al-Makrīzī gives many specimens in the Khitāb. These are not only notes on official letters and the answers to them but reports also on important happenings in the kingdom or on gifts of honor granted by the Sultan.

KĀDI AL-ḤARAWĪ. [See al-‘Abdāl.]

KĀDI KHĀN FAHR AL-DĪN, AL-ḤASAN B. MANṢŪR AL-.Interval FARGHĀNĪ, was a Haṇafī Muḥtār and scholar who composed a large number of esteemed juristic works and commentaries on Haṇafī works. In particular his collection of legal decisions (Fatawā Kādi Khaṇā, in 4 vols. lith. Calcutta 1835; with the subsidiary title al-Fatawā al-Sa‘īda, lith. Lucknow 1293—5; pir. Cairo 1292) has become widely known on account of its convenience. He died in Ramādān 592 (1196).

KADIM. [See KIDAM.]

KĀDI AL-‘AṣĪRA, the Mighty, one of the most beautiful names of Allāh: cf. ‘Abd al-Husain al-‘Abīṣā, al-‘Aṣīra ‘al-Saīfa, Allāhāhād 1313, S. 15; Redhouse, The Most Comely Names, Journ. Roy. As. Soc., 1889, S. 49.

AL-KĀDI BI LLĀH, ABU L-‘ABBĀS AHMAD B. ISHĀḤ, ‘Abhāṣīd Caliph. After the deposition of al-Fā‘il, his cousin Abu L-‘Abbas Ahmad was proclaimed Caliph in Ramādān 381 (Nov. 991) with the name al-Kādi. The latter was a grandson of al-Nuṣāṭār, his mother was a slave. During his long reign he was entirely under the influence of the amirs ruling in Baghdad and only once did he give evidence of having a mind of his own. This was when the Būyid Bābā al-Dawla [q. v.] wished to replace the Sunni chief kādi by a Shī‘ī but his plan was frustrated by the opposition of al-Kādi, whereupon the Shī‘īs were given a superior of their own under the title nāsib ‘intentant’. For the rest, all heretics, notably the Mu‘tazilīs, were treated with the greatest severity. In this period arose the dynastic claims of the Mardawīdīs and the Ukhullidds and the Mirdāsidds, and the Ghaznavid kingdom attained its greatest prosperity, while the internal disruption under the Būyids increased, and the Hamadanids and Sāmānids, which latter had long been a bulwark against the Turks, collapsed. Al-Kādi died in Dhu ‘l-Hijjah 432 (Nov.—Dec. 1031) at the age of over 80. He is also mentioned as the author of some theological treatises.

KĀDIYIRA, Order (ṣarīb) of dervishes called after ‘Abd al-Kādi al-Ḍalālī [q. v.]

I. ORIGIN. ‘Abd al-Kādi (ob. 561 = 1166) was the principal of a school (madrasa) of Hanbalite law and a rīḥāt in Baghdad. His sermons (collected in al-Fath al-Kabābbī) were delivered sometimes in the one, sometimes in the other; both were notable institutions in the time of Ibn al-ʿArabī, also Nikūṭ (Irshād al-Arīb, v. 274) records a bequest of books made to the former by a man who died in 572 (1176—7). Both appear to have come to an end at the sack of Baghdad in 656 (1258), till when it is probable that their headship remained in the family of ‘Abd al-Kādi, which was numerous and distinguished. In the Bahgādh al-Asrar, where an accurate account of his descendants is given (pp. 113—117), it is stated that ‘Abd al-Kādi was succeeded in the madrasa by his son ‘Abd al-Wāḥih (552—563 = 1157—1165), who was followed by his son ‘Abd al-Salām (ob. 611 = 1214). Another son, ‘Abd al-Razāq (528—603 = 1134—1206?) was a notable ascetic. Several members of the family perished during the sack of Baghdad, when it would appear that both these institutions came to an end.

A rīḥāt was at this time distinguished from a sāwiyā, the former being a coenobium, the latter a place where an ascetic lived in solitude (al-Suhrawardi, Anwarī al-Ma‘arif, margin of the Ḥiyāḥ, Cairo 1306, i. 217). In the time of Ibn Battūta sāwiyā had come to be used in the former sense also, and his description of the religious exercises practised at the sāwiyā (i. 71) would probably suit what went on at ‘Abd al-Kādi’s rīḥāt. The body of rules and doctrines which had his authority was sufficient to constitute a system (mawāhid: Bahgādī, p. 166), and by accepting the kīrka from the sheikh the mawāhid signified that he wished to that of the former (al-Suhrawardi, i. 192). A long list is given in the Bahgādī of men who attained various degrees of distinction who had received the kīrka from ‘Abd al-Kādi, two of them at the age of seven and one at the age of one. These persons were said to ascribe themselves (intasāba or intamān or even ittammā) to
'Abd al-Kadir, and could bestow the ḥikāya on others as from him; in doing so they would stipulate that the murād was to regard 'Abd al-Kadir as his šaykh and director after the Prophet. In a tradition which is likely to be apocryphal (Bāḥdjī, p. 101), dated 592 (1196), 'Abd al-Kadir declared that assumption of his shi'ah was not absolutely necessary for entry into his Order; personal attachment to himself was sufficient. It would appear that during his lifetime several persons carried on propaganda in favour of his system; one 'Ali b. al-Ḥaddād obtained proselytes in Yemen, and one Muḥammad al-Batārī, resident in Basra, did likewise in Syria; one Taḥṭī al-Dīn Muḥammad al-Yūnī, also of Basra, was another propagandist, and one Muḥammad b. 'Abd al-Sanād in Egypt “ascribed himself to 'Abd al-Kadir and in treading the Path relied on him after God and His Apostle” (Bahdhī, pp. 109, 110). Since all who ascribed themselves to him were promised Paradise, the Order is likely to have been popular; and even in recent times missionaries in Africa appear to have little difficulty in obtaining fresh adherents to it (O. Lenz, Timbuktu, ii. 32).

That 'Abd al-Kadir's sons had some share in spreading it is likely, though Ibn Taimiyya (ob. 728 = 1328) mentions that he had associated with one of his descendants who was an ordinary Muslim and not a member of it, and so did not agree with those who held fanatical views about him (Bughyat al-Mūṭād, p. 124). The Bahdhī however does not bear out Le Chatelier's assertion (Confréries Musulmanes du Hégaz, p. 35) that in 'Abd al-Kadir's lifetime some of his sons had been preaching his doctrine in Morocco, Egypt, Arabia, Turkestan and India. It says much of 'Abd al-Razzāk, but nothing of the “mo que now in ruins, whose seven glazed domes have often served as the subject of description by Arabic historians,” which this son is supposed to have built. Indeed this mosque appears to be later than Ḥamd Allāh Mustawfī (740 = 1339-40), the first author later than the Bahdhī, who mentions 'Abd al-Kadir's tomb (Nushat al-Kalid, transl. Le Strange, p. 42). Nor does it confirm the statement that this 'Abd al-Razzāk introduced the use of music in the ritual, and indeed the employment of this was earlier than 'Abd al-Kadir's time, and is discussed by al-Suhrawardī (116) without allusion to 'Abd al-Razzāk. E. Mercier (Histoire de l' Afrique Septentrionale, iii. 14) asserts that the Order of Kādiriyya existed in Berbery in the xilth century A.D., and was closely connected with the Fātimid khālas (whose rule terminated 567 = 1171), but he gives no authority for these statements.

Al-Suhrawardī holds that the exercises of each murād should be determined by his šaykh in accordance with his individual needs, whence it is unlikely that 'Abd al-Kadir instituted any rigid system of ḍikr, wārid and ḥikāya, and indeed those in use among different Kādiriyya communities differ (Rinn, Marabout et Khousan, p. 183 sqq.).

The initiation ceremonies given on Turkish authority by J. P. Brown (The Derwishes, p. 68) are quite different from those furnished by Rinn on North African authority. In one of these latter there is a tendency to set 'All above Muḥammad and to insist on the importance of Ḥasan and Ḥusain, which cannot well represent the views of the Hanbalī 'Abd al-Kādir. The wārid of 'Abd al-Kādir in al-Fayūsāli al-Rabbāniyya is given on the authority of one 'Abd Allāh b. Muḥammad al-‘Adhamī, who lived 135 years (536-731), and may be regarded as mythical.

2. Development. Kādirism seems from an early period to have developed on different lines according as 'Abd al-Kādir was regarded as the founder of a system of religious rites and practices, or as a worker of miracles. In the latter view it meant the deification of 'Abd al-Kādir, the extremists holding that he was Lord of Creation after God, absolutely, whereas the more moderate supposed that he was so only in his own age (Bughyat al-Mūṭād, l. c.). The latter was the view of Ibn 'Arabī, who takes him as an example of a ḥikāya who showed himself and practised sovereignty (ṭasarruf; al-Fuḥūl al-Muhkama, ii. 407); such a ḥikāya in his system is independent of the revelation to Muḥammad (Ṭafsīr al-Hikam, § 16). But there was also a theory that 'Abd al-Kādir practised in his grave all the activities (ṭasarruf) of the living (Ibn al-Wardī, ob. 749), Tāriḥī, ii. 70); and Ibn Taimiyya (al-Jawārī al-Sūqī, ii. 301). The former theory has been accepted by modern scholars as the true one. Among saints who in his time still appeared to people, being in reality impersonated by demons. In the initiation ceremonies recorded by J. P. Brown, l. c., the candidate for admission to the Order sees 'Abd al-Kādir in dreams; in one case so often and so clearly that without having seen 'Abd al-Kādir's portrait he could recognize him among a thousand. The form of Kādirism which means the worship of 'Abd al-Kādir seems to prevail in North Africa, where it is called Djilīlīsī (for Djīlīli) and whole communities are called Djīlīli. Their system has been described as the application of Şūfī mysticism to beliefs that are certainly pre-Islamic, and the materialization of that mysticism under the form of a cult of hidden Mediterranean powers (E. Michaux-Bellaire in Archives Marocaines, xx. 235). Here the word ḥalwa is used for a heap of stones where women attach rags to reeds planted between the stones and where they burn benzoine and stryax in post-heders (ibid., xvii. 60). Such ḥalwa's are to be found in all the Arab villages. Similarly in the province of Oran on all the roads and on the summits of the chief mountains qubbaḥ are to be found in the name of 'Abd al-Kādir Jillīli" (E. de Neveu, Ordres Religieux chez les Musulmans d' Algérie, p. 30). The society of the Genawah or Negroes of Guinea has placed itself entirely under the protection of Mawlay 'Abd al-Kādir with all his army of male and female demons; wherein M. Michaux-Bellaire finds traces of the powers which, according to the Qur'ān (and even earlier authorities) belonged to Solomon. The cult of 'Abd al-Kādir is most ardently practised by the women in the Khlot and Thlī, who come to the ḥalwa for every sort of object, and to satisfy their loves and hates in all the acts of their existence. The men on the other hand chiefly go to the ḥalwa when they are ill (Arch. Maroc., vi. 329).

That this development is inconsistent with Islamic orthodoxy is evident, and it is attacked by such authorities as Ibn Taimiyya and Ḥabīb al-Shāfi‘ī (Ṭafsīr, i. 348 sqq.). The system to which the name Kādiriya is more ordinarily applied differs from other orders mainly in ritual, although through circumstances connected with Islamism, it has not that homogeneity of statute which is to be found in other congregations, which seem to form small exclusive churches outside which

The Encyclopaedia of Islam, II. 39
there is no salvation" (Rinn, p. 156). Though the founder was a Hasbélite, membership is by no means confined to that school, and the Order is theoretically both tolerant and charitable.

3. Geographical Distribution. Since historical and geographical works rarely distinguish between the different łużeh in their accounts of religious buildings, little can be said with certainty of the date at which the first Kâdiri zawiya or łużeh was established in any country save Īrāq. The Order is said to have been introduced into Fez by the posteriority of two of ʿAbd al-Kâdir's sons, ʿAbdullāh (ob. 592 = 1196 in Wâsīt) and ʿAbd al-ʿĀlit (who died in Dijâla, a village of Siṭādjar), they had migrated to Spain and shortly before the fall of Granada (897 = 1492) their descendants fled to Morocco. The full genealogy of the Shuraṭa Dîjâla of Fez is given in Arch. Maroc, iii. 106–114, on the authority of al-Durr al-Sani of Ibn ʿAlgūyy ibn al-Kâdir (1090 = 1679), who claims to have used a series of authentic documents. The Khatwâ of ʿAbd al-Kâdir in Fez in mentioned as early as 1104 = 1693/4 (ibid., xi. 319). The Order was introduced into Asia Minor and Constantinople by Ismāʿīl Rūmī, founder of the Khatwâ known as the Khatwâ al-Tâbâhân at the Tâbâhân, this passage (ob. 1041 = 1631), who is called on Fir ʿAlim, "the Khatwâ of Shâhîd." The name and its meaning, which is green, having been adopted by Ismāʿīl Rūmī. The candidate for admission to the Order after a year brings an ʿaraṣiyya or small felt cap, to which if the candidate be accepted the Shâhîd attaches a rose of 18 sections, with Solomon's Seal in the centre. This cap is called by them ʿāsir. The holism of this is explained by J. P. Brown, The Deriṭk, p. 98 sqq. (copied by Wilberforce Clarke, transl. of ʿĀwrīf al-Muṭarrīf, p. 159; the Urdu translation Kâf ʿAlîr al-Maṣûbîh adds nothing to Brown's information). According to him, they prefer the colour green, though they allow others; in Lane's time the turbans and bannes of the Kâdiris in Egypt were white; most members of the Order were fishermen, and they in religious processions carried upon poles nets of various colours (Modern Egyptians, 1871, i. 306). In India there are festivities in honour of ʿAbd al-Kâdir on 11 Rûbî' II, and pilgrimages are made in many places in Algeria and Morocco to the zawiya's and shrines of the saint (Rinn, p. 177). The Masowim of the Dîjâla at Salâ is described at length by L. Mercier in Arch. Maroc, viii. 137–

159; it commences the seventh day of the Miṣrīd (Maṣūlād), i.e. the Feast of the Prophet's Birthday, and lasts four days 17–20 Kâbî I. Sheep and oxen are presented to the descendants of ʿAbd al-Kâdir. M. Michaux-Bellesque distinguishes in Morocco between the ceremonies of the Kâdiris, which recite the ḫārūn, and the Dîjâla, who recite the dâkhīr to the accompaniment of instruments; and again between the Dîjâla of the country, whose instruments are the bendir (a sort of big tambourine without bells) and ʿānâda, and those of the town, whose instruments are the ṭūlūl, ʿabāl and qaṣība (Arch. Maroc, v. 330 and xx. 60). A description of the ḥārūn al-malāḥīkī, a performance executed with these last instruments, which leads to ecstasy, is given by him in the first passage cited. He further records some special ceremonies connected with the Awwâl Kâhirî in the Chârb (ibid., xx. 287). All the Hîlâl of the Chârb are Dîjâla, and in all the ḥārūn's (services) of the
Djilâla the presence of at least one Khalifi is necessary for the direction of ceremonies, and when no actual Khalifi is present, some one there takes the name in order to perform the priestly duty. The origin of the name Avlîd Khalîfa is obscure (p. 284); it may be noticed that the ḏâkhîla mentions one Khalîfa b. Msâîl al-Nahmâlîki as having played a leading part in the propagation of his al-Kâdir’s system in the ma’lûb al-Ma’dî, the people of the Djilâla of the country contains neither the ḥâîb nor the ḏîkrî institute of the Ṣhâhîk, but a plain ḏîkrî of improvised words in the ceremonial rhythm of the bandîr (plur. of ṣanûr). These improvisations always terminate with the words “Thus spake Mawâlî ‘Abd al-Kâdir” or “O Mawâlî ‘Abd al-Kâdir!” (Michaux-Bellaire, p. 288).

Various collections of rituals supposed to have been recommended by ‘Abd al-Kâdir have been published in Egypt, Turkey and India. In al-Fi’ûl al-Rahbāniya he who is about to enter upon ḥâlîna (retreat) is advised to fast in the day and keep vigil at night. The ḥâlîna lasts forty days. If a mere reveal itself to him saying “I am God”, he should say “May my God”, and if it be for probation, it will vanish; but if it remain, then it will be a genuine revelation (taqâjallî) (Dhilî 1330, p. 60). Reduction of food during the 40 days should be gradual till for the last three fasting is complete. At the end he returns by degrees to his former diet.

Some practices peculiar to the Djilâla of Tangier are recorded by G. Salmon (Arch. Maroc., ii. 108). Those who make vows to ‘Abd al-Kâdir are in the habit of depositing in the ûsîyâ white cocks, which are called muḫjarar (Sûra ii. 31); they do not kill them, but leave them free to rove about the ûsîyâ, where however they do not long survive; the Sharîf who lives hard by takes them for food. The four daughters of a deceased Sharîf continued to live on the revenues of the ûsîyâ and carry away the muḫjarar hens. The muḫkâdam at this ûsîyâ was the Sharîf, who conducted the ceremonies at which the Kurân is repeated without the ḥâîb of ‘Abd al-Kâdir being pronounced, and where dances similar to those of the Īsâwîs [q. v.] are performed. Circumcisions are performed at the ûsîyâ on the first day of the masûlîd. A nightly meeting called liûla is held on the eve of this day, at which the ḥâîb of ‘Abd al-Kâdir is recited. At El-Qsar, where there are also some local practices, all the potters belong to the Djilîla, among whom the richer members of the community are to be found (ibid., ii. 163).

The first time that the Kâdir appear to have played a political part was during the French conquest of Algeria, when the chief of the Kâdiriya Mahîyî l-Dîn, having been offered the leadership in the war against the infidel, permitted his son ‘Abd al-Kâdir to accept it. This person was able to utilize the religious organization of his order in order to establish the sovereignty which the French had accorded him, and when his sovereignty was threatened could fall back on his rank as muḫkâdam of his order to win fresh recruits (H. Garrot, Histoire générale de l’Algérie, Algiers 1910, p. 800, 803 etc.). Since the fall and exile of this personage it would appear that the Kâdir in Africa have lost their support to the French government. “In 1879 when there was a local insurrection in Arras the shâhîk of the Kâdiriya of Menâ, Si Muḥammad b. ‘Abbâs, displayed unimpeachable loyalty [s. art. AWASIS, i. 5230]; and the same order helped the French government to extend their influence in the Sahara at Wargla and El-Wad. Their Nâbî, Si Muḥammad b. Tâyîb, fell on the French side at the battle of Charontin, March 2, 1901.” (Israel Hamet, Les Musulmans du Nord de l’Afrique, Paris 1906, p. 276). — In the Ottoman revolution of 1908 it is said that their sympathies were with the revolutionists, but that for fear of being outdone in religious zeal by the rival Efiwî order they joined in Baghdad in the pogrom against the Jews (L. Massignon in Revue du Monde Musulman, vi. 451).

Kâdiriya, the name of several places in the ‘Irak and in Mesopotamia: 1. A town in the ‘Irak, on the Eastern bank of the Tigris, 8 miles S. E. of Sâmarrâ. With the latter it seems to have been closely connected in its period of prosperity. We do not know what special part al-Kâdiriya played at that time. Perhaps, as Herzfeld, (op. cit., p. 107) suggests, it is really identical with the town of Kâtîl which Hârîn al-Kâshîdî or the Caliph al-Mu’tasîm began to build before the foundation of Sâmarrâ. Yaﬁt and other Arab geographers mention the glassworks of al-Kâdiriya. In the middle ages the important Dağılî canal left the Tigris opposite the town. The ruins of al-Kâdiriya lie in Lat. 34° 51’ N., between the two still existing out of the former three Tigris canals, called al-Kâtîl: they are a short quarter of an hour distant from the bank of the Tigris. The old name has survived and is now popularly pronounced Dijîdsî (occasionally corrupted to Djîdsîyâ and Djîdîsîyâ). We owe full accounts of these ruins particularly to Ross and Jones; E. Herzfeld also has recently investigated the ruins. Jones gives a plan of the ruins of the town, which Herzfeld says is entirely correct.

The enclosing walls which measure about 6000 paces form a regular octagon. They are flanked by towers at the corners and defended by 16 bastions at intervals. They were built of bricks which in technique, plan and preservation resemble the château of Sâmarrâ. According to all criteria, these ruins belong — in Herzfeld’s opinion — to the Abbasid period, not to an older one. Ten minutes from al-Kâdiriya, just on the river bank, are also mounds of ruins, called al-Sanâm. They mark the site of a mediaeval or ancient town, half of which has already been washed by the Tigris. On a remarkable find of statues made here, see Ch. Rich, Narrative of a Residence in Kordistan, 1836, ii. 152. Al-Sanâm perhaps was within the area of al-Kâdiriya and is to be regarded as its port.

writes Kasidisi and Kadisiya. In the neighbourhood of al-Kadisiya there was a village called al-Kudais, “little Kādis”. The poets give the whole district around al-Kadisiya the collective name al-Kawadis.

The Arab geographers of the 7th (7th) century (al-Iṣṭaḥkīr, Ibn Hawkal, al-Muḥaddasī) describe al-Kadisiya as a small town with two gates and a mud fortess, in the midst of cultivated fields and groves of date-palms, watered by a canal fed from the Euphrates, the last running water in the ‘Irāq. In ancient times the inner arm of the Persian Gulf seems to have stretched up to the region of al-Kadisiya. The main arm of the Euphrates once flowed, as al-Mas‘ūdī notes (Muḥīd al-Dhahab, ed. Paris, ii. 215), towards al-Jīra, where its ancient bed was still visible and was called ‘al-ṣā‘iqa ‘the old (rives)’. It took its course between al-Kadisiya in the north-east and al-‘Udhaib in the south-west; at al-Kadisiya there was a bridge across it called Dijār al-‘Atāk or Dijār al-Kadisiya.

In the Sassanian period al-Kadisiya played a prominent part as an important frontier town of the Persian empire. It was not till the Muḥammadan period that the town became very famous on account of the decisive battle fought in its vicinity, with which the Arab opened their second campaign against the lands of the Euphrates and Tigris in the most successful fashion. The Muslim army was placed under the command of Sa‘d b. Abī Waqākās, while the Persian troops were led by the imperial commander-in-chief Rustam. Statements differ very considerably regarding the numbers on each side; the number given for the Arabs varies from 6,000 to 38,000 and that for the Persians 30,000 to 120,000 men. The latter were undoubtedly superior to the Muslims in strength. The estimate of an almost contemporary Armenian historian may be fairly near the truth when it puts the Persians at 80,000 men and the Arabs at 9–10,000, besides the Syrian reinforcements of 6,000 men who arrived in the last stage of the fight.

It was only after the two sides had stood watching each other for weeks that they joined battle. The battle lasted three (or four) days. These days in the specifically ‘Irāq tradition have special names, which are probably to be explained as place-names. In spite of all the heroic courage of the Arabs, the balance would finally have turned in favour of the Persians, if at the critical moment of the decision the troops hurried from Syria had not arrived in time. Their rapid and vigorous intervention decided the victory of the Arab arms. It was, however, not a cheap victory for the Muslims, as about a third of their whole force perished.

About the doubtless very heavy Persian losses the accounts are contradictory. The Persian commander in chief Rustam was captured and killed in the heat of battle. Very considerable booty was taken by the victors. The most important trophy was the Persian imperial standard said to date from the early Iranian period (on it see Sarre in Klio, iii. 358 sq.), dirafsh-i Kāwiyān, which was cut in pieces and distributed. In the fighting with the retreating Persians the Arabs also captured the celebrated treasure of Nakāh-jān (properly Nakha‘-ergān) which consisted of valuable ornaments for women; cf. on it Noldeke in the Zeitschr. d. Deutsch. Morgenl. Ges., xxvii. 523–4.

The glorious day of al-Kadisiya, which made the Arabs masters of the ‘Irāq west of the Tigris, is
one of the most celebrated events in the great period of the Muslim conquests. It laid the foundations for the supremacy of the religion of Islam in the near east. Of course, tradition has woven many legends around the victory; it is recounted in the Kādariyya and the Ḥamādiyya.

The date of the battle is very uncertain. The statements in the different sources vary from the years 14 to 16 (655–657). One thing is certain that the battle was fought in the spring and that Baysra was founded after it. Wellhausen (op. cit., vi. 72) decides for 15 (656), while Caetani prefers 16 (657) (op. cit., p. 629–633); see also J. Fuhrmann, Grundriss der Iran. Phil., ii. 546.

In addition to the two towns mentioned above, Yākūt knows three other places called Kādīsiyya, namely two villages in the district of al-Maṣfīl, on the Nahr al-Khāzīr between al-Maṣfīl and Irbil, and a third near Dājirā b. ʿOmar in Meso- potamia; see Yākūt, al-Mughtāris, ed. Wustenfeld, p. 337. Ibn al-ʿArabī also mentions an al-Kādīsiyya near Baghdad (op. cit., xxi. 91). We also find the shorter form al-Kādish beside al-Kādīsiyya, e.g. for the battlefield (cf. above), for a village near Herāt (see J. Fuhrmann, Kastamīnische, p. 337; al-Balādhārī, p. 499, 2) and near Miṣrā al-Kuṭa (Yākūt, iv. 7, 7). Probably in all these place-names, as Noideke suggests (Zeitschr. der Deutsch. Morgen. Ges., xxxiii. 1623), we have to deal with traces of a name of people of unknown nationality, presumably the Kādisheans, who appear in Syrian literature of the 8th and 9th centuries as a wild warrior people in the region of Sindjār. The places called al-Kādisiyya and al-Kādis in Mesopotamia, Babylonia and on Persian territory are perhaps to be explained as settlements of branches of this stock, made by the Sūsānīan kings. Of the celebrated al-Kādisiyya near Kūfā, it is at least definitely stated that its name comes from Kādis near Herāt, from which the garrison of the fort belonging to the military cordon on the frontier is recruited. Cf. Noldeke, op. cit., p. 157 sq., 162; J. Marquart, Erzählungen nach dem Pamir-Missio Nennings (Abhandlungen d. Ges. d. Wiss., 1901), p. 77, 78. (M. Streck.)

KĀDĀJR (kādār, "marching quickly"); cf. Sulaimān Efendi, Lughat-i Čaghatal (Stamboul 1298, p. 214), the name of the present ruling dynasty of Persia. It takes its origin from the Turkoman tribe of the same name settled in the district of Astarābād [q. v.], but which had not always been there. Persian historians assert that it is a branch of the great tribe of Djalār (q. v.) and that it takes its name from Kādār Noyān, son of Sertāk Noyān, who had been the tutor of Ǧāhrān Kūhān [q. v.]; this Sertāk is without doubt the same as he who was put to death by Bāidā (q. v.), because he was a partisan of Gaikhtān (q. v.) in 694 (1295) (Wasâyf, ʾIbbānay, 1269, i. 282; d’Ollson, Hist. des Mongols, iv. 115). This tribe had, it is said, settled on the frontiers of Syria after the reign of Abū Sārīd [q. v.] in 736 (1335); Timūr is said to have brought it back to Persia and into Turkestan, its native country, in 803 (1400). It was one of the seven Turkoman tribes which placed the Safawī dynasty on the throne of Persia. To it belonged Shāh Kūli Kūrī (body-guard), who was twice appointed ambassador to treat for peace with the Turkmen in 1652 (1655) and in 1672 (1675) (Pérez, i. 327–324; v. Hammer, Hist. de l’Empire Ottoman, Fr. transl., vi. 69, 320; Rādj Kūli Kūhān, ix. 2 is wrong in giving the date 696). In 995 (1587), Shāh Abābā i finding them too numerous divided the tribe into three groups: 1. at Merv against the Uzbeks; 2. at Gandja and Erivan; 3. at Astarābād in the fortress of Mubarakabād which he had just built; those who established themselves in the high part were given the name Yeğgarbāth; those who lived in the lower part adopted the name Aṣbāk bāsh. The object of settling them in this region was to protect it from the inroads of the Turkomans from beyond the frontier. A member of the Astarābād branch was ʿAli Kūhān, the son of Shāh Kūli b. Mahdī Kūhān b. Wali Kūhān b. Muḥammad Kūlī. To avenge the death of his two brothers he seized Astarābād. In 1135 (1723) he went to the defence of Isfahan against the Afghāns at the head of 1000 horsemen; but being denounced to Shāh Husain as dangerously ambitious he returned to his province, abandoning the Safawī king to his unfortunate destiny. Called to their help by the people of Ray, he fought without success against the Afghāns at Ibrāhimābād in Waravin, and returned to Māzandarān to offer his services to Shāh Taḥmāsp. During the advance on Muhshid Shāh Taḥmāsp's general Nādir (the later Nādir Shāh) on 14th Safar 1139 (12th 1139 Oct. 1726) (Mahdī Kūhān, Taṛīkh-i Nādiri, Tīrbele 1666, p. 21).

His son Muḥammad Ḥasan Kūnān, pursued by Nādir Shāh, took refuge with the Turkomans, collected supporters there and recaptured Astarābād, which he lost a little later again; it was then that the two obelisks of decapitated heads were built (Kûlummārā) which Hanway saw (illustration in Historical Account of British trade, London 1753,
KADJAR — KAF.

vol. 1, reproduced in Sykes, History of Persia, 2nd ed., ii. 270). Muhammad Hasan went to the tribe of Daz, who expelled him under threats from Nadir. He then lived in the desert, where he heard by chance of the assassination of Nadir Shah. He thereupon retook Astaraabad (1166 = 1747). He was next attacked by Karim Khan Zand, who besieged him for 40 days, then raised the siege and abandoned his camp (1165 = 1753). In 1168 (1755), Ahmad Shah Durrani [q. v.] seized Meshhed and sent Persia Khan at the head of 15,000 horsemen to attack Muhammad Hasan’s possessions, but this army was defeated at Sabzawar. Muhammad Hasan followed up this success by conquering Kazvin and Gilan. He marched on Isfahan. Karim Khan lost the battle of Gulistanabagh, fought four parasangs from this town, and fled to Shiraz. In 1169 (1756) he seized Aharabaidjan, where the Afgan Azad Khan was in command; he annexed this province in 1170 (1757) and appointed as its governor his son Agha Muhammad Shah, then aged 18. Next year he marched on Shiraz but his army melted away owing to scarcity of provisions. He then had to suppress several local revolts. His troops, exhausted by their continual marches, abandoned him; he returned to Astaraabad with a body of Ashrafshah and his own private servants. Defeated in a fight with Shahk Ali Khan in the desert of Karkas, the feet of his horse sank in the mire and in this position he was killed by the Kord Sabz Ali, one of his servants who had gone over to the enemy (1171 = 1758).

Husain Kuli Khan, second son of the preceding, surnamed Dahan-Siz on account of his courage and fearlessness, entered the service of Karim Khan who also attacked to his court Aga Muhammad Khan then aged 30. The latter went to Shiraz; his family settled in Kazvin. Appointed governor of Daghlan, but carried away by his ambition, Husain Kuli attacked Astaraabad and there gave himself up to plunder and massacre. He seized Mazandaran and surprised at Bafarush, the capital of Mazandaran, the governor appointed by Karim Khan, Mahdi Khan. He was shot in his tent by rebel Komi Turkomans at the age of 27. He was the father of Faiz Ali Shah [q. v.].

Kadjar Dynasty.

Faiz Ali Khan, born 1097 (1685) or 1104 (1693); accession 1113 (1721); died 1139 (1726—27); buried at Khydadah Kabir, near Meshhed.

Muhammad Hasan Khan, born 1127 (1715); accession 1164 (1751); died 1172 (1758—59); buried at Shaz Ali-Ab-jam.

Husain Kuli Khan, surnamed Dahan-shah, born 1154 (1751); accession 1184 (1770); died 1191 (1777); reigned at Astaraabad.

1. Aga Muhammad Shah, born 1155 (1752); accession 1193 (1779); died 1211 (1796—97); buried at Nadjar (Meshhed Ali).

2. Faiz Ali Shah, born 1185 (1771); accession at Tehran 1212 (1797—98); died 1250 (1834) at Kumm. — Abbas Mirza, nephew of Ali Shah, born 1203 (1788—89); died in Khurasan before his father’s death (1249 = 1833—34); buried at Meshhed.

3. Muhammad Shah, born 1222 (1807); accession 1250 (1834); died 1264 (1848); buried at Kumm.

4. Nasir al-Din Shah, born 1247 (1831—32); accession 1264 (1849); assassinated in 1856.

5. Muhammad al-Din, born 1260 (1853); accession June 8, 1856; died 14 January 1907.

7. Ahmad Shah, born 1314 (1898); attained his majority in 1914.

(Cf. Huart.)

KADR (a.) another pronunciation of KADAR [q. v.], a Persian poet who commemorated the capture of the island of Kishan and of the town of Hormuz by ‘Abbās I in two short epic poems, Djang-namə Kayhan and Djangnamāma. The former is edited by L. Bonelli in the Kendicenti della R. Acad. dei Lincei, vi, Semester 1, fasc. 8. Cf. Eshī in the Grundriss der iran. Phil., ii. 237.

KAF, the 22nd letter of the usual Arabic alphabet (numerical value 100; cf. the article ABjad). The pronunciation of ʿaf as an unvoiced palatal explosive, found as early as Sibawaihi, has survived in modern academic speech. In the present day popular speech we find some variants (in addition to ʿaf) notably the affricate ḫ (cf. the article ARABIA, ARABIC DIALECTS, i. 396b; and SchaadⅠ, Sibawaïhi’s Lautlehre, Index). (A. Schade.)

KAF, the 21st letter of the usual Arabic alphabet (numerical value 100; cf. the article ABJAD). The form of the character goes back to the Nabataean ʿaf and later in Arabic was assimilated in form to faʾ, so that it had to be distinguished from the latter by pointing (cf. the article ARABIA, ARABIC WRITING, i. 353b and plate I). In Sibawaihi’s time ʿaf was pronounced as a velar g. This pronunciation is still frequently found among Beduins and peasants; in the ordinary popular language, however, ʿaf is usually pronounced as hamza; for other modern popular pronunciations of ʿaf see the article ARABIA, ARABIC DIALECTS, i. 396b. The modern academic pronunciation is ʿ (i.e. velar k). Cf. SchaadⅠ, Sibawaïhi’s Lautlehre, Index. — Kaf is also the title of Sūrā 1. of the Kur‘ān. (A. Schade.)

KAF in the Cosmology of Islam is the name of the Mountain Range surrounding the earth. On the shape of the earth there were different opinions among the later Muslims:
knows the bull and fish as bearers of the earth; cf. H. Petermann, *Reisen im Orient*, ii. (Leipzig 1861), p. 301. Among the inhabitants of the Red Sea coast, the belief prevails, that the earth rests on the backs of colossal bulls, see E. Ruppell, *Reise in Abyssinien*, i. (Frankfurt a. M. 1858), p. 256. Al-Kazwini gives the bull here for the bull of the Biblical monsters, Leviathan and Behemoth, and thus shows definitely that the Muslim idea is connected with the old Biblical views, which again can in the last resort be traced to the Babylonian Chaos-tradition. The basic idea of the bull supporting the earth is, as Reinsch (*op. cit.*), has emphasized, also to be found in India. The rock already mentioned as supporting the earth and as the starting point of the mountain Kāf may well be associated with the stone Setiyas, which Jewish legend regards as the navel-stone of the earth sunk by God in the depths of chaos or primeval ocean, and as the support of the world. For the Jewish legend cf. Feuchtwang in the *Monatsschrift fur Gesch. u. Wissenschaft des Judentums*, liv. (1910), p. 724 sq.; W. H. Roscher, *Neue Olympus-Studien* (*Abhandl. d. sächs. Gesells. d. Wiss.*), xxxi. (1915), p. 73 sq. It may be added that a tradition in al-Kazwini (i. 144, 23) also gives the view that God made the world stand without any band or support.

According to a very popular idea, Kāf is the origin of all the mountains of the world. They are connected with it by subterranean branches and veins: if God wants to destroy any region, he simply orders one of these branches to lie in motion, which causes an earthquake. According to a different popular view, an earthquake is caused because the bull supporting the earth sometimes trembles under its burden.

Kāf, which is inaccessible to man is regarded as the end of the world; its name is therefore used as a 53 mbol for this; cf. e.g. a verse in Djam†'s *Yašuf-i-Zelišgah* (ed. Rosenzwieg), p. 1, 14. This mythical mountain forms the boundary between the visible and the invisible world. No one knows what lies behind; God alone knows the creatures that live there. Many say (cf. Ibn al-Wardi, p. 188) that the area behind Kāf belongs to the next world, is a land white like silver, 40 days' journey long, and is the abode of angels. According to an alleged saying of Muhammad (see Zener in *Lanc, op. cit.*, p. 250), there are still other lands beyond Kāf; one of gold, 70 of silver, 7 of musk, each 10 000 days' journey long and broad and all inhabited by angels. It is also said that Kāf as well as the region behind it is the abode of the Djam. Kāf itself is especially known as the abode of the fabulous bird Simurgh, a kind of vulture, which is essentially the same as the ankuš [q.v.] of the Arabs. Existing since the beginning of the world, this marvellous bird retired in monastic solitude to Kāf and lives there contented and satisfied, a wise councillor consulted by the kings and heroes of the past. Kāf, his residence, is therefore simply called "Mount of Wisdom" in poetry, symbolically also "Mount of Contentment". In his celebrated work, *Maniš al-Tair* ("The Dialogues of the Birds"), the Persian poet Farid al-Din' Ḍāṯar [see Ḍāṯar] describes the wandering of the bird through the seven stages which the soul has to pass through till its complete merging into God, in the allegory of a very difficult, adventurous flight by a bird through...
the seven valleys up to Mount Kaf, the throne of its all wise king Simurgh.

Kaf plays a part also in Arab fairy tales; in the 1001 Nights it is several times mentioned. Oddly enough a number of Kur'an expositors explain the title of Sura I, the letter Kaf, as the name of the mountain Kaf.

In a narrower sense and localised on the earth, Kaf means that part of the Asiatic highlands which bounds the Muslim world in the North, especially the Caucasus and its spurs in Northern Persia. For this reason Demavend, the scene, celebrated in the Shāhnāme, of the wondrous exploits of old Persian rulers and heroes is represented as the home of the Simurgh [see 937].

There can hardly be a doubt that the Muslim idea of the mountain Kaf in the wider (mythic) and narrower sense is borrowed in its main features from the Persians. With them Alburz (Alburd), old-Persian Harā-berezaiti (“the high mountain”), is originally the mythical mountain at the end of the earth which, like the Hellenic Olympus, also contains the palaces of the gods. From the Avestan account one must regard the Harā-berezaiti as the backbone of the mountain system of the earth, for all other mountains of the world have grown out of it by subterranean connections. The Harā-berezaiti was imagined to be a range of mountains enclosing not only the whole earth but also a lake, named Wuruksha, which is likewise at the end of the earth, but according to the Bundehist does not surround it. In the geography of this Pehlewī work moreover the name of Mount Kaf is actually found; cf. Windschmied, Zoroastrierische Studien (Berlin 1863), p. 73, 75 Note 4. Alburz was next located on the earth itself and identified with the mountain-wall which encloses the world of Iranian civilization in the north. The name Albus (Elburs) is thus found in several places to-day as the name of a mountain or range on the borders of the Iranian linguistic area, notably as the name for the chain which culminates in Damavand. (cf. Aleuzi, i. 251).

It should be emphasised that Yakhut (op. cit.) expressly says that Kaf in ancient times was called Albus; see also Mustawfi, Nuzhat al-Khilah (Gibb Memorial Lectures, xxii), p. 191 sq.). Geiger (op. cit., p. 51) thinks that Lake Wuruksha was originally a definite locality (Lake Aral or the Caspian Sea), but as early as the Avestā it often appears removed into the region of myth. On Harāberezaiti-Alburz and Wuruksha (Wuruksha) cf. Ritter, Erdkunde, vii., 42 sq.; Fr. Spiegel in Zeitschr. der Deutsch. Morgenl. Gesellschaft, vi., 85, and in Ernste Altertumskunde, i. 191 sq. (Leipzig 1871); W. Geiger, Ostiran, Kultur im Altertum (Erlangen 1883), p. 42 sq.; F. v. Andrian, Der Hohenbultus annatlischer u. europäischer Völker (Vienna 1891), p. 287 sq.

That the Muslim idea of Mount Kaf possesses its prototypes in the analogous Indian and Iranian ideas of the mountains bounding the world, Lokālaka and Harāberezaiti-Alburz, was previously pointed out by Gesenius (op. cit., p. 317) and Rosenzweig (op. cit., p. 185).

Closely connected with the Muslim view is that of the Mandaeans. According to them (cf. H. Petermann, Reisen im Orient, ii. (Leipzig 1861), p. 452), the disk of the earth is surrounded by the ocean except on the north where a great mountain of rock of the purest turquoise cuts off the sea. Immediately adjoining this turquoise mountain, the reflection of which causes the blue of the sky, lies the pure world stretching to the north. Very probably the Mandaeans got their idea from Muslim sources. The contrary view of de Goeje (Tabari, Annales, Intro., p. cxxxvii) that the Arabs got the idea of Kaf from Mandaean mythology, seems less plausible.

Among the Hindus Meru which, according to the usual Buddhist view, is the centre and navel of the earth (cf. W. Foy in Festschrift E. Windisch, Leipzig 1914, p. 215 sq.; E. W. Hopkins, Epic Mythology, Strassburg 1915, p. 253, Index, and Roetsch, Neue Onomastikstudien, Leipzig 1915, p. 72) is sometimes also interpreted as the Himatya mountains bounding India on the north. For the Greeks, the mount of the gods, Olympus in Thessaly, marked the north frontier of their home.

KAF - KAF.

(M. STRECK.)

**KAFA or KAFFA,** also written AL-KAFA, a mediaeval town on the south shore of the Crimean peninsula, called in ancient times and again at the present day Theodosia (originally a Mileian colony). The name Kafa (Kafa, or Kafa, is first found in Konstantinos Porphyrogenetos (*De administr. imperii*, Ch. 53). Saromates V, king of Iosporus, is said to have been killed there in the fourth century in single combat with Pharnaces of Chersonesus. The view has been put forward (F. Koppen, *Krimský Šborník*, St. Petersburg 1837, p. 107) that the name may be identical with the ζάξων mentioned in Strabo, Ch. 312. With these exceptions, Kafa is never mentioned till the xivth century. As a harbour on the south coast of the Crimea, for trade as well as for warships, we always find Suđađak (even as late as the reference in Recueil de Textes rel. à l'Hist. des Slavonoides, ed. Houtsma, iii., iv. see, Index), the modern Sudak.

Kafa only rose to prominence in the second half of the xivth century, when the Genoese established themselves in the Crimea after the republic of Genoa had purchased this place from a Tatar chief. This chief is usually believed to have been the Urân Timur, mentioned by Abu 'l-Gha'zi (ed. Desmasions, p. 173), son of Tüçü Timur, and grandson of Djiçi, to whom the Khan Mongke Timur (1266—1280) had granted Kafa and the (the name is written by Abu 'l-Gha'zi (p. 178), Urân Timur, by Rashid al-Din (ed. Blochet, p. 126), Urâng Timür; but a consul of Kafa is mentioned as early as about 1263. It was not till the xivth century that "Gazaria" or "Gazzaria", the colony founded by the Genoese on the Black Sea with Kafa as its capital, became of considerable importance. It was controlled by the *officium Gazariane* in Genoa and its statutes (1316); the administration remained in the hands of the metropoles with a limited participation by the local population. The statutes of 1290 and 1316 expressly forbid the minting of a local currency but in the xivth century this was, in practice at least, allowed; the coins (with Latin and Tatar inscriptions) bear the badge of Genoa (after 1453, when the administration of the colony was placed in the hands of the Bank of St. George, the representation of this saint) as well as the seal (tambha) of the Golden Horde (afterwards the tavgza of the Girây; cf. ii. 171). After 1318 Kafa appears as the see of a Catholic Archbishop, whose diocese comprised the whole area from Yarna to Sarai on the Volga and from the Black Sea to the Russian dukedoms. Ibn Batъtīa (about 1330) describes Kafa as "one of the famous ports of the world" (ed. Defremery and Sanguinetti, ii. 358; *mun marâṣī l-'Idnyâ l-zâhîrâ*) of his time. In the harbour there were about 200 naval and mercantile ships. The Muhammadans there had their mosque and kâňa. By the treaty of 1530 however, the Tartars could move no ships beyond the city walls; this limitation seems to have again been removed later. In the statutes of 1449 it is only laid down that Tartars living in Kafa are not to be subject to the *Titanius seu vicarina* i.e. the *Tudun of the Khan of the Crimea*. The fortifications still in existence belong in part to the period 1531—48 (successful wars against the Khan of the Golden Horde, Djinbqeg), in part to the period 1583—66 (building of the city walls as a protection, not only for the city proper (*burgus*), but for the suburbs (*anturburgi*) also. About 1470 the population is said to have been 80,000. As early as a letter from the Bank of St. George to the Pope Calixtus VI (1455—58), of Nov. 1, 1455, in which attention is drawn to the danger threatening the Black Sea colonies from the Turks, Kafa is described as non ambitu quidem minimis sed populorum multitudine Constantinopolis facte praferenda.

The Turkish conquest, inevitable after the fall of Constantinople (1453) and Trebizond (1461), could not be long averted by the Christians of the Latin East either with their own forces or the oft summoned help of the Girây (to whom Kafa was in some degree dependent from 1454, when a Genoese navy was defeated by Habûd of Girây). In 1475, when the whole peninsula had to submit to the Turks; the south shore with Kafa was directly incorporated in the Sultan's empire and divided into three kâñflik (Kafa, Manküb and Suđađ) with a Pasha in Kafa. Under Bâyazid II (1481—1512), at the time of the first Russian embassy (1498), this office was filled by a son of the Sultan, Muhammad (this information does not seem to be found in Turkish sources, as it is only given by von Hammer, *Gesch. der Osmanischen Reiches*, 2nd ed., Pest 1834—36, i. 646, from Karamzin, *Ist. Gös. Ross.*, 2nd ed. St. Petersburg, 1818—29, vi. 169 sq. = *Gesch. der Russ. Reiches*, transl. from the 2nd edition, Riga 1824, vi. 215). For a short period the revenues of Kafa were occasionally surrendered to the Girây; Kafa appears as a mint of the Girây under Mengli Girây from 890—906 (1493—1501) and again not till the reign of Şâhin Girây, regnal years 5 and 6 i. e. 1195, 1196 (1781—82).

Under Turkish rule Kafa (Turkish pronunciation Kefe) gradually assumed the appearance of a Muhammadan town, although many Christian churches remained in existence. The most detailed description is by Dortelli d'Ascoli 1654 (Russ. transl. in *Zapiski Odeszkago Obščeh*, etc., xxiv., text. publ. by Daškewič in *Glavna w. ister. ekbği, Kestora llitipoisico*, Book 5), who had spent over ten years in the Crimea at the beginning of the seventeenth century. There were then in Kafa 70 mosques, 2 synagogues (one for Rabbaines and the other for Karaites), 15 Greek, 28 Armenian (according to Beaulieu [1660], 12 Greek and 32 Armenian) churches and only one Catholic. The principal mosque (*hüyûk quişi*), later described by Pallas in 1794 (*Bemerkungen auf einer Reise in die südliche Staatslalellschaften des ruzz. Reiches*, i. d. J. 1793 u. 1794, Leipzig 1801, ii. 262), stood
in the centre of the town; the dome of the main building, over 65 feet in diameter, was surrounded on three sides by eleven smaller cupolas; the two minarets were 115 feet high. A decline in the prosperity of the town under Turkish rule was noticed by Broniowski as early as 1578; as the world's trade had taken other routes, the shores of the Black Sea no longer had their former importance; yet to the end of Turkish rule Kafa remained the most important harbour on the north side of the Black Sea. Chardin (Voyages, Amsterdam 1735, i. 46 sq.) says that in his 40 days' stay there (Aug.—Sept. 1672) he saw nearly 400 ships arriving and departing. In the town there were then about 4,000 houses of which 3,200 were Muslim and 800 Christian; there were no stone buildings with the exception of 8 churches in ruins (apparently dating from the Genoese period). Even in the xviiith century Kafa was still compared with Constantinople by the Russians and called Little Stamboul (Kütük İstambül).

In 1772 Kafa was taken for the first time by the Russians, but not finally incorporated in the empire till 1783. According to the oldest Russian plan of the city, there were then 29 mosques, 13 Greek and 22 Armenian churches, and 813 houses of which 604 were Turkish. In the description of the journey of the Empress Catherine in 1787 we already find the old Greek name (Russ. Feodosia) reappearing; the town is later called Kafa again and only definitely renamed in 1804. In the very early years after the conquest began the forced migration of the Turks and the voluntary of the Tartars; about 1794 (Pallas) Kafa had already *from a celebrated and populous town become almost a mound of stones*. It is said to have had only 200 inhabitants. The Russian harbour of Feodosia, whose prosperity only began in the last decade of the xixe century (railway connections, building of commercial docks, Sebastopol being the naval port), must thus be regarded as a new foundation on the site of the Turkish Kafa. The number of the inhabitants, according to the census of 1899, was 27,238 (in 1894, only 17,000); of whom only 3,200 were Tartars. The Museum (founded in 1811) contains many inscriptions and other antiquities, particularly from the Genoese period.

Bibliography: cf. BAGHES-SARKI [i. 663]; the works, mentioned there, by Broniowski, Pallas, etc., as well as the Zapiski Odeskiego Obschestva Istori i Drevenosti are indispensable for the study of the history of Kafa. In the Zapiski (from Vol. ii. to xxiv) the material from the archives of Geno in published in Italy (Atti della Società Ligure di storia patria) is utilised. On the coins: O. Retowski, Genoecka-tatarska monee goroda Kaffi (Simferopol 1897 and 1898). Cf. also F. Brun, Cernomorye, i. (Odessa 1879), chap. ii (O poseleniyakh iazykanskikh v Cazarii); J. Kulakowsky, Przychody Tawidi, 2nd ed. (Kiew 1914). An attempt at a connected survey is W. K. Minogradow, Feodosiya (Istorischy Ocherk), 2nd ed. (Jekaterinodar 1902). Cf. also M. G. Canale, Della Crimea (Genoa 1855) and Heyd, Hist. du Commerce du Levant (Leipzig 1858/9), Ind. s. v. Caffa. (W. BARTHOLO)

KAFAL (καφάλα), the pledge given by any one (the kafal) to a creditor (the makfat biki) to secure that the debtor (the makfat biki) will be present at a definite place e. g. to pay his debt or fine or, in case of retaliation, to undergo punishment.

If the makfat biki is not there at the time arranged, the guarantor can be kept prisoner till the debtor comes or until it is proved that he cannot come (e. g. because he is dead). As to the question whether the guarantor is bound to pay for the makfat biki or to suffer his punishment, the opinions of the different madhab's vary. According to the Shafi'i school, he is not bound to do so, not even if he has expressly bound himself to do so.

(TH. W. JUVENBOL.)

KAFF (καφ), a technical term in Arabic prosody. It means the dropping of the seventh, vowelless consonant of a foot, which ends with sabab kisif (see the article KISIF, i. 463). The following feet are liable to kaff: 1. mufussil, provided that the 1 remains (> mafâsila; 2. fâšâla and mutaâlâa (the latter in the kisif), provided that the next foot beginning with a sabab kisîf does not suffer khaân (> fâšâla, mutaâlâa. [In the last mentioned case four short syllables would follow in succession! Editor]. Kaff is therefore found in the metres tawîl, madíd, rakâb, kisîf, kadîjî mudârî and mudjîtahât. Bibliography: See the article 'ARûd.

(MOH. BEN CHENEB.)

KAFFÂRA (καφâra), an atonement, expiation, literally, what "covers" the sin. The kaffâra has usually to consist in releasing a Muslim slave or — for those who are not sufficiently well off — in a three days' (and in some cases even two months') fast or as a substitute — for those who are not able to fast — in bestowing food or clothes on a definite number of poor people (from 10 to 60).

In some cases the Kurân has already prescribed a definite kaffâra for the sinner, e. g. Qurân iv. 94, after killing by accident or by design, Qurân v. 91, to avert the evil consequence of breaking an oath, Qurân lvii. 4 sq., if a man by pronounce the old Arab zikân formula has sworn to refrain from all sexual intercourse with his wife. These and many other cases (e. g. the breaking of the fast prescribed in the month of Ramâdân by fornication or marital intercourse during the day) were afterwards more precisely defined by the fâ'î's and fully described in the fik books of the different madhab's.

(TH. W. JUYENBOL.)

KAFIL. [See KAFÂLA.]

KAFIR (καφîr), originally "obliterating, covering," then, "concealing benefits received"  — "ungrateful;" this meaning is found even in the old Arab poetry and in the Kuràn, Sûra xxvi. 18. In the Kuràn the word is used with reference to God: "concealing God's blessings"  — "ungrateful to God," see Sûra xxi. 57 and xxx. 35: "All that they are ungrateful for our gifts;" cf. also Sûra, xvi. 85. The next development — probably under
the influence of the Syiric and Aramaic where the corresponding development took place earlier — is the more general meaning of "inhal" which is first found in Sūra lxxiv. 10 and is henceforth very common; plural kāfirun or kufār, once (Sūra Ixxx. 42) kufāra. The term is first applied to the unbelieving Meccans, who endeavour to refute and revile the Prophets (muhār) and elsewhere. The subject of incredulity is sometimes more nearly defined with added bi-, e.g., Sūra xxxiv. 33: "We do not believe in your mission"; Sūra vi. 89. In the early Meccan period a waiting attitude towards the unbelievers is still recommended (Sūra Ixxvii. 17; Ixxii. 10 sq.; see also Sūra cix. entitled al-Kāfīrūn), but later the Muslims are ordered to keep apart from them (Sūra iii. 114, also 27), to defend themselves from their attacks and even to take the offensive against them (Sūra ii. 180 and elsewhere). In most passages the reference is to unbelievers in general, who are threatened with God's punishment and Hell (cf. the article ḤANNAHMA). In the literature of ḤAJAMA also the believer with minute elaboration in details — deal partly with the fate of the kufār on the day of judgement and his punishment in hell, and partly with the believer's attitude towards him. For the rest they reflect the great controversy in early Islām on the question whether a Muslim should be considered a kāfir for committing a "major sin" (cf. al-Bukhārī, Kit. al-Īṣām, liāb 24). Thus we find ḥadiths such as: "If a Muslim charges a fellow Muslim with kufār, he is himself a kāfir, if the accusation should prove untrue"; or "The reproach of kufār is equivalent to murder" etc. Nevertheless, kufār in theological polemics is a fairly frequent term for the Muslim protagonist of the opposite view.

Eternal damnation for the kufār, has remained an established dogma in Islām. In the dogmatic controversies of the early centuries the reasons were discussed for which a Muslim could be identical with a kufār and have to suffer eternal punishment. The most tolerant is the view of the Muqaddja that all the Ahl al-Kībla, even if they commit a mortal sin (kabīra) are to be considered believers and their ultimate fate is to be left to God. The most striking contrast to this is the strict view of Khārījīs and Ḥādīṣ that every Muslim, who dies with a mortal sin — and this means with them every sin which has not been repented of — on his conscience, is to be considered just a kāhir. Intermediate is the opinion of the Muṭṭaṣilīs, who for this special case assume an intermediate between believer and unbeliever, the so-called "rejected" fāšk (cf. the article IMĀN. — According to Nallino, in the Riv. degli Studi orientali, vii. 436 sqq., the names Muṭṭaṣilīs, Mūrḍjīs, etc. [q. v.] are probably closely connected with their attitude on this point). According to the Liṣān al-ʿArab, vi. 459 sqq., the following kinds of unbelief are distinguished 1) kufār al-ินākār — neither recognising nor acknowledging God; 2) kufār al-ʿjlīḥād — recognising God, but not acknowledging Him with words, that is, a remaining unbeliever in spite of one's better knowledge; 3) kufār al-muʿānāda — recognising God and acknowledging Him with words, but remaining unbelief (can unite out of envy or hatred); 4) kufār al-miṣfāk — outwardly acknowledging, but at heart not recognising God and thus remaining an unbeliever, that is being a hypocrite [cf. MUNĀFĪK].

In the systematic Fiṣḥ books the kufār are discussed in the following passages: 1) in the Kitāb al-Ẓahrā. For the opinion deduced from Sūra ix. 28 that the unbeliever is unclean, we find all views represented, from the strictest to the most tolerant: just as on all questions of the strictest is the Shi'a which reckons the unbeliever among its dhah adhīyāt; but on this point al-Nawawī, for example, was particularly lenient; he considers the believer and unbeliever equal as regards purity. The Ahl al-Kitāb [q. v.] are usually regarded more leniently than other Kufār for their benefit for example the questions of the dhāhīs and of mūnakaḥa with Muslims are discussed. — 2) In the Kitāb al-Dīnākh (soa ʿl-Siyar). The Ḥiyāh [q. v.] against the unbeliever inhabitants of the Dār al-Ḥarb [q. v.] is a fardʿ alaʾa kufāya. The Ahl al-Kitāb again occupy a special position as by paying ḥisya and ḥarām [q. v.] they become ḥimmīs [see DHIMMA] and can receive amān [q. v.]. These categories of unbelievers in the Dār al-Islām called dhimmī and musulmān have a legal claim to protection. Another class also distinguished from the mass of the kufārin are the renegades [see MURTAD] for whom the law prescribes death, with the opportunity first of obeying a demand to return to Islām. The others, the unbelievers proper, who in this sense also are called kufārin al-ṭālīyūn (or munkabīn, in the narrower sense) have only to expect death or slavery [see ʿABĪ] if they fall as prisoners of war into the hands of Muslims; if they are fortunate, they may be exchanged or released. (In many cases, e.g. in the gradual advance of Islam into Africa the distinction between renegades and pagans was difficult to ascertain and there are writings extant which deal specially with this question, cf. Ibn Ḥadjar al-Ḥattāni, al-Īʿlam bi Kawsūṭ al-Islām, lith. 1293). — 3) In several further points the law discriminates between kufār and believers; the very strict interpretation of the law is however in practice only held by a small minority.

To understand the historical development in the attitude of Islām to the unbeliever, it should be observed that it was settled in the early centuries not so much by religious as by political and social conditions. Even down to the time of the Crusades there prevailed in Islām a tolerance towards the unbeliever, especially the Ahl al-Kitāb, such as is impossible to imagine in contemporary Christendom. We find for example Christians in the highest official positions. In this early period there is no question of any religious fanaticism towards unbelievers. It was only aroused and nourished by the repeated wars with unbelievers (Crusades, wars with the Turks). War-psychology, on the other hand, at the time of the wars between Persia and Turkey could even bring it about that the Persians were called kufār in Turkish fetwas etc. (see Pečeti, i. 311, 319), a name which the Turks themselves had applied to them in the proclamations of the Mahdi of the Südān.

Since at the present day the trend of affairs has apparently been quite in the opposite direction, and Muslims have been more and more impoverished in carrying out measures against the kufār by the political decline of Islām and the rise of unbelieving nations (pressure of the Powers, capitulations, etc.), the very feeling of impotence in face
of these facts may have contributed not a little to the strengthening of hatred and to periodical manifestations of it (in massacres etc.). This also explains the grotesque caricature of the käfer, which one sometimes finds in the popular imagination at the present day (see Snouck Hurgronje, Methka, ii. 48 sqq.) and which is connected with the ideas of the Arch-Käfer, Daddjdu [q. v.] who bears k-fr on his forehead (cf. Goldziher, in Der Islam, xi. 178).

It may also be due to the hatred of the Franks (not to dogmatic squabbles) that käfer had developed into a term of abuse, so frequent in the Turkish form čaw (the Persian čawer [q. v.] is said to be the same), although in theory it is (Zeitschr. d. Deutsch. Morgenl. Gesellschaft, xvii. 562) affirmed that the Muslim commits a punishable offence if he says to the Christian or Jew: "Thou unbeliever". From the Turkish the word käfer has entered into most Slavonic languages. The Spanish cafer and the French cafar or the French kafar also go back to käfer or kaffir. In two cases käfer has actually become a proper name, that of a people, the Kaffirs, and of a country, Kafirstan [q. v.].

Käfer and kafir underwent a special development of meaning in the terminology of mysticism. Compare, for example, the well-known verse of Abū Saʿīd [q. v.]: "So long as belief and unbelief are not perfectly equal, no man can be a true Muslim", with the various explanations given in Muḥammad Aʾīl, Dict. of Technical Terms (ed. Sprenger, etc.), s. v., according to which kafir is just the equivalent of imān-i ḥašš."}

Payne Smith, Théaurus Syriacum, ii. 1798 sqq., in Aramaic s. Levy, Ghidasliche Worterbuch über die Targumim, p. 381 and his Neuhebräisches und chaldisches Worterbuch über die Talmud und Midraschim, ii. 383 sqq. — For the literature of Tradition the whole material will be available in the still unfinished Indexes of Prof. A. J. Wensinck, who has kindly called my attention to the hadith quoted above.

KAFIRISTAN. The name of a mountainous tract in the Hindū-Kush situated between 35° and 36° N. and 70° and 71° E. with an area of about 5000 sq. m. Till recently independent, but since 1896 a territory of Afghanistan. The northern boundary is roughly the watershed between the drainage of the Oxus and that of the Indus, the valleys to the north being occupied by Gālāja [q. v.], to the west the spurs of the Hindū-Kush which runs southward from the neighbourhood of the Khāwāk Pass may be considered the boundary separating it from the Panjāshār and Nīdhunāi valleys. To the east and south the range between the Kunār and Bāshgul valleys and those to the north of the Kunār and Kābul valleys define its limits. The country consists of numerous valleys much isolated from each other by lofty ranges, the principal rivers draining which fall either into the Kābul or Kunār rivers, and so belong to the Indus basin. The principal are the Aliṅgar or Kāo with its tributary the Ali-şāh, the Pīk (Kāmah or Prēṣūn) and the Bāshgul. The inhabitants, from their persistent paganism, have long been known as Kāfrs, and from them the name of the country Kafirstān is derived. The term Sīyāh-pōsh or “Black-clad” which properly belongs to one section only, (the others being classed together as Safed-pōsh or “White-clad”) has also been in use from an early period.

This tract was undoubtedly part of the Kūshān kingdom in the early part of the Christian era, and has been identified with the mountain country of Kapiṣa. The name Kātār applied to the country and its ruling tribe by Taimūr (Timūr) is identical with the title of the rulers of the neighbouring country of Cīrāl, and is no doubt the same as Kātir, the name of the principal tribe at the present day. It is most probably derived from the title Kīdāra used by the later Kūshāns. It has been thought by Wood and Yule that the wine-drinking tribes whom Marco Polo met near Casen (i. e. Kīshm in the Kōkān valley) are identical with the Kāfrs, who may have at that time extended into the northern valleys of the Hindū-Kush, but the first definite mention of them is in the Emperor Timūr’s memoirs. On his way to invade India in 800 (1398) he turned aside into their country from the Khāwāk Pass to punish them for their raids on Andarāb. He calls them Kātār and Sīyāh-pōsh. In spite of his claims to victory it is clear that a great part of his forces was destroyed in an ambush and he returned to Khāwāk without any permanent success. Bābur in his autobiography gives a very accurate account of the country and people, many of the rivers and districts being described by names they still bear.
In more recent times Elphinstone from his observations in 1809, Masson (in 1826) and Biddulph (in 1880) collected all the information available without entering the country, and the account given by the first-named is especially valuable. The first European to penetrate Kāfirīstān was Lockhart in 1835; followed by Robertson in 1839 and 1890. The last named in his work on the Kāfirs of the Hindū-Kush has given the best account available of the country and people, their customs, beliefs and organization.

In the treaty of 1803 between the Indian Government and Afghānīstān, Kāfirīstān was definitely left outside the British border, and the Amir 'Abd al-Raḥmān proceeded in 1896 to conquer the whole and to convert its population forcibly to Islām. The Rāmgāli tribe, a branch of the Kātir, was the last to submit. Robertson classifies the population under two heads, viz. the Siyāh-pōsh tribes all closely related to each other (the principal tribe being the Kātir), and the miscellaneous tribes, without any special bond of union, included under the name of ʿAṣāf-pōsh. The chief of these are the Waigalis (with the Ashkun who are related to them), and the Pṛṣungalis or Vērōn. All seem to belong to an ancient branch of the Arvāni stock, and their languages are of the Piśā family, which according to Proust and Grierson, have the characteristics of a tongue spoken after the Indian family had branched off, but before the Iranī had been differentiated. The purest dialects are the Bāshgī, Wāi-ālā and Vērōn, spoken in the central parts of the country. The Gwār-bāt, Kālāshā and Pāshāī form an outer group; the Pāshāī in fact being spoken in the Dījalāūgh valley outside the limits of Kāfirīstān proper. There is also another member of the group Ašghund, as to which nothing is as yet known.

The form of paganism followed till lately was much mixed with animism, but there were certain principal gods generally recognized, the chief of which were Īmrā, the creator, whose principal shrine was at Pṛṣung, and the goddess Dūzānā, the war-god and the goddess Dūzānā. In the borderlands however many districts had already accepted Islām before the Afghān conquest. These converts were known as Shaikhīs. Sacrifices of goats and ceremonial dances were very prevalent.

The social system is entirely tribal, each tribe consisting of several clans. The tribal government is carried on by a council composed mainly of the headmen or ānjāst who represent the various clans. A number of uṭīr or magistrates are elected annually to carry on the actual tribal government. The houses are well built and grouped into strong villages. The Kāfirs generally are acute and clever, but untruthful, intriguing and vain, yet they are hospitable and not generally cruel. They are brave and fond of freedom, and in their own country show a great sense of dignity; very quarrelsome, but always ready to put a stop to fights among others. Theft and assassination are not in any way condemned. Slavery is prevalent, the slaves being partly hereditary and partly obtained by capture in intertribal war or by purchase.

Kāfiya (λ), a term in prosody meaning rhyme generally. The word seems (according to Goldscher, Ahkand, sur Arab. Philologie, i. 83 sqq.) to have originally meant a poetic utterance or a lampoon, then a poem and finally a rhyme. The theory of the kāfiya is considered a special science, (distinct from 'awād (prosody proper). It teaches how verses should end as regards consonants and vowels etc.

In the narrower sense, kāfiya, according to al-Khallīl b. Ahmad [q. v.], is a group of consonants, which begins with the voweled consonant immediately preceding the last two quiescent consonants of a verse. In the Arab view, of course, a verse ends always with a quiescent letter, whether written or not (the latter is the case with wāw and yā' of prolongation when they are written defectively): yəf'-āl, yəf'-āl, yaf'-āl, yaf'-āl. The kāfiya may include up to six consonants:

1. the principal one (in the Arab view), the rawi or rhyme-letter, the letter which the poet always retains at the end of the line, till he has ended his poem and also, which the letter is called: lām in the mutallaka of Imrū al-Kais, dāl in that of Šāfī, etc. It is to be noted that Arabic poems are all mono-rhymed with the exception of the rādīq matassumid, in which the two hemistichs in a line rhyme. According to some prosodists it is the rule to allow the two first hemistichs of a poem to rhyme; 2. as an annex to the rawi, the waṣil or sīlā, i.e. a letter of prolongation or a hā' (voweled or not) coming after the voweled rawi; of the letters of prolongation, alīf is the only one usually written in this capacity; 3. as a possible further complement, the khrūrdī, the letter of prolongation behind a voweled kā' serving as a waṣīl; 4. the weak letter or letter of prolongation immediately before the rawi; wāw and yā' may interchange with each other in one and the same poem; or 5. tā'sīs, an alīf, placed before the rawi and separated from it by a consonant (ddālī) which may be changed at will but must always have the same vowel; 6. the ddālī just mentioned.

The kāfiya may likewise include up to six vowels: 1. madīr or madīra, the vowel of the rawi; 2. naṣīda, the vowel of the hā if it serves as waṣil; 3. tawwālī, the vowel before the quiescent rawi; 4. ḥadīw, the vowel immediately before the rīf; 5. ḥaḏīw, the vowel of the ddālī; 6. raʾs, the vowel immediately before the alīf of the tāʾsīs (always a of course).

In respect of lengths, five kinds of rhyme are distinguished, viz. — 1. mutakāwāls, in which the two last quiescent consonants (which, as explained above, mark the beginning and end of the kāfiya) are separated by four voweled consonants: fawwā [ka budānīk]; 2. muturādāk, in which three voweled consonants stand between the two quiescent: ṭālā [džabālī]; 3. mutadārīk, in which two voweled consonants separate the two unvoweled: kād [fūal]; 4. mutawālīr, in which there is one voweled consonant between the two quiescent: bālīy; 5. muturādāfī, in which the two quiescent consonants come in immediate succession: kāfī.

Finally we have still to note the faults in the
KAFTĀN

Kāfiya: 1. iḥāw, the substitution of a dhamma for a kasra as madafra; 2. iṣāf or ʾiraṣ, the substitution of a fatha serving as madafra for a kasra or dhamma; 3. ʾeṣā, the use of similar sounding consonants as rauw (miin and niin, ḫā and ḫā, ḥāf and ṭām, etc.); 4. iyūsā which consists in using consonants of essentially different sound as rauw (kāf and ṭā, kāf and ḫā, etc.); 5. ṭāfr, the changing of the ṣadhb (the last foot in the second hemistich) in one and the same poem; 6. ʾeṣā, the repetition of one and the same word in the same meaning as a rhyme-word in the same poem; 7. ʾanfā, a mistake which occurs before the rauw, namely a) ʾinsāf ʾal-ḥādkh, changing of the vowel, which precedes the rīsd; b) ʾinsāf ʾal-ʾetba, changing of the vowel between rauw and al-ʾetba; c) ʾinsāf ʾal-ṭamāzh, changing of the vowel immediately before the quiescent rauw; d) ʾinsāf ʾal-rīsd, the use of rīsd in one line but not in the other lines; e) ʾinsāf ʾal-ʾetba, the use of ʾetba in one line but not in the others; 8. ṭadīna or the running of one line into another, in such a way that the end of one line only gives complete sense when we know the beginning of the next verse.

In conclusion it should be noted that it was considered the rule in reciting a poem to lengthen the vowel of the vowelled rauw; but this custom was not generally observed. The Banū Tānim added a quiescent niin to the madafra in place of the wad. Among the Banū Ṭāṣd the madafra was suppressed. Otherwise it was permitted, when a strong quiescent consonant preceded the rauw, to transfer to it the vowel of the rauw which itself then became quiescent: faʾlā > faʾal. Finally, it often happened that, if the rauw was quiescent, it was given a kasra which was followed by a quiescent niin: faʾal > faʾalān.

(NEW: BEN CHENE"

KAFTĪZ, an Arab measure of capacity (dry measure) containing from 25—50 litres (5—10 gallons). In the pre-Islamic period the use of measures of capacity with dry and liquid wares was in general use, as is shown by the usually Arabic names for these measures in contrast to the measures of weight and their names borrowed from the Greeks and Romans. It has still long been the custom to measure these wares by their weight and not by their volume. East and west in this respect have undergone opposite developments. This transition from measures to weights was furthered, on the one hand, by the easier supervision of market business done by weight and, on the other, by the experience early obtained that it is not a matter of indifference whether very large or very small measures are used to measure dry wares. As the weight of the upper layers appreciably compresses the lower, the result is that, other things being equal, larger quantities weigh more per unit of capacity than small quantities. The tables of measures of capacity commonly used in the early period is given below. The remarks show that it is not homogeneous. The greatest variations prevail in the theoretical lists of measures; the figures quoted below which presupposing distilled water at normal temperature etc. — mean so many kilogrammes in weight, are based on an original measure of one mudhd of the year 571 (1175/6) in the Cairo Museum, which, according to its inscription, held 337 dirham kāf of pure water. The measures usual in the early centuries of the Hijra seem however to have been smaller ranging down to the half of the figures here given.

Measures of capacity or dry measure:

<table>
<thead>
<tr>
<th>Measure</th>
<th>Capacity</th>
</tr>
</thead>
<tbody>
<tr>
<td>mudhd</td>
<td>1.15 litres</td>
</tr>
<tr>
<td>ʾaṣ</td>
<td>1.6</td>

</thead>
<tbody>
<tr>
<td>warb</td>
<td>275.0 kg</td>
</tr>
<tr>
<td>kurr</td>
<td>1650.0 kg</td>
</tr>
</tbody>
</table>

That these measures of capacity are not entirely forgotten is probably due to the fact that they have been retained in the legal literature. They have disappeared from the market-place, at least in the East. In the lands round the Western Mediterranean the ṣafī has however survived down to the present day, e. g. in Tunisia, in Sicily (cafsa and cafnsa, a measure of weight for oil, 11—20 kg.) and in Spain (cafl, plur. cafhs, a measure for grain of about 6.6 hectolitre) etc.

the direction of the ֿניִּדְּיָא ֵבִּגְּי, an official whose duty it was to take charge of and keep in condition the fur-robes of honour. At the present day this garment seems to be very little worn. Hamambe and Marie de Luannay, Les Costumes populaires de la Turquie en 1873 (Constantinople 1873) only mention it (p. 238) when describing a Kurdish woman from Kharpur: A kaftan of fine dark green cloth, open in front and widely cut out in the form of an excuschten on the breast, leaves the upper part of the shirt quite exposed and does not entirely cover the lower half. ... The very long sleevs of the kaftan ending in a quadrangular piece are taken in above the wrists so as not to conceal the silver armlets. The sleeves are edged with galon and notched gold lace.

KAFUR (also KAFÜR and KAFFUR, cf. Lübn al-Årub, s. Kûf and Kfr; s. Kfar in Arabic in Pnakrit-Kâphûra, -kâphû, Malay kapur), camphor, the resin of Laurus camphora and Dryobalanops aromatica, was an object of commerce with India from the days of the ancient Persians; on the capture of al-Madiin, the Arabs found rich stores of this drug, the use of which they did not know; they took it for salt (al-Balâqîhâri, ed. de Goeje, p. 264); Ibn al-Åthîr, ed. Tornberg, ii. 401) Ibn al-Ba’tîr mentions different sorts of camphor, of which fânsûr and riwaytû were considered the best; all these kinds were purified before being used. Marco Polo (ed. Soc. de Géogr. Paris 1865, i. 447; transl. Yule, revised by H. Cordier, London, 1903, ii. 299 and note 3, p. 302—4) says the camphor of Farsûr was the best and most expensive; it was said to be weighed against gold. Fânsûr — most probably an old name for Barûs (cf. Týdshér, van het Kon. Nederl. Aardrijkskundig Genootschap, Series 2, xvi., 1904, p. 18—22, 27—29; Encyl. van Nederl. Indië, i. 172 sqq.) on the west coast of Sumatra (Residency of Tapanulu) from which the kafur Barûs came — is frequently mentioned by Arab writers; from the first half of the third (ninth) century we find the name in different historicographical reports as the place of origin of an exceptional quality of camphor.

The name of this resin is also found in the Kurâ (Ixxvi. 5): "The righteous shall drink there (in Paradise) out of a goblet, the contents of which are mixed with kafur"; according to the Muslim commentators, either to indicate the pleasant flavour of the beverage or perhaps as the name of a spring in Paradise (al-Tâbarî, Tâfsîr, Cairo 1321, xxix. 111 sqq.). The latter explanation is based on the fact that at the beginning of verse 6 the word wain (spring) is found.

KAFFUR, ANU ‘L-MISK AL-IKSHIDID, also AL-LÂBIH OR AL-ÅSTÂH, called al-Lâbi in a poem by al-Mutanabbî after a place in Nubia, ruler of Egypt and Syria in the fourth century of the Hijrî. Kaffur was born in Nubia or Abyssinia between the years 291 (904) and 308 (920) (so greatly do the statements of the chronicles vary). The fact that he led a slave life as he became the chief slave and rose to be ruler of Egypt and Syria and the celebrated patron of scholars and friend of al-Mutanabbî [q. v.], the greatest poet of his time, has aroused a great interest among the Arab historians and given him a greater fame than his importance really deserves. As the Macenas of poets and scholars, he found kindly biographers who have praised him as a model of fidelity for his devotion — not always maintained — to the Ikshîdîd [q. v.]. His biography is adorned with numerous anecdotes about his humble origin and his rise and about his friendship with al-Mutanabbî. He is only of importance today because he resisted the advance of the Fatimids [q. v.] in the west and of the Arab dynasties in North Syria and maintained by his ability for two decades the kingdom founded by the Ikshîdîds in 323 (935). After his death it soon broke up. As a young slave he is said to have expressed the ambitious wish to become one day ruler of Egypt, to a companion who had said his ideal was to become cook in a cookshop so that he might always eat his fill. As a slave he had the good fortune to be sold to the governor Muhammad al-Ikshîhî (323—334 = 935—946); that he was almost immediately given away by him on account of a skin disease and again taken back, may well be an embellishment, to contrast his degradation with his all the more marvellous rise. Another narrator says that he was sent with money by his former master to the governor al-Ikshîhî but the latter sent the money back and retained Kâfûr in his service instead. It is also related that he was the only one to remain by his master when his comrades had negligently left the governor’s room to see a passing elephant. Both these stories only show that the governor had on some occasion had his attention specially attracted to him. He must certainly have early recognised his merit and put trust in him, for he made this ugly, despised slave the tutor of his children and a general. In the latter capacity he distinguished himself in 329 (940) in a battle near Aleppo which he captured for his master. When al-Ikshîhî felt his end was near at the close of 334 (July 946), he appointed him guardian of his younger son Awnuddur (the name is very diversely written) whom the Caliph had previously appointed joint-ruler with his father. The real power remained in Kāfûr’s hands even after Awnuddur became of age, although he provided for the preservation of the Ikshîhîd dynasty by getting Awnuddur’s brother ‘Ali recognised as joint-ruler and successor in 338 (949). Later in 343 (854) Awnuddur, at the instigation of his friends, tried to shake the tutelage of Kaffur, as he felt himself restricted in his freedom of action and expenditure — he only received 400,000 dinârs out of Kâfûr’s rich revenues. He therefore
KAFÜR — KAHIN.

went to Ramla in Palestine in order to be able from there to exert real authority over Syria and then on Egypt. But the plan did not come to fulfillment, as his mother and Kafür, warned in time, were able to apprise him. The relationship remained unchallenged till Awnûjur died in Dhu 'l-Ka'da 349 (Dec. 966). After the death of Awnûjur, Kafür had his brother 'Ali confirmed in office as governor by the Caliph towards the end of the year. Kafür remained his guardian, although 'Ali was 24, and only allowed him an income of 400,000 dinârs. The power of Egypt was again extended over Syria, so that 'Ali was mentioned next to the Caliph in the Princely and northwards as far as Tarus. When 'Ali died six years later in 355 (966), Kafür himself assumed the government and was confirmed in office by the Caliph, as 'Ali's son Ahmad was only 9 years old. He did not enjoy his independence long, for he died in 357 (968). His successor was the Ahmad whom he had superseded.

Kafür was able to maintain order in Syria and Egypt. Shortly after the death of al-Qaṣîd, he recaptured from Saif al-Dawla, ruler of Aleppo, Damascus which the latter had taken. Kafür was able skillfully to maintain his position between the Biyâgh and the Caliph and the Fâjiimilzim of North Africa. His riches were celebrated; his estate consisted of art-treasures of all kinds rather than of gold. He was a man who loved pomp; like Saif al-Dawla, exceedingly liberal to scholars and poets, so that his court was a popular one and his favourite was a poet. When al-Munâbîb came estranged from Saif al-Dawla, he came on Kafür's invitation to Cairo, where he lived for some years. In the first period of his stay there he composed famous panegyric on Kafür; but the intimacy did not last long, as Kafür did not give him a position in the administration which he is alleged to have promised him. He excused himself by saying that he could not trust an office to a man who had posed as a prophet. Kafür also devoted much time to scholarly studies and is said to have written poetry. Many scholars were in his service, of whom the best known is al-Kindi who composed a history of Egypt for him.

(M. Sökerhurm.)

KâGHAD, KâGHID (from the Persian käghød, perhaps of Chinese origin), paper. In the early period of development of Muslim culture the east was only acquainted with papyrus (ẓirâq) as writing-material. It was Chinese prisoners of war brought to Samarkand after the battle of Ayâksh near Tâlás, that first introduced in 134 (751) the industry of paper-making from linen, flax or hemp rags after the method used in China. The various kinds of paper then made are the following: ṣirâzînî (Pharaoh's paper), a kind which was destined to compete with papyrus even in the land of its origin (the oldest paper with Arabic writing on it found in Egypt dates from 180–200 = 796–815); sulamînî, from Sulamân b. Kâghid, the treasurer of Khurâsân under Hârân al-Kâghid; ẓâfîrâî, called after Ẓâfîr al-Barmaki; ẓâfîrî, from Ẓâfîr b. Ẓâfîr al-Muṭahhîb, the second ruler of the Ẓâfîrî dynasty; ẓâfîrîrî, from Ẓâfîr al-Muṭahhîb, the same dynasty; ẓâfîrîrî, in allusion to the Samânîs Nâšî I.

Paper mills were erected elsewhere on the plan of those in Samarkand: al-ʿAṣrî, brother of Ẓâfîr al-Barmaki, who had been governor of Khâhâristân in 178 (794) probably founded the paper-work in the Dâr al-Kazz quarter in Baghdaûd. Soon after- wards others arose in Tiḥâma, Yemen and Egypt, where paper ultimately drove out papyrus, also in Damascus, Tripoli, Hâmâ, Mâniţîd, Tiberias, the Maghrib, Spain (at Nâtîva), Persia and India. Kâghâd-khânân, the "paper-makers", was the name taken by the people of the village of Khânâdji or Khânâdji in Adharbâyjân, two days' journey from Zâdân, on account of the excellent paper made there. The place was destroyed by the Mongols, who however founded a colony, Mughûliya, there. (Barbier de Meynard, Dict. de la Perse, p. 219; Ḥâdîjî Kâhîî, Lykâhâmmê, Constantinople 1145, p. 298; trans. by Norborg, i. 363.) On the preparation of paper and the different methods of colouring it, interesting details are given by J. v. Karabacek, Neue Quellen z. Papiergeschichte in Mitt. aus der Samml. der Papyr. Erbh. Kaiser, iv. 1975 sqq.

According to a statement of al-Maḫrîṣî (al-Khitî, ed. Wiet, ii. 34), Ẓâfîr al-Barmaki had parchment replaced by paper in the government offices.

The paper used in the east is now almost entirely of European manufacture. In Persia we still find a Chinese paper, called Ẓâhân Bâlîq (Turkish name of Pekin), a scarce paper, sought after for its durability. The Cairo printers prefer a strong yellow-coloured paper called ẓâhâtî (Pers. nâbâî, sugar-candy). A paper-mill long ago destroyed (Kâghâd-khâhâ, popularly Kâî ál-Hâne) has given its name to the Imperial Kiaoak and the public promenade of the "Sweet Waters of Europe" in Constantinople.

KAHF, Title of Sûra xviii. of the Kurûn. — See also ASHÂN AL-KAHF.

AL-KAHNî, one of the names Allah, cf. Allâh, i. 303.

KâHIN (A., plur. kâhin or kâhân; fem. kâhîn, plur. kâḥînîn, abstract of profession kâhâna) is the name of the sâr or soothe sayer (vâres, vates) among the pagan Arabs. It corresponds to the Hebrew kâhen, Aramaic, kahen, kâhnû (priest); it is not an arabised form of this however, but belongs to the original stock of the old Arabic
KÄHN.

language (otherwise Nolddeke, Neue Beiträge zur semitischen Sprachwissenschaft, p. 36, note 6), for the Jewish kähn, kähn is entirely different in character from the Arab kähn: the former, although in all probability at one time also a soothsayer, later appears only as a spirit of miracles and particularly as sacrificer and teacher of the Tora, while it cannot be shown that the latter, who is never a priest (which is contradictory to von Kremer — see below in the Bibliography — p. 74 sqq., and also to Wellhausen, p. 134 and elsewhere), ever held these functions, neither was he permanently connected at all with worship and places of worship, but seems to have been quite unrestricted in the exercise of his activities.

The kähns of course have their origin in the shamanism, medicine-men, and fetish-priests, but in the form in which we first meet them in the old Arabic tales, in the Ḫādith and, much more rarely, in the pre-Islamic poetry, they have already passed beyond the ruder forms of shamanism. Their magic knowledge is based on ecstatic inspiration. They have also, it is true, visions by night which reveal to them future and other events and things hidden from the ordinary mortal (al-Maṣūdī, iii. 379, 394 sq.; Sprenger, i. 176 sqq. etc.), but they are not really visionary. Their inspiration is of demoniacal origin: a ḍijinn or šaiṭān “demon” (ṣāwīwaḥ) who is called their rāḥʿ “comrade,” ʿaḥī ḥāmromaḥ, ānadī or wālī, “friend” (“familiar spirit”), not infrequently also their rāʾ or rāʿ (probably “seer”), speaks out of them. This personification of their ecstasy, which at once stamps them as connected with the old-fashioned kāhan (though literally “knower,” er), also endowed by djinn with supernatural, magic knowledge (cf. vētē = poetēs), is conceived as being so substantial that the daumion proxson regularly appears as the ʿ אל his alter ego, the kähn, on the other hand, appears as the “thou” of the prophetic utterance, that the latter clearly notices the approach of the spirit, feels himself struck by his foot, hears his voice from a distance etc. (Sprenger, loc. cit.; Holscher, p. 85), indeed, these familiars even have their own names (like the familiar spirits of the poets, see Ǧīqūṭ, Māḏḏūm, ed. Wüstenfeld, in. 914, 94 sq. and al-Diḏiḥ, vi. 69; vol. viii. 65). The kähns give their utterances in the form of the ʿāṣif, short sentences in rhythmical prose, with single or more rarely alternating rhyme, such as had been usual in Arabia from early times for all utterance in the higher and lower branches of divination and magic, etc. (Only very rarely is regular verse also used, e. g. Ǧāḥāni, i. 161, 13). Besides the ʿāṣif, the samsana is characteristic of the kähns’ utterances, the mysterious “humming” with which it was delivered (Ibn Ḥishām, Sīrā, i. 171, 7 and thereon i. 58). The word ʿāṣif may in this sense have originally meant nothing more than the “purring” or “chirping” or such like of an alleged demon’s voice; the verb ʿāṣif is also used in other connections of “purring” or “chirping” of the djinn, regularly of course, of the “cooing” of pigeons and also of the “groaning” of camels; cf. in the O. T. e. g. Ḫāṣāh, xxix. 4). The kähns, the majority of whom are to be considered frauds, of course often express themselves in very obscure and ambiguous language. They give greater emphasis to their utterance by striking oaths, swearing by the earth and sky, sun, moon and stars, light and darkness, evening and morning, plants and animals of all kinds etc. (For kähns’ utterances, see e. g. Holscher, p. 87 sqq., 95 sqq.; al-Maṣūdī, iii. 387 sqq.; al-Īṣbīḥī, Ch. 60; Ǧāḥāni, vi. 161, 12 sqq.).

Kähns play an extremely important part in public as well as private life. They are interrogated in all important tribal and state occasions, especially before warlike enterprises, razzias, etc., in which they take part themselves as a rule, indeed, they sometimes lead them in person (cf. Deborah in the O. T.). Kings and queens therefore keep their prophet or prophetess (D. H. Muller, Die Bienen und Schläger Sudarobias nach dem Ḫālī des Ḫādith, i. 74, and al-Ṭabari, ed. de Goeje, i. 762, 5), and the tribes have a kähn or kähna as well as a ʿḥār “poet” and ʿḥāṭṭ “orator.” In private the kähns especially act as judges in disputes and points of law of all kinds, so that the conception of kähin is closely connected with that of ḥākam “judge” (al-Ḥatība, N. xvii. 7; al-Īṣbīḥī, Cairo 1321, ii. 73, 1). Their decision is considered as a kind of divine judgment against which there is no appeal. At the same time they interpret dreams, find lost camels, establish adulteries, clear up other crimes and misdemeanours, particularly thefts and murders, etc. In these proceedings they descend to a somewhat lower scale of divination, viz. to that of the arraif or muʿarrīf (see above i. 460 and cf. Ibn al-Āthīr, al-Nihayā, iv. 40, al-Diḏiḥ, vi. 62, 5, infrā, and al-Maṣūdī, iii. 352). For such work they received an honorarium — forbidden in the Ḫādith (ṣūwaṭ; al-Diḏiḥ, ed. Krehl-Juynboll, ii. 43, 55 et passim). Of course, people liked to test their magic abilities before paying them.

The influence of these men and women was naturally great and often stretched far beyond the bounds of their tribes. They were not by any means recruited solely from the lower strata of society, but sometimes belonged to most distinguished families, occasionally even the ʿayyid or chief of a tribe was also its kähin (Lammens, p. 204, 257: al-Diḏiḥ, vi. 62 = van Vloten, viii. 184; also Wellhausen, p. 134 who, however, says wrongly that such aristocratic kähns had inured their office). They were in any case among the leaders or the intellectual aristocracy of their tribe (cf. the chapter Araqū al-kahāḥ fī l-ḥukūm wa l-ḥukmaṯā wa l-ʿilmām min Khaṭṭān “The names of the seers, judges, orators and learned men of Khaṭṭān” in al-Diḏiḥ, al-Bayān, i. 136, infrā, cf. also 113, 15 sqq., ed. Cairo 1333, i. 192, cf. 159).

Among famous soothsayers of both sexes were Satḥ al-Diḏiḥ in Syria and Šīḵ b. Šab of the Badiṭa, (who often appear together but are both quite mythical), the probably equally unhistorical Yemen princess Ṭurafia, a kind of Cassandra, al-Maʿmūr al-Ḥāʾirī of the Millaḥī, Aḥm d B. Djiṣād al-Alkāf, the chief of the Rāba, Sawadāʾ b. Zuḥra among the Kuraish, Zarḵā bint Zuḥar among the Kudā, etc. (Wellhausen, p. 136; al-Maṣūdī, iii. 352, 364 et passim; van Vloten, vii. 172, 174, 180 etc., etc.). The South Arabian soothsayers enjoyed a particularly high reputation (Aḏānī, viii. 51, 4).

Practically synonymous with kähin is the word Ḫazi (plur. Ḫawāṣit, also Ḫaṣṣa and Ḫaṣṣ, fem. Ḫaṣṣiya, plur. Ḫawāṣit), which is not uncommonly found. It corresponds of course to the Hebrew Ḫōzā, but is undoubtedly also a genuine Arabic word. On the other hand, we must sharply distinguish from the
kähin, who, as above explained, owes his supernatural knowledge to internal inspiration, these practitioners of the lower forms of divination and magic, who employ external, technical means that is, who follow a mere routine that may be acquired by any one, namely the 'ārif or sādīr who watches the flight of birds, the ḥāziq, ḥāziqr and ḥazāz, who reads footprints, the 'arrāṣ or mu'arrāṣ (see also above on these terms), the water-diviner, the ʾammāafūq, the astrologer, al-nāṣirī fi ʾarrāṣ al-kāf or hand-reader, the ḥāfiq who tells fortunes from lines on the ground, al-dārāb or al-dārābi bī-ḥāfiq, who works by casting stones, the enchanter, sāḥār or ṣāḥār. These too are sometimes called kāhin, but only by an erroneous use of the word, which probably only came into vogue when Islam had put an end to the higher art of the soothsayer, kāhīna, while external divination and magic survived. I should like here, again to insist (against Wellhausen, p. 134 and elsewhere) that the kāhin was not, like the Jewish kohein, also supplier of oracles. It is especially noteworthy that we never find him in connection with divination by arrows (lojhān).

The prophet Muhammad disclaimed being a kāhin (Ṣūra lii. 29, lxxiv. 42; also passages like lxxvi. 22 sgq.). But his earliest appearance as a prophet reminds us strongly of the manner of these soothsayers. He was an ecstatic and had "true dreams" like them; his dhāmiyān (gādāb) was the (holy) spirit, whose place was later taken by the angel Gabriel. His revelations are, like the utterance of the kāhin, comprised in safa' and sometimes begin with the usual astrusre oath, even in the forms which he was still using for administering justice and settling disputes in Medina during the early years of his stay there correspond in their main features to those of the pagan kāhin and ḥamāk.

It is therefore not surprising that his Meccan countrymen regarded him as a kāhin and that his protestations that he was nothing of the kind, but a "prophet", a "messenger of God" made little impression on them. The anti-prophets also, Musailim, Talaibā, and particularly al-Aswad ad-Ansī, no less than Sadāqā, a lady member of the faculty, played their parts in the guise of kāhins. The life of Islam with its monotheism, its doctrine of the cessation of all revelation with Muhammad and its regulation of all social customs through the fīh wiped out the old soothsayer's, only gradually, it is true, for we still hear in 132 A. H. of a kāhin (al-Ṭabarī, iii. 21, 91) on banana in modern Arabia, see Landberg, La langue arabe et ses dialectes, p. 701; on women seers in Muslim N. W. Africa, see Doutté, p. 32 sgq.). Muhammad himself probably never doubted the supernatural nature of the kāhin's utterance. But when he declared the knowledge possessed by the demons, whom he at the same time degraded to devils, to have been stolen from heaven and to be falsified and confused (Ṣūra lixxiv. 8 sgq., xxxiv. 15, vi. 112; Ibn Ḥīfẓām, Šūr, i. 131 sgq.), he brought their prophecies into great disrepute, and thus those traditions arose, which warned believers against utilizing the services of a kāhin (al-Suṣū, al-Djami al-qādirī, sub man arā kāhīn; al-Bukhārī, ii. 43, 55, et passim; cf. also the remark of Ibn 'Abbas ʿālīkum zmr ʿālīkum etc. in al-Zamakhsharī, Kākhol, on Šūr xxxi. 34).

AL-KĀHĪNA, the prophetess, the seer. Even her name (Dama, Dīhyā) — for Kāhīna is simply an epithet — is doubtful. According to Ibn Khaldūn, she belonged to the Djarra, a Jewish (?) tribe in the region of Awrās [q. v.], which gave chiefs to the Berbers descending from al-Abtar. When Ḥassān b. al-Nūmān [q. v.], had conquered the Byzantines, he advanced against the Awrās where the Kāhīna reigned. The latter inflicted a heavy defeat on him at Miskiyīnā (between 'Ain Bāṣdī and Tezba in the modern department of Constantine) or according to other authorities, in the Gabies territory or at the Oasis of Nini, and drove him back beyond the frontier of Ifrīqiya. The difficulties in which his wars in the east had involved the caliph 'Abd al-Malik, delayed the despatch of reinforcements. During this period the Kāhīna is said to have extended her rule over the whole country, and to have prevented the Arabs from making new inroads. She destroyed the towns, cut down the forests and laid the country waste. At the same time she is said to have adopted as a son a prisoner named Khālid b. Yazīd al-Kaṣīf with whom she claimed foster-kinship, which, however, did not prevent her adopting son from afterwards betraying her. Her devastations estranged the people from her and when five years later Ḥassān b. al-Nūmān returned with reinforcements, the Kāhīna was defeated in a fierce battle at Tabarka (82 or 84 = 707 or 703) and killed in the Awrās at the place called Bar al-Kāhīna. By her advice one of her sons had gone over to the Arabs before the battle and even received commands in the Muslim army, which continued the war against the Berbers. In reality we do not even know for certain whether the Kāhīna was a queen or simply an inspired woman like Lalla Fūtima, who was the soul of the resistance of the Kabyls against the French in 1857. Almost all that is told of her is legendary, the voluntary devastation of North Africa, her defence in the castle of al-Djem (the amphitheatre of Thysdrus) and the circumstances of her death. A
Berber genealogist, Hānī b. Bakūr, even says that she ruled for 65 years and was 137 years old.

Al-Ḳāhir b. ‘Ijārī, Abu Mansūr Muḥammad b. al-Muṭṭadīd, ʿAbbāsīd Caliph. While his brother al-Muṭṭadīd was still reigning he was proclaimed Caliph under the name al-Ḳāhir, but was deposed again in a few days. After the death of al-Muṭṭadīd the Aḥmīr al-Ummārī Muḥnis proposed al-Muṭṭadīd’s son Abū Aḥmad, afterwards the Caliph al-Rādī as successor; instead of him, however, al-Ḳāhir at the age of 35 was proclaimed Commander of the Faithful (end of Shawwāl 320 = Nov. 1, 932). Although he wished to be regarded as devout and just, his treacherous and despotic nature was soon revealed. Through torture the mother of al-Ḳāhir was forced to give up her whole fortune, and al-Ḳāhir also extorted considerable sums from the sons and officials of the late Caliph. On the advice of the vizier Ibn Muqūla [q. v.] Muḥnis had the Caliph carefully watched, which naturally did not please the latter, and when he was intending to dismiss Ibn Muqūla, the latter conspired with several others to overthrow al-Ḳāhir and put Abū Aḥmad, son of al-Muṭṭadīd, in his place. But the plot was betrayed. While Ibn Muqūla escaped by flight, Muḥnis was dismissed and when he went to the Caliph, the latter had him arrested and some time afterwards executed. Abū Aḥmad was built into a wall, alive. Ibn Muqūla, however, did not cease in his efforts to incite the populace against al-Ḳāhir and in Djumāda i. 322 (April 934) an armed crowd broke into the palace. The half-palace Caliph had to surrender; but when he refused to abdicate, he was blinded and thrown into prison. Eleven years later al-Mustakfi restored him to liberty and he lived as a beggar till his death in Djumāda i. 339 (Oct. 950).

Al-Ḳāhirah. [See Cairo.]

Ḳahrāmān-Nāma (or Dāštīn-ī Kahrāmān), a Persian epic in prose, which, like the Dāštīn Nāma, Kirānī Ḥabāṣāt, Ḥūṣang Nāma, Pāghārī Nāma, Tāhmīrārāt Nāma etc. belongs as regards subject matter to the prose epics which form a cycle round Firdawsi’s Shāh Nāma; like the two first named it is ascribed to Aḥū Ṭāhir ʿIrāşıkī [Ṭarsūsī, q. v.].

The epic which takes us back 35 years of the Old Iranian ruler Ḥūṣhang and describes the exploits of the hero Kahrāmān called Kištil, the “alayer,” has attained some importance in the popular literature of the Turks. Among them the very diffuse Persian version occupying eight books is compressed into one volume. The historical background is an effectively developed picture of the struggle between ʿĪsām and the Indian fire-worshippers. The legendary and fictitious however occupies a considerable space. In parts the Turkish version with its mixture of prose and poetry shows the favourite technique of the popular chivalrous romances and ballads. In it we also find many burlesque elements, which remind us very much of the meddāl tales and their humorous situations. In many passages the secondary figure of the cunning, sly and covetous paladin, Gerden-Keğhan entirely overshadows the main hero Kahrāmān. His foolish pugnacity is proverbial; cf. Bākī’s Diwān (lith. Constantinopel 1256), p. 37 (baṣīda 1).

The substance of the epic is briefly as follows. Kahrāmān, son of the Persian king Tāhmāsp, is carried off when three years old by a dīw and educated as one of their own children by other dīwans on the mountain Kaf [q. v.]. His cousin and next successor to the throne, Kahrāmān voluntaerily renounces his claim to the throne of Irān after Tāhmāsp had died prematurely from grief at the loss of his only son, and becomes a paladin in the service of Ḥūṣhang, who is chosen Shāh. Through the whole epic runs the idea, freely proclaimed, that heroism is better than a kingdom, for the king’s throne is supported by the sword of the hero.

When Ḥūṣhang sets out to conquer India, he meets Kahrāmān, who has now grown up into a hero of terrible valour, has escaped from the dīw and, well armed, is going around as a free lance on the search for home and adventure. In his arrogance and boldness he becomes involved in a series of severe duels with Ḥūṣhang’s heroes, in all of which he is victorious, until finally his identity is established by Kahrārān. He thereupon readily pays homage to Ḥūṣhang and goes to India with him as one of his paladins. There they succeed, after much fighting and many vicissitudes, in taking the capital by a cunning coup, in which the king of the Indias is killed. Kahrāmān to whom the principal exploits fall, mounted on a six-footed, four-eyed, unicorn sea-monster that he has tamed, wins by his heroism as a bride the daughter of the Indian ruler, who has taken part in the fighting, unconquered and
invincible (Amazon episodes are found also elsewhere in the epic). But Kaḥramān has to set out soon again to save the mother of Bahram, another of Hūšang's heroes, from the power of a div in the inaccessible crystal mountain. He succeeds in gaining the talisman of king Kāšān, in liberating his bride, who in the meanwhile had been carried off, and in freeing Bahram's mother. Returning to Persia, he marries the Indian princess and remains in the service of Hūšang's successor, Šah Bahramārān.

Kahrūba or Kahrābā is our amber; the Persian word means attractor or robber of straw. Usually, as in al-Kazwīnī, its peculiar quality is attributed to it without further note; Ibn al-Kabīrī, however, observes that it attracts straw quickly and strongly, when it is slightly rubbed. This attraction is used poetically as a metaphor for the attraction of lovers to each other.

Amber was brought partly from the Baltic lands of Bulghār in the region of Kasan and was considered to be the resin of the Greek nut, and partly from Spain. Al-Ghāṣqī, who mentions both kinds, notes that it encloses flies, straw, etc. Ornaments of amber from the earlier period have not survived in the east; al-Washshābī, however, mentions specimens of yellow amber worn as ornaments by women, and the alchimist al-Dījlākī signs engraved in amber as talismans. In modern times beads of rosaries and cigar-holders are made of it. It has always been in frequent use as a medicine. Just as the word electricity from *elektron* so the Orientals do kahrūba īya from kahrābā. Amber is frequently confused with sanda-rūs, which, according to al-Anfākī, attracts rubbed straw. On the other hand, we find the difference between them emphasized.

(E. WIEDEMANN.)

KAṬṬĀBA b. Shahīd al-Tāʾī, an Arab general. We find Kaṭṭāba, whose real name was Ziyād, mentioned as early as the year 1007 (1798) among the twelve chiefs of the 'Abbāsid faction in Khorasan, who are said to have been chosen by the Kūfān emissary Abū `Irīmā al-Surājī to further the 'Abbāsid cause. When the long prepared revolution broke out in the summer of 129 (747), Kaṭṭāba was in Mecca to which he had gone in order during the pilgrimage to meet in person the leader of the 'Abbāsid, Ibrāhīm b. Mūhammad [q. v.]. He did not return to Khorāsān till 130 (748) after Ibrāhīm had appointed him his general. Abū Muslim [q. v.] gave him the supreme command in the war against the Umayyads and he defeated Tamīm b. Naṣr, son of the Umayyad governor of Khorāsān, Naṣr b. Sayyar, at Tūs. Tamīm fell in the battle and Naṣr had to evacuate Nishābūr and flee to Djiḏārān. When the governor of the 'Irāk, Yazīd b. Muḥammad b. Ḫawāṣib, sent an army under the command of Shāh Ḫanža al-Kūšānī to Djiḏārān, Kaṭṭāba took the field against him; on Dhu l-Ḥijādja 1, 130 (Aug. 1, 748) Nubata was defeated and slain, and Naṣr again took to flight with the object of making his way to Hamdānī, but died on the way in Rabīʿ i, 131 (Nov. 748). Kaṭṭāba then turned his attention to the west. While his son Ḥasan was besieging Nīwānd, where the remnants of Naṣr's army from Khorāsān had united with the governor of Hamāthīn's Syrian troops who had fled from there, Kaṭṭāba gave battle on Rabīʿ 23, 131 (March 18, 749) at Djiḏārān near Iṣfahān to `Amir b. Dūbār b. al-Mūrū who was coming with a large Syrian army. The latter fell in the conflict. After Kaṭṭāba had joined his son, the siege of Nīwānd was continued with vigour, and after several months the Syrian garrison capitulated, while their comrades from Khorāsān, who did not know of the capitulation, were all cut to pieces. Thereupon Kaṭṭāba marched against Kūfā via Ḥulwān and Kāshānī, sending his son in advance by the direct route. Ibn Ḫubairā advanced to meet him with a strong army, but Kaṭṭāba succeeded in evading him and in passing the Tigris unscathed, and then camped near Anbār. When Ibn Ḫubairā followed him and pitched his camp at Fām Fūrat Bādakā on the east bank of the Euphrates, Kaṭṭāba crossed the river and marched along the west bank to a place opposite the enemy camp. In the night of Muḥarram 8, 132 (Aug. 27, 749) he crossed the river again with a small body of men and put Ibn Ḫubairā, who had to seek safety in flight. In the confusion of the fighting, Kaṭṭāba disappeared completely; whether he was drowned or killed in the flight must be left undecided.

(K. V. ZETTERSTEEN.)

KAṬṬĀN is regarded by the Arabs of the Muhammadan epoch as the "father of (all) Yemen" (Ibn Ḥiṣām, Sīra, i. 43; al-Masʿūdī, Marājī dīn al-Dīrāb, Paris 1861—77, i. 797; Die auf Südarabien bezüglichen Angaben Nūrānīs im Sams al-Ṭūbīr, ed. by Aḥmadīn Ahmad, p. 83 et passim) i.e. as the ancestor of all South Arabsians, who therefore are usually described comprehensively as "Bānū Kaṭṭān", "Kabīl al-Kaṭṭān" or briefly "Kaṭṭān", when not called simply "Ve-

ments". Kaṭṭān is thus contrasted with "Adnān", the symbol of ethnological unity of all the
North Arabians. In this we find agreement not only among the Arab scholars, genealogists, historians, geographers, etc. (cf. e.g. Wustenfeld, *Gimelag. Tabellen über die K新华ent, and the Riggenbach and Reiske, *Prima historiae regionum arabicorum*, ed. Wustenfeld, p. 132 sqq.) but also in the ideas of the people, as they are still to be found in Arabia (see Doughty, *Travels in Arabia Deserta*, i. 252) and as found at an earlier period notably in the poetry (see Abī Ḥanīfa al-Dīmawari, al-Mālik ibn Dāiriyūs, p. 348; al-Ṭabarānī, ed. de Goeje, i. 1087, also ii. 1672, 185; al-Mas’ūdī, op. cit., ii. 142; do., al-Tanbīh wa l-Ṭibrīg = *Bibl. Geogr. Arab.,* viii. 109, etc.; in the statements, that reflect popular opinions, we indeed find as the counterpart of Kāḥṭān usually not ‘Adhnā but his fictitious son Ma‘ād, e. g. Abī Ḥanīfa al-Dīmawari, op. cit., p. 28; al-Ṭabarānī, op. cit., ii. 1056, 1064; and al-Mas’ūdī, al-Tanbīh, p. 88, or his imaginary grandson Niʿār, e. g. al-Mas’ūdī, *Muraṣī‘*, v. 223, vi. 42 sq., 46, 143, 150, and Ibn al-Ahlīr, al-Kāmil, ed. Tornberg, iv. 273, or even his imaginary greatgrandsons Muṣajjir and Rabī’ī, e. g. al-Ṭabarānī, op. cit., ii. 1969 infra, 1855 sq. Arabic sources usually give Kāḥṭān the following ancestry Arab (not ‘Arab, see e. g. Kā̄mūs, s. v.) Shālakh (or Shālākh) – Ar’afqahshād (or Ar’aqfahshād) – Sām – Nūh; they also give him a brother, Fālīg. (See the line Kāḥṭān b. Fālīg b. ‘Arab b. Shālākh etc. in al-Ṭabarānī, op. cit., ii. 2400, and al-Dimashkī, *Nuzhat al-Dahr*, ed. Meheren, p. 249, 252 is obviously due merely to a slip). These names are of course simply arabicised forms of the Old Testament names Ebr (Eber) – Shalālah (Shelah) – Arpazhāzā (Arphaxad) – Shēm (Shem) – Noah (Noah) and Peleg (Peleg). Kāḥṭān x. and i. Črani is therefore identical with the O. T. Yahūkān (*Imsara*), son of Eber and brother of Peleg and ancestor of various South Arabian peoples (*Gen. x. 25 sqq.*, and i. *Chron. i. 19 sqq.*); Yoḵanān, probably to be taken as meaning the “smaller,” the “younger,” i. e. as compared with his brother Peleg, might be a mere ethnological invention with the object of connecting the Arabs with the Hebrews). The Arab genealogists, etc. are quite positive on their identity; they constantly assert: “Yoḵānān (more rarely Yoḵānān) is Kāḥṭān” (e. g. al-Mas’ūdī, al-Tanbīh, p. 31; do. Muraṣī‘, iii. 143; Ibn al-Ahlīr, op. cit., i. 57, Toḏj ār-‘Arū, sub kha; see also Doughty, op. cit., i. 239; Yoḵānān, it is true, appears occasionally through confusion as the brother or son of Kāḥṭān, so Ibn Kuṭaba, al-Maṣārîf, ed. Wustenfeld, p. 14; al-Mas’ūdī, Muraṣī‘, i. 79 sq.; Toḏj ār-‘Arūs, loc. cit., and al-Ṭabarānī, op. cit., i. 217). Indeed, several Arab scholars even assert — and on this they agree with von Kremmer, *Altarabische Ge- dichte über die Volksang von Jemen*, p. 7 sq. that Kāḥṭān is only an arabicised form of Yoḵānān (al-Maṣūdī, Muraṣī‘, i. 143 and Toḏj ār-‘Arūs, loc. cit.). But Yoḵānān could not possibly become Kāḥṭān by any phonological laws. The equation Yoḵānān = Kāḥṭān has in all probability rather come to be made because some old Arab — probably a Yemeni — genealogist quite arbitrarily, simply from a certain similarity of the names, identified the Biblical Yoḵānān with an actually existing South Arabian tribe Kāḥṭān, so that by this artifice, the Yemenis might be linked up to the Biblical genealogical system, which reaches back to Adam, in the same way as had been done with the North Arabians under the influence of the Kūtān and the Bible by tracing ‘Adhnā back to Ishmael, the son of Abraham (see e. g. Ibn Ḥīṣmān, op. cit., p. 3 sq.; al-Ṭabarānī, op. cit., i. 1113 sq.; etc., etc.). Such a tribe of Kāḥṭān, which would have surely been of a certain degree of importance, cannot actually be proved with certainty to have existed in pre-Muḥammadan Arabia. But it seems to me to be at least not impossible that the Kāṭahān of Ptolemy (Geogr., vii. 205, 207) are explained as “Kāṭahānites” (as Knobel has already done, *Die Volkertafel der Genesis*, p. 185, and more recently Moritz in Paulys’ *Kost-enzykl., der kais Altertums- wiss.,* new edition, s. v. Katanitai) and not as “Kasūnaites” (as von Kremmer, op. cit., p. 8, Sprenger, *Die Alter Geographie der Araber*, p. 207 and Glaser, *Kleine der Geogr. u. Geographie Araberien*, ii. 283, 472). The fact, that of the two or more tribes of Kāḥṭān in question none could have been important enough to be known outside of Arabia, seems to be against the latter interpretation. The town of Kāḥṭān (between Ḩaḍid and Sawrā) mentioned by al-Muṣafadda, *Iṣṭan al-Taqāṣim*, 2nd ed. = *Bibl. Geogr. Arab.*, iii. 87, 94 seems also to point to an old South Arabian tribe of Kāḥṭān (cf. also the Al Kāḥṭān mentioned there p. 104 and described as the “oldest princes of Yemen”). Finally, it is not at all improbable that the beginnings of the modern clan Kāḥṭān (see below) reach back to the pre-Muḥammadan period.

The great tribal confederation of the Kāḥṭān fell — in the Muḥammadan period at least — into two groups, the smaller of the Ḥimyar and the larger of the Kāḥṭān, whom the official genealogy put together as brothers and traced their descent from Kāḥṭān by the following line: Yarūb — Yəḥyājub — Saba’ — Ḥimyar + Kāḥṭān (Wustenfeld, *Tabellen*, i; al-Maṣūdī, al-Tanbīh, p. 80, 6 sq.; other lists, the first of them in connection with *Genesis*, x. 26 sqq., are given in Ibn ‘Abd Rabbīh, *al-Ṭib al-farrad*, Cairo 1305, ii. 57). In the genealogical table in *Genesis*, Saba’ (Sawrā) appears as a son of Yoḵānān. Why the Arab genealogists have inserted Yarūb and Yəḥyājub between Kāḥṭān and Saba’ (and the two are also found, but in the reverse order, in the genealogy of Adhnā, as grandson and great-grandson and great-grandson of Imaal, see Ibn Ḥīṣmān, op. cit., p. 3 and al-Maṣūdī, al-Tanbīh, p. 80), is a question that can hardly be answered with certainty. The Ḥimyar (q. v.), the epigones of the Mineaean, Sabean and Ḥimyarite kingdom, were presumably for the most part settled, while the Kāḥṭān may have for the most part been nomads or half-nomads; cf. the expressions: “the Ḥimyar and the Arabs among the Yemenis”,” the Ḥimyar and the clans (sabīl) of Yemen” and similar expressions in *Landberg, Arabica*, v. 116 sqq. The numerous South Arabian tribes which we find in Muhammad’s time in most different parts of Northern Arabia and even in Syria and the Ḫrisk belong principally to the Kāḥṭān. The Kāḥṭān and the Ma‘ād were apparently separated even in the pre-Muḥammadan period by a racial hatred, perhaps originally mainly based on the opposition between the desert and the sown. This enmity was intensified by the repeated raids of the Yemenis into the lands of the Ishmaelites [above, i. 373] as well as later by the anta-
gonism between the Asār (Medijnites) and the Kurai̇sh, which came to a head after the death of the Prophet, and involved in the history of the first two centuries of Islam in the most baneful fashion. It was perhaps this feud that first linked the Yemeni tribes on the one side and the Ishmaelites on the other into closer ethnological unities. One of its more innocuous results was the muṣa- khara, the struggle for rank and glory, which continually prevailed between the two antipodes (cf. e. g. al-Masûdi, Murūd, vi. 136, ii. 142 etc.).

The Khāṭān, in view of the splendid of the ancient South Arabian kingdom, had the more right at first to feel the more distinguished. But Islam with the mission of Muḥammad and the primacy of the Kurai̇sh brought the Ma‘add a tremendous superiority. The Yemenis endeavored to counterbalance this in the most different ways. First of all they created an entirely romantic South Arabian saga, which pictured their past greatness in the most splendid colours (see below in the Bibliography). They then made Khāṭān son of the Prophet Hūd [q. v.], known from the Kurān, whom they next partly identified with ‘Abār (Nashwān, al-Ka‘īṣa al-Himyarīya, ed. von Kremer, p. 4; Die auf Südarabien bezüglichen Angaben Nussrein’s, p. 83; al-Yakbāni, Ta‘rikh, ed. Houtsou, i. 220; Ibn ‘Abd Rabbii, op. cit., ii. 57; al-Masûdī, al-Tanbih, p. 81; Doughty, op. cit., ii. 57 et seq.).

They then tried to connect themselves with the ‘Ad—genealogy: perhaps by partly making the ancient Quraysh [q. v.], the brothers-in-law of Ismā‘il, to be direct descendants of Khāṭān (Ibn Hisām, op. cit., p. 4; Abu Haniţa al-Dinawari, op. cit, p. 9; Ibn ‘Abd Rabbii, op. cit., ii. 57; al-Masûdī, al-Tanbih, p. 185; Abu ‘I-Fida’, Makhtūтар Ta‘rikh al-Bshār, partly edited by Fleischer as Historia Antisilamica, p. 130, et seq.), but especially by the fact that some of their genealogists gave Khāṭān a genealogy direct from Ismā‘il, who thus became “father of all the Arabs” (Ibn Hisām, op. cit., p. 5; al-Tabari, op. cit., iii. 2490; al-Masûdī, Murūd, iii. 142; do., al-Tanbih, p. 81; al-Dinawari, op. cit., p. 246, 252; al-Sam‘anî, al-Istakhri, f. 443b, 446b). They may be also responsible for the theory that the Ka‘ban̄an together with the ‘Ad [q. v.], Thamūd, ‘Adim, ‘Imlīk (Amalek, see ‘Amlīk), Djdīs [q. v.], etc., the so-called “lost Arabs” (al-Arab al-hādīya) represent the genuine (primary) Arabs (al-Arab al-‘ariba or al-‘arbā‘a) etc., while the Ma‘add on the other hand are “arabised” (secondary) Arabs (al-Arab al-mu‘āra‘iba; cf. on this theory, as well as on the other, according to which only the Ad, Thamūd, etc., are ‘Arab ‘ariba, the Khāṭān on the contrary Arab mu‘āra‘iba and the Ma‘add ‘Arab mu‘āra‘iba, Lane, Lexicon, sub ‘Arab. Knobel, op. cit., p. 179 sq.; al-Tabari, op. cit., i. 215; al-Masûdī, al-Tanbih, p. 188; above also i. 372 sq.) Finally, we may here mention the eschatological hādīyat of South Arabian origin, which prophesies the rule in time to come of a noble, pious Ka‘bani̇an; see Mutahhar b. Tāhir al-Makhdīṣi, al-Bʿad wa ‘l-Ta‘rikh, ed. Huart, ii. 183 sq. and Snouck Hurgronje, Der Mahdi, p. 12 (= Verschiedene Geschichten, i. 156).

The native lexicons (Li‘ān al-‘Arab, Kumāt, and Tā‘īf al-‘Arab, sub hāf. give two nisba’s from the Khāṭān, both “good Arabie”; Khāṭān and the remarkable form Aḥṣā‘i. A tribe Khāṭān (more accurately Geṭān, sing. Geṭān, plur. Geṭānūn) still exists, as was briefly mentioned above. It is exclusively Bedouin and pitched its tents in the desert of Asir and in the eastern borders of the southern Yemen and of the southern Hijāz (roughly between 18° and 23° N. Lat.); but little bodies of them penetrate in the summer far into the Nijdjī, as far as WaṣΨm, and even to the province of Kāsh. It is very numerous, rich in cattle and powerful, and also very proud as the “noblest blood of the South Arabians”. Its nobility seems, however, to find expression primarily in a fanatical savagery and villainous cruelty, unparalleled elsewhere even among the sons of Arabia’s deserts.

A clan, Kāḥān, has also survived down to the present day (see i. 3739).
Landberg, *Etudes*, i. 1057 and al-\lqādā, 1st ed., vi. 110, 72, viii. 79, 16, xx. 180, y3, this word was transferred towards the end of the viiib (xvith) century in the Yemen to the beverage made from the berry of the coffee tree. The assumption of such a transcendence of meaning is, it is true, not accepted by some who consider \lqahwā — at least in the sense of coffee — as a word of African origin and seek to connect it with the alleged home of the coffee tree, Kaffa, although they also assume contamination with \lqahwā in Arabic (see below, Erdmann, *Die Kaffee-Pflanze*, i. 566; Völlers in der Zeitschr. d. Morgenl. Gesellsch. i. 657; Hoheb-Johou; Landberg, op. cit., ii. 1057—66). On the other hand, it should be noted that the holders of this view do not prove that coffee was exported from Kaffa as early as 1400, and do not quote a similar word in the languages of Abyssinia and adjoining lands, while the usual word for coffee there (\bun for tree, berry and beverage; see Armbruster, *Initia Arabica*, ii. Cambridge 1910, p. 58; Coulbeaux and Schreiber, *Dictionnaire de la langue tigré*, Vienna 1915, p. 408; L. Reinsch, *Die Kaffee-Sprache*, etc., ii. in *Sittengeschichte der Kaffa*, Akad. der Wiss. zu Wien, phil.-hist. Cl. 1886, p. 273; see also Landberg, op. cit., ii. 1057 sq.) has passed in the form \bun (in rhyme also \lqahwā) as a name of the tree and berry into Arabic. But as it is probable that the drinking of coffee spread in the Yemen out of \Sūfī circles and a special significance was given to wine in the poetical language of the mystics, a transference of the poetic name for wine to the new beverage would not be at all impossible.

The coffee tree was not indigenous to South Arabia and was probably introduced from the highlands of Abyssinia, where it is found in profusion growing wild, notably in Kaffa. But there is no trace of authority for the assertion (Dolers and *Handbook of Arabia*) that the coffee tree was already introduced into Yemen in the period of the Abyssinian conquest and of the fall of the Himyar kingdom, about a century before the Hijra. In this case the older literature would hardly have left it unnoticed.

The earliest mention of coffee so far found is in writings of the xth (xvith) century. According to (Ahmad) Ibn \Abd al-\Ghaffār, quoted by \Abd al-\Kadîr al-\Djazrî in his essay (see below, *Bibliography*), the popularity of \lqahwā as a beverage in the Yemen was first known in Cairo in the beginning of the xst (xvith) century. It was there taken especially in \Sūfī circles, as it produced the ascetic state of wakefulness for the nightly devotional exercises. According to this authority, it had been brought to \Aden by the jurist Muhammad b. Sa\līd al-\Dhāhibānī (died 875 = 1470/1) who had become acquainted with it during an involuntary stay on the African coast and on his return devoted himself to mysticism; and it soon became popular.

Another reference in al-Djazrî, however, ascribes the introduction of the beverage to \Almost b. \Omar al-\Shāhīlī. Abu \l-\Hasan \Alī b. \Omar of the family of Da\s\sain died in 821 (1418) according to al-\Shārî. He also might have become acquainted with it in Abyssinia, for after entering the \Shābīlīya order, he lived for a period in the entourage of the king Sa\līd al-Din (i.e. between 788 = 1386 and 805 or 807 = 1401/2 or 1404/5, cf. al-Makrīzī, *al-\Imām bi-\Akhdār* man\-
xvith century the wali Udemir (cf. Ahmed Râshid, Türkei, i. 83 sqq.) transplanted coffee from Africa to Yemen. This fact, that the merit of introducing coffee as a beverage is given to different individuals suggests that we have to deal with various local traditions. The tradition of Mukhâ is the most firmly established and most widely known; therefore 'Ali b. 'Omar al-Šâhidillî — who is frequently confused with the founder of the Šâhidilî order (d'Ohsson, van Hammer, Rinn) — has become the patron saint of coffee-growers, coffee-house keepers and coffee-drinkers (cf. Goldscher, Abhandl. zur arap. Philologie, ii. p. 1xxviii). In Algeria coffee is also known as Šâhidîye after him (Beaussier, Dict. pratique arabe-français, Algiers 1871). He is popularly regarded as the founder of Mukhâ, which is, however, already mentioned by al-Hamçâni (Šifat Qisasat al-Årab, ed. D. H. Müller, p. 74 sq., 87, 5, 119, 18), although it owed its rise to coffee. A well, a gate and the mosque over his grave preserve the memory of all-Šâhidillî in Mukhâ (Niebuhr, Reisebeschreibung nach Arabien, i. Kopenhagen 1774, 438—440; cf. also the legend in Ḥâdîjih Khâshih and 'Abd al-Karîm Khâshih, Sûrah Wâlîya, French transl. by Langlès entitled Voyage de l’Inde à la Méksik par Abdul Kûrîm, Paris 1797, p. 202 sqq.)

Al-Šâhidillî and al-Aïdarus (probably not Hai-dar, as de Sacy, Chrest. Arab., i. 461 thinks) have become Christian monks named Scaldi and Aidrus in the legend given by Naironi. The motif of the camels or goats in which the enlivening effects of coffee were first noticed has so far not been found in Oriental sources. — According to a popular legend, the coffee tree shot up from goat’s dung sowed by the saint (Snouck Hurgronje, The Atchâneene, Leiden 1906, i. 260).

The legends are probably correct in saying that the taking of coffee in Arabia first began among Yemenis. They were particularly fond of the beverage because its effects facilitated the performance of their religious ceremonies. They therefore considered this as its original destination (mawût' asli) and found that it invited to good and hastened on the mystical raptures (fath) (Sa‘fawat al-Šâfaw f. 342b). The pious intention, with which it was taken, made the drinking of coffee a good work (ma‘a). It received a ceremonial character, being accompanied by the recitation of a so-called râth. This râth consisted in the repetition 116 times of the invocation yâ ka‘wi. This usage is based — apart from the similarity in sound between ka‘wâ and ka‘wi — on the fact that the numerical value of ka‘wâ, i.e. 116, is the same as that of kwâ, i.e. ka‘wâ, “strong”, one of the most beautiful names of Allâh [cf. above i. 303q]. According to Shaikh b. ‘Abd Allâh al-Aïdarus, the recitation of the rûthqa [q. v.] should precede it. Shaikh b. Isma‘îl b. ‘Alawî of al-Šhibr, however, prescribed the fourfold repetition of the Sûra Yâ-Sîn (Sûra XXXVI) with a hundred-fold tâfîya on the Prophet as rûth (Sa‘fawat al-Šâfaw f. 344b, infra sq. f. 345b, 347q). Thus when taken with the righteous intention and devotion and genuine religious conviction, coffee-drinking leads to the enjoyment of the khawâ ma‘awîya, the “ideal ka‘wâ”, also called ka‘wâ al-šâfâ, which is explained as “the enjoyment which the people of God (Ahl Allâh) feel in beholding the hidden mysteries and attaining the wonderful disclosures (mukhâshofât) and the great revelations (fathiyat) (op. cit., f. 341b, 345a supra, 345b infra sq.)”. — ‘Ali b. ‘Omar al-Šâhidillî is reported to have said that coffee, like the water of Zamzam, serves the purpose for which it is drunk (op. cit., f. 348b, cf. above ii. 588 infra), and the saying has been handed down of Ahmad b. ‘Alawî b. Dîyâdah (d. 973 = 1565/66; cf. al-Nâbâni, op. cit., i. 330) who in his last years is said to have lived on nothing but coffee: — “He who dies with some ka‘wâ in his body enters not into hell-fire” (Sa‘fawat al-Šâfaw, f. 344).

Coffee is probably not known as a beverage in South Arabia much earlier than the turn of the viih—(xvith) century. Whether the tree was introduced long before this is doubtful. Ibn Hadjâr al-Hâfîzî (q. v.) speaks in his Ṭabî commentary on al-Šâhîb, probably by ‘Ali b. ‘Omar al-Saîfî (cf. Brockelmann, op. cit., ii. 403 sqq.) of a beverage which appeared (vizi. in Mecca) shortly before the xth century A. H. (i. e. about the end of the xvith century) and was prepared from the husk of the bean, a tree introduced from the region of Zâila’, and called ka‘wâ (quotation in ‘Alawî b. Sa‘îf, p. 9). Among the jurists who gave an opinion in favour of coffee, the oldest is ‘Abd al-Rahîm b. Muhammad b. Sa‘îd b. ‘Ali b. Muhammad Khâshih al-‘Adînî (died 818 = 1438, cf. Abû Makhrâmà, f. 159 sq.; according to al-Nâbâni, op. cit., i. 155 sq.; 829 = 1425/26).

An urduja of Sharâf al-Dîn al-Amrî gives the year 817 (1415/6) as the date at which coffee became domesticated in Mecca (Pertsch, Die Arab. Handschr. zu Gotha, iv. Nº. 2107). According to the ‘Umdu al-Ša‘faw, however, the drinking of a decoction of coffee husks first appeared towards the end of the xivth century, while previously only the eating of the fruit as a delicacy (ma‘â) was known. The drinking of coffee dropped out of use again for a time, indeed, but it finally established itself and soon people drank coffee even in the sacred mosque and regarded it as a welcome tonic at dîhr and as wihîdî. Coffee-houses (bu‘yû al-ka‘wâ) were soon opened, where men and women met to music or where they played chess or a similar game for a stake. This and the custom of handing round the coffee on the manner of wine naturally aroused the indignation of the “anço guîd” of whom many had from the first set their faces against the beverage as an objectionable innovation. They found a champion in Khâ’îr Bey, who was appointed chief of the police in Mecca in 917 (1511) by Kâsîth [q. v.]. He carried through the proclamation of coffee as forbidden (barâ) in the same year, in an assembly of jurists of the different schools in which the unfavourable judgment of two well-known physicians and the evidence of a number of coffee-drinkers regarding its intoxicating and dangerous effects ultimately decided the issue. The ŭhâds signed the protocol of the assembly. Only the then mufti of Mecca dared to decline his co-operation and became therefore the object of coarse suspicions. By putting the questions in a clever way they were at the same time able to get an opinion condemning coffee from the faqîhs of Cairo. The rescript which Kâsîth issued in reply to the protocol sent to Cairo did not completely fulfil the hopes of the opponents of coffee as it contained no absolute interdiction but only allowed measures to be taken
against any concomitant features contrary to religion. Ibn Ḥaddar al-Hāitami, as late as about 950 (1543), had a vigorous discussion, at a wedding feast (ṣawāmīt ʿūr) where coffee was offered to the guests, on the new beverage with a prominent mufti, who declared it intoxicating and forbidden. Ibn Ḥaddar refers to the assembly above mentioned and cannot find words strong enough to condemn its decision and the manner in which it was reached (SAFwat al-SAfwā, f. 352b—356a, quotation from the Muḥqam Mustāfiḏīḵāhī).

In accordance with this verdict, Ḵāṭir Bey forbade the taking and sale of coffee and had a number of venal punishers and their stocks broken, so that coffee-houses (bāṭir) disappeared from the market. But Ḵānūn’s rescript again gave the coffee-drinkers courage and when in the next year one of the leading opponents of coffee was subjected to disciplinary punishment by a high official from Egypt and Ḵāṭir Bey was replaced by a successor who was not averse to coffee, they were again able to enjoy with impunity the beverage, to which these measures had only attracted the attention of wider circles. Only occasionally do we still read of action being taken against disgraceful proceedings in coffee-houses. An edict forbidding coffee issued by the Sultan of Turkey during the Ḥādji in 950 (1544) was hardly respected at all.

In Cairo coffee was first made known in the first decade of the 16th century by the Azhar quarter by Şūfīs from Yemen, who held their dibkār’s in the mosque with their companions in opinion from Mekka and Madīna while partaking of coffee. After it had been publicly sold and drunk there for a time, the ʿāyī Ḵāmīn b. ʿAbd al-Ḥāfīz al-Ṣabūdī, famous as a preacher, declared it forbidden in 939 (1532/3). Two years later in a meeting for exhortation in the Azhar mosque he so incited his hearers against the beverage that they fell upon the coffee-houses, made short work of their contents and maltreated the occupants.

The difference of opinion thus emphasised caused the Ḵāṭir Muḥammad b. Ihyāʾ al-Ḥanaftī to take the opinions of prominent scholars; as a result of personal observation of the effects of coffee he confirmed the opinion of those who considered the beverage a permitted one. Although in the years following coffee was from time to time for brief periods forbidden in Cairo, the number of its devotees, even among the religious authorities, steadily increased.

Several notable theologians had given fatwās in favour of coffee, for example, Zakariyyā al-Anṣārī (died 926 = 1520), Ḵāmān b. ʿOmar Ṣalīḥ (d. 930 = 1523/4), Abu Ṭ-Ḥasan Muḥammad al-Bakri al-Ṣiddīkī (died between 950 and 960 = 1543—1553), who in verses in praise of the coffee also gives the advice that the opinion of Ibn ʿAbd al-Ḥāfīz should be set aside and the fatwā of Abu Ṭ-Ḥasan followed (SAFwat al-SAfwā, f. 349b; cf. also al-Ṣiddīkī’s verses in Bahā’ al-Dīn al-ʿAzmī’s al-Kaṣkhāli, Bulaḵ 1288, i. 19b), ʿAbd al-Rahmān b. Ziyād al-Zabīdī (d. 975 = 1567/68) and others (SAFwat al-SAfwā, f. 348b) — Gradually the view came to prevail that coffee was in general permitted (mudhār), but that under certain circumstances the other legal categories could be applied to it also.

Intercourse with the holy cities and with Egypt brought coffee to Syria, Persia and Turkey. Ruwwâl in 1573 found the beverage widely known in Syria (Ḥalab). In Constantinople and Rûmî coffee first appeared in the reign of Sulaymān I (926—974 = 1520—1566). In 962 (1554) a man from Ḥalab and another from Damascus opened the first coffee-houses (bāṭis ḵan) in Constantinople. These soon attracted gentlemen of leisure, wits and literary men seeking distraction and amusement, who spent the time over their coffee reading or playing chess or backgammon, while poets submitted their latest poems for the verdict of their acquaintances. This new institution was by way of joke called also morkbi-bi-tirfān (school of knowledge). The coffee-house met with such approval that it soon attracted civil servants, kādis and professors also. Poets like Ḥasan al-Rūmī (cf. Bahā’ al-Dīn al-ʿAzmī, ep. cit., p. 147) and later Belīghi sang the praises of coffee, and the opinion expressed in 928 by Sulaymān’s court physician, Badr al-Dīn al-Kūstānī (Leiden MS. 945, f. 58) was not unfavourable. The coffee-houses increased rapidly in number. Among the servants of the upper classes were bāṭis ḵāns, whose special task was the preparation of coffee, and at the court they were subordinate to a bāṭis ḵān. In religious circles, however, it was found that the coffee-house was prejudicial to the mosque, and the ‘ulamā’ thought the coffee-house even worse than the wine-room. The preachers were specially eager for the prohibition of coffee, and the way it was paved for them by the muftis (according to d’Ohsson: Abu ʿl-Saʿud) with an opinion that (roasted) coffee was to be considered coal and therefore forbidden (the same argument is found in the treatise by Muḥammad (ʿAlī) Dede, Leiden MS. 682, i. 4b). The fact that current politics were discussed in the coffee-houses, the government’s acts criticised and intrigues woven, was the principal cause for the intervention of the authorities. Edicts issued in the reigns of Murād III (982—1003 = 1574—95) and ʿAlī I (1012—16 = 1613—17) were not strictly enforced and still less obeyed. The religious authorities met public opinion by declaring coffee legal, if it had not reached the degree of being licit. The grand viziers also benefited as they levied one or two gold pieces a day on the coffee-houses, and were therefore anxious to increase their number.

Murād IV (1032—49 = 1623—40) issued a strict prohibition of coffee (and tobacco). He had all the coffee-houses torn down and many forfeited their lives for the sake of coffee. Under Meḥmed IV (1058—99 = 1648—87), while the sale of coffee in the streets was allowed, the prohibition of coffee-houses was at first renewed by the grand vizier Köprülü for political reasons. This prohibition could not possibly be kept in force permanently, and later we even read of measures taken by the government to lower the high price of coffee. From Sulaymān’s time a tax was levied on coffee which was at a rate of 8 aspers per oucha for Muslim buyers and 10 for Christians; in 1109 (1697) there was added a super-tax of 5 paras the oucha, which was called bidāri ʿūr, for both.

According to von Hammer, Gschichte etc., v. 713, the question of the correct spelling of kahwa with ḵ or ḵ has been disputed in Turkey. Kahwa is actually found in several manuscripts e. g. in the opinion of al-Kūstānī above mentioned.

The coffee tree flourishes in south-western Ara-
bia and does best on the western side of the Seifat at a height of 3400-6800 feet, where it finds in the depths of the valleys and on the slopes a fertile, moist soil and the uniform warm temperature necessary for it. The plantations on the slopes arranged in terraces (see the picture in Handbook of Arabia, Pl. xiv.), however, need regular watering; in addition, the mist (śimmā, sukkāmāni) that rises in thick clouds out of Tihamah brings them moisture. To protect the trees from the heat of the sun and from locusts they are surrounded by shady trees like date, arab trees, tamarinds, etc. The tree which is raised from saplings (or propagated from layers) reaches a height of 6 to 16 feet with a diameter of 2-2½ inches and yields berries in the fourth year. It is an evergreen and throughout the year bears both blossom and berries in various stages of ripeness so that there is really no fixed harvest-time. The main harvest, however, varying with kind and locality, usually falls in the months from March to June. After the berries have been carefully gathered and allowed to dry they are shelled in a mill. The kernels and the husks are then dried in the sun a second time.

The coffee tree is found as far north as 'Ashir [q.v.], where it is said to flourish exceedingly on mount Sh-dh-y (Shadhd) in the land of the Zahrān (north of the Wādi Dawkā, Doka on Steder's map). (Shāhār 'Abd al-Muḥsin al-Barakātī, al-Riḥla 11149, Cairo 1330, p. 16; cf. J. L. Burckhard, Travels in Arabia, London 1829, ii. 377; for other places in 'Ashir see Handbook of Arabia, p. 136, 137). The most southern areas of coffee cultivation are Bīlād al-Haḍjira, Wādī Wārazān and Wādī Bānā. To the east we find coffee grown in the land of the Yהליכי and in the Djiwā. But it is the Ḥarūz mountains, the valley of al-Farāh belonging to the land of the Bānā Musayr, the Dżābal Raima and the district round 'Udān that are particularly celebrated for their excellent coffee. (For further information see Grohmann's book [b. Bibliography] where, too, the varieties are detailed).

The cultivation of coffee was and still is of great economic importance for Yemen. In the time of Ḥadījī Khālīfa, i.e. about the middle of the xvith century, the annual export was 80,000 bales. 1Bani and Bait al-Phākīh [q.v. were centres of coffee trade. Mūkāh, which the coffee trade brought to great prosperity, declined completely in the xivth century and has now lost all importance. Coffee is now exported through al-Ḥudāyda, where already in Niebuhr's time an important traffic was found, and especially 'Aデン (for details see von Neumann, Zeitschr. d. Deutsch. Morgenl. Gesellschaft, xii. 397—403. W. Schmidt, and in the Handbook of Arabia). It has always been the custom in Yemen to drink preferably a decoction of the husks, which like the latter is called ḥāṣr, and is to be obtained in numerous coffee-houses (mīkhāyā). To ḥāṣr as well as to the coffee made from beans, flavourings such as cardamom, ginger, cloves, etc., are often added. In the social life of the Arab no ceremony or festival is complete without coffee, and coffee is the first thing offered to a visitor. An invitation to coffee in Mecca means an invitation to a meal. The Arabs drink coffee without sugar; only in South Arabia milk is occasionally taken; sugar has become the vogue among the Turks.

The fresh ripe fruit is pleasing to the taste and nourishing. The eating of the būn — it is not stated whether fresh or dried — is particularly recommended in a ḥāṣaq by Ḥamza b. 'Abd Allāh al-Nāṣirī (Ṣafwat al-Ṣafwa, f. 358 sq.) on account of its various health-giving virtues. We have no information available as to whether the custom usual among the Galla and in Kaffa of eating ground coffee mixed with butter is also usual in South Yemen. In Persia the eating of dry ground coffee is not unusual.

Kaīawa is also the name of the room in which coffee is served and thus comes to mean reception room and "coffee-house. The word is also used in the sense of "tip" and "present. — On coffeehouses in the East, see the works mentioned below by Olearius, Chardin, Russell, von Hammer, Snouck Hurgronje. — On coffee-vees see Lane, Snouck Hurgronje, von Oppenheim, Soeng, Euting, Landberg. It is probably a case of borrowing from the military language when certain prominent stars, e.g. the last star in the Great Bear, or mountain-tops (lunar marks) are called ქართ ახტან (cf. Lane, Lexicon, s. v.).

KAIDA, (A.) (lit. "sitting"), basis, foundation, later also rule, principle, etc. Cf. the dictionaries.

KAITT. [See Kt'afa.]
KAI-KA'US, a mythical king of Persia of the Kayănid dynasty. Called Kava Ûsâ in the Acesta, he is regarded by Firdawsi as the son of Kai-Êkhâd and by other sources as his grandson. He was, it is related, a warrior king who undertook a campaign into Mázandarân, which was inhabited by demons and protected by the white dwâ (dwo-i safid) who caused it to rain stones upon the invading army during the night; Rustam, son of Zâl, set out to deliver the king from his imprisonment and on his way met with seven adventures which have become celebrated in poetry [see KUSTAM]. The white dwâ was overcome in his sleep and the blood from his heart restored their sight to the king and his army. Another war led the king into Hamvârân, a land lying to the south of Persia, which might be the Yemen (Himyar), for he set sail for it by sea from Makrân. His adventurous spirit took him as far as the mountain of Kaf [q. v.] which was believed to surround the earth. He married Sùdâ, daughter of the king of Hâmavârân (al-Te'Àli-ibii: Sûdâna, ar. Sùdâ, daughter of ibn-i 'Ashî) and in the course of a visit to his father-in-law was treacherously thrown into prison in a cave on the shore of the sea. It was Rustam who came to deliver him.

Being master of the demons, Kâi-Kâ'ûs used their forces to make them build castles in Alburz (al-Thâyâlî, p. 165: the Tower of Babel; do, Hàmza al-Is-fhâhân, ed. Gottwaldt, p. 55; Muddîmat al-Tâ'arrûd, Journ. Asiat., Ser. iii., xi. (1841), p. 325). To revenge themselves for this forced labour one of them suggested to the king the possibility of rising up to heaven. For this purpose the king trained young eunuchs and attaching four to his throne had himself carried off towards the stars. When the eagles felt tired, they came down again and threw the king on the ground in the neighbourhood of Ámul [q. v.], in the middle of the forest, where he was found by the nobles who had set out to look for him. A son of the king, Siýâwâkhsh (Siýâvâsh, Çevâvarhânà), was accused by his step-mother Sûdâba, whose overtures he had resisted, of having attempted her virtue; he cleared himself of the order by fire, by walking unharmed through a narrow space between two blazing piles of wood. The young prince then asked leave to fight the Túrântâns, whom he encountered near Balkh [q. v.]. The death of Siýâwâkhsh, now the son-in-law of Afûsîyâb [q. v.] and victim of the intrigues of Sûdâba, decided Rustam to invade Persia; the hero put the queen to death before the king's eyes and then hurled himself on Túrân to avenge his country.

Kai-Kâ'ûs reigned one hundred and fifty years the latter of which he passed in retirement; he left the throne to his grandson Kai-Khurwâr [q. v.], son of Siýâwâkhsh.

KAÎKÂ'US, the name of two Sâlûjûk rulers in Asia Minor.

KAÎKÂ'US I, al-Súlûn al-Châlî 'izz al-Dûnîya wa-l-Din K. B. KâÎhûâszwâr, Burhân Amârî l-Mû'mînnîn, reigned from 606—616 (1210—1219). He at once made peace with Theodore Lascaris (see below KâÎhûâszwâr I) because he had to defend his rights against his uncle Toghârîshâh of Erzerûm and his brother Kaîkobâd, who were contesting his succession. The Armenians under Lîfûn (Leon), who seized the opportunity to capture Heraclea and Lândra and to plunder KâÎsâriya, were temporarily induced to retire on payment of a considerable sum. Toghârîshâh also soon retired to Erzerûm, but Kaîkobâd, who had seized the fortress of Anguria, held out for a considerable time and was only forced to surrender after several years' siege. He was thereupon provisionally imprisoned in the fortress of Minshar (Marâyê, now Minser, S. E. of Malayta; cf. Defrémery, Hist. des Croisâts, Documents Armaniens, i. 143, note 3). By a lucky coup KâÎkâ'ûs succeeded in capturing the king of Trebizond, Kîr Âleks, who had to purchase his freedom by ceding the important harbour of Sinope and paying a yearly tribute (611 = 1214). The town of Anjâlia, which had been taken by KâÎhûâszwâr shortly before, but had expelled the Turkish garrison with the help of Christian knights, was again reconquered. In 613 (1216) KâÎkâ'ûs made an inroad into the land of the Armenians and besieged the fortress of Gaban (Ibn Bîbi in place of this mentions two citadels, Cînûn and Gànûn). The army sent to raise the siege included the Constable Constantin and several Barons of the Empire; it was completely routed by the Turks and the Constable with many Barons and knights were taken prisoner. KâÎkâ'ûs then returned to KâÎsâriya, without having taken the fortress, after plundering the land and laying it completely waste. There was nothing left for the Armenians but to beg for peace and the release of prisoners. Both appeals were granted but their king had to pledge himself to pay tribute and to cede the important frontier fortresses of Lu'lû'a and Uawzâd, which commanded the Cilician passes. When in 613 (1216) KâÎkâ'ûs's ally, the Aiyûbdî of Hâlab, al-Mâlîk al-Zâhir, died, KâÎkâ'ûs arranged with the Aiyûbdî lord of Sumâsàt, al-Mâlîk al-Afâljî, that the latter should receive Hâlab with the Sûltân as his overlord. This plan seemed at first to be successful; the Turkish troops occupied Marâbûz without difficulty (Kamâl al-Din, transl. Blechot, i. 158, mentions Burdûj al-Râzâq, as does Yûsûf, ed. Weinacht, ii. 604, and adds Tell Kshâld also), Ra'bân, Tell âsîrîh and Ma'bâd, but in place of handing the places over to al-Afâljî, as had been agreed, KâÎkâ'ûs put Turkish commandants over them. Friction thus arose and the Hâlabis gained time to appeal for help to al-Mâlîk al-Afâljî (cf. i. 222) whose troops defeated the
advance-guard of the Turks at Tell Kabban (Yakut, i. 869). Kaikäüs then retired on Abhestan, while al-Ashtar drove the Turkish garrisons out of the fortresses they had taken. Furious at this failure, which he attributed to the treachery of his own emirs, Kaikäüs had several of them hanged and others imprisoned in a building called Rabab Tartish by Yakut, which was then set on fire so that they were all burned to death. Soon afterwards he himself fell ill of consumption and died in 646 (1249). His body was buried in a hospital built by him in Siwás, where the inscription on his tomb, incised in 617, can still be read. Cf. v. Berchem, Matériaux pour un Corpus Inscriptionum Arabicarum, Part 3, p. 5 sqq.

Starer, Reise in Kleinasië (Berlin 1896); do., Konia, Selçoukide Bauendenmalers (Berlin 1921). See also the bibliography to the article SELJÜK.

KAIKÄUS II, 'IZZ AL-DÜN YEH NAW L-DIN R. KAIKHSRAW II. When Kaikhsraw II [3. v.] died in 643 (1245), according to the arrangements he had made, his son 'Ala' al-Din Kaikhoïbâd, whose mother was the Persian princess Tamar, was to become Sultan, but he was barely 7 years old and had two older brothers — also still quite young — Izz al-Din and Rukh al-Din Kiliti Arslân. Izz al-Din was the eldest. His mother was the daughter of a Greek priest (Frater Simon in Vincent de Beauvais, Book xxxii., Ch. 26, who has, however, confused Izz al-Din and Rukh al-Din). The all-powerful vizier of the late Sultan, Shams al-Din Isfahâni, declared for him but did not yet dare to set aside the two other brothers, for the decision ultimately lay with the Mongol Khans. The vizier therefore could not prevent Rukh al-Din, accompanied by several Turkish emirs, from travelling to the urdu of the Great Khan and being present at the great jûralât at which Kuyuk was proclaimed Great Khan (1246). But in the meanwhile the Vizier (whom Frater Simon refers to as Losyr) was busy getting all power into his own hands and married Izz al-Din's mother to the great chagrin of the Turkish emirs. To attain his desires, he had several of them put to death, including, according to Vincent, a certain Salefâdin, i.e. Sharaf al-Din Ma'âmmûd, the governor of Arzandjân, a man well-disposed to the Christians, who understood French and German (ibid., chap. 27). The result, however, was that the malcontent emirs laid a complaint against him before Kuyuk, who gave them a yarîk appointing Rukh al-Din Sultan. In addition, the Khân ordered that the vizier should be handed over to the relatives of the slaughtered emirs. He also laid down definitely the conditions of peace; the Seldjûks were to pay a yearly tribute of 1,200,000 hyperpries (bezants), 500 silk robes with gold brocade, 500 horses, 500 camels, and 5,000 head of smaller animals and also presents which doubled the value of the whole. This is Vincent's story (Ch. 28). Cf. thereon Barthold in Zapiski West. Otd. Imp. Arkh. Obšč., xxviii. 0128; d'Ossian, Hist. des Mongols, iii. 83.

When Rukh al-Din then returned to Asia Minor, he was recognized as Sultan, and the vizier, in accordance with the orders of the Great Khan, handed over to his enemies and put to death in 646 (1249); we have therefore coins with the name of Rukh al-Din as early as the year 646 (1249). In the meanwhile, however, news arrived of the death of the Great Khân and it was not till 1251 that his successor Mongke assumed full authority. The Mongol emirs of the Selçoukides declared for Izz al-Din and agreed with another one that Kaikhsraw's three sons should reign jointly. From 647 to 655 all three names appear on the coins, with the single exception that in 652 (1254) Rukh al-Din struck coins with his name in Kaïsaria, because he had been proclaimed sole Sultan there by the pachalik of the town, Şamsâm al-Din. Long negotiations followed between Rukh al-Din and İzz al-Din, which led to nothing, however, till finally the sword brought a decision and Rukh al-Din was taken prisoner and sent to Amasia and later to Burghû. In the meanwhile Mongke had demanded that İzz al-Din should return to him, but the latter had little desire to undertake the dangerous journey and therefore sent his brother 'Ala' al-Din Kaikhoïbâd with rich presents. On the way, however, the prince was murdered and an enquiry instituted by the Great Khân to find out who had had a hand in it led to no result. An encounter between İzz al-Din's troops and those of the Mongol Nogay Baidûj at Akşara in 654 (1256), in which the former were routed, forced İzz al-Din at once to seek refuge with Theodore Lascaris. The imprisoned Rukh al-Din was thereon liberated and recognized as Sultan (coins of 655). But scarcely had Baidûj retired with his Mongols than İzz al-Din returned to Konya, while Rukh al-Din was in Kaïsaria. After long negotiations and occasional skirmishes between the troops of the two brothers, a division of the kingdom was decided upon. Rukh al-Din was to reign eastwards from the Kızıl İrmak and İzz al-Din westwards. Both brothers were then to go to Hülagü, who was then in the neighbourhood of Trabiz to have the agreement confirmed. This was done, but soon afterwards the Mongols learned that İzz al-Din had entered into negotiations with their archenemies, the Mamlûks of Egypt, and put an end to his rule. İzz al-Din was still able to escape to Anfîla and sailed from there with his relatives and a few faithful emirs to Constantinople, which after the fall of the Latin Empire, was again in the hands of the Greeks. There he was sure of a good reception on account of his having a Christian mother. But the presence of these Turks soon became embarrassing to the Emperor. They are
said to have begun a conspiracy to murder him and make Izz al-Din Emperor. When the Sultan's Christian uncles betrayed this plan, the Greeks lost no time in banishing the Sultan to Ainos, while his servants were incorporated as Turecopes in the Imperial armies, or imprisoned and put to death (662 = 1264). Six years later (668 = winter 1268/1269) Izz al-Din was liberated by troops sent to Constantinople by Mengu Timur and brought to the Crimea. There he married a daughter of Bereke Khan and died in 678 (1279/1280). On his son Mas'ud see the separate article.

Bibliography: See that of the preceding article. Specially important here is Vincentius Bellovacensis, Speculum historiale, Books xxx. and xxxi., chap. 26, 27. KAI-KHUSRAW, a mythical king of Persia, of the Kayanid dynasty. Son of Siyyawalsh, who had left his father Kai-Khuss and taken refuge in Tuiran where he had married the daughter of King Afrasiyab [q. v.], he was born after his father's death and brought up in this country among the shepherds of the mountains of Kal (a valley near Bamiyan), in ignorance of his illustrious origin; but this was soon revealed. At seven years old he was making bows and at ten he feared neither lions nor tigers. Then Piran, the vizier of Afrasiyab, took him into his house. In a dream Gadarz, an Iranian noble, descendant of the smith Kawa, learned that the heir to the throne existed in enemy territory and sent his son Gew to look for him; the latter found him quite by chance and recognized that Kai-Khusraw had on his arm the black mark that distinguished Kayansids; he therefore took him, along with his mother Faringis back to Persia.

There he found a rival in his uncle Faribor. To settle the question, Kai-Kau's decided that the throne should belong to the one who captured the fortress of Bahamanzid, near Ardash [q. v.], where Ahirman reigned. It was of course Kai-Khusraw who won, with the aid of celestial forces, and there he built a temple in honour of the sacred fire Adharbaghshap. A journey through his empire showed him the devastations caused by the Tuiranians and he swore to undertake a war of vengeance against them. Aided by all the nobles, he sent out expeditions of which the first were unfortunate; but fortune soon changed and Kai-Khusraw took over the direction of the campaign. Afrasiyab, in spite of the help of the Emperor of China, was finally forced to fly and Kai-Khusraw sought him in vain beyond the seas. He was hidden in a cave in the mountains of Adharbaidjan [q. v.], and his place of concealment could only be discovered by supernatural means. He was finally taken prisoner and beheaded. Thus was accomplished the vengeance due for the murder of Siyyawalsh.

Having succeeded his grandfather Kai-Kau's, for whom he wept for 40 days, Kai-Khusraw reigned peacefully without any incident more remarkable than the killing of a dragon which had taken up its abode on the mountain of Kisshid, between Fars and Isfahan (Hasma al-Isfahan, ed. Gottwaldt, p. 56). At the end of his life, he asked God to receive him into heaven and, after naming Juhass as his successor, he undertook a mountain journey in the course of which he disappeared, after having washed in the water of a spring (the spring of eternal life). Those who had accompanied him perished in a snowstorm. It is clear that the figure of Kai-Khusraw corresponds to that of the Avestan hero Haoravon, who belongs to Indo-Iranian mythology.

KAIKHUSRAW, the name of three Seljuk rulers in Asia Minor.

KAIKHUSRAW, brother of al-Din, b. Kılıç Arslan. When the aged and enfeebled Kılıç Arslan II died in 588 (1192), he was staying with his youngest son Kaikhusraw, who governed Burghul (i.e. Uluburlu) in his father's lifetime. Kaikhusraw concealed his father's death and only made it known when he had arrived with the body in Konya, in order to have homage paid to himself as Sultan there. His brothers, each of whom ruled over a part of the Seljuk kingdom, troubled about him just as little as they had done about their father in his later years. It was some time, however, — according to some not till 592 (1196), according to others 595 — before one of them was strong enough to take Konya from him. Finally Rukan al-Din Sulaiman [q. v.] succeeded in doing this, so that Kaikhusraw had to take to flight and after several unsuccessful attempts to gain his throne with the help of Leon of Armenia and of the neighbouring princes of Malatya, Hacab and Amid, wandered hither and thither (cf. the poem composed by him in Ibn Bubi, p. 29 sqq.), till he at length found a welcome with Alexius III in Constantinople. At this time he married a daughter of a distinguished Greek named Maurozmes, and the death soon afterwards of his brother in 600 (1204) opened up a good prospect of returning to Konya, because several emirs were dissatisfied with the rule of the latter's son Kılıç Arslan III, who was a minor. The main part in the plot was played by several members of the dynasty of the Dênishmandiya [q. v.], which had been deposed by Kılıç Arslan II. He actually succeeded in being proclaimed Sultan in Konya in spite of a fetwa of the kâdi al-Tirmidhî, who declared him unworthy of the throne because of his Christian mother and his intercourse with the unbelievers, a fetwa which cost the issuer's life. According to Ibn al-Athir, al-Kâmil, ed. Tornberg, xii. 160, Kaikhusraw besieged Trebizond in 602 (1204) apparently without much success. In 603 (1207) he took the imperial city of An- tala from Aldobrandini. From this capture date the first relations of the Seljûks with the Venetians, to whom he granted a licence to trade (cf. Heyd, Gesch. des Levantehandelns, i. 334). In 605

KAHHUSRAW II, GHIYATH AL-DIN wa-L-DIN b. KAIKOBAD, ascended the throne after the assassination of his father in 634 (1237), although Kahlı̄bad had not designated him as his successor but the son of Bajı̄, in 607 (1210) he fell in the battle at Kholı̄, apparently because of his involvement in the Armenian and Ayı̄bad mercenaries and to advance against the Mongols with them; but the incapacity and cowardice of the Turkish troops lost the battle at Kozadağh (Muharram 6, 641 = June 26, 1243). Bajı̄ thereupon marched on Siwas, which surrendered and was therefore spared, but Kahlı̄bad was taken by force of arms, plundered and his inhabitants massacred. He then went into winter-quarters and the vizier succeeded in concluding a temporary peace, which, however, had still to be confirmed by the Great Khan. But as Ugedei died just then and the next kürsitewas not held till 1246 (see above, i. 682), the Turks had a few years' peace and the able Shams al-Din used the opportunity to seek the intervention of Batı̄ Khan, on a ceremonious embassy with several other prominent Turks. He was entirely successful so that on his return he received the office of vizier rendered vacant by the death of Muhabdulbih al-Din. The good for nothing Sultan, who after the battle of Kozadağh, had been about to fly to the Great Khan, again gathered some courage and in 1245 began a campaign against the Armenians, against whom he had a grievance because they had handed over to the Mongols his mother, who had taken refuge with their king, with her treasures. The object of the campaign was Tarsus on this occasion, but soon it had to be abandoned, because the rainy season began, after the land had been ravaged in fearful fashion. The Armenians by the treaty of peace bound themselves to pay tribute and to cede Bragana. When the leaders again appeared at the Sultan's court, the latter had died suddenly a week before.

Bibliography: See above under KAIKOBAD; of particular importance are here Vincent de Beauvais and the historians of the Mongols.

KAHHUSRAW III, GHIYATH AL-DIN, B. RUKN AL-DIN KAIKOBAD ARSLAN was proclaimed Sultan, immediately on the murder of his father, by the all powerful Perwāna Mu'in al-Din Sulaimān [q. v.], although he was still a minor. The events in Asia Minor during his reign will better be discussed in the article SULAIMAN. After the execution of the Perwāna (676 = 1277) Kahlı̄bad's reign was soon at an end, as his youth rendered him a mere tool in the hands of the Mongol rulers. His nephew Mas'ud [q. v.], when he returned to Asia Minor after his father's death, was so successful in gaining the favour of the Great Khan Alażı̄ [q. v. v.] that we have coins of his name as early as 681. The unfortunate Kahlı̄bad, who was entirely in the power of the Mongol prince and claimant Kοῡkuruz, became involved in the latter's fall and was put to death in 682 (1285) in Arzandžan by order of the İkhan Ahmad.

KAIKOBAD, a mythical king of Persia, of the Kayānd dynasty. The Avesta knows his name in the form Kav Kavāta, but nothing more of him; tradition only preserves of him the fact that he was grateful to the Yazatas for having made his empire glorious and for having re-established the legitimate line of kings of Iran. The only source to consult is the Shāh-nāma of Firdawsī. To defend Iranian soil against the inva-
sions of the Tūrānīan Afrāsīyāb, the Sace Zāl, father of Rustam, after ripe reflection and consultation with the mābišt’s decided on Kai-Kobād, who was living in the mountains of Alburz (Hare-herezat), and sent his son to look for him. The latter found him in the midst of a banquet surrounded by boon comrades; he greeted him, but already the new king had seen in a dream two white falcons place a golden tiara on his head and was thus informed of the coming of the embassy; the care which he had taken to make himself remote had not prevented destiny from putting the messenger on his track. Becoming commander of the Irānīan army, Rustam completely defeated Afrāsīyāb, who would have been made prisoner if the girdle by which he was being carried off had not broken. As a result of this victory, a peace was concluded which gave Persia its former frontier of the Oxus. Kai-Kobād spent his time in organizing the empire and traversing it, in founding cities and in lavishing riches on the heroes who had rebuilt the empire: Rustam, Kāršīn and others. He died at the end of a reign of a hundred years.

The Nadjam al-Tawwārikh (Journ. Asiat., Ser. iii., xi. (1841), p. 320) which says that Kai-Kobād came from the mountains of Hamadān, Alwand, and not from Alburz, and Ḥamza al-ʾĪsfahānī (ed. Gottwaldt, p. 35) only mention his building cities, notably Kobādīyan on the Oxus, and the expansion of Ṣafīān. The Būdīshthīk only gives fifteen years to the reign of this king instead of a hundred.

KAİ-KOBĀD, the name of three Seldjūq Sulṭāns in Asia Minor.

KAİ-KOBĀD I, "AL'A al-Dunyā wa l-Dīn abī l-Fath K. b. KAİKHUSRAW. How he had been taken prisoner in the reign of his brother has already been told under KAİKĀTS I. The death of this brother in 616 (1220) opened to him not only the gates to the throne of Guloganpur, where he was then interned, but also placed him on the Seldjūq throne. All the Türkish emirs do not seem to have been quite agreed about this, as they declared for another brother, Kaišerdīn, but Kaikobād succeeded in gaining possession of Konya, the capital, and in soon afterwards rendering the malcontent emirs harmless. He probably received valuable help from the Christian auxiliary troops, as Ibn Bīrī relates that the Emir Constaninopolis played an important part in these events. We know from the account in Vincent de Beauvais (Book xxx. ch. 144), which, however, refers to the reign of his successor, that the Greek emperors of Trebizond and Nicaea as well as the prince of Lampron had pledged themselves to place a number of troops—settled in a treaty at the disposal of the Seldjūq. It is certain that this agreement was already in force in the reigns of Kaikhusraw I and Kaikitās I, perhaps with the single limitation that it was not till the reign of the last named that this pledge held good for the Armenians also, and was renewed under Kaikobād. At the beginning of his reign the Armenian king Leo II died (1219) and his daughter Isabella married the son of the Catholic prince of Antioch, which aroused a great dispute among the Armenians, the result of which was that the discontented barons under the leadership of Constantine, prince of Lampron, captured the prince, poisoned him and married his widow to Haithum, the son of Constantine. A war with the prince of Antioch was thereby rendered inevitable; the Templars and Knights of St. John received orders from Rome not to take part in it so that Bohemond could not do much against the Armenians and, according to Ibn al-ʾĀthrī, had even for appeal to help to Kaikobād. In any case, the latter took advantage of the dissensions among the Christians by seizing several Armenian forts on the Mediterranen and elsewhere, including the castle of Galononas (καλώνων) Candarlılar, which he chose for his winter residence, and made a considerable seaport by his buildings there, so that the place became called Alaya ("Alaʾiya") after him. In these circumstances there was nothing left for the prince of Lampron on his side, but to acknowledge the suzerainty of Kaikobād and to support him with auxiliaries in his wars.

An attempt by Masʿūd, the Ortukid of ʿAmīr and ʾIḫšān Kaīfaʿ, who succeeded his father as lord of their towns in 619 (1222), to leave Kaikobād nonsense on the kaikhusraw and to make an alliance with the neighboring Ayūbid princes, all of them the fortresses of Kāhtila and Cemītāhkez. The troops sent to his assistance by al-ʾĀṣfer (see i., 229) were scattered by the besieging army, but Kaikobād hastened to heap tokens of honour on the captured commander and to release him, because much depended on him for the friendship of the Ayūbids. Indeed he even sought the hand of an Ayūbid princess. His request was granted and the marriage took place a little later. In 622 (1225), the prince of Arzandân, Bahramshāh, died after sixty years’ reign, as also did the Seldjūq of Erzerum, Taghrihrāh. Kaikobād thought this a good opportunity to seize where possible the lands of these rulers. Dāʾūdshāh, Bahramshāh’s successor, did his best to avert the danger by entering into alliances with Djalal al-Dīn Khwārizmshāh, with ʿAlaʾ al-Dīn, Grand Master of the Assassins and with al-ʾĀṣfer, but in vain. Kaikobād forced him to cede his territory and he was equally successful with another member of the Menguek family, Muḥaffar al-Dīn Muhammad, who ruled over Cogonisia (Şabīn Karahisār). But before he could take Erzurum too, he had to wage a difficult war with Djalal al-Dīn, who was an ally of the prince of Erzerum. After embassies had gone several times to and fro between the two rulers, Kaikobād made an alliance with al-ʾĀṣfer, who then fought with Djalal al-Dīn for the possession of the town of Khišt. As soon as the Khwārizmshāh heard of this, he endeavoured by a hurried march to anticipate the union of the two forces, but in the battle of Arzandân on the two armies of the city of 128, 627 (Aug. 10, 1230, cf. Actes du 1er Congrès international. des Orientalistes, iii. 19) he suffered a terrible defeat. The fate of the prince of Erze-
The redaction having determined to finish the work within 10 years, a second series of numbers, beginning with S, will be started, parallel to the present series. It is the intention of the redaction to publish 3 numbers of each series yearly.
rück was thus declared as part of the territory annexed by the Great Khan. The Khowar, Georgians in 1222 and the Mongols in 1223, agreed to the marriage of a princess with Kaikobad's son Kaikobad. In the meantime the Mongols had again appeared in the region, pillaging the country. Kaikobad, who had no women and was generally thought to be a heretic, was induced by his subjects to take a woman for his own daughter. Kaikobad then decided to occupy the district of the Khowar which he had not received after the death of Jalal al-Din but had not defended, and to take the ravaging bands of the Khorasanians into his service as mercenaries. This brought about a coalition of all the Ayubid princes under the leadership of the Kamil of Egypt against Kaikobad. Soon their troops were on the Asal Minor frontier but they did not succeed in forcing the passes to enter the land; in addition the Ayubid leaders soon began to quarrel among themselves. In the end they had to be content with defending the town of Khartit against the advancing Turks. But the latter could not be kept back. Al-Mayafar, the Ayubid of Hama, set upon them the conduct of the defense fell, was captured along with the Ortuk ruler in Khartit. The town surrendered to the Seljuk; Kaikobad next besieged and captured Harran, Edessa and Raqqa (652 = 1243) which, however, were soon lost again to the Ayubids. Amol also was unsuccessfully besieged by him and when in 654 (1257) he was about to undertake a new campaign, he was imprisoned in Kars, for his son Kaikhusraw was killed. He is said, because Kaikobad had appointed his successor not him. A younger son, born to him by the Ayubid princess.

During Kaikobad's vigorous reign the Seljuq kingdom attained its greatest extent and highest prosperity, for Kaikobad was not only an indefatigable soldier but also undertook great building operations: the remains of which in Konya, Silvan, Agha and elsewhere keep alive the memory of the great Sultan to this day. He busied himself in opening up his lands to commerce and in improving the natural wealth of the country; with this object he even undertook an expedition to the Crimea, no doubt at the wish of the Italians. As a result his kingdom was at that time considered the richest in the world.

Kaikobad II, 'ala al-Din r. Kaikhusraw, reigned together with his two brothers, Kaikhusraw and Kildji Arslan, as was briefly described in the article KAIKOBAD. II. Here we shall only refer to a coin and place where Jalal al-Din Edhem, Taqizmi, Makrlik-i Seljuklou, No. 113, which bears the date 653 and the name Kaikobad alone, although Kaikobad had died 8 years before.

Kaikobad III, 'ala al-Din K. r. Farhmarz B. Kaikusus was installed as Sultan by Gha'az Khan in 697 (1298). Of his history practically nothing is known with certainty. His name still

THE ENCYCLOPEDIA OF ISLAM, II

KAIL (A), the most general term for measure. The word next has the special meaning of measure for dry goods such as grain and cereals of all kinds and finally (like kala) means
KAIL — KAIM

KAILADJA, a measure of capacity in local use and varying very much, whose size varies between \( \frac{1}{2} \) and 2 l. (or kg. = \( \frac{1}{2} \) to \( \frac{3}{4} \) pints). The term existed as early as the 3rd century A.D.

Lane Poole, Arabic Glass Weights in the British Museum, No. 47, 51; Becker, Papiri Schell-Reinhart's, i. 31 and 72; al-Tabari (ed. de Goeje), Glossarium, p. cxxviii and cxxix; Behrman, Institutions de police chez les Arabes in the Journ. As., Series 5, xvi. (1860), 131; al-Khwārizmī, Majālīth al-'Umm, ed. van Vloten, p. 15. (E. V. ZAMBAK)

KAIM (A.), "standing upright," "perpendicular." Hence kaim-nūmān "standing in place (of another)," "deputy;" kaim al-Zamān [q. v.]; sūwāja kā'ima "right angle." Also: "existing for example in kā'īn bi-najshī (or bi-dhāthī) "self-existent" (said of God). Kā'īm bi- also means "executing anything;" hence al-kā'īm bi-amrītal "he who executes God's command".

KAIM-MĀKH (A.), "deputy;" pronounced and written kaimākh in Turkish, the name of a rank and office in Turkey. In the period before the tanzūr reforms the word meant the officer (rikā'īl hawāζiẓn or ẓitāqā naimāquz) temporarily commissioned to act as deputy at the court or in the capital in the absence of the Grand Visier, the so-called kaimāqam paše. The case is an isolated one in which the Grand Visier appointed an ordu kaimāqam to represent him in the camp (Lütfi, Tāriξh, iv. 19); we also find kaimāqams for the Seraskers and the Kapudan Paša (İzārār Kaimāqam for the eyalet of the Archipelago, which was under the Grand Admiral); for the regular and representative functions of officials the now obsolete term yer (e.g. kā'īma yer) was used, for the judicial officials nāzib. In the reorganization of the army and the provincial administration on the European model under Muhammed II and 'Abd al-Majid kaimāqam became in the army the equivalent of Lieutenant-Colonel and in the civil service the name of the official entrusted with the administration of a district (kâṣb).

KAIM AL-ZAMĀN (A.) i. e. "Lord of the Age," a Shī'ī term. The phrase includes the two theological meanings of "representative of God on earth" and "Deputy" of the Prophet. Among the earlier Shī'īs for example the Imām is called "the kā'īm," "our kā'īm" or "the kā'īm of his age," synonymous with ḫūṣafīya or ḫutafīya. The political application of the word brought in the meaning of "rebellious," current among all the succeeding sects, e.g. also among the Khāridjīs. Through chiasmus the name is given to the Mahāḍī as "resurrected" from (apparent) death who is active in the "age" through the ṇāzīb until as kā'īma al-ṣīyāma he brings about his kingdom and the judgment. Among the Imāmīs the twelfth Imām, and among the Ismā'īlīs the seventh is therefore kā'īma al-ṣāmān. But the more the Imām becomes like God in the subdivisions of the latter, the more he falls into the background and is only occasionally referred to as "the kā'īm" simply, with allusion to Sūra iii. 16, xili. 33 while the rank and powers are transferred to heads of sects, who are mostly not 'Alīs. Gnostic speculation equates the kā'īma al-ṣāmān to the first emanation, e.g. among the Druses to the intelligenza prima, 'ashī, i. e. ḥamza. The term is mystically amplified by the interpretations of the mystical initial letter ḥāf, the symbol of the girdle of the world.

Al-Kā'im bi-ʿAmr bil-ʿAṭār ʿAbd-Allāh ʿAbd-Allāh, ʿAbbasīd Caliph. He is said to have been born in Dhu l-Ḥijjah 301 (Nov. 1001); his father was the Caliph ʿAbd-Allāh, who had homage paid to him as his successor shortly before his death; his mother was an Armenian or Greek slave. When he ascended the throne (Dhu l-Ḥijjah 422 = Nov.-Dec. 1031), the Caliphate had almost entirely lost its secular power and anarchy reigned practically supreme in the capital. To make himself obeyed, he ordered in 236 (1044/5) that all judicial offices should temporarily suspend their activities, which was, however, entirely without success. In his reign ended the Buyid dynasty and their place was taken by the Seldjūqs. On Ramadān 22, 447 (Dec. 15, 1055) the Seldjūq chief ʿToğrul Beg was officially prayed for and on the 23rd the latter entered Baghdād in state, nominally as vassal but in reality as master of the Caliph (see Khwāsūr fidur), who soon afterwards in 449 (1058) granted him the Sultanate and the title of honour of “King of the East and of the West.” In Dhu l-Ḥijjah of the following year, 450 (1059), the Turkish general al-Basāṣir [q.v.] took possession of the capital, while the Caliph took refuge with the ʿUṯtūdīl ʿUrāshī b. Badrān [q.v.], and on the 13th (Jan. 1, 1059) prayer was offered in Baghdād for the Fāṭimid al-Mustansīr. Al-Kāʾim, however, was soon again recognized as Caliph (end of 451 = 1059/1060) and although he was only a tool in the hands of the Seldjūqs, he was treated with respect both by ʿToğrul Beg and his successors. He died in Shaban 467 (April 1075).

Kāʾim bi-ʿAmr Allāh, ʿAbd l-ʿAṭār ʿAbd-Allāh, the second ruler of the Fāṭimid [q.v.] dynasty, born in 280 (893), succeeded his father ʿUbād Allāh al-Mahdī in 322 (934) on the throne, assumed the praenomen Muḥammad and at his proclamation took the name of al-Kāʾim bi-ʿAmr Allāh. His father had designated him his successor as early as 298 (911), when after the death of al-Shir [q.v.] he thought his own rule sufficiently secure, and had had his (viz. the prince’s) name mentioned in the Friday prayer; the prince commanded the army and conducted most of the campaigns while ʿUbād Allāh was still on the throne. He never placed himself at the head of his troops nor ever taken a personal part in any of the numerous wars, but used to entrust his emirs with their conduct and after failures, or on particularly difficult expeditions, he used to appoint his eldest son to the supreme command.

Of al-Kāʾim’s campaigns, while heir-apparent, may be mentioned the conquest of Constantine and Tripolis as well as his efforts to conquer Egypt. He gained great successes especially in the second expedition against Egypt in 307–309 = 919–921. He had conquered Alexandria and Ḥīṣā (Giza) and occupied the Fāṭīmids and Uḡmūnids. But disease, deficiencies in the supply of reinforcements and a strengthening of the Abbasids governors’ troops on the other side and the defeat of his fleet at Rosetta forced him finally to withdraw. He had, however, consolidated Fāṭimid sway as far as Bākra. In 316 (928) he developed the town of Mašla as his capital and called it al-Muḥammādiyya.

When in 322 (934) he succeeded his father, he had at once to turn his attention to an imposter, who gave himself out to be the son of al-Mahdi. After defeating him without difficulty, he turned his attention westwards to secure his authority there. He then devoted himself to various expeditions, sent his fleet to the coast of France, where the crews plundered and took prisoners, to Genoa, which was captured for a short time, and to Calabria. In 323 (935) he sent an army of 10,000 to Egypt, which conquered Alexandria, but was soon afterwards defeated by Muḥammad b. Tughāl al-Khāhidī, brother of the Abbasid governor. At home al-Kāʾim had to wage a continual struggle with rebellious tribes, his most redoubtable opponent being the rebel ʿAbī Yazīd [q.v.]. After heavy fighting and many misfortunes, he succeeded in driving his opponent out of al-Mahdiyya but soon afterwards in 334 (946) he was hard pressed at Sūsā with his army and finally surrounded. During the siege, he fell ill and died in a few weeks.

Al-Kāʾim was a fanatical champion of Fāṭimid doctrines. His reign was a period of ceaseless wars, which were fought in the fiercest and most barbarous fashion. Courage, ability and tenacity cannot be denied him. He laid sound foundations for the greatness of his successors. In this period of warmania, it was impossible for him to attend to the works of peace. The Bibliography is found in Wüstenfeld, Gesch. d. Fatimid, Chaliphen (Abb. der Kön. Ges. der Wiss. zü Göttingen, xxvii, xxvii, 1881) and above ii. p. 92*, at the end of the article FĀṬĪMIDES and i. p. 114*, article ʿAbū Yazīd. (SOBERHEIM)

KAIMAK. [See KIMAK]

KĀʾIM (t. originally ; cf. Kāʾim), the name for paper-money in Turkey, an abbreviation for Schim kāʾimete ("revenue bonds"); the word was originally used of drawings and documents which were written on large, long leaves in such a way that the lines ran parallel to the narrower side, as was the case with the first issues of Turkish paper-money; later the term ērāği nak-dıya took its place.

The first kāʾime appeared in 1840 and were manuscript. They bore interest at the rate of 12%, were to be accepted as money at the public banks and were current throughout the kingdom. They were replaced in 1842 by printed notes of a primitive style; the smaller notes bore no interest; the rate of interest for the others was reduced to 6% and at the same time the
circulation of paper-money was limited to the capital and its vicinity. The total of this first issue was not to exceed 60,000,000 piastres; but in a very few years, as a result of the wretched condition of Turkish finances, it was swollen enor-
nously and in 1862 calculated at approximately a milliard piastres. In this year, with the help of a foreign loan, the paper money was redeemed for 40% cash and 60% Turkish Consols (so-called consulidate) and made no longer legal tender.

In 1876 and 1877 the Porte found itself forced by the bankruptcy of the state and the outbreak of war with Russia to take refuge in paper-money for a second time. Kâime were issued for 1,000 million piastres, which, however, depreciated in a very short time and at the beginning of the 80's were called in along with the depreciated copper-money.

A third issue of a paper currency of a total value of 16,702,106,360 piastres dates from the world-war; it is still (1923) in circulation.

Mordtmann, Stambul und das moderne Turkentum (Leipzig 1878), p. 182 sqq.; Ed. Engelhardt, La Turquie et le Timuridat (Paris 1882), l. 72, ii. 258; Ch. Morawitz, Die Turkei im Spiegel ihrer Finanzen (Berlin 1903), passim; Tashwini Wazayi. [Turk. Gazette], Series i. year 1256 (1840/41), No. 206, 216, 217, 216; The Near East, No. 620 (of March 29, 1923), p. 328. — These books are in many points contradictory. The history of the Kâime has still to be written. (J. H. Mordtmann)

KAIN. [See Hamid]

AL-KAIN (B. Dârâ), usually Banu 'I-Kain or, with epsilon of the syllable â, Balqain, nishâ Kâine, or Arab tribe. The official Arabic genealogy gives its true name as al-No'mân b. Djar (see Wustenfeld, General Tabellen, Tab. 2, vo. 11 Duraid, al-Lâtikâ, ed. Wustenfeld, p. 317; Tâqiq al-Arâz, s. v. Kayren; Ibn Khallikân, Wafayât al-A'jlân, ed. de Sane, Article Wathâma b. Mára, about the middle; etc.) it therefore interpreted as originally a nickname and probably rightly — in Arabic, which means, as a name, "smith", "metal worker", "swordmaker", etc. (cf. Aram. šânu, šânu, "smith") and is in a wider application applied to artisans generally (for the meaning "slave", which the native lexicons also give and which Baethgen, Feügrife zur Semit. Religionstech., p. 152 uses for his deductions, I have no really certain reference). This might be derived from the Banu 'I-Kain having been at one time actually metalworkers, perhaps miners. Thus the Fethân b. Bali, who worked the celebrated Sulaiman or Fethân mine was also called Banu 'I-Kain, "sons of the smiths" or al-Kâime "the smiths"; see Yâkût, Muqaddim (ed. Wustenfeld), iii. 865 sq.; al-Bakri, Muqaddim (ed. Wustenfeld), p. 20 = Wustenfeld, Die Wohnsitze u. Wanderungen der Arab. Stämme, in Abh. d. Gesells. d. Wiss. zu Göttingen, xx. 112 (Noldeke wrongly refers this passage, Zeitschr. d. Deutsch. Morgenl. Gesellsch., xi. 131, note 6 to our Banu 'I-Kain); Sprenger, Die alte Geographie Arabiens, § 419 and 28, and Wustenfeld, Register zu den General Tabellen, p. 162. Our tribe, however, appears in the old poems and historical references to it to be in every respect a genuine Beduin tribe. The period of industrial activity of the Banu 'I-Kain would therefore have to be looked for in the very remote past (cf. Spenger, op. cit., § 420). Another explanation of the name Banu 'I-Kain seems to me to be not quite impossible. The names Banu and Banu 'I-Kain are used by the Beduin Arabs, who soon every kind of manual labourer, as terms of contempt; cf. the glossary to the Nâbihî Djarir wa l-Faradâshâ, under 'Kain, where Bevan gives about 60 references, all from the Nâbihî and al-Faradâshâ himself appears here 18 times as "Ibn al-Kâine" or "Ibn al-Kuyân", and his family three times as Banu 'I-Kain", cf. also Kain b. al-Kha-

About this time the tribe Banu 'I-Kain, ed. Kowalinski, Nr. 10, fi. Husein b. Thâbit, Dinân (ed. Hirschfeld), No. cxxii, 4; Hamâs al-Bahturi (ed. Cheikho), No. 1333, i. and Thîrinmâh, Dinân (ed. Krenkow, still going through the press), No. 19. s, It is therefore conceivable that in our case also, we have an original term of abuse, which has remained attached to the tribe.

The Banu 'I-Kain formed a branch of the great southern branch of the tribe of the Khazârene, who, in origin probably South Arabian, were settled in the historical period in the upper north, in Syria, in Mesopotamia and in the ïrak and to all appearance had gone over entirely or at least for the most part to Christianity there (see Wustenfeld, Tabellen, loc. cit.; Ibn Duraid, op. cit.; Ibn Kutaibah, Kit. al-Mulâiri, ed. Wustenfeld, p. 51; Ibn 'Abd Rabbihi, al-Kalâf al-Farîd, Cairo 1305, ii. 88, etc.). That the Slâh and following it the Liân al-Árab and the Tûqî al-Arâz, under 'Kain, and the schollion to al-Harî, Maqâmat, 2, p. 90 include them in the Banu 'Asad, is probably due simply to carelessness, to a confusion of Abd, who in the Arab genealogical scheme appears as the great-grandfather of our al-Kain (cf. again Wustenfeld, Tabellen, Tab. 2) with the eponymous hero of the great Mušr tribe of the Banu 'Asad. As foolish as it is to a statement that they had belonged to the Tamîl (Tûqî al-Arâz, loc. cit.). Their tribal area — corresponding roughly to Arabia Petraea — extended from the Sinai Peninsula along the Syrian frontier far into the land east of Jordan (cf. Wustenfeld, Register zu den general Tabellen, p. 371, where all is not quite correct; Sprenger, op. cit., § 420 sq.; Causin de Perceval, Ensay sur l'histoire des Arabes, ii. 324 sqq.; Noldeke, Über die Arab. Kultur u. einige andere Nachkommener der Israelet in Benfey's Orient u. Occident, ii. 635; al-Hamdânî, Qâsurat al-Árab, ed. Muller, p. 131 sq. = Sprenger, op. cit., § 32; 'Urwa b. al-Ward, ed. Noldeke, p. 32 = Hamâs al-Ábî Tâmmân, ed. Freytag, i. 228, Schol.; Agâmî, i. 124, al-Yâkûbi, Kit. al-Bulûd, in Bibl. Geogr. Arab., ed. de Goeje, vii. 326; Yâkût, op. cit., iii. 459, iv. 415; al-Wâkidî, ed. Maghâzî, abrev. transl. by Wellhausen, p. 315; Sprenger, Das Leben u. die Lehre des Propheten Muhammad, iii. 295; Ibn al-

In the poetry and tales of the
“battles of the Arabs” and of other events in olden times the Banu l-Kain appear in typical Beduin times with the tribes of Kalb (Hamásia, loc. cit., p. 77; Yākūt, loc. cit., iii. 241; Ibn al-Athir, loc. cit., i. 370; Ibn Sa‘d, Tabākāt, ed. Sachau, III/i. 27 sq. = Ibn al-Athir, Usl al-Ghamāh, ii. 224 = Ibn Ḥaddār, al-Jāba, ii. 45 = Sprenger, Das Leben u. die Lehre der Propheten Mohammed, i. 401, also Yākūt, op. cit., iv. 49); Bahrawī (al-Bahrawī, Futūḥ al-Balūd, ed. de Goeje, p. 283 = Ibn al-Fakhr, al-Balūd, in Bibl. Geogr. Arab., v. 182 sq.), Ghassān (Hamza al-Iṣbaḥānī, Tārīkh, ed. Gottwaldt, p. 121, where ḥānā‘ l-khayr bn should be read for ḥānā‘ l-khayr bn), Ghātafān (Aḥānī, ii. 194), etc. At Mu‘a‘, on the Yarmūk (Hieromax) and perhaps also at Fihl, they fought in alliance with other Kūfī tribes and the Lakhm and Dhu‘aym under the banner of the Byzantines, whose authority was recognised more or less by all the Arab tribes camped along the frontiers of Syria (Ibn Hisām, Sirā, ed. Wustenfeld, p. 792; al-Mas‘ūdī, op. cit., i. 161, 223; Nau, LXXI, i. 171; al-Jawharī, Futūḥ al-Shām, ed. Lees, i. 97, 114; Cauwius de Perceval, op. cit., iii. 212; Sprenger, Das Leben u. die Lehre, i. 292, note 2; Caetani, op. cit., II/i. 83, III/i. 206 etc.). In al-Ta’barī, op. cit., i. 1872 Sa‘īf b. ‘Omar says that the wave of apostacy which swept over almost all Arabia on the death of the Prophet, also affected the Banu l-Kain (cf. Cauwius de Perceval, op. cit., i. 345, 352 and Caetani, op. cit., II/i. 583, 585). From this statement it may be deduced that our tribe had become subject to the state of Medina while the Prophet was still alive; but it does not appear to me to be quite credible. In the civil war between Marwān I and ‘Abd Allāh b. al-Zubair we naturally find the Banu l-Kain as South Arabsians on the side of the former (al-Ta’barī, op. cit., ii. 478; al-Mas‘ūdī, al-Tanbih wa l-lithrā‘, in Bibl. Geogr. Arab., vii. 308, etc.) and on the occasion of the rising of Bahūl b. Bishr Khaṭārab in 119 = 737 we again find them in the pay of the Umayyads (al-Ta’barī, op. cit., ii. 1623 sq. and Ibn al-Athīr, al-Kāmil fi l-Tārīkh, v. 156). They again play a prominent part in the Damascus troubles of 176 (792) in the reign of Harūn al-Raśīd, in which they and Kaisīs (Nisārīs) fought against the other Yemenis (Ibn al-Athīr, op. cit., vi. 87 sq.). They then disappear from our knowledge.

According to Nawāsīn’s Shams al-‘Ulamā’ Lūkānān was a slave of the Banu-l-Kain, who flourished about 600 a. d. (see Guidi, Tabāl αλφάμ, υπό Kιταβ al-Aspā, p. 417; Ibn Ḥaṭib, Kita’b al-Shārī‘ wa l-Shu‘ārā‘, ed. de Goeje, p. 229 sq.; Ibn Duraq, op. cit., p. 317; Ibn Khallikān, Wafayat al-‘Uyūn, Bulāq 1299, i. 18 and Hamāsā, loc. cit., p. 558; — wrongly in Wustenfeld, Genealog. Tabālām, Tab. 2, 24 and Register, p. 441, who has misunderstood the passage in the Hamāsā).

H. Ewald (Gesch. d. Volkes Israel, i. 337) has with all reserve connected the Old Testament Kayin (Kain) (see Kayin) with the Kainites (Kain, Kp, ‘Hm) with our Kain. Nüccoli has followed him at first only as a possible hypothesis but later, with more confidence (Über die Amalekiter, op. cit., p. 634 sq., Zöllner, d. Deutch. Morgenl. Gelehr. XL, 181 and in Cheyne and Black’s Encycl. Bibl., i. 130. The Kainites were settled in the south of Palestine in the ancient Negeb, the later Idumaea, this would actually be the region where we find the Yathrib. Besides, the Kainites were obviously nomads like the Balkain (Stade, Zittsch., d. Allt. d. alttest. Apost. Wiss., xxv. 287 and Sayce, Early Israel and the Surrou. Nations, p. 91 sqq., and do in Hasting’s Dict. of the Bible, s. v. Kainites recognise in them the name — see above — a tribe of smiths; but they fail to give their readers any postulate that they were such in historical times. Stade’s identification, following Wellhausen, Die Komposition des Hexateuchs, p. 309, of the Kainites with Cain, the brother of Abel, op. cit., p. 285 sqq., which Ed. Meyer, Die Israeliten und ihre Nachbarn, p. 395 sqq., Procksch, Die Völker Altertums, Vol. I, p. 2 of Das Land der Bibel, p. 37 etc. have adopted, I consider, with Noldeke, Encycl. Bibl., loc. cit., very problematic). But the two coincidences mentioned do not yet justify us in identifying the Kainites with the Balkain. The Kainites disappear from literature with the Exile (with the exception of the Rēḥābītes, whose inclusion in the Kayin is, however, not absolutely certain). They may nevertheless have continued to exist. But that so small a clan, which never appears as completely autonomous in the Old Testament should have continued to exist for a millennium after the Exile and at the end of this period still possess considerable strength and prosperity, — even as the result of incorporating other tribes — I consider a very daring assumption. The name Kain besides was obviously not at all a rare one (see Wustenfeld, Register zu den Genz. Tabellen, p. 371, Lizdharski, Handbuch der nordiszeitlichen Epigraphik, p. 362, also Lkk., Zur Entstehung d. thum. Inschriften, p. 45). Cf. thereon Ed. Meyer, op. cit., p. 399.

(K. Fischer)

KAINUKĀ (BANU‘), one of the three Jewish tribes of Yathrib. The name differs from the usual forms of Arabic proper names but at the same time has nothing Hebrew about its type. Nothing certain is known regarding their immigration into Yathrib. They possessed no land there but lived by trading. That their personal names known to us are not of the most part Arabic says as little regarding their origin as the occurrence of Biblical names among them. But there seem to be no valid reasons for doubting their Jewish origin.

In Yathrib they lived in the south-west part of the town, near the Muyallā and close to the bridge over the Wādī Bahrān, where they occupied two of the castles (ṣāfīm), characteristic of Yathrib. They practised the goldsmith’s art among other trades; al-Bukhārī (Fard al-Khum, Bāb I) incidentally mentions a goldsmith of the Kainukā. On their expulsion they left behind them arms and tools, which were divided among the Muslims after Muhammad had received his fifth share. The number of their fully equipped fighting men varies in the references to it between 400 and 750.
After the dominating power in the old Yahrib had passed from the Jews to the Bani Ka'b, the Kainukā were in alliance with the Khazraj [q. v.]. In Muhammad's settlement of the relations of believers and other sections of the community they are not mentioned by the name of their tribe any more than the Nadr [q. v.] and Kuraiz[a] [q. v.]." but are described as "Jews of the Nadrā, Hārūkh, Sā'da and Djiham" [articles 26—29] i.e. allies of different subdivisions of the Khazraj.

After the battle of Badr (Ramadan 2 H. = March 624) Muhammad's relations with the Jews of Medina became troubled. The Jews as a body had adopted an unfriendly attitude to the Prophet. From the religious point of view therefore they became inconvenient; and from the political side, as a powerful foreign body within the just converted town, they were a great danger. When Muhammad felt his position strengthened by the battle of Badr, the idea of expelling his enemies must soon have entered his head. The Kainukā as they lived in the city itself, were those he wished to be rid of first. With this description of the situation, his attack on the Kainukā (in all probability as early as Shawwal 2 H. = April 624) is sufficiently explained. What the Muslim writers give as special reasons for the attack has hardly more than anecdotal value. Sometimes it is said to have been a jest that a Muslim made to a Jewish woman, sometimes the Kainukā are said to have behaved with particular arrogance. Sūra iii. 10 sqq. and viii. 60 sqq. are said to refer to these incidents. Sūra iii. 11 refers to the victory at Badr as an example and warning, and viii. 60 speaks of vengeance as people, from whom treachery is feared.

After a fourteen days' siege, the Kainukā surrendered without striking a blow; the men were bound and seemed to have to fear the worst. The energetic intervention of 'Abd Allah b. Ubayy, chief of the Khazraj and leader of the Munāfi- Kenneth, however, affected an amelioration of their lot. They departed first to the Jewish colonies in the Wādi 'l-Kūrā, north of Medina, and from there they went to Adhrā`īt in Syria.

AL-KAIRĀWĀN (French Kairouan) a town in Tunisia, 112 miles south of Tunis and 40 west of Susa to which it is joined by a railway; it lies in 35° 40' N. Lat. and 10° 2' E. Long. (Greenwich). The population in 1910 was 22,000 including 800 foreigners of whom 500 were French.

Kairawan lies 250 feet above sea-level in the middle of a great plain traversed by the Wādi Zerūd and the Wādi Marguellil, which ultimately disappear in sebkhas or salt lakes. These rivers are subject to sudden floods, which sometimes transform the environs of the town into a lake extending up to the foot of the walls. When the rains have been sufficiently abundant, the soil yields a rich harvest; al-Bakrī mentions that in the western part called "Pahṣ al-Darrāra", the grain sown is sometimes returned a hundredfold. But usually the ground, lacking trees or herbaceous vegetation, and covered with salt efflorescence, gives the country a desert appearance. The temperature shows considerable variations (24.8° in winter and 120.2° in summer). The rainfall is not heavy (14.5 inches per annum) and therefore running waters and springs are scarce, so that the inhabitants have to use cisterns to collect their drinking-water.

Kairwan really consists of two towns, the city proper surrounded by a battlemented wall of brick, flanked with buttresses and round towers as well as a qāṣa, 3350 yards round, and secondly a vast faubourg stretching to N. and N.W., the faubourg of the Zias (Qīlās) so called from the popular name of the tribe occupying the neighbouring country. To the south finally there has grown up a little European quarter. The interior of the town is a network of narrow and tortuous streets. Commerce and industry are fairly busy, although Kairwan has lost much of its economic importance. The principal industries, which, it may be added, are of the nature of home-industries, are the manufacture of carpets, which occupies a thousand looms and that of woolen blankets. The working of leather (saddle-making, shoe-making) for which the artisans of Kairwan were at one time very famous, and that of copper, are still followed by several hundred workers. The importance of Kairwan in the past is particularly shown by the number of religious edifices to be seen in it. The principal is the great mosque of Sidi ʿOṯkā, one of the largest buildings in North Africa, the foundation of which dates back to that of the city itself. Among the others may be mentioned the Mosque of Sidi Sāḥib (vulgo ʿṢahab, Mosque of the Barber) dating from the first century A. H., but rebuilt and extended in the xvith century A. D. the mosque of the Three Gates (Djāmilīa Thiba Bišām), contemporaneous with the preceding, the Madrasa Sidi ʿAbīd al-Gharyānī (xvith century A. D.), the Mosque of the Sabres (Djāmilī Amār Abba), finished in 1871. The oldest mosques, for the building of which were used materials from Hadrumetum (Susa) and even from Carthage, show an interesting mixture of Byzantine and Oriental influences. The latter are clearly seen in the decorative motifs (faience, woodwork) analogous to those of Tirās and Baghdad. The more recent buildings show examples, sometimes remarkable, of wooden ceilings in compartments, arabesques cut in plaster showing Hispano-Moorish inspiration. We may add that the buildings of the xvith and xvinth centuries often reveal the intervention of European architects and workmen, especially Italians.

History: The foundation of Kairawan dates from the Arab conquest. The town was in fact built by ʿOṯkā b. Nāf in 59 (670) to give his troops a base of operations and depot for supplies and also to keep in awe the Berber tribes. "I intend," the historian al-Nuwairī makes him say, "to build a town which can serve as a depot of arms (Kairawān) for Islam to the end of time" (al-Nuwairī in Ibn Khaldūn, Hist. des Berbères, transl.
Kairwan was built on — or very near — the site of a small Roman town called Kāmidāh or Kammūnīa, the materials of which were used by the Arabs. The site of the new town, two days' journey from the shore, had been chosen to put the Muslims out of danger from an attack by the Byzantines, who still held the towns on the coast. 'O większość first of all built a mosque, the palace of the government, then houses for his soldiers as well as a wall 2750 yards long. Legend was not long in embellishing this foundation with marvellous tales. The site of Kairwan was, it was related, covered with imperishable thickets inhabited by deer and reptiles which disappeared at 'Oência's command. A vision revealed to the conqueror the exact position of the ḥabl and of the miḥrāb of the mosque, and the existence of a spring indispensable for the inhabitants, etc. The buildings were hardly completed when 'Oência was disdained and called back to the East (55 = 675). His successor Dinār Abu l-Muhādīj hastened to destroy Kairwan and built a new town called Takroun or Takrīn two miles to the North. Restored to the favour of the Caliph and sent back to Africa, 'Oência rebuilt Kairwan on the original site.

Kairwan was henceforth the capital of Muslim Africa and the residence of the Arab governors, but during the century which followed the death of 'Oência it had to submit to numerous vicissitudes. After the rising of Kusā'il it was occupied by the Berbers and remained for four years in their power (64 = 684 — 688). During the Khārijī rising it was taken and pillaged by the Wafārdjīma (159 = 756 — 757), who committed such excesses there that the population scattered over the surrounding country. At the end of fourteen months, the Abādī Abu l-Khaḍījīq [q. v.], chief of the Hūvarā [q. v.], drove out the Wafārdjīma and entrusted the government of the town to 'Abd al-Ra'yān b. Rūstam [q. v.] (145 = 758/9). In 145 = 762/3 Ibn Aḥbāṣ was victorious over the Khārijīs and re-established the seat of the government at Kairwan. He endeavoured to repair the damage done by the Berbers, and to protect the town from a new attack he surrounded it with a wall of brick, 12 cubits thick. These precautions did not, however, prevent the Abādī tribes under the command of Abū Ḥātim [q. v.] from laying siege to Kairwan (154 = 771) in which the governor 'Omar b. Ḥaṣāf, who had escaped from Ṭobna, was shut up. After the death of 'Omar, who had been killed during the siege, his successor Dīmāl (or Hamīd) b. Šakr capitulated and opened the gates to the enemy. There were, however, no massacres. The inhabitants were allowed to go free, and content to demolish the fortifications. The Khārijī occupation was of short duration. By 155 = 772, 'Abd b. Ḥātim, victorious over the heretics, had taken Kairwan again. He rebuilt the great mosque, had bazaars built for each trade-guild and earned the title of second founder of the city (al-Nu'wair).

Under the Aghlabīds (800-999 A. D.) Kairwan underwent considerable expansion and reached the zenith of its prosperity. The princes of the dynasty vied with each other in enriching the town with rich monuments and multiplied the works of public utility. Ziyādāt Allāh I and Ibrahīm built waterworks and cisterns to secure the town's supply of drinking water, for the reservoirs built for the purpose in the time of the Caliph Hishām had become insufficient. "The largest and most useful of these reservoirs", says al-Bakrī, "is circular in form and of enormous size. In the centre rises an octagonal tower covered by a pavilion with four doors. A long series of arcades of arches resting one upon the other ends on the south side of this reservoir". These waterworks have not completely disappeared and one of the reservoirs restored by French engineers is still called the "reservoir of the Aghlabīds". The great mosque was rebuilt from top to bottom. The primitive edifice built by 'Oência had already been destroyed by Ḥasan b. al-Numān [q. v.] who had rebuilt it and adorned it with pillars of marble which, without doubt, came from the ruins of Carthage. Soon becoming too small, the mosque was again enlarged in 105 = 723/724, then entirely rebuilt with the exception of the miḥrāb in the time of Yazīd b. Ḥātim (155 = 772). Ziyādāt Allāh I in his time had the whole building taken down including the miḥrāb, which was enclosed between two walls so as to be preserved without being seen except through a narrow grill, and replaced it by the present mosque. According to al-Bakrī, 80,000 mithqāls (about £320,000) were expended on this work. Ibrahīm b. Aḥmad completed the work of Ziyādāt Allāh; he lengthened the principal building and built above the nave shutting on the miḥrāb a cupola called Khabat Bīb al-Baww (the cupola of the gate of the pavilion), 220 cubits long, 150 broad, divided into 17 naves by 414 columns, the great mosque could rival the most famous monuments of the East. Other religious buildings restored in the same period also claimed the attention of visitors, like the Mosque of the Three Gates, the Mosque of Sidī Ṣāḥib (Mosque of the Barber), the Mosque of the Anṣār, which according to the legend was built even before the arrival of 'Oência by one of the companions of the Prophet, Ruiwāfī b. Ṭāhibīt, and the Mosque of Ismā'īl b. ʿOibād al-Anṣārī.

Outside the town rose the royal residences, Kāṣr al-Kadīm and al-Raḳīdā. Kāṣr al-Kadīm, also called al-ʿAbbāṣiyā, was built in 184 = 800, 3 miles S. E. of Kairwan by Ibrahīm b. Aḥlabī, who settled there under the protection of his negro guard and made it the seat of government. It is the "Castle of the Moat", where were received the ambassadors of Charlemagne. Around the palace there grew up a town provided with baths, caravanserais and bazaars and surrounded by a wall with five gates. Al-Bakrī mentions in it a mosque flanked by a cylindrical minaret ornamented with seven tiers of columns. Some distance off was another castle called Banū Ṣafā. Al-Raḳīdā, four miles S. W., was a creation of Ibrahīm b. Aḥmad (265 = 876/877). This prince built here in a place celebrated for the purity of its air, a castle around which grew up an important town with bazaars and baths. It measured 24,000 cubits in circumference but enclosed large areas filled with parks and gardens.

A venerated sanctuary and capital of a powerful state, Kairwan was also a great commercial city. The shops of the merchants stood on either side of a covered street about two miles in length. It was also a city of learning. The teaching of Ḍaṭhātī law was particularly honoured. Celebrated professors like Asād b. al-Furāṭ [q. v.], Ibn Rashīd
and Şahîn had numerous pupils there. The teaching of medicine was equally flourishing. The Jew ʿIsḥāq b. Imrān, physician to Ziyādat Allāh II and his pupil ʿIsḥāq b. Sulaymān founded a regular school there.

This prosperity did not end with the Aghlabid dynasty; it continued under the Fātimids and the early Zirids, although the Mahdi ʿUbayd Allāh, after living some time at Raʾil Ḫāda, had moved the seat of government to al-Mahdiya. The town suffered a great deal, however, from the revolt of Abū Yazīd [q.v.], "the man with the ass." The Nakkāris captured it in 333 = 944 and pillaged it in spite of the appeals of the notables and scholars who had come to implore the clemency of the conqueror. But in 334 = 946, the Caliph Ismāʿīl retook Kairwan and after having defended the Khāṭrigūs built some distance away the town of Sabra to which he gave the name of al-Manṣūriyya, in memory of his victory over Abū Yazīd, and in which he established his residence (337 = 949). His successor al-Muʿizz moved to al-Manṣūriyya the headquaters and factories of Kairwan to the great dissatisfaction of the inhabitants.

The new town was surrounded by a wall with five gates of which the principal, Ṭātāf al-Fatūḥ (gate of conquest) was used by the sovereign when he took the field at the head of his army. The town of Raʾil Ḫāda on the other hand abandoned by its inhabitants and half destroyed by the Nakkāris was razed to the ground. The gardens alone were spared. During all this period Kairwan and al-Manṣūriyya still had a very active economic life. The manufacture of carpets, of woollen and cotton goods flourished there. Cultivated land and orchards extended round the town. The wealth of the inhabitants is evidenced by the fact that the agents of the Fātimids were able to exact from them 400,000 dinars on a single occasion. According to al-Bakrī, the taxes levied each day at one of the gates of al-Manṣūriyya amounted to 26,000 dirhems (about £ 600). The people of Kairwan, however, complained of the tyranny of the Fātimids and the bulk of them remained attached to orthodox. Their hostility showed itself in serious bloodshed under the earlier Zirids. In 407 (1017–18) 3,000 Shiʿis were massacred in a rising and the town of al-Manṣūriyya was pillaged by the populace. Al-Muʿizz's break with the Fātimids was therefore received with enthusiasm by the people of Kairwan.

This act of rebellion let loose on Ifriqiya the Hilālī invasion of which Kairwan very soon felt the disastrous results. After the defeat of Haiderān, al-Muʿizz ordered his soldiers to evacuate the town; they sacked it first of all and he withdrew to al-Manṣūriyya. He then rebuilt the walls of Kairwan on a length of 22,000 cubits and joined Kairwan to al-Manṣūriyya by two walls half a mile apart (444 = 1052). In spite of these precautions the attacks of the Hilālīs became more and more serious. Kairwan was abandoned by a part of the population and in 449 = 1057, al-Muʿizz decided to evacuate al-Manṣūriyya and retire to al-Mahdiya. The Arabs then entered the town and wrought the most frightful havoc. "They destroyed all the beauty and all the splendour of the monuments of Kairwan. Nothing that the Şahînīs princes had left in their palaces escaped the greed of the brigands. All that there was in the town was carried off or destroyed," ( Ibn Khaldūn, Hist. des Berbères, transl. de Slane, i. 37). The inhabitants were scattered in all directions, "some went to Egypt, others to Sicily and Spain; a considerable body to Fās." (ʿAbd al-Wāḥīd al-Maʿrūkūshī al-Maʾṣūrī Ṭābilī al-Maṣḥūrī, ed. Dozy, ii. 259).

The capital of Ifriqiya never recovered from this disaster. Pillaged again in 1060 by the Huwārīs, its possession disputed between the Zirids and the governor, the ʿAml Ibn Mānūnī, who tried to set up in it for his own benefit an independent principality with the support of the Ḥamānīs, Kairwan remained under the domination of the Arabs and defenceless against the exactions of the nomads. "The latter levy contributions on everything; the inhabitants are few in number, their trade and industries in a miserable condition" (al-Idrīsī, transl. de Goeje, p. 129). Stayed for a time in the reign of ʿAbd al-Muʿṣīnī, who restored the town in part, its decline continued its rapid course under his successors and under the Ḥafsids as a result of the continued troubles of Ifriqiya was the theatre. At the end of the xvith century A.D. the town was almost deserted; its only inhabitants were the peasants who sought shelter there. It was gradually repopulated, but it was still very wretched at the beginning of the xvith century A.D. "The inhabitants," writes Leo Africanus who visited Kairwan in 922 (1516), "are at present all poor artisans, of whom some are curriers of the skins of sheep and goats, the others furriers whose handiwork is sold in the cities of Numidia, where no European cloth is to be had. But of all these trades there is not one which is able to make a good livelihood and those who follow them live a miserable existence and are in very great poverty." Ill-treated by the rulers of Tunis, the people of Kairwan were in an almost continual state of revolt. They even definitely threw off the authority of the Ḥafsids when the latter had accepted the Spanish protectorate after the capture of Tunis by Charles V in 1535 and recognized as chief the Marabout Sīdī ʿArīf of the tribe of Shāhība. In spite of the Spaniards Mulây Ḥasan could not dispose of this pretender, who was supported by the Arab tribes and the Turks of the corsair Dragut. His successor ʿAlī ʿĀlibī was no more fortunate. Under Turkish rule Kairwan felt the repercussion of all the troubles of the xvith century A.D. In 1701 the Bey Murād, to punish a rising of the inhabitants, destroyed the walls and the houses and only left the mosques and zāwiyas standing. On the other hand Ḥusain b. ʿAlī, founder of the Ḥusainid dynasty made great efforts to raise Kairwan from its ruins. He reconstructed the fortified wall round it and restored over fifty mosques, according to the author of the chronicle al-Maṭrār al-Mālikī (French transl. by V. Serres and Muḥammad Lasram, Tunis 1900). He had a "bardo" there, where he used to stay while his troops were going through the Djerid to collect the taxes. The inhabitants showed their gratitude to the Bey by supporting him vigorously against his nephew ʿAlī ʿĀsha, who could only capture Kairwan, where ʿAlī Ḥasān had taken refuge after a five years' siege (1735–1740). The town was once more razed by the victor, but it was rebuilt and, according to Desfontaines, was in 1784 "the largest town of the kingdom next to Tunis and even better built and less filthy than it".
Trade and industry were quite busy there and the people were exempt from taxes in return for the fidelity of their ancestors to the Bey Husain. Kairwan had also preserved its character as a place of sanctity and the inhabitants were very hostile to Christians. Very few Europeans, among whom were Peyssonnel, Shaw and Desfontaines had been able to visit the town. The fanaticism of the inhabitants persisted down to the end of the sixteenth century. After the signing of the treaty of Bardo (1881) which placed Tunisia under the protectorate of France, Kairwan was one of the centres of native resistance. To put an end to this, three columns under the supreme command of General Saussier set out from Tebessa, Tunis and Susa and united before the walls of the town. It was occupied without fighting on October 29, 1881.

KAIS, a little island in the Persian Gulf, in that part of it which the mediaeval Arab geographers call the "sea of Omáin" in 54° E. Long. (Greenw.) and 26° 50' N. Lat. Kais, which next to Kishm [q. v.] may now very well be considered the most important of the Persian islands of the Gulf, is about 10 miles long and five broad; it is separated from the mainland by a strait about 12 miles wide, which affords a very secure passage. Apart from a few rocky places, the island is quite flat; it is better cultivated than most of the islands of the Persian Gulf. The mediaeval Arab and Persian geographers make special mention of its prosperous condition, noting particularly its wealth in trees (mainly date-palms) and refer to the cultivated fields, gardens and cisterns. Besides agriculture, navigation and trade, the then fairly numerous population of the island was also engaged in the pearl-fishery; for the latter see the remarks in Ibn Khuradhdhibh, Yākūt, al-Dimashqī, Iḥād Allāh Mustawfi and Ibn Baiṭūja [op. cit.]

The name Kais is an Arabicised form of the Persian Kīs (the form Kīs is also found; see al-Dimashqī, *op. cit.*). In the Portuguese and Dutch authors of the xvth and xviith centuries we find forms like QUSI, QUES, CAEZ or QUECHE, QAS, GUES etc.; cf. Vincent and Tomasek, *op. cit.*. Arab authors (on the other hand Schäffli, *op. cit.*, p. 150) can be maintained. Could Kenna, the Khain of Ibn Khuradhdhibh (p. 62, 1), be the earlier name of another island near Kais, perhaps of the island of Farūr (east of Kais)?: See Schwarz, Iran, etc., p. 87. The circumstance that an Arab prince named Kais b. 'Umarra took possession of the island of Kish — it was henceforth occasionally called Dżazirat Kais b. 'Umarra or Bani 'Umarra, see Yākūt, i. 503; ii. 711, 8 — may have affected the arabisation of the old name. The latter itself does not, however, date only from the Arab chief just mentioned, as Ibn al-Balkhi, *op. cit.*, thinks, but goes back into the pre-Muḥāammadan period, for we find Kish already mentioned in the Sassanian period, as one of the seven bishoprics of the Nestorian ecclesiastical province of Perzis; for this reference to Kish about the middle of the sixth century in Syriac literature, see Guidi in the Zeitschr. d. Deutsch. Gesellsch., xlix. 413; Chabot, *Synodicon orientale* (Paris 1902), p. 680; Sachau, *Zur Ausbreitung des Christentums in der Persien* (= Abh. der Berlin. Akad., 1919, Nr. 1), p. 38. In the Historiae Samaritanae, *op. cit.*, the classical literature the island is only twice mentioned: in Arrian's *Indica* (37, 8) under the form Kardin and in Pliny (*Nat. Hist.*, vi. 110) as Aphrodiasia; cf. Vincent, *op. cit.*, Ritter, viii. 774, xii. 458 and Pauly-Wissowa, *Realens. der klass. Altertumswiss.*, i. 2727 (s. v. Aphrodiasia, No. 7) and x. 2462 (Karim). Perhaps we have in a Karin or a Kar the prototype of Kish (Kish).

In the Muḥāammadan period, Kais formed a part of the province of Ardaghir Kharrā in Fars. It was only in the later middle ages that the town attained greater importance, when, as already mentioned, a prince of South Arabian origin captured it, built a fleet there and gradually began to extend his power. After the capture of Shirāft, which then enjoyed great prosperity as the main staple of the Persian-Indian-Chinese trade, the Arab dynasty of Kais rose under the last Būyids in the first half of the xth (xii) century to unlimited control of the whole Persian Gulf. This Shirāft, which was previously often regarded wrongly as a town on the coast near the island of Kais — actually confused with Kais by Ibn Baiṭūja (ii. 244, 3) — lay much further to the north; the ruins of this famous commercial
centre are near the village of Tāḥrift (north of Rās Nīḥbend, in 27° 40' N. Lat. and 52° 30' E. Long. Greenwich; cf. Schwarz, op. cit., p. 59 sq. and the article sīrāf). Sirāf gradually became more and more deserted under the suzerainty of the princes of Kāis, as they diverted the very consider- able trade and shipping from the captured Persian seaport to their own island. They also extended their sway over several other districts of the mainland opposite the island of Kāis. Their predecessors in the occupation of this strip of land had been a South Arabian tribe, the Bānū 'U- mārā; cf. their territory, the so-called Sīf 'Umārah (the 'Umārah-coast), Schwarz, op. cit., p. 77 sq. 76. In the little town of Ḥūzū there, a little dynasty of a family of the Bānū 'Umārā, of whom coins still survive, ruled before the coming of the ruling house of Kāis; cf. v. Bergmann in the Nasim. Zeitchr. (Vienna), viii. 38—39 and Tiesenhausen in the Revue, N. S., Belge, 1857, p. 337; Ḥūzū (probably the modern Gīrū) and Sāwīyā (reading uncertain, probably the modern Tāwūnāh), both almost opposite Kāis (in the N.W. or N.E. of it), were the most important ports of the inland-rulers on the mainland. On Ḥūzū and Sāwīyā see Ibn al-Balkhī, Fārsīnām, p. 141; Ḥamd Allāh Mustawfī, Nuzhat al-Khitūbī, text p. 120, transl. p. 118; G. le Strange, The Land of the Eastern Caliphate, p. 257. A caravan route from Sirāf ended in Ḥūzū, the more important of these two towns; cf. Ḥamd Allāh Mustawfī, p. 185, 16, 186, 7. The same author (p. 171, 179, 184, 5, 186, 11 sq.) also gives the routes and distances from Kāis to Baṣra, to Sulṭānīya and to the islands of Sarandīb (Ceylon) via Ḥormūz. Most of the smaller islands near Kāis likewise became sub- ject to the rulers of the latter, for example Dījkāsak (probably the modern Lārēk in the strait of Ḥormūz), where, according to Yākūt ii. 9, 7, the “king” of Kāis maintained a garrison celebrated for its sea- mateship; see also Dījkāsak, i. 1025. At its period of greatest power, the dynasty of Kāis also ruled over the opposite coast on the Arabian side (district of Ḫūmān), where they are called by Yākūt and al-Dīmāḡī “the lords of Ḫūmān.” The journey of the Rabbi Benjamin of Tudela falls within the period of Kāis’s prosperity (second half of the twelfth century). He notes with admiration the rich market of the island, whose chief business consisted in the exchange of Indian and Persian manufactures and produce; see the edition of the Itinerary of Benjamin of Tudela by Grünhut (transl. Jerusalem 1903), p. 77 sq. The Jewish traveller wrongly gives the island, which he calls Kīsh, much too large an area; but there can be no doubt that he refers not to Kīshm (so Grünhut, op. cit., and Asher in his edition, ii. 175 sq.), but to our Kāis. Benjamin of Tudela says that there were 500 Jewish families settled on the island. There must, of course, have also been a number of Persians living there. The bulk of the inhabitants, however, in the middle ages (as it is still the case to-day) were not Persians but Arabs who were the chief settlers on most of the islands of the Persian side of the Gulf. The Venetian Marco Polo (Travels, Book i. Chap. 7, iii. Chap. 44) of the second half of the xiiith century knows Kāis under the name Kīsh (in Ital. orthography: Chisi) as a place of call for ships sailing from Babylon to India. The decline of Kāis was caused by the com- mercial rise of the little kingdom of Ḥomūz [q. v.], also under an Arab dynasty. Even under the Sālīdāk prince Malīk Dīnār of Kermān (582—591 = 1186—1194) the ruler of Kāis of that time had vainly endeavoured to get Ḥormūz on the mainland from the latter in return for a yearly tribute; see Muḥammad ibn Rūshd, Tawārikh Al Sālīdākī, ed. Houtsma, Leiden 1886, p. 160, 5 sq.; Zeitchr. d. Deutsch. Morgenl. Gesellschaft, xxix. 395. Further information on the relations of Kāis with Ḥormūz is given in the Relazioni (1616) of the Portuguese Teixeira; the book contains from a Persian source a fairly full history of the kingdom of Ḥormūz; see W. F. Sinclair, The Travels of F. Teixeira, (= Hakluyt Society, Ser. 2, vol. ix., London 1902), p. 161 sq., 169 sq., 183 sq., 259 sq. and cf. Schwarz in the Zeitschr. der Deutsch. Morgenl. Ges., lxviii. 531 sq. and Ḥormūz, ii. 325 sq. According to Teixeira (op. cit., lxviii. 534; cf. Ritter, viii. 777) about 750 (1300) the then king of Ḥormūz obtained from Nūṣā’īm of Kāis by purchase the island of Djarānī which lay opposite his capital. A few years later, he moved his residence to this island, which offered more protection; cf. above i. 694 sq., ii. 325 sq.). This New-Ḥormūz, thanks to its favourable position near the narrowest part of the Gulf, soon began to compete vigorously with the rulers of Kāis and attracted more and more of the trade with India to itself. This led to long wars and feuds between the two kingdoms, which filled a great part of their history. For a time Kāis was actually under Ḥormūz. In the end Kāis completely lost its previous dominating position as the chief emporium of the Persian Gulf. Ḥormūz now took its place and from the tenth century to its capture by Shāh ‘Abbās I in 1622 formed a great centre of international commerce. Its place was in turn taken by Bendar ‘Abbāsī [q. v.], which had to give pride of place to Būšīr [q. v.] after the middle of the xviiith century; the latter is now the most important trading port on the Persian Gulf. In the latter middle ages the commercial centre of gravity within the Persian Gulf thus gradually shifted from north to south (Sirāf-Kāis-Hormūz) and returned in modern times to the north, although less adapted by nature. We know little of the later history of Kāis. When the islanders became dissatisfied with their rulers, they finally called in the help of the governor of Sirāf and as a result of his intervention Kāis became permanently incorporated in Persia. According to Schlafli, who spent 14 days on the island in 1862, there are 8 little settlements on it; he estimated the number of the inhabitants (Arabs and 1/10 Susahe negro slaves) at 2500—5000.

As to the connection between al-Kaïs and the frequent personal and not uncommon tribal name Kaïs (see Wüstenfeld, *Register zu den General Tabellen der arabis. Stämme u. Familien*; the indices to Ibn Duraid, *al-ʿIltikāf*; ed. Wüstenfeld, al-Taṭari, *Taṭarik*, ed. de Goeje, Caetani, *Annali dell’ Islam*, ii. ii. and vi., *Nabat. Dżastr wa l-ʿFarasād*, ed. Bevan; Gualdi, *Tabul. alphabet. d. Kitāb al-ʿAsnī*, s. e., etc., and note also the cabalistic personnal name *Nabūt* Lidzbarski, *op. cit.*, p. 363 and Cook, *op. cit.*, p. 104), as well as the personal name ‘Abd Kaïs (Nāḏrī yu’l-lāhī) and *Dżastr wa l-ʿFarasād*, Indices, s. v.; Ibn Duraid, *op. cit.*, p. 138, 275; Wüstenfeld, *Register*, p. 30; Ibn al-ʿAthir, *Usd al-Ǧābīa*, i. 137; Ibn Ḥadjar, *Iṣbā*, i. 987; no definite statement can be made. But at any rate we should not, as has always been done hitherto, overlook the fact that Kaïs always has the article (which the Nabat. *Nabūt* also shows) in the nevertheless in all probability theophoric form Imru’ al-Kaïs as well as in the tribal name ‘Abd al-Kaïs, while in the personal and tribal name Kaïs and in the personal name ‘Abd Kaïs it is as regularly found without the article. (That the poet ‘Abd Kaïs b. Khuṭaf, *Aghānī*, i. 165, *Hamāsa*, loc. cit., p. 352 and *Liṣān al-ʿArab*, ii. 206 appears as ‘Abd al-Kaïs b. Khuṭaf may be due to an error; see Muskhādiyya, *al-Layl*, Nl. xcvii. sq., ed. Cairo, ii. 85 sq. and Aghānī, vii. 148, 152 sq.). I would consider Kaïs, as opposed to the god’s name al-Kaïs, as a simple personal name. Wellhausen sees in it the god’s name before which the concept ‘Abd has disappeared (op. cit., p. 8). But he does not tell us why in this contraction the article of the name of the god should also have been dropped. W. Robertson Smith (Kinship and Marriage in Early Arabia, p. 239) had practically anticipated Wellhausen.

Halevy (*Essai sur les inscriptions du Soudan, in the Journal asiatique, 1882*, p. 321, Wellhausen (*loc. cit.*, p. 67) and Gotthelf (*On Nāḏrī m. Nūḥ & Nūḥ*, *Journal of Bibl. Literature*, xvii. 200) have identified our deity with the Edomite god Kaïs, Kōs, Kaush or Kōsh (on the latter see especially Schrader,
Die Keilschriften und das Alte Testament, 3rd edition, revised by Zimmern and Winckler, p. 472 sq. and W. Robertson Smith, op. cit., p. 31). I consider the identity of the two to be exceedingly improbable. The comparisons of Kais with another Edomite god, the Keš of Josephus, are, of course, utterly untenable (Keš = Arab. Kasaḥ, see Wellhausen, op. cit., p. 67, St. 51 sq. and 75 sq.; Zimmern, d. Deutsch, Morgenl. Gesetzleh., xli. 1714; Lagarde, Symmica, i. 121, note 1; Gotthell, op. cit., p. 201, etc. and cf. Thamud. and Nabat. d. Morgenl. Zeitgesch., zur Entstehung der chamudischen Inschriften, in Mitt. d. Vorderasiat. Gesellsch., 1904, i. 46; Lidzbarski, op. cit., p. 362; Cook, op. cit., p. 104), as well as the identification with the Nabataean χας (on this cf. Lidzbarski, op. cit., p. 364; Cook, op. cit., p. 105), with the Semitic deity (χας) Kānas (on this see Drexler, in W. Roscher’s Ausführliche Lexikon der griech. u. röm. Mythologie, Col. 970 sqq.) and with χας Nahum, i. De Vogüé, Syrie Centrale, Inscriptions sémitégiques, p. 105; H. Derenburg, Le poste antislamique Ilmnough ‘I-Kais et le dieu arabe al-Kais, in Bibliothèque de l’École des Hautes Études, Sciences religieuses, Vol. vii.: Études de critique et d’histoire, 2nd Series, p. 122; Gotthell, loc. cit., p. 201 sqq. etc.) On the other hand the name Kais perhaps appears in χας (Seeptug, Kais) i. Sam., ix. 1, 3 etc. and the appellative Kais in χας (Seeptug., Cod. Vat. Koaçu, Cod. Alex. Koaçu) i. Chron, vi. 29 = χας (to be read χας; Seeptug., Cod. Vat. Koaçu, Cod. Alex. and Luc. Koaçu) i. Chron., xv. 17.

Kais’Allān (Kais’Allān, one of the largest and most powerful tribal groups of northern Arabia in ancient times. Name. For Kais’Allān we often find also Kais b. Allān, most frequently Kais alone (in the poetry occasionally also simply ‘Allān, see Nakhlād Dārūr wa ‘l-Farasad, ed. Bevan, iii. Index iii. s.v.; the “Kaisites” are naturally called al-Kaisiyūn, but as an ethnopolitical group more usually al-Kaisiya, see al-Tabarî, Ta’rīkh, ed. de Goeje, i. 66, 150, 777, 1014, 1663, etc.; the nisba to Kais’Allān or Kais b. Allān is, however, ‘Allān, see al-Samʿānī’s Anāba, p. 404b and Ibn Khalīlān, Bulaq 1299, i. 125 sq.). All three forms occur in prose as well as poetry, the middle one, Kais b. Allān, remarkably rarely in poetry (Kais’Allān in poetry: Ḥamāni of Abū Tamīlīn, ed. Fretayg, p. 160, 655; Nakhlād, i. i, 117, 362 sq.; 370, 375, 390; al-Tabarî, op. cit., ii. 486; Taqā ṣAllār, s. v. ‘y., etc.; Kais b. Allān: Zuhair, Dīwān, ed. Ahlwardt, iii. 36, Nakhlād, i. 373; Abu ‘l-Allā b. Maʿārtī, al-Luʿnūmīyat, Cairo 1891, i. 47 and also Taqā ṣAllār, s. v. ‘y.; Kais: Anṭām, Dīwān, ed. Ahlwardt, xxiv. 3, Append. xvi. 51 sq., Nakhlād, Dīwān, ed. Ahlwardt, Append. liixii. 1; Zuhair, op. cit., i. 17; Ḥamāni, ed. cit., 306, 318, 657–660; Nakhlād, i. 374, 376 sq., ii. 902, 1042; Ḥamāni, xvii. 106, etc.). We never find before any of the three forms the word Banū (“sons”) (wrongly in the indices to Ibn al-A ṣūr, al-Kamil jā’l-Tarīkh, ed. Tornberg, to Caetani, Annali dell’Islam, ii. 1422 and vi. 1445, and even to al-Farabī, op. cit., etc.). What we are to understand by ‘Allān, is difficult to conceive. Those who use the form Kais b. ‘Allān—those are primarily the genealogists (see Taqā ṣAllār, s. v. ‘y.)—see in him naturally, at least the great majority of them (see below), the father of Kais and they further explain that he was the son of Muṣṣar and therefore brother of al-Yāṣ (Khādīf) b. Muṣṣar. According to them his real name is al-Nās (which, according to Ibn Duraid, Kit. al-Iṣbārīk, ed. Wustenfeld, p. 162 comes from al-Nās; according to al-Wazir al-Maghribī in the Taqā ṣAllār s. v. ‘y., al-Nās would be the only correct form), so that ‘Allān would be his epithet (Ibn Duraid, op. cit., p. 162; Taqā ṣAllār, s. v. ‘y.; Ibn ‘Abd Rabbih, al-Iṣbārīk, ed. Cairo 1305, i. 51; Abu ‘l-Fida’, Muhimmāt naʿīl l-Samʿānī al-Baghdādī, partly ed. by Fličer as Hebräische antiquisalien, p. 194; Wustenfeld, Genealog. Tabellen der Persischen und Sasanischen Familien, i. 31; Caetani, op. cit., i. Introd., § 49; also al-Samʿānī, op. cit.; al-Kasbahī, Ta’rīkh, ed. Houtsma, i. 260; al-Musawwī, al-Tanbih wa ʿl-Iṣraṣrāf, in Bibliogr. arab., ed. de Goeje, viii. 208; Yaḥyā, Muḥammad, ed. Wustenfeld, iii. 908; Ibn Khallīkān, op. cit., i. 130; Abū al-Kādir b. ‘Omar, Khāṣṣat ad-Ādāb, i. 449; Caussin de佩佩雷, Essai sur l’histoire des Arabes, i. 192, etc.). But this view is contradicted directly by Ibn Khallīkān, al-Tharīk, i. 305 and indirectly by many others—practically by all who say Kais’Allān and these are, as we have said, the majority; according to them ‘Allān disappears as a separate member in the genealogical table; Kais’Allān is identical with al-Nās or al-Nass (Kais’Allān here also is said to be only an epithet, al-Nās(s) on the other hand the proper name) and is son of Muṣṣar and brother of al-Yāṣ. At the same time they explain the genitive ‘Allān in the most different ways: as the name of a famous horse of Kais (by calling him after this horse, an endeavour has been made to distinguish our Kais from Kais b. al-Ghawāl b. Badjīlī, who also possessed a celebrated horse called Kubba and who was similarly called Kubba, Taqā ṣAllār, s. v. ‘y. and ‘y., and Ibn Khallīkān, loc. cit.), or as the name of a dog or of a bow, which were in his possession, or as the name of a slave or of some other man who had brought him up (in an isolated case in the form of the name Kais b. Allān, the word ‘Allān is regarded as the name of such a slave, see Abū al-Kādir b. ‘Omar, op. cit., i. 67, ii. 449; cf. the exactly analogous interpretation of the tribal name Sā’d (b.) Ḥudayhim in Ibn Kutaiba, Kit. al-Maṣārīf, ed. Wustenfeld, p. 51, Ibn Duraid, op. cit., p. 319, Kāmis and Taqā ṣAllār, s. v. Ḥudayhim, etc.), or as the name of a mountain, where he is said to have been born or lastly, and most stupidly as no notice is taken of genitive relationship, as in the form Kais’Allān—as an otherwise quite unknown adjective, interpreted as qualifying Kais with the meaning “needy, dependent” (see also Ibn Duraid, op. cit.; Śīkhā, Līsān al-ʿArab and Kāmis, s. v. ‘y. and ‘y.; al-Samʿānī, op. cit.; Abu ‘l-Fida’, op. cit.; Ibn Khallīkān, op. cit.; Abū al-Kādir b. ‘Omar, op. cit., and
Hamasa, op. cit., i. 124; Reiske, Primae lineae historiae regiorum araborum, ed. Wustenfeld, Tab. v. and viii. on p. 136; Sprenger, Das Leben u. die Lehre des Propheten Mohammad, iii. p. cxxxix, etc.). Only very rarely do we find the statement that 'Alān was an epithet of Muḥāfar (Ṣūhār and Lisan al-ʿArab, s. v. "yil") and most strong (possibly as a counterpart to al-Yās) (op. cit., p. 31 and 38) and hardly reconcilable with his other statements, that Kaṣ 'Alān is identical with Kahma b. al-Yās b. Muḥāfar.

These confused statements seem to one to be nothing but guesses. I should like to think myself that Kaṣ 'Alān is the real name of our confederation of tribes and that it was the genealogists who first made Kaṣ b. 'Alān out of it. As Arab tradition obviously knows absolutely nothing of a tribe or group of tribes called 'Alān, I should further like to assume — of course with all reserve — that the combination Kaṣ 'Alān is not to be interpreted on the model of Tāğhibū Waṭāntīn, "the Taghib of the tribal group of Wāṭil", Taimuʾ ʿr-Ribāḥī, "the Taim of the al-Ribāḥi Confederacy", Aḍīya ʿr-Ribāḥī, "the Aḍī of the al-Ribāḥi Confederacy", Djarma ʿr-Ṣaṣīta, "the Djarm of the Kūṭa Ḍimas confinement of tribes", "Wāṭil Bāḥilāta, the Wāṭil of the Bāḥilāta group of tribes", also Aṣṣ Bani Kaṣ, "the Aṣṣ of the Banu Kaṣ", Aṣṣ Bāḥilāta, "the Aṣṣ of Bāḥilāta", etc., (see e. g. Naṣīḥ, iii. Ind. iii. s. v. v.), but on the model of Kaṣ 'Alān Kūbba, "Kaṣ, the owner of the horse Kūbba" (see above; the name is everywhere so explained), Raḥilat ʿr-Faḥisī, "Raḥil with the horse", Anmāʾr ʿr-Ṣāḥī, "Anmāʾr with the sheep", Raḥibat ʿr-Ṣaṣīta, "the Raḥib of the Djarma", Kūṭa ʾr-Šaṣīta, "horses-Zaid", etc., (see e. g. Naṣīḥ, iii. Ind. iii. s. v. v.), also Tāq al-ʿArūṣ, s. v. v.). What we are to understand, however, in this case by 'Alān, whether, with the native explanations quoted, a horse or a dog or something of the kind is quite uncertain. According to the native dictionaries (I cannot quote an actual reference in literature) 'Alān as a noun means "a male hyena". As a name, it is not found elsewhere, according to the native lexicons and according to 'Abd al-Kādir b. Omar, op. cit., i. 67 (see, however, Tāq al-ʿArūṣ, s. v. v. — The Arab genealogists make simply invented the name al-ʿNāṣ (see above) as a counterpart to the tribes of the confederation: Kaṣ (ʿAlān) and Khindif (according to the genealogical legend, the wife of al-ʿYās) comprise together the whole of Muḥāfar (Ibn Kutaiba, op. cit., p. 31, al-Tabari, op. cit., ii. 1298, 1299, al-Masʿūdi, op. cit., p. 324, al-Bakri, al-Muṣṭamīm, ed. Wustenfeld, p. 56, Yāqūt, op. cit., i. 463, Ibn Khaldūn, op. cit., ii. 305, Caussin de Perceval, op. cit., i. 192, etc.). Between the two groups there were very ancient points of dispute (see e. g. al-Bakri, op. cit., p. 56 = Wustenfeld, Die Wohnsitze u. Wanderungen der arabischen Stämme, from vol. iv. of the Abbeh, Geogr. Gesch. d. Dichter, v. 81). To Kaṣ 'Alān were reckoned the following three branches or main Subtribe groups: Gḥṣṭaṣna (q. v.), with "Abs (q. v.), Dhūbyān (q. v.); the two main branches of the Dhūbyān are Fazārā, q. v. and Murrā, q. v.) and Ahšaḏaḥwaṣīn (q. v.), with Thākṣf (q. v.), in whom many saw descendents of Thāmud (q. v.) (see e. g. Aḥgoodi, iv. 76), Amīr b. Ṣaṣaṣa (q. v.), (from them descended the dynasty of Mirāsid of Aleppo, q. v.), Kulaib, Kūshār, Ṣūkail (q. v.); this is the tribe of the Ṣūkailid dynasty of Mosul, Hīlāl (q. v.) and Dżumāsh — Sulaib (q. v.) — Bāḥilā (q. v.) — ʿAḏwān (q. v.), etc., (On the branches of the Kaṣ 'Alān see especially Ibn Duraid, op. cit., p. 162 sqq.; Ibn Kutabī, op. cit., p. 38 sqq.; Ibn Khaldūn, op. cit., ii. 305 sqq.; Abu ʿr-Fīzā, op. cit., p. 174 sqq.; Ibn ʿAbd Rabba, op. cit., ii. 51; Wustenfeld, Gen. Tabellen, Tab. D sqq. and Reiske, op. cit., Tab. vi. sq. on p. 136.

Distribution. The Kaṣ 'Alān, according to legend, were originally settled in the low lying parts of the Thāmā (al- Başāk, op. cit., p. 57 = Wustenfeld, Die Wohnsitze u. Wanderungen d. Arab, Stämme, p. 81 = Yāḳūṭ, op. cit., i. 643 sqq.). Somewhere about the time of Muḥāmad they spread out, keeping in large number of their subdivisions over vast areas of central and northern Arabia; we find them (still) in the Thāmā (Ibn Khaldūn, op. cit., ii. 305), then again S. E. and N. E. of Mecca (the Thākṣf here owned the valuable town of Tāṣf and the Sulaib, Hibīl and Ṣūkail all sorts of famous mines; see e. g. al-Yaḵūbī, al-Bulūḏān, in the Bibl. Geogr. Arab., vii. 316, 312), in the region of Medina (Ibn Khaldūn, op. cit., ii. 305 sqq., 312), in other parts of the Ḥijaz (al-Hamādān, Diqarāt al-ʿArāb, ed. D. H. Müllner, i. 50; al-Bakri, op. cit., p. 60 = Wustenfeld, Die Wohnsitze u. Wanderungen, etc. p. 84), in the Thāmā (Yāḳūṭ, op. cit., iii. 688, 697; Ibn al-ʿArī, op. cit., 53); throughout the highlands of Nadjī (al-Masʿūdī, op. cit., p. 209; al-Yaḵūbī, al-Bulūḏān, p. 312), in the Yamama, where they occupied the important city of Fālādji (al-Bakri, op. cit., p. 60 = Wustenfeld, Die Wohnsitze u. Wanderungen etc., p. 84; Yāḳūṭ, op. cit., ii. 238, iii. 908; Ibn Khaldūn, op. cit., iii. 312 sqq.; Wustenfeld, Bahrein u. Ḥumām, from the Abbeh., Geogr. Gesch. d. Dichter, v. 4; Geogr. Gesch. d. Dichter, v. 83 and the map on p. 559, Caussin de Perceval, op. cit., i. 192 and Caetani, op. cit., ii. the map on p. 376.

The great Arab campaigns of conquest which began with the rise of the Caliphate and the tremendous political revolutions produced by them in Western Asia and North Africa brought the Kaṣ 'Alān like most Arab tribes out of their ancient dwelling-places. To all appearance, however, several branches of them had emigrated northwards even before Islam. At any rate we find them later, partly even under the earlier Caliphs, throughout Syria: at Ḥalāb, in the region of Ḥumām, in Damascus and the Ghūṭa, in the Ḥawrān with its capital Baṣra, in Baniyān with its capital Baniyān, in the Ballaṣ and in Palestine (al-Baladhorī, Fūṭār al-Bulūḏān, ed. d. Geеe, p. 451; Ibn Khaldūn, op. cit., ii. 312; Abū Ḥanīfa al-Dinawarī, al-Aḥbār al-fūṭār, ed. Guirgass and Kratchkovsky, p. 183; al-Yaḵūbī, op. cit., p. 325 sqq.; Ibn al-ʿArī, op. cit., p. 331; Yāḳūṭ, op. cit., ii. 744 etc.), in N. W. Mesopotamia, in the large
district called after them Dıyār Mudar [q. v.], with the important towns of Kärkişiya (Circesium), al-Raḥba, ʿArābīn, al-Kānānīk, al-Raḳḥa, Bālis (Barbalissus), Harrān (Carrhae), Dīsr Manbijīd, Saruq, Tell Mawzan, Sumaisat (Sumaisat), etc. (Ibn Ḥawkal, al-Madīlik wa ʿl-Māmālik, in the Biblioth. Geogr. arab. i. 155; al-Balḍūdī, op. cit., p. 178 = Yāḥīṣ, op. cit., i. 393; al-Taḥārī, op. cit., i. 32; Ibn al-ʿAṣḥīr, op. cit., iii. 373; al-Taḥārī, op. cit., i. 1891; Ibn Ḥadhdhūn, op. cit., ii. 310; Caecani, Studi di Storia orientale, i. 271 and Causin de Perceval, op. cit., i. 192), in the Irāk, where they also formed an apparently large fraction of the population of al-Kūfa and al-Ḥaṣa (al-Balḍūdī, op. cit., 451; al-Yaḳūbī, op. cit., p. 310; al-Taḥārī, op. cit., i. 2986, 3454, ii. 777; Aḥmadī, i. 52; Ibn al-ʾAbīl, Muḥtheṣār Kitiḥ al-Buldīn, in Biblioth. Geogr. arab., v. 1790; Abū Ḥanīfa al-Dinawārī, op. cit., p. 183; Ibn al-ʿAṣḥīr, op. cit., i. 116, v. 59), in Bavārīn (Ibn al-ʿAbīl, op. cit., vii. 341; Ibn Ḥadhdhūn, op. cit., ii. 313) and even near Ḩababān (al-Taḥārī, op. cit., p. 275).

In the time of Ibn Ḥadhdhūn (sixth cent.) only remnants of the once so powerful group of tribes of the Kais Ālān were still settled in Central Arabia; considerable bodies of them had settled in different parts of North Africa, Aḏwān tribes for example in Irvikya, Sulaimis there also and in the far west, near Fes (according to Ibn al-ʿAṣḥīr, op. cit., x. 401, — whether rightly or not is another question — Abū al-Muʿmin, the founder of the Almohad dynasty traced his descent from the Sulaimis), Fāzīris and Ruʾāḥīs in Barqa, other Dḥubānīs in Barqa in Taḥθīs and Fezzān, ʾAṣṣḥāʾ in the marches of Algeria and Morocco, Hilālis in Irīkya and at Bān and Constantine, Dḥusamis in Morocco etc. (Ibn Ḥadhdhūn, op. cit., ii. 305 sqq.).

History. The history proper of most Arabian Beduin tribes begins for us with their (*battle*-days) (see AYAM AL-ʿARAB). So it is with the Kais Ālān. Their feuds were particularly numerous, which is not remarkable in so large a group with its multitudinous ramifications. Ibn ʿAbī Rabbiḥa discusses them in the first place in his account of the Ayyām al-ʿĀlān in the Iṣḥāq al-ʿĀlān (iii. 47—93). He describes in this place the following either entirely or essentially civil Kais Ālān battles (cf. Reiske, op. cit., 204—252, following al-Nuwaʿīrī, who on this matter is dependent entirely on Ibn ʿAbī Rabbiḥa): the Yawm Manḍaj (Mandaj, also called Yawm al-Radhā, between Ghawwis and ʿAbsis), the Yawm al-Nāfrāw (between ʿAmiris and ʿAbis), the Yawm Bān ʿAkkīl (between Dḥubānīs and ʿAmiris), the Yawm Siṭr Dḥabla (between ʿAmir, ʿAbs, Ghāni, Bāhil and Barda on one side and Tamīm, Dḥubānī, Asad, Lakhm and Kūna on the other), the endless war of Dḥajis and al-Chābīs (between ʿAbs and Dḥubānīs), with the *days* of Dḥu l-Muʿārākīb, Dḥū Ḥusān, al-Yaʿmarīya, (Qafar) al-Haḥīb-, al-Farāk, Kaṭān and Ghdīr ʿAyyād (?), the Yawm al-Raḳjam (or al-Raḳjam, between Ghaṭaṣāfīn and ʿAmir), the Yawm al-Nuṭātīs (al-ʾAbāḥaʾiʾ, between ʿAbs and ʿAmir), the first and second Yawm Ḥawza (between Sulaim and Ghaṭaṣāfīn), the Yawm ʿAdaniya (other Miḥān, between Sulaim and Ghaṭaṣāfīn), the Yawm al-Līwā (between Ghaṭaṣāfīn and Ḥawza) and the Yawm al-Salāʾ (between Ḥawza and Ghaṭaṣāfīn). Also the following encounters between Kais and Non-Kais: the Yawm Raḥṭan (between ʿAmir and Tamīm), the Yawm Dḥat al-ʿAṣʿīl (between Sulaim and Tamīm), the Yawm al-Kadīd (between Sulaim and Kīna), the Yawm Burza (or Buzaʾ), the Yawm al-Kīṣaʾ (do), the Yawm al-Suʿībān (between ʿAmir and Banū ʿAbīl), the Yawm Aṭkhur (between Banū ʿAbīl and Banū Ḥuṣayn and the Yawm Dīrāt Mṣʾail (between al-Yaqqīt and ʿAbīl). Al-Yaqqīt, i. 261 also mentions as Kais the *days* of al-Baʿdaʾ, Faṣīf al-Rīḥ (between Kaṭān and ʿAmir), al-Mīlbaq and al-Uṛrī. Cf. also the section in Ibn al-ʿAṣḥīr on the *days* of the Arabs in the pagan period (op. cit., i. 367—517), pp. 411 sqq., 435 sqq., 420 sqq., 452 sqq., 478 sqq., 473 sqq., in the chapter which al-Māḍīnī in his Maḏjuwa al-Amṯālā has devoted to the *names* of the *days* of the Arabs (Chap. 29), nos. 76, 12, 11, 66, 96, 122, 30, 53, 22, 25 and Naṣība, iii. Ind. iv. under the separate place-names. Within the scope of this article at least, no attempt can be made to give these wars and feuds any more a historical and chronological sequence. Indeed, speaking generally we cannot say that it is a difficult, indeed for the most part an insoluble task, to get at the historical basis of the essentially legendary traditions of the Ayyām al-ʿArab, which we may call the epic of the Arabs. The most important and therefore also the most celebrated in poetry of the above-mentioned *days* is certainly that of Shīb Dḥabala (see Ḥajba, also Ḥubayyān and also Blau, op. cit., p. 583, Muṣafidālhīyāt, ed. Lyall, ii. transl., p. 251 and especially Naṣīnea, iii. Ind. iv., s. v. Dḥabala). Of the encounters in the Dḥisī wa ʿl-Chābīs bar (see Ḥaṭṭān, ʿAbs and Ḥubayyān), the most celebrated is that of al-Hākhī. It need not surprise us to find that the Kais tribe, as we see from the above, were also continually quarrelling with one another. The individual members of the great tribal confederacies never thought of maintaining peace as a principle within the limits of their group. Ibn ʿAbī Rabbiḥa and al-Nuwaʿīrī really ought also to have described the al-Fijjiār battles as Kais, as in them the Ḥawza, who were Kais, with the Ḥakīf at their head formed one of the two contesting parties (see FIDJAR and ḤAWZA, also Ibn al-ʿAṣḥīr, op. cit., i. 439 sqq., Maṣʿūdī, Murūj Dḥabala, iv. 120, 153, al-Maṣʿūdi, al-Tanbih wa ʿl-ʿAẓīr, p. 208 sqq. al-Dīyābākī, Taʿrīḥ al-Kamīz, Cairo 1285, i. 288, 293, Wastedfeld, Gesch. der Stadt Mecca, Vol. iv. der Chroniken der Stadt Mecca, p. 41 sqq., Sprenger, Das Leben und die Lehre der Moham- med, i. 148, Caecani, Annali, Introd., § 140, Huart, Hist. des Arabes, i. 92, etc. The question at issue in this was really the endeavours of the Ḥawza to deprive the Kināna of Mecca and the Kaʿba (cf. Aḥbāni, xiii. 3 sqq.).

Like the other great central Arabian Beduin tribes the Kais Ālān belonged to the short-lived empire of the Kinda (q. v. and Ḥamza al-Isfahānī, Taʿrīḥ, ed. Gottwaldt, p. 140; Abū Ḥanīfa al-Dinawārī, op. cit., i. 54); Ibn al-ʿAṣḥīr, op. cit., i. 376, 408; Reiske, op. cit., 98; Causin de Perceval, op. cit., ii. 287; al-Muṣafidālhīyāt, op. cit., transl., p. 259). Otherwise the only thing regarding the pre-Muhammadan history of the Kais Ālān handed down to us is the statement that they had worshipped Sirius (?), Pococke, Specimen hist. Arabum, p. 4; Causin de Perceval, op. cit.,
KĀIS-'AILĀN

chief tribe of the Kūdān, who inhabited the strip of territory between the ancient Moab and Palmyra, an antagonism, at the root of which probably lay ethnic differences (but see Wellhausen, Der arab. Reich und sein Sturz, p. 112) — the Kais were Ma'ādis (Niāris and Mu'daris), that is North Arabians, while the Kalb were — or at least were considered — South Arabians [see Kālīb b. Wābara and Kāfīn]. — This antagonism, being augmented through the Bāṣṣa-Khurāṣtān trouble between the Tāmīm and the Azd [q.v.], very early developed into a general vendetta between Mu'ājīr and Yemen. The Umayyad Caliphs relied sometimes on the Kais and sometimes on the Kalb according to their family connections, the result of marriages into these two extremes, which had as a result that, for example between 719 and 745, i.e. within 26 years, the actual control of the government passed five times from one group of tribes to the other. This state of things was, of course, intolerable and, in fact, the fall of the Umayyad dynasty was really due in the end principally to this feud between Mu'ādis and Yemenis.

Mu'āwiya I had relied on the Kalb and Yazīd I, who was born of a Kalbī mother had also depended mainly on them. As a result, the Kais refused their homage to their successors Mu'āwiya II, whose mother was likewise a Kalbī, and Marwān I, and declared themselves for the anti-Caliph 'Abd Allāh b. al-Zubair [q.v.]. In 684 the Sulaimān, the 'Amir and the Ghāṭafān — that is all Kais — fought under al-Dāhāk b. al-Fihri on the Mārj Rāḥīt in the Ghīūs of Damascus for Ibn al-Jashār b. Talbī, whose army consisted of Kalbīs and other men of Yemen. They suffered an unusually severe reverse, which plays a great part in the songs of the Kalbī and Kaisī poets and by the laws of the Arab vendetta necessarily perpetuated the hatred of the Kais for the Kalb (see al-Dāhāk b. Kāis). In addition to the literature quoted there al-Mas'ūdī, Murūdī al-Dhahab, v. 201; al-Mas'ūdī, al-Zanjī wa 'l-`Irāfīr, p. 308 sqq.; Ibn al-Aṭhīr, op. cit., v. 204; Yākūt, op. cit., ii. 743 sqq.; Ibn Badrūn, Sharh Kāfīd al-Ibn Abīn, ed. Deyy, p. 184 sqq.; Ramāzūn, ed. Freytag, p. 260 sqq., 317 sqq., al-Maḍānī, op. cit., i. 338 sqq.; Ibn al-Aṭhīr, op. cit., i. 664 sqq. — But they remained partisans of Ibn al-Zubair and maintained themselves with great tenacity in Mesopotamia under their important chief and leader Ṣufār b. Ḥārīth b. 'Amīr b. al-Kālībi and his lieutenant 'Umar b. al-Ḥubbāb b. al-Sulami, who did not capitulate till 691 in the reign of 'Abd al-Malik after a siege of considerable length in their strongholds, Karšītīya and Ra'a b. al-A'in (Resaīnā) (Wellhausen, Das arab. Reich u. sein Sturz, 115 sqq., with references to the most important sources, al-Tabarī, op. cit., ii. 643, 777; Ibn al-Aṭhīr, op. cit., iv. 188, 192, 242, 259; Deyy, Gesch. der Mauren in Spanien, Germany, ed., i. 86, 101 sqq., A. Müller,op. cit., i. 373, 385). Umar b. al-Ḥubbāb was the commander of the Kaisī force which fought against the Shī'īs under 'Ibrāhīm b. al-Ashtar in August 686 on the banks of the Kāhir, a tributary of the Great Žāb, in the Umayyad army led by 'Ubayd Allāh b. Ziyād, but to revenge the day of Mardj Rāḥīt, they desisted in the battle (Abū Ḥanīfa al-Dinawarī, op. cit., 301 sqq.; al-Tabarī, op. cit., ii. 708 sqq.; Ibn al-Aṭhīr, op. cit., iv. 215 sqq.; al-

i. 349; Krehl, Über die Religion der vorislam. Araber, p. 24), and that the 'Adwān had owned the jaffa, i.e. the management of the course run between 'Arrafat and al-Muzalība in the Meccan Ḥādīj ceremonies [see Khālj, i. 193] (Ibn Ḥishām, Sīra, ed. Wüstefeld, p. 77 sqq.; al-Tabarī, op. cit., i. 1134; Ibn Khaldūn, op. cit., ii. 305, etc.). The battle of ‘Aṣīb and the first (and thus quite intriguing) antagonistic to Muhammad at first. The Ghāṭafān and Sulaimān [q. v.] especially proved very unpleasant neighbours to Medina in the first seven years after the Hīdājra. But a clan of the Ghāṭafān, the Aḍhājī, who dwelled N. E. of Medina, considered it advisable as early as 627, after the "Battle of the Ditch" to conclude with Muhammad a — purely political — treaty of alliance (Sperber, Die Schreibungen Muhammad an die Stämme Arabiens, p. 8 sq.) and the vastly more powerful Sulaimān along with a number of Aḍhājīs took part in 630 in the "conquest" of Mecca on the side of the Prophet, and indeed, shortly after, we find them fighting against the Muhunain, under the Muslim flag against their brother-tribe, the Hāwāzin, although they must have seen that the latter's resistance to the state of Medina was the last possible attempt to break Muhammad's hegemony over Arabia (Ibn Ḥishām, op. cit., p. 810, 828—

864; al-Tabarī, op. cit., i. 1647; al-Wākīdia, al-Mu'āghāzī, abbrev. transl. by Wellhausen, p. 326, 358; Ibn Sa'īd, al-Tāḥāfūs, ed. Sachau, ii. i. 97, 109; Ibn Khaldūn, op. cit., ii. 308; Caetani, Annali, ii. 147, 153, 444 etc. When Muhammad died all the Kais tribes had probably submitted to the law of Islam (Ibn Sa'īd, op. cit., ii. 41 sqq.; Wellhausen, Arabien, pp. 976 sqq.; Sperber, op. cit., 38 sqq. etc.). After the Prophet's death, it is true, the majority of them joined more or less openly in the apostacy which set in over all Arabia. The Ghāṭafān once more were the most active in this. They several times endeavoured to overrun Medina and finally joined ʿUlāja, the prophet of the Asad. But the old days of Arabia were past. ʿUlāja and his followers were defeated at the well of Buṣūkha by Khālid b. al-Walid, the "sword of God" (of 632) and the rebellious central Arabian tribes had again to submit to the yoke of Medina and Islam (al-Tabarī, op. cit., i. 1870, 1885, 1889, 1898 sqq.; Ibn al-Aṭhīr, op. cit., ii. 574; Caetani, op. cit., ii. 604 sqq.; A. Müler, Der Islam im Morgen- u. Abendland, i. 174 sqq. etc.).

Henceforward the Kais 'Allān show themselves good Muslims. Bodies of them took part in the battles against the Persians under Khālid b. al-Walid, under al-Muṭṭāŷra-š-Šaβārānī and under Sa'd b. Aḥī Waqqās (al-Tabarī, op. cit., i. 2219 sqq.; Ibn al-Aṭhīr, op. cit., i. 347; Caetani, op. cit., ii. 954 sqq., iii. 155, 281 sqq.). In the "battle of the Camel" (656) and at Siffin (657) they fought on the side of 'Alī (Abū Ḥanīfa al-Dinawarī, op. cit., p. 155 sqq., 183 sqq.; al-Tabarī, op. cit., ii. 3174, 3240, 3290; Ibn al-Aṭhīr, op. cit., i. 189).

In the period of the great Muslim conquests in which they — in so far as they had not done so earlier (see above) — had moved their settlements northwards, especially to Syria, their power had become such that from the beginning to the end of the Umayyad period they formed one of the deciding political and military factors in the Caliphate. In this capacity they were in constant antagonism to the Kalb, the
Mas'udi, *Al-Tamhid*, p. 312; al-Ma'dini, *op. cit.*, ii. 339; Weil, *op. cit.*, i. 380 sqq.; Dozy, *op. cit.*, i. 100; A. Müller, *op. cit.*, i. 381; Wellhausen, *Die religiöse-politischen Oppositionsparteien im alten Islam*, in the *Abhldg. d. Gotting. Ges. d. Wiss.*, Philhist. Kl., F., v. 1898, p. 84; Wellhausen, *Das arabische Schrifttum sein Stil*, p. 116). In spite of this collapse of the Kaisats in their great war against the Umayyads, their smaller struggle against the Kalb continued without interruption, at first mainly under the leadership of Umair b. al-Hubab. It took the form of a series of "days" fought mainly in the Samawa, the desert between the Irak and Syria and forced the north-eastern part of the Kalb to migrate for a time to the Ghawar of Palestine. The most celebrated of these "days" is the battle of Banat Kain between the Fazzara and the Kalb in 692 or 693. When Umair with his Sulaimis settled on the Great Khobar (Choboras) there resulted encounters with the Christian Taghlibis, who dwelled in eastern Mesopotamia; these led to a bitter tribal and blood feud, fought out chiefly on the Khobar, the Balikh (Bilechas), the Tharthar and in the Tigris region. The best known "days" of this conflict, which gradually reduced the weaker Taghlib to great extremity, are those of al-Shahshak, where Umair fell (in 689; the *Nabz id*, p. 373, 400, 508 give for this event the battle of Semadar), and that of Mount al-Bigh (Wellhausen, *op. cit.*, pp. 125-130; *Nabz id*, p. 404, 508, 899, also *qur.*, 263). 1038 and 1041; *Yakht, op. cit.*, i. 632; al-Bakri, *op. cit.*, p. 179; al-Ma'dani, *op. cit.*, ii. 329, 339). We hear of bloodshed as a result of this enmity between the Kais and the Taghlib as late as 814 in the reign of al-Ma'mun (Ibn al-Athir, *op. cit.*, vi. 213).

After the capitulation of the Kais, 'Abd al-Malik showed himself a clever statesman and above party; he summoned Zufar b. al-Harith and later also his sons to his court at Damascus and married a Kaisi lady of the 'Ab, called Wallida, who became the mother of his sons Walid I and Sulaiman besides other children. Walid I was most probably a Kaisi at heart, but he took care not to irritate the Kalb. Sulaiman seems in spite of his kindness for the Yemeni (Azdi) Yazid b. al-Muhallab to have at least had the intention of placing the interest of the empire before that of parties. As might well be expected in his reign the Kaisats were partisans of the great Thakif al-Hajjajah [q. v.], and of the Dhalili Kutaba b. Muslim (q. v. and *Nabz id*, iii. index II., v. *Kuvis al-Ainana*). In the reign of Omar II, who was pronounced advocate of the policy of conciliation, the dissensions between the two great tribal groups did not make themselves felt. On the other hand in the reign of Yazid II, who in his struggle with the Azdi Muhallabids had naturally to rely on the support of the Kais, the result was a purely Kaisi party government. His brother and successor Hisham endeavoured to do away with this by withdrawing the Fazzara 'Omar b. Hunaiba, whom Yazid II had appointed viceroy of the Irak and the East, and replacing him by the Badhir Khalid b. 'Abd Allah al-Kansi, a distinguished statesman, but the Caliph finally found himself forced to allow the latter to be overthrown and replaced by a Kaisi, the Thakif Yusuf al-Mar, a relative of Hajjajah. Under Walid II, who appeared to have fallen entirely under the influence of Vauf b. 'Omar, the wrath of the Yemenis ultimately found vent in a rising stirred up by personal enemies of the Caliph, which led to the murder of Walid II and the entrenchment of Yazid III. The new Caliph sought his support exclusively among the Yemenis, especially the Kail of last Umayyad, Marwan II, relied no less exclusively on the Kais, into whose territory — to Hijaran — he even removed his capital. Marwan II fell before the 'Abbasiads. Even in the decisive battle on the Great Zohb which he fought against them in January 750, the feud between the Kais and the Kauja proved fatal (cf. Wellhausen, *op. cit.*, i. 131 sq., 140 sq., 162 sq., 194 sqq., 199 sqq., 203 sqq., 224 sqq., 229 sq., 235 sq., 341, where the necessary sources are everywhere given; A. Müller, *op. cit.*, i. 408, 435 sqq., 445 sq.; also the pertinent sections in Weil, *op. cit.*, Dozy, *op. cit.*, Haart, *op. cit.*, Muir, *The Caliphs, its Rise Decline and Fall*, etc.). The quarrel between Kais and Kalb had its effect in history not only in Syria, the Irak and Kurashan, but also in the other provinces of the vast Arab empire, notably in North Africa and Spain, where the two parties just as well were at deadly enmity (for North Africa and Spain see especially Dozy, *op. cit.*, i. 158 sqq.).

In the severe fightings of the later Umayyad period, the Kais had suffered losses from which they never again recovered. What we learn of them during the Abbasiad period is not of any great historical interest. The following are the main outlines: In the years 790, 792, 796 and 805, i. e. in the reign of Harun ar-Rashid, they had all sorts of new encounters in and around Damascus with their hereditary Yemeni enemies (al-Tabari, *op. cit.*, iii. 609, 625, 639 sqq., 688; Ibn al-Athir, *op. cit.*, vi. 87 sqq., 129; A. Müller, *op. cit.*, i. 490; see also above Al-KAN b. JABR). They rebelled under Harun in 794 and again under Al-Ma'mun in 828, in combination with the Yemenis, in Egypt (al-Tabari, *op. cit.*, iii. 629, 1099; Ibn al-Athir, *op. cit.*, vi. 97, 288; Weil, *op. cit.*, ii. 146 sq.; A. Müller, *op. cit.*, i. 490). In 811 under al-Amuq they fought the pretender 'Ali b. 'Abd Allah al-Sufyani chiefly because he had Kalbi blood in his veins (Ibn al-Athir, *op. cit.*, vi. 172 sq.; Weil, *op. cit.*, ii. 187); after the death of Mu'tasim in 842 they stirred up a revolt in Damascus but were quickly brought back to obedience by a severe defeat inflicted on them by al-Wathiq's army on the for them illomened Mardj Rihat (see above) (Ibn al-Athir, *op. cit.*, vi. 376). The Kaisats of Bahrain played a certain part in the initial stages of the Karman movement in 894 sqq. (Ibn al-Athir, *op. cit.*, v. 341; cf. Weil, *op. cit.*, ii. 508, note 3). The Kais appear, compared with the Kalb, to have been in general more savage, less civilized, more hardy, more trencherous and more cruel. The reason, no doubt, is that they were in much closer contact with the life and customs of their rivals, who had been in countries already settled in Syria, a home of ancient culture, and had naturally not remained un influenced by the refining influences of the Byzantine empire, whose eastern marches had been their home before the Muslim conquest. Their readiness to face battle or death is occasionally celebrated, not only in poetry (al-Tabari, *op. cit.*, ii. 1030).

Famous Kaisats (with the exception of those already mentioned). The best known poets of the
Kais were: al-Nājiḥah al-Dhubbānī, Antara, Labīd, Amīr b. al-Ta'fīl, Ṭu'ail b. 'Aww, 'Urwā b. al-Ward, al-Shamākhī, al-Khnāzī, Abū Muḥīṭ, al-Ju'fān, Ta'abāsira Sunnaa, Ibn 'U hostility, Al-'Adwānī, Dinarī al-Simma, al-Abābī b. Mirdās, Muzarrād, Kīdābī b. Zuhair, al-Nājiḥah al-Dhubbī, etc. [see the pertinent articles]. The great philologist of Arabic poetry, Abū Sāmān [q. v.] was a Bātīlī. — Other Kais of historical importance are given by Ibn Khalūdīn, op. cit., ii. 305 sqq., Ibn Ku'tāhī, op. cit., ii. 28 sqq., Ibn 'Abd Rabbīhi, op. cit., ii. 51 and Abu 'l-Fā risk, The dialect of the Kais-ālān. The Arabic philologists give us the following — as a fact of they are in the main common to most tribes of the Najd — phonetic and grammatical linguistic peculiarities of our group of tribes: They still pronounced the hādhā as a guttural stop and they had even changed it to 'ādīn when initia (in part only) so that they said 'ādān, 'adān, 'adān, 'adīn for 'ādān, 'adān, 'adān, 'adīn. They had a tendency to imālā and to īmānā; and they said 'ālēmān, tinālēmān, taqādūmān, etc. for 'ālāmān, tanālēmān, taqādūmān, etc. hublā for huṣūlā or hublā, īn and īn for kūn and kīnā (always) and min ladūni for min la-
tun; Līsīn al-Ārāb and Tāḍ al-Ārāb, sub īn; de Saucy, Grammaire arab., ii. 154, note 1; Sa-
rāw, Die allārah, Dialektspaltung, in the Zeitsscr., f. Assyriologie, xxxi. 31 sqq.; Schaad, Sibawaihi's Lautlehre, p. 78 sqq., etc. On words and expressions peculiar to the Kaisis see Freytag, Einl. in das Studium der arab. Sprache, p. 87 sqq., al-Suyūṭī, op. cit., i. 109 (anājīf 'ādīn, see thereon Lān-

(CHRISTIAN FISCHER)

KAIS B. AL-KHAṬĪB b. 'Aḍī, with Ḥassān b. Ṭabīb [q. v.] the most important poet of pre-Mūḥammadan Vathīrī, the latter Medina. He belonged to the Banū Ṣafār, a family of the Nabi of al-Āws [q. v.]. In the desperate fighting between the two tribes of al-Āws and al-Khaṭrāj, he championed the former with tongue and sword. Very little is known of the facts of his life, if we except the later, very doubtful stories. The account of the revenge he took on the murderers of his father and grand father is however quite authentic, and by this he won particular fame with posterity. This event was later embellished with all sorts of fictitious details, some of which are echoes of the Cyrus saga and form a parallel to the legend of the young Parzival (see Singer, Arab. and europ. Poesie im Mittelalter in the Abhandl. d. Preuss. Akad. d. Wissensch., 1918, phil.-histor. Kl., No. 13, p. 7 of the reprint). All else that we know of the life of the poet is that he took an active part in the political and military activities of his tribe. His Divān contains references to a whole series of Mīrūn of the Aws. In the decisive battle of Bu'ātīq [q. v.], later often celebrated in song, he did not take part, apparently on account of a wound received previously. Not long after this battle and before the Ḥijrā he was treacherously murdered. Kāis was involved in polemics with almost all the Khazrajī poets of his day, notably with Ḥassān b. Ṭabīb and Abū Ẓabī Ẓabīh b. Kāwābā [q. v.], both of them survived him by a considerable period. Although he was still alive at the beginning of Mūḥammad's prophetic activity, his Divān shows no trace of a knowledge of it. All that the later sources tell of his meeting with the Prophet is a pure invention.

Kāis's Divān is preserved in an old manuscript (dated 419 a. H.) in the Topkapi Saray Library in Constantinople, as an appendix to the Divān of Ḥassān b. Ṭabīb. The second manuscript so far known which is in the Egyptian National (formerly Khedival) Library in Cairo, seems to be a late copy of the above. The poems were collected by Ibn al-Sikkīt, but the final editor seems to have been al-Suḳkārī. What has survived for us in the Divān is certainly only a fragment of the original total.

Kāis reveals in his poems the two sides of his life, the settled and the nomadic, which was so characteristic of the Arabian oasis of the time. His descriptions of war and women are celebrated. The real Bedūn, the description of the riding she-camel, the ride through the desert and hunting are almost entirely lacking in his poems. Kāis is highly esteemed by later generations, perhaps more for his chivalrous character than for his poetic gifts. His poems are a very important source for our knowledge of conditions in Medina immediately before Islam.

Bibliography: Der Divān des Kāis b. al-Ḥṣīn, ed. T. Kowalski (Leipzig 1914). Besides the literature given there, in the historical introduction, al-Samūḥūdi's Wafā' al-Wafā' bi-
Aḥbār Dar al-Muṣafāt (Cairo 1326/27, 2 vols.) is very important for the topography of Medina and therefore also for the understanding of the Divān.

(T. KOWALSKI)

KAISĀN, Abū ʿAmra, a client of the ʿUrain, who belonged to the Bajilā [q. v.], was one of the leaders of the Mawālī [see MAWLĀ] in Kīf in the time of the Mughārāt [q. v.] and was one of the latter's intimates. Al-Mughārāt made him commander of his police force (harasa, sharfa). In this capacity this ardent Śi'a took part in avenging al-Husayn by killing, wherever possible, those who had taken the field against him and destroying their houses. For example, he beheaded, by al-
Mughārāt's command, ʿUmar b. Sa'd b. ʿAbd Wākās who had commanded the troops sent against al-
Husayn. In the battle of Mādār (67 = 868) Kaisān commanded the Mawālī; he was perhaps killed in this fierce battle. According to al-Kaṣhī, Kaisān's method of procedure is said to have originated among the people of Kīf the proverb applied to one who is deprived of his wealth: "Abū ʿAmra has entered his house"; cf. al-Dinawarī, p. 297, 5: "Abū ʿAmra has visited him". A verse in al-Kaṣhī describes him as wickeder than Iblīs. — As Mūḥammad b. al-Ǧanaffaṣī was the Imām of the Kaisānīya, Kaisān is occasionally represented as his client or pupil.
KAISANIYA was first applied to the Kūfa group of ʿStāl, the Mawāli, represented by Kaisān Abū Amr (see above), whose interests were championed by al-Muḥtār. The name was then extended to those who held the views, which had considerable currency among the ʿStīšis led by al-Muḥtār, and continued to be influential even later. When the little known Kaisān came in times of peace to be practically forgotten, his name was often explained as a ḥaṣab of al-Mukhtar. Mukhthātīs thus became another name for the older stratum of the Kaisānīya. The latter name, however, is also derived from a certain Kaisān, a mawla of ʿAll, who fell at Sīr ʾ (al-Tabarî, i. 3929, 10), from whom al-Muḥtār is said to have derived his views. The Kaisānīya were also called Khvāṣhābiya [q. v.] from the wooden club which the Mawāli carried as a weapon.

The contemporary Kaisānīs ascribed special knowledge to al-Muḥtār and to some extent regarded him as a prophet. There must also have been among them an echo of a cult, followers especially by some Yemen clans and described as Sabaʾ, the worship of an alleged chair of ʿAll, which was compared with the Ark of the Covenant and also used as an oracle. Their Imām in succession to al-Husayn was Muḥammad b. al-Ḥanafīya [q. v.], whom al-Muḥtār put forward as a mere figure-head. As al-Shahrastānī tells us, the Kaisānīs held the view that he was master of all knowledge and had obtained from the two Sāliydīs (i.e. al-Husayn and al-Husayn) all mystical, allegorical and esoteric knowledge as well as knowledge of the celestial spheres and of the souls. In time there came to be Kaisānīs who regarded Ibn al-Hanafīya as the Imām in immediate succession to his father and thus excluded al-Husayn and al-Husayn. In proof of this they pointed to the tradition that ʿAli in the Battle of the Camel had entrusted the standard to Muḥammad b. al-Hanafīya. This view probably arose in opposition to those held by the Imāmīs and Zaīdis.

Ibn al-Hanafīya’s death, probably in 81 = 71, resulted in a split in the Kaisānīya. Apart from those who followed his son Abū Hanafīya, a section of them transferred their allegiance to the Imāmate to his son Abū Ḥāšîm [q. v.], who was regarded as heir to the secret knowledge of his father. They were called Ḥāšîmīyā; but after the death of Abū Ḥāšîm (g = 716/7 or 99 = 717/8) they broke up into various branches on the question of succession. The Abāšīs now spread the idea that Abū Ḥāšîm before his death had transferred his rights to the Imāmate to Muḥammad b. ʿĀli b. Abū ʿAbbās b. ʿAbbās [q. v.].

A group of the Kaisānīs, however, did not believe in the death of Muḥammad b. al-Hanafīya. According to them, he lived in concealment in a ravine in the mountains of Rawḍa [q. v.] out of which he would one day emerge at the head of his followers as Mādī [q. v.] in order to fill the earth with righteousness. Stay is there described with Messianic features by the Kaisānī poets al-Khulayyīr [q. v.] and al-Sayyid al-Ḥimyātī [q. v.]. These views of the concealment (ghabā, q. v.), and return (raʾīd, q. v.) are attributed to a certain Abū Kārib (Kūrinib), whose followers were therefore distinguished as Karibiyā (Karibiyā) [q. v.].

According to al-Shahrastānī, all Kaisānīs held the view that religion consisted in obedience to a man; by means of allegorical interpretation (taʾwīl, q. v.) the prescriptions of law were transferred to such men. Among the Kaisānīs also arose the view that “the intervention of new circumstances can produce the alteration of a divine decision already made” (kadd, q. v.). Besides the doctrine of the return of the hidden Imām, a messianic chosch (tanhâl, q. v.) had also followed on from them. The Kaisānīs could not survive alongside of the Imāmīyas [q. v.] and the Zaidīyas [q. v.]. For Ibn al-Ham the Kaisānīya was an extinct sect. To Kaisānīs influences should probably be ascribed the fact that concealment and return were attributed to Alīs, whom the Zaidīs had championed. A remarkable document, which is said to contain Karmathian doctrines (see Karmathians) may also emanate from Kaisānī circles. In it a certain Abū al-Muḥammad b. al-Hanafīya appears as Mādī and Prophet (al-Tabī, i. 2128 ff.; Ibn al-Akrī, al-Kūmil, vii. 311, 16 sqq.; de Sacy, Exposé de la religion des Druses, Paris 1818, i. Introd. p. clxxvi. sqq. An Ahmad is, however, not known among the sons of Muḥammad b. al-Hanafīya (cf. Ibn Saʿd, al-Tabarī, v. 67; Ahmad b. Abī al-Daʾūd al-Ḥusaynī, Undat al-Tālīfī fi Amāb al-Tālīf, Bombay 1318, p. 310 sqq.).

KAISARIYA — KAISARIYA

[Text continues with natural prose format]

KAISAR (A.), the usual name in Arabic for the Byzantine Emperor. The word, of course, represents the Greek Καίσαρ and came to the Arabs through the intermediary of the Aramaic (cf. Fränkel, Die Aramäischen Fremdwörter im Arabischen, Leiden 1886, p. 278 sqq.). This borrowing must have taken place at quite an early period as the word in Syriac later appears almost always in the form Κεατ (cf. Payne Smith, Thesaurus Syriacus, s.v.). The Arab, centuries before Muhammad, had relations with the Byzantines (cf. A. Muller, Der Islam im Morgen- u. Abendland, i. 10 and the article GHAṢAIM). Among the old Arabic poets, Imru’ al-Kais in particular frequently mentions the Kaisar, who, indeed, played a great part in his life (cf. IMR) al-Kais). The word does not occur in the Korān but is quite frequent in the biography of Muhammad and especially in Tradition, and, therefore, may note, without the article like a proper name — is usually mentioned in the first person among contemporary secular rulers; next to him come the king of the Persians and the Negus of Abyssinia (that the Persian Hormuzan in al-Bukhārī, Ṣafīḥ, Dīṣa, Bāb I = ed. Krehl-Juyboll, ii. 292, s from below gives a different opinion is, of course, not to be wondered at). In the narratives mentioned a great part is played by the epistle said to have been sent by Muhammad through Dīlya [q.v.] to the governor of Būṣrā and through him to the Emperor Heracles, who thereupon interrogated Abū Sufyān, who happened to be within reach, regarding the new prophet. Here as well as in the story of the embassy of the Prophet to the Ghasamid al-Ḥārīt b. Abī Shamlir (of doubtful authenticity; cf. Noldeke, Die Ghasamischen Fürsten etc., in the Abhandl. d. Kgl. Preuss. Akad. d. Wiss. zu Berlin, 1887, phil.-hist. Klasse, p. 42 of the reprint), Heracles (in contrast to Kiswa) appears as a man, at heart inclined to Islām, whom only fear of his subjects prevents from openly professing the new religion. — The Traditions further record all sorts of sayings and prophesies of Muhammad regarding Kaisar, which can at once be recognised as later views thrown back into the past. In al-Bukhārī, Tafsīr on Sūra lxi. Bāb 2 (Kr.-J., iii. 360 middle of page) Muḥammad comforts ʿOmar, who is lamenting the neediness of his existence, contrasted with the splendid court of Kiswa and Kaisar, with the words: “Art thou not content that this world belongs to them and the next to us?” In Dīṣād, Bāb 93 (Kr.-J., ii. 229 below) we read: “To the first army of my community that plunders the city of Kaisar (Constantinople) its sins are forgiven”. In Dīṣād, Bāb 3 (Kr.-J., iv. 259, 9) the prophet foretells the final decline of the power of the East Roman Empire as well as that of the Persian kingdom.

In later poets also, Kaisar is still a current conception as a symbol of power and wealth — again alongside of Kiswa. Thus Ibn ʿIbnī (best known as a grammarian) in a verse quoted in Ibn Kahlīkūn, Waṣfīyyā, ed. Wustenfeld, fasc. iv. 229, from below, prides himself on being descended from the "Casaarīya — Kaisariya"

Vorarb., ii. 98; Caeti, Annals, year 6 a.H., § 50.

KAISARIYA (also KAYSARIYA), plur. kaysīrī, the name of a large system of public buildings laid out in the form of cloisters with shops, workshops and frequently also living-rooms. According to de Sacy, Relation de l’Égypte par Abd Al-Atlaf (Paris 1810), p. 303 sqq., the kaisariya was originally distinguished from the sīr or bāzār-street probably only by its greater extent, and by having several covered galleries around an open court, while the sīr consists only of a single gallery. At the present day in any case the term kaisariya is not infrequently quite or almost identical in meaning with the Persian word kāwaṣarā, which first came into use in the near East in the 15th century, or the likewise modern analogous names, khān, khanā (okella), funduq [q.v.] and bezirīzān [q.v.].

Origin. The word kaisariya is certainly of Greek origin: κασαρεία "imperial", an abbreviation for μακαρεία ἰεράς “the imperial market”. As H. Thiersch has shown, not only is the plan of the mosque — according to R. Kasdorff, however, in his Haus und Hauswesen im alten Arabien, Halle 1914, p. 69, the early Muslim mosque was of ancient Arab origin — to be traced to the old quadrangular court (with or without cells around it) of the agora, but also the kaisariya, which was used on the one hand as a warehouse for goods (whence developed the market-place) and on the other hand, without any doubt, usually also as lodgings. The expression ἱερά χασαρεία recalls the fact that the oldest of these public buildings were imperial i.e. state institutions, while in the Muslim period they were mainly due to private initiative (foundations of rich merchants, members of royal families or high officials). Thiersch thinks (op. cit., p. 233) that the place where the idea of these buildings originated — like many other things in the new Muslim period — seems to have been Alexandria, which was especially rich in covered market-places and halls. Whether we should actually consider the Caesarea, the Caesareum temple in Alexandria, to which the market-place and warehouses were attached (Strabo, xvii. 794), as the original in name and fact of the kaisariya (as does Vollers in the Zeitschr. d. Dtsch. Morgen. Ges., ii. 302) is uncertain. A derivation of the word kaisariya from the name of the Palestine town of Kaisariya (see be-
low, which de Sacy (op. cit.) recommends, can hardly be supported with sound arguments. The word in any case was originally used only in those districts which, like Syria, Palestine and parts of North Africa, had been under (imperial) Byzantine rule. The idea was only transferred later to other lands, especially Spain and the east. In Spanish and Portuguese we find kastārya as a loan-word: Span. alcaicería (asecicería, caicería), Port. alcaicerias; cf. Fr. Caînes, Dict. Español-Latino-Arabe (Madrid 1787), i. 692; Dozy-Engelmann, Glossaire des mots espagnols et portugais de l'arabe, ii (Leiden 1856), p. 73; 79; D. Leopoldo de Equiluz, Glos. etim. de las palabras españolas ... de origen oriental (Granada 1856), p. 126.

The following notes may help to elucidate the occurrence of the word in the Islamic world. In Egypt we have especially good evidence of its use in Cairo. Al-Maqrizi (d. 845 = 1441) in his description of the city gives a large number of kastārya's; cf. al-Kīfātī (Bulaq 1270), ii. 86-91; E. Reitemeyer, Die Städtegründungen der Araber in Islam (1912), p. 117. Later its place was gradually taken by the word wādāli (wâdêli, wâdâli) and in Niebuhr's time (1761) only the marketplace in the suburb of Bulaq was still called Kastari. — In Fes (see Fès, ii. 72 sqq.) in Morocco the same word was used, that is, in the central market situated off by gates and walls from the other parts of the town; see Dozy, op. cit., ii. 432; T. Williams in the Beitr. zur Assyriol., iii. 583; E. Reitemeyer, op. cit., p. 148, and cf. above, ii. 73 sqq. — In Granada in Spain the Alcaicería is that quarter of the town where the raw silk is sold; see Tollhausen, Spanisch-deutsch. Worterb., i. Leipzig 1888, p. 288; F. v. Schack, op. cit., ii. 327. — In Syria we have evidence of the use of the word kastārya as the name of the shops of the wholesale dealers in Beirüt (see Niebuhr, op. cit., ii. 469 and K. Muller, op. cit., p. 7), in Damascus (see Ibn Džubair, Nûda, ed. Wright and de Goeje, p. 289, 31 (year 1184) and Seetzen, Reisen durch Syrien etc. (Leipzig 1854-9), i. 269) and also in Aleppo (see Ibn Džubair, p. 252, 31; Yûṣûf, Muṣŷlīm (ed. Wustenfeld), ii. 307, 23; Ibn Bāṭṭūṭa (ed. Paris), i. 151; A. Russell, The Natural History of Aleppo, London 1794, i. 56; German transl., i. (Göttingen 1797), p. 45). — In al-Ḥasā (Hofhā, q. v., p. ii. 324 sqq.) in Eastern Arabia the quarter of the town thatcontains the shops is called al-Gasāriyya; see Der Islam, v. 32. — Going still further east we find a square called Kaṣāriyya in Mūsul: see Ibn Džubair, op. cit., p. 235, 16; in al-Salmiyya near Mūṣul: Yaḥṣūb, iii. 113, 21; in Irbil: Yaḥṣūb, i. 186, 22; in Baghdad: see Massignon, op. cit., p. 92 (the present bazaar centre); in Kermêş: see Massignon, op. cit.; in Isfahān: see Ritter, op. cit., ix. 49; Vullers, Lex. Pers.-Lat., ii. 753a, and cf. also (Isphahān) Pietro della Valle, Viaggi (Brugge 1843), ii. 8, German transl., (Gent 1874), i. 5; [Dupré] Voyage au Persie (Paris 1819), ii. 125 and V. Forbes, Travels in Various Countries of the East, iii. (1819), 16; in Tibriz: see Ritter, op. cit., ix. 856; in Khwārizm (Urgand): Ibn Bāṭṭūṭa, iii. 4.

We may further note that, according to a reference in Niebuhr (op. cit.), about the middle of the xviiith century large public buildings in the Barby State (N. W. Africa) were called casseria. In Algiers at the present day kāsāriyya means barracks; see Dozy, op. cit. In the ruined cities of Iḫwarān the palaces of the east, while Roman or Byzantine governors are now also called kāsāriyya; see Wetzstein, Reisebeschreibung über Haeran etc. (Berlin 1860), p. 55. In general it appears that in modern times the use of the word kāsāriyya as market-place and suchlike has to a great extent given way to newer words like bālān, zākāla, fiṣadūk and radīsān.

KĀSĀRIYA or KĀSĀRIYA = Kēśāra (Caesarea), a name bestowed in the reign of Augustus and Tiberius on a whole series of towns of the Roman East, and also in North Africa and Spain. 17 places of the name are known; see Pauly-Wissowa, Realenschr. k. klass. Altertumswissensch., i. 1288 sq. The Arab writers only know of two towns named Kāsāriya, viz.: 1. a town in Pa- lestine, on the coast in 35° N. Lat., about 24 miles south of Haifa. Its letters name Kāṣāra, Kāṣāra, Kāṣāstān, Kāṣānst, Kāṣāstān, Kōṣā war, Kasra, and the philistinische Kaste (f. Schar, Guss und die philistinische Kaste), 1852, p. 420 sqq.; Neulauer, op. cit., p. 11-15) is of uncertain etymology. To distinguish it from places of the same name, especially the north Galilean Caesarea (Caesarea Philippi, Pananes, Dānāyûs [q. v.], this town was called more defi- tely Caesarea Statonis, C. Palaestinae or C. mar- ritima). The Arabs distinguish it by the addition of Filisīn (Kāsāriya in Palestine) from the town of the same name in Asia Minor.

The origin and antiquity of Caesarea is veiled in obscurity; but its name is certain to exist in the second century B. C.; cf. 22 B. C. Herod I laid out a fine city, which received the name of Caesarea in honour of Augustus, on the site of the ancient settlement which had fallen into ruins (on the date cf. Otto in Pauly-Wissowa, op. cit., Suppl. Heft 2, col. 68, note). Part of the plan of the new foundation was the making of a splendid harbour which gave the town a great economic importance by giving the Jews access to the Mediterranean. Caesarea rapidly developed to be the first town in the country and maintained this position for some four centuries. It was also of great importance for Christianity, which early found a footing there as it was its spiritual metropolis in Palestine down to the time of the Council of Chalcedon (451). As late as the Arab Invasion Caesarea was still a flourishing town. It vigorously resisted the advance of the Muslims and withstood them in a long siege until finally Mu’awiyah took the city by storm. The statements in the Oriental sources regarding the date of its fall and the length of the siege vary; the siege probably began in 18 (639) and ended in 19 (649).
The accounts also differ very considerably as to the number of the defenders. On the Muslim conquest see de Goeje, Méon, sur la Compétitie de la Syrie, p. 166 sq.; Catani, Annali dell'Islam, iv. 31 sq., 156—162.

Kaisariya remained in undisputed possession of the Muslims until the First Crusade. During this it was stormed and taken by Baldwin I on May 31, 1101; see Wilken, Gesch. der Kreuzzüge (Leipzig 1859—1852), ii. 102—104; R. Rohricht, Gesch. der Kreuzzüge im Orients (Innsbruck 1898), p. 577.

Among the rich booty taken by the Christians on this occasion, the most valuable was a six-sided emerald, a vessel of green glass which was believed to have been used as a bowl of the Last Supper (this belief apparently first arose under the influence of the story of the Grail). The Genoese received those sacred relics along with a third part of the city as a reward for the services which they had rendered at its capture. The vessel is still preserved in the Catedral at Genoa and is known as the sacro calice. On it see Wilken, op. cit., ii. 103, 108—111; Mlinar, op. cit., ii. 306, 307; de Goeje, Chrestomathie, vol. vii, 87 (with plan: copperplate V); A. v. Prokesch (1829), Reise ins heil. Land (Vienna 1831), p. 28—34; Wilson (1842), H. Barth (1846) in Ritter, op. cit., xvi. 599, 604—7; G. Hanel (1847) in the Zeitschr. d. Deutsch. Morgenl. Ges., iv. 339 sqq.; v. d. Velde, Reise durch Syrien und Palästina, i. (Leipzig 1855), p. 253—6; V. Guérin, Deser, geogr. . . . de la Palestine, 2e partie, ii. (Paris 1875), 321—39; Dalman’s Palastinafahrten, v. 15, viii. 128 sqq.; H. Thiersch in the Zeitschr. d. Deutsch. Palästinavereins, xxxviii. (1914), 62 sq.

The town in Asia Minor, see KASARIYA.

and Syria\(^5\) (Leipzig 1912), p. 237—239 (with plan); E. Dowling, Sketches of Cæsarea (Palestine), London 1912. (M. Strecke)

**KAISARIYA** (in Arabic authors also KAJARIYA and KAJARIYA, a town in Asia Minor (Rûm), in 35\(^o\) E. Long. (Greenwich) and 35\(^o\) 15\(^\prime\) N. Lat. at the northern base of the Ardish-Dagh [q. v.]), 3,500 feet above sea-level on a treeless plateau, watered by the Kara-Sâ, a tributary of the Kizil Yrmak (Halys) — the latter flows about 14 miles North of Kaisariya. At the present day it is the chief town of a sandjak of the vilayet of Angora [q. v.]. The mediaeval and modern town is the successor of the ancient Mazaca, the capital of Cappadocia, to which Tiberius after its conquest gave the name Caesarea. Mazaca was a mile or two S.W. of the modern town, on the spurs of the Ardish-Dagh, while the latter gradually grew up around the buildings which the great church-father Basilias, a native of Caesarea (329—379), erected here. Justinian I fortified this new settlement.

During the middle ages Caesarea in general shared the political history of central and eastern Asia Minor. In the viith century it passed into the hands of the Arabs, but in 108 (726) again passed under Arab rule; cf. Well, Gesch. der Christen, i. 637 and the Syriac chronicle of Dionysius of Tell-Malih (ed. Chabot), p. 26 sq. In the viith century Kaisariya was taken by the Seljukis and played an important part as the second town in their empire. This was its period of greatest prosperity. In the viith century it was the residence of the Turkish dynasty of the Dânshîmendis (cf. BANISHMENDA).

In the viith century Kaisariya had for a considerable time to acknowledge the suzerainty of the Mongol Khans of Persia (the so-called Il-khans), as is shown by the coins they struck here. Ibn Battûta makes special mention of the strong Mongol garrison in the town. About 1300 (1398) Bayezid I [q. v.] took it (cf. Well, op. cit., v. 70) and it remained henceforth in Turkish hands. Kaisariya fell only for a very brief period into the power of the Mamûl Şûluks, in 1277, when Baibars and again in 822 (1419) when Uthûm, son of Sultan al-Ma'âshid advanced into this region of Asia Minor; see Well, op. cit., iv. 82, v. 146.

Kaisariya is now one of the most important towns in the interior of Asia Minor. The population of the Sandjak of Kaisariya was estimated by Cuinet in 1892 at 210,732, of whom 136,000 were Muslims, 45,318 Armenian Orthodox, 25,449 Greek Orthodox, 1,800 Protestant and 1,575 Roman Catholic Armenians. In 1831 Kinner estimated the population at about 25,000 (including 15,000 Armenians, 300 Greeks and 150 Jews), Amstowr in 1839 at 16,522, Cuinet in 1892 at 72,000 (45,000 Muslims, 14,400 Greek Orthodox, 9,000 Armenian Orthodox, 800 Catholic Armenians, 1,200 Protestants). In 1896 R. Oberhumer-Zimmerer put it at about 60,000, of whom 25% were Christians (including 10,000 Armenians), Paedeler in 1914 at 54,000 of whom 33% were Christians. H. Barth in 1858 estimated the number of inhabited houses at 8,000—10,000.

In the last centuries of the ancient period there must have been a strong Jewish community in Kaisariya, for the Sâsânid Sapor (Sâbur) 1(241—

272) is said, according to Jewish sources, to have slain no less than 12,000 Jews here about 260, in his incursion into Roman Asia Minor; cf. Erasch and Gruber, Allgem. Encykld., 2nd Sect., xxvii. 184 (note 87) and Paulus-Wissowa, op. cit., 2nd Series, i. 2330. In the middle ages the town seems to have been a great centre of Halâkha study in Asia Minor; cf. A. Neubauer, op. cit., H. Graetz, Gesch. der Juden, iv. 61, 263. The characteristic national Church of Kaisariya is unfavourably criticised by several authorities (e.g. Chantre and Ramay). During the hot months many of them live in the hills which form the last spurs of the Ardish-Dagh.

The impression made by Kaisariya is imposing and picturesque especially on account of its beautiful situation and considerable extent. Various travellers, like Mollte (Briefe über Zustände u. Begriffe in der Türkei, Berlin 1893, p. 339) and Naumann have therefore considered it the prettiest and finest town in the interior of Asia Minor. Its interior is therefore the more disappointing. Its filthy and dirty, its numerous ruined streets and its walled enclosures and suburbs. The tuff of the neighbourhood yields excellent building material. For fear of earthquakes, the houses of the town are usually left (as Barth observes) unfinished in the upper stories.

The Arab geographers of the middle ages mention particularly among the buildings a mosque, erected in memory of Sâsiyid Batîâl, the Turkish warrior of the faith and national hero (cf. above i. 680). They also report that the town contained the highly venerated sarcophagus of Muhammad b. al-Ramâziya [q. v.]. No remains are preserved of the important churches which existed here in the early Christian period. We find, however, important monuments of the Seljuk epoch, notably the Ulû-Djami\(^6\) of 1206, the Haşr mosque of 1236 with Madrasa, also somewhat outside of the town, the round tomb or Sûrîshây Gimbet and the Köskûl Oun, a khan-like building around an octogonal tank of 1340. The walls of the town also date from the Seljuk period but have been restored at a later date. This is also true of the citadel which, now filled with Turkish houses, affords a splendid panorama.

Kaisariya is an important junction of roads and carries on a considerable trade. Local industry is limited to the manufacture of carpets and leather, the manufacture of various dyes, and (according to Barth) to the peculiar preparation of dried meat, which is sold throughout Asia Minor.

About half an hour South-West of Kaisariya rise in vineyards the ruins of the ancient Mazaca Caesarea, called by the natives Eski-Kaisariya, more usually Eski-Shehir (i.e. Old Town) and Zorbat by the Armenians. A series of not inconsiderable villages surrounds the modern town in the form of an arc from West to South-East, like suburbs. For example the little town of Talas lies 1 1/2 hours to the South-East, the birthplace of St. Sêbas (752) with an ancient castle, powerful walls in the form of a quadrilateral, and the buildings of the American Mission (schools, hospital, etc.). A little further to the South lies Sindijedere, where in the monastery of St. John, surrounded by well conducted schools, the Greek Archbishop lives. Talas and Sindijedere are already on the North-eastern spur of the Ardish-Dagh.

In the West and South of Kaisariya there was

When Šāmīrūdghā ascended the throne in Dhu-ḥiṣād 1, 872 (Dec. 1467), he appointed his friend Kāṭṭbey At-tabk but the Šūlṭān had no real power, as he had very few followers among the Māmlūks at his command. He had not the money to win over new followers; the treasury was empty. After an unsuccessful rising by the Ustādār Khāṣīr the crown was offered in the month of Ṛadjāb of the same year (Feb. 1468) to Kāṭṭbey, who accepted it after some hesitation. Šāmīrūdghā retired into private life to Damīṭta, to which he was not taken as a prisoner but travelled in perfect liberty accompanied by some friends. Unlike other Māmlūk Šūlṭāns, Kāṭṭbey treated deceased Šūlṭāns or descendants of former Šūlṭāns throughout his reign with magnanimity and honour, frequently invited them to give tournaments in Cairo, allowed them to make the pilgrimage to Mecca and even allowed them to visit the capital in his absence without any suspicion or fear of conspiracies.

Kāṭṭbey’s chief political problem was his relations with the Ottomans. The rivalry between them and the Egyptians found expression in the fighting among their vassals in Asia Minor. The ruler of Albāstances [q. v.], Shāh Šūwār (cf. Idh. ʿl-Šāhīr, i. 9602) was at war with Egypt (cf. Ḥoshkhdām) and was secretly supported by the Ottomans, while Kāṭṭbey assisted prince ʿAlī Shāh of Kūramān in his war against the Ottoman Māmlūk. The first two expeditions sent against Shāh Šūwār (872 and 873) ended disastrously through the carelessness of the Egyptian commanders and more especially the lack of discipline among their troops and the rivalry between the Egyptian and Syrian corps. Kāṭṭbey later succeeded in depriving Shāh Šūwār of the help of the Ottoman Šūlṭān by agreeing to drop the assistance he had himself been giving Ḍāhī Shāh of Kūramān. Thus weakened, Shāh Šūwār was decisively defeated in 876 (1471) by the At-tabk Ezbed. Shāh Šūwār fell back to Zamanāt. Besieged there he capitulated on condition that he was to remain in possession of his kingdom as vassal of the Šūlṭān; but he was taken prisoner, brought to Cairo and executed contrary to the laws of war. The prince of the White Sheep, Uznān Ḥasan, the ruler of Dīyār Bakr and a part of Persia, was a dangerous rival to Kāṭṭbey, and advanced from triumph to triumph; in 872 he defeated the Šūlṭān of the Black Sheep and in 873 the Šūlṭān of Sāmanqād, but when in 876 (1471) he declared war on Muḥammad II he was defeated and thus became less dangerous for Kāṭṭbey. He died in 880 (1475) and was succeeded by Yāḥūb Bey. A quarrel arose between Baydār, the latter’s governor in al-Rūḥā (Edirne), and the Šūlṭān’s general Veshbog, because Baydār had given shelter to Saif, the rebel chie of the Reduins of Ḥāmā. Yeḥubb advanced on al-Rūḥā and, although satisfaction was offered in every respect, he insisted on besieging the town, but was defeated during a sortie and killed with several of his staff; other Egyptian notables were taken prisoner. Kāṭṭbey could not
wipe out this defeat and had to make peace, as he was threatened with a struggle with the new Ottoman Sultan Bayazid [q. v., i. 684]. Apart from continual friction regarding the ownership of Albâstân, Bayazid felt himself threatened, because Kâ'îtbey had given a friendly welcome to his brother Ljem [q. v., i. 1034 sq.], the pretender to the throne and had even encouraged him to fight against Bayazid. An embassy sent to Bayazid to endeavour to maintain peace was unsuccessful. The Ottomans invaded the southern part of Asia Minor in 897 (1486) and occupied Tarsus and Adana; other Ottoman troops besieged Malatya. The Egyptian forces operated with success against both armies especially as Kâ'îtbey had won over 'Alî al-Dawla, prince of Albâstân. In 893 (1488) the Ottomans were no more successful. An endeavour to land a considerable body of troops in the bay of Iskanderûn [q. v.] failed. In 895 (1489/90) the Atâbek Ezek inflected a decisive defeat on the Turks at Caesarea in Asia Minor, where several generals were captured. Kâ'îtbey showed a wise moderation in retaining his inclination for peace, recognizing the enormous resources of the Ottomans and peace was concluded in 896 (1491). The rest of the reign of Kâ'îtbey was peaceful but the domestic situation did not improve. It is true that he succeeded by his authority alone in preventing a fight between the hostile Mamlûk factions, but he could not permanently restrain their outbursts and he did not succeed in introducing a sound financial system.

Kâ'îtbey was by far the most important ruler of the Burji dynasty (see i. 796). He once more raised the prestige of the Mamlûk empire to a great height abroad, so that he could with good reason consider himself the first prince of Islam. For his campaigns and his buildings he required considerable means, which he could only raise by extortion, in the total absence of a regulated system of taxation. This is made a severe reproach against him by the chroniclers. In the modern view it is an obvious duty of a country to provide the necessary means for its army. It was just this lack of organised taxation that brought about the ruin of the Mamlûk empire. The Sultan was left to provide funds for himself by force. He either extorted them (if necessary by torture) from the high officials of the treasury, who had enriched themselves by dishonest means or "visited" the great shaikhs of the provinces and received gifts — presumably not always voluntary — from them (on one tour alone he raked in 200,000 dinârs). He also levied contributions (e. g. to the amount of the five-monthly rental) from the real estate belonging to the jîgu foundations or from private individuals and forced the reservists, the Awdâl al-Nâs [see the article Awdâl İyäs], to pay large sums in order not to be sent to the front. When the expedition planned did not take place, he gave back the money to the general amusement. He taxed Jews and Christians correspondingly. He also levied a very burdensome tax on the sale of corn. His expenses were on a corresponding scale. In the years 872—894 A. H. he expended over 7,000,000 dinârs (70 million francs) in paying the army, a large sum for these days. His buildings as well as the renovation of older buildings required large sums. The mosque at his tomb before the gates of Cairo, the Kâ'nâkâh (monastery) in the village of this name near the capital, the building of the castle at Aleppo, work on the mosque in Medina which was destroyed in 881 (1475/6) by a fire caused by lightning are celebrated. Although he was nearly 60 years old when he ascended the throne, he spent the earlier years of his reign in an almost feverish state of activity. Not only did he, contrary to the previous custom, daily leave the citadel for riding and excursions but he travelled round unceasingly and made the pilgrimage to Mecca and great tours of inspection to Aleppo and beyond to the Euphrates. He was able to keep his Mamlûks in control and the always rebellious Beduins in the Delta as well as the Arab tribes in Nûbûl and Hamî. The period of his reign seemed an ideal one to the historians in contrast to those of his successors. He was of unusual, almost sadistic cruelty. He loved to be present at whippings and tortures, sometimes taking part in person; he was exceedingly strict to his son and once, as a punishment, made him live in the Mamlûk barracks and perform the most menial duties. He had only one legal wife; of his slaves the best known is Aslîh b. Aslîh, the mother of his son Nâsim b. Ismâyîl, the famous poet and great宁r al-Nâsîr (cf. her biography in my article in Zeitschr. des Deutsch. Pal. Ver. 1905, p. 191).

Allâh, AÎMD, AL-KAYYÌM, al-Khâjjî, a philosopher of the third century A. D., with Isâmut and gnostic tendencies; al-Shahristâni knew of works by him in Arabic and Persian; the fragments which he gives are to be compared with Rasûl İshâq al-Safî — cf. Shahristâni, Miqât, Cairo 1317, ii. 17—18.

(L. Massignon)

KA'ÎYM (Allâh), (v. 1), originally: "he who stands upright", then (with bi, ala, 6 or the genitive alone): he who takes something upon himself, takes care of something or someone and hence also has authority over them. Thus we find the pre-Islamic poet al-Ku'âmî (Dîwân, ed. Barth, Leiden 1902, No. 26) already speaking of a "ka'îym of water", i.e. apparently the man in charge of it, the supervisor, and the poet Bârî b. Surâîm (Hamâdan of Abu Tamâmâ, ed. Freytag, p. 269, verse 2) speaks of the ka'îym of a woman i.e. he who provides for her, her husband. The first mentioned meaning, (supervisor etc.), is then found in all possible applications, administrator of a pious foundation, of baths, superintendent of a temple, caretaker of a saint's grave, etc.; indeed, in al-Bukhârî, Ṣahîh, Da'awât, Bah 10 (ed. Kreil-Juynboll, iv. 189, 6), in 'Abî Hammad's night-prayer, the expression is even applied to God as the director of heaven and earth, and this application seems also to be present in 'Omar b. Abî Rabî'a, ed. P. Schwarz, No. 91, 11, where the poet swears by the "religion of the Ka'îym". Here, of course, it is most probably a question of an inversion (perhaps caused by the metre) of the Korânic expression al-Dîn il-ka'îym (see below) on the model of Bâtîm il-Mu'âdadhîn. (Cf. Wright, Grammar, ii.
§ 95 sq. and al-Kaššālī on Buḫšrā, Ṣaww, bāb 67 end).

The meaning “provider, husband” of a woman is frequently found in the eschatological traditions, in which it is said that with the approach of the last day the number of women will increase in proportion to men, so much that there will only be one kašâim for every 50 women.

The adjectival meaning “commanding” (a branch of knowledge) perhaps arises out of the same sphere of conceptions as “provider’s, master”; it is found in a biographical notice of a scholar in Yaqqūt, Muḥammad, ed. Wüstenfeld, ii. 225, 42. On the other hand, kašâim, also an adjectival meaning “correct, right”, repeatedly found in the Korān in the expression al-Dīn “l-kašâim” and similar combinations may have to be semasiologically separated from the former meaning.

Bibliography (here as in the text mainly from references given by Prof. A. Fischer, Leipzig and Prof. A. J. Wensinck, Leiden):

Kašâim = a d m i n i s t r a t o r : al-Buḫšrā, al-Kašâb Wāṣyā, Bāb 32 (ed. Krehli-Juyboll n. 196, 4) and al-Kaššālī s. v.; Yaqqūt, op. cit., iii. 856, 13; al-Maškāri, ii. 547, 20; al-Tabārī, ed. de Goeje, ii. 814, 11; al-Karwīnī, Aḥāf al-ahwāl, ed. Schneid, ii. 122, a. from below;

= husband: al-Buḫšrā, op. cit., Nīkāh, Bāb 110 (ed. Kr.-J. n. 453, 3 from below) and passim;

= Omar b. Abī Rabī‘a, op. cit., poem No. 269, 3; = correct, orthodox: Sūra ix. 36 and passim; xxviii, 4 and thereon al-Kaššālī’s note on the quotation of this passage from the Korān in al-Buḫšrā, op. cit., Iṣām, Bāb 34 (Kr.-J. n. 19, 16).

A. Schaeade

Al-KAŠÂM (A.), one of the *beautiful names* of Allāh (see i. 393), according to some theologians the greatest name of Allāh (see Tādī al-Arūs, ii. 36, 7 from below — ult. The word is of Jewish origin and means like its prototype, the Hebrew כָּשֵׁמ, or the Aramaic کُشيم (cf. Hirschfeld, New Researches into the Composition and Exegesis of the Koran, London 1902, p. 69, 12 and note 89; Brünow-Fischer, Archaische Christosthätik, Berlin 1913, glossary under ḥām “the eternal”. Muḥammad, who uses it three times in the Korān (ii. 256; iii. 1 and xx. 110) may have picked it up from the Jews of Medina (the attribution of the whole of Sūra xx. as “Meccan” would then have to be revised). When late (post-Korānic) texts e.g. al-Buḫšrā, al-Saḥīh, Tawāhid, Bāb 24 (ed. Krehli-Juyboll n. 466, 17; Muḥammad’s night-prayer) have the variant kašāim, the a in the last syllable is probably only to be regarded as another reproduction of the Hebrew kāmēt. The other meanings which Arabic exegesists have given the word may be due to ignorance of its foreign origin (cf. Tādī al-Arūs, i. 62; al-Ṭabarī, Dīnār al-Bayān, Bāḥāk 1234, ii. 5 on Sūra ii. 256).

Bibliography (here and in the text mainly from references given by Prof. A. Fischer, Leipzig): Leyvi, Neuhebr. und chald. Worterb., under קותא and קוסא, Z. D. M. G., xlvii. (1890), p. 168—171; al-Abghīrī, Kirāb al-Mutṭanāf (Cairo 1308), i. 5, 14 (beginning of Chap. i.).

A. Schade

AL-KAŠÂM (Os. ‘Amr b. Mālik al-Tamīmī, an A r a b general. When Ṣaḏāḥ bint al-Ḥārith gave herself out to be a prophetess after the death of Muḥammad, al-Kašâm joined her and is said to have fought on her side. But in the period following he always retained his Muslim views, and as a subordinate of the famous Khaḍīj b. al-Walid [q. v.] he played a very prominent part in the earliest wars of Islām. As early as the year 11 (632) he is reported to have fought faithfully on the side of Khaḍīj in the battle of Buṣārā [q. v.] and after the capture of al-Ḥira [q. v.] in Rabī‘ 1, 12 (May/June 633) there was an encounter between the Muslims under al-Kašâm and the Persians at al-Ḥassād in the vicinity of al-ʿAmār [q. v.] in which the latter were defeated. The exact date cannot be ascertained; according to one statement the fight was in the year 12; by others it is put in Khaḍīj’s campaign in Syria. In Rādāb 14 (Aug.—Sept. 635) al-Kašâm took part in the conquest of Damascus and in the following year he commanded a squadron in the battle of the Yarmūk, which also ended in the victory of the Muslims. Special mention is made of the way in which he distinguished himself in the desperate battle of al-Kaḏāsya [q. v.] in 16 (637) and of the fact that Abu Wāṣā was in command here, but the success is ascribed to the timely intervention of al-Kašâm. He is again mentioned among the valiant heroes who took part in the capture of al-Madā’in in the same year, when countless booty fell into the hands of the Muslims. According to some accounts he commanded the vanguard in the battle of Djālālā [q. v.] at the end of the same year and organised a garrison in Ḥulwān [q. v.]. He also shared in the capture of Nihāwand in 21 (641/642) and before the battle of the Camel (36—659) he was sent by Abu Bāṣrā to negotiate with Talha and al-Zuhair. He afterwards settled in al-Kufa. Al-Kašâm, who is one of the favourite hero figures in Arab legend, was also famed as a poet and celebrated his warlike deeds in several poems.

KAAHOTA, in older spelling KAAHTA, sometimes AL-KAHCTA, the name of a place on the Kaahta-Su, a tributary of the Euphrates, about 40 miles S.E. of Malatya, the residence of a kaimnakam and chief town in a kašt (circle) of the same name, which comprises the three nīfās (communities) of Gerger, Shiro and Merdu, with a population of about 46,000 (according to Chiniest mainly Kurds; with them over 4000 Armenians and belongs to the nīfā (administrative district) of Malatya in the province of Ma’murt al-Aziz (Kharpūt). The modern Kakahta which numbers only a few hundred huts with about 1000 inhabitants, almost exclusively Kurds, was famed in the middle ages for its exceedingly strong castle which, built on a steep eminence, guarded the eastern road from Simeisat to Malatya and was one of the frontier strongholds (Taṭuhr) of the
Muslim lands, and has again achieved fame in modern times through the discovery on the neighbouring Nemrud-Dagh of monuments of Antiochus I of Commagene of the 2nd century B.C. with first mention in the name of the Oriental historians of the Crusades; in Bar-Hebraeus and Michael Syrus it is written Gakhita, the ancient and the Byzantine name are not known; but the bridge built in the reign of Septimius Severus about 200 A.D. over the Isām-Ṣu at Kakhita and the remains of Byzantine buildings on the fortress show that the place was an important frontier station, even in antiquity and at the beginning of the middle ages. The hypothesis of AnRAW_TEXT_END
had no longer the importance as a frontier fort-
ness that it had in the middle ages, when it is
speecially mentioned as such by Abu 'l-Fida' (Tur-
üzüm, ed. Reinaud, p. 262 sq.) and Al-Dimashqî
(ed. Mehran, p. 206). Igalyzhâde (middle of the
15th century) had given it a section to itself in its
description of the Ottoman empire for the district
of Gerger and Kâkhta (von Hammer, Des Osm.
Reiches Staatswes., ii. 449) in Etwiya aho (Şûqät-
nûna, iv. 22) it is occasionally mentioned, but
the great geographical works of the 18th century,
the Mağârî-âl-Âlâmî of Muṣlamâd 'Abî 'i-
Îlî (f. 176r of the Vienna MS.), and the Dîjâdânnâd
of Kâtatîb Celebi (Constantinople 1145, p. 600 sq.)
only know Kâkhta from Abu 'l-Fida', whose state-
ments they translate word for word: among the
Anatolian Kâha's Kâkhta was placed in the out-
pots of the seventh stage (v. Hammer, Gesch. d.
Osm. Reiches, ix. 8, No. 470). In the course of the
last three centuries, these remote and inaccessible
districts have been settled by Kurds; Kâtatîb Celebi,
who describes them as a useless, re-
bellious horde of highway robbers; they obeyed
only their own chiefs (be yegîrî) and during the last
century it required repeated military expedi-
tions to restore the authority of the Porte in the
region inhabited by them. In these fights the
fortress of Kâkhta also played a part, as a Kûr-
dish Bey with his followers had entrenched him-
self in it; it was stormed in 1839 by Turkish
soldiers and from this incident became known in
Europe through reports of Ainsworth and v. Moltke
(cf. C. Ritter, Erdkunde, x. 870, 874, 883 sq.).
An archaeological excavation of the fortress has
yet not taken place; there is nothing to descrip-
tion in Hamdi Bey's work on the Turkish expedition
of 1883; he paid special attention to the Muslim in-
scriptions (still unpubl.-hed); his statements are
supplemented in details by the Sûlâmîn of Khârî-
pît. The great iron gate, which is mentioned as
early as the Sûlûk conquest in 1226, was brought
along with the gate of the fortress of
Gerger in 1882 to Diyar Bâkî.

2. A town in Transbaikalia, 30° 19' N.
Lat., 106° 40' E. Long., 5500 feet above sea
level. Kâkhta is separated from Maimâtîn (Dai
Oorgî) by a neutral zone of about 50 yards broad
and connected with Troiskiwskî by the only
high road in the district, about 3¼ versts long.
Lying on the Kâkhta brook (Mong. Kaktugore-
khon) and surrounded by mountains (Burgultei =
Eagle mountain) Kâkhta arose out of a Russian
frontier post south of the Kâkhta brook on the
Rora, a stream that forms the frontier, through
the fact that here on Aug. 10, 1727 the treaty
of Kâkhta was signed. The Chinese opened this
point for trade between Russia and China and
found here Maimâtn (trade-frontier) and the
Russians the frontier post of Kâkhta. Henceforth
Kâkhta has been the coridor for the exploration
and penetration of Mongolia and China, for science,
politics, trade (tea-trade) and commerce. Fortified
with paliades, it has formed down to the present
day a little republic of merchants with its own
taxes (tax on tea), customs, its own administration,
council of elders, fire-brigade and church. In ad-
toion to houses of stone there are still old
wooden buildings in Kâkhta and great business-
houses with large yards for caravans, but no shops;
besides the Russian wholesale business there is
the detail trade among the Mongols and Chinese.
Since 1727 the famous December fair has been
held annually in Kâkhta. Kâkhta is the main
depot and clearing house for the so-called caravan
tea. At one time rhubarb was smuggled into
Russia. Now gold is smuggled into China. As a result
of the treaty of Pekin 1860 and the opening of
the great trans-Siberian railway the import of tea, silk
and cotton goods, has considerably decreased;
the export of cloths, furs and leather is rather basic.
There is a steppe post and telegraph to Pekin via Urga.

KAKÖYIDS, a dynasty, which reigned from
208 (1007) to 445 (1051) over the provinces of
Isfâhân and Hamadhân. It descends from
Dinâmandâr Rustam b. al-Marzâbîn, a native of Da-
lam, who held the fie of Shahriyâr and received
the title of ishâkshâh from the Bâyiî Madjî al-
Dawla (cf. Ibn Isfandîryûn, Hist. dî Tabûr après,
trans. Browne, p. 225, 230, 231, 239; 'Alîr al-
Dîn, Tabûrî-dî Tabûrîrîn, ed. Donn, p. 195, 209;
Mirkhosîn, Raqûd al-Safî', iv. 26).
Kâkhta in the dialect of Dailam is the hypo-
coristic diminutive of ḫāḏa “maternal uncle” (cf. J. de Morgan, *Mission scientifique en Perse*, v. 216, No. 363; Rūstā Kāli Khan, *Farkhān-i Nāṣirī*, s. v.). The surname Ibn al-Aṭīrī was given to the founder of the dynasty, because he was the son of the maternal uncle of Maḏjḏ al-Dawla by the mother of the latter, sister of Dūshmanizār (Ibn al-Aṭīrī, ix. 358, better explanation than p. 146), his patron.

In place of Dūshmanizār, the coin has the name Dūshmanārū (cf. F. Justi, *Iranisches Namenbuch*, p. 88; genealogical table, p. 445). The dynasty consisted of five members:

1. ‘Alī al-Dawla Muḥammad b. Dūshmanizār, surnamed Ibn Kākēnī, who was the first to declare himself independent, soon after 398 (1007); he was cousin of the wife of the Būyīd Fakhr al-Dawla [q. v.], mother of Maḏjḏ al-Dawla, who had him appointed governor of Isfahān; he seized Hamadān (414 = 1023), Rāi (419 = 1028) and Isfahān (421 = 1030); continual wars with the Kurds, with the ʿizāḥābād of Tābriz, and with the Ghuzz prevented him from peacefully enjoying the possession of these places. In 420 (1029) he declared himself a vassal of Sulṭān Muḥammad of Ghur; in 424 (1033) he was confirmed in the government of Isfahān by Sulṭān Masūd, who had succeeded his father; in 425 (1034) he rebelled, was twice defeated, lost Isfahān, tried to reinstate it two years later and ultimately succeeded after some time. The philosopher and physician Ibn Sīnā [q. v.] filled the ministerial office at his court, having been dismissed from the service of the Būyīd Tāj al-Dawla (Ibn Khallīkān, ed. Wüstenfeld, No. 189; transl. de Slane, i. 442); he was still minister at his death in 428 (1037). ‘Alī al-Dawla died in 433 (1041), after having built a wall round his capital in 429 (1037).

2. Zāhir al-Dīn Abū Mansūr Farkhāz, his eldest son, succeeded him at Isfahān; he fought against his brother Abū Ḥarīb, who had appealed for assistance to the Ghuzz Sālḏḵāj, settled in Rāi; the latter was defeated. Having sought refuge with the Būyīd Abū Kālidjār b. Sulṭān al-Dawla [q. v.] he induced the latter to undertake the siege of Isfahān; the quarrel was terminated by a peace between the two brothers, which lasted till 435 (1044). Zāhir then seized the two fortresses of Kirmān belonging to Abū Kālidjār, who in order to get them back, took Aḥarḵūt and defeated the Isfahān army. Besieged in his capital by Toghūr-Beg in 438 (1047) he was left in possession of his sēf after consideration of paying homage till 443 (1051) when the Sālḏḵāj finally obtained Isfahān after a long siege; he made it his capital and had the walls destroyed, saying that only a weak prince has need of walls to protect him. Abū Mansūr received as sēfs the two cantons of Yard and Aḥarḵūt. He accompanied Toghūr-Beg when the latter went to Frāghābī to marry the daughter of the Caliph al-Kāʾim in 455 (1063).

3. Abū Kālidjār Gershāsp, brother of the preceding, was reigning at Hamadān when this town was besieged by the Ghuzz in 420 (1029). He made peace with their chief Gok-Tāḥ and married his daughter; but the Ghuzz began their attacks again after the capture of Rai and forced him to take refuge in the fortress of Kinkawar. These Turks entered Hamadān in 430 (1038); having succeeded in drawing Abū Kālidjār after them, they attacked him but he escaped. It was immediately after this that his father ‘Alī al-Dawla surprised and defeated them. On the latter’s death Gershāsp made Nīḥāwān his residence. Farāmārız having recaptured Hamadān gave it as sēf to his brother on condition that he had the khotā pronounced in his name. In 434 (1042) Toghūr-Beg seized this town and demanded that Gershāsp should hand over Kinkawar, which its defenders refused to do. In 436 (1044) Gershāsp regained Hamadān and declared himself a vassal of the Būyīd Abū Kālidjār; next year Toghur sent his brother Yannāl to recoup the Ghuzz, but it was the prince who fled and taken refuge among the Dīwjakan Kurds. Yannāl in 439 (1047) took Kinkawar, which was commanded by a lieutenant of Gershāsp’s, ʿOḵba b. Fāris, who, to obtain the best conditions of surrender, pretended that he still had considerable supplies. After the loss of his possessions, Gershāsp took refuge with the Būyīd Abū Kālidjār. In 441 (1049) he was in Isfahān and received favourably the overtures of Mawdūd the Ghurānawī who was seeking help against the Sālḏḵājd, but he lost many soldiers in the desert and fell ill, which forced him to return. He died at al-Ahwāz in 442 (1051).

4. ‘Alī, son of Farāmārız, married Arslān Khaṭūn, daughter of the Sālḏḵāj Dīḏān, aunt of Sulṭān Malik-Shāh, in 469 (1076). Having sought refuge in Kirmān he was given the sēf of Yard (*Rec. de Textes rel. à l’histoire des Seljouques*, i. 26). He was killed in 488 (1095) fighting by the side of Tutāsh (Ibn al-Aṭīrī, x. 312).

5. ‘Alī al-Dawla Abū Kālidjār Gershāsp, son of ‘Alī [p. 145], prince of Yard, was in the service of the Sālḏḵāj; he had married the sister of Sulṭān Muḥammad and of Sandjar; dispossessed of his sēf, which was given to the cupbearer Karadža by Sulṭān Muḥammad, he put himself under Sandjar’s protection and was present at the battle in which the latter defeated his nephew (513 = 1119). He had escaped from the fortress of Farāzim, in which Muḥammad had had him interned (*Rec. de Textes rel. à l’histoire des Seljouques*, ii. 133).

**Kāʾa** (pl. Kāʾa, Kelī) in Arabic the name for a fortress or stronghold built on a hill or small elevation. In Turkey it also means the interior of a city in contrast to the outer suburbs (cf. Zunker, *Türk.-arab. Pers. Handwörterbuch*, p. 707). The word which looks good Arabic and is fairly generally regarded as a genuine Arabic word may be a loanword from Persian. Frankel first raised doubts as to its genuineness in *Die Aram.*, *Fremdwörter im Arabischen* (Leiden 1886), p. 237, because it cannot be derived from any Arabic root. Quite recently A. Siddiqi, *Studien über die pers. Fremdwörter im klass. Arabisch*
Kalā — Kalah

(Göttingen 1919), p. 70 sq. has championed the Persian origin of the word. The original is considered to be the Persian kalāt (a fort or village on a hill), (see Vallers, Lex. Pers.-Lat., ii. 859). This kalāt, strictly an appellative, appears at various places on Iranian soil, especially in Afghanistan and Fārs, as a local place-name also (Kalāt, Kilāt); cf. G. Le Strange, The Lands of the Eastern Caliphate (Cambridge 1905), p. 269 sq., 332, 395.

The form kalāt is of recent origin and has arisen through the addition of an inorganic t to the older kalā; cf. Andreas in the Mitt. d. Vorderasiat. Gesellschaft, dritter Band, (Berlin), ii. (1897), 85 sq. and Pauly-Wissowa, Realencyclo. d. klass. Altertumswiss., i. 1176. Kalāt (also kalā) has survived for example in place names in Māzandarān; for references see Melgunow, Das südl. Ufer des Kaspiischen Meeres (Leipzig 1869), p. 303 sq. The old Iranian form of the word must, however, have been *kalāk; this is shown by the Arabic khulāf (town), which is certainly of Iranian origin, not perhaps an Arab. origin (from Khulāf, which cf. de Lagarde, Arment Studien (Göttingen 1877), No. 2357 and Hubbschmann in the Zeitschr. d. Dtsch. Morgenl. Gesellschaft, xlvii. 252 wished to make it. *Kalāk would regularly become Kalū (Andreas, op. cit.). It is still uncertain why the Arabs added an *ain at the end of the word. The word certainly was borrowed very early; the prototype yielded was perhaps not kalū, but still the oldest form *kalāk, the final k of which of first of all becoming k might be weakened in pronunciation to *ain. (It is also possible that the Arabs took Persian l as a so-called emphatic lām, cf. al-askar from taṣ-ṣārār, Ed.). In the Arabic linguistic area there are a fairly large number of place names, which have kalā as their first member; cf. kalā, kalāt; Yākūt, Maqārī, (ed. Wüstenfeld), p. 357; al-Balādhūri, Futūḥ al-Buldān (ed. de Goeje), p. 533 (Index); Ibn al-Qalībī, al-Kāmil (ed. Tornberg), xiii. 786–9 (Register); Vulgar, op. cit., ii. 735; (M. Streck)

al-Kalā. See ALCALA, KAĻAT ENI ARBĀS etc.

Kalāh (also Kalāh, Kalā, Khā and Killa), according to the medieval geographers the name of an island or peninsula, which played an important part as an intermediary in the trade and navigation between Arabia, India and China. It was particularly noted for its tin-mines; it is at the same time described as a centre of trade in camphor, bamboo, aloes, ivory, etc. Its capital was likewise called Kalāh; cf. e.g. al-Dimashqī, p. 152, 1170, 12; al-Nuwayrī in (A. v. d. Lith, op. cit., see below, Bibli.), p. 281; the sea washing this region, described as difficult to navigate, was called “the sea of Kalāh” after it; see al-Mas’ūdī, i. 370, 10, 349, 11; al-Dimashqī; p. 152, 1170. The identification of the situation of this island is of importance for the history of Indo-Arabic trade. According to the statements given by the merchant Sulaimān (his journal was edited in 237=851) and Yākūt, a location in Further India is alone possible. The islands and peninsula of Further India have been especially famous for centuries as producers of tin; cf. thereon: Ritter, Erkundige, v. 23, 24, 28, 30, 77–80, 439–439. As it is expressly stated of Kalāh (e.g. by Abū Zaid al-Sirāfī; see below, Bibli.) that it at least for a time — was under the rule of the king of Zābēj (= Java; see A. van der Lith, op. cit., p. 231 sq. and JAVA, ii. 574 sqq.), in identifying it, we must look in the first place to the south-western part of Further India, in the region of the Strait of Malacca. We may leave Sumatra out of this limited choice, especially as it only produces tin in small quantities and of inferior quality. The island of Bangka on the S. coast of Sumatra, now famous as a rich tin-producer, is to be left out of the reckoning, as the mines there have only been known since 1710 and were not worked before (cf. A. v. d. Lith, p. 263). This only leaves us the peninsula of Malacca and we would have to follow Wallkenner (in Nouvelles Années des Voyageurs, Paris 1852, p. 19) and identify the modern town of Quedah (Queda, Keidah, Kedah) on the west coast of the peninsula in 6° N Lat. with the Kalāh of the Arab authors. The province of Quedah (on it cf. Ritter, Erdkunde, v. 20 sq.), watered by the river Kalang, which would appear to coincide more or less with the area of the peninsula in the modern town of Kalāh, which once was a centre of Malacca for its busy tin trade. The actual name of the chief town is Kadah (to-day pronounced Keidah). Quedah is to be explained as simply a corruption through the Portuguese. In the Turkish Muḥiṭ of Siddi ‘Ali (see i. 287), written about 1554 the form Kēdā is found; see Bittner and Tomaseck, Die topogr. Kapitel des indischen Steinriesengesichts Muḥiṭ (Vienna 1897), p. 86 and see there the maps reconstructed by Tomaseck from the statements of the Muḥiṭ and from Portuguese sources (plates xxii. and xxiv.). Quedah is at the present day an unimportant place but in earlier centuries it was a flourishing, much visited and populous harbour; see thereon Ritter, op. cit., p. 25 and A. v. d. Lith, p. 261.

The identification put forward by Wallkenner is also accepted by A. v. d. Lith, p. 259, 308, de Goeje (in De Gids, Amsterdam 1893, iii. 297), Tomaseck, op. cit., and G. Le Strange in his translation of Hāmid Allâh Mustawfi’s Nuzhat al-Kulûb, p. 194. Quatremère, op. cit., p. 734 and Yule-Burnell, op. cit., p. 145 consider it probable. The latter both think that Kalāh might be identical with the Kēdah of Ploemey who required for the latter town (cf. the article Kēl in Pauly-Wissowa, Realencyclo. d. klass. Altertumswiss., xi. 1075) seems to refute this.

The equation Kadah (Queda) = Kalāh seemed to be made quite certain by the fact emphasised by Kern in A. v. d. Lith, p. 308, that Malay d is pronounced very like t; Malay Kadah would therefore have sounded to an Arab ear as Kalāh. But on the other hand it should be remembered that recently G. Ferrand (see Bibli.) contests the plausibility of a phonetic change from Kadah to Kalāh. According to his investigations, Kalāh would not be Kadah at all, but is rather to be equated to Kērah, Kra (on maps) in the northeast part of Malacca (near 10° N. Lat.).

After what has been said above we are only left with the choice between Kērah or Kērah (Kra) on Malacca for the identification of the Kalāh of the Arals. The other attempts to locate the position of Kalāh — on Ceylon (harbour of Galle, Galle, Pointe de Galle; so Reinaud and Dufour), Malabar (so Reinaudot; see Ouseley, op. cit.), Coromandel (so Goldmeister) — should now be definitely rejected as wrong.

Besides Kalāh we find occasionally in the Arab geographers also Kalāh-bār, e.g. in the voyage
of the merchant Sulaiman (Reinaud, Relation, etc., ii. 18, 19) and in al-Masūdī, i. 3-4); Reinaud wished to separate this from Kalāb entirely and connect the name with Coromandel, or rather its older Sanskrit form (which Gildemeister had already compared with Kalāb). But that so far west a location for Kalāh-bār is excluded is shown by Sulaiman’s reference, according to which Kalāh-bār (like Kalāb, see above) was a dependency of the king of Zabedj (Java); Kalāh and Kalāh-bār are probably identical as Quatremerre, op. cit., p. 733 sq. and A. v. d. Liith, p. 258, 253 have said. What-bār means in Kalāh-bār is quite uncertain; the explanations of Sulaiman (as = mānum = kingdom) and of al-Masūdī (= sea) arouse little confidence.

Most probably it is from the district of Kalāb in Malacca discussed above — whether it is Kēdāh or Kērah (Kra) — that tin gets the name kalās = “the Kalāa” in Arabic. Like the Persian kalā (Kalāt; see the art. KALĀ) the Arabs usually reproduced Kalāh by Kalā; hence the nomen ratiwm kalās (kalāt). The somewhat fanciful observation of the traveller Misār b. Mulhalib (in Yāqūt, ii. 162, 163, 166, 167; Scholer, op. cit., p. 18, 19, 44, 45 sq.) that tin is called kalās from the fort (kalā) of Kalāh, on which alone mines of this metal existed may be described simply as an attempt to explain the term kalā (with k). Besides Kēdāh and Kērah, Kēlāng, Klang, a district in Selangor in Malacca might possibly come into consideration; cf. thereon the article KALĀ as well as for the relationship of kalās to the Malay keting = tin.

This same al-Kalā, which was said to be the site of a very fine tin-mines, is usually regarded by the Arab geographers and lexicographers as the place of manufacture of a celebrated kind of Indian sword, called kalās (kalāt) to distinguish it. (Further information in article KALĀ.)

KALĀ-I SEFĪD. See KALĀ-I SULTANIYE. KALĀ-I SULTANIYE. See KALĀ-I SULTANIYE. KALĀM ("speech") is defined by the grammarians as such utterance (lit.), not single words, and which conveys a meaning by convention, not nature (wob), not ṭab, as in exclamations; see nūr (suf.). So the Adurjūnīmiya; the Mufaqṣil (§ 1) says it must be a complete sentence, however simple, and Ibn ‘Aqīl (Sharh al-Alfiya) distinguishes in detail between it and kalām (a compound of three or more words, not necessarily giving a complete sense) and kalīma (a single word with a meaning by convention only) and jawwār which covers them all. The Dict. of the Techn. Terms (pp. 1268—1707) gives a thoroughly scholastic discussion of kalām and its parts, phonetically, grammatically, lexicographically, rhetorically. See also, De Sacy in Anthol. Gramm., Arabic text, pp. 73 and 93 and notes. In lexicography kalām is a generic noun for speech, little or much (al-Djahwarī in al-Shab and Lisan, xv. 428), applying to every kind of talk, ḫūkū ma yuťakalanan bih (Ibn ‘Aqīl), or an expression for successive sounds (qawāt), giving an intelligible meaning (al-Fayyūmī, al-Mījābī). This is the actual usage of the root in the language. Thus bi-kalām, said by Allāh to Mūsā (Kur. vii. 141) is paraphrased by al-Baṣīdī (ed. Fleisch, i. 363 infra) bi-taklima yāka, “by my speaking to thee”, and on Kur. xliii. 15, al-Baṣīdī says that kalām is an im for taklim (ii. 268, 2). In the remaining two occurrences, kalīma Allāh, Kur. ii. 70, is ambiguous and may mean either Allāh’s actual speaking to Mūsā or the law, while in Kur. ix. 6, it seems to mean clearly the content of Islam. The 2d stem of the verb is used fre-
quently in the Kurān in the sense “to speak to” some one with the accus. of the person addressed (al-ʻAš'ār al-kāfīna, ed. Haiderābādī, p. 27, says that taklīm means an-nuṣhāfaha bi-kalām) and the 5th stem occurs four times (xi. 107, xxiv. 15, xxx. 34, lxviii. 38) in the neuter sense “to speak, talk, discuss” with a bi of the subject discussed; in xxiv. 15 appears a shade of contemptuous reference, more “talkings with the mouth” (cf. Duveyrey, ii. 4860). In the later development kalām came to mean the statement of an intellectual position or an argument upholding such a statement, and a mutakallim was a person making use of such kalām’s; so passim in the Fihrist. By al-Ma‘āṣī (Murādī, Paris ed., vii. 161) takallam is used of the “patter” of a public story-teller and mimic by the roadside.

If the first technical use of kalām seems to have been in the phrase kalām Allāh, meaning either the Kurān or Allāh’s quality (taptic) called Speech. For these applications the way was prepared in the Kurān in the passages already quoted. But the order in which they came and the influence which produced them are still, like all the beginnings of Muslim theology, exceedingly obscure, and we are not yet in a position, in spite of Horten’s collection of materials in Die philosophischen Systemen der sechszehn Theologen im Islam (Bonn 1912) even to sketch their development. It seems clear that the Muslim thinkers were affected (i) broadly by the conceptions, classifications and dialectic of Greek philosophy; (ii) much more minutely by personal intercourse and discussion with the theologians of the Oriental Christian Church (especially the Syriac Church), and the last influence has been suggested tentatively by Horten, especially at several points in his Systemen; but he has not supported it by any detailed references or translations from Indian literature; it remains, therefore, a bare, although very possible suggestion; cf. further on it Masson’s review in Der Islam, iii. 408. The idea of representing the problem of the personality of Allāh as a combination of a dhīl or essence with gisfah or “qualities”, seems partly due to the methods of Greek theories of personality, partly to the Kurānītic rhetoric which, following the fashion of the old poetry, describes Allāh both as dhīl, rational and partly to Christian explanations of the relation of the persons in the Trinity. The problem, however, remained of the relation between these qualities and the essence, and was eventually given up by orthodox Islam which took refuge in the statement, “they are not He (i.e. Allāh himself), nor are they other than He”; this was an admission that the relationship was a theological mystery, ungraspable by human thought. These qualities, further, were uncreated and eternal; the personality of Allāh was unthinkable without them. But rationalistic Islam, later the Mu‘azzilites could not admit such a mystery and tended to reject the qualities as unnecessary to the essence. In these discussions the quality “Speech” was evidently prominent, and on it the influence of the Christian theologians was peculiarly felt. It is never represented by an epithet in the Kurān, i.e. Allāh is never a Speaker, mutakallim or kalām, although the later theologians used mutakallim frequently of him, and there is only one certain use of kalām for the actual Speech of Allāh (Kur. vii. 141); but Allāh is represented again and again by means of verbs as “speaking” and al-ʻAš’ār (al-Mā‘āṣī, p. 23 sqq.) quotes over ten passages, using different expressions, as bases for the doctrine that both the Speech of Allāh, as a quality inherent in Him, and the Kurān as a manifestation of that quality are uncreated. These passages, it may be said, give distinctly the impression that the doctrine was historically reached through other means, or arose by other causes, and that these proofs were then sought as a Kurānītic basis. The rationalistic theologians, on the other hand, denied the possibility of a material, yet uncreated, manifestation of the eternal quality of Speech. Thus when Allāh spoke to Mūsā (Kur. iv. 162; vii. 139 sqq.; xx. 8 sqq.; xxviii. 30) from the tree (ḥimaḥra) they held that the sound of the words was created in the tree as a muḥājara, and therefore there was a state (būl) in it (cf. Gohilzāker in Fāḥiṣ al-Dīna al-Rāzī in Der Islam, ii. 245 sqq.). This the later Aḥṣārītes met by explaining that Mūsā did not hear this Speech with his ear, but in his heart, hearing, but spiritually and as coming from every direction and perceived by every one of his organs. It was thus received in his sensorium by the islām al-mu‘āṣab, the Aristotelian “common sense” (al-Ma‘āṣī on Kur. vii. 139, xx. 12; ed. Fleischer, i. 343, 593, 1). Further, it was recognized at least as early as al-ʻAš’ārī (al-Mā‘āṣī, p. 25) that this Speech does not go without ceasing, for the quality is perfect and silence would be an imperfection in it. The Kurān (xviii. 109; xxxi. 26) and traditions (al-Mā‘āṣī, p. 25) speak also in violent metaphors of the kalāmāt, separating them from all eternity Allāh has been speaking. But al-ʻAṣ’ārī protests (ṣaḥīḥ, p. 41) against the application of the term laf, verbal utterance, to the Kurān; that is not seemly even in the case of our recital of it. Similarly the Lisan (xx. 427, 17) says that you must not call the Kurān kalām Allāh. Al-ʻAṣ’ārī does not seem himself to have reached the position of the later Aḥṣārites that the Speech of Allāh is thinking, at least “ideas in the mind”, kalām or hadīth nafsī, and therefore can go on without letters or words. Al-ʻAṣ’ārī’s desire was only to protect the Kurān from any approximation to the transcendent, numberless; from all eternity Allāh has been speaking. But al-ʻAṣ’ārī protests (ṣaḥīḥ, p. 41) against the application of the term laf, verbal utterance, to the Kurān; that is not seemly even in the case of our recital of it. Similarly the Lisan (xx. 427, 17) says that you must not call the Kurān kalām Allāh. Al-ʻAṣ’ārī does not seem himself to have reached the position of the later Aḥṣārites that the Speech of Allāh is thinking, at least “ideas in the mind”, kalām or hadīth nafsī, and therefore can go on without letters or words. Al-ʻAṣ’ārī’s desire was only to protect the Kurān from any approximation to the transcendent, numberless; from all eternity Allāh has been speaking. But al-ʻAṣ’ārī protests (ṣaḥīḥ, p. 41) against the application of the term laf, verbal utterance, to the Kurān; that is not seemly even in the case of our recital of it. Similarly the Lisan (xx. 427, 17) says that you must not call the Kurān kalām Allāh. Al-ʻAṣ’ārī does not seem himself to have reached the position of the later Aḥṣārites that the Speech of Allāh is thinking, at least “ideas in the mind”, kalām or hadīth nafsī, and therefore can go on without letters or words. Al-ʻAṣ’ārī’s desire was only to protect the Kurān from any approximation to the transcendent, numberless; from all eternity Allāh has been speaking. But al-ʻAṣ’ārī protests (ṣaḥīḥ, p. 41) against the application of the term laf, verbal utterance, to the Kurān; that is not seemly even in the case of our recital of it. Similarly the Lisan (xx. 427, 17) says that you must not call the Kurān kalām Allāh. Al-ʻAṣ’ārī does not seem himself to have reached the position of the later Aḥṣārites that the Speech of Allāh is thinking, at least “ideas in the mind”, kalām or hadīth nafsī, and therefore can go on without letters or words. Al-ʻAṣ’ārī’s desire was only to protect the Kurān from any approximation to the transcendent, numberless; from all eternity Allāh has been speaking. But al-ʻAṣ’ārī protests (ṣaḥīḥ, p. 41) against the application of the term laf, verbal utterance, to the Kurān; that is not seemly even in the case of our recital of it. Similarly the Lisan (xx. 427, 17) says that you must not call the Kurān kalām Allāh. Al-ʻAṣ’ārī does not seem himself to have reached the position of the later Aḥṣārites that the Speech of Allāh is thinking, at least “ideas in the mind”, kalām or hadīth nafsī, and therefore can go on without letters or words. Al-ʻAṣ’ārī’s desire was only to protect the Kurān from any approximation to the transcendent, numberless; from all eternity Allāh has been speaking. But al-ʻAṣ’ārī protests (ṣaḥīḥ, p. 41) against the application of the term laf, verbal utterance, to the Kurān; that is not seemly even in the case of our recital of it. Similarly the Lisan (xx. 427, 17) says that you must not call the Kurān kalām Allāh. Al-ʻAṣ’ārī does not seem himself to have reached the position of the later Aḥṣārites that the Speech of Allāh is thinking, at least “ideas in the mind”, kalām or hadīth nafsī, and therefore can go on without letters or words. Al-ʻAṣ’ārī’s desire was only to protect the Kurān from any approximation to the transcendent, numberless; from all eternity Allāh has been speaking. But al-ʻAṣ’ārī protests (ṣaḥīḥ, p. 41) against the application of the term laf, verbal utterance, to the Kurān; that is not seemly even in the
furthilites followed their normal method in dealing with theological mysteries, of putting the two elements flatly side by side and attempting no solution. Al-Nasafi (al-Nasafi, p. 79) says: "The Kur'an, the Speech of Allah, is created and written in our copies, preserved in our hearts, recited by our tongues and heard by our ears. Yet it does not reside (hâlî) in these". Al-Taufazînî, as an Ashârite, suggests as an explanation that the word "fire" written on a piece of paper does not have in it the burning quality of fire and consume the paper.

The later Ashârite view of this relation may be illustrated in the words of al-Fâdîl (d. 1236 = 1829; see al-Fâdîl, ed. 1315 with al-Saidjâ'î's comm., p. 50). "These Glorious Expressions [the ends of the Kur'ân] are not a guide to the eternal quality in the sense that the eternal quality can be understood from them. But what is understood from the expressions equals (muwâlit) what would be understood from the eternal quality if the veil were removed from us and we were to hear it"; apparently the distinction between âsûbûs and ânâsûbûs. Thus the wording of the Kur'ân is created, and al-Fâdîl has even a shade of doubt whether that wording goes back to the Preserved Tablet, that is to Allah, or is due to Òjjibir or even to Muhammad. Similarly, Ibn Hâmîn [q. v.] reports (Milal, ed. Cairo, 1317, p. 211) in this, and especially of al-Dâ'îlînî [q. v.] and that their formula was that the Kur'ân was the kalâm of Allah only in the sense that it was an 'ibâra, an "expression" for the kalâm of Allah. Similarly in al-Fîlîk al-Akbâr, ascribed to Abû Hamîfa (d. 150) with a comm. by al-Mâturidî (d. 1333), the word for this relation is already 'ibâra and also Îhkyâ, "reproduction" (Haillard Bâdî 1321, p. 25). There is a very complete analytical and objective, but not historical, statement of the different positions in the Mawâûsî of al-Fîlî with comm. of al-Durqânî, Bâlîk 1266, p. 495.

In this the influence of Christian theologians seems plain. The parallel between the uncreated but creating Logos, the reason and word of God, with its earthly manifestation in Jesus and this kalâm, as eternal quality, as creative agency and as revelation in time is very close. The position of the Ashârite school that the quality is practically the thinking of Allah, although they carefully guard against confusion with our "thoughts" which originate in time (al-Fâdîl, p. 52) suggests the rational side of the Logos, the Hebrew åvâd, the divine seva, but it is not allowable to ascribe åbîr, seva, to Allah because philosophical and etymological implications; cf. Mawâûsî, ed. Cairo, p. 541, ed. Oûsenen, p. 161, 'Abdî, and al-Bâîqâwî on Qur. ii. 41, ed. Fleischer, i. 57, 65. The Christian theologians naturally translated their Syriac mélîlîn, åbîr, with al-kalâm. On Christian influence in Muslim theology see further in Graf, Die arabischen Schriften des Theodor Abu Kurra and the various articles cited by Horton in his Philos. Systeme, p. 626; especially C. H. Becker, Christliche Polemik u. islamische Dogmen- hilden in Zeitschr. f. Assyri.-, xxvi. 175 sqq.

III. It is not an overhazardous conjecture that similar influence worked in developing the use of kalâm = theology and of mutakallîm = theologian. The Syriac mélîlîn (= takallîmus) and its derivatives were parallel to åbîr and åbîr, on both sides of their meanings, of reason and speech. Thus mélîlîn allâhîyîn means åbîr and mélîlîn, åbîr. Starting, therefore, with kalâm = speech, the development was easy to intellectual argument, especially as applied to theology. How much in the dark Muslims were on the origin of this use is evident from the eight explanations which al-Taufazînî gives (comm. on al-Nasafi, p. 10 sqq.): (i) Theologians begin, "The kalâm (statement, argument) on such and such a doctrine is . . ." (ii) Deals most with doctrine of Speech of Allah. (iii) Gives same weight to Speech in theology as philosophers give to mazâib, logic. (iv) Most essential of sciences taught by speech. (v) Speech between opponents necessary to it rather than consideration or reading. (vi) The most disputations of the sciences taught by speech. (vii) For its weightiness it is the "statement" as opposed to other sciences. (viii) The cutting, impressive science from kalâm = åbîr. Ibn Khaldîn, (see below) gives only two explanations: (i) That the science deals with speech only and not action (ansâb). (ii) The same as (ii) above; cf. further Haedarbrâ's translation of al-Sâhrâstânî's Milal, i. 26, and remarks, ii. 358--393.

But kalâm came only slowly to be the name for theology. At first, åbîr, "intelligence", was used for the whole speculative side of theology and canon law, as opposed to 'ïmam for the traditional side [see åbîr]. Then theology came to be called "the greater åbîr", al-Fîlîk al-Akbâr, as in the book ascribed to Abû Hanîfa and al-Mâturîdî, referred to above. There, p. 6, it is said, "al-åbîr fîl-dîn afdal min al-åbîr fîl-sîm", which would have been expressed later, "kalâm is more excellent than åbîr". Kalâm, in that book, is not used technically except for the Speech of Allah, Òjjibir generally taking its place; in the ìbâna of al-Ashâ'î [q. v.] kalâm occurs, similarly, only in titles to sections. But in the Fihrist (c. 377--400) kalâm is used normally in the sense of "statement" and also technically, with takallîm and mutakallîm, of theology; while åbîr is used, as regularly thereafter, of canon law. But thus followed speedily a further development: ìlim al-Kalâm became to mean not simply theology, but scholastic theology of an Aristotelianizing type; going back most strangely to Democritus and Epicurus, and a mutakallîm became to mean a theologian, first Mu'tazilite and later orthodox, behind whose theology lay the atomistic system which was Is-lâm's most original contribution to philosophy. The importance of this conception of the matter of the universe, as being of a grained structure and not infinitely divisable and continuous can hardly be over-emphasized. In Europe, until the xvith century, it was eclipsed by the authority of Aristotle; but it re-appeared then, first in a qualitative form (Boyle and Newton) and later quantitatively (John Dalton). It would be curious to contrast the experimental researches of these with the a priori speculations of Is-lâm. A mutakallîm, then, was thus distinguished, although calling himself an Ashârite, from the Ḥanbalite conservative traditionalists among whom al-Ashâ'î had reckoned himself, from the mystics who found their basis in religious experience (mârifah; ḥaṭârat and wakawâsîn in Fihrist, p. 183, 18) rather than in 'ilm and dialectic, and from the philosophers (hukumâ'în) who based upon a blend of
Aristotelian and Neoplatonic philosophy; although all these might profess to hold the same doctrines of the Sūfī school, the end of them, of course, the Sūfī system, a structure of Mu'tazīlī rationalism erected on the doctrine of tawāhid, i.e. that the ultimate basis of our knowledge is not reason but authoritative instruction by an iner- rant guide, always in the world, whom man must seek and obey (cf. e.g. al-Ghazālī's Manūṣīh, ed. 1203, pp. 21 sqq. and Goldscheider's Streitverschriften der Gazālī gegen die Kāhinj-i Sāheb, passim) and the pantheistic side of Sūfism which is not really Muslim at all, except in vocabulary and imagery. It is a great misfortune for theologians, and the real centre of the whole of the Fīlīrīst, which deals with Kalām in this sense, is lost, and with it the account of the origin of this science, and that the first fannā, especially, has reached us in so hope- less a condition (Houtsma, in Zeit. f. d. Kunde der Morgenl., iv. 217—235, essentially supplementing Flügel's ed.). Yet it is clear that the author divided the mutakallimun's of his day (end of 11th. cent. of H.) into five: (i) Mu'tazīlīs; (ii) Shi'ītes, both Imāmītes and Zaidītes; (iii) Predestinarians and Anthropomorphists; (iv) Khārājītes; (v) ascetic Sūfis. This arrangement may have been due to the Shi'ism and, therefore, Mu'tazilism of the author; but the Mu'tazīlīs were cer- tainly the first mutakallimun of his school. He places al-Ash'ārī in the third class and has evidently no idea of the importance of his school — he seems to have been a joker (p. 181, 186); yet he died c. 330. Nor is there any mention of al-Māturīdī who died 333. Al-Bākhīlī died 403, four years after the last date in our MSS of the Fīrīrīst (Flügel's preface, p. xii). Certainly the author of the Fīrīrīst grievously misread the future, for in his third class lay orthodox Sūfi mullahs. Of his fourth class only the Iḥāṣītes [q.v.] continued to have any importance. Nor does he show any idea of the speculative possibilities in his fifth class.

We cannot, as yet, write a connected history of the atomic theory of Islam, the essential differ- ence of the system of the mutakallimun, and it may never be possible. We have only references to and short quotations from the earlier disputants upon that system. Even the extant writings of al-Ash'ārī do not give us any help, and we have, so far, none of al-Bākhīlī's writings, which probably would. Fortunately Horten has gathered up and untangled, with great diligence, in his Philosophische Systeme the later references and quotations, and from these it would appear that the Mu'tazīlīs of Abu 'l-Hudhail al-'Allāf (d. 235 or 226); cf. Abu 'l-Hudhail and Horten, pp. 246 sqq.) was the founder of the atomic school and was opposed to it by two other Mu'tazīlīs, Highām b. al-Ḥakam (d. 231 (?); cf. Hīshām and Horten, pp. 170 sqq.) and al-Nāṣrī (d. 230; Horten, pp. 189 sqq.). It thus arose among the Mu'tazīlīs, however it may have reached them; but we cannot be sure to what extent their system was exactly that which lies behind all the rea- sonings of the later mutakallimun. It is unneces- sary to describe the system here, as it has already been given under ALLĀH, i. 307 sqq. It may, however, be worth while to give the following references to Horten where he deals especially with it, pp. 22 sqq., 42 sqq., 178, 191, 246 sqq., 263 sqq., 526, 551. Pp. 195, 235, 236 make it plain that the division of time into atoms, which could not be further divided, i.e., that time is not endlessly divisible, goes back to Zeno's para- dox of Achilles and the tortoise; it was a solu- tion of that paradox and made motion possible; cf. William James, A Pluralistic Universe, p. 225—231. Ibn Ḥazm in his Milā, because of his very hostility, has given us particularly full accounts, e.g. v. 92 sqq. But in the nature of the case it is not probable that the earlier disputants put their discussions into permanent written form, and still less permitted copies to be freely made and spread abroad. We have the classic case of al-Dīnārī (d. 297—909), a very great theologian and the founder of the Sūfī, on whom no shadow of real suspicion of heresy ever fell, but who openly said that the seeker of the divine Reality might expect to be called a heretic (Goldscheider, Vorlesungen, p. 175; see, further, al-Kūshīrī, Rūḥānī, Bilāhīc 1209, pp. 139 sqq. and Dīnārī, above, i. 1063). When he discussed questions of tawāhid, that is the doctrine of the person of Allah, with his students, it was behind closed doors. We can hardly imagine that these discussions were concerned with such questions as al-Ghazālī's al-Rū'a in al-Kūshīrī, al-Kīsād, or even al-Taṣawwūfī on al-Nasafi; they must have have much deeper and have been like those which Ibn Ḥazm has exposed to us with malicious indignation, dragging those Godless mutakallimun from behind their closed doors. In reply the mutakallimun would have protested that he was not playing the game and did not understand their object. The Mu'tazīlīs preceded the orthodox theologians in open publication. We still have the Masūdī of Abu Rashid, a Mu'tazīlī, who wrote about 400 (1009) (Horten, Philosophie der Araberen, ii. 196, Anchor Becher, Al-Ghazālī, Ācimītische Substanzenlehre). Al-Ghazālī, at a somewhat later date, actually did put such discussions into writing in his two al-Mudāmān; but it was on the basis of Neoplatonic philosophy and not of atomism (see below).

In the Muḥaddīmat of Ibn Khaldūn (d. 808 = 1406) we get another view of this development, about four centuries later than the Fīrīrīst (Qua- tremère's ed., iii. 27—43; Bilāhīc, 1374, pp. 223—228; trans. De Slane, i. 40—64). In Quatremère's text (pp. 44—59; trans. De Slane, pp. 64—85) there follows a section on the ascetic and metaphysical passages in the Ḳāfān in which the word is not found in some of the MSS., nor in the Bilāhīc editions. Ibn Khaldūn evi- dently added it later from a perception (i) that his view of these passages was essential to his general position and (ii) that he had not dealt fully enough with some of the theological matters of controversy. He traced, in fact, the origin, in great part, of the science of Kalām, viewed as defensive scholasticism, to these ambiguous and obscure passages; it sprang, thus, more from exegetical than from philosophical pressure. There is certainly truth in this; but it seems also certain that the early Muslim theologians, under the influence of outside ideas which were pressing in upon them, made use of the obscure verses to secure a possible footing in Islam for these outside ideas. In this they were greatly aided by Muhammad's own confused thinking, and also by a certain largeness of conception and width and freedom of ideas which belonged to his greatness; he had not been a metaphysician; but a keen psychologist. But it is especially characteristic of Ibn Khaldūn's position, and in striking contrast to his otherwise
open-mindedness and genuinely scientific spirit, that he rejected all ta'wil, or elucidation, of these passages as absolutely as Ahmad b. Hanbal or al-Asbāḥī themselves. He interpreted Kur. iii. 5 (cf. Avicenna, ed. Fleischer, l. 146.), as meaning that only Allah knew their meaning and that man should abstain from useless speculation. He thus secured a method of practically throwing out all the passages of the Kurān which did not suit his view of the universe, e. g. those speaking of the jinn [q. v.], and also, which was worse, set up a limit to man's investigation of the world.

Kulm having thus arisen from these difficulties, or impossibilities, of exegesis, the different sects developed according as the anthropomorphic Kurānic expressions bearing on the essence (dhīl) of Allah or on his qualities (ṣiṣḥat) were treated literally (taṣḥīḥ, taṣfīḥ) or as having a meaning different in his case from the literal and unknown to us (tansūk) or according as tansūk was applied also to the other descriptives of Allah, the meanings of which were quite plain and possible in the literal sense because they all expressed ideas apart from the concrete. This last was the position of the Mu'tazilites, between whom and the first sect, the anthropomorphists, stood the sect which professed to follow the doctrine of "the Fathers" (al-salāf). So the orthodox party was driven to the use of rational proofs (aqīla taṣḵila) and there arose al-Asbāḥī who combined ʿaṣr and naḥa, denied taṣḥīḥ, establishing "the qualities consisting of ideas" (knowledge, power, will, life), and limited tansūk as the salāf had done. He also established "hearing" and "sight" and "the speech which exists in the mind" (al-ḥaḍīm bi-nafa ). He also discussed (takallama) with the Mu'tazilites their ethical position (ṣiṣḥa, taṣfīḥ, taṣḥīḥ) and eschatology and future rewards and punishments. He discussed with the Imāmīya the principle of government, and demonstrated that it was not a part of the Faith, but a convenience upon which the people had agreed. With all this compare and contrast Goldziher in Verleugungen, pp. 119 sqq. The next great name given is that of al-Bākhīlī (d. 493) [q. v.]. He reduced the whole to a system and established the intellectual basis and arranged the arguments. Thus he established the atom (al-dīwān al-fari'd) and the void (al-ḥadda) — it is to be noticed that dīwān with the Aristotelian Neoplatonists means "substance" in the philosophical sense, and that ḥadda is exactly the Lucretian inane; that an accident (aṣṣāf) cannot subsist in an accident and that it cannot continue through two atoms of time (see also, Ibn Khaldūn, ed. Quatremère, p. 114; De Slane, p. 157). So he made these principles only secondary in importance to the articles of the Faith, because he held that the nullity of an argument meant logically the nullity of the thing which it proved, and the converse. These principles were arguments for the Faith; the Faith was true, therefore these principles must be true. It is evident that formal logic was not the strong point of those who built up this system, however ingenious it might be; and that Ibn Khaldūn reman. And it is further evident that with al-Bākhīlī the historical value of Ibn Khaldūn's outline begins. He makes no mention of Ibn Hazm [q. v.], a theological free lance, who died in 456; but he gives the titles of two of the books of the Imam al-Haramain (al-Djwañain, q. v., d. 478), a teacher of al-Ghazālī, apparently because of his reputation although no distinctive development is attached to his name. This is intelligently explained by the fact that formal logic was taken up by the theologians who had discovered that it was only a tool for thinking and not a part of philosophy. But this led to an examination of their foundations and to the rejection of a great part of them; so that they no longer argued, as al-Bākhīlī had done, from the nullity of the proof to the nullity of the thing proven. Their new proofs were derived, to a considerable extent, from the physics and metaphysics of the philosophers, and thus they entered upon a new method which was called taṣfīḥ al-mutakalla'mīn; yet they also introduced into it a considerable amount of opposition to the philosophical positions because these were said to be the same as their own earlier heresies. Leaders in this new school were al-Ghāzālī (d. 505) and al-Rāzī (d. 606; see on him especially Goldziher in Der Islam, iii. 213—247) and to their books Ibn Khaldūn would still send the student of theology who wished guidance in his criticism of the philosophers, although there was in them some amount of opposition to the older method. It is to be remembered, too, that al-Rāzī was a systematic user of ta'wil (Goldziher, p. 227) of which Ibn Khaldūn disapproved. But such students as wished simply to follow the path of the salāf in theology should take the old method of the mutakallīmīn — only there could true Islam be found — and especially should study the ṭafrīa of the Imam al-Haramain. This apparently means that with al-Ghāzālī there came a sharp abandonment of the method of the atomists and a going to school instead with the Aristotelian Neoplatonists. Such, too, is certainly the evidence of al-Ghāzālī's writings. After al-Ghāzālī and al-Rāzī came still deeper confusion between theology and philosophy, until the subject matter of the two was regarded as one. Yet the mutakallīmīn's had distinguished sharply the physics and metaphysics of the philosophers from their own theocentric position, using an intellectualist system in defense of dogmas which were down by the system of the atomists. He gives as an example of this confusion the Ta'wil of al-Bāḏwā'ī (d. 685 = 1286) and every user of al-Bāḏwā'ī's Kurān commentary will recognize what he means. The learned of Persia (al-'Adām) who followed al-Bāḏwā'ī had used the same method in all their works. Of the kind of Kulm that was left in his own day Ibn Khaldūn had no good opinion; its ambiguities (iḥānāt) and generalities (iṭṭā'āt) were a profanation of the Creator rather than a defense. And no Kulm was longer needed; it had been a defense against the Muhādīna and the Muṭahādīna and they were extinct. But it was rather disgraceful for one who knew the Sūras by heart not to be able to give a reason for the faith that was in him.

Yet Kulm had still a long course to run, and the commentary of al-Bāḏwā'ī on the short treatise of al-Fadlālī, already referred to, gives a good idea of the development of the system of the mutakallīmīn. Text and comment are quite modern — al-Fadlālī died in A.D. 1282 and al-Bāḏwā'ī in A.D. 1344; they are finished scholasticism and the title, Kif yāyat al-Aswām fī 'Ilm al-Kulm, "The Sufficiency of the Commonality in the Science of Kulm," with reiterated statements in the text that only so much is given as is necessary for sal-
vation, shows a purely intellectual view of religion. The commentary is based throughout on atomistic reasonings; the physics and the metaphysics are atomic. The text suggests an intentional counterblast to the treatise of al-Ghazālī with a similar title, Ilkām al-`Avāmin an`lm al-Kalam, “Rein- back the Commonality from the Science of Kalam”, yet the intention is nowhere expressed. In it al-Ghazālī had denounced the corrupting of the simple faith of the multitude with intellectualist arguments and had advocated very subtly what we would now call psychological methods — startlingly, for modern ideas, backed by the secular arm of the state. But al-Ghazālī had opposed the mutakallimūn system and method from the beginning. On the one hand he knew, as a fact of psychology, that being convinced against one’s will left one of the same opinion, and on the other, he did not approve of atomism as philosophy. He appears to make no specific reference to it in his works, and where he does give an abstract of theology, as a formal science (e.g. in al-`Irādah al-Ghazālī), he stops short of absolutely philosophical lotomism. That, for him, was intellectually impossible; but such an outline of concatenated dogmatics, as in the two books mentioned, was justifiable (Arba`in, pp. 25 sqq., ed. 1328). The only real philosophy for him was, apparently, the Aristotelian-Neoplatonic amalgam, and with it he had dealt in his books which have reached us in a sceptical but respectful spirit. Probably following the economy of teaching, which he himself professed, and which he and all Islam practised, he dealt thoroughly and destructively in other books with the atomic system, and this may explain the mysterious allusions which have been called “the secret” of al-Ghazālī (e.g. W. H. T. Gairdner on the Miṣḥāṭ in Der Islam, v. 121-153). For his attitude towards the mutakallimūn’s see further Al-Ghazālī’s, above, ii. 147 sqq., al-Munīfiṣ, pp. 8 sqq., and Miṣḥāṭ al-Anwar, Cairo 1322, 47 sqq.

It is significant that reform movements in Islam at the present time seem to have cut loose from the atomic philosophy, and to have gone back for leadership to Ibn Sīnā [q. v.], Ibn Khūdgh [q. v.] and the Aristotelians generally. Dīwān al-dīn al-Afghānī (see above, i., 1008 sqq.; E. G. Browne, The Persian Revolution of 1905—1906, Cambridge 1910, Chap. i.; Goldzirher, Die Richtungen der islamischen Koranauslegung, Leiden 1920, pp. 322 sqq.) and his friend and pupil Muhammad Abūn were the protagonists of this renaissance and continued the long interrupted method of al-Ghazālī, even on the side of the economy of teaching. The atomic system had crystallized and had become identified with the stiffest orthodoxy. In its origin, also, it had been, even with the Mu’tazilites, a weapon for the defence of accepted views and not an instrument of free investigation. Modern Islam, therefore, could have nothing to do with it, although it is possible that modern western atomic speculation may galvanize it into a semblance of life just as microbes have been used to defend the Kur’ānic doctrine of the djinn (Goldzirher, Koranauslegung, p. 356). Yet it should never be forgotten that this theory is the most original contribution which Muslim thinkers have made to the history of philosophy.

(D. B. Macdonald.)

Kalam (kālam, red) the reed-pen used for writing in the Arabic character. It is a tube of reed cut between two knots, cut obliquely (or concave) at the thicker end, having the point slit, as with us for the quill and later for the steel pen. It has to be very soft so that it does not wear away too quickly; the best kind comes from Wāṣīt and grows in the marshes (kabāl) of the Tārīr. It is allowed to steep like hemp and is kept in the water until its skin has taken on a beautiful dark brown colour. Its fibres should be quite straight so that the slit may also be even. To make the slit the slanted end of the kalam is laid on a long flat piece of ivory or bone, which is specially used for this purpose and is called miṣḥāṭ (Turk. mişṭā); the point is then slit with a sharp backward cut with a special very sharp knife with a long handle (penknife, Turkish balamintıraş). The point of the knife to the left of the incision is called inš (“human”), because turned towards the writer and the right waḥtī “savage”. If the former is slightly sofer than the latter so much the better. It has been made a rule that in the kinds of writing called nasīt, thulūth and riǧād the waḥtī side ought to be twice as broad as the inš side; in the kinds called dinārī and kīrma, it is the other way about. The nasīt is written with a pen slit exactly down the centre.

To protect the kalam from damage it is kept in a holder (miṣḥāna). These are of two kinds: 1) a metal box in the form of a long flat tube closed at one end by a lid with hinges and often adorned with arabesques. Attached to it is an inkwell (dawwat, popularly dawṣya). This kind is peculiar to the Arabs. In Osманlı Turkish it is called divvit (from Ar. dawvat; at an earlier period it was also called wpdbur “strictly plur. of kabr “grave”) by the Ottoman Turks, a word which is found as early as Abū Yusauf, Khudgh al-Khurābī (Cairo 1302, p. 17), with the meaning of “holder” (“case”); 2) a papier-maché box adorned with lacquerwork. In it is a drawer which also holds an inkwell. This kind is used particularly in Persia and is called kalamdar “pen-box”.

Sūra Ixvi. of the Qur’ān (Sūrat Nīn) is sometimes called Sūrat al-Kalam from its opening:

* N. — By the pen and what they write, . . .

According to the traditions quoted by al-Tabarī (Taṣfīr, Būlāk 1523—30, xxix. 107) the kalam was the first thing created by God so that he could write down events to come; two explanations have been given of this kalam: 1) the implement used for writing, a divine gift like the
Kalantar, a Sufi religious order, founded by Kalantar Yasuf (cf. Kalantar), an Arab of Spain, contemporary with Hâdîjî Bekâš (q. v.), brought to Damietta by the Shâhâd Dîâmâl al-Dîn al-Sâwî, a native of the town of Sâwâ in Persia; he is buried in the Zâviyâ which he had founded there. He shaved his beard and eyebrows, since by doing this he had escaped in an amorous adventure; all his pupils followed his example. This sect, however, must have its origin in an earlier period, for it appeared in Damascus towards the year 660 (1213); it attracted attention, by a strange costume adopted from the Persians and Medesians, which orders from the authorities forced it to abandon. The Mâlûm Sâlîm al-Mâlik al-Nâsîr Hûsân, grandson of Kâlâtânî, in 761 (1360) forbade them to shave the beard. According to al-Mânîsî’s account of them, they made it a rule to lay nothing aside and never to amass this world’s goods; but in his time they did not wear coarse garments nor subject themselves to any mortification or any devotional exercises, saying it was sufficient for them that their hearts were at peace with God. They wanted nothing more; they made no effort to attain a degree of virtue more eminent than this state of peace at heart. To show their indifference as regards everything outside their ideal, they took the course of getting away from the restraint of all the laws of politeness usually observed in society. Their morals also were very loose. Bâbâ Tâhir ʿUryân of Hamadân said: “I am the mystical gipsy called kalantar. I have neither fire, home nor monastery. By day I wander about the world, and at night I sleep with a brick under my head” (Quatrains, No. vi., Journ. Asiat., Series viii., Vol. vi., 1885, p. 516). The description of the odd costumes which accompanies the French translation of Chalcedonias by B. de Vigenèere (Paris 1662) and which is taken from the Navigations of Nicolas de Nicolai (Lyons 1568) gives on p. 23 an engraving showing one of these Kalandar...
protagonist of these views. This is certainly true of Vīsur, said to have been a Spanish Arab, who is often represented as the founder of the Kālandarī, as well as of Shāhīl Djamāl al-Dīn of Sāwā in Persia, who, Ibn Baṭṭūta says (i. 617 sq.), settled in Damletta and ended his days there. The expression ḫuĎa in Ibn Baṭṭūta here obviously means nothing more than "pattern, model". The Kālandarī seem to have originated in Central Asia and to have been strongly influenced by Indian ideas. According to al-Makrizī (d. 1442), they came about 400 years before his time into Arab lands. About 610 (1013) the first of them appeared in Damascus (al-Ḳiṣṭā, i. 433). Here there died in 622 (1225); this, not 722 = 1222 is to be read in al-Ḳiṣṭā, i. 433) the Persian Shāhīl Ḥasan of the Djawālīkī sect, who flourished under Sulṭān al-Malik al-ʿĀdīl Kethbogha and founded a monastery of Kālandarī not far from Cairo (Serȳkās = Kyríasos). The Kālandarī may have been most numerous in Persia and the great bulk of them, still in the 14th century at least, seem to have been concentrated in Ar-Rabādī (q.v.), the stronghold of the Sāfawīyā (Safawīyān, q. v.; cf. Adam Olearius, Persische Reiseschreibung, op. cit., 1656, p. 685: the Kālendarī). In Anatolia also and even in Rumelia in the early Ottoman period down to the 18th century, they sometimes played a dangerous part by attacks on the authority of the state and serious risings (cf. F. Babinger in Der Islam, xi. 145; Pečewlı, Yurğ Ch. Stambul 1283, i. 123). Even in the Ṣaldājī period similar risings seem to have been led by Kālandarī. There are also various indications of connections between Kālandarī and the Beirutī in 18th century.

KĀLANDARI has also become the name of a certain tune in Turkish.

Bibliography: cf., besides the works quoted above, also F. Babinger in Der Islam, xi. 94 and the references given here; also d'Herbelot, Bibliothèque Orientale (Paris 1697), p. 244; do. (Mastrecht 1776), p. 224 s. v. Calendar; Adam Olearius, Persischer Rosenthal, Book viii. § 67; Burhan-i Küf, ed. Th. Reebuck (Calcutta 1819), s. v.; J. P. Brown, The Derwishes (London 1868), where the presumably not Persian origin of the word kalender, baredel is also discussed, cf. besides Dozy, Supplément, ii. 340 also Der Islam, xi. 94, note). (FRANZ BABINGER)

KĀLANSUWA, KULISAYA (Ka), the name for a cap which was worn by men either under the turban proper or alone on the head. The word, from which verbal forms are derived as denominative verbs, is apparently of foreign origin; while it was used to be commonly connected with the Latin calunia, for which, however, the form calantica is difficult to quote — and besides it means a head-cloth for women —, Fraægel shares wishes to derive it through the Aramaic 躏ין (cf. Arabic ʿalā, ʿalā, Dozy, Supplément ii., 359) from καλαῖς (καλαῖς). The Arab grammarians and lexicographers have found in the manifest formation of the broken plural and the diminutive a reason for using kalansawa as a paradigm for substantives of more than three radicals with such peculiarities.

Caps of different shapes are called kalansawa; varieties of the kalansawa are ʿurūs, burnus, urūs, etc. While it is related of the companions of the Prophet that they wore tight-fitting kalansuwa's, later a long peaked sugar-cone shape, supported within by pieces of wood became fashionable, for which the name ʿawās is usual. It seems to have come from Persia (cf. the head-dresses in the Dura-Śūlīya first century paintings; J. H. Breasted, Oriental Pictures or Byzantine Painting, Chicago 1924) for it was regarded by the pre-Muhammadan Arabs as a noteworthy feature of Persian dress (Jacob, At-tarāb, Bidāyān-Ilimān, p. 237) and is said to have been first adopted in the reign of the first Umayyad by ʿAbdāb b. Ziyād from the inhabitants of the city of Ḳandār, conquered by him (Yāḥyā, Muḥājam, ed. Wustenfeld, iv. 184). High, black kalansuwa are worn by the ʿAbhāsīd Caliphs from al-Manṣūr to al-Mustāʿin and by their viziers and kāḏīs.

The latter adhered longest to the kalansuwa, so that in the course of the third (16th) century — also popularly known as ʿawās, pot-hat, or ʿawās — it became their regular official headgear together with the neck-veil tālānā and at times was strictly forbidden by other classes of the commu- nity (al-Khindī, ed. Gusein, p. 460, § 86). — On the other hand criminals had a kalansuwa put on their heads when they were led through the streets. The kalansuwa was also worn among the Umayyads in Spain, where muḥā拉萨 meant a Muṣṭi wearing the ʿalā, a headdress introduced by Timūr into his army was also known as kalansuwa.

The name kalansuwa appears several times in Ibn Baṭṭūta according to whom (ed. Defrémery and Sanguinetti, ii. 378) the Kipcha, for example, called their kalansuwa's by the Persian name kulāh. Of the ʿUtāwā (q. v.) societies in Asia Minor (Siyyar ufriyān, ii. 264) that their members wore several kalansuwa's above one another, a silk one on the head, above it a white woolen one, to the top of which was tied a strip of cloth 2 fingers broad and 3 ell long; at meetings only the woolen kalansuwa was taken off, the silk one remaining on the head. A similar pendant strip of cloth is also part of the dress of the Coptic priests of modern Egypt and is there called kalāṭa or kalansuwa; here the name appears to have been transferred from the cap itself to its most striking and therefore better known part.

At periods when, as in the second (viii-th) century, both Muslims and Christians wore kalansuwa's, the latter had to tie two knots of another colour to it (Tabari, ed. de Goeje, iii. 138); but when the kalansuwa went out of fashion with the Muslims in the third century, it remained the mark of the Christians. The word is therefore frequently found in Arab authors meaning the headdress worn by Christian monks and hermits, Greek priests and even the Pope himself. Through the Crusades the high cap with the veil seems to have found its way to Western Europe as a woman's dress.

The name kalansuwa was also given to other objects of similar shape: ʿalā is the metal cap of the obelisk near Heliopolis (Ain Shams q.v.), ʿulā. There is also a submarine floating vessel. ʿalā is used by surgeons for a particular kind of head-bandage; ʿalā (ʿalā) is the name of a plant, which seemed to represent a human head with a high cap. Kalansuwa was also the name of a fortress near al-Raʿma in Palestine.

KALANSUWA — KALAT BANI ‘ABBĀS

through the intrigues of his followers Mihrab Khān was embroiled with the British force advancing on Kandahār by the Bolān Pass; Kalāt was taken by storm, and the Khān himself killed in the attack. Two years later the fort was taken by distant affected Ibrahim Khan. The British Agents Loverday, and the traveller Masson fell into their hands and the former was murdered. This led to a second British occupation for a time, but the Khāns were re-instated and remained practically independent for the next thirty years. Under the British protectorate, Kalāt remains the capital of the Khān’s dominions. It is a small town situated in the high plateau 6780 ft. above the sea with a population of under 5000. The best descriptions of Kalāt are those of Pottinger, who visited it in 1860, and Masson (1831 and 1839).

2. The Khānate or State which takes its name from the town of Kalāt. This includes the provinces of Sarāwān, Džahāwān, Kačchā and Makrān, and the tributary states of Las Bula and Khārān.

For details see under BALOCHISTĀN.

KALAT (Kalāt, Kīlāt, Khīrān). 1. The town of Kalāt is the capital of the Khānate and is the most important of the name and the most important part of Balochistān, and is the residence of the Khān, its ruler. The word Kalāt or Kīlāt represents the Arabic Ỉfa or the Persian Kalīt [cf. the art. \[text leftover\] in which India is usually pronounced Ǐlā]. In Balochī the Khārān is the common word for a fort. On coins we find both .Statement of Facts and Figures (W. H. Valentine, Copper Coins of India, vol. ii. 1921, p. 223). It has been known in earlier times as Kalāt-i Seva (from a legendary Hindu king) and Khārān-i Ničārā, which connects it with the Brahūti tribe of Ničārā, which is generally accepted as belonging to the oldest branch of the indigenous Brahūti (S. BALOCHISTĀN, i. 627, 630). The town was unknown to the early Arab historians under its present name. It is however possible that it may represent Kīkānān, which Arab geographers mention as the residence of the ruler of Kūsār [al-Iṣāqū, Bidār, Geogr. Arab., i. 176 mit. sq.; Ibn Hāwkal, ib., ii. 232, s sq.]. Its situation is in the modern district of Sarāwān, close to the boundary of Džahāwān [q. v.]. Thus it would have been included in the ancient province or kingdom of Tūrān, of which the capital was Tūrān (now generally written Tūhūzān, in Džahāwān). [In the Shāhānūm Khāt belongs to Tūrān; cf. ed. Vullers ii. 794. — Ed.]

After the Balūt tribes had passed through the Brahūti country on their way to the Indus valley, in the xvth and xvieth centuries, Kalāt remained in the hands of the Brahūti under a chief of the Khānate, claiming from whom the line of Khāns is descended. Their power gradually extended during the Indian expeditions of Nādir Shāh and Ahmad Shāh Durrānī [q. v.], whose suzerainty was admitted by the Khāns. The greatest of these, Naṣir Khān, endeavoured to shake off the Durrānī yoke. He was defied by Ahmad Shāh, but the latter, who besieged Kalāt in 1722 (1768), was unable to take it, and Naṣir Khān made favourable terms for himself. He built a strong fort (known as the Muṭī) and strengthened his position among the surrounding tribes. In 1834 Shāh Shudjā al-Mulk took refuge in Kalāt with Mihrab Khān after his failure to recover Kandahār. In 1838

(M. LONGWORTH DAMES)

KALAT BANI ‘ABBĀS, a town in Algeria (department of Constantine) 24 miles N.E. of Bardj Bit Arraïdji. Kháf occupies at the height of 3,500 feet a natural fortress formed by a plateau surrounded on three sides by rugged and deep ravines, 1800 to 2000 feet high and joining to the adjoining country by a narrow tongue with precipices on either side. The town is divided into four quarters, which formerly were frequently fighting with one another and one of which is now almost in ruins. It is the most important centre of the tribe of Bani ‘Abbās, whose territory lying between the Wâid Sâjel and the Mâjdâna contains about 24,000 souls. The town itself with an exclusively native population numbers 3000 inhabitants. The few patches of tilled land at the bottom of the ravines not suffering to devote themselves to industry. They used to make woolen burzunas in large numbers, which they sold in Algeria and Tunisia. At the present day many of them emigrate and follow the trade of embroidering burzunas in the towns of the Tell.

Khâf was founded in the second half of the fifteenth A.D. by the marabout Shīh Abī al-Rahmān, a descendant, according to some, of the Idrisids, according to others, of the Ḥannāmids. He established a zāwiyya on the rock of Khâf and put himself at the head of the Bani ‘Abbâs, who had risen against the Zāwâwa, to whom they had hitherto been subject. His son Ahmad built a khâfa, proclaimed himself Sultan and extended his authority over the country between the Hodna and
the sea (the "kingdom of Labēs" of Marmol). 'Abd al-'Azīz, his successor, further increased his power with the support of the Turks, whom he assisted against the Kaybys of Kuka and supported in their expeditions against the Moroccans and the people of Tuggūr and Wāfgī. The results of this alliance in battle and the irrelevance of these affairs to the experiments and experiments at Al-Kāf and sometimes at Al-Ka'ār and it was in this town that he died in 419 = 1028-29. Al-Ka'ār rapidly became very prosperous. "The population increased rapidly, students came there in large numbers from the most remote parts of the empire, attracted by the resources which the new capital offered to those who cultivated science, commerce and the arts" (Ibn Khaldūn). The importance of Al-Ka'ār further increased after the sacking of Kairawan by the Hilālīs. Many inhabitants of Hīliya came to seek shelter there. The population was very mixed. It is worth noting that it included a small community of native Christians; well treated by the rulers, they had a church dedicated to the Virgin and administered by an official, perhaps a bishop, whom Paul the Deacon calls by the Oriental name of calīfa. The country around was quiet, thanks to an alliance made by the Hammadīds with certain sections of the Ḍālījīs; the harvests surpassed the needs of local consumption and were stored in granaries. The grain could be kept for several years. Life was easy there, owing to the abundance of fruits and of cattle fattened on the adjoining pasturage; the markets were attended by caravans, which came from all parts of the Magrib and even from Egypt and Syria and the 'Irāq. Magnificent buildings were erected by al-Nāṣir: the Qaṣr al-Mulk (Governmental Palace), the private residence of the emirs, the Qaṣr al-Mansūr (Palace of the Signal), the Qaṣr al-Kawkab (Palace of the Star), the Qaṣr al-Salām (Palace of Bliss).

The situation altered in the second half of the 9th century. Breaking their alliance with the Hammadīds rulers, the Arabs began to plunder the region of Hīduana and thrust their incursions up to the very gates of Al-Ka'ār. The insecurity became such that al-Mansūr, while continuing to make frequent stays at Al-Ka'ār, moved the seat of government in 483 (1093/1) to Bougie, which had been founded by al-Nāṣir in 1023/2 (see Bougie, 1, 766), but the attacks of the Arabs multiplied and made the lot of the inhabitants more and more precarious. In the reign of al-Aziz the nomads invaded the entire territory of Al-Ka'ār and forced the garrison to take refuge in the town out of which they could not go. Thus Yahyā, who succeeded al-'Aziz, decided in 543 (1058) to remove from Al-Ka'ār all objects of value, that were still there. Four years later, the Hammadīd empire succumbed to the attacks of the Almohads. When master of Bougie, 'Abd al-Mu'min sent his son 'Abd Allāh to lay siege to Al-Ka'ār. The place, defended by Djusīmān, Yahyā's brother, was taken by assault, the garrison put to the sword, 5,000 inhabitants slain and many others taken prisoner. The conquerors carried off vast booty (547 = 1152-1153).

Still Al-Ka'ār survived this disaster. Some of the inhabitants repopulated, if not the town itself, at least the Djerāwā quarter, E. of the wall. According to the author of the Kita'at al-Ittāhār, they were still fairly numerous at the end of the 10th century and were engaged in the making
of garments, which were celebrated. But in 1580 = 1829, 'Ali b. 'Abdāniya captured al-Kāf'ah after a three days' siege. It was undoubtedly he who completed the destruction of the town, for it is never mentioned again after this date. Considerable ruins alone recall the existence of the ancient al-Ḥammādī palace. They lie about 20 miles S. of Burj Bī 'Arārūjī, on the southern slope of the Djabal Ma'did, in the N. of Ḥodna, at a height of 3600 feet and occupy the summit of the cliffs which command the right bank of a tributary of the Wāḍī Selmān. The minārēt of a mosque is still standing. Excavations made by P. Blanchet (1868) and again in 1908 by General de Beylié have made it possible to trace the wall and recognize the remains of various buildings: the Dīr al-Bahr, so called, perhaps, from a tank there, the palace of the Sīdī Bīlāb palace of Bilis and the mosque. Fragments of decoration, painted terracottas, stelacettes of faience, faïences of metallic lustre, and capitals have been brought to light. The study, which has been made of them, leads to the conclusion that Berber art before the Hilālī invasion was in great part Oriental in its inspiration and is revealed as a combination of Mesopotamian and Persian-Berber elements with local Byzantine art. KA’LAT DJA’BAR. See Djab’ar, I. 985.

KA’LAT HUWARA, a town in Algeria (department of Oran, a mixed commune of Mina) 20 miles N.E. of Mascara, on the Wāḍī Kāf’ah, one of the branches of the Hillil. Population (1911): 2072 inhabitants, of whom 2047 natives. Carpetmaking, at one time a flourishing industry here, still employs 500 workmen, although on the decline. Kāf’ah was founded in the vii/ixth century by Muhāmmad b. Ḩāyshā, chief of the Huwara, living in the region of Mina. He built a citadel and gathered round it his tribesmen as well as the Masrāt, a Berber clan related to the Huwara. Ḩāyshā’s descendants were faithful to the ‘Abd al-Wād of Tlemcen and as a reward received the government of the land of the Tuḥājīn. After the occupation of Tlemcen by the Mardinīs (759 = 1358), the people of Kāf’ah recognised the authority of the conquerors, then passed again under the rule of the Sīdīs of Tlemcen after the restoration of the Ťizīyān dynasty. In the xvith century Arūjī seized the town (1517) and placed a garrison of 400 men there under his brother Ḩāyshā. Retaken in 1518 by the Spaniards, Kāf’ah was restored by them to the Sultān of Tlemcen and passed finally to the Turks towards the middle of the xvith century. It is described by the writers of this period (Leo Africanus, Marmol) as one of the principal places in the land of the Banū Rāšīd (the Beni Rasli of Leo, the Beni Arax of Marmol). According to these authors, Kāf’ah was a very strong place inhabited by merchants and well-to-do artisans. During the Turkish period, Kāf’ah frequently served as a place of refuge for Beys and Turkish officials, as well as for numerous families from Oran and Algiers, so that about 1830, the population was in great part composed of Kalāghīs, i.e. of half-castes born of the marriages of Turks with native women. On various occasions the town has suffered from earthquakes but it was, on the other hand, greatly extended by the Bey of the West, Bīš Sheshgum in 1736. The population was employed in agriculture and industry (manufacture of soap and especially the weaving of carpets). After 1830, Kāf’ah recognised the authority of ‘Abd al-Kādir, who drove out the Kalāghīs, and was in 1845 occupied by the French. Kāf’ah was the birth-place of the celebrated marabout Sidi ‘Alīm b. ‘Uṣāf (ixth cent. A.H.), to whom are attributed satirical sayings very popular in Algeria (Cf. R. Basset, Les dictums populaires attribués à Sidi ‘Alim ben ‘Uṣaf, Paris 1900).

KA’LAT NADJAM, the name of a celebrated citadel in Northern Syria, on the right bank of the Euphrates in 36° 52’ N. Lat. and 38° 18’ E. Long. (Greenwich). Its importance lay in the fact that it commanded the passage of the river here, where it was crossed by a bridge. It was here that a caravan route from Syria to Mesopotamia, much used in the middle ages, crossed the river. The route ran from Ḥalab via al-Bāb [q. v.] to Manbīdij, thence in a fairly straight line to the Euphrates, then across the river in a slightly north-eastern direction to Ḥarrān. The distance from Manbij to Ka’lat Nadjam is given as 23 or 24 farsakh (a short day’s journey), that from the Euphrates to Harrān as 2 days’ journey. As there are two small islands in the river at Ka’lat Nadjam, a passage is very easily effected by a short bridge of boats.

In the middle ages Ka’lat Nadjam was the bridgehead of Manbīdij (the ancient Ram-byke; cf. Manbij), a very busy emporium, which the Caliph Harūn al-Rašīd had raised to be the capital of the ‘Awāṣim province (q. v., 1, 115). So long as Manbij flourished, Ka’lat Nadjam retained its importance; with the decline of Manbij — by the close of the xivth century A. D. Manbij was already for the most part in ruins; see G. le Strange, Palestine under the Moslems (London
1890), p. 501 — the importance of Kalet sank also, for traffic across the Euphrates turned more and more to the northern crossing at al-Bira (Birejik; q. v., i. 723). In ancient and medi-aeval times there were on the central Euphrates, below where it breaks through the Taurus, a series of places where bridges maintained the connection between Syria and Mesopotamia; on these crossings, some of which succeeded others in course of centuries, see the references in the article BIREJIK (i. 723). Whether there was already a bridge in ancient times at Kalet Nadjm and whether the isolated hill commanding the ford was already inhabited or defended, we do not know. But it is very probable that a place so favoured by nature was used long before the coming of the Muslims. What ancient town is to be sought on the site of Kalet Nadjm or the immediate vicinity can hardly be decided with certainty. Most probably we have to locate here the Caecciliana of the Roman itineraries (Kausilis of Ptolemy); cf. the article Caecciliana in Pauly-Wissowa, Realencykl. d. klass. Altertumswiss., ii. 1172 and Streck's addition in Suppl. i. 266; Regling in Klio, i. 472; V. Chapot, La frontière de l'Euphrate (Paris 1907), p. 281; H. and R. Kiepert, Formae orbis antiqui, part v. (1916); L. Bell, op. cit. (see the Bibl. there), p. 23. Ainsworth, op. cit., p. 224 sought Caecciliana in the ruined site of Sarisat (Sisbat on Kiepert's map in Sachau (op. cit.), north of the Nadjm river, whereas the map of Syria and Mesopotamia published on a scale of 1 : 400,000 by the cartographical department of the Prussian Survey, sheet 16. (Halab) seeks to identify the ancient place in question with the modern Khirfan (Djabal al-Hamam, a little N. W. of Kalet Nadjm). Less commendable is the identification of Caecciliana with Kalet Nadjm: the other identifications that have been proposed: namely with Betamami (Bethammaris), as Benzinger suggests in Pauly-Wissowa, op. cit., iii. 362 (adopted on the above mentioned map of Mesopotamia and Syria, 1 : 400,000) (see thereon my additional note in Paul's Pauly-Wissowa, Suppl. i. 269), also with Calicocum (so d'Anville, L'Euphrate et Tigre, Paris 1779), on which see my article on this name in Pauly-Wissowa, Suppl. i. 270. The Thilaticum of the Itinera Antonio and the Tabula Peutingeriana was suggested by Mannert, Geogr. d. Griech. und Romer, vi. 1 (Leipzig 1831), p. 394, 397 and Ainsworth, op. cit., i. 224. Noldeke proposed (op. cit., p. 13) the Gerre (Gerrha, Serre) of Ptolemy and the itineraries (see the article Gerre in Pauly-Wissowa, vii. 1270); on what are perhaps its ruins see Chapian, op. cit., p. 282. Finally it should be mentioned my Cressner in Euphrates and Tigri (London 1856), i. 420 and in Narrative of the Euphrates Expedition (London 1868), p. 234, wrongly would find Djesr Manbidj — which, as will be emphasised immediately, is only an older name for Kalet Nadjm — in the Kera or Bayuk Manbidj, 10 miles to the south of it (which Noldeke, op. cit., p. 14 considers the Ergazira of the classics, Regling in Klio, i. 471 Betamami).

Al-Baladhrî (Putul al-Baladûn, ed. de Goeje) p. 156, 22 sqq. (excerpts by Yakût, i. 478, 8 sqq.) especially mentions that the bridge of Kalet Nadjm was built by the Caliph 'Othman, but expressly adds that, according to some, traces were still to be seen of an older bridge, which would seem to prove the existence of a river-crossing here, dating back to pre-Muhammedan times. Al-Baladhrî, however, does not call the place Kalet Nadjm but Djesr Manbidj, "the bridge of Manbidj". The older Arab geographers and historians know it only by this name. Even if the name Kalet Nadjm perhaps only begins to appear in Arabic literature from the 9th century A. D. (to judge from the references quoted), it is clear from an important passage in the Hâlabî chronicle (not written, however, till the 13th century) of Ibn al-Sîhawa (al-Durr al-Muntakhab fi Taurih Mamlakat Halab, Beirut 1909; cf. this work above II, 236) that its origin must be put back to the tenth century. Here it is stated (p. 239), that Kalet Nadjm was long ago called Djesr Manbidj, and remained a little village in the Muslim period until it was re-founded by a certain Nadjm, a slave (zilzûl) of Hûblâ al-Şawwânt, about 200 A. H. (912 A. D.). From this Kalet Nadjm comes the new name Kalet Nadjm (N.'s citadel), which in time quite supplanted the earlier name Djesr Manbidj. Similar changes of place-names occurred elsewhere in Syria and Mesopotamia in the middle ages; for example the strong castle of Kalet Dawsar, which rose farther down the Euphrates on the left bank between al-Masli and al-Rakkû, received the name Kalet Djasîr [see the art. ] after the Arab chief 'Ubâr b. Mûlik (in the 11th century A. D.) had taken possession of it.

The passage quoted from Ibn al-Sîhawa's history further shows that the form Kalet al-Nadjm and the translation of the name founded on this as "the star-castle", which have become quite familiar in European literature (and therefore also on maps: Kalet en-Nadjm), are wrong. The Arabic sources, moreover, show, so far as we can see, almost always the correct Kalet Nadjm; the Syrians reproduce this by Kalet Nağâm, e. g. Barhebraeus, Chronicon Syriaicum (ed. Bedjan), p. 509, 23. If the reading Kalet al-Nadjm is occasional, it is also found in ourلطنج نديم; tâbâtâr, p. 357, 9; al-Marrûdî, ii. 443, 2) and al-Kazwînî, ii. 160, 23 — it would still have to be investigated whether the manuscripts really support this reading. At the same time we do not deny that later Arabic writers, in ignorance of the origin of the name of the place, occasionally may have written Kalet al-Nadjm and this may have given the etymology "star-castle". For example, Ibn al-Sîhawa (op. cit., p. 229) gives a passage from a riwâta of the kâb al-Fâdîl [q. v.], in which the latter exploits the monumental fortress in poetical fashion as "a star in the clouds", "an eagle in the sky". Similarly Ritter (op. cit., x. 1062, following J. v. Hammer) writes: "The castle is said to have taken its name from its height, reaching up to the stars". Lastly Ainsworth (op. cit., i. 229) takes the name Kalet al-Nadjm back to al-Mâ'mûn, who is said to have built an observatory here. That the Caliph had observations of the heavens made in the region between Palmira and al-Rakkû on the Euphrates is certainly true (cf. above i. 498), but his responsibility for the doubtful place-name is to be denied, after what we have said above. In this connection it may also be pointed out that we have several places called
Kawkab (= star) in Near Asia, for example one in Northern Syria, but an identification of the latter with Kaftāt al-Nadjm, the star-castle", which R. Köhrich, *Gesch. des Konigreiches Jerusalems* (Innsbruck 1898), p. 237, note 3 proposes, is impossible. It is noteworthy that Mādī al-Ālī, Mustawī (Nizābat al-Kūthī, ed. G. L. Strang, vol. 1, Leiden 1915, p. 103, 22) says that the citadel of Ḥarrān was called Kaftāt al-Nadjm. As there is no confirmation of this in Arabic sources, this must be an error of the author's.

The citadel and the bridge of Kaftāt al-Nadjm play an unimportant part in the history of the wars of Islām. Soon after their invasion of Syria the Arabs occupied this region (in 18 = 639), the Euphrates villages, as al-Baldāḥ, (p. 175, 9) calls it. In the accounts of the fighting between ʿAli and Muʿāwiya, which led in 657 A. D. to the battle of Siffin (on the right bank of the Euphrates opposite Kaftāt Djaʿbar already mentioned) the bridge of Kaftāt al-Nadjm is frequently mentioned; cf. e. g. al-Ṭabarī, i. 3259, 15 sq. and Ibn Miskawī, Taḏāriʾ al-Umān (Gībb. Mem. Ser. i, no. 7, p. 571, 7). When ʿU- bait al-Ālī b. Ziyād took the field against Muhājirūn in the 650s (685) in the Ṣiraḳ, he crossed the Euphrates by this bridge, see Wellhausen, *Das Arabische Reich und sein Sturz* (Berlin 1902), p. 115. In 930 (941) after the murder of Ibn Ṭāfi (on whom see above ii. 407) there was fighting here between the latter's troops and those of the Hamāndīs Nāṣir al-Dawla; see *Zeitschrift für Deutsch. Morgenl. Gesellschaft*, x. 470. The citadel of Kaftāt al-Nadjm changed hands several times then as in later centuries; we find as its possessors, in turns, the Hamāndīs, the Mirdāsids, of Ḥalab (cf. above ii. 229 sqq.), the Bann Numair (see Ibn Ḥawqal, p. 159, 9; Ibn al-Sibṭa, ed. iv., 6 sq.), Sulṭān Nāṣir al-Dīn al-Zankī (1146—79) and his successors in Syria, the Ayyūbids. Nāṣir al-Dīn (according to Abu l-Fidāʾ, Taḏawwim al-Buldān, ed. Paris, p. 233) renovated the castle — on which account Ibn Djbair, who passed it two or three decades later, calls it "a new citadel" — and placed a strong garrison in it, which was very troublesome to the neighbouring Syrian towns occupied by the Franks. Kaftāt al-Nadjm was also for a time in the hands of the Begtēginid princes of Ṣirbīl (on them see above ii. 591). After the death of Salāḥ al-Dīn (1193) his sons and grandsons (al-Malik al-Afdāl, al-Malik al-Zahir, al-Malik al-ʿAzīz) and his brother (al-Malik al-ʿÂdīl) several times succeeded one another in the possession of the town (cf. above vol. i, ii, and Yāḥṣīb, iii. 165, 18; Abu l-Faraj al-Barhebraeus, Taḏwīr Muḥdīr al-Dawla, ed. Beirut, p. 393, 15; Abu l-Fidāʾ (ed. Reiske-Adler), iv. 109, 189; Well, *Gesch. der Chalifen*, iii. 435).

When Ḥallūğ in 658 (1060) began his campaign against Syria (cf. above ii. 332), he had to fight for the Euphrates crossings and the forts defending them; see al-Barhebraeus, *Chronicon Syriae* (ed. Bedjan), p. 509, 9. Barhebraeus, who was then bishop of Ḥalab, went to meet the Mongol ruler to beg that the Christians be spared, which was shut up by him in Kaftāt al-Nadjm (see op. cit., p. 510, 17).

On the topography of Kaftāt al-Nadjm and the present condition of the castle there, we have various accounts by European travellers, e. g. by Helfer and Ainsworth (on their visit together in 1836); Sachau (1879), M. v. Oppenheim (1896) and Miss Gertrude L. Bell (1909). According to their descriptions, the rocky cone about 160 feet high stands quite alone, crowned by the picturesque ruins of the citadel, falling steeply towards the river and fairly difficult of ascent on other sides also. All parts of the castle are standing upright and are quite well preserved. Two stories are distinguished with an agglomeration of rooms of various sizes. The only parts damaged are those which were bombarded during the taking of the castle by Turkish troops about 1820. When at this time an Arab tribe refused tribute to the government and took refuge in this stronghold, the soldiers of the Paşa had to besiege and storm it, and a large gap was made in the wall in the process. A peculiar feature of Kaftāt al-Nadjm is its not yet fully investigated caves and subterranean passages, which, according to the Arabs, run through below the Euphrates to the Mesopotamian side (compare the Oriental stories about a similar system of tunnels made by the Queen Zenobia in Fr. Müller, *Studien über Zenobia und Palmyra* (1902), p. 57). Kaftāt al-Nadjm is now quite deserted and forms a refuge only for countless wild pigeons and bats. According to Sachau, there are still three Arabic inscriptions here. One of them is carved out over the main gateway which is flanked by two high towers and gives an account of the restoration work done by the Ayyūbīd al-Malik al-Zahir in 695—696 (1298—1302); beside it, is a second one which gives the name of the architect. A third inscription of the same ruler (of 1215 a. b.) may be read over the door of what was once the little mosque of the castle.

According to the Arab geographers (Ibn Djbair, Yāḥṣīb, al-Kawāzīnī, al-Marāṭīṣī), a little town lay below the castle rock, probably at the river's edge, which served as a market for the numerous travellers as well as for the Beduins of the surrounding desert. The remains still in existence of buildings of an earlier period at the foot of the hill on the south cannot, as Sachau observes, be considered the remains of a town on account of the way in which the ground is cut up; but the Muslim cemetery in the vicinity with the ruins of two buildings (mosques or chapels) may mark the site of the small mediæval village. At the present day there is no bridge here. Whether traces of any earlier ones can be found seems very doubtful. Cheney (*Expedition*, i. 420; *Narratives*, p. 230; see above) has, it is true, thought to discover remains of one and M. v. Oppenheim claimed to find traces of old bridges in no less than three places (see *Berliner Zeit. für Erdkunde*, xxxvi. 80 sq. and *Byzant. Zeitschr.*, xiv. 1905, p. 7); but according to Chapot (op. cit., p. 284, note 7), who likewise examined the area in question, there is nowhere any trace of such remains to be seen.

A little to the south of Kaftāt al-Nadjm, but on the left bank of the stream, there lies close to the Euphrates a mound of ruins, part of which has at one time been swept away by the river, called Tell Masʿūdīya, out of which M. v. Oppenheim dug a large ancient mosaic of the river-god Euphrates; see *Byzant. Zeitschr.*, xiv. (1905), p. 7 and Moritz in the *Beitr. zur Assyriologie*, vii. 11. 1913, p. 158. Also on the east bank opposite Kaftāt al-Nadjm there lies a very winding system.
of hills, called Djjabai Şarrin after the ancient ruined site of Sarrrin, S.E. of the latter (N.E. of Tell Mas'udiyia) rise two great grave-towers, one of which has in the second story a porphyry sarcophagus with the oldest known inscription in pure Syriac (73 A.D. = 385 Selenic era). This monument of an Edessa man named Manu bar Ma'nu, with inscriptions relating to the building and to the deceased, is of great value from the linguistic as well as the palaeographical side. M. v. Oppenheim and H. Pogson found and copied it independently; cf. Pogson's publication and edition of the text in his Inscriptiones Monetales de la Syrie Antique (Paris 1908), p. 15–22 (and in the Ms. of the S. A. L. and see thereon Noldeke in the Zeitschr. f. Assyri., xxi. 151–155). The edition of the text by B. Moritz in the Beiträge zur Assyriologie, vii./ii. 1913, p. 158–165 is based on v. Oppenheim's material. The ancient names of Tell Mas'udiyia and Şarrin are unknown; perhaps it was one of the above mentioned stations in the itineraries (Gerre or Thallicomum).

Qalat al-Rûm. See Rûm Qala'.

Qalat Sherkat, an extensive group of ruins in the wilayet of Mosul, on the right bank of the Tigris in 35° 30' N. Lat. and 45° 15' E. Long. (Greenwich). They rise on the edge of the desert on the sharp spur of the hilly lands, cut up by many valleys, which slope from the ridge of the Khânûka mountains, an eastern spur of the Djjabal Hamrin, down towards the Tigris. The name Qalat Sherkat is not found in the Oriental writers of the middle ages nor, so far as I can see, in those of later centuries either. Whether the spelling ٣٩٨ = Ashshur sîr (b) T (z), which is found in Arabic inscriptions of the Parthian period, is really connected with Sherkat, as Jensen (Mitt. der Deutsch. Orient-Gesellschaft, vii. 1906, p. 46) supposes, is very doubtful. Perhaps the name Sherkat — not Sherkat; cf. Streck, Die Inschriften Amurathbâlei (Leipzig 1916), p. 792 — only dates from the xviith century A.D.; in the literature of European travellers it seems to appear first about the time of Rich (1821). The meaning (? a personal name) is quite unknown. The Turks allow the place the name (often found where Turkish is spoken) of Toprak-Qala=‘Earth-citadel’, which is without significance; cf. Rich, op. cit., ii. 137 sq.

Qalat Sherkat occupies the site of the oldest capital of the Assyrian empire, the city of Ashshur, from which the whole district ruled by it also took the name Ashshur (Assyria), while the city itself apparently derived its name from the national deity of this name (hardly the reverse). The site offers many advantages for an effective defence and was presumably planned by the inhabitants of southern Mesopotamia (Babylonia) as a military bulwark against the inroads of northern barbarians. That Qalat Sherkat was fortified in the archaic period has been shown by the excavations of the Deutsche Orientgesellschaft. These further show that the Semitic settlement was preceded by a non-Semitic (Sumerian) occupation; Sumerian sculptures have been found which are closely connected with those from Tellah in South Babylonia (about 2600 B.C.). In the time of the third Babylonian dynasty of Ur (2296–2176 B.C.), Ashshur was a small state dependent on Babylonia. The beginnings of Ashshur may safely be put back to 3000 B.C. and perhaps even farther; thereon cf., most recently, Weidner in Boschhödi-Studien, Heft 6 (Der Zug Sargons von Akkad, Leipzig 1927), p. 96. Some not inconceivable time before 2000 B.C. an end was made of the Sumerian colonisation of Ashshur by the invasion of the Semites.

The numerous historical inscriptions, which were brought to light by the excavations of the Deutsche Orient-Gesellschaft in Qalat Sherkat have extended in a most unexpected fashion our knowledge of the history of the city and kingdom of Ashshur, especially with regard to the older periods. Its chronology now begins about 2300 B.C. or even earlier. From Pazur Ashsh (2086–2072) to the fall of Nineveh, with the help of the dynastic lists of Ashshur, we can restore the series of rulers without a gap; cf. E. Weidner, Die Könige von Assyrien, Neue chronol. Dokumente aus Assur, in the Mitt. der Vorderasiat.-Agypt. Gesellschaft, xxvi. (1921), p. 2; with the chronological list of the kings of Ashshur given there (p. 64 sq.) compare the (somewhat later) list given by Schroeder in Keilschrifttexte aus Assur historischen Inhalts, Heft 2 (1922), p. 101 sq.

Ashshur retained its place as capital down to the middle of the tenth century B.C. Older rulers built other towns as royal residences, but only temporarily, for example Salmasasar I (1280–1261) chose Kal'khu (Bibl. Hebr. Kâlah) farther to the north at the mouth of the upper
Zab for his capital and his son and successor Tu-
kultu Ninhurta I (1260–1232) built a new capital for
himself Karr (wall, citadel of) Tu-kultu Ninhurta
(now the ruins of Tulul 'Akir). After their death
both these towns again lost their predominance to
Ashur. It was only from the tenth century
onwards that the latter became more and more
overshadowed by Kalakh and Nineveh and the
later Asshur chose these two places only as the
centres of their kingdom. Ashurhur survived the
fall of Nineveh, however; cf. Streck, op. cit.,
CXXVI and note 3 and p. CXXVII, note 1. It is
mentioned in the proclamation of Cyrus to the
Babylonians, which is preserved in cuneiform.
During the greater part of the Graeco-Roman
period, especially in the 400 years of the Par-
thian epoch (which is represented by countless
remains of buildings), it was an inhabited town,
and as such — under other names (Kainat; per-
haps also Labanna and Libba) — it is several
times mentioned by classical authors; thereon cf.
E. Herzfeld in Memnon, i. (1907), p. 98 sq., 237
sq. In the fall of the ruins of Kalaf Sherkat 43
Aramaic inscriptions, partly in memory
monument, were found, which, in so far as they
were dated, cover the period of the Seleucid (Arsakiad)
era (199/200–227/228 a.D.), i.e. they cease just
with the rise of the Sassanians. An interesting
fact is also to be deduced from these documents,
that the cult of Assyrian deities and names of gods
still survived in Ashurhur in the third century A.D.
On these inscriptions cf. Jensen in the Situngs-
berichte der Berliner Akademie, 1919, iii.
1042–
1051, and in the Miti, d. deutsch. Orient-Ge-
ellschaft, 1920, no. 60.

The name Ashurhur appears in the Ara maic
form A'thur as early as the old Persian version
of the Behistun inscription; see Weisbach, Die
Keltinschriften der Achemeniden (Verordn. Bibl., iii.), p. 140. By Athurhur we have here
probably not to understand the whole of Assyria
but only the district of Ashurhur. The classical
authors give the Aramaic equivalent of Ashurhur
in the form 'Aturfa, 'Atufa; see Panny-Wissowa,
Kalash, d. klass. Altertumswiss., ii. 2260;
Hersfeld, op. cit., i. 127. Ashurhur presumably
became more and more deserted under the Sassanians.
The Syrian authors know of A'thor down to
the late middle ages as the name of a parish;
see G. Hoffmann, Auszüge aus syrisch. Akten

The Arab geographers of the middle ages
likewise are acquainted with Athur. It is given
by them firstly as an earlier name of Mosul, then
as the name of the province which was later usually
called al-Djazira and finally as the name of a ruin
near al-Salamiya (probably the Biblical Resen, 24
miles N.W. of Nimrud, the ancient Kalakh; cf.
Streck, op. cit., p. CXXVI). Sometimes A'khir is
written instead of A'thur and sometimes the one,
sometimes the other noted as a variant. A'khir
is either to be regarded as a corruption or, perhaps
better, as a parallel dialect form. Cf. for Athur
or A'khir: Ibn Rosteh in the Bibl. Geogr. Arab.,
vii. 104, 6 (and Athur, "land of A." = Mousul);
Yakrit, Mousgum (ed. Wüstenfeld), i. 119, 15,
340, 5, iii. 118, 18. For the Djazirat A'khir see
Yakrit, Mousgum, ii. 72, 13, 231, 9; this coincides
with the Iklim A'khir (A'khir), the kalafa (region
of) A', of which only al-Muṣgum (Bibl. Geogr.
Arab., iii. 20, 1; cf. al-27, 10, 28, 7) speaks
which, according to him, is divided into three
large divisions. On (Jayvat) A'khir as an older
name for Dazira seen above i. and G. Le Strange,
The Lands of the Eastern Caliphate (Cambridge
1905), p. 86.

From the statements of the Arab geographers
this much is evident that in the middle ages a
ruin was still known which covered the site of the
ancient Ashurhur; only the name had been
erroneously connected with a deserted locality near
al-Salamiya. It may here be recalled that, according
to Layard, Nineveh and Babylon (London 1853),
p. 165, the Arabs at the present day call a high
hill in the corner of the ruins of Nimrud (Kalakh)
'Tell Auhr'. The Arab geographers further make
the observation, which is quite correct, that the
earlier name of the province of al-Dazira, which,
indeed, practically coincides in area with the
ancient Assyria, is derived from the deserted town
of A'thor. When A'thor ultimately came to be
erroneously regarded as the ancient name of the
later capital Mousul, we have a false identification
here similar to the case of Baghdir, which western
travellers throughout the middle ages down to
Pietro di Valte (1616–47) equated with Ba-
bylon and always called so.

On the Arabic names A'thor or A'khir cf. also
A. Schultens, Vita et res gestae... Saladin (Lei-
den 1755), Ind. Geogr. s. v. Mosul; Fr. Tuch,
De Nino urbe (Leipzig 1845), p. 16 sq.; Tuch's
Kommärer über die Genesis, 2nd ed. by Merx
(Halle 1871), p. 61 sq.; Layard, Nineveh and its
Remains 3 (London 1849), ii. 245.

The ruined area of Kalaf Sherkat is of con-
siderable extent (nearly 180 acres), very little
smaller than that of the two other royal cities of
Assyria, Kalakh (Nimrud) and Nineveh (Kuyunjik).
It is sharply defined; there is no doubt on any
side as to how far the ancient city reached.
The Tigris flowed along the east front; the north
front was formed by a natural ledge of rock, which
was strengthened by defensive walls and made
inaccessible. On the finest part of Ashurhur, in
the eastern part of the north plateau, the Sham-
shék Kherša Pashá in the second half of the xixth
century founded a settlement which later became
a Turkish outpost, which until the Great
War served as barracks for troops of regular ca-
valry or mounted police. Apart from this tem-
porary use as a military post by the government,
Kalaf Sherkat has been quite uninhabited since
the memory of man.

The extensive ruins early excited the interest
of European travellers. Their importance was first
emphasised by Cl. Rich, who examined them
carefully on a Tigris journey in March 1821, see
his Narrative of a Residence in Koordistan (Lon-
don 1830), ii. 137 sq. In 1836 Ross visited them;
see a communication by him in the Journ. of
The first thorough description of the site we owe
to W. Ainsworth. He visited it along with Layard
and Mitford in 1840 when on an excursion to
al-Hadhr [q. v., ii. 204] (the caravan road to al-
Hadhr branches off at Kalaf Sherkat; see his re-
port in the Journ. of the Royal Geogr. Society,
i. (1842), p. 4–8). Layard again in 1847 spent
two days at Kalaf Sherkat, engaged in examining
the ruins; see Layard, Nineveh and its Remains, 2,
KAŁAṬ SHERKĀT — KAŁĀʻŪN

A systematic examination of the whole system of ruins was first effected between Sept. 1903 and June 1914 by excavations of the Deutsche Orientgesellschaft which extended over practically the whole site of the town. Accurate plans were made of all parts examined. As the excavations proved, the kings Tiglat-pileser III (1115—1103) and Salmanasser III (859—825) in particular played very great activity in building at Ashšur; the latter renovated completely almost all the great works of his predecessors. The most prominent buildings within the town are the great temples — the sanctuary of Ishtar, the oldest of all, showing a Sumerian stratum below it, then the Ashšur temple, also of very great antiquity, called E-Kharsag-kurkurr with a great temple tower (sēkurutē) belonging to it, and lastly the sanctuary of Anu and Adad. Besides there was a series of smaller temples; of special interest is a "New Year Festival House", a work of Sanherib (705—682), discovered before the city gate. Palaces also were uncovered; but we have not yet detailed information regarding them. The powerful fortifications (double wall, Tigris-quay, wall and citadel) with which the Assyrian rulers protected their capital are most impressive. Among the monuments brought to light in great number special mention should be made of two rows of steles with reliefs and inscriptions (one north of kings and one south of officials), which belong to the xivth—viii centuried and are of fundamental importance for our knowledge of Assyrian history. The topographical and archaeological investigation of the site has, at last, also given us a clear picture of the extent and significance of the erstwhile "city of the Parthians" (we have to distinguish two periods of Parthian building).

An exhaustive work on the topography and history of Ashšur based on the German ten years' excavations on a large scale is not yet available. For the present we have only the official reports, almost all by W. Andrae, the leader of the German expedition in Assyria, published in the Mitteilungen der Deutschen Orient-Gesellschaft, N°. 20—22, 25—26, 28—29, 31—33, 36, 38, 40, 42—45, 47—49, 51 and 54. On two of the principal temples, on the fortification works and the rows of steles, Andrae has published monographs in the Wissensch. Veröffentlich. der Deutsch. Orient-Gesellschaft, namely: Der Anu-Adad-Tempel in Assur (Leipzig 1909); Wissensch. Veröffentlich., N°. 10; Die Steinreiche von Assur (1913); op. cit., N°. 24; Die Festtagewerke von Assur (1913, 2 vols.; = op. cit., N°. 23); Die archaischen Nār-Tempel in Assur (1922; = op. cit., N°. 39).

The yield in inscriptions from the excavations in Ashšur has been very rich and exceedingly important. They have to a very great extent extended our knowledge of Assyrian chronology, history and religion. The publication of the texts is likewise being done in the Wissensch. Veröffentlich. der Deutsch. Orient-Gesellschaft; so far there have appeared: Keilschrifttexte aus Assur historischen Inhalts, 2 parts, Leipzig 1911 and 1922, ed. by Messerschmidt and Schroeder (= Wissensch. Veröffentlich., N°. 16 and 37); Keilschrifttexte aus Assur religiösen Inhalts, ed. by Ebeling, vol. i. 1915—1916 (= op. cit., N°. 28), vol. ii. (part 1—2), 1920 (= op. cit., N°. 34); Keilschrifttexte aus Assur verschiedenem Inhalts, ed. by Schroeder, 1920 (= op. cit., N°. 35); Altertümer und Keramik aus Assur (dating from the latest period of the Assyrian empire), ed. by Lidsbarski 1921, op. cit., N°. 38.

Bibliography: Apart from the references already given we may mention the following: Ritter, Erdbunde, xi. 666 sq., 674—676; Fr. Delitzsch, Wo lag das Paradies? (Leipzig 1881), p. 252—255. Delitzsch also in 1903, before the beginning of the German excavations, drew up a sketch of a history of the town (especially its buildings) based on the inscriptions then known, in the Mitteilungen der Deutsch. Orient-Gesellschaft, N°. 20, p. 30—36; M. v. Oppenheim, Vom Mittelmeer zum persischen Golf (Berlin 1900), ii. 203—210; E. Herzfeld in Monumenta, i. (1907), p. 97—116, 251 sq., 257; M. Streck, Die Inschriften Asshurs (Berlin 1916), ii. 773; B. Meissner, Babylonien und Assyrien, i. (Heidelberg 1920), passim (see Index), esp. p. 12 sq., 33 sq., 300 sq. — The best map of the region of Kaššašīrāt is the one of Mesopotamia and Syria published by the cartographical department of the Prussian Survey on the scale of 1:400,000, sheet 4 C (Sāmarā). The latest plan of the ruins of Ashšur is given by Andrae in his Die Festtagewerke von Assur (1913), Plates i. and iii. On the flora of Kaššašīrāt and district E. Herzfeld writes in the Orientalist. Literaturezeit., Suppl. ii., Berlin (1908) on the basis of the collection made by him as a member of the German expedition in Ashšur in 1903—1905 and (somewhat enlarged) in Sarre-Herzfeld, Archaeol. Zeit. im Euphrat und Tigrisgebiet, iv. (Suppl. Berlin 1920), p. 25—26. He gives the plant-names in the dialect of the half nomadic Djebbûr Arabs of the district. (M. Streck)

KAĻĀṬA. See CONSTANTINOPLE. I. 867.
KAĻĀʻŪN, AL-MALIK AL-MANṢUR SAIF AL-DĪN ABU 'L-MĀʻĀL AL-ÅLĪF (the 'Thousander', a name, it is said, given him because he was bought for 1000 pieces of gold) al-SĀLĪM AL-ÅNĀM, the sixth Sulṭān of the Bahri [q.v.]. Mamlûk, born in Kūfāq [q.v.], was brought to Egypt, sold to Sulṭān Sāmhi Ålīyā [q.v.] and manumitted by him in 647 (1247). The beginning of his career is unknown. Under Sulṭān Bahrāy Khan, son of Baibars, sent him again against the Armenians in 677 (1278). When this Sulṭān was deposed a year later, the Emirs chose his seventeen-year-old brother al-Malik al-Ådīl Sulṭānī as Sulṭān and appointed Kaļā‘ūn his guardian and Atabek. In reality Kaļā‘ūn ruled and was mentioned in the Friday prayer and on the coins along with Sulṭānī; after three months Sulṭānī was deposed and Kaļā‘ūn in due form raised to the throne and confirmed by the Caliph. While he was at once recognised in Egypt, he had to fight a rival in Syria, the Emir Şenḳor al-Asfiqar, who was chosen...
Sulṭān in Damascus by the Syrian troops. Şoŋkor found support among the Beduins of Syria, as well as the sons of Balbars, the deposed Baraka Khān, to whom on his deposition Karak [q.v.] had been given as an independent principality, and his brother Khiḍr, who occupied several fortresses in the southern part of Syria. Both sides gathered together their armies; there was a battle in the beginning of autumn (1279) south of Damascus, which was decided in favour of Kalāˈun, as a result of the desertion of Damascus troops. Baraka Khān had died shortly before; his brother Khiḍr was glad to conclude peace with Kalāˈun in the spring of the year 680, by which he was granted Karak as a fief. Şoŋkor had appealed for assistance to the Mongols and they, always ready for loot, had invaded Northern Syria, plundering as they went. When the Mongols were preparing for a second campaign on a larger scale, Şoŋkor, who had become afraid of his too ardent friends, had made peace with Kalāˈun on condition that he was left the North Syrian fortresses of Shirat, Qara, and several other places to rule independently. Freed from these opponents, Kalāˈun was able to devote his attention to the invading Mongols, who were reinforced by Armenians, Franks and Georgians. The armies met at Ḥimṣ. In spite of their superiority at first, the Mongols were defeated and had to withdraw from Syria. While the Sulṭān, as we have seen, was threatened from several sides, the Crusaders, who still occupied the greater part of the Syrian coast, had not decided to collect their full strength for a decisive effort. Only the Knights of St. John in the fortress of Marqab had renewed their war against the Shirat, and an incredible sinner was approaching it, into an ambush and inflicted a severe defeat on him in a surprise attack; after the destruction of the Mongol army, they, like the Count of Tripolis and the Templars a year later, were content to have peace on favourable terms. An agreement was also made with the city of Akka in 682 (1283). Kalāˈun, however, punished the Armenians for the help they had given the Mongols, by invading their country and doing them great damage by plundering and ravaging it.

The Khān of the Mongols, Abākā [q.v.] died in 680 (1281); his successor adopted Islām, taking the name Ahmād. Letters and embassies were exchanged between him and Kalāˈun, and although their relations did not result in an alliance, they were by no means unfriendly. In 683 (1284) Ahmād was murdered. His successor Arghūn [q.v.] remained a pagan and favoured the Jews and Christians in his Empire. His plan was to induce the Pope and the king of France to cooperate with him in a crusade against Kalāˈun. This scheme, however, did not materialise. The Sulṭān for his part entered into diplomatic negotiations with the republic of Genoa, with whom he concluded a commercial treaty; he had a kind of defensive alliance with king Alfonso of Castile and James of Sicily. Embassies were exchanged with the Byzantine Emperor, with the Emperor Rudolf of Hapsburg, the king of Yemen and the prince of Ceylon. The prince Tūdān Mangūl of Kiṣqān, who became a convert to Islām, obtained from Kalāˈun, as the first ruler in Islām, a title and a standard with a coat-of-arms.

It was Kalāˈun's aim to extend his rule over the whole of Syria. To attain this end he did not hesitate to break his treaties with the Crusaders. For example at the beginning of 684 (1285) he fell suddenly upon the fortress of the Knights of St. John at Marqab and occupied the walls so rapidly with his sappers, that the garrison had to surrender and depart. He adopted another plan to capture the stronghold of Marakša, built in the sea near the coast and considered impregnable. It belonged to a vassal of Bohemund VII of Tripolis. Kalāˈun pursued and threatened the latter so long that finally he bought it from his vassal, and let the Sulṭān dismantle it to appease him. Margaret of Tyre had to purchase peace with Kalāˈun on humiliating terms. Having thus consolidated his position, he was able in 686 (1287) to think of depriving his old opponent Şoŋkor al-Ashkar of his possessions in Syria. In the course of several campaigns he compelled him to give up his kingdom and retire to Cairo. He threatened Khiḍr, prince of Karak, so long that the latter finally yielded up his principality to him. In 688 (1289) he decided to capture Tripolis, the largest town still in the possession of the Crusaders. Prince Bohemund had died and his mother and sister were making claims on the vacant throne. The Sulṭān intervened in the quarrel and finally began the siege of the town. Although Tripolis received help from the sea, its position soon became desperate, so that the mother of the late ruler left the town with the Genoese and Venetian colony. With the help of his sappers the Sulṭān succeeded in undermining the walls and took the town by assault. It was for the most part destroyed and not rebuilt till a few years later, several miles from the sea coast and in the bed of the river Kadsha. (From the Christian period date the great mosque, the Taliˈan mosque, both formerly churches, and the foundations of the citadel). The stronghold of Batrān, south of Tripolis, was shortly afterwards taken. This was Kalāˈun's last feat of arms. When about to depart next year to besiege Akka on the pretext that Muslims had been robbed and murdered by Christians there, he died quite near Cairo, just after starting for Syria. Besides his continuous campaigns in Syria he had also to wage war against Nabia. In two battles he was victorious against king Şamāˈmūm but he could only maintain his authority there as long as his armies remained. He gained no permanent success in Nubia, although he succeeded in making king Şamāˈmūm resume payment of the ancient tribute. He had frequently to take the field with full strength against the Beduins of South Palestine and Upper Egypt; it is a sign of his strength that he, unlike other Sulṭāns, was able to subdue the rebels completely. Kalāˈun, on the whole, maintained his authority over the sacred city of Mecca, although the Sharif from time to time endeavoured to make himself independent.

Sulṭān Kalāˈun succeeded in consolidating Mamlik power in Syria and gradually made good the damage done by the incursions and ravages of the Mongols. We find his renovations on a grand scale in the citadels of Aleppo, Baalbek and Damascus. His most famous building is the hospital in Cairo in which there were large wards for the different illnesses, laboratories, kitchens, ample storerooms with provisions and medicaments. It was connected with a mosque and a school (see below). He was the only one of the Mamlik
Sultans to found a dynasty; his descendant in the fifth generation reigned till 783 (1382).

KALAWDHIRA, according to Yāḳūt, Mīḏjam, ed. Wüstenfeld, iv. 167 a fortress near Mala- tyā, undoubtedly the ancient Claudias, which is mentioned as early as Pliny, Historia Naturalis, iv. 120, Claudopolis, and under the later Roman Empire was one of the castra praetoria, the fortified permanent camps on the eastern frontier between Samosata and Melitene. It was taken from the Arabs and destroyed by Constantine V Copronymos, probably in 755 A.D., together with Malatya (al-Baladhūrī, ed. de Goeje, p. 186 sqq., Abu l-Fīḍa, Taʾrīkh, under the years 133 and 138 of the Hijra; Barhebraeus, Kethābā dh al-Makhtūbānūt Zubānī, ed. Bedām, Paris 1890, p. 122 below), but retaken and rebuilt by the Abbāūdī al-Mansūr in 140 (757/758) (al-Baladhūrī, p. 188 = Ibn al-Asṭūr, ed. Tornour, v. 382; Abu l-Faraj, Taʾrīkh Makhtūdar al-Dawla, ed. Sābūrī (Bāhraw 1800), p. 310, without giving a date, according to Yāḳūt, op. cit., in 141 A.H.) and the Christian population transplanted to Constantinople (Mi- chael Syrus, Kethābā dh al-Makhtūbānūt Zubānī, ed. Chabot, ii. 518, 522). In the first quarter of the tenth century the district of Melitene again passed under Byzantine rule and was not lost again until the Saldjīk invasion; in the tractate περὶ παρασκευῆς πολιμέαν (de secretione belli) of the second half of the tenth century the place is mentioned under the name tē Kālōdha along with Melitene (Leo Diaconus, ed. Bonn 1828, p. 250). Armenian bands entered the district of Kalawdhiya and established themselves there in 1066 (Michael Syrus, op. cit., iii. 1158). The Byzantines were followed in their rule in these regions by the Dānīḫmandoglia and their rivals, the Saldjīks of Konya. In this period Kalawdhiya is repeatedly mentioned by the Syriac chroniclers, for the last time in the year 1273 (Michael Syrus, op. cit., p. 304, year 1152, p. 400, year 1185; Barhebraeus, op. cit., i. 522 = ii. 543, year 1257; id., i. 549 = ii. 574, year 1273); among other things they report that in October 1152 the Euphrates overflowed its banks as the result of a great landslide and made a way out at the foot of the hills of K. (see Michael Syrus, op. cit., p. 306 = Barhebraeus, Melitēn 354, ii. 347, ii. 348). Hamdūlīh Mustawfī, Nāmah al-Kālābī, ed. Le Strange, p. 98 sq., knows K. under the name Erkawdži as a considerable fortified place in a fertile region, which produced corn, cotton, grapes and fruit plentifully; he thinks, like Yāḳūt, that Ptolemaeus, the author of the Almagest came from there, and was therefore called al-Kalawdī.

With this the place disappears from history; for, although Hādījī Khalīfā (xvith cent. a.n.) still mentions Erkawdži in his Djiḥānīmūnā, p. 601, he only knows it from Hamdūlīh Mustawfī and Otter, Voyage en Turquie et en Perse (Paris 1748), ii. 284 (beginning of the xvith century) translates, as usual with him, only the statements of the Turkish geographer. The site has so far not been discovered: Ainsworth, Travels and Researches in Asia Minor (London 1842), i. 263 wishes to identify the ancient Claudias with the modern Kāhkāta (q. v.), which is, however, impossible because the Syriac chroniclers mention Kalawdhiya and Kāhkāta together contemporaneously as different places.

KALB, the dog, is also in Islam one of the "unclean beasts," primarily because its flesh may not be eaten (al-Nawawī, Mīḥānī al-Tālībīn, ed. v. d. Berg, iii. 312); and further because, according to the Hādījī, there are several special regulations regarding it. For example dogs render food which they lick impure and render unavailing water intended for ritual purifications (al-Bukhrā, Wujūd, bāb 33). Vessels, likewise, which have been licked by dogs, require to be cleaned several times, including once with sand. In a certain way they render impure the whole room in which they are; for angels do not enter a house in which there is a dog and Muhammad had first to sprinkle the place on which a young dog had lain concealed with purifying water before Djbibl would appear to him (Muslim, Lības, trad. 31 sqq.). — Dogs "cut off the šaltī," i.e. they make the šaltī worthless when they come into the immediate vicinity of the man at prayer (Ibn Māḏīja, Jāma, bāb 30) and one is all the more inclined to attribute this rule to the impurity of the dog, as it also holds for menstruating women. The Arab commentators, however, explain it by saying that the dog frightens the worshipper and distracts him from his devotions (al-Sindī, commentary on Ibn Māḏīja as cited above). This is especially true of the black dog, for he is Satan". This saying is either to be interpreted literally as meaning that Satan occasionally appears in the form of a black dog (cf. Faust) or it only means that black dogs in general are con- sidered particularly dangerous. Dogs in general are considered noxious and should therefore be exterminated (al-Nasāʿī, Šayb al-Ḍāhīt, bāb 9—14), but as "Allāh does not create anything in which there is not a trace of his wisdom" (al-Sindī, commentary on this passage), this rule is applied only to black dogs.

It is only permitted to keep dogs for hunting, for herding and for watching (al-Nasʿ, op. cit.); whoever keeps a forbidden dog has to forfeit a portion of his possessions daily (cf. Ba-yālōn, Taʾmūd, Shākhāb, fol. 63*; "whoever pos- sesses a dangerous dog keeps good fortune away from his house"). Dealing in dogs on the other hand is strictly forbidden (al-Bukhrā, Ṣuyūt, bāb 25).

But in spite of its impurity and dangerousness
the Arabs are able to appreciate the good qualities and services of the dog. Muhammad himself promises a woman a divine reward for a kindness, which she had done a thirsty dog (al-Bukhārī, Wu‘āṣa, bāb 33), and al-Kazwini (p. 403) characterises the dog as "a particularly intelligent, very useful animal, patient in hunger and on the watch, whose cleverness and fidelity are shown in many ways". Al-Kazwini describes very fully the dog's senses in Book IV, cap. 9; cf. thereon Babylon, Talmud, Yoma, fol. 8r: "there are five symptoms in a mad dog; its mouth is open, its saliva runs, its ears have a foul smell, its tail lies limply on its hips and it wanders aimlessly along the sides of the streets".

The dog of the seven sleepers (Sūra xviii. 17) is a special matter. According to al-Ba‘dawī (ed. Fleischer, p. 557) it was a dog with the gift of speech, in al-Tabarī's view (Tafsīr, xv. 141, n. 131, p. 131), a man in the form of a dog, but perhaps simply an ordinary dog. On the dog-star (Sirius) see al-Kalb and al-Shitīrūs.

Al-Kalb, the Dog-Star in astronomy: Šarāt al-Kalb al-‘abhar (the constellation of the Great Dog) and Šarāt al-Kalb al-a‘qāhar (constellation of the Little Dog) or also Šarāt al-Kalb al-Munahadānūn (constellation of the foremost dog); ādām, the former known as Canis major and the latter as Canis minor, two constellations of the southern heavens, the names and configuration of which the Arabs took out of al-Majūti of Ptolemaios. Like the latter, the Arabs allotted 18 stars to the sūra proper of Canis Major, of which Sirius (al-Shīrā ‘Alā‘ir) is of the first magnitude (actually 1.6), while outside of the constellation lie 11 stars, and to Canis Minor two stars of which Procyon (a Canis Minoris, al-Shīrā ‘Ujānumaiyān) is also of the first magnitude (actually 0.5). As regards the stellar co-ordinates (latitude and longitude), the star-catalogues of Abū al-Rahmān al-Sufī (d. 376 = 886) and Abū Rūnī (d. 440 = 1048) are based entirely on the Ptolemaic Almagest, while the star-catalogue of Ulugh Beg prepared for the period 1437 contains numerous new definitions of star positions.

The name Dog-Star probably goes back to ancient Egypt where the modern Sirius (śēsōs = burning, brilliant) — with the addition of Kław = Dog-Star — was called Sopdet, which undoubtedly became the Greek Septizon. The name of the star had originally nothing to do with dog, but in the Greek terracottas which are frequently found in Egypt, Isis, to whom the star was sacred, is often represented with a dog and (according to L. Borchart) with a particular kind of dog, the so-called Arman (Ermot)-dog. Sirius alone is sometimes represented in terracottas in that way; he also has a star above his head. According to Borchardt, it is not improbable that the star appears in the star-tables from the Kamesí graves, which precede or follows Sopdet, is the modern Procyon.

In Babylonia Sirius was called "Arrow-Star", never Dog-Star. The older Babylonian name (according to F. X. Kugler) was Kākkūd miširē, the latter Babylonian Kal Kākkūši ("weapon of the bow") — "arrow".

Kalb n. Wabarā, the eponymous ancestor of the tribe of Kalb, a confederation of nomadic Syrián Arabs attached to the powerful Kūfīa [q. v.] group. The Banū Udhrā [q. v.] have been the most famous among the clans of the Kalb since the Hidjra, especially in literary history. The pre-Muhammadan annals of Kalb are very obscure and semi-fabulous. Zuhair b. Dianāb [q. v.], an almost legendary personage — reckoned among the mu‘ammarūn or centenarians —, is said to have been one of their principal chiefs. They seem to have developed independently of other tribes in the Peninsula and to have had no relations with them. Their dialect showed curious peculiarieties and we know of no pre-islamic poets using it. About the time of the Hidjra they were the most important Arab group in Syria.

The conquest of this country brought them to the front, not least through the close alliance made by Mu‘āwiyah I with their tribe, a union sealed by his marriage with Maisūn [q. v.], mother of Yazid I. This political alliance brought them into high office, at court and in the army; to the latter they furnished disciplined contingents and captains of great bravery. Towards the middle of the first century A.H. their numbers must have been considerably over 10,000 of them were losing the pension of 2000 dirhems, the sharaf al-‘aţīf, a distinction reserved for the aʿjārāf or nobles. Half-settled, half-nomadic they covered with their huge flocks — for they were great herdsmen — the Šamīa the steppes separating Syria from the Irāk and hence called Samāwā of Kalb and desert of Kalb. They held the springs, the oases at the east and south of Hāwrān, especially Dawmat al-Dajdal, Tabūk and several others dotted about the Wādī ‘l-Karā with their palm-groves, the property of the Banū Udhrā. In Syria they were grouped round Samāwā and Palmyra, towns which belonged to them. A part of the district of Emessa and of the lower valley of the Orentes were united in their territory and in
the Ghūţa [q.v.] of Damascus a number of villages belonged to the Kalb. The possession of commercial centres like Palmyra and Damaṭ al-Djandal leads us to suppose that this ancient Syrian tribe must have profited by the caravan passing by these routes, still very much used in the first century of Islam.

They seem to have inherited the ancient hegemony of the Qassānids. Like the latter and other Syro-Arab tribes at the time of the Ilidja the great majority of them professed the Christian religion and probably were Monophysites. They gradually exchanged it for Islam; one group is even said to have sent a deputation to the Prophet. In the following of the latter several Kalbīs — we may mention Zaid b. Hārūba, his adopted son, and Dāyah b. Khalīfa, his diplomat—rose to fill important positions. Islam spread among the Kalbī, especially from the time when frequent marriages — the first that of Nā‘īla, wife of the Caliph ‘Othmān [q.v.] — with the Omayyads assured them preponderance over the other tribes. Yazīd I, with his mother Maṣūm, passed a part of his youth in the desert of Kalb and contracted a marriage with a Kalbīya. The supremacy of this tribe and of the powerful family of Bālid [q.v.] incited the Kāsī against them. Refusing to recognize Mu‘awiyah II, the latter declared for Ibn al-Zubair [see ‘Abd Allāh b. al-Zubair]. The victory of ‘Abd Allāh [q.v.], due mainly to the bravery of the Kalbīs, completed the rupture between them and the Kāsī. Burning for revenge, they attacked the Kalb everywhere and succeeded in driving them out of Mesopotamia and the adjoining districts of the Samāwā. Besides, with the advent of the Marwānids, their popularity had sunk for the time at the court of Damascus, where their striking triumph at the battle of Marj Rāḥīt gave offence. They were not long in regaining their influence. They continued to figure among the most stalwart supporters of Omayyad rule. On several occasions, their contingents rendered effective assistance in retaking the ‘Irāq from the rebels in the East. They新冠肺炎现代伙伴, the bravest among the Kūfīya. In a word, the name of Kalbī had become synonymous with partisan of the Omayyads. The almost constant policy of this dynasty was to rely on the Kalbī alliance and through it on the support of the other Syrian tribes. A tradition said that the Kalb would be the last adherents of al-Sufyān [q.v.]. This state of affairs inevitably led to a violent reaction under the ‘Abbāsids and precipitated the fall of the Kalbī, decimated by their long struggle with the Kāsī and their active participation in all the wars of conquest. Soon their solidarity was broken up and the designation of ‘Abū Sā‘īd, an object of suspicion to the Baghdad government, of ‘Abū Sa‘īd, quoted by al-Kalbīshandī (in his Niḥyāyat al-Arba‘n, 3 For the other names, see Tab. of the 309-312, 324-326, 418. [H. LANNHESI]

The Encyclopaedia of Islam, II.

MALIK, according to Ibn al-Kūfi in the Fīhrīst, 3. ‘Abd al-‘Alī b. Bishr, whose grandfather with his sons al-Sā‘īd, ‘Ubayd and ‘Abd al-Rahmān had fought by the side of ‘Ali in the battle of the Camel and whose father had fallen by the side of Mus‘āb b. al-Zubair, had taken part in the battle of Dair al-Djamā‘ī [q.v.], in 10 (101) as a follower of ‘Abd al-Rahmān b. Muḥammad b. al-A‘lā [q.v.]. He then devoted himself to historical and philological studies; he read the Nāṣiḥat of Farazāda [q.v.] with the poet himself. He lectured in Kūfa on Kūfī genealogy and history; at the invitation of Sulaimān b. ‘Ali he expounded the Kūfī for a time in the latter’s house at Bayra. His commentary on the Kūfī was still used by al-Ṭalḥā [f. 157-159; see Cat. Codd. MSS. Or. in Musc. Britannic. pars ii. No. 82]. He died in 146 (765).

His son ‘Abū ‘l-Munṣūhī Haynām mainly continued his father’s historical studies, in which the latter had been his teacher. Both scholars have often been attacked by critics of traditions and even accused of forgery (see Kit. al-A‘gāhāni, ix. 19; xi. 48; xviii. 161; Goldscheider, Mnh. Studien, i. 186); but on the other hand they did not lack warm defenders (e.g. Ya‘qūb, Mu‘tamaw, ed. Wustenfeld, i. 358). Modern research has confirmed many of their statements, which they reached sometimes by regular methods such as the study of inscriptions, against the fanatical criticism of their opponents (see Noldeke, Gesch. der Araber u. Perser, p. xxvii.). Muhammad, who worked for a time also in Baghdād, died in his native town of Kūfa in 204 (819), according to others in 206.

Of the 40 works of Muhammad, listed in the Fīhrīst, pp. 95—98, there have survived: 1. Kit. al-Nasab al-Kalbī or al-Djamā‘ī f. ‘l-Nasab (Djamā‘ī al-Ansāb in Hādżī Khalīfa), on the genealogies of the Arabs in a MS. of the Escorial (see Cat. Codd. MSS. . Mus. Brit. pars ii. No. 915). This manuscript contains a modern proclamation of the descent of ‘Abd al-Rahmān b. Habīb, as the basis of the family’s claim to the Abī ‘Abd al-Rahmān family. It is the most important of the three fragments, which are incomplete; the fragments give only of an extract; a fragment of the work is perhaps preserved in a Paris manuscript (Bibl. Nat., de Sian, Cat. No. 2047). Of apparently much condensed version of the work by ‘Abū Sa‘īd ‘Alī b. Mūsā al-Sukkāri (d. 465 = 1075), which is chiefly based on Muhammad b. Habīb’s recension, but also that of Ibn al-A‘rāf and other fundamentally independent sources also, the first volume is preserved in the British Museum (see Cat., No. 1202 and also p. 785). The extract by Ya‘qūt is in Cairo, Khed. Library, see Fīhrīst, v. 156; Volters, Zeitschr. d. Deutsch. Morg. Gelehr. d. Arab. Ver. al-Nasab Fuḥūr al-Kalbī, ii. 3, 5. Ya‘qūt’s al-Djamā‘ī al-Arab (cf. H. LANNHESI, D. L. W. abd. phil. hist. Kl. vi. 214 No. 50 in Gomma (see Pertsch, Die arab. Hist., ii. 2075) and in the Escorial (see Cat. i. No. 1700, 2). 3. Kit. al-Aṣāmīr or more accurately Kit. Tunkis al-Aṣāmīr, which Ahmad Zeiki Pasha [Ibn al-Kalbī, Le Livre des Idoles (Kitāb al-Aṣāmīr), Cairo 1914] has published. An apparently very full synopsis which enables us to judge of the extent and arrangement of the book is to be found in ‘Abd al-Ghrādil-Baghādil’s Kitāb al-Adab, iii. 242—6. The numerous extracts in Ya‘qūt have been collected by Wels, Reste arabi. Heidentumwes, ii. 10—64 (cf.
also 243 and translated and annotated. 4 An extract from the Kit. al-Kalbī (Fārisī, p. 97, 48) is given by Ibn al-Anbārī in his commentary on the Mubādýlāt; see C. J. Lyyell, Ibn al-Kalbī’s Account of the First Day of al-Kalbī in the Orient, Stud. Th. Noldeke gewidmet (Giessen 1906), i. 127–154.

(Brockelmann)

KALĪ’I SEFĪD, a fortress in Fārs, in 30° 10’ N. Lat. and 51° 30’ E. Long. (Greenwich). It is built on a mountain with a flat top, in the eastern part of the valley of Kohra, which falls steeply down on all sides. On its summit, which can only be reached by clift-paths, lies an extensive well-wooded plateau watered by numerous springs. A strong garrison is necessary for its defence as is noted in the Fārsīnāma. Descriptions of the fortress and the country round it are given, among Oriental writers for example by Ibn al-Kalbī in the Fārsīnāma (the pertinent passage is copied by Mustawfī from the Kitab al-Kalbī, ‘Alī Yāzdi and Mirkhwand (see Bibli.). Of descriptions by European travellers in the sixteenth century, that of Stolze deserves special mention; along with Andreas he explored the mountain and castle thoroughly. The statements of Kinneir who visited Kalī’i Sefīd in 1810 are unreliable, according to Stolze.

The name of the fortress is given in the Persian geographers and historians as Kalī’-i Sefīd (Sefīd, Sepīd), the “white citadel”; Kalī’-i Sefīd-dīz (the “white fortress”) is also found; Kalī’-i Sefīd is the only form in use at the present day. Translated into Arabic the name is given in Ibn al-Athir (ed. Tornberg), xi. 46 as al-Kalī’-a-Balad. The name “white citadel” which is found elsewhere as a name for a castle in areas where Arabic and Persian are spoken (e.g. in al-Hira, al-Maddah, in the oasis of Ruhf east of HAWRān, and in the region of Kairawān, in Afghanistān, etc.; for Biredjī cf. above i. 723) may very probably originate in the dazzling white colour of the building-stone used. The name Kalī’-i Calu Gušāb (citadel of the rose and rose-water), borne by Kalī’-i Sefīd in al-Bundari, Tarārīkī Al-Saljūqī (ed. Noutma, 2, p. 185, 15) is remarkable.

Kalī’-i Sefīd is the most northerly point on the mountain road which leads from Behbāhān to Shirāz and furnishes communication between Khuṣīstān and Fārs. It may be regarded as certain that a commanding place like this was very early fortified. The “Persian passes” through which Alexander the Great tried to enter the ancestral home of the Achaeemids and which were defended by the Satrap of Persis, Ariobarzanes, with his strong forces, have often been sought in the valley of Kalī’-i Sefīd; e.g. by Vincent, Muzel, Droysen, Forbiger. Ritter (Erмkunde, ix. 138) in differing from these, considers Kalī’-i Sefīd to be the stronghold of the Uxians and places the “Persian Gates” farther east. Ritter’s view has been attacked particularly by Mützel in his edition of Curtius (Berlin 1844), p. 414 sq. and by Stolze (op. cit., p. 262 sq.). That the region of Kalī’-i Sefīd does not correspond with the situation of the “Persian Gates” of the historians of Alexander and that the latter should be located elsewhere has been fairly convincingly proved by Stolze, op. cit.

Kalī’-i Sefīd is not mentioned by the Arab geographers of the middle ages. Like the adjoining town of Nawbandān (Nawbandān) it must have been allotted to the Persian province of Sābūr in the Caliphate period. From the tenth century on we find cropping up in the Oriental sources a nomadic people named the Shīl, after whom the whole area, inhabited by them from the west of Shirāz to the frontiers of Fārs and Khuṣīstān was called Shīlāstān. There is definite evidence to show that Kalī’-i Sefīd belonged to Shīlāstān. On the Shīl and the land of Shīllāstīn cf. the references in Quatremer, op. cit., p. 380 sq. and also Mustawfī, Tā’rīkī Gušā (ed. Browne, Gibb Mem. xiv.), p. 538, 658, 660, 696, 726.

Kalī’-i Sefīd is frequently mentioned by Persian poets and chroniclers. It is first found in Firdwāsi’s Šakhnāma (ed. Mohf, ii. 92, 245 sq.); here the conquest of the stronghold is related as one of the noteworthy deeds of the hero Rustam. As the Fārsīnāma (written about 900 = 1106) reports, the fortress of Kalī’-i Sefīd had lain in ruins for many years until it was rebuilt by a certain Abū Nasr from Tir-Murdān (a district of the province of Sābūr) during the turmoil of the last decades of Būyād rule, that is in the first half of the vii (vith) century. The mountain, difficult of access, served not infrequently in wartime as a secure hiding-place. For example in 534 (1139) Buzhā, Governor of Fārs, retired here before Kašrūm Monkār, Attabeg of the Saljūqī Sulṭān Mas‘ūd; cf. the article BUΖHUĐ, i. 809. The Saljūqī Abū Bakr, Attabeg of Fārs from 623 to 658 (1226–60) (on him see above i. 82) transported his treasures to Kalī’-i Sefīd and placed a garrison in the citadel in order to have a place of refuge here in case of a catastrophe. After the death of the Saljūqī dynasty, Sālqīkhānī, met his death at the foot of Mount Kalī’-i Sefīd in battle with one of Hulāgū’s generals in 663 (1264); see J. v. Hammer, Gesch. der Ḥūlagūn (Darmstadt 1842), i. 243 and cf. also Mustawfī, Tā’rīkī Gušā, p. 509.

Although Hulāgū issued an order to destroy all the fortresses in the lands conquered by him, an exception was made of Kalī’-i Sefīd, as is expressly mentioned; cf. the passage in the Tā’rīkī Waṣafī in Quatremer, op. cit., p. 382. The citadel could therefore continue to serve as a place of refuge, and was also on several occasions used as a state-prison for political opponents. Thus for example Mas‘ūd Shāh, the last ruler of the Saljūqī dynasty, who rules as governor of Fārs from 736 (1335) imprisoned his brother Muhammad in Kalī’-i Sefīd (cf. above ii. 504); when later Abū Ishāk, a younger brother of the Mas‘ūd Shāh just mentioned, came into conflict with the Muẓaffarī Mubāriz al-Dīn and had to flee after the capture of his capital Shīrāz in 754 (1353) he went to Kalī’-i Sefīd (see Mirkhwān’s account in Quatremer, op. cit., p. 382; Mustawfī, Tā’rīkī Gušā, p. 658, 15 sq., and cf. above ii. 804). A few years later the sons of Mubāriz al-Dīn, Shaikh Sulṭān and Shaikh Shuja‘ rebelled against their father, blinded him and imprisoned him in Kalī’-i Sefīd.
in 759 (1358); see Mustafwî, Ta‘rîkhî Gucûda, p. 681; Defroisney in the Journ. Asiat. 1804, ii. 112. In 785 (1383) Shah Shâhâr bi sent his son Sultan Shânik to take Kâfe-i Seifid as an alleged rebel (see Mustafâ, op. cit., p. 724; Quatremêre, op. cit., p. 382; Defroisney, op. cit. (1845), i. 437).

Kâfe-i Seifid has attained special fame through its capture by Timûr. The latter on his second campaign in Fârs in 795 (1393) passed by the road from Behbahân to Shirêza, besieged this barrier fortress, considered impregnable, and stormed it on the third day. All the members of the Mughalid dynasty were captured and put to death (cf. Shâraf al-Dîn ‘Alî Yazdî, Zafarnâmâ, Bibl. Ind., New Series, Nî. 616, Calcula 1887, i. 600 sq.; Mustafâ, op. cit., p. 754).

We read of the capture of Kâfe-i Seifid by Hâma-Bey several centuries later, in the reign of Shâh ‘Abbâs I; see Quatremêre, op. cit., p. 384. The Mâmasenî have now settled in a large part of what was once called Shîlûstan; they are a robber Lîr-tribe, who belong to the Bakhîtîyârî [q. v., i. 603]. They centre round Kâfe-i Seifid. On them see Layard in the Journ. of the R. G. S., xv. 28; Ritter, Erdkunde, viii. 390, ix. 137; C. de Bode, Travels in Luristan and Arabistan (London 1845), i. 210, 219 sq., 262 sq. When the Mâmasenî in the latter part of the reign of Fat‘î Shâh (1790-1834) came under a robber chief named Wâl Khân Bâkash, an army of Adhâr-badjûnî troops was sent against them, who besieged Kâfe-i Seifid and forced the stubborn defenders of the citadel to yield (cf. Curzon, op. cit.).

It should further be mentioned that below the fortress on the mountain there was at one time a second smaller castle, the name of which is variously given as Aštâk (Fârs nâmâ, p. 158, 17) or Nîshân (Mustafwî, Nûshät al-Kûlûb, p. 132, 5); further variants of the name are given here in note 1).

The little village of Têll Eospîd should not be confused with this; it lies northwest of Kâfe-i Seifid in the adjacent plain on a hill some 2400 feet high; cf. Wells in the Proc. of the Roy. Geogr. Soc., 1883, v. 161 and Herzfeld, op. cit., p. 85.

KALÉ-I SULTÂNIYE, in popular speech usually Çanaş Kâle-i ("Pot-castle"), the town and fortifications known to Europeans as the Dardanelles, the chief place in the sandjak of Bigha [q. v., i. 716, cf. also Dardanelles, i. 922], situated at the narrowest part of the straits. The modern settlement has taken the place of the very ancient seaport of Abydos; the latter name, indeed, survived down to the xviith century on Italian charts in the form Avido, Aveo, as the name for Kalé-i Sultânîye (the bay: la bocca d’Aveo). While the form Aandin [q. v.] was found in Yâkût, Munjum (ed. Westermarck), i. 374 also is to be read Abydos, the statement of Job. Leunclavius, Historiae Musulmanae, Frankfurt 1591, p. 182, 55, taken from the Codex Hanavaldonis (Neßnî), that Abydos is called Abydos by the Ottoman can be said to be wrong. There is confusion with Aidos in Koca Eli and the whole story of the conquest in Leunclavius refers to this place and not to Abydos. Here from the days of the Roman empire was the chief custom-house of Byzantium, where every vessel entering the straits had to pay a tithe (Agathas, v. 12; cf. the customs regulations of Abydos published by A. D. Mordwinski in the Akademie der Wissenschaften zu Berlin, i. 1878, 1), and it was strongly fortified, as the key to the capital. In spring of 717 the town was taken along with the coasts of the Hellespont by the Umayyad general Maslama (Theophanes, ed. Bekker, Bonn 1839, p. 395). In those days there was attached to a tower here the great chain which barred the Muslim ships’ entrance to the straits (Ibn Khordadbeh, ed. de Goeje in the Bibl. Geogr. Arab., vi. 103 sq.; cf. Yâkût, i. 374; al-Idrisî, Nûshät al-Mughâf, Fr. transl. by Jaubert, Géographie d’Edrusi, ii. 135, 301, 303). While the siege and capture by ‘Emîr Orkhan are as uncertain as the crossing of the Dardanelles attributed to him at this place (cf. Job. Drâsêk in the Neuer Jahrbücher für Klass. Altert., xxxi. [1913], 476—504), the statement that in the reign of Murâd about 1554 the straits were crossed in small boats at Abydos, is more worthy of belief (Dukas, ed. Bekker, Bonn 1834, p. 14, 8, 39, 13; Phrantzis, ed. Bekker, Bonn 1838, p. 45, 13). This would, it is true, be in contradiction to the Turkish account which places the crossing at Kemere opposite Hexamilia. The place did not become of any considerable importance in the Muslim period until the time of Muhammed II, who took it in 1451, built a great defensive works here for the protection of Constantinople, which he had recently captured, and founded a town here (Châlkokondyles, ed. Bekker, Bonn 1843, p. 529, 18 sqq.). The fortress was armed with about 30 large and a number of smaller guns. All incoming ships had henceforth to cast anchor there, to show their papers and pay toll (Châlkokondyles, op. cit., p. 530; cf. thereon Kritobulos, ed. C. Muller, Fragn. Hist. Graec., v. 146). The town was now regarded as the main defence of the Dardanelles, although by the middle of the xvith century we find European travellers who sailed through the straits wondering at the insufficiency of the defences; for example, Pierre Belon, to whom the walls and towers, said to be built out of the ruins of Scamandria, seemed not nearly strong enough.
for the "key to Turkey" (Les observations de plusieurs singularités, Paris 1854, p. 77⁷⁹ sqq.; there, also, is a picture of the Dardanelles forts following p. 78). It is certain that European fleets could pass the straits unhindered in the middle of the xviith century, and that the bastions on both European and Asiatic sides were in almost complete ruins. Although about 1550, 32 great guns still barred the entrance to hostile ships (cf. Charrigre, Négociations, Paris 1849, i. 374 and 380, where "les deux chateaux du Hellespont nommez Dardanneaules", the XXXII gros canons dont nu navire ne peut entrer ou sortir malgré eulx" as well as the search of a ship are described), a very short time after, it was no longer possible to think of any serious resistance being made by them. It was the vigorous Sultan Kosem, who reigned for a period for her minor grandson Mehemmed IV, who, with the grand vizier Mehemded Koprulu, devoted special attention to the decaying Dardanelles forts and decided to renovate and remodel them completely. The building of Seddûl 1-Bahr and Kâlî, the two so-called "new castles", was also his idea, and this was his time (cf. J. v. Hammer, Gesch. der osman. Reichets, Pest 1827—35, v. 516). In 1658 the work was begun under the supervision of 'Ankabît Ahmed Pasha, commander of the Dardanelles, and under the direction of the architect Mustafâ Agha, and by Sept. 1659 Sultan Mehemmed IV was able to inspect the new works (cf. Na'mâni, Stambul 1147, ii. 698 sqq., 704; J. v. Hammer, op. cit., vi. 65 sqq.) and dedicate a mosque (Ewlyâvi, v. 307; according to him, the name Kâlî-Sultanîye arose at this time in honor of Kösem follando, but it is probably older). The appearance of the new citadel is accurately known from European descriptions of the time. The fortress proper was surrounded by a strong wall at each of the four corners of which there rose a fortified tower. In the middle was the donjon, which had been increased in height. Nearly 30 guns were placed here in no regular order, so as not to injure the opposite works of Kiliû 1-Bahr when they were fired. Behind the defences lay the town proper, inhabited chiefly by Turks and Jews, numbering some 3000 inhabitants about 1650 (cf. Grelot, Relation Noyez des deux voyages de Constantinople, Paris 1681, p. 24, 28, 29 and a picture of the Dardanelles defences on p. 41); further pictures in Pitton de Tournenfort, Relation d'un voyage du Levant, Paris 1717, i. 453 sqq., Amsterdam 1718, i. 175 sqq.). There were definite rules regulating the passage of ships. Every merchantman had to announce its arrival with 3, 5, 7 shots to which 1—5 were fired in reply. This had to be repeated with 3, 5, 7 shots and not till then could the voyage be continued. All ships coming from Constantinople had to cast anchor here to be examined and pay tolls (cf. M. de Thevenot, Relation d'un voyage fait au Levant, Paris 1665, p. 32 sqq.; Jacob Spon and George Wheler, Voyage d'Italie, de Dalmatie, de Grece et du Levant fait aux annees 1675 et 1676, the Hague 1724, i. 122 sqq.). Not more than five Christian ships could go through at the same time (cf. Grelot, op. cit., p. 30). These regulations survived into the xviiiith century, although there was considerable laxity in their enforcement (cf. R. Chandler, Travels in Asia Minor, Oxford 1775, p. 11). A hundred years later the defences were again in the most wretched state, vividly described by Baron Franz von Tott (Tott) (Monuments du Baron de Tott, Amsterdam 1754, ii. 43 sqq.). In 1770 the Russian fleet was able to sail through the straits without opposition. Von Tott thereupon hurriedly repaired the fortifications (cf. Édgar Fülöcz, Útikort Tott Ferenc, a Dardanalik története, Budapest 1916), without, however, being able to stop their decay. The town seems to have been in quite a flourishing condition at this time, according to R. Pococke, Description of the East (London 1743—1745), i. 102—104; it was 1½ miles around and had 1200 inhabitants (200 Greeks, 100 Armenians and 50 Jews), who carried on a busy trade in silk, sailcloth and earthenware. The annual export was put at 15,000 dollars. A French Consul, as well as a Dutch and English dragoman had their offices in Kâlî-Sultanîye. The potteries, which seem to have begun about 1740, were for a long time famous and gave the place the name Canâğı Kâlî. The inhabitants lived in different quarters separated into nations. Armenians who fled from Shah Tahmasp are said to have been settled here as early as 1526. They came to Constantinople (cf. La Turquie d'Asie, ii. 689 sqq.) but a regular Armenian colony only dates from about 1650. At the same time there is evidence of a sometimes large, Jewish settlement, which played a prominent part in the business world (cf. Grelot, op. cit., p. 24; Baron de Tott, op. cit., iii. 59; J. B. Lechevalier, Voyage de la Prophétie, Paris an VIII (= 1800), i. 14, according to whom the people were almost all Jews, who did a brisk business in provisioning passing ships (cf. thereon Grelot, op. cit., p. 28). There is no documentary evidence of the presence of Greeks before 1690 in Kâlî-Sultanîye. In the xviith century the fortress sank practically to insignificance. The bold passage of the English fleet through the Dardanelles on Feb. 19, 1807 resulted in the defences being again repaired (cf. Zinkei-en, Gesch. des osm. Reichts, vii. 434) but without their afterwards keeping pace with the rapid development of modern artillery. A very full description of the fortifications in 1836 is given by Helmut v. Moltke, Briefe über Zustände und Begebenheiten in der Türkei (Berlin 1841), p. 51 sqq., 8th ed. (1917), p. 55 sqq. and by Abercrombie Grant, Narrative of a Journey to Greece in 1830, p. 433 (with sketches). Kâlî-Sultanîye and its forts only became of considerable strategic importance again during the Great War, when as a result of an indirect bombardment from the Gulf of Saron by the Anglo-French fleets the town, which had been almost deserted by its inhabitants, suffered severe damage in March 1915 and was burned down. It had previously suffered from frequent fires and especially from the great earthquake of Aug. 9, 1912. About 1890 the town had about 11,000 inhabitants, 11 larger and several smaller mosques and 4 churches, but now the number must be much smaller.

KALغا — AL-KALI

473—5, 528 sq. and Index s. v. Kilhat; Ritter, Erdkunde, xii. 305, 373; 376, 377, 378; Geogr. d'Édifices (French transl. by A. Jaubert of the Idria, Nasbat al-Muqaddas), i. 151; J. R. Wellsted, Tiwals in Arabia, London 1858, i. (J. Schleiper)

AL-KALI, Abu 'Ali Isma'il b. Al-Kasim b. A.vlaxDIN b. HAKIM b. 'ISA b. MUHAMMAD, a great Arab philologist, born in Djiñmad au, 288 as May-June, 901 (a little town in Arabia which was then a dependent of Diyar Bakr, and died at Cordova on Djiñmad au 17, 336 as April 19-20, 967 (according to others Rabi' II, Djiñmad au 11, 336, and also 366 according to Ibn 'Idhari).

In 303 having gone to Baghdad in company with some people of the town of Kalkata, he was confused with them and in consequence was named al-Kali. However, he is usually called in the East Abü 'Ali al-Ibaghâdi. After studying Islamic Traditions and particularly Arabic language and literature, al-Kalit, at the end of his resources, left Bagdad in 328 (939-40) and went to Spain where he did not arrive until 330 = 942/3, in the reign of the Caliph 'Abd al-Rahman al-Nasir. The son of this prince Abü l-Asl al-Jahân who was fond of learning and of scholars received him very kindly, indeed, it is said that even he had written to the East to get al-Kali to come to the West. Abü 'Ali arrived in Cordova on Sha'bân 26, 330 (May 16, 942), where he began to teach Traditions and especially the Arabic language and literature. As teachers he had 'Abd Allah b. Muhammad al-Baghwâ, 'Abd Allah b. Sulaimân b. al-'Ashâth b. al-Sudjistânî, Ibn Durâid, Ibn al-Sarrâd, al-Zadrâjî, al-Akhwâsh al-Saghîr, Niţawâlî, Abû Bakr Ibn al-Abâbî, Ibn Ku-tâbî, Ibn Durastawahl, etc. Among his pupils we may specially mention the grammarians and lexicographer Abû Bakr Muhammad b. al-Hassan al-Zahîdî.

Among his works we now only possess: 1st. Kit. al-Amâdî wa 'l-Dhail wa 'l-Nawâdir, a kind of anthology containing a large number of notes on verbs, language and poetry, published at Bâlâk in 1324; indexes of poets and rhymes have been published by F. Krenkow and A. Bevan at Leiden in 1913; 2nd. Kit. al-Nawâdir, part i, Cambridge, Univ. Libr., E. G. Browne, A Hand-list of the Muhammadian Manuscripts, No. 926; 3rd. Kit. al-An'ir fi Gharib al-Hadjî, remained unfinished, Paris, Bibl. Nat., No. 4235.

The name of tīn, for a special quality of tin among the Arabs, occasionally also called al-raṣāṣ, al-bah, and al-raṣāṣ al-aḥyāq, i.e. "white lead"; see Liūān al-Arab, x. 167, 16; Dozy, Supplément aux Dict. arab., ii. 397; Vullers, Lex. Pers.-Lat., ii. 735; Quatremère in the Journ. des Savants 1846, p. 731. For other names of tin in Arabic (Kaḍṣīr = Қәдәр, etc.) see e.g. al-Dimashqī, Nisbat al-Dahr (Cosmography, ed. Mehren), p. 544. The word apparently comes from the Far East, from which the Arabs may possibly have got it directly, without the (not impossible) intermediary of modern Persian, which also has rāṣāṣ, al-muwaqar (ed. Sachau), p. 125, 6 demands (the original would be Persian Kālāth). The correction Kālāth for Kālāta there proposed is based on Ibn Saʿīd, quoted in G. Ferrand, Relations de voyages et Textes géographiques..., relatt. à l'extrême-Orient (Paris 1913–1914), p. 343. The word Kālī (in Ghlian: Kālī) found in the modern Persian dialect of Māzandānī—see Melgunow in the Zeitschr. d. Deutsch. Morgenl. Gelehrten, xxiii. 198—must have come through the Arabic; from the latter the word entered Turkish: Kālā (Sīml, Kānāzī-Türkī, p. 1032) and thence into modern Greek: τὸ κάλαμος. As a loanword Kālāth travelled still further, into Portuguese (caíman, caín = Kālāth) tin; see Dozy and Engelmann, Gloss, des mots espagnols et portugais derivés de l'Arabe, (Leiden 1860), p. 245; Vule and Burnell, Hobson-Jobson, 2 (London 1903), p. 143. The cradle of the word was probably the district of Kālāth in the peninsula of Malaca, which was celebrated for its tin-mines (see Kālāth above). The Arabic geographers and lexicographers usually derive the name Kāfīr from al-Kāfīr in India (Kālāth, q.v.); so, for example, Yaḥyūt, Muṣāūdī (ed. Wustenfeld), iv. 162, 6; al-Firūzbādī, al-Kāmīs (Cairo 1901), ii. 71, 5; cf. also Hamd Allah Mustawfī, Nuzhat al-Kalābat (ed. le Strange, Gilb Mem. xxi.), p. 203, 6. At the same time the word—totally erroneously—is also connected with an (alleged) tin-mining area of al-Kaḥā in Ceylon (Yaḥyūt, i. 21, 13, iv. 162, 15), in Spain (Yaḥyūt, iv. 162, 15 74); Hamd Allah Mustawfī, p. 203, 8; and in Yemen (Yaḥyūt, iv. 162, 17; al-Firūzbādī, op. cit.).

The most usual word for tin in Malay at the present day seems to be timah. At the same time we find with this meaning also kaling, kalong—not kelang, as written by Langles, Quatremère, Dozy-Engelmann, Yule-Burnell and others—which, according to the dictionaries, means primarily tin-plate, or tinned iron-plate (but nevertheless is the meaning tin an older one); cf. Wilkinson, A Malay-English Diction. (Singapore 1901), p. 497; Wilkinson, An abridged Malay-English Diction. (Singapore 1919) and Klinkert, Neuw Maleisisch-Deutscher Wörterbuch (Leiden 1916). It is obvious that the Arabic Kāfīr is to be traced back not to Kāfīr (Kalābat) but to this Malay word. Quatremère, op. cit. definitely puts forward some such derivation of Kālī's, whereas Dozy-Engelmann, op. cit., and Yule-Burnell, op. cit., leave the question undecided. Is the similarity of name simply an accident? It is hardly possible that the Malay Kaling itself is only a corruption of the Arabic Kālī's. The further possibility has also been considered that the name of the district of Kalang—from the Malay Kaling—may mean simply "land of tin", a view expressed as long ago as Langlès in his edition of the voyages of Sindbad the Sailor in Savary's Grammaire de la langue arabe (Paris 1813), p. 499 = reprint (Paris 1914), p. 63. Yule and Burnell quote as an analogy the Arabic that the little state of Selangor (north of the town of Malacca) was formerly known as Nagri Kalang = "land of tin". To this we may add, quoting Wilkinson, Malay-English Dictionary, p. 526, that Kâlang, Kâlang, properly only the name of a district in Selangor and of a little township in this district, is also often extended to include the whole state of Selangor. Perhaps the origin of Kālī is to be sought in this Kâlang.

2. The name of a particular kind of sword, which is often mentioned, especially in the old Arabic poetry. Cf. for example, Ahs b. Hādiyar (ed. Geyer, Sitz.-Ber. d. K. Akad. d. Wiss., phil.hist. Kl., 1892), xii. 33; Ruḥa b. al-ʿAsāqī (ed. Ahlwardt, Sammlungen alter arab. Dichter, iii. 37), 49, 45, stoloiat to ʿArāf, Mualāsā (in Schöder, Sept. 1853. 39, 10), Kālū, Leipzig 1850, p. 61). On Thālibī, Lātīfī, p. 102, 7, 130, 4 (quoted in Dozy, Suppl. aux diction. arab., ii. 396) see Fleischer in the Sitz.-Ber. d. Sachs. Gesellsch. d. Wissensch., 1886, p. 45. Cf. also Ibn Saʿīd, al-Tabakāt, l. i. 50, 11. This kind of sword is usually said to be of Indian origin (cf. for example al-Firūzbādī, al-Kāmīs under ʿīsī) and, indeed, Indian swords were from early times famous among the Arabs and celebrated by the poets; on this cf. Schwarzlose, Die Werfen der alten Araber (Leipzig 1886), p. 127 sq. and A. Siddiqī, Studien über die persischen Fremdwörter im klassischen Arabisch (Göttingen 1910), p. 88 sq. As a more definite place of origin we usually find the Arab geographers and lexicographers giving that al-Kāfīr from which the tin of this name comes. Occasionally also the Syro-Arabian desert (the ʿAlaḍīya) or the district of Ḥulwān in the Irāk is given as the place of origin; cf. Liūān and al-Firūzbādī, al-Kāmīs under ʿīsī. The Yemen, which produced the finest swords next to India, is sometimes also described as the place of origin of the kāfīr's sword, for example in the above quoted gloss to ʿArāf's Mualāsā. Jacob, Altarabisches Bedüinetleben (Berlin 1897), p. 149, would like to decide in favour of Yemen, in particular the "fortress" (kāfīr) of ʿĀden, in support of which could be quoted the fact that in a poem by ʿAlkama (ed. Socin, No. 3, 4 there is mention of "pears from Kāfīr Kālābat"). Nevertheless, the derivation of the Arabic word from an East-Indian place al-Kālābat (Kalābat on Malacca? see Kālamī) seems to me more probable. It is unnecessary to distinguish between two different kinds of sword, kālī and kālū (see Freytag, Lex. Arab.-Lat., s. v. kālā and kālā), in spite of Schwarzlose, op. cit., p. 130.

Kālī Kālā. [See Erzurum].

Kālīla Wa-Dīmna is the title of an Indian mirror for princes, formed by the corruption of the Sanskrit names of the two principal characters, two jackals, Karatāka and Dāmanaka (in the old Syriac translation the forms are still Kālīla and Dānnag); it was translated from Sanskrit into Pahlavi and thence into Arabic.
and became widely known in Muslim as well as Christian literatures.

1. The original work. The Indian original was composed by an unknown Vishnuvarda Bhojana, according to Hertel probably about the year 300 A.D. in Kashmir; the main argument for this, the decensation of denarius by Amūra is, however, not cogent, as the pronunciation of the name its as i is older than Hertel supposes (see also A. Berriedale Keith in the Journ. Roy. As. Soc., 1915, p. 505). It consisted of an introduction and five books each of which bore the name tantra i.e. "case of good sense". The book was intended to instruct princes in the laws of polity by means of animal-fables composed in perfect Sanskrit. The oldest descendant of the original work is the Tantrābhajyā, rediscovered by J. Hertel (see Tantrābhajyā, die alteste Fassung des Pāñcatantra, transl. from the Sanskrit with introd. and notes by J. Hertel, 2 parts, Leipzig and Berlin 1909). A second recension of the original work is called the Pāñcatantra (see J. Hertel, Pāñcatantra, etc. in Harvard Oriental Series, Vols. 11–14); it has become a very popular book in India and is current there in countless versions. J. G. L. Kosegarten published an uncritical text, Bonn 1848; on this Th. Benfey based his translation, Pāñcatantra, fünf Bücher indischer Fabeln, Märchen und Erzählungen, transl. from the Sanskrit with introd. and notes, 2 parts, Leipzig 1859. In the introduction to this work the history of the migration of Indian literary subjects to Europe was first exhaustively investigated.

2. The Pahlavi translation. A rather early recension of the Pāñcatantra was translated from Sanskrit into Pahlavi by order of the Sassanian king Khusraw Anšāwaran (531–579) by his physician Būrزو, whom he had sent to India for this purpose, and expanded by the addition of an appendix of fables from other Indian sources; of these the three first (chap. 11–13 in de Sacy) are taken from the twelfth book of the Mahābhārata, the other five (de Sacy's chap. 14, 15, 17, 18 and the story of the king of the mice, see below) given in de Sacy hardly appear, however, to have been found again in Indian literature, although there is no reason to doubt their Indian origin. Būrزو prefaced his translation with an autobiographical introduction which the vizier Buzurjmuhr, it appears, signed with his own name as an honour to the author (see Būrزو Einleitung zu den Buchen Kalīla wa-Dīnma, transl. and annot. by Th. Noldeke, Schriften der wissensch. Gesellsc. in Strassburg, Heft 12, Strassburg 1912).

3. The old Syriac translation. Būrزو's Pahlavi translation itself is lost; but by about 570 A.D. it had already been translated by the Periodot Bīr into Syriac. This translation only survives in one manuscript, which was formerly preserved in the monastery at Mardin, then in the library of the Patriarch of Mosaıl and afterwards came into the possession of Mgr. Graffin in Paris. From a defective copy of this, which Socin had brought with him, Bickell prepared the first edition (Kalīla und Dīnma, alte syrische Ubersetzung des indischen Furstenspiegels, text and Germ. transl. by G. Bickell, with an introduction by Th. Benfey, Leipzig 1876). F. Schultess was later able to prepare a much more reliable text based on three new copies which each has had preparatory in Mosaıl (Kalīla und Dīnma, Syriac and German, Berlin 1911).

4. The Arabic translation. About three centuries later 'Abd Allāh b. al-Muḳāfī (see Ibn al-Muḳāfī, II, 464) translated Būrزو's Pahlavi version into Arabic. He wrote an original preface to his book, inserted in Buzurjmuhr's introduction probably the section on the uncertainty of religions, added after the first book of the Pāñcatantra a chapter written by himself on Dimma's trial (chap. 6 in de Sacy), which, by punishing the traitor satisfies the feeling of justice, outraged by the immoral teachings of this book, and apparently also added the chapter "monk and guest" (N. 16 in de Sacy). Ibn al-Muḳāfī's edition was originally a stylistic work of art intended for literary connoisseurs; but from the nature of its matter, it soon became very popular and therefore much corrupted in transmission. Even the numerous quotations in Ibn Kasīlīn's Uṣūn al-Aḥbār already no longer reproduce Ibn al-Muḳāfī's text word for word. The fairly numerous manuscripts of the work are all of late date. Sylvestre de Sacy's edition (Calīla et Dimma, ou Fables de Bidpai, Paris 1816) is based on an inferior manuscript and arbitrarily emended from other manuscripts (see Noldeke, in the Göttinger Gelehrte Anz., 1884, p. 676). In de Sacy's text, Ibn al-Muḳāfī's preface is preceded by a new preface by an otherwise unknown Imām b. Abū al-Ḵāl b. al-Shāb al-Fārisī, in which he gives an account of the history of the book in India, as well as a report said to have been written by Buzurjmuhr regarding Būrزو's mission to India with the commission to bring back the book; in several manuscripts this is followed by another story of Būrزو's being sent for a miraculous plant. Some manuscripts (see J. Denbourg, Directoireium vitae humanae, p. 323) add at the end two more fables, of the lion and the duck and of the dove, the fox and the heron from other, as yet unknown sources. This latter story is also inserted in the oldest Oriental reprint of de Sacy's edition, Bābāgī 1449 (according to Chauvin, ed. des Chavains. Library of Cambridge; a copy in my possession also); from this it has passed into the more recent editions printed at Cairo, Mösul and Bāṣrūt, the list of which in Chauvin, p. 13 sqq., according to Cheikhou (see below), p. 6, is not yet complete. Valuable contributions to the criticism of de Sacy's text from Italian manuscripts are given by I. Guidi, Studii sul testo arabo del Libro di Calīla e Dimma, Rome 1873. The story of the king of the mice and his ministers, not given in de Sacy, which is shown by the Syriac text to belong to the Pahlavi work, was published by Noldeke in text and translation in the Abhandl. der Königl. Gesellsc. der Wissensch. zu Göttingen, 1879, xxv. No. 4. The complete material from 16 Paris manuscripts for the story of the aetic and the broken jug were given by Zotenberg in the Journ. Asiat., Ser. 8, vii. (1886), p. 117–123.

While the numerous printed editions of the East in the main reproduce de Sacy's text, A. N. Tabbbara (Kalīla et Dimma, trad. arabe copié d'après un ancien manuscrit trouvé à Damas, avec notes, Beyrouth 1322 = 1904) claimed to have discovered a new source for textual criticism, but his manuscript (of 1080 = 1675) is too modern to afford new material and his edition is, besides, bowdlerized. On the other hand L. Cheikhou found
in the Lebanon monastery of Dair al-Shir a valuable manuscript of the year 749 = 1339, and made it accessible in an excellent edition: *La version arabe de Kalilah et Dimnah d'après le plus ancien manuscrit arabe daté*, Beirut 1905. I have not seen the new edition by Khald al-Va'idy (ibid. 1908); that of Salim Ibrahim Saleh and Shahin Aljia (ibid. 1910) is intended for school use. The modern European translations from de Sacy’s text are given by Hertel, op. cit., p. 393; to these may now be added M. Moreno, *La version arabe de Kalilah e Dimnah*, transl. into Italian, San Remo 1910 (see *Riv. d. Studi Orientali*, vi. 201).

5. Arabic versions. The translation by Ibn al-Muqa'alī has been three times put into Arabic verse. The first version was made by his younger contemporary Aban al-Lahij (q. v.; see also A. E. Krymski, *Aban al-Lahij*, the *Zindil* (environ 750–815), versificaturo arabe dei raccueil des apologies d'indoor-erotic. Essay sur le vie et ses écrits, tiré de l'unique manuscrit de Souli, Bibliothèque Nationale, No. 524, and d'autres sources primiées. Appendices: a. Barlam and Josaph, entit littéraire-historique; b. *Texte arabe intact d'al-Arwâr par Souli, ed. en collaboration avec Mirza Abdallah Ghaffaros* (also in Russian with Russian title) Moskva 1913; on the manuscript cf. Horovitz in *Mitteilung der Deutschen Gesellschaft für Südostindien*, Berlin, x. 35. This version is lost; with the help of it, but on the basis of the text of Ibn al-Muqa'alī about the year 1100, Ibn al-Habbariya (q. v.) composed in ten days a poetic version in elegant and flowing language entitled: *Nadhidj al-Filma fi Naqim Kalila wa-Dimnha*, lith. Bombay 1817 (see Houtsma in the *Oriental Stud. Th. Noldeke* ... *ed. Noldeke*, i. 91–96) by third versification of the book entitled *Darr al-Hizam fi Anshul al-Humud wa'ld-Adjam* was completed by 'Abd al-Mumin b. al-Hasan b. 'Abd al-Mu'min al-Saghani after 80 days’ work on Djmada 1 i. 20, 640 (Nov. 15, 1242). It exist only in a manuscript in Vienna (see Flügel, *Die arab. pers. und türk. Hefte der . . . Hofbibliothek zu Wien*, i. 469, No. 480).

6. The later Syriac translation. In the tenth or eleventh century a Syriac clerical translated the work from Ibn al-Muqa'alī’s text again into the then already dead language of his church; he endeavoured to give the book a Christian tinge and therefore amplified the verses of the Indian original, already much distorted in the Pahlavi translation, into long and weary moral discourses. He also made a series of mistakes in the translation. But as the text he used was much nearer the original than the most of our manuscripts, this translation is, in spite of its defects, of considerable value for textual criticism; it is edited by W. Wright, *The Book of Kalilah and Dimnah transl. from Arabic into Syriac*, London 1884. In contrast to the naturalism of the original, Keith-Palconer, the English translator of this version (Cambridge 1855) is even more prudish than the latter itself; on text and translation see Noldeke in the *Göttinger Gelehrte Anz.*, 1884, p. 673 sqq., 1895, p. 753 sqq.

7. Persian prose and verse translations. According to Firdawsi in the *Shahnameh* (see de Sacy in *Not. et Extr. X*, i. 140 sqq.), Ibn al-Muqa'alī’s book was translated into Persian under the Salmānī Nasr b. Ahmad (914–943) by order of the vizier Bâlami (q. v.); but it appears that this translation was never completed. By order of the same ruler the poet Râdhi (d. 354 = 966) put the book into Persian verse of which, however, only 16 verses have survived in quotations in *Asâd's English Persian*, ed. HORN, p. 18 sqq.

Ibn al-Muqa'alī’s work was translated into Persian prose probably after the year 599 = 1144 (see Rieu, *Cat. of Pers. MSS. in the Brit. Mus.*, p. 745 sqq.) by Niqān al-Din Abū 'l-Ma'allī Nasr Allāh b. Muḥammad b. 'Abd al-Hamid, who dedicated his work to 'Abd al-Rahūm Shīh of Ghazna (q. v., i. 856). Nasr Allāh in a new preface announces his intention of reproducing the work completely, including the aphorisms which seemed to him particularly valuable, with all the rhetorical adornment of artificial prose; he only gives Burzūz’s introduction in ordinary prose, as an artificial style does not suit its matter. The work was lithographed in Tīrān in 1262 (= 1846); this disproves Chauvin’s doubts, p. 407, 1304 and 1350. Cf. de Sacy in *Not. et Extr. X*, i. 96 sqq.; E. G. Browne, *A History of Persia*, ii. (London 1906), p. 349.

This work was, however, put in the shade completely by the revision of Nasr Allāh’s translation done by Husain Wā’lī Kāshfī (d. 910 = 1504, see KĀSHĪ), the court-preacher of Ḫusain Baṣrārār of Herat (see WĀ’LĪ MIRZA). In honour of Husain’s minister Ahmad Suhaili he called his work *Awâr-i Suhaili*. He professed to be making the rhetorical artificial prose of Nasr Allāh easier to understand by giving it in a new version but in reality he created an even more florid and verbose concoction, “full of absurd exaggerations, recondite words, vain epithets, far fetched comparisons and tasteless bombast and represents to perfection the worst style of those florid writers who flourished under the patronage of the Timurids” (E. G. Browne, *Lit. Hist. of Persia*, ii. 352, op. cit., p. 503 sqq.). But as this style remained predominant in Persia and particularly in India down to the threshold of the modern period, the work had an unparalleled success and was printed in England (first complete edition London 1836), where it was used as a text-book for the examination of English officials in India in Persian and repeatedly printed and lithographed in India and Persia, translated into several Indian dialects, into Pushto, Georgian and all the principal languages of Europe (see Chauvin, p. 26–43). Husain replaced the four prefaces at the vulgate of Ibn al-Muqa'alī by a new introduction from so far unidentified source; de Sacy supposes *Not. et Extr. X*, i. 59 that in it we have the older Ḫādiwān Khārid, a film-Tuṛūshī who was still able to use for his *Strāfī al-Mulūk* (Bālāq 1285), p. 97, 24–24, 185, 25 sqq. The Emperor of China Humāyunfāl is persuaded to give up the idea of abdicating his throne by his vizier, who
tells him how the Indian king Dabghulim was directed by a dream to a cave in which an old man would give him a treasure. Of the latter Dabghulim keeps only the testament of Hög-hang, king of Persia, which contains 14 pieces of advice for rulers, and with these he goes to Ceylon where the Brahman Bidpai or Fripai explains each of these precepts by stories which form the separate chapters of the book.

Dislike of the extravagant and luxurious style of the Anwār-i Suḥaili induced the Emperor Akbar (1556–1605) to commission his vizier Abu 'l-Faḍl to prepare a new edition of the work. This bears the title ʿIWār-i Dānīḵ and was completed in 996 (1582). It retains the arrangement of its model but restores Ibn al-Muṣafra’s preface and Burzoe’s introduction. The work itself is not yet printed but a Hindustāni translation by Hafizuddin, entitled Khirāt Afroz, was published by Th. Roebeck (Calcutta 1815) and by Eastwick (Hertford 1857, London 1867) on account of its elegant diction.

Naṣr Allah’s edition was translated into old Ottoman Turkish (not into Eastern Turki, as Hertel, p. 407 says, relying on a somewhat misleading expression of Ethi’s, op. cit.) by Masrūd for ʿUmbaġ, prince of Aḍida (d. 750 = 1349) (a MS. in the Bodleian, Marsh. 180). This prose text was put into verse by an unknown author who dedicated his work to Sulṭān Murād I (761–792 = 1359–1389); only about half has survived in a Gotha manuscript (see Persich. Verz. der türk. Handschr. d. Herz. Bibl., p. 168, No. 189). A modern Ottoman prose version, which must have been made before 955 (1548), exists in the Bodleian MS. Marsh. 61; cf. H. Ethi, On some hitherto unknown Turkish Versions of Kalīlah and Dimnah in the Actes du 6e Congr. internat. des Orientalistes, 2nd sect., i. 241 sqq.

ʿAli b. Sāliḥ, called ʿAli Wāṣi or ʿAli Celebi, translated the Anwār-i Suḥaili into Ottoman rhymed prose and dedicated his work to Sulṭān Sulaiman I (1512–1520) with the title Humayūn-nāma; it has been several times printed in Buṣra and Stamul (see Chauvin, p. 56). Among the different European translations of the Humayūn-nāma, the best known is the French of Galland, published after his death by Gueulette (Paris 1724) which was translated by Anggrēk into Malay (Batavia 1866) and the latter version inspired a Javanese translation by Kramaprawira, which was put into Javanese verse by an anonymous poet. The luxuriousness of its language, in which the Humayūn-nāma surpassed even its Persian original, induced the Mufti Yahyā Efendi and ʿOthmānāzēde, who died in 1399 (1726) as Kāḏi in Cairo, to prepare extracts from it (see Ethi, op. cit., p. 242).

The Anwār-i Suḥaili was translated, apparently with the assistance of the Humayūn-nāma by Faḍl Allah b. ʿĪsā Tashkendt at the instigation of Muḥammad Mūsā Bai Bāṭānī into modern Eastern Turki prose (to be more accurate into the language of Tashkend and Farghāna as the colophon, or the language of Turkestān and Farghāna as the title states); the latter then had the book lithographed by the calligrapher Mirzā Hāshim Khodžändi, and published at the colophon in 1306 (1888); according to the title, the book was published in 1893.

Ibn al-Muṣafra’s book was translated into the Arabic into Eastern Turki by ʿAbd al-ʿAlīm Fāris Kādān Oglu and printed at Kazan 1889 (University Press, Orient. Bibliographie, iii. 421), in the same year at Wiatshakow (ibid., iv. No. 3935) and in 1892 at Cirkova (ibid., vi. 167, No. 3160). The introduction, however, was, according to a communication from Prof. Hommel, borrowed from the Anwār-i Suḥaili.

9. The Mongol translation. The Mongol translation which Malik ʿIltūgh al-Din Muḥammad b. Aḥī Naṣr, a descendant of Muḥammad Bakri, prepared in Kazan has not survived (see Hāfizullah Mustawfi, Tarikh-i Qishlaq, ed. Browne, Gubb Mem. xiv. p. 844/5; transl. p. 235; Browne, A History of Persian Literature under Tārīkh-Din, p. 92) and correctly stated as early as Hammer-Purgstall in the Forsch. Asiat., 3rd Ser., i. 580. This statement is confused in Hādijī Khālīfa, v. 239, who ascribes a translation into Turkish (İtegat al-Turk) to the ancestor Muḥammad Bakri (see de Sacy, Not. et Extr. X. 1755; Ethi, op. cit., p. 243, who does not take notice of Hammur’s correct statement). As Flugel wrongly translates in lingua Tartarorum, Hertel (p. 414) wrongly identifies this reported Tartar translation with the above mentioned Kazan Turki (so-called Tatar) translation quoted in Chauvin, p. 78, note.

10. The Ethiopic translation. An Ethiopic version, which was certainly based on a text, indigenous to Egypt, of the Arabic of Ibn al-Muṣafra, is also lost; it is mentioned in a work composed in 1582 (see Wright, Cat. of the Ethiop. MSS. in the Brit. Mus., p. 82) (see Noldeke, Gott. Gelehrte A. 1884, p. 676, note 5).

11. The Hebrew and older European translations. At the beginning of the twelfth century a certain Rabbi Ḥaṿaël translated Ibn al-Muṣafra’s work into Hebrew from a valuable manuscript which, however, already contained the false story of Burzoe’s mission and the two not genuine fables at the end of the heron and the duck and of the fox, dove and heron. From the unique manuscript, exceedingly corrupt in the beginning, J. Derenbourg published this translation along with that of Jacob b. Eleazar of the sixteenth century (Deux versions hébraiques du Livre de Kalīlà et Dimnah in the Bibl. de l’École des Hautes Études, fasc. 49, Paris 1881). Jacob’s version while based on a similar text to that of Ḥaṿaël is, however, very free, composed in elegant rhymed prose and full of Biblical locations. The version of the Rabbi Ḥaṿaël was then translated into Latin by the baptised Jew John of Capua for Cardinal Ursinus between 1263 and 1278 with the title Directorium vitae humanæ (cf. Johannes de Capua, Directorium vitae humanæ, publ. and annot. by J. Derenbourg in the Bibl. de l’École des Hautes Études, fasc. 72, Paris 1887; a new edition based on manuscripts which he has recently discovered is to be expected from Hilks). With the exception of an old Spanish version, which reproduces the same text as Rabbi Ḥaṿaël much more faithfully than John of Capua does (see Clifford G. Allen, Lan-
cientia version espagnole de Kalila et Dîguna, texte des mas, de l’Esorvat, précédé d’un avant-propos et suivi d’un glossaire. Thèse, Paris-Macon 1906), all later translations into Western European languages with the exception of quite modern ones are based on the Latin text of John of Capua (see Chauvin, p. 59–72; Hertel, p. 366–400).

12. The Greek translation. Towards the end of the 15th century, Symeon son of Seth translated Ibn al-Muqaffa’s work freely into Greek from a manuscript which was still free from later additions but contained the chapter on the king of the mice and his ministers. He called the book Σφηνιώτης και Βελτιώτης, because he recognised in Kalila the Arabic iblis and in Dimma the Arabic word for “trace”. See Σφηνιώτης και Βελτιώτης. Quattro recensioni della versione greca del Kithàb Kalīlah wa-Dīmna, pubbl. da Vittorio Funtoni, Pubblicazioni della Soc. Asiatic. Ital., ii. (1889). This version was in turn translated into Latin and German as well as into several Slavonic languages.

13. The Persian translation of the Hitopadèsha. The later Sanskrit version of the Pahitāntara, the Hitopadèsha, was translated very freely into Persian, probably in the reign of Akbar, by a certain Mufarrîh al-Kalīlah (see also Sacy, L’électricité des coups, ou traduction persane du livre indien intitulé Hitopadesha par Tadj-Edîn, ms. persan de la Bibl. du Roy, No. 350 in the Nat. et Extr. X, i. 226–264). This work was then translated by the highly esteemed Hindustāni author Ārī Ḥuṣainī in 1217 (1802) into his mother tongue (see also Garey de Tassy, Hist. de la Littér. hindoue ou hindoustante, i. 609 sqq.). A year later the latter was edited by Gilchrist as Ukhiaq Hindse or Indian Ethico, transl. from the Version of the celebrated Hitopades or Satyrials Counsel by Meer Buhodar Uic, under the superintendence of John Gilchrist, Calcutta 1803; see J. Hertel, Die Akhbär-i Hindī und ihre Quellen in the Zeitschr. d. Deutsch. Morgen. Gesellschaft, lxxii. 65–86, lxxiv. 95–117, lxxv. 129–200.

14. The older Malay translation. On a mixture of Ibn al-Muqaffa’s work and a Tamil text of the Pahitāntara is based the Malay version Hikayat Kalila dan Dimna, which was first brought to notice by Werndly in his Malthische Sprachkritik, Amsterdam 1756, and was published in 1876 by Gonggrijp at Leiden (2nd ed. 1882); cf. J. J. Brandes in the Forschungen an Professor M. J. de Groot, Leiden 1891, p. 77 sqq.). This work was next translated into Javanese (Batavia 1878) and Madurese (ibid. 1879).

15. Imitations of Kalila wa-Dimna. Setting aside the tales included in the 1001 Nights, Ibn al-Muqaffa’s work has been three times imitated in Islamic literatures. Ibn al-Habbarîya (see above) followed up his versification with the Kitāb al-Sadhîq wa-l-Bâghîm (see above p. 375 sq.; also printed in Cairo 1294). While this was only an imitation of the beast-fable, Muḥammad b. Abī Naṣr al-Sadâr b. Zâdâr al-Sakîl (d. 565/1170 or 568/1172) in his Sulūk al-Malūk (1273) first composed in 545 (1150) and dedicated in 554 (1159) in a new edition to the Kād of Sicily, Abī ‘Abd Allâh Muḥammad al-Kurâshî, intended to produce a mirror for princes, like the Kalila wa-Dimna; in addition to beast-fables the book also contains historical anecdotes. It was lithographed at Cairo 1278, printed Tunis 1279, Bâârût 1300; translated into Turkish by Kaia Khâlihlâde (d. 1168–1754) and printed Stambul 1285; translated into Italian by M. Amari, Sevcan al-mete oissano Conforti politici di Ibn Zafer, arabo siciliano del XII secolo, Florence 1851, 1852 (Engl. transl. London 1852).

Another mirror for princes in which historic imitations are mingled with beast-fables for the edification of the reader, was composed about the end of the fourth century A.D. by the prince of Tabarištân, Abâ Ṣâhâb al-Murzâbî in the Persian dialect of his land. This work itself has not survived, but in the viii (caliph) and viii (caliph) century it was twice translated into classical Persian. This was first done at the court of the Saljûqs of Asa Minor, Sâlimânshâh (583=600 =1192–1204) by his vizier Muḥammad b. Ghâzi of Malâ y; his work, entitled Rawdat al-Ulûb, exists in two manuscripts in Leiden and Paris. The Murzâbâna of Sa’d al-Din-i Wârâwînî, composed between 607 and 622 (1210–1225), enjoyed greater popularity. It has been edited by Mirrâ Muḥammad (Gîbb Mersî, vol. viii.).

Warâwînî’s version was translated by an unknown author into Ottoman Turkish (a copy of Sâg (1444) in Berlin; see Persch, Ver. der Turk. Hûs., No. 444); this Turkish version was again translated anonymously into Arabic (MS. Berlin, see Aḥlwardt, Ver. No. 8472). A second Arabic translation, which, according to the Gotha MS., (see Persch, Die Arab. Hûs., der Herz. Bibl., No. 2692), is also based on the Turkish, was made by Ibn Ṭeṣâhîh (q. v.); there is another MS. in Paris (de Sâle, Catal., No. 3524) and it was lithographed in Cairo 1278.

The same author then rewrote his work in a somewhat prosaic prose in his Fâṣihat al-Kâfûfâ wa-Muṣârafât al-Sâqaṭûfâ, and added several new stories.

The same recension which had been translated into Ottoman Turkish and which is distinguished from Wârâwînî’s vulgate as well as from Rawdat al-Ulûb by the tenth (concluding) chapter dar bayân-i ziyâdât-i unwar wa-dawlat wa-sin-dâgânî kardan bâ dîst adudsâvan, was translated into Kanâ Turki by an unnamed writer for a certain Sulaimân Bek, son of Muḥammad Bek, and printed at Kanâ in 1684 under the title Kitâb Destûri Sâhi fi hityâyat Fâṣihât. Bibliography: V. Chauvin, Bibliographie des ouvrages arabes ou relatifs aux Arabes etc. i, Kalîlà (Liége–Leipzig 1897); J. Hertel, Das Pahitāntara, seine Geschichte und seine Verbreitung, Leipzig and Berlin 1914.

(C. Brockelmann)

KALIM, a Persian poet of India of the seventeenth century. His full name was Mîrzâ Ātâ Tâhir KALIM of Hamadhân. He lived first in Kâshân, that is he also is given the name Kashânî as well as Hamadhânî. In the beginning of the reign of Dschâhângir (q. v., 1605–1627) he came to India to his court. A considerable journey took him in the following years to the tãrî, from which he returned in 1626 (1619) to India and lived there thenceforth as court-poet of the Mogul emperors. Under Dschâhângir’s successor Shâh Dschâh (1628–1656), whom he celebrated in an epic—the title of which is given in three forms: Shâhân-shâhânâma, Shâhânâma and Pãdîshâhânâma—he was given the title of honour Mîrzâ al-Shâ’ârâ'.
It is a question whether 'Laša is called a kalima from Allāh (Kur. iii. 34, 40) because he is an expression of the kalima of Allāh, or because he was produced by the single creative word kw, and is thus a primary creation like Adam (al-Baidawai, loc. cit.; Lisān, xv. 430 supra). From the doctrine of Allāh’s kalīm it follows that his kalīm must be innumerable (see KALIM). But all contingent existences (al-maṣūmūn) are produced by kalīmūt of Allāh, i.e., the creative commands kw; therefore the Speech of the Reality (al-ḥaqqa) is the self of the identities of the contingent existences, or the contingent existences themselves (nafa d’ya’ in-nuṣkātīt, Dict. of Tech. Terms, p. 1271, infra). The half page which follows the last reference shows how this is the bridge from the Greek doctrine of Allāh’s quality, Speech, to the Neoplatonic Chain and all its descendants.

**Bibliography:** Has been given above. See further on ‘Abd al-Rażīq (i. 61 sqq.); Ma‘ṣūm al-Kamīl (ii. 510 sqq.).

(D. B. Macdonaldi)

AL-KALKASHANDI, nisba from Kalkashandā, near Kalyūb.

I. SHIHĀB AL-DIN ABBĀS AIHMAD B. ‘ALI B. AIHMAD B. ‘ABBĀS ALLAH (in MSS. often briefly called AIHMAD B. ‘ABBĀS ALLAH) B. AIHMAD GHUDDA, died on Djamād I 10, 821 (July 16, 1418), wrote besides a number of smaller works a guide to the artistic composition of essays and reports, especially for the use of Egyptian government officials; just as Ibn Qutaba [10.] in his ‘Uyūn al-Akhbār and the supplements to that work wished to afford the secretary class an encyclopaedic survey of the most important branches of knowledge of his time, al-Kalāshandi’s work, composed after 1091 (1387), entitled Suḥh al-Akib fī ʿinādat al-Ibnū, presents in a much more comprehensive and systematic form practically the whole knowledge of his time and contains information of the utmost value, especially regarding the history and geography of Egypt and Syria. It has been printed as a publication of the Dār al-Kutub al-Khadwiya (al-Sulānīya) (Cairo 1351–8 [1913–9], 14 vols.). Cf. F. Wustenfeld, *Die Geographie und Verwaltung von Ägypten nach dem Arab. des Abu ’l-Abbās al-Calekashandi in dem Abb. d. Kgl. Gesellsch. d. Wiss. zu Göttingen, phil.hist. Cl., XXV (1879); W. v. Tiesenhaus, in the *Zapiski Vost. Otd. Imp. Russ. Arkh. Obš., i. 208; do., Gesch. der Goldenen Horde, i. 395; H. Sauvage, *Extraits de l’average de K. intitulé Lumière de l’aurore pour l’écriture des hommes* (Arab. MS. of the Boulleian Library) in the *Mém. de l’Acad. de Marseille, 1886, 1887; H. Lammens, Correspondances diplomatiques entre les sultans mamelouks d’Égypte et les puissances chrétiennes in the *Revue de l’orient chrétien*, ix. (1904). 151–187, 359–392. A selection from it entitled Dawār Suḥh al-Muṣirr wa-şayān al-Dawār al-Muṣāhir was printed in Cairo 1906. His second great work which he composed in 812 (1420) is a genealogy and history of the Arab tribes before Muhammad with an alphabetical list entitled Nihayat al-Arab fī Mu‘ārifat ḍabāl al-Arab, MSS. in Berlin (Ahlwardt, Verzeich., No. 388/2) and London (Cat. Cod. Mss. Or., in Mus. Brit., No. 347/2); according to Lammens in the *Mém. de la Fac. orient. de Beyrouth*, iv. 150 N. 1, it has been printed in Baghdad n. d.; in this
text the author is called Muḥammad b. ‘Abd Allāh; Ālāmān concludes from this that the authors of the ʿSuḥūk and of the ʿNhīyāta were different individuals; but here either the father is confused with the son (see No. 2) or the printed book contains the work of the son. The alphabetical list was compiled by Abū Fawāʾiṣ Muḥammad Aḥmad al-Suwarṣīdī in 1229 (1814) into a genealogical survey and extended to the Caliphs and Sultāns with the title ʿSuḥūk al-Dhāhāb fī Maʿrījat Ḳābīl ʿal-ʿArab, lith. Baghdād 1280, Bombay 1296. After the year 1242 (1821) al-Kalkhashdī wrote a supplement to it entitled ʿSuḥūk al-Djumān fī l-Turqīʾ bi-Kabīl ʿArab al-Zumān, MSS. in Berlin (Alhwart, Verzeichn., No. 9384) and London (Rieu, Suppl. to the Arabic Ms. in the Brit. Mus., No. 595); a synopsis by al-Suyūṭī in Berlin (Alhwart, Verzeichn., No. 9385).

2. His son Naẓīm al-Dīn Muḥammad imitated his two chief works, the ʿSuḥūk under the title ʿSuḥūk al-Djumān fī Muṣḥafūk Mūkātabāt Aḥī al-Zumān (see Rieu, Suppl. to the Arabic Ms., No. 1020) and the ʿNhīyāta under the title ʿNhīyāt al-ʿArab fī Maʿrījat ʿAnṣāb ʿal-ʿArab, dedicated to the Grand Emir of the Arabs of the East and of the West Zain al-Din Abu l-Dīdār Bākī r. Raṣḥīd al-Zayn; the autograph of the year 954 (1548) in the Bibl. Nat. of Paris (see de Slane, Cat., No. 2049), another MS. in Cairo, Ḳhed. Bibl. (Fihār., v. 179; author Muḥammad b. ‘Abd Allāh, see Vollers, Zeitschr. d. öst. Gesellsch., xii. 115; on the Baghdād printed text see above).

3. Abu l-Fath Ibrāhīm b. Ālī b. I Ḍābī Mlā zb-Ṭūrān (Ṭūrān) al-Dīn, d. 922 (1516), Tradītīṣī, whose works are detailed in Brockelmann, Gesch. d. ar. Lit., i. 78.

Bibliography: Wustenfeld, Geschichtsrecherchen, No. 467; Brockelmann, op. cit., ii. 134. (C. Brockelmann)

KALMUCKS, the Turkish name for a Mongol people who call themselves Orbat. In Radloff's Worterbuch (ii. 272), the forms Kalmak (Central Asian dialects), Kalmak (Volga dialects; whence the Russian word) and Kalmuk (Ottoman; whence the Crimean Tatar expression kalmyck i bad-makhkīz) are given. In Central Asia the Turkish-speaking Teutons are called "White Kalmucks" (Aḳ Kalmak) and the Western Mongols proper "Black Kalmucks" (Kara Kalmak). The word is derived (probably only by a popular etymology) from the verb kalmyck "to remain"; it is said to denote the Orbat, who "remained" pagans, in contrast to the Dungans (the Chinese-speaking Muhammadans), who "returned" (verb donmek) (according to the well known Muslim idea) to Islam.

The word Kalmak seems first to occur in the Mebaddina (not included in the printed edition) to the Ẓafar-Nāma of Sharaf al-Din Yazīdī, not, it seems, as an ethnographical term but as a geographical one. It is said that after the expulsion of the Mongol dynasty from China only their "original territory" (yarīʾ āsīḥ), i.e. Karakorum and Kalmak remained in their possession; the "Emirs of the Orbat" later deprived them of this also.

From the time of Wais Khān (1418–28) the Mongols on the Ili [q.v.] had to fight against the "infidel Kalmak"; accounts of these wars are found, notably in the Tūrīkh-i Rağīdī (ed. Ney Elia, see Index). Wais Khān was twice taken prisoner by the Kalmak and had to give his sister in marriage to the chief of the Kalkaš Island Tāshī (properly Esen Tāshī). Tughlōn, father of the latter, was then ruling in Mongolia on the Chinese frontier, where he was succeeded in 1439 by Esen Tāshī. After the death of Esen Tāshī (1455) the great nomad khan of the Oirat broke up; individual princes are mentioned from time to time later, as ruling in the neighbourhood of Muslim lands; in the beginning of 864 (end of 1459) a Kalmak embassy appeared in Herāt. According to Chinese sources, the Oirat in 1552 had to submit to Altan Khān, prince of the Tumet. The name Kalmak seems to have been extended by the Muslims to this kingdom. According to the Ottoman Saifī (wrote 900 = 1572), the prince of the Kalgāt bore the title Āltum Khān (Turk. Atūm = Mongol Altūm); cf. the text in the Leiden MS. No. 917 and the translation by Ch. Schefner in Abdoul Kerim Bouchkary, Histoire de l'Asie Centrale, transl. p. 292 sq. The Muḥammadan sources also report the restoration of the Orbat kingdom under Khara Khula (d. 1634). In Turkestan the Kalmaks, during the 16th century, were regarded as powerful foes to Islam. The prince of the Kazak (Kirgiz), Tawakkul Khān, had to fly before them to Taškent, where he was received by Nawārīz Aḥmad Khān or Barāk Khān (d. 1556); but Nawārīz Aḥmad is said to have replied to his guest's appeal for help that ten such princes as they two could do nothing against the Kalmak. At a later date on the other hand we find Tawakkul described in Russia as "Czar of the Kazak and of the Kalmucks" on the occasion of his embassy to the Czar Feodor (1594), perhaps because a few bodies of Kalmucks had attached themselves to him; according to the Aḥdāt-Ābān (MS. of the Asiatic Museum, No. 169, l. 351) there were also Kalmucks (Kalkaš) in Taškent in the army of Rāhī Khān (a son of Nawārīz Aḥmad) about 1582. In the winter of 1603–4 took place the first raid of the Kalmucks into Khūvārīm (Abū l-Ġhāzī, ed. Desmazois, text p. 275). Soon afterwards, under the Czar WASSILJ Šuiskij (1606–1610), the Kalmucks for the first time entered into relations with the Russian government, although it was not till 1632 that Kalmucks settled on the Volga on a large scale. This branch of the Kalmucks had separated from their kinsmen, under the leadership of Kh Khuluk, as early as 1618. The land of the Volga Kalmucks therefore did not belong to the empire founded by Khara Khula, although the relations between the two branches of the people had not yet been broken. Representatives of the Volga Kalmucks still appeared at the kurultai (parliament) in 1640; Barūr, the son and successor of Khara Khula, gave his daughter in marriage to the grandson of Kh Khuluk. By the same kurultai the predominance of Buddhism was firmly established among all branches of the Kalmucks. The progress made by Islam described in the Tūrīkh-e Rağīdī (p. 91) in connection with the above mentioned marriage contract apparently was not maintained. Most of the Muslim territories of Turkestan were under the suzerainty of the Buddhist Kalmuck prince on the Ili, the founder of the last great nomad empire in Central Asia, until the destruction of this empire by the Chinese in 1758 (subjected to Kāshghāria in 1682, conquest of Taškend in 1723); as late as 1749 the regent (Alaqī) of
Bukharin and his opponent had to submit a dispute to the verdict of an embassy of the Kalmuck prince (Turk-i-Kalmak) (Muhammad Wafad Karminaghi, MS. of the Asiat. Mus., c. 581b, f. 101b sqq.). A great part of the pasture grounds of the Kazaq was at once occupied by the Kalmucks. Islam was then accepted by the chief of the southern part of the modern Semirjejev. From this period date several Buddhist monuments, including Tibetan inscriptions. It was only after the decline of the Kalmuck empire that these areas were again occupied by the Muhammadan Kazaq. The wars of the Volga Kalmucks with the Crimean Tatars and their raids into Khwaziriam had less effect on Islam; from 1724 the Kalmuck chiefs on the lower course of the Volga were simply considered governors (namjastnik) of the Czar of Russia. No connection existed then with the ruler of the Il. The decision of the "governor" Ubashi and a great part of his people to migrate from Russia and settle on Chinese territory proved disastrous for the Kalmucks. During this migration heavy losses were inflicted on the Kalmucks in Central Asia, especially by the Kazaks (1771). Henceforth the Kalmucks were of no political significance either in Russia or in China. During the Muhammadan rising in the Il valley the great Kalmuck temple of Buddha near Kulja was destroyed (Radloff, Ans Sibirien, ii. 403). After the Russian revolution an "autonomous Kalmuck territory" (autonomnaya kalmuckskaia oblast) arose in what was formerly the government of Astrachan, between 45° and 48° N. Lat. and 44°-45° E. Long. A proportion of the Kalmucks in Semirjev (less than 2000 souls) which has adopted Islam and taken to agriculture is called Sart-Kalmak.

Pafmov, Oelekistor kalmuckskego naroda za vremya jeho preobrazhania v predelach Rossi, Astrachan 1922; Oiratskeje lenjesija, founded in 1922. (W. Barthold)

Kalpak (r.), A Central Asian headdress, which was introduced by the Turks into Europe and became a favorite throughout the world. The word kalpak is found in the most diverse Turkish dialects in meanings which are detailed by W. Radloff in his Versuch eines Worterbuches der Turk岱alen, ii. 268 sq. (cf. also kalaba, ii. 234). The Eastern Turkish telpas, Djag. East Turk. telpak, Kurg. and Karakirg. telpak, meaning cap, felt cap (cf. also the French kalpak) is certainly related. Cf. thereon Pavet de Courteille, Dict. turk-oriental, p. 408). In its original form the kalpak is a cone-shaped sheepskin cap, flattened on top, covering the head down to the eyes and ears, for the manufacture of which skins of darker colour, in people of rank particularly a black astrachan, were used and then trimmed with softer fur of a brighter colour. Such caps have been worn among almost all Tatar tribes from ancient times to the present day. In earlier times, as G. Rosen suggests, they were a part of the national costume also among the Ottomans. Nevertheless, neither this headdress nor the word kalpak can be proved to have existed before the middle of the xvith century. The kalpak must, very soon after this, under the arabicizing influence of Islam, have been driven out by the turban in its countless forms (cf. 286 styles in Michael Thalman, Flensburs liberarium or, miss. Vienna 1702, vi. 29 sq. on Codex Turc. VII, Bologna). But the kalpak remained as the distinguishing headgear of prominent Christian subjects of the Sublime Porte, with, it is true, considerable alterations in its original appearance. In place of the fur a thick black felt was used and the shape became swollen almost like a melon. Of these headdresses three kinds were especially known, called after professions which particularly wore them, viz. the kalpak of the physicians, of the money-changers and of the interpreters (belum, saraf and terzumun kalpak). As late as the beginning of the xixth century the embassy interpreters, who were not Turkish subjects, had to wear the kalpak, when they went on business to the Porte. In the house the kalpak, which, on account of its weight, was too hot and uncomfortable for indoor wear, was placed on a stand elaborately carved, often painted and adorned with gilding, the kalpaklik, a piece of furniture, which was considered the sign of a distinguished and prosperous Christian household. When, with the coming of the fez, the kalpak threatened to go entirely out of use among the Christian population also, an edict (furmam) of the grand vizier 'Izzet Mehemmed Pasha ordered in 1842 that all non-Turkish subjects should wear the kalpak instead of the fez. But this order was not long enforced. At the present day the kalpak is still made and worn only by Armenians. The fine lambskins stretched over pine-board shapes were at one time imported from Urfa in Russian Tartary, and also from Khiva and Bokhara, and manufactured and sold on the so-called Kalpak-djilas, or Carshusam in Stambou. Among the peoples who adopted the name kalpak for their corresponding headdress, special mention may be made of the Slav tribes of the Balkans (cf. Slav klobuk; Greek kapaški). Down to 1763 the kalpak was also the headdress of the Hungarian Hussars. The high felt cap made of the finest arctic furs and adorned with valuable jewelled clasps, which is still worn as part of the state-dress of Hungarian magnates and Hungarian hussars, is also called kalpak (Magyar kalpak, cf. also kalap = hat). The Hungarians may have adopted the headdress from the Ottomans in the beginning of the xvith century. Cf. also J. Szenredi, A magyar viselt torteneti fejlődése, Budapest 1905, s.v. Among the Hussars of the German army, where the kalpak was worn since the time of Frederick the Great, kalpak means the cloth tab above in the beraskin, the colour of which served to mark the regiment. Under the First Empire in France the kalpak (colback) was introduced into the French army as the headdress of certain arms; under the Second Empire the mounted chasseurs wore a cap called kalpak.

Fr. Baranger) 

Kalyub, a fair sized town in Lower Egypt with a railway station, 10 miles north of the central station at Cairo on the Cairo-
Alexandria railway. The town proper lies about a mile west of the station and about 3 miles from the right bank of the Nile, on the Tut'at al-Sarādiyya. Down to the middle of last century Kalub b was the capital of the Muriyya al-Kalubāyya. Under the Khedive Ismā‘īl the Diwan of the Muriyya was removed to Benha. Evidence that date Kalub b has been a marbāt (district-capital). Branch lines run to Zākāriyy and the Barrage du Nil. The majority of the inhabitants are Muslims. According to ‘Alī Pasha Mubārāk, Kalub b possesses a Sharī‘a court (nasīkhama Sharī‘a) and a hospital. Cf. ‘Alī Pasha Mubārāk, al-Khīfet al-dhajadha, xiv. 114 sqq.; Baederker, Egypt? (1914), p. 34; Sāmilbey, Kānīs al-A‘lam, Stambl 1314 (1896), v. 569b, where (line 2–3) we should read ‘alānībīdīn for ‘alānībīdīn.

A Greek Kālōvē — not yet, however, found — is at the base of the name. In the Sātra it is found under the form Kalovēs (Maspero-Wiet, Matières pour servir à la géogr. de l’Egypte, Series i. 151).

Historical: John of Nikias mentions Kalub b in his Chronicles, Chap. 113 (ed. Zöpner, p. 321, 509). ‘Amr b. al-‘Āṣ (q. v.) had a bridge thrown over the canal at this town to be able to conquer the other towns of the province of Miṣr (circa 20 = 641). In 549 = 1154/5 the Caliph al-Ẓahīr granted Kalub b as a fief to his great favourite Nāṣr b. ‘Abdallāh; the inhabitants so deprecated this present in the eyes of Nāṣr and his father that it became one cause of the murder of the Caliph by Nāṣr and his father ‘Abdallāh (Ibn al-‘Āthir, al-Kāmil, ed. Tornberg, xi. 126; Sūmā b. Munṣīḥ, ed. Dernbourn, i. 245; Ibn Muyassar, ed. Massé, p. 93). In the fighting between Selm b and Tumān-Bey, Kalub b did not escape the raids of the Arabs (Ibn Iyās, Ta‘āikh Mīṣr, under Sāfār 923 = February 10, 1517). For embassies etc., Kalub b was the last stage before Cairo. Thus, for example, in the Rabi‘ I 925 (= March 1519) (‘Alī Pasha Mubārāk wrongly gives I. 25, 923 for R. I. 23, 925), Khaṭ‘ir Bey had the Sūnūn’s envoy received there with the greatest ceremony by the Kālī Barakat b. Mūsā (Ibn Iyās, op. cit., iii. 109). The town had again suffered excessively from the extortions and plundering of the half-savage soldiers and Mamluks in the years 1219 and 1220 (1804 and 1805); cf. al-Djabarti, ‘Abī ‘Abīd al-Aḥṣā‘ī, under the years quoted. Kalub b, as a result of its situation close to the gates of Cairo, may not have escaped on other occasions the effects of the political happenings in the capital. Ibn Ḥukmā (809 = 1400) and al-Ẓahīrī (839 = 1434/5) report, that in their day Kalub b was for the most part lying in ruins.

Economic: Almost all sources praise the wealth of Kalub b in gardens and trees, among which the acacias (antar) are mentioned as particularly valuable. In spite of the restrictive edicts of al-Malik al-Kāmil, the ground was very badly farmed, so that Kalub b’s prosperity suffered considerably (cf. ‘Othman b. Ibrāhim al-Nabulīsī — wrote 537–643 = 1249–1249; Brockelmann, Gesch. d. arab. sta., i. 355 — who devotes a longish section to Kalub b in his Luma‘ al-Kawānīn al-Mu‘tahā fi Daw‘ānīta al-Dījar bi-al-Marjīyya; quoted in ‘Alī Pasha Mubārāk, op. cit. i. 144 sqq.). In 1240 (1824/25) Muhammad ‘Ali built a cotton mill in Kalub b and later barracks and a remount depot were established there. The al-Shawārīb family deserves special mention for its share in the economic development of Kālūb, where they also built a sanā‘ with a mosque.

There are six mosques in Kālūb, in one of which the Friday service is held. Among these the ‘greatest Mosque’, formerly called Qubba al-Shawārīb, built by the Al-Mu‘tahā, had the most important influence on Ibn Ḥujair (578 = 1182/3) in Egypt; cf. Brockelmann, op. cit., i. 478: ‘Alī Pasha Mubārāk, op. cit., p. 114). According to the inscriptions on its minbar and above the door it was renovated in 1148 = 1735/6 by the Shāhīd al-‘Arab of Kālūb, Abīnād al-Shawārīb. Among the tombs of saints the most important is that of Sādir ‘Awaṭī with popular amusements and horse-racing. ‘Alī Pasha Mubārāk gives a very full account of the above mentioned al-Shawārīb family as one of the most prominent in the town. Al-Malik al-Zahir Barqu, gave them charge of the new bridge over the barh Abūl Maqādīja (cf. also al-Kalākshandī, trans. Wustenfeld, p. 28) and granted them large estates as fieles and an annual pension (which lasted till 1275 = 1859/60). Muṣṭafā Pasha granted them the supervision of the whole province of al-Kalūbāyya. Various members of the family also filled important posts in the administration, besides the office of Shāhīd al-‘Arab of Kālūb, which seems to have been hereditary with them. Sulaimān al-Shawārīb’s patriotism cost him his life: in Kālūb 1213 (Dec. 1798) he was beheaded by the French for his part in an attempted rising (cf. al-Djabarti, op. cit., iv. 37 sqq.).

According to Ibn Ujīsīn (cf. ‘Abī al-Latif, al-Jaffā wa l-‘Utarīth etc., French transl. by de Sacy entitled Relation de l’Égypte etc., p. 595) the province of al-Kalūbāyya comprised in its time (777 = 1375/6) 59 townships and yielded a revenue of 419,054 dinars (but on p. 599 a list of 61 townships is given). Ibn Ḥukmā gives 60 with a total revenue of 383,140 dinars. In the time of the French expedition the revenues of the province from the estates (Deser. de l’Égypte, i. 306 sqq.) amounted to 1. for the payment of the mina, 3,390,742 dinars, 2. for the buskhīyya, 1,710,462 dinars, 3. for the fals, 115,199,199 dinars.

The Bahār al-Sarādiyya — according to legend built by Pharaoh and enlarged by his vizier Hāmān (Ibn Dujmāk, al-Kalākshandī) — was, according to the enthusiastic description in Ibn Dujmāk (whom al-Kalākshandī follows), a large canal, apparently with water always in it. This is indicated also by two documents of the years 891 (1486) and 1061 (1650/1) (quoted by ‘Alī Pasha Mubārāk) in the possession of the al-Shawārīb family. Al-Kalākshandī notes that the canal in his time had disappeared and that its place had been taken by the Abu l-Manādijda canal, (cf. Wustenfeld, op. cit., p. 25 sq.) Maspero-Wiet, op. cit., p. 105). According to ‘Alī Pasha Mubārāk, there was only a small canal in his time: the Tut‘at al-Sarādiyya. Ibn Khallīkān, Bātrūs al-Bustānī and ‘Alī Pasha Mubārāk give several scholars, who have the nisba al-Kalubī. The best known of them is Shihāb al-Dīn al-Kalubī (see the following article).

Bibliography: Besides the works quoted above: Ibn Muyassar, Abīrāb Mīṣr, ed. H. Massé (Cairo 1919), p. 23, 60, 93; Abī ‘Abbās,
Kamal al-Din Abu l-Kasim Omar b. Ahmad b. Ali Farah Pasha arab author, pupil of the celebrated Shahb al-fikih Shams al-Din al-Shams al-Razi (d. 1004 = 1596), was regarded in his day as an unchallenged authority and died towards the end of Shawwal 1069 (July 1659). He composed numerous works, of which 21 have survived, in the fields of Shi'a, geography, medicine, secret sciences, etc. He is mentioned by Brockelmann, op. cit., we have to add 1. a Kitab al-Mujadda b al-Rab in the Zafir al-Emam, and 2. a Kitab al-Mujadda in the Zafir, and 3. a Kitab al-Mujadda in the Zafir, and 4. a Kitab al-Mujadda in the Zafir, and 5. a Kitab al-Mujadda in the Zafir, and 6. a Kitab al-Mujadda in the Zafir, and 7. a Kitab al-Mujadda in the Zafir, and 8. a Kitab al-Mujadda in the Zafir, and 9. a Kitab al-Mujadda in the Zafir, and 10. a Kitab al-Mujadda in the Zafir, and 11. a Kitab al-Mujadda in the Zafir, and 12. a Kitab al-Mujadda in the Zafir, and 13. a Kitab al-Mujadda in the Zafir, and 14. a Kitab al-Mujadda in the Zafir, and 15. a Kitab al-Mujadda in the Zafir, and 16. a Kitab al-Mujadda in the Zafir, and 17. a Kitab al-Mujadda in the Zafir, and 18. a Kitab al-Mujadda in the Zafir, and 19. a Kitab al-Mujadda in the Zafir, and 20. a Kitab al-Mujadda in the Zafir, and 21. a Kitab al-Mujadda in the Zafir.
Abu 'l-Ḥasan 'Alī b. Muḥammad b. Ḥāfiz al-
Nāṣiriyā, d. 843 (1439) entitled al-Durr al-Mun-
takhab fi Ṭurğh Ḥalāb; the work contains a
description of the city of Aleppo followed by
biographies of distinguished natives (since 658); His-
rovite details the MSS. in the Mitt. St. Or. Öst., x.
60 no. 2, by Muḥibb al-Dīn Abu 'l-Fadil Mu-
ḥammad b. al-Shīna al-Ḥalabi, d. 890 (1485),
etitled Nuzhat al-Nawżār fi Rawd al-Manażirs,
MSS. in Berlin (Ahlwardt, Ver., Nö. 9791); vol. i.
in London (Cat. Codd. Or. in Mus. Brit., Nö. 436,
2); vol. ii. in Götha (Pertsch, Ver., Nö. 1772); 
vol. iii. in Paris (de Slane, Cat., Nö. 2139). From
this one of the descendants of Ibn al-Shīna be-
tween 1014 and 1024 composed a synapsis with
occasional notes down to his own time; MSS.
of this synapsis is given by Pertsch, Ver. d. arab.
Hafs. zu Götha, Nö. 1724 and further in Cat.
Codd. Arab. Bibliogr. Datt., ii. 85, Nö. 60, see.
This synapsis was published as al-Durr al-Mun-
takhab fi Ṭurğh Manlakat Ḥalāb by Joseph
Elias Sarkis, Bâirût 1909. Extracts from it were
Akad., phil.-hist. Kl., IV (1850), i. 125 sqq.

Of the history of his family al-Akbār al-
Mustafād u dīkhār Bānī Alī Ḏarūāl, which he
composed for Yāḳūt, the latter gives extracts in
his Īrābd, vi. 18—35. Of his verses an elegy
on the fall of Aleppo, of which Abu 'l-Fīda', op.
cit., gives specimens, is the most famous. In 610
(1213) he handed al-Malik al-Zāhir a congratu-
lar letter on the birthday of his son Malik al-
'Azīz, entitled al-Durārī fi dīkhār al-Dhārārī,
which is printed from the MS. Nūrī 'Othmānīyī,
Nö. 3790 in the Madīnāt, Stambul 1298, as
Nö. 2. Last he wrote under the title al-Wustā ila
'Alībī fi Wast al-Taqībīt wa ltīs a guide to
make all sorts of perfumes; MS. in Berlin (Ahl-
wardt, Ver., Nö. 5463), in the Brit. Mus. (Elli
acquired ... since 1904, London 1912, p. 56, 62,
Or. 6388, and in Bankipore (Cat. of the Arab.
and Pers. Mss. in the Orient. Publ. Lbr., iv. 146,
Nö. 96). Specimens of his handwriting — he was
one of the most famous calligraphers, according
to Yāḳūt — are in St. Petersburg (see Cat.
des Mss. et Xylographes orient. de la Bibl. Imp.,
Nö. 147).

KAMĀL AL-DĪN AL-FĀRSĪ. Muḥammad b. a-
Hasan, Abu 'l-Ḥasan died about 1320. He was a
scholar equal in calibre to Ibn al-
Ḥaitham [q. v.] and, indeed, perhaps surpassed
him in originality. Kuẓb al-Dīn al-Shīrāzī had
called his attention to the latter's Optics, which
he procured and wrote an excellent commentary
upon. He added a series of brilliant treatises to it.
These deal more particularly with the refractions
and reflections of a sphere, the rainbow, the halo,
camera obscura, etc. As to the latter it should be
noted that the first scholar whom we know to have
used the camera obscura was Ibn al-Ḥaitham. On
the wall opposite the orifice, he showed the image
of the sun during an eclipse of the sun and ex-
plained the phenomenon. That he did not succeed
in obtaining a representation of the crescent moon
is due, not to some error in his assumptions, but
to the fact that its tips are too faint. Kamāl al-
Dīn gave a more perfect theory and tested it by
brilliant experiments. He first made the orifice
very small and placed opposite it a surface half
red and half green. He then showed how one
got the sharper image the smaller the opening
and that the images were independent of the
shape of the orifice. The larger the opening the
less these principles applied. It was to be noted
that the images were reversed. With this appara-
tus Kamāl al-Dīn also observed on the wall the
clouds and their movements as well as a red
flying past. The movements in the image are
in the contrary direction to real life. At a later

The figure, taken from a
manuscript, shows the path of the rays,
which start from b and undergo a
second reflection in the interior of
the sphere. They produce the
secondary rainbow. The primary bow
would be the result of the first
reflection. Goethe and
Boisserée at a
later date observed the
secondary rainbow.

period Levi ben Gerson (Levi de Balneacis, d.
1344) used the camera obscura in eclipses of the
moon also.

DJANDĪ.]

KAMĀL PASHAZĀDE. [See KAMĀL PASH-
ZĀDE.]
AL-KAMAR, the moon, the satellite of the earth, considered in quite early times the principal heavenly body next to the sun, whose path lay on the sphere next to the earth (faslak al-kamar). Pythagoras was the first to recognise it as a dark body illuminated by the sun, from whose twelve position with regard to the sun its changes in illumination or phases were seen to result: the recurrence of the sidereal, when the sun and moon have again reached the same positions with regard to the earth, led to the conception of the synodic month (29½ days). The Muhammadans calculate time by lunar years, each of twelve months. These are alternately "full" of 30 days and "empty" of 29 days. This gives a year of 354 days. The Iranian astronomer al-Biruni [q.v.] in his Al-kūnān al-Ma‘ūdī (Makāla iii. Ch. 7) makes the interesting suggestion that the number 360 may have been introduced for the division of the circuit, because it is midway between the solar and lunar years.

The synodic month, to be quite accurate, is 29.5306 days, which means that the month as reckoned by the Muslims is 0.506 and the lunar year 357 days too short, a number which in 30 years amounts to 11.02 days, in the Muhammadan calendar an intercalary period of 30 years is in use. It is called al-majdūmā and the intercalary year itself al-sana al-kabisa. Within an intercalary period there are 11 intercalary years.

The Muhammadan year begins (or rather should begin) with the sunset after which the crescent moon is seen for the first time (first day of Muharram). The beginning of this era was dated on the first Muharram of the year in which the Prophet migrated to Medina from Mecca (July 15, 622 of the Christian era = al-Hijra).

The first appearance of the crescent moon (ru‘yat al-khīlā) (cf. Zīgī of Habash al-Hasib, Berlin MS., Ahlwardt, Verz., No. 5750, f. 151) on the night of Sha‘bān 29 is of special importance as the fast of Ramaḍān begins with this moment. It is necessary to be able to calculate this moment when the weather prevents the observation of the first appearance of the crescent moon. This is one of the most difficult tasks of Arab astronomy. H. Suter has illustrated this from the example: "to find whether on the night of Sha‘bān 29 of the year 540 A.H. the moon is visible" (cf. Die astronomischen Tafeln des Muh. b. Musā al-Khwārizmi, Copenhagen 1914, p. 67 sqq.) and C. A. Nallino gives a formula for ascertaining the smallest phases of the moon (cf. al-Battānī ine Alhazenii Opus Astronomicum, Milan 1903, i. 269).

Even in the earliest lunar theory, as stated by Hipparchus and Ptolemy, the complicated and irregular movement of the moon during a month is apparent: it is in reality due to the double attraction of both the sun and the earth to which the moon is subjected (the three body problem of modern astronomers). The determination of the longitude of the moon in its orbit is the main problem of lunar theory and, in order to solve it in some degree, Ptolemy was forced to substitute for the eccentric circle of the moon's orbit an auxiliary circle, the so-called epicycle, which the moon would traverse regularly in an anomalistic month (27 days, 13 hours, 18 minutes), while at the same time the centre of this epicycle moved uniformly round the earth on a second called the deferent circle in a nodical month (27 days, 5 hours, 5 minutes). In addition the plane of oscillation was, according to Ptolemy, inclined to the plane of the earth's motion (ecliptic) at 5° (to be more accurate 5° 9'), while he made the line of intersection of the paths of the earth and moon (nodalline) execute a retrograde movement and put the centre of the oscillation about 103° nearer the apogee (distance from the earth).

The true longitude of the moon therefore consists of the four so-called great variables, equation of centre, equation, variation and annual equation. The first denotes the transition from circle to ellipse, the second the displacement of the centre of the deferent just mentioned, while the fourth was laid down by the astronomer Kepler. As to the variation, it is given by the following expression:

\[ -2' = \sin (1-\lambda) + 39.5' \sin (1-\lambda) \]

in which 1 and \( \lambda \) are the mean longitudes of sun and moon. From this formula we find that the variation in the syzygies (1-\( \lambda \approx 0^\circ \)) and in the quadratures (1-\( \lambda \approx 90^\circ \)) i.e. 2 (1-\( \lambda \approx 180^\circ \), quite disappears or is very small, but on the other hand is very marked in the octants. Ptolemy, in order to reconcile smaller differences between theory and observation, actually introduced a kind of variation of the line of apseides, the θερμονομος. After Tycho Brahe had long been regarded as the real discoverer of the variation, the orientalist and astronomer L. Am. Sédililot in his article Sur un manuscrit arabe dans lequel la variation de la lune est signalée (Compt. Rend., 1856) asserted that it was evident from the Almagest of the mathematician and astronomer Abu l-Wāfā' al-Buzjānī (325–385 = 940–998) that he was really the discoverer of the variation to which he gave the name θήτης των μηχανών. A long dispute arose on the accuracy of Sédililot's interpretation of the text, which ran through many years of the Comptes Rendus; Sédililot, Mathieu, Chasles etc. formed the one party, Biot, Binet, Bertrand etc. the other, who held the contrary view that Abu l-Wāfā' had discovered nothing new but only substituted his θήτης των μηχανών for Ptolemy's prosneusis. In the end Carra de Vaux has been able to prove definitely the erroneousness of Sédililot's argument by a thorough analysis of the Arabic text in question and the citation of other Arabic and also Persian and Hebrew sources.

The Arab astronomers adopted the lunar theory of Ptolemy and developed it. They also calculated several numerical values on which the study of the θήτης των μηχανών accessible to us, e.g. those of al-Khwārizmi, al-Farghani, al-Battānī and al-Dschahmini gives the information we require.

In determining the parallax of the moon (θήτης μανσαρ αλ-kamar) and ascertaining its distance from the earth, the Arabs did not go beyond Ptolemy. Al-Bīrūnī in chap. 8 of mašūla ii. of his Kūnān al-Ma‘ūdī makes an interesting observation on the shadow thrown by a gnomon (mikyū) in moonlight. As the size of the radius of the moon in relation to the distance of the earth from the moon is not infinitely small (as in the case of the sun), the staff at the same apparent altitude of the moon and of the sun throws longer shadows in the case of the moon. Al-Bīrūnī calculates the difference between the two shadows for an altitude of 45°.

The Arab astronomers devoted special attention to the exact calculation of the frequency of eclipses (kānaf al-kamar), as they made use of it to

The Encyclopaedia of Islam, II.
ascertain the difference in longitude in two places on the earth. They worked out tables (based on Ptolemy) which gave the times of the beginning and ends of the eclipse for various parts of the earth as well as the area of the moon's disc covered. But it is impossible to calculate these with great accuracy from observation only. The difficulties (according to al-Birâdî) lie in ascertaining the point where the eclipse begins on the edge of the moon, in the inexactness of the shadow, the lack of agreement between the astronomical instruments of the two observers, etc. The result was that the calculations of longitude from eclipses of the moon were often very inaccurate. It is true that in al-Khwârizmi's astronomical tables (H. Suter, op. cit., p. 55) there is an example in which the period of commencement of the eclipse agrees perfectly with the previous calculation of it, but not every calculation was so accurate. The Pâfimid astronomer Ibn Yânus (d. 399 = 1009 in Cairo), who goes so far as to distinguish five phases in the course of an eclipse, gives in his al-Zâdî al-Kabîr al-Hasîmî the cases where the difference between calculation and observation amounted to as much as 23 minutes (cf. Caussin, Le Livre de la Grande Table Hakemîe observée par..., about-hasan Ali, etc. as a part of the work of the Great Astronomer, ibid., ii. 279, note 1, do., Verspreide Geschriften (Bonn and Leipzig 1929), iii. 27, 32).

Several studies on the moon, none of which are yet preserved, have been preserved to us from the pen of the exceedingly prolific Arab mathematician, physicist and astronomer Ibn al-Hâjîm (d. 430 = 1039). We may mention: 1) the great Mâkhîla fi Qawâlî al-Kamar (India Office Catalogue, No. 734, ix.) and 2) Mâkhîla fi Ikhtilât manfar al-Kamar (ibid., No. 734, x.) dealing only with a special case of parallax ("when the altitude of the moon is less than 30° and is western, its latitude lies south of the ecliptic and the head of the constellation of Cancer is under the western horizon so that it does not reach the meridian from below, the latitude of Melina being taken at 30° or near this figure, the parallax of the moon is in longitude the opposite of the order of the signs of the zodiac..."); 2) fi Mâkhîla al-Kamar al-Mukaddas (Ministerial Libraries of Alexandria ("If one carefully observes and examines these marks on the superficies, one finds them always the same in shape and never changing, either in configuration or in position or magnitude or as regards their dark character").

KAMARÂN, an islet in the Red Sea, on the coast of Tihâma, opposite Zabid. The fortified town of Kamarân has always belonged to whoever possessed Tihâma; it contained prisons of the King of Yemen, in al-Makdisi's times, and a spring of sweet water called al-Akd. Taxes and customs duties were collected there.

The juist Muhammed Ibn 'Abduya, a disciple of Abû Isâki al-Hashī, author of works on al-ajb, lived in Kamarân and is buried there. When there is a storm and ships are in danger, the natives throw dust from his grave into the sea, which is then supposed to subside.

In modern times Kamarân has become one of the quarantine-stations for pilgrims; cf. on this subject Snouck Hurgronje, Mecca, ii. 299, note 1, do., Verspreide Geschriften (Bonn and Leipzig 1929), iii. 27, 32.

Bibliography: al-Mu'addads (ed. de Goeje), B. G. A., iii. 2 103; Yâkîn, Mu'ajâm (ed. Wüstenfeld), iii. 80. (V. Vacca)

KÂMIL, the fifth metre in the system of Arab prosody, is regularly composed of three mutâṣ'ulân in each hemistich: it has three 'arâf and nine qasîb.

\[
\begin{align*}
\text{mutâṣ'ulân} & = \text{mutâṣ'ulân} \\
\text{mutâṣ'ulân} & = \text{mutâṣ'ulân} \\
\text{mutâṣ'ulân} & = \text{mutâṣ'ulân} \\
\text{mutâf} & = \text{mutâf} \\
\text{mutâf} & = \text{mutâf} \\
\text{mutâf} & = \text{mutâf} \\
\text{mutâṣ'ulân} & = \text{mutâṣ'ulân} \\
\text{mutâṣ'ulân} & = \text{mutâṣ'ulân} \\
\text{mutâṣ'ulân} & = \text{mutâṣ'ulân} \\
\end{align*}
\]

In all the feet except mutâṣ'ulân and mutâf, one may suppress either the second vowel of the foot (mutâsi'ulân), or the second consonant with its vowel (mutâṣ'ulân), or the second consonant and the prolongation of the third consonant (mutâṣ'ulân) which is exceedingly rare.

As a result of these suppressions the regular foot, mutâṣ'ulân, may become mutâṣ'ulân (= mutâṣ'ulân), mutâṣ'ulân (= mutâṣ'ulân), mutâṣ'ulân (= mutâṣ'ulân); if this is done so that a piece does not contain a single whole foot in mutâṣ'ulân, it then belongs to the rajîqa metre.

(Moh. Ben Chenes)

AL-MALIK AL-KÂMIL. [See AL-MALIK]

KÂMÂRÂN MIRZA, second son of Bâbur, and half-brother of Humâyûn; his mother was Gul-râh Begam, and he was born in Kâbul city about 1550. He was cleverer than Humâyûn and had a poetical turn, but he was cruel and vicious, and a restless schemer. He repeatedly rebelled against Humâyûn, who was at last compelled by his officers to make him innocuous by blinding him in the end of 1553. He went to Mecca in 1554 and died there in October 1557. The most interesting thing about him is the devotion of his wife, Mâh Châck Begam Arghûn, daughter of Shah Hasan of Sindh. She insisted on going on board her vessel
and accompanying him to Mecca, in spite of her father’s remonstrances, saying that he had given her to Kāmrān in the days of his greatness (in 1546) and that she would not abandon him now in the time of his misery. She died at Mecca a few months after her husband.

Kāmrān was put in charge of Kandahār by his father, and in the beginning of Humāyūn’s reign he was governor of the Pandja. During the interregnum, when Humāyūn in India, Kāmrān and his younger brother, Akṣarī, ruled over Afghanistan. He left one son and three daughters. The son, Abu l-Kāsim, who inherited his father’s poetical talents, was confined in Gwalior by Akbar in 1557, and was put to death some years later as a dangerous competitor. All three daughters were given in marriage; one of them, named Gulbāk, was a woman of a masculine spirit; she married Ibrahim Ḥusain Sulṭān, and she and her son were thorns in Akbar’s side. (Firrūsī, lith. ed., p. 221, and Muhammad Ḥusain, Ḍabkār-i-Abkhar.)

Kāmrān Shāh Dūrkān, the last sovereign of the Sadozai family of Afghanistan who succeeded his father, Maḥmūd Shāh, in the limited sovereignty of Herāt in 1245 (1829) and reigned till 1258 (1842). In the civil wars between the sons of Taimūr Shāh, the princes Zamān, Shudjā al-Mulk and Maḥmūd, the prince Kāmrān proved himself a brave warrior and in 1221 (1806) he took Kandahār from Shudjā al-Mulk, but lost it soon afterwards. In 1232 (1816) he took a leading part in the events which led to the disruption of the Durrānī monarchy. In particular, he was insulted by an insubordinate officer offered to his sister by Dost Muhammad he blinded and beheaded Fath Khān, the Barakzai Wazir (Dost Muhammad’s father), to whom Maḥmūd Shāh owed his kingdom. This led to the loss of the whole kingdom except the Herāt province. Kāmrān was deposed and indolent in his later years, but maintained himself at Herāt through the efforts of his able and unscrupulous wazir, Yār Maḥmūd Akīlkozāl. The siege of Herāt by the Kabīr Shāh of Persia in 1837—39 was the principal event of his reign. The rivalry between England and Russia was one of the principal causes of this siege, the Persians being advised by Russian officers, while Lieut. E. Pottinger, a young English officer, was the main spirit in the defence. In 1258 (1842) Kāmrān Shāh was assassinated by Yār Maḥmūd, who was in league with the Persians and remained in possession of Herāt. Coins were struck at Herāt by Kāmrān.

**Kāmrūp,** a district in Assam, situated between 25° 43′ and 26° 53′ N. and 90° 39′ and 92° 11′ E.; the greater part consists of a wide plain, through the lower portion of which the Brahmaputra R. flows from east to west; but south of the river there are ridges of hills, thickly covered with jungle. Under the rule of the Koch dynasty, the first attempt to bring this country under Muhammadan rule was made by Muhammad Bakhtīyar Khalīji [q. v.], but his victorious progress eastward was checked when he attempted to enter Assam, and successive rulers of Bengal after him made similar fruitless attempts. In 1256 Bakhtīyar al-Din Vāzzāk Taghūī Khān invaded Kāmrūp and erected a mosque in commemoration of his victories, but disease broke out among his troops and the Assamese destroyed the general and most of his army. The thick jungles and moist, unhealthy climate of the Brahmaputra Valley proved to be effectual obstacles to the progress of the Muhammadan troops. But it was not until 1638 that they succeeded in gaining a footing in Kāmrūp and Gaṅhatī became the capital of a Muslim governor, but 20 years later they were driven out of the country by the Ahoms, who took advantage of the confusion that resulted from the conflicts between the rival claimants to the throne of Shah Dīvān [q. v.]. In 1662 Mir Dījālā [q. v.] made a vigorous attempt to conquer the Assam valley, but though he was at first successful, the difficulty of military operations during the rainy season and the outbreak of disease among his soldiers compelled him to beat a retrace into Bengal, and Mir Dījālā himself did not survive the failure of his expedition. After intermittent struggles for some years, the last vestige of Muhammadan rule disappeared in 1681 from Kāmrūp, and it formed part of the Ahom kingdom until it was ceded to the British in 1826.

**Kān** [see Kān]?

**Kān Wa-kān,** the name of one of the seven kinds of modern poetry (junūnī), unknown to the classical authors. It was invented by the people of Bagdād and takes its name from the formula used by story-tellers at the beginning of their recitals: "There was once upon a time". Originally the kān wa-kān was a rhymed tale and it was only later that it was applied to other subjects, especially of moral tendency. In the spoken language it was always in vogue in the east only, especially in its place of origin. The kān wa-kān is a poem composed of strophes of two lines the metre of which is given by the prosodists as follows: mustaṭfīlān fa′lātān, mustaṭfīlān fa′lātān.

"But, according to the 32 specimens that I have seen, the last foot of the first verse is mustaṭfīlān and not mustaṭfīlān; and therefore there is a rhyme only in the last hemistich of every verse. The principal variations are the disappearance of s or f in mustaṭfīlān and fa′lātān is often changed to fa′lātān. Al-Iskāhī, Al-Mustaṭraf, Būlāk"
adjective meaning "reed-shaped", then "channel, canal". In modern Persian also kânât is in use but there it has the special meaning of "subterranean channel or aqueduct. The true Persian word for this particular kind of canal is kā'īr, earlier kā'ārī (Vullers, Lexic. Pers.-Lot., ii. 657, 927); in the older language we also find āwghānī; see Vullers, l. c. 58). This latter word has in turn entered Arabic as șahrī (also šahrīgī), but there means "water-holder", "cistern"; cf. Lišān al-'Arab, ii. 336; Lane, Lexicon, p. 1738; cf. also Yaḵūn, Muḥajīn, i. 270, 271. In Western Europe, i. v. 27). Only in Syria (according to Moritz, Zur antiken Topographie der Palmyren, in the Abh. Pr. Akad., 1889, iv. 12) do we find kā'īrī, šahrīgī, vulgar šahrī, in the meaning of "subterranean aqueduct". It may here be pointed out that the other words in Arabic for aqueduct seem also to be borrowed (probably all from the Aramaic); cf. Fränkel, Die aram. Freimaurer im Arab., Leiden 1886, p. 23-25; take, for example, șahrī (Doby, ii. 344; from the Aram. șahrī = castellam; that is "any large building"; cf. the meaning of șantara = bridge, aqueduct, castle).

The plural Kanānād occurs in Syria as a place-name, for example, the name of a town on the western slope of the Ḥawrān, fifty miles south of Damascus, which is so called on account of its wealth of water, and is certainly a very ancient settlement, although hardly identical with the Biblical Kanēn (Numbers, xxxii. 42; I Chron., ii. 23), which Wetstein would rather recognise in K̲h̲neia (diminutive of Kanān), a village near Kerak, four hours' journey east of Derāt in al-Nuqrā; see Wetstein, Das katanische Giebelgebirge, Leipzig 1884 (from Delitzsch's Palästimerkantment, p. 26). Kanawīt's (Kavoza, Canatha) period of greatest prosperity was in the early centuries of the Christian era; splendid ruins still exist dating from the Roman period. Mention is made of the building of a new canal in the reign of Trajan; this must certainly have been simply the restoration of an already existing canal of older date. The upper town still has a well preserved ancient aqueduct. On this Syrian Kanānāt see Burckhardt, Reisen in Syrien und Palästina, Weimar 1823 sqq., p. 157 sqq.; Seetzen, Reisen durch Syrien, Berlin 1854-59, i. 79 sqq., iv. 51-54; J. Porter, Five Years in Damascus, London 1855, ii. 90 sqq.; G. Le Strange, Palestine under the Moslems, London 1890, p. 586; M. v. Oppenheim, Vom Mittelmêr zum persischen Golf, i., Berlin 1899, p. 194; F. Thomsen, Loca sancta, 1915, p. 76-77; Georgius Cyprius, ed. Seitz, Leipzig 1890, p. 206-207; Moritz in Pauly-Wissowa, Realencykl. d. kl. Altertums- wiss., x. 1856; Baedeker, Palästina und Syrien?, Leipzig 1913, p. 153-155.

On the Syrian aqueducts, Kanārat Zainab and Kanārat Fir'aww, see șantara.

Subterranean aqueducts such as we get in Peria are only rarely found in Syria, e.g. at Kāratān on the ancient road from Damascus to Palmyra (according to Moritz, Die antike Topographie der Palmyrene, loc. cit.). The town of Damascus is supplied by a channel from the river Bārrādā, the water of which is led into the dwelling-houses by means of leaden pipes. For information on aqueducts in Syria and Arabia in general see also J. Berggren, Guide françois-arabe vulgaire, Upsala 1844, p. 56-57, s. v. aqued.
Among the oldest aqueducts of the Muslim period is the aqueduct of Mecka, which was begun in the time of Mūsā ibn Jumāh. Ibn al-Rawdī, the geographer, states that the water supply of Ḥādat al-Rabī‘ was maintained, in great part, by providing for the water supply of the holy city; in 810 (1407) she had canals made which led the water from the district of Tā‘if, the valley of Misūn and from ‘Arafāt to Mecca. The channels, much neglected in course of time and often only very negligently repaired, were restored by the Turkish Wali ‘Uthmān Pāšā (1882–86). For details see Snouck Hurgronje, Mecca, the Hague 1888, i. 6–10, where the Arabic sources are also cited.

In view of the dryness of Arabia, artificial irrigation by means of canals has always been a necessity of existence there (cf. for example, Polybius, x. 23) as river water is in many places not available in sufficient quantity and the rainfall is slight. Open canals continuously lose large quantities of water through evaporation and they are also not infrequently damaged by cloud-bursts and torrential floods. The subterranean kanār or kārīz (kahrīz) system is therefore generally preferred in Persia. By this means water is brought often from great distances to the human-covered plains. Wells are made in the higher lying parts of the valleys, especially at the foot of the hills, and the water accumulates plentifully in them and is led first by subterranean tunnels, later by open canals and furrows (qurāq), to the fields and gardens to be watered. These channels are often 50 or more feet below the surface of the ground, are vaulted and often lined with bricks and so high that a man can crawl through them. Every 30 or 40 paces a perpendicular shaft, often of masonwork, and covered at the top, leads down to the pipe. In the making of these channels the Persians reveal great skill. The searching for springs and the making of channels is a special industry, that of the muḥānā (see especially Bishop, op. cit.; see Bibliography). The making of a kanār costs a great deal in proportion to the water it supplies and the annual cost of maintaining it is also not inconsiderable. It is also very important that the water is distributed, and much care is taken that the villages in turn have the use of it for the proper length of time. This business of water-distributing is perhaps the most important part of the administration of a Persian village. A special official, the Mīr-āb, is entrusted with the duty. He has also to see to the maintenance of the pipes etc., especially to their being kept clean; cf. thereon Gordon, op. cit.; see Bibliography.

At the present day the Persian kanār system is, unfortunately, much neglected; many channels are now quite dry; for example, the great network of channels which once supplied the thickly populated town of Ray near Tihrān is now so much destroyed that it can barely supply the wants of the village of Shāh ‘Abd al-‘Azīm which is built on the ruins of Ray (Polak, op. cit., ii. 118). Tihrān is, according to Bishop, loc. cit., still supplied by 35 canals.

This method of irrigating the fields by artificial channels is called in Persia the āb̲ system of agriculture, in contrast to the natural method, the deśm or varāmī system; cf. Polak, op. cit., ii. 120; Stolze-Andreas (see Bibli), p. 8.

A great network of canals cuts up Central Asia. The planning of this system is ascribed to Tūnūr; but they are certainly much older and their origin may be dated at least as far back as the early middle ages. To make them, the water from springs in the oases miles apart was collected, great rivers diverted, and water led by tunnels through ranges of hills and by aqueducts over the valleys. A great many of these canals are, however, now decayed, as in Persia. There the canal is called arīk and the canal manager arīk-āzakāl. A thorough account of this Central Asian system of irrigation is given by A. Th. v. Middendorf in his article Einblicke in das Perghana-Thal in Mém. de l'Acad. imp. des Sciences de St. Petersbourg, 1881, Series 7, vol xxix. See also, especially for the country east of Bukhārā, H. Moser, Durch Central-Asien, Leipzig 1853, p. 114–119.

(M. Streck)

KANAWDJ or KANWDJ, Skr. Kanyākūbdjā (known to the Arab authors as Kanaudj or Kanawdj) was the capital of a powerful kingdom before the Muslim invasions. It is now a small town in the Farnākhābād district of the United Provinces on the R. Ganges (27° 2' 30" N. 79° 58' E.). It has been supposed to be identical with Polien's Kanagora or Marcus Crispin's Ptolemy's 134: Beal, Travels of Buddhist Pilgrims, p. 70). V. Smith disputes this on the ground that the existence of Kanawdj at the time of Ptolemy (140 A.D.) is doubtful. The identification is however not improbable. The first undoubted mention is found in the travels of Fa-hsien (405 A.D.), when it was a place of no great importance under the Gupta kings. At the time of Yuan Chwāng's visit (circa 641 A.D.) under the rule of Harshavardhana it had grown into an important capital and a centre of Buddhism. It may be noted that this traveller gives the Chinese transcription (Kano-kū-she) of the Sanskrit-name Kanyākūbdjā, while the earlier travels Fa-hsien gives the Pali transcriptions, corresponding to the Prakrit and modern forms. The country of which it was the capital was known as Panātra. After a period of anarchy and short lived monarchies it became the capital of the Gujārā Pratiharā kings, who founded a dynasty which lasted for two hundred years. The most powerful king of this race was Bhoḍā (A.D. 480–90) under whom Kanawjd became the capital of an extensive empire, which may be stated to have included all the plain of northern India from the Satadvaj to Bihār and southwards to Gudrāt and Saurāstrā. On the west it was bounded by the territories of Siād now under Muslim rule.
Al-Mas'udi writing in A.H. 332 (943–4) says that the king of Kanawjd ruled over the country, bordering on Multan and Sind and southwards on al-Mānik, the country of the Ballāshī (i.e. the Vallabhi kings), and al-Butnā (q. v.), says that Muḥammad b. al-Kāsim b. al-Munabbih, who had entered Sind from Sūtījānā, penetrated India as far as Kanawjd, but that the date of this invasion is not given. Probably this invader is identical with Muḥammad b. al-Kāsim b. Muhammad, the con-
quered or of Sind who, according to the Caṅnāma, made war on the chief of Kanawjd. But, if any such expedition took place, it could not have been di-
rected against Kanawjd itself, but only against its territories bordering on Sind. There is no

ground for supposing that any Muḥammadan in-
der penetrates as far as Kanawjd before Muḥ-
mūd of Ghazni. His conquest overthrew the Pra-
tha-ra rule, which had already been weakened by
the attacks of the Rāshtrakūtas. At the time of Muḥmūd's invasion, after his conquest of Dājajal,
the Shāhi of Gandhāra, Kanawjd was under Rājapāla, who abandoned the city and fell back on
the river Ganges. The capital was not taken, and the city became the center
of the empire. After Muḥmadūn's departure the Cānḍelīs
seized on Kanawjd and Rājapāla was killed. Muḥmūd returned next year and defeated the Cānḍelīs, and the Kanawjd kingdom continued as a small state until it fell into the hands of the Gāhārīwī Rājputs.

In 589 (1193) the final destruction of the Hindu kingdom was brought about by the invasion of Mu'izz al-Dīn Muḥammad b. Sāmī, the Gōrtī king of Ghazni, and Kanawjd ceased to be a place of

importance. It probably never really recovered from its destruction by Muḥammad, as al-Bīrīnī,
writing as a contemporary, says that it was mostly in ruins after the transfer of the capital to Biān.
Mu'izz al-Dīn adopted the style of the coins of Kanawjd in some of his issues with Sanskrit legends, and these were probably struck at Kanawjd after the conquest. There are not many important events in its later history.

In 598 (1490) the emperor Humāyūn was defeated here by Shāh Khān, and in the eighteenth century it was included in the territories of the Bangash Nawāibs of Farrukhābād and afterwards in Awadh. During the mutiny of 1857 the Nawāib of Farrukhābād was defeated by the British army here.

Kanawjd was made a mint by Shāh Shāh after his victory over Humāyūn, and on the Sūrti coins it appears as "Kanawjd urf Shāhgīrā". Shāhgīrā was changed to Shāhgīrā in Akbar's reign. Under Muhammad Shāh and his successors, Ahmad Shāh, Ala'gir II, Shāh Dīshān III, and Shāh 'Alam II, the name of the mint was Shāhgīrāa Kāndābī.

From Kanawjd are derived the names of the Kanawjd section of the Brāhman caste and the Kanawjd dialect of Western Hindi. The only important modern industry is cloth-printing.

(M. Longworth Dames)

**KANDĀBĪ** a city in the territory of the Budha (Buddhāya, var. Nudha) which corresponds to the modern Kāchi or Kaś Gandāva in Balūsīn. It is probably the modern town of Gandāva, which is not now important. Kandābīl was taken by the Arab invaders in the time of al-Ḥadhjadi probably before the invasion of Sind by Muḥammad b. al-Kāsim (q. v.) in 897 (707). The Caṅnāma, a legendary history of Sindh and its capture by the Muslims, mentions Kandābīl as having been taken by the legendary King Caṅ, who advanced through Abīl (Las Bīla) and Tūnā (the city of Kandābīl) into the desert and took the fort situated on the river Sīn (which should doubtless be read Sībī, as a branch of the Nārī flowed through Sībī towards Gandāva). In the reign of Yazīd II (101–105 = 720–724) it was chosen by Yazīd b. al-Muḥallab as a place of refuge for his family when he rebelled. Al-Iṣṭakhīr and Ibn Hāwkal mention it as the principal emporium of the Budha. In the time of the Caliph al-Manṣūr (136–158 = 754–775) it is stated by al-Balāqūtī that Hīshām b. ʿAmr al-Taqīḥī attacked a body of Arab rebels at Kandābīl, and ʿImār b. Mūsā in the reign of al-Muṭṭasim (218–227 = 833–842) conquered Muḥammad b. Khālīf there and carried the inhabitants off to Kuṣṭār. The name of Kanawjd or Kandābīl is not met with in more recent times.

Its identification with Gandāva is doubted by Raverty on the ground that the Masālik waʿl-Maṣūmī (cf. Iṣṭakhīr, p. 179 sq.) states that it is but five farsangs distant from Kuṣṭār, but this is not in accordance with its position as shown in al-Iṣṭakhīr's and Ibn Hāwkal's map (see Journ. As. Soc. Beng. 1892. Plate XI) which shows it to the west of the Mīrān and a long distance North of Kuṣṭār. There is in reality no place in the map which can be reasonably be identified. Cf. also J. Marquart, Erânisahr (Abh K. Geist, Wis. Göttingen, Phil.-hist. k. I., new series III, No. 2, Berlin 1901). p. 187 sqq., 190. Gandāva remained an important centre as is shown by the Balīc ballets of the commencement of the xvth century, and it is probable that the Κ of the Arab writers represented a vernacular Κ, as in Kandāhār for Gandhāra and other cases. It is an ancient walled town standing on a mound, and was long the capital of the province of Kuṣṭār, which from it obtained the name of Kuṭ Chi Gandāva. The disappearance of the name Kandābīl from history may be therefore accounted for by the decay of the Arab rule and the revival of indigenous government which naturally gave the chief town its original vernacular name.

KANDAHAR. 1. The name given by the Arab historians to the Indian Kingdom of Gandhāra, situated in the valley of the Kabul river as far as its junction with the Indus. Its capital was Wainhind or Ohind as noted by al-Biruni (Sachau i. 206); and at an earlier period al-Masudi speaks of Gandhāra as the country of the Rādjputs (Rahbūt) and as situated on the river of the Rādjputs which flows into the Indus (Sprenger p. 381). It was from this Kandahār that the name was carried to the settlement of the Gandhārīans on the banks of the Arghānā, which afterwards became famous as the modern Kandahār.

Bibliography: Sachau, Alberuni's India, Trübner's Or. Series, London 1888; Bellew, Races of Afghanistan, Calcutta 1880.

KANDAHAR. 2. A city in Afghanistan (which also gives its name to a province) situated 31° 27' N. and 65° 43' E. at an elevation of 3,462 ft. between the Tarnak and Arghāntāb rivers. It is an important centre of trade and administration, with a population estimated at 31,000. The province, now the principal territory of the great Durrānī tribe of Afghānīs, is identified with the Haranwāt of the Achaemenians, the classical Arachosia, and the mediaeval Zamīn-dāvar and Zābul, and historians have generally assumed that the town was founded by Alexander and named Alexandria Arachosia, but this does not rest on good evidence, and it is very improbable that the name Kandahār can be derived from Alexandria. Its identity with the name Gandhāra, the ancient Indian Kingdom occupying the valley of the Lower Kabul River, on the other hand, appears to be well established. Kandahār was the form used by the Arab chroniclers for Gandhāra; the Kandahār of Mas'ūdī, for instance, has nothing to do with modern Kandahār. There seems some ground for accepting Bellew's theory that the name was brought to Arachosia by emigrants from Gandhāra. The most probable period for such an emigration is the fifth century, when the Ephthalites conquered Gandhāra, as related by the Chinese pilgrim Sung-yun, who visited Gandhāra about A. D. 520. Buddha’s begging-bowl, still preserved in the Shrine of Sūltān Wais outside Kandahār, was probably brought there by refugee Buddhist monks. It was not however till the 12th or 13th century that the new Kandahār began to be famous. It is not mentioned by the Arab historians in their record of the conquest of Arachosia (al-Rukhadr); the capital was then Buz which was taken in 855. Durrānī, and the same place was a mint-town of the Saffārīs. It was not until after the destruction of Buz by ‘Alī al-Dīn Durrānī in 545 (1150) that Kandahār began to rise into importance. Shams al-Dīn II, the Kart ruler of Herāt, is stated by Khwāndamir to have besieged Kandahār, and as his reign began in 576 (1180) it may be held that by that period Kandahār had become the capital, and henceforth it plays a prominent part in history. It was conquered by Ḥulāl and formed part of the province bestowed on his grandson, Pir Muhammad. At the close of the 15th century it formed part of the Kingdom of Husain Bākhtār of Herāt, and the name Kandahār first appears as a mint on his coins. Under Husain, the Ārghūn Chief, Dhu ‘l-Nūn Beg, obtained the government of Zamin-dāvar in addition to other provinces and made Kandahār his capital. After his death in the wars with Shāh Shāh, the empire Bābur drove his son Shāh Beg Arghūn out of Kandahār in 915 (1507), but Shāh Beg soon recovered the town with the aid of Shāhānšāh and held it for several years, but Bābur finally took it in 928 (1522) and it remained part of the territories of the Mughal Empire of India, although always regarded by the Safavid Shāhīs of Persia as properly belonging to Khurasān. Kamān succeeded Bābur in the possession of Kābul and Kandahār, and held them even when his younger brother Humayūn was expelled from India. A Persian attack on Kandahār in 944 (1535) failed. In the disputes between the brothers which followed Humayūn's exile, Humayūn besieged Kandahār with the aid of a Persian army and after its fall made it over to the Persians, but re-took it from them afterwards. In the early part of Akbar's reign Tahmāsp Shāh succeeded in taking Kandahār 965 (1556) and Akbar did not recover it till the latter part of his reign, 1003 (1594). Persians again took it from the Emperor Djiāhāngīr in 1031 (1621), but Shāh Jīhān's army occupied it in 1047 (1637). The last transfer was in 1058 (1648) when Shāh ‘Abbās II took it, and the Mughal Emperors were never again able to conquer this province.

Kandahār remained under the Safawi Monarchy until the rising of the Ghilzai tribe to power under Mīr Waiz (v. Ghilzai). The success of the Ghilzai rebellion in driving the Persians out of Kandahār emboldened them to invade Persia itself, and Mahommed became Shāh of Persia. Kandahār itself came into his brother's power, and the Ghilzais maintained their hold on it until Nadīr Shāh took it after a year's siege in 1151 (1738). During the siege he built a new town outside the old city and named it Nadīrābād. The Ghilzais were driven away from the neighbourhood, and the Abdālis, who had been removed to the Herāt province, were allowed to return. They are still the most important element in the province. Ahmad Shāh, one of their leaders, who had held high command under Nadīr Shāh, obtained possession of Kandahār without difficulty after the latter's death, and made it the capital of the Durrānī Kingdom which he founded (v. Ahmad Shāh, Abdālī, Durrānī, Afghānīs). He built a new town and gave it the name of Ahmad-abād, most shāhī with the epithet of ashraf al-nilātī, "most illustrious of cities", which appears on all coins struck there during the Durrānī rule, but has been replaced under the Barakzais by the old name Kandahār. The vicissitudes of Kandahār were not at an end; it passed rapidly from one pretender to another in the course of the wars between Zāmīn Shāh and his brothers, Mahommed and Shāhān Shāh.
'al-Mulk, and, after Dost Muhammad Bakhzad had obtained the principal power, the inevitable rivalry set in and Kandahar was held long by his brothers, Kishandil and Fatur. In 1839 it was occupied by a British Indian arm, in support of Shah Shuja 'al-Mulk, and held till 1842 when the British left Afghanistan. After Dost Muhammad's death Kandahar again passed from one to another during the civil wars between his sons (see 'Abd al-Rahman Khani). In the war of 1879-80 after the deposition of Yakub Khan, Kandahar was for a time erected into a separate state under the Wali Shih 'Ali, but after Aiyub Khan's invasion and his final defeat by Roberts at Kandahar the British Government decided to put the whole country under 'Abd al-Rahman as Amir, and the separate state of Kandahar came to an end. Since then it has remained peacefully under him and his successors.

The changes in the political relations of Kandahar are reflected in its coinage. It first appears under Husain Bakhart of Herat, then under Humayun. Then for a long season only a few copper coins of Persian origin are known. Rupees were struck by Djahangir and Shah Jahan. These are followed by a long series of anonymous copper coins of Persian origin bearing figures of antelopes, peacocks, the hand of Fatima or the sword, Dhu'l-fikar. Mahmut the Ghalzai struck rupees, and Nadir Shah also, both in the names of Kandahar and Nadirabad. Then follows a full series of all the Durrani Kings, followed by anonymous coins in the name of the 'Sahib-i-Zaman', or 'Amir-i-Kullam'. Last of all come the coins of the Bakhzad dynasty, and even the temporary Wali, Shih 'Ali, is represented.

The site of Kandahar has been several times altered. The town taken by Nadir Shah appears to have been on hilly ground; it was no doubt the Husainabad built under the Ghalzais and named after the Persian King Husain Shah, afterwards dethroned by Mahmut. Nadirabad seems to have been some distance away on the open plain, while Ahmad Shah, the modern Kandahar, was nearer to the old city, according to Elphinstone. Masson about 1830 describes the ruins of the old town dismantled by Nadir Shah as on the slope of a hill about two miles distant from the walled town of his days. The town of Ahmad Shah is in Kandahar.

(M. Longworth Dames)

KANDAHAR. 3. A fort in the Dekhan, 77° E. 19° F. which gives its name to a tala'a in the dominions of the Niam of Kandahar. This place appears to be the mint-town of some rupees of Kandahar struck in the reign of the Mughal Emperor Muhammad Shah from 1157 to 1159 (1744-45). As the city of Kandahar in Afghanistan had been separated from the Mughal Empire since 1058 (1648) and was at this period in Nadir Shah's possession, it is impossible that these rupees should have been struck there.

(M. Longworth Dames)

KANDURI. The Persian word kanduri or kandur means a leather or linen tabeclotth; in Hindustani this word means also a religious feast held in honour of a venerated person like Fatima. In this latter meaning the word has been import, apparently, from India into the Indonesian archipelago. In Aceh the word is unchange, in Java it is slightly altered to kanduri or kenderen; it may be noted that nowadays the more usual term in Java is: tekpek or sidekak, from the Arabic rāka, slmetric, from the Arabic salām, or hāghat, a well known Arabic word, meaning need, want of a man's presence at a feast, and hence the festival itself. In general it is a feast given with a religious purpose, or at least in conformity with religious law, just like the wakima in the books of Pi. The occasions which give rise to it are numerous, for instance: days of commemoration, domestic events, especially circumcision, the completion of teaching the Koran, certain periods, such as pregnancy, sowing and harvest, and sundry reasons like starting out on a journey, occupying a new house and other enterprises, the averting of epidemics and calamities, etc. According to the Law each kanduri should have a religious character; the poor must be invited, forbidden things should be avoided, but the strong local i'dar is always prone to look for means of effecting a compromise. Every complete kanduri, especially those in commemoration of deceased relatives and those given on the anniversary of a saint, is sanctified by means of recitation of the Kuran, de'ke's or prayers; popular superstition, however, regards such kanduri as consisting of actual offerings of food to the deceased. Almost every kanduri is opened by a prayer, the commemorative ones by the du'a. In Aceh some months are called kanduri with a second word indicating the food the sacred meal consists in.

KANEM, a country in the Central Sudân, east and north-east of Lake Tchad. Until recent years Kanem was only known from the accounts of Barth, who visited a part of it in 1851, and Nachtigal, who crossed it in 1871 on his way to Borku. But from 1900 onwards, the work of French scientific missions, as well as the explorations of officers and officials entrusted with the administration of the "territoire militaire du Tchad", have made it possible to rectify and complete the data furnished by these two travellers.

The name Kanem, taken in the widest acceptation, is applied, according to Nachtigal, to a region bounded on the north by the caravan route from Kouraw to Lake Tchad, in the south by the Bahra al-Khazal (q.v.), in the east by the depression of the Eguie, in the west by the Lake, and lies between 14°—16° N. Lat. and 12°—14° E. Long. (Greenwich). The area may be estimated at 27,000 to 30,000 square miles. Kanem, in the stricter sense, only occupies about a quarter of this huge area, between Lake Tchad on the west, Bahri al-Khazal on the south and the mountainous massif of the Manga, which separates it from the Eguie, on the east.

The most characteristic topographical feature of Kanem is the existence of numerous sand dunes
running N. W. by S. E., separated from one another by hollows several hundred yards broad and sometimes four or five miles long. Dunes and depressions are specially marked in the northern part. The hollows, which are given the name of wads, are dry except during the rainy season when ponds are formed in the deepest parts; their bottoms consist of soil impregnated with natron. Below this, to a depth of 2 to 30 feet, lies a vast water-bearing stratum which therefore are dug into the beds of the wads. The existence of this subterranean water supply has suggested that the present Kanem is simply an ancient lagoon formerly fed by the waters of the Bahar al-Ghazali and now dried up. The wads themselves would be the beds of the ancient exits or bahri of the Tchad. The shore itself is in process of transformation. It is bordered by elongated islets lying S. E. by N. N. W. and separated from one another by narrow channels. The islets, which number 300, of which 80 are inhabited, lie from two to six miles from the shore. They are divided into two groups, the Kuri archipelago in the south and the Buddha archipelago in the north. The gradual desiccation of the south-eastern part of Lake Tchad has added a certain number of islands to the mainland. Peninsulas and bays, which cut into the shore, have thus been formed and force sailors to make numerous detours.

The climate of Kanem is that of tropical regions. Two seasons are distinguished, the rainy season from July to September, and the dry season from February to June. The intermediate period, from October to January, corresponds to winter and is marked by a perceptible drop in the temperature; in the bottoms of the wads the thermometer goes sometimes down to zero Centigrade (= 32° Fahrenheit). The rains themselves are unequally distributed and diminish from south to north. The very luxuriant vegetation of the southern part becomes less and less rich as one ascends northwards. It flourishes on the slopes of the wads, the bottoms of which remain barren. The date-palm grows wild in many of these wads. It even forms a regular oasis at Mao, in the centre of Kanem, but disappears in the northern part, which is of prairie character. Cultivation is limited to the area around the villages, built on the slopes of the dunes close to the wooded zone. The commonest crop is the millet, to which may be added beans and cotton in the bahri of the Tchad. The rearing of horses, cattle, sheep and camels is also a very important source of income for the inhabitants. Fishing around the lake and hunting in the interior also contribute to the support of the inhabitants. The fauna is very rich and varied. The elephant is becoming scarce, but the rhinoceros, the hippopotamus, lion, buffalo and panther abound in Kanem proper and the ostrich, antelope, gazelle and giraffe on the northern steppes.

The number of inhabitants is difficult to estimate. It is certainly not above 80,000 to 100,000 or about two to the square mile. The population is settled, with a few nomads. The principal settlements are in the south Ngiri, in the S. E. Mondo, in the centre Mao, "a junction of roads, a centre of gravity and of confluence of races ... the first oasis in the date country, still rich in millet, suited both for the rearing of camels and cattle". (Largeau).

The population is far from being homogeneous. The diverse elements which compose it belong some to the negro group and some to the Arab group, more or less altered. To the first belong the Kanem-bu, the Buduma, the Kuri; to the second the Ulad-Sliman and the Shoa; the Tundjur and Tubu are classed between the two.

The Kanem-bu, descendants of the first settlers in Kanem, constitute the basis of the population, upon whom they have imposed their language. They are dark grey (asrâfi) in colour and tall in stature. Industrious and peace-loving, they have settled and devoted themselves to agriculture. They profess Islam and are fairly strict Muslims. In their midst live groups of individuals called Haddad (in Kanem-bu dge'na) who, although differing from the Kanem-bu neither in language nor in physical type, are considered as belonging to an inferior race and are despised. These natives are distinguished from the others by their weapons and by their mode of life. They use bows and arrows, while the Kanem-bu use spears, and live chiefly by hunting. Very warlike in disposition, they have played an active part in the civil wars which desolated the country in the course of last century.

The Buduma and the Kuri inhabit the islands of Lake Tchad, which they retired when they abandoned the mainland. The Buduma, who occupy the northern archipelago, live by fishing, cattle-rearing and the cultivation of millet. Before the French occupation, they practised piracy to the detriment of their neighbours of Kanem and even at the expense of the natives of Bornu [q. v.]. They have, for the most part, remained fetish-worshippers, although they have adopted some Muslim customs. The Kuri, on the other hand, while leading the same sort of life as the Buduma, are completely Islamised.

The Ulad Sliman and the Shoa represent the Arab element in Kanem. The first, who came from Tripolitania and Fezzan [q. v.] in the middle of the nineteenth century, have preserved the Semitic type quite pure. They have light complexion, speak the Arab dialect of Tripolitania and dress like the Arabs of the north. Nomads and robbers, possessing, thanks to their rifles, an incontestable superiority over the negro tribes, their sole means of existence was the slave trade and brigandage. Since the French occupation, some sections of them have taken service with Europeans, while others have left the country and entered the service of the Sanussi.

Of Arab origin, like the Ulad-Sliman, the Shoa have been long established in the Sudân. But if they have retained the use of the Arab language, which they speak quite purely, their physical type has been markedly altered by mixture with the black population. The Islam which they profess is fairly strict among the tribes of the north, where many of them are affiliated to the Tidjâniya brotherhood; among the tribes of the south, however, their faith has been contaminated by fetishist practices and the orthodox regard them as kirdi, i.e. idolaters. The Shoa live almost entirely by cattle-rearing; nomads in the dry regions near the desert, they become settled in the moister southern regions. They are represented in Kanem by the Ulad Serrat, the Bant Wall and the Dagona of the Bahar al-Ghazali.

The Tubu or Teda, who came originally from Tibesti, are fairly numerous in Kanem. But, as
a result of contact with negroes, they have lost some of their distinctive features, notably the slimmness of the body and elasticity of gait. They are also much less fanatical than their kinsmen who have remained among the mountains. Lastly, while the Tuu, strictly so-called, are nomads and live almost entirely by brigandage, the Tubu of Kanem or Darzaged Konuma are for the most part settled. They follow agricultural pursuits, for which they are not fitted, without great success. The principal bodies of them are the Gadobs, the Warabbas, the Dogorda and the Yoromba, related to the Kaughteria of the Bahir al-Ghazal. Their language is connected with the Kanuri spoken in Bornu.

The Tundjur are the descendants of Hilali Arab tribes, who, after sojourning around Tunis, migrated to Dirr Fur at the end of the fifteenth century. There they passed to Wadai and finally settled themselves in Kanem towards the middle of the seventeenth century. Much mixed with negroes since then, they form a group intermediary between the Arabs, the Kanembus and the Tuu. Arabic is their proper language, but they also speak Tuu and Kanembu. They are found especially in the region of Mondo and acknowledge the authority of a chief called jagb. History. According to the Arabic sources studied by Marquart, who modifies on this point the data of Barth (cf. Bornu), the kingdom of Kanem seems to have been founded by the Zaghawa, whose territory extended in the ninth and tenth centuries A.D. from Dior Fur to Lake Tchad and Karan. Al-Bakri mentions the inhabitants of Kanem as idolators and al-Idrisi seems also to consider them as such. Some time after the tenth, but not later than the twelfth century, Kanem was occupied by the Tubu (Teda) who came from Boruku and Tibesti, conquered the Zaghawa and introduced Islam. This occupation seems to coincide with the accession to the throne of the Yanzis, who claimed to be descendants from Y. b. Dhi Yazaq [q.v.] and became the disseminators of Islam which had been introduced by Al-Hadi Al-Othmani, the predecessor of the Yanzis. The Kitaib al-Istidair (ed. von Kremmer, Vienna 1852, p. 32, transl. Fagnan, p. 61) places the conversion to Islam of Kanem about 500 = 1106. According to a Hausa legend, Abu Zaid al-Farzati (end of the xith and beginning of the xith century) preached Islam in Kanem and Boruku. Another tradition is the introduction of Islam to the beginning of the twelfth century, in the reign of King Oumé. In any case this religion was solidly established in Kanem in the thirteenth century. Some Muslims from Kanem founded a Fédiki school in Cairo between 640 and 650 (1242-1252). The soli-disant descendants of Salf remained in power as long as the kingdom existed. They preserved their complexion "fair like the Arabs" down to Selma's, son of Bikouru, who was the first negro king of the country. This dynasty considerably extended the kingdom of Kanem, the boundaries of which were carried by Dumana I, Selma's and Dumana II up to the frontiers of Egypt. The Suljas of Kanem maintained friendly relations with the Haafsids. A rapid decline followed this period of prosperity. The Bulala, a Kanembu tribe which at the beginning of the xith century A.D. had withdrawn to the S. E. of Lake Tchad, attacked the Suljas of Kanem and after a century of incessant fighting ended by conquering the country. Ndjima, capital of Kanem, was taken by the invaders. Suljan Omar b. Idris (796-800 = 1394-1398) had to retire to the country west of Lake Tchad, where one of his successors founded the kingdom of Bornu [q.v.]. In the sixteenth century the sover- reigns of the new state in their turn took the offensive against the Bulala in order to re-conquer Kanem. This end was achieved by Idris Katta-karmab (1504-1506 A.D.). The conquered Bulala had to pay tribute and Kanem became a province of Bornu. The submission of the Bulala remained, however, somewhat precarious. During the xvith century the Suljas of Bornu found themselves forced to resort to force in order to oblige their neighbours to respect the treaties that had been made. Thus we find Idris Alaoma (1571-1603) sending five expeditions against the Bulala, who were supported by the Tuu. The Suljan of Bornu was victorious over his adversaries but his authority and that of his successors were hardly recognised except by the people around the shores of the Lake; the interior of the country slipped from them. Very soon the weakening of Bornu enabled the Bulala to recover their independence. But towards the middle of the xvith century they were in their turn conquered by the Tundjur from Wadai. They then left Kanem and went to settle in the west of Bahir al-Ghazal, then in Fiti, where their descendants still are to-day. The Tundjur imposed their authority on the various peoples of Kanem but had to endure the attacks of the Bornus who drove them into the region of Mondo and reduced them to the state of tributaries. The Bornus, troops, commanded by a Hausa slave named Dalaisa, settled permanently in Kanem, where their descendants are known as Dalatua. Their chief (alifa) settled at Mao and became the representative of the Suljan of Bornu, to whom he paid an annual tribute. This restoration of the Bornus suzerainty was of short duration. From the beginning of the xith century Kanem was attacked by new enemies, the Wadaians, who claimed the country as a former possession of the Bulala settled in Wadai. The Suljas 'Abd al-Karim Sabunu (1805-1819) and Muhammad Sharif occupied parts of the south almost without striking a blow. Bornu, invaded by the Fulbe, was unable to intervene, and Kanem occupied with the feuds of the Tundjur and Dalatua was in a state of complete anarchy. The Dalatua ended by triumphing over their rivals but recognised the suzerainty of Wadai. Their chief, the alifa of Mao, received the title of aguid al-bahr, and became the representative of the Suljan of Wadai, in the name of whom he gave investiture to the Kanembu and Haddad chiefs. The natives who would not submit to the Wadaians took refuge in the islands of Lake Tchad. The arrival of the Ulad Sliman (1846) provoked new disorders. Driven out of Fezzan by the Turks these nomads reached the country north of Lake Tchad and began to plunder it. Severely defeated by the Tuaregs in 1850 they moved on to Bornu. The Suljan then took into his service the remains of the tribe and entrusted the Ulad Sliman with the defence of the frontier against the Wadaians. The Ulad Sliman took advantage of this to reconstitute themselves and to plunder friends and enemies without distinction. At the period of Nachtigal's visit to Kanem
1871 they were the real masters of the country. The Tundjur of Mondo were tried to resist them but being decisively beaten in 1883, they were reduced to slavery. The Haddad of Ngumo alone succeeded in keeping in check these nomads, who dreaded their poisoned arrows.

The situation was none the less much disturbed. The Kanembù and the Haddad were fighting between themselves for the Wadasi, and frequently, especially after the death of Shaik Abd al-Ljahli, the various factions of the Uad Sliman began to fight with one another.

The French occupation put an end to this anarchy. Kanem was included in the zone of French influence, as determined by the Anglo-French agreement of March 21, 1899. After being visited by the Joalland and Fourcaur-Lamy missions (1900) it was effectively occupied between 1901 and 1905. Accepted without opposition by the Kanemhù, European domination met with an obstacle in the hostility of the Sanusia, who in 1906 established a zawiya at Bir Alali, in the north of Kanem. Muhammad al-Hadj, the chief of the zawiya, put up for the mastery of the broomroad, at the head of bands of Arabs from Tripolitania, Tuaraga and Uad Sliman, endeavored to arrest the advance of the French. The evacuation of the zawiya in 1902 determined a number of the Uad Sliman to abandon the struggle. The malcontents, who had been joined by Tuqui brigands, continued hostilities down to January 1905, when their chief, Shaik Ahmad, finally made his submission.

KANGHRI (also written KANERI, with the subsidiary form Çangri), capital of the liwa (administrative district) of the same name in the wilayet (province) of Kastamuni, on the Adji Su, a tributary of the Kiez Imağ (Haiys), the ancient Gangra, famous even in ancient times as a stronghold, was sometimes used by the Byzantines as a place of banishment and later in the wars with the Arabs and the Dānishmand-Oghlu again became important on account of its almost impregnable citadel. On their campaigns against the Byzantines the Maniys were repeatedly penetrated as far as Kandgera (variant Dandgera) e.g., in the year 93 = 711/12 (al-Tabari, ed. de Goeje, ii. 1236 = Ibn al-Athir, ed. Tornberg, iii. 457; al-Ya'kubi, ii. 350, who calls the town Hisn al-Hadi), in the year 109 = 727/28 (al-Ya'kubi, ii. 395) and in the year 114 = 731/32 (Bar-Ihebraeus, Kitab al-Makbakan Tobyni, ed. Bruns and Kirsch, ii. 155; cf. al-Tabari, ii. 1561, and Theophanes under the year 6224). When as a result of the defeat at Mangikert in 1071 the eastern frontier provinces were abandoned by the Byzantines, the Saldjiks and the Dānishmand-Oghlu shared the spoil: the former established themselves in Khazaria, while the latter, taking advantage of the nominal head of Asia Minor from Amasia to Kastamuni; among the conquests of the first Dānishmand-Oghlu in 468 (1075/6) we find Kanghri mentioned; cf. Turukhi Ath Dānishgend in Amasial Husaini Husam al-Din, Amasia Turka, Stambul 1322, ii. 286 sqq.; Hezavrann, Tanbqi al-Tawarikh in the Z. D. M. G., xxx. 470. In the year 1101 an army of Crusaders left Constantinople for the land of the Dānishmand-Oghlu, in order to liberate Boemund of Antioch, who had been captured by them at Malatya and imprisoned in Niksar, conquered Angora and reached Kastamuni (approx. modern Gangra); but the attack on the fortress failed and soon afterwards the army was completely wiped out by the allied Saldjiks and Dānishmand-Oghlu at Amasia (Albertus Aquensis, liber viii. cap. 8; Ibn al-Athir, ed. Tornberg, x. 203; cf. Z. D. M. G., xxx. 476; Chalandon, Les Comtes, i. 224 sqq.) The emperor John Comnenus captured Kanghri in 1134 with the help of his heavy siege artillery, after having stormed it in vain a year before (Chronicle of Niketas, i. 6 and especially also Joannes Prodomos; see Chalandon, op. cit., ii. 84 sqq.); but very soon after the departure of the emperor the fortress was retaken by the Dānishmand-Oghlu and never again passed into the hands of the Byzantines. In the period following we find Kanghri in possession of the Saldjiks of Konya (see Chalandon, op. cit., passim). After the decline of the Saldjik empire Kanghri belonged to the territory of the Ifsandiyar-Oghlu of Kastamuni, was taken from them in 795 = 1392/3 (so Negeiri) or 797 = 1394/5 (so Ashikpahazade and the anonymous Ottoman chronicles) by Bayazid I with the greater part of their lands, but restored to them by Timur in 814 (1410) and finally in 822 (1419) definitely annexed by Mehmed I (Ashikpahazade, Türk, p. 88 sqq.; Levenelius, Historiae Musulmanae Turcorum, Frankfurt 1591, coll. 475; the statements of von Hammer, Gesch. des Osman. Reiches, i. 70.248 and ii. 176 are due to a misunderstanding). In the period of peace that now followed under Ottoman rule, Kanghri falls completely into the background: it is scarcely mentioned by the historians; we have, however, full descriptions of the town from Eyvili, Siğahetâme, iii. 239 sqq., and Ḥaddâji Khalifa, Diğâhnum, p. 645. Among European
travellers we find it first mentioned in 1553—55 by Dernschwam in his Tagbuch einer Reise nach Konstantinopol und Kleinasiern, ed. Babinger, Munich 1923, p. 196; nearly 300 years later Ainsworth was the first European to describe it from his own observations and in our own time it has been occasionally visited and described by German explorers in Asia Minor. The castle, in its day stormed by Arabs, Dānīānān-Oghlu, Byzantines and Crusaders, lies in ruins; the tomb still survives of Karategin, who captured the town for the first Dānīānān prince and is now revered as a saint. The system of cisterns which dates from pre-historic times, on the castle hill, which Ewliyâ and Ḥaddîjî Khalîfâ fully described, has not yet been closely examined, nor has the "Medjiddî Tash" (Tash Masджjid), i.e. the monastery of the Mewlewi dervishes, with its inscriptions, which, as Ainsworth was told, are said to date from the Arab Caliphah. Of the 27 large and small mosques some are said to date from the Byzantine period (see Cuinet); the principal mosque was built by Sulâmîn I in 966 (1558/9).

The extensive deposits of rock-salt at Maghāra, two hours south-east of Kâñî (Cuinet, iv. 447 and Marcquer are famous; their process was known even to the Byzantines under the name Ταγγαραή ᾽Ασας (Nikolaos Myrepios, end of the xiiiith century, in Du Cange, Glossar. ad scriptores med. et inf. Graec. s. v.). The severe earthquakes, which have repeatedly shaken the town in modern times, are mentioned in the mediaeval ages also; al-Kâzawînî, Ḥâdar al-Bidât, ed. Wustenfeld, p. 268, gives a full account of some of these catastrophes, which destroyed the town in Aug., 1050.

The number of inhabitants may be approximately estimated at 30,000 in 5,000 houses; among them were about 150 Greek and 50 Armenian families, who may now have left it as a result of the Great War.

(J. H. MÖRDTEMANN)

Kâñî, abu Bachr, a notable Ottoman poet and prose stylist of the old school. Born in 1124 (1712) in Toḵad in Asia Minor, while still a young man he attained a great reputation in his native town as a stylist and poet. He belonged to the Mewlewi order and was allotted to the Şajih of the Mewlewi monastery in Toḵad to serve him. An important landmark in his career was the passing of Hâkim Oghlu ‘Ali Paşa through Toḵad (1658 (1754/5); he had been summoned from Trebizond to Constantinople to fill the office of Grand Vizier for the third time. Kâñî presented him with a kâṣida of welcome and a chronogram which made such an impression on the aged statesman that with the permission of the Şajih of his order he at once took him to Constantinople and procured him a position in the imperial Divân. The way to the highest offices of state was thus opened to Kâñî; but ambition was foreign to his nature. The careless and somewhat unrestrained life that he had been leading in his native town — he was only a lukewarm Muslim and only at the end of his long life returned again to the devout life of the order — seemed to him more desirable; so he took advantage of the fall of his patron, which took place after only two months of office, to give up his position in Constantinople. Henceforth his activities lay mainly in the provinces — in Silistra, in Wallachia and in Bucharest. He acted for a considerable time as Divân secretary to the voivod Alexander; there is a picture of them together in the Museum of Sinaya. Finally Yegen Mehmed Paşa, who had previously been a close friend of his, summoned him to Constantinople, when he became Grand Vizier (1196-1782). But this brought nothing but misfortune to Kâñî. Kâñî showed himself indifferent to all ceremony and conducted himself towards the Grand Vizier with as little politeness as in the old days when there was no difference of rank between them. He also chattered about matters that should have been kept secret. Yegen Paşa enraged at this and him committed to death and it was only with difficulty that the punishment was recalled, and Kâñî was sentenced to banishment to Lemnos. All his property was confiscated, so that he had to struggle with poverty. He died in Rabî’ II, 1206 (Jan.-Feb., 1792) and was buried in Ayâb, Surûrî and Sûmbul- Zâde Wehbi composed chronograms on his death.

Kâñî is one of the most remarkable figures in Ottoman literature of the post-classical romantic period during which Persian influence died down and was replaced by a more national spirit. As a poet Kâñî was not specially distinguished; he even lacks one of the principal features of most Ottoman poets: smoothness and polish of language. In his poems there are many repetitions and harsh passages: this is closely connected with his manner of speech and his habit of extemporising verses on any stimulus or on any occasion. Kâñî himself, it should be added, never collected and arranged his poems nor put the finishing touch to his Divân. Only at the instigation of the Reşât ‘l-Kuttaî Mehmed Râşîd Efendi were the poems which could still be found in existence collected by Nâşir and the Divân published. A portion of the poems have been lost. He wrote poems in Arabic and Persian in addition to Turkish.

His poetical works consist of numerous hymns, nazârs and takbîmân, kâṣida’s, chronograms and some hundred ghazals. What distinguishes his poems from those of other poets is his fondness for wit and humour, his humorous phraseology, while otherwise humour is entirely lacking in the old Ottoman poets.

A much higher estimate must be placed on Kâñî as a prose-writer in his Mînsâzâât and we have the very high opinion expressed by Abu ‘l-Ziyyâ Tawfîq that, as regards his style, a nation produces not more than five or six of his rank. In his letters Kâñî gives rein to his humorous mood and produces the most peculiar and unexpected flowers of speech. He might be compared with Rabelais. Many witty sayings and anecdotes of him are recorded. His happy disposition and his humour made him thoroughly
popular and gave his hearers and readers that attraction to him, his letters (of which about 120 exist) and his poems, which is only partly intelligible to our taste and ideas. His works are especially important for the phraseology, as he often uses popular expressions not found in the literary language and says most unusual and unexpected things.

KANîSA (plural kanîsât), synagoge, church, the arabisch form of the Aramaic knîsât. “meeting (place), school, synagogue” (cf. J. Levy, Neukbr. und Chald. Wörterbuch, ii. 355 sq.).

The Syriac form knîsût in the Peshitta on the New Testament is a rendering of swâvyh and sometimes also of kâlîsîya (cf. Payne Smith, Thesaurus Syr., i. col. 1773), whereas the form knîsîh in Christian Western Aramaic represents swâvyh as well as kâlîsîya (cf. Schultess, Lex. Syr. palæ., Berlin 1903, p. 95). The latter term is nearly always rendered by ta'zîy in the Peshitta The Lîsûn al- arab, viii. 83, 2 sq. is nearly right in so far as it derives kanîs from kanîsîh; al-Kha'fi (Sîhib al-Ghali, Cairo 1282, p. 193), however, rejects this view and expresses the opinion that the word denotes an especially Christian institution and goes back to kalîs, an abbreviated form of kâlîsîyah (kâlîsîya). Al-Bastânî also considers the word as being the arabised kâlîsîya (Muhit al-Muhib, Beyrouth 1886, p. 1847).

In Arabic kanîsa denotes the Jewish as well as the Christian place of worship; this appears also from the various statements of the lexica; some refer to churches, others to synagogues exclusively (cf. al-Djavhari, Şâhâb, Bûlûk 1282, i. 473 ult.; al-Zamakhschî, Arâs al-Bâzâgh, Cairo 1299, ii. 212, 20; Lîsûn al- Arab, loc. cit.; Yakût, Muğlam, ed. Wüstenfeld, iv. 314, 7). According to al-Fîrâzâbâdî, al-Kâmûs, Bûlûk 1272, i. 549; kanîs denotes the place of worship (mustâshâbâd) of the Jews, the Christians or the Kâfrî; cf. also Tadî al-Arâis, iv. 235 infra.

In early literature kanîsa is often found in the meaning of “church” two documents on papacy of the year 88 (707) mention the church of a monastery called (Munyat) Kanîsa Mîrâs in Egypt (Papryki Schott-Reimhard, i. ed. C. H. Becker, Heidelberg 1906, p. 111, g. line 4, p. 112, i. line 4). In a satirical verse Djarîr speaks of the churches of Taghhib (al-Mubarrad, al-Kâmîl, ed. Wright, p. 485, 5). The treaties which 'Umar or his generals are said to have concluded with the inhabitants of several towns usually contain stipulations concerning the kanîsât (al-Balâdîhûrî, Yâkût al-Bulûdân, ed. de Goeje, p. 1735; al-Yâ-kûbî, Târîkh, ed. Houtsma, ii. 167, 18; al-Tabarî, i. 2405, 8 sq., 2588, 7; Eutychius, ed. Cheikho, ii. 17, 7; Ibn 'Asikî, al-Târîkh al-kabîr, Damascus 1329 sqq., i. 178; cf. also Abû Yûsuf, Kit. al-Khârîjî, Bûlûk 1302, p. 80). In the Hadîth it is related how 'Umm Habîba and Umm Salama told the Prophet of a church in Abyssinia adorned with images (al-Buhîrî, Sahîh, bâb 48, 54; Dâma', bâb 70; Manâbî al-Anfûsî, bâb 57).

Maqârîsî denotes synagogues as well as churches by the word kanîs (al-Khâfî, Bûlûk 1270, ii. 464 sqq., 510 sqq.).

In Spain and in the Maghrib the Form Kanîsîya (perhaps influenced by iglesia) was in use; it is still current in Morocco and Tunisia (vgl. Dozy, Supplement, ii. 493).

In the modern language kanîs denotes a church, kantîs a synagogue (al-Bastânî, loc. cit.). For the Egyptian dialect cf. S. Spiro Bey, Arabic-English Dictionary, 2nd ed., Cairo 1923, 95.

Al-Kanîsa or al-Kanîsa al-Sawâdîs was a town with a stronghold in the frontier province of Northern Syria, which Harûn al-Rashid restored from its ruins (Yâkût, iv. 314; cf. i. 927, 20; al-Lisâkhrî, B G A, i. 63, 7; 68, 2; vgl. Le Strange, op. cit., p. 477 sqq.). — Al-Mu'âddâst, B G A, iii. 2, 453, 9 mentions a place K. al-Ma'âdûs at a day's journey from Arradân. — A harbour in Yemen on the Red Sea in the neighbourhood of Zabîd also bore the name of al-Kanîsa (al-Firâzâbâdî, loc. cit.; Tadî al-Arâis, loc. cit.). According to Tadî al-Arâis, loc. cit., Kunnisîya occurs in several names of places in Egypt.

On the rules for churches laid down by the Muslims cf. the art. Nâshir.

**Bibliography:** In addition to the literature mentioned in the art. S. Frankel, Die aramäischen Fremdwörter im Arabischen, Leiden 1886, p. 275. (C. van Arendonk)

KANO (in Hausa Kanû), a town in the Central Sudân 300 miles west of Kûka and 290 E.S.E. of Sokoto, 1200 feet above sea-level, situated in 12° 27' N. Lat. and 8° 20' E. Long. (Greenw.). Kano lies in the middle of a marshy plain dominated by the isolated rocky hills of Goron Duchî and Dalâ. The town is surrounded by a fortified wall (birnî) 20 to 25 feet high and measuring, according to Barth, nearly 20 miles in circumference. A portion of the area thus mapped out is occupied by tilled fields especially in the West and North-west. The houses are grouped in the South between Dalâ and the wall. The town divided into two by a marshy pond called Dîkàrâ (Robinson: Jakhara) is formed of mud.
houses. Only the houses of great personages or of Arab traders or rich Hausa merchants are provided with an upper story. The number of inhabitants, estimated by Barth at 30,000, would, according to Monteil, amount to 50,000 or 60,000, according to Robinson, to 100,000, according to the reports of the English officials in Nigeria, to 200,000. This population comprises very diverse elements, Hausa, Fulah, Kanuri and Arab; of whom 2/3 (Robinson) or 4/5 (Monteil) are slaves. In addition to the fixed population there is a very large floating one, reaching, according to Monteil, the figure of 200,000 individuals a year.

This accession is explained by the economic role of Kano. The commercial metropolis of the whole of the Sudân and at the same time a much frequented stage on the pilgrim route to Mecca. Representatives of all the negro races from the mouth of the Niger and Senegambia to Bornu and Kordofan meet there with Tuaregs and Arabs from Gbadamós and Tripolitania. Every day a market is held there attended by over 30,000 people. Business is done through the intermediary of brokers, and owing to the scarcity of currency settlements are made most often with cowries; some transactions are carried through by simple barter. The principal articles of commerce are clothes and garments of local manufacture, leather, salt brought from Bilma, saton and above, the kola nut from the Western Sudân, which is perhaps the most important element in the commerce of Kano. To these we must add sugar from Egypt, gunpowder, paper, iron-mongery, cotton goods of European origin, ostrich feathers and ivory to a small extent and finally slaves. The articles sent to or brought from Gbadamós or Tripolitania are carried by Arabs settled in Kano to the number of 400 or 500. But the Sudânese trade, which makes up 4/5 of the total transactions, is entirely in the hands of Hausa merchants.

Kano is not only a great centre of commerce; it is also a centre of native industries. Weaving and dyeing flourish there. The manufacture of cotton goods is so active that the town has been given the name of the “Manchester of the Sudân.” Robes (tobi) dyed black are much esteemed and exported to all the neighbouring lands. Metal work occupies numerous smiths, who make hunting spears and stirrups as well as ornaments in copper and silver. The leather dyed yellow and red called morocco is very much esteemed and exported as far as Morocco and the markets of Tunisian and Tripolitania. The same is the case with the leatheracks indispensable for caravans.

The province of Kano is very fertile. As early as the xvith century we find Leo Africanus remarking the abundance of cattle, the richness of the soil, the extent of the fields of rice, cereals and cotton. The observations of modern travellers coincide with those of this early writer. The province of Kano, says Barth, includes 27 walled towns with 300,000 inhabitants and an equal number of slaves. “All the ground”, says Monteil, “is cultivated for a distance of 60 miles round the town.” Robinson notes the large number of separate farm places surrounded by plantations of tobacco, indigo, cotton and dura (isorhüm vulgaris).

A tradition noted by Robinson attributes the foundation of Kano to a group of refugees from Daura, a place three days’ journey to the North, led by a certain Kano, son of Bawo. The latter, it is said, built a new town at the foot of the rocks of Goron Duchi and Dala, on the top of which had long been planted. According to Barthe, Kono was the son of Biran and brother of Daura. He would thus be one of the seven “legitimate Hausas” (see Hauša, iii. 391b). Another tradition to the effect that Kano had been appointed by his father Sarekëbala, i.e. chief of the other, attests the antiquity of this industry in the town. The date of the foundation is uncertain but it seems that by then Kano was already of some importance. In the second half of the xvith century A. D. education was held in honour in the town. Scholars had settled there on returning from the pilgrimage and were teaching theology and Maliki law. The celebrated “Abd al-Kadir al-Marjâfl taught there. At the beginning of the following century, Leo mentions Kano as a town filled with rich merchants and artisans. These facts seem to invalidate Barth’s statement that at this date Kano could only have been a citadel built on the rock of Dala. The king of Kano had subjected to his authority the kings of Seggeg and Katene, but he was in his turn conquered by the Sultân of Timbuktu, Muhammed Askia, and was reduced to the state of a tributary. Later the kings of Kano had to endure incessant fighting against the Sultân of Bornu, who even annexed Kano to their empire. The Bornuâin governor, however, was driven out by king Korâa and Kano regained its independence. The invasion of the Fulah at the beginning of the nineteenth century increased the commercial importance of Kano, as the merchants of Katene sought refuge there after the capture of the latter town by Oùmmâ Dan Fodio in 1814. Kano was, however, not long in falling in its turn. On the dismemberment of the Fulah empire, the town was included in the kingdom of Sokoto. The country was administered by a governor (sekül), who paid the Sultân of Sokoto an annual tribute (100 horses, 15,000 robés and other garments, 10,000 turbans etc. in the time of Bâdi). The Anglo-French agreements of Aug. 5, 1884, and June 14, 1898 having placed Sokoto within the zone of British influence, British representatives attempted to settle in Kano. These first attempts were unfortunate. Rev. C. H. Robinson (1893) and Wallis, a British official of Nigeria, were able to visit the town where the French traveller Monteill had already spent three months (1891—1892) in his journey from St. Louis to Lake Tchad, but Bishop Tagwell’s mission was badly received and he had to withdraw. The effective occupation of Kano only took place in 1908 after a military expedition led by Sir Frederick Lugard.

KANSU, a frontier province in the north-west of China proper; it is bounded on the south and east by the provinces of Sze-čuán, Shensi and Shansi, in the west and north by the territory of Kukuon, Chinese Turkestan (formerly included in Kansu, but since 1854 the separate province of Sin-Kiang) and Mongolia. With its present area of 5910 geogr. sq. m. = 125,483 sq. miles, Kansu is the third largest province of China but as regards density of population it is materially inferior to all the other provinces of China with the exception of Kuangsi. The province first formed under the Emperor Kūibīlāi in 1282 A. D. is said to have received its name from two towns in the extreme north-west, Kānčōu and Sūčōu; both towns are mentioned in the Khazīd el-Ālam and in Gardīzī (cf. W. Barthold, Olocti o połweakie v Irăn, p. 92), the former in the form Khamā (in the Mongol period Kamān or Kamči), the second as Shākēr (later Shūkā or Sükē).

Down till the xiiiith century A. D. this territory was for the most part under the rule of foreign peoples of Turki (Cigur) or Tibetan (Tangut) origin; immediately before the Mongol conquest there was a Tangut kingdom here under the rule of the Hia (or Sī-ku) dynasty (1032—1227) with its capital in Ning-hia. Rashīd al-Dīn (ed. Blochet, p. 484 sqq.) in giving a list of the twelve provinces (zhūn, chin. shên) reckons two with capitals Kincānǐ (now Sīan-fu, capital of Shensi) and Kamči (Kančōu) respectively to Tangut (Tangkūt). In reality Kančōu was at this time the capital of Kansu: Kansu and Shensi then as now combined in one governorship, the only difference being that the residence of the governor was in the capital of Shensi and not, as now, in the capital of Kansu. The boundary between Kansu and Shensi was formed by the Hoang-ho, so that the present capital of Kansu, Lančōu-fu, then belonged to Shensi. In connection with Kincānǐ Marco-Polo (ed. Vavon and Cordier, ii. 24) mentions prince Mangalai (d. 1280; called Mingkalai by Rashīd al-Dīn), Kūibīlāi's third son, as ruler of Tangut, while Rashīd al-Dīn (p. 495 sq.) gives his son Ananda; Rashīd al-Dīn says that Ananda was the founder of the dominance of Islam in this region. He was born about 1270 (in the early years of the xiiiith [xivith] century, he was 30 years of age, ibid., p. 603, 6) and was brought up by Muhammadan foster-parents (ibid., p. 599 sqq.); but it was only after the conversion of Sulṭān Ghaźān in Persia (i.e. about 1295; cf. GHAŻĀN, ii. 1149 sq.) that he openly professed Islam (Rashīd al-Dīn, p. 602). The greater part of his army, said to have numbered 150,000 men, was converted to Islam (ibid., p. 600); the people of Tangut, except the peasants, likewise adopted Islam (ibid., p. 599). Taken to task by his cousin, Kūibīlāi's successor Timūr (1294—1307), for his conversion, Ananda remained faithful to Islam and after a period of interruption was restored to his dominion. In 1307 a party wished to raise him to the throne; he was therefore killed after the success of another claimant, Timūr's nephew Khāshān (1307—1311) (d'Ohsson, Histoire des Mongols, i. 525 sqq.). Not till 1323 was Ananda's son Uruklīmī again appointed prince of Tangut (Blochet, in Rashīd al-Dīn, p. 317 note 3; cf. W. Rockhill, The Land of the Lamas, London 1891, p. 40), although no Muhammadan risings are mentioned for this period. The story which reached Timūr's lands about 1398 to the effect that the founder of the Ming dynasty had had about 100,000 Muslims slaughtered and had completely rooted Islam out of his kingdom (Niğān al-Dīn Shāmī and 'Abd al-Razzāk al-Samarkandi in Barthold, Ulugbek, Petrograd 1918, p. 42 sqq., note 6) finds no confirmation in any Chinese source. Under Manchu rule (from 1644) risings of the Muslims of Kansu are mentioned by 1646 and 1648 and have been several times repeated in the xviiith and xixth centuries.

In Kansu those who profess Islam are at the present day certainly more numerous than in the other provinces (the figures are very variously estimated; cf. the article CHINA, i. 847). The most important centre of Muslim life and culture was until quite recently Iločōu (south-west of the capital Lančōu-fu), "the Chinese Mecca". Iločōu was at an earlier date considered a purely Muslim city (about 30,000 inhabitants) in the year 1884 the traveller G. Potanin (Tangutsko-Tibetskaya Ukraina Kitaya, St. Petersburg 1893, i. 169) was told that there were no longer any Muslims at all there; later the Muslims were only allowed to live in a separate suburb there (Mission d'Ollont, p. 235). The Muhammadan area in Kansu is divided into two separate tracts, Iločōu-Sining in the south-west and Ninghia-Kintsip'ü in the north-east; in the intervening area the Chinese have built hill-forts (ibid., p. 253). Kintsip'ü, sometimes called "the Chinese Medina", was first founded by the religious reformer and leader of a rebellion, Ma Hua-lung (cf. CHINA, i. 849).

In the xviiith century there still seem to have been more Muslims in Shensi than in Kansu (Dabry de Thiersant, Le Mahometisme en Chine, i. 41 and 156); their language and dress were also different from those of the Chinese (ibid., p. 155). This suggests that the modern Dangans or Tungans (cf. CHINA, i. 850) did not adopt the Chinese language until a later date.

The rebellions were usually local movements, not general risings under the banner of Islam. During the great rebellion in Kansu, which began in 1871, there was perfect quiet in Shensi (Dabry,
The rebellion which had begun in 1861 or 1862 in Shensi was only spread to Kansu by the expulsion of the rebels from Shensi. The fighting was carried on with even greater bitterness in Kansu than in Shensi and had the most disastrous effects on the Muslim population as well as on the economic prosperity of the province generally. Just as at an earlier period the number of Muslims in Shensi had been considerably reduced by the expulsion of the rebels into Kansu, so now (since 1872) a considerable part of the Muslim population of Kansu has migrated westwards under the leadership of the valiant Boyan-akhün. The birthplace of Boyan-akhün (also written in Chinese Bo yan-hu or Bai Yen-hu; his Muslim name was Muhammad Ayyüb) is variously given; he had lived for a long time in Pekin and only moved to Kansu shortly before the rising. In December, 1877, Boyan-akhün with the remainder of his army crossed the Russian frontier into Semirech'ë; the Chinese authorities demanded (of course without success) that he should be handed over to them. After his death in 1883, he was celebrated in songs as a national hero by the Dungans settled in Semirech'ë; whether his memory is still revered in Kansu also, does not seem to have been ascertained. The last rising (1895/1896) was started by the Salar and is said to have been provoked by the proclamation of their Chinese governor ordering that in future one Chinese should be regarded as equal in value to ten Muslims. There seems to have been no activity in Kansu against the present Republic government.

**KANSU**

Al-Malik Al-Ashraf Saif Al-Din Baïberdî (i.e. Baïberdî's Mamlûk) al-Ǧûrî (originally pronounced in Eastern Persian with ǧ and later there and in Egypt with ǧ), of the "al-Ǧûrî" division of Mamlûks from Afghanistan, which was specially instructed in the Korān and theological subjects. He served for a long time as a khâṣîkî (lieutenant) and Dîjāmâr and only when he was about 40, he became governor of the province of al-Bahiya [see Bahriya], and in 893 (1490) Hâjî [q.v.], al-Husaynî (president of the military court) in Aleppo, where he gave proof of his great energy in the suppression of a rising. In 903 (1497) he became Mahdîyâl-dîn al-Dînî (commander of a thousand Mamlûks) and two years later Râis aṣârâr al-Dînî (commander of the Mamlûk officers) under Sulṭân Dîjâlî [q.v.]. The latter's rival and successor Tûmânbâbi during his brief reign in 906 (1500) appointed him Grand Dâwâdâr [see Dâwâdâr] and, as often happened in the last period of the Mamlûk dynasty, at the same time Grand Ustâdâr (Grand Chamberlain), vizier and Kâşîf al-Kâshâf (chief inspector of domains). The choice of the Mamlûks therefore, as a result of his high position, naturally fell upon him, when after a few months they were discontented with Tûmânbâbî; after considerable hesitation he accepted, as he was now over sixty. By inflicting heavy taxes and levies and issuing a depreciated currency he ruthlessly raised the money to pay the old Mamlûks and to buy new ones in order to create a following. In his financial measures he did not even respect the privileges of the pious foundations and by depreciating the currency in commerce and trade, and extorted money from merchants, women, eunuchs and from his own court-officials down to the very door-keeper. All this is made a very grave reproach against him by his contemporaries; it was even cast up against him in the Friday sermon. The chronicles number him among the "bad Sulṭân". He hurried on the financial ruin of his country by over-heavy taxes on the sales of goods and by oppressive customs duties, even although he made good use of a great part of the money by strengthening fortresses (notably Aleppo), making roads and wells in the Hijâz and in providing water by good aqueducts (e.g. the aqueduct in Cairo). One great source of revenue in these days was the harbour and customs dues on Indian goods, which then had to be brought to Europe via Egypt (Aden, Jeddâ, Suéz, Alexandria) or Syria (Hermûr, Başra, Aleppo). To avoid these oppressive dues, the Portuguese staked everything on finding the sea route to India, which Vasco de Gama finally succeeded in doing. The Portuguese then gradually established themselves on the coasts of India and brought their great quantities of goods directly to Europe by the Cape of Good Hope. In this way the excessively high costs of passing through Egyptian ports as well as the cost of overland transit were avoided and the profits went to the Portuguese. These losses in revenue could not be tolerated by Sulṭân al-Ǧûrî; besides, he felt it his duty as first ruler in Islam, as plenipotentiary of the Caliph and as a servant of the holy places of Mekka and Medina to come to the help of the oppressed Muslims in India. The first encounter with the Portuguese took place in 909 (1503) when the latter robbed an Egyptian ship coming from India of its cargo and sent it to the bottom. Sulṭân al-Ǧûrî tried at first to get redress by peaceful means by sending the Grand Prior of the Sinai monastery to the Pope with a letter of complaint, threatening to destroy the holy places in Jerusalem if King Manuel of Portugal did not cease from oppressing Muslims in India and from conducting hostilities against his merchant-ships. The mission failed in its object as King Manuel knew quite well that the Sultan's interest in the great profits derived from Christian pilgrimages would prevent him from going to extremes. Sulṭân al-Ǧûrî had
therefore to make up his mind to equip a considerable fleet, especially as 17 Arab ships were destroyed in 910 (1504) in the Indian harbour of Panane. The Sulṭān was interrupted even in the building of his fleet by the fact that the Knights of St. John in Khodais captured a consignment of wood intended for Egypt. To secure a base for his naval war against the Portuguese, the Sulṭān dispatched several expeditions to keep the coast of Arabia under his control; his able general Ḥusain fortifled Djiidda with walls and towers and made the harbour a base for the fleet. The first encounter in the Indian harbour of Shāhul between Ḥusain and Lorenzo, son of the Portuguese viceroy, in 914 (1508) ended in favour of the Egyptians, who were supported by the fleet of the Muslim governor of Dji, Lorenzo perished and the Admirals' ship was burned. But the very next year the Admiral avenged his son's death, destroyed a part of the Egyptian fleet (the Indian ships kept aloof) and forced Ḥusain to a hurried retreat into the Red Sea. Hostilities between the Portuguese and Egyptian continued in the following years, a strong Portuguese fleet even attacked Aden but without any lasting success. A new fleet was then sent to India by the Sulṭān. But when it reached Djiidda, the political situation in Egypt had changed. In 922 (1517) the Ottoman Sulṭān Selim I seized Cairo and thereby became protector of the Holy Cities as well as master of the western coast of Arabia. Selim Selim, who cared little about expansion towards India, as his interests lay in the direction of Asia Minor and the Balkan lands, at the request of the Mekkans, recalled Ḥusain, in spite of his successes, along with his subordinates, who held other parts of Arabia, and had him executed on account of his numerous acts of cruelty to the people of Arabia. The Egyptian fleet had to return. The Portuguese on their side were content with the successes they had won, as they had succeeded in diverting commerce from the route through the Red Sea. After the appearance of the Portuguese in the East and the alteration of the trade-route the most important source of revenue for Egypt gradually dried up so that Sulṭān al-Ğûrî, for want of an intelligent system of taxation, had to fall back on extortion and the oppression of his subjects as he could do nothing else in view of the disorganisation of the finances. Thus it was not possible for him to pay his Mamlûks well so that his rule now lacked a firm support. His foreign policy also was unsuccessful. From fear of the powerful Selim, he made an alliance with the latter's most bitter enemy Ismā'îl [q. v.], the ruler of Persia. In 922 (spring of 1516) Sulṭān Selim entered Asia Minor, ostensibly to fight against Shāh Ismā'îl. Sulṭān al-Ğûrî went to Aleppo under the pretext of acting as intermediary between the two rulers. To show his peaceful intentions he had brought with him the Caliph and the chief kāfîs but had in secret promised Ismā'îl his support. Selim learned of this through spies and was not deceived by the friendly reception accorded his envoys by Sulṭān al-Ğûrî. To make it unseizable, he maltreated al-Ğûrî's envoy, had his attendants killed and sent him back ignominiously on a rule, with a declaration of war. Sulṭān al-Ğûrî's cause was hopeless from the first as he was not sure of his generals. He could neither protect his subjects from the extortionists and acts of cruelty of his governors nor could he rely on their fidelity. Although several times warned, he entrusted the command of the left wing to the governor of Aleppo, Khaṭīb; but at the first charge the latter left the battle with his troops and soon after the beginning of the battle the aged Sulṭān fell from his horse, struck with apoplexy. According to his biographer, his body was never found; others say that a Mamlûk cut off the head from the body and took it to Sulṭān Selim. On the rapid occupation of Syria and Egypt and the last desperate battle of the Mamlûks see the articles Sulṭān and Ǧumâkâr. Although Sulṭān al-Ğûrî had tackled his task with energy, he could neither make friends nor bring order into the chaos of the finances. His attention was always directed only to immediate profit and to making ends meet somehow, while he was not sure of his Mamlûks and Amirs. He had no sense of justice nor a proper appreciation of relative strengths. Besides there was his aversion to the new arms, artillery and titles, due to a certain disinclination of using long range weapons, which it did not require personal bravery to carry. The rapid victory of the Turks and the superiority of the Portuguese was certainly to some extent due to the objection of Sulṭān al-Ğûrî and his knights to proper training with firearms, as is especially mentioned by Ibn Ǧiyâs.[2][3] In the Kurân in the Suratānnya Library, Cairo, written for him, his name is spelt Kansaw Chaww; see E. Denison Ross in Bulletin of the School of Oriental Studies, ii. 334 (London 1922); Red. Bibliography: Weil, Geschichte der Chalifen, v. 334–416; v. Hammer, Gesch. des Osmanischen Reiches, Pest 1827 sqq., ii. 462 sqq. (in both, the principal Oriental manuscript sources as well as the contemporary chronicles and consular reports of the west are given). Ibn Ǧiyâs deals with the reign of Sulṭān al-Ğûrî in the Badâ'ī al-Zujur [see Ibn Ǧiyâs]; but only the end is printed in the Cairo edition, the years 906–922 are contained in the Paris manuscript, Bibl. Nat., de Siane, Cat. No. 1824 (years 906–913) and in the St. Petersburg manuscript, Rosen, Les manuscrits arabes de l'Hist. des Langues orient., No. 469 (the years 913–922). The full biography by Ibn al-Ḥânballi has not previously been utilised; see Ibn al-Ḥânballi's Durr al-Ḥabab fi Tarikh Ayîn Ḥilâb, Ms. Vienna, Flügel, Die arab. Handschr. der Hofbibl., ii. No. 118, (cf. Brockelmann, Gesch. d. arab. Lit., iii. 368), f. 176b sqq.; J. J. Marcel, Hist. de l'Égypte depuis la conquête des Arabes, etc., Paris 1834, p. 407–11; W. Muir, The Mameluke Slave Dynasty, London 1896, p. 187–201. On his building operations or detailed particulars will be given in the coming work on inscriptions in Aleppo in the sections "citadels and city-walls" on his buildings in Damascus see M. Sobernheim, Die Inschriften der Zeit der Zitate von Damaskus, No. 24–26 in Der Islam, xii. (1921); on commerce in his time see B. Moritz, Ein Firmen des Sultans Selm in der Fetscher, Ed. Sachau, gewidmet, Berlin 1915, p. 425–27. On his wars with Portugal see S. Rupe, Gesch. des Zeitalters der Entdeckungen (Samml. Ocken, ii. 9) and H. Schaefer, Gesch. Portugals, iii., Hamburg 1850, p. 200 sqq.; R. S. Whiteway, Rise of Portuguese Power in India, London 1899. For his coins see Or. Coins, in the Cat. Brit. Mus. iv. 214–216. (M. Sobernheim)

**THE ENCYCLOPAEDIA OF ISLÂM, II.**

721
KANTARA, plur. kānātir, means in Arabic (1) bridge, particularly a bridge of masonry or stone; also (2) aqueduct (especially in the plural), dam, and finally (3) high building, castle (similarly kāsīl = aqueduct from kāsīl = castle- lum; see kānātir); cf. Tilī al-ʿArabī, iii. 509; 192, Supplement, ii. 35; B.G.A. iv. 334; and particularly R. Geyer in the S. R. A. Ak. Wien, 1905, vol. citix, No. 6, p. 114—119. The original meaning of the word, "arch", is found in the earliest Arabic lexicographers; cf. Dozy-de Goeje, Description de l’Afrique et de l’Espagne par Edret, p. 369. Dīlīr, a bridge of wood or boats, is the opposite of kāntāra, which is of stone; in time, however, the two words came to be used as synonyms (see Dozy, op. cit., i. 194).

No satisfactory explanation has yet been given of the origin of the word. The oldest reference is found in a verse of Tārās (iv. 22; see Tāwāsīt of the Six Ancient Arabic Poets, ed. Ahlwardt, 1870, p. 55). On account of this early occurrence of the word, Yāḥyā (Muḥammad, ed. Wüstfenfeld, iv. 187) considers the word to be genuine Arabic. But we may with considerable certainty regard it as a loan-word. Volland and Geyer thought it borrowed from Latin or Greek. The former connected (Z.D.M.G. li. 376; Z.A., viii. 160) kantāra with the mediaeval Latin word cenitrum (French cintre, arch, vault), while Geyer (op. cit., p. 118—119) sought the original either in κατάντης = basket, καταντίρις = wickerwork used in the making of roofs and buildings, or in κάντρων, κάντριον = depository (cf. also κάντριτ = rousing, from which Volland, Z.D.M.G., li. 302, derived Egyptian-Arabic kāntūr). But all these explanations had best be rejected, because there are phonetic objections to them and they partly rely for the meanings of the words cited on obsolete, far-fetched glosses of, on the other hand, Fränkel in the Z.A., ix. 279 sqq. and Noldeke, op. cit., p. 409. Kantāra is most probably derived from the Aramaic and, as Noldeke, op. cit., thinks, in the first place from kāʿīrā = bond, arch (see Payne-Smith, Thesaurus Syriac, col. 3591; note especially kāʿīrā in Bar Bahlūl, Lexicon, col. 1765). The above mentioned word dīlīr also comes from the Aramaic (Fränkel, Die aram. Fremdwörter im Arab., Leiden 1866, p. 285 and D. H. Müller in IV. Z. K. M., i. 31), but can actually be traced back to the Assyrian or Accadian; cf. Meissner in the Z.A., ix. 269, and Zimmerm, Akkadische Fremdwörter, Leipzig 1915, p. 31.

Al-Kantara has survived in Spanish in the diminutives alKańtarrila = little bridge, gutter and alkańtarritolo = arched aqueduct; see Dozy-Engelmann, Grammaire des mots espagnols et portugais dérivés de l’Arabe, Leiden 1869, p. 47; Diccionario de la Lengua Castellana por la Real Academia Española 13, Madrid 1893, s. v.

Al-Kantara and Al-Kanīr are frequently found — sometimes with descriptive additions e.g. Kānantār Firʿawn — as names for places like quarters of a city (notably in Baghdad) in areas where Arabic was, or is, spoken in the mediaeval or modern East. In his geographical dictionary (Mudjam, ed. Wüstfenfeld, iv. 180, 187—192, vi. 179—180) Yāḥyā gives a dozen places named al-Kantara and four called Kānantār; cf. also, for example, the inscriptions of al-Tābari, ed. de Goeje, p. 759—760, and Ibn al-Mārī, al-ʿAṣālī, ed. Tornberg, xiii. 790. For the numerous districts of Baghdad named after particular bridges under the Caliphate see the index to Guy le Strange, Baghdad during the Abbāsid Caliphate, London 1900, p. 368.

Of the places named al-Kantara, the following are worthy of special mention:

1. An oasis on the southern slopes of the Atlas in Algeria; it is a narrow pass through which run the road and railway from Constantine to the desert regions; it is a station on the Constantine-Biskra line, 35 miles north of the latter.

This, the most northern oasis in Africa, consists of three villages with about 3,500 inhabitants and possesses a very dense date grove. From its situation it was an important military station and, as Roman inscriptions found there show, settled in ancient times. It is presumably identical with the station Ad Caetara Hereditis of the Roman itineraries; see Dessau in Pauly-Wissowa, Realencyclo. der klassischen Altert. Wissenschaft, iii. 1345. The name al-Kantara is derived from the Roman bridge, restored in 1866 by the French, which spans in one huge arch the ravine, the 150 feet wide Fumma al-Ṣahāra = the mouth of the Safārah (so-called by the natives), through which flows the Wād Al-Kantara; cf. for example, Vivien de St. Martin, Diction. de Geographie Universelle, Paris 1879, i. 66 and Kohl, Reisen und wundare Züge aus Algerien und Tunis, 1883, p. 322.

2. Al-Kantara, a little town of great antiquity in the province of Caceres (district of Estremadura) in Spain, near the Portuguese frontier, with 3,200 inhabitants. It receives its name from an imposing granite bridge, built in 150 A. D., which crosses the Tagus in six great arches to the north-west of the town. The place is also famous for the order of knighthood founded there in 1170 to defend the frontier against the Moors, which became called the Alcantara Order after its headquarters were moved to this town in 1215; see Baederker’s Spain and Portugal 1, Leipzig 1913, p. 455.

3. A small town with a mosque in Egypt, on the Asiatic side of the Suez Canal, halfway between Port Saʿīd and Ismāʿīlīya, a station on the railway connecting these two towns. It lies on a low narrow tongue of rising ground, which runs out between the large Menzaleh lake in the north and the little Balāb lake in the south. But it hardly takes its name from this "land bridge", but from a bridge which already existed here probably in the early Middle Ages.

The Arab geographer Ibn Faṣīl Allāh al-Ummārī, who wrote about 741 (1340), mentions the arch of a bridge, called Kantarāt al-Dīlīr, near the old caravan station of al-ʿAṣālī, in which the superfluous waters flowed into the desert at the time of the Nile’s inundation. There was still a bridge here at the beginning of the nineteenth century, built over a canal connecting the two lakes already mentioned. The modern al-Kantara has only arisen on its present site since the making of the Suez Canal. The old settlement was a short half-hour’s journey to the east and is marked by the mound of ruins Tell Aḥā Sēfe (on the maps also called Tell al-ʿAḥmar). This place may be regarded as the key to Egypt, and it has always been used by conquerors as the gateway to the Nile valley. Its strategic importance led to its being occupied in remote antiquity. Tell Aḥā Sēfe (with ruins of a temple of Rameses II and remains of the Ptolemaic and Roman period)
KANTARA — KANUN-I ESASI

marks the site of the ancient Egyptian town of Zaru (Τζαρ), the capital of the fourteenth district of Lower Egypt, which was already a fortress in the time of the Middle Kingdom. In the later classical and Byzantine literature it appears as Sile, Sele (Selle); according to a Latin inscription found here, it had a Roman garrison in 288 and was later also the see of a bishop. In the Middle Ages it was called al-‘Aḵula (on the name al-‘Aḵula = “the bend” see above s.v. Dair al-‘Aḵula), a name which was temporarily supplanted by that of the castle of al-Ḵuṣair during the Mamluk period. In the World War (1914—1918) al-Kantara played an important part in the struggle for the Suez Canal. From November, 1914, to March, 1916, there were frequent encounters there between English and Turkish troops; cf. thereon, for example, Baer, Der Volkerkrieg. Eine Chronik der Ereignisse seit dem 1. Juli 1914, Stuttgart 1914 sq., iv. 220—232, viii. 367, xi. 318, xvii. 47 sq., 128, 130, 132.

In remote antiquity as well as in the late Middle Ages and modern times, al-Kantara was the point of departure for the caravan road from Egypt to Syria. Since the World War the new railway line to Syria has branched off here from the Port Said—Suez line, and runs from al-Kantara via Kaṭya, al-‘Ariṣ and Qahara to Ludd, where it links up with the line from Yafā to Jerusalem.

5. Kaṭarāt Zaynab in the valley of the Nahr Bahrūt in Syria, an ancient Roman aqueduct of which considerable remains exist at the present day; according to Arab legend, it was built by Queen Zenobia (Zaynab); cf. Fr. Müller, Studien über Zenobia und Palmyra, Diss. Königsberg 1902, p. 14 sq.

6. Kaṭāṭir Firāw ("Pharaoh’s aqueduct"), a great aqueduct in the south of Syria, which, beginning at Dillī, at the western foot of the lava plateau of Lēdā (west of Ḥawrān), runs in a south-western direction for some sixty miles as far as Mukās (Gadarra), providing many villages with the necessary drinking-water in the summer months. It is identified by Wetstein — probably rightly — with the Kaṭanār mentioned by Ḥamza al-Isfahānī (Amadā, ed. Gottwaldt, p. 117). But the Ghassāni̊d Dhābala b. al-Ḫārijī, who reigned about 500 A.D., and hardly as Ḥamza says, be the builder of this marvellous piece of work; see Nöldeke, Die ghassāni. Fürsten ... in the Abh. Fr. Akad., 1887, iv. 50; it certainly dates back to ancient times. For further information see Wetstein, Reiserbericht über Hauran und die Trachonîn, Berlin 1860, p. 123—125.

The diminutive ʿKūnaitira (popularly ʿKūntira or ʿKenēṭri) is occasionally used as a place name, e.g. a village in the district of Djiwān (Eastern Jordan); see Baedeker’s Palestine and Syria (1912, p. 268. (M. Streck)

KANUN, the name of a month, which is found as early as in inscriptions from Palmyra (see S. A. Cook, A Glossary of the Arabic Inscriptions, s. v.) and corresponds to Mareššāwān. It later appears among the Syriac names of the months (see Payne Smith, Thesaurus Syr., s. v.) as K. ḥadīm or ḥadīm and K. ḥray or ḥraṣā. Here the two K. are the ninth and tenth months respectively. Al-Birrānī, Kitāb al-ʿAṣar al-kabīr, ed. Sachau, p. 60, transcribes the Syriac forms exactly as K. ḥadīm and K. ḥray. In Arabic terminology they are called K. al-ʿaṣarā‘ and K. al-ʿabbarīn. In the Ḥadīth the former appears in a remarkable connection. In Muslim, Aṣḥaba, Trad. 99, a reason is added for the regulation, often mentioned elsewhere, that vessels should be kept covered: "for there is a night in the year in which the wasa‘ passes no uncovered vessel". In another version of the same tradition it is added: "foreigners (ʿalāḏi̊m) among us used to fear this in ʿKūntir al-ʿaṣarā‘". (A. J. Wensinck)

KANUN, a musical instrument, consisting of a flat thin quadrilateral box string with wire chords, which is laid on the knees and played with a key of metal fixed on the forefinger, like the zither (Lane, Modern Egyptians, ii. 70, 72; Salvador Daniel, Musique Arabe, p. 37).

KANUN (from the Greek κανών), canon, custom, law. The development of the Muslim empire, its vast conquests which brought it into contact with peoples of very different characters, who for the most part had laws already codified, the rise of commerce and industries and the institution of regular troops forced the governors to establish alongside of the sharīʿa or religious law a series of special enactments by the application of the principle of ṣafṣa‘ lā x-. It is these edicts that are called kanūn (plur. kanūnī). The Berbers give this name to their own statutes, their customary law; see Hanoteau and Letourneur, La Kabylie et les coutumes Kabyles, Paris 1873, ii. and iii.; Morand, Les Kanouns du Maâd in the Études de droit musulman algérien, Algiers 1910; Masquary, Formation des cités chez les populations arabes sidentaires, Paris 1886, p. 74 sqq.; Archives berbères, i. and ii.; Le droit Kabyle, 2nd ed., Paris 1917; Henri Basset, Essai sur la littérature des Berbères, Algiers 1919, chapter v.: La littérature juridique des Kanouns.

(Ch. Huart)

KANUN-I ESASI, "fundamental law", the name given to the constitution of the Ottoman empire dated Dhu l-Ḥijja 7, 1293 (Dec. 24, 1876), promulgated by a khatīf-i sharif of the same date addressed to the Grand Vizier Mîhdât Pasha. It maintains the order of succession of the family of Oghlan and explicitly gives the Sultan the title of Khalifa (art. 3), protector of the Muslim religion (art. 4). It confirms his sacred and non-responsible character (art. 5). It enumerates the rights of Ottoman subjects (art. 8—26), the duties and responsibilities of the ministers (art. 27—38) and other officials (art. 29—41); establishes a parliament (medfīs-i ʿumūmî), consisting of two chambers, the Senate (Hüy̲î-tî dāyān) and the
